WM. Learmonth,

Clerk Executive Council per interim.

EXHIBIT E. NEW BRUNSWICK. [1 Geo. V, ch. 10.]

Every timber license or permit conferring authority to cut spruce or other softwood trees or timber, not being pine or poplar, suitable for manufacturing pulp or paper, on the ungranted lands of the Crown, shall contain and be subject to the condition that all such timber cut under the authority or permission of such license or permit shall be manufactured in Canada—that is to say, into merchantable pulp or paper, or into sawn timber, woodenware utensils, or other articles of commerce or merchandise as distinguished from the said spruce or other timber in its raw or manufactured state; and such condition shall be kept and observed by the holder or holders of any such timber licenses or permit who shall cut or cause to be cut spruce or other softwood trees or timber, not being pine or poplar, suitable for manufacturing pulp or paper under the authority thereof, and by any other person or persons who shall cut or cause to be cut any of such wood trees or timber under the authority thereof, and all such wood trees or timber cut into logs or lengths or otherwise shall be manufactured in Canada as aforesaid. It is hereby ordered that the cutting of spruce or other softwood trees or timber, not being pine or poplar, suitable for/manufacturing pulp or paper into cordwood or other lengths is not manufacturing within the meaning of this section.

## EXHIBIT F. NEW BRUNSWICK.

NEW BRUNSWICK.

[Mar. 20, 1913, 3 Geo. V. Act re timberlands of the Province.]

A license, to be known as "the pulp and paper license," which shall contain as part of its conditions the following provisions and requirements: At least 50 per cent of the lumber cut yearly upon the said Crown lands under such license shall be manufactured into pulp and paper or other manufactures of pulp within the Province of New Brunswick; that the licensee agrees, upon taking out the license, that he shall acquire or erect and operate a pulp mill within three years of the date of taking out of such license, and that he shall acquire or erect and operate a paper mill or other mill which manufactures goods into which pulp largely enters as raw material within five years from the same date, and that both the pulp and paper mill, or other mill, as aforesaid, shall be of sufficient capacity to manufacture the quantity of timber above mentioned, and, further, that the operation of such pulp and paper mill, or other mill, as aforesaid, shall be continuous from year to year, such licenses to be renewable for a period of 30 years, and shall be subject to an extension for a period of 20 years from the termination of the 30-year period upon the condition hereinafter provided; the renewal from year to year for the 30-year period and the yearly renewals during the extended period of 20 years to be subject to a satisfactory compliance on the part of the licensee with such rules and regulations as may be made from time to time by the licentenat governor in council in dealing with the Crown lands of the Province.

Mr. WEEKS. It was provided in the statement delivered to

Mr. WEEKS. It was provided in the statement delivered to Secretary of State Knox, under date of January 21, 1911, and signed by the Canadian commissioners, that whenever the Provinces "from all parts of Canada" put pulp and paper of the classes mentioned on the free list (of the reciprocity bill) then the Dominion of Canada will admit similar articles free of duty. Canada has now and had then no authority to compel the Provinces to permit the exportation of their wood into the United States free of all restrictions. The reciprocity question then was but a conditional agreement on the part of Canada. The Canadian Provinces have no authority to negotiate a treaty with the United States which would provide for the free entry of pulp wood and paper into the United States and in reciprocal agreement with our country, for such an agreement is wholly within the power of the Dominion Government. So Canada went just as far as it could go by making the conditional agreement above referred to. Canada has no authority to compel the Provinces to permit the exportation of wood into the United States without restrictions. This is absolutely a provincial power, yet the Dominion of Canada has the power, as well as the right, to say upon what terms products of the United States shall be admitted into Canada. And even now, in face of all of this discrimination, Congress proposes to turn over to the Dominion of Canada, in spite of the protestations of American industry and American labor, the raw products of many great forests of our country, whereby Provinces in Canada will be financially benefited.

No one can deny that the American manufacturer of news print paper is entitled to a just protection. If, however, it is the policy of the present administration to put news print paper on the free list, then in all fairness there should be secured to these manufacturers a source of supply of their most important raw material-wood and wood pulp-without any restrictions whatsoever.

There are many mills in this country—notably, I think, the mills in the State of New York, at Fort Edward, Glens Falls, and Watertown-which obtain substantially their entire supply of material from Canada. Those mills employ a large amount of capital and many men, and unless they are protected in this legislation it seems to me they necessarily must go out of business

Mr. GALLINGER. Mr. President, will the Senator permit me to ask him a question at this point? The PRESIDING OFFICER. Does the Senator from Mas-

sachusetts yield to the Senator from New Hampshire?

Mr. WEEKS. Yes.

Mr. GALLINGER. Is it not almost inevitable that those mills shall go out of business, the forests having been exhausted in the vicinity of the mills, unless they get the products from Canada?

Mr. WEEKS. It seems to me so. Unless they are protected by this legislation, so that they can get their raw material, it seems to me they must necessarily go out of business

I should like to have inserted in my remarks a statement of product of the manufacturers of paper and wood pulp in the United States and the Dominion Provinces.

The PRESIDING OFFICER. There being no objection, that order will be made.

The matter referred to is as follows:

Mr. WEEKS. Since the passage of the act of 1909 there has been a marked development of the news print-paper manufacturing business in Canada and substantially no increase in the United States. As late as 1911 there were manufactured in Canada not over 445 tons of paper a day. The increase last year was 430 tons a day. Up to date this year there has been an increase of 225 tons a day. By January 1, 1914, there will be added to that capacity 390 tons more. In other words, there will have been a total increase last year and this year of 1,055 tons per day capacity, or a total capacity of Canadian mills of 1,495 tons a day. The total production of the mills of the United States is only about 4,000 tons a day; so that the capacity of the Canadian mills, which in 1909, and in fact in 1910, was only a little over 12 per cent of the capacity of our mills, will be on the 1st of January, 1914, substantially 40 per cent of the capacity of the American mills. In the meantime the increase in the United States for the last year was only 235 tons a day, only about half that in Canada, and up to date this year 110 tons a day. So that the increase in the United States during the past two years, without considering what will be developed before the 1st of January, 1914, by Canada, has been only 50 per cent of the increase of the Canadian mills.

I present an article printed in the Paper Trade Journal, under date of July 28, 1913, which goes into this question of the production of Canadian mills, which I should like to insert in my remarks at this point.

The PRESIDING OFFICER. If there be no objection, that will be done.

The matter referred to is as follows:

CANADIAN NEWS—REMARKABLE GROWTH OF NEWS-PRINT INDUSTRY IN CANADA—PROGRESS OF PAPER PLANTS IN COURSE OF CONSTRUCTION AND IMPROVEMENT—QUEBEC HOLDS PREMIER POSITION IN PULL—USE OF BALSAM FIR—LABOR MARKET SAID TO BE OVERSUPPLIED—INDUSTRIAL ACCIDENTS—LOSSES FROM FOREST FIRES EXAGGERATED—BARBER PAPER AND COATING MILLS HAVE AN OUTING.

## [From our regular correspondents.]

[From our regular correspondents.]

MONTREAL, QUEBEC, July 28, 1913.

A. G. McIntyre, the retiring secretary of the Canadian Pulp and Paper Association, gives some remarkable figures relating to the production of news print in Canada. He states that the present production in Canada is 1,300 tons a day, made up as follows:

Quebec: Laurentide, Grand Mere, 200 tons; Belgo-Canadian Pulp & Paper Co., Shawinigan Falls, 100 tons; Canada Paper Co., Windsor Mills, 50; Ed. Crabtree & Sons, Joliette, 25; E. B. Eddy Co., Hull; Jos. Ford & Co., Fort Neuf, 5; Jonquiere Pulp Co., Jonquiere, 40; Alex. McArthur & Co., Joliette, 25; News Pulp & Paper Co., St. Raymond, 30; Price Bros. & Co., Kenogami, 150; total daily production for Quebec Province, 685 tons.

Ontario: J. R. Booth, Ottawa, 125; Lake Superior Co., Sault Ste. Marie, 200; Riordon Paper Co., Merritton, 10; Spanish River Pulp & Paper Co., Espanola, 150; total, 485.

British Columbia: Powell River Co. (Ltd.), 150.

In addition to this 1.300 tons, before January 1, 1914, these figures will be increased by 390 tons, as follows: Ontario Paper Co., Thorold, Ontario, 120; Fort Frances Pulp & Paper Co., Fort Frances Pulp & Paper Co., Fort Frances, Ontario, 120; Donnacona Paper Co., Donnacona, Quebec, 50; Powell River Co., Powell River, British Columbia, 100; total, 390.

Last year the increase in tonnage in the production of news print in Canada was 430 tons per day. So far this year an additional 235 tons has come on the market, and this will be increased by another 390 tons per day by the end of the present year. These figures compare with an increased production in the United States for 1912 of only 235 tons per day, and for the present year an increase of 110 tons.

At the present time Canada is exporting to the United States at the rate of 600 tons of news print a day, which is 98 per cent of the total imports of the United States. Eighty per cent of this has been entering free under clause 2 of the reciprocity act. If the new tariff permits all news print to enter fre

Mr. WEEKS. That is a quotation from the Canadian correspondent of the Paper Trade Journal, with other figures which I have been given leave to print.

It seems to me this demonstrates the fact that if we put paper on the free list we are not legislating for the future development of our industries in this country. There is no development of our industries in this country. doubt that we have raw material in different localities sufficient to produce all the paper we use—we manufactured substantially all we required before 1908—at least as far in the future as we can determine any subject. I am confident that in the South especially there is going to be a marked increase in the manufacture of paper from raw material which now very largely

goes to waste; and in many sections of the North the tops of trees and other refuse which may be turned into paper are not being utilized.

If this is so, it is not a question of insufficient raw material which is involved in continuing the development of our paper industry; but under the laws of to-day we are not developing our industry as we have in the past, and our neighbors in Canada are developing theirs with extraordinary strides.

From the standpoint of the paper industry it seems to me the committee should give further consideration to the proposition of putting paper on the free list. No commission has ever recommended that this action should be taken; and the Mann committee—a committee being made up of Democrats and Republicans alike—recommended in a unanimous report that a duty of \$2 a ton should be placed on print paper.

I am not going to take the time of the Senate to discuss further the question of countervailing duties, which has been carefully covered by my colleague [Mr. Lodge]. But it does seem to me that this whole question is of such vital importance to a great American industry and will be of so little difference to the American consumer, that it should be given further consideration. It is not probable that a duty of \$2 a ton or any similar duty would impose any additional burden upon the purchasers of newspapers, and I doubt if it would make any difference in the price of print paper. There is certainly ample capacity on this continent to supply all of our demands, in Canada and the United States, and leave a surplus product,

if it is used at its full capacity.

There is one point about the manufacture in Canada to which I wish briefly to refer, and that is, that not only have the Canadian authorities—or, rather, the authorities of the Province of Quebec-refused to give our leaseholders on the Crown lands the same privileges they give to their own local manufacturers, they place the American manufacturer in the position of bidding against the local manufacturer for pulp wood that is on free lands. There are in the Province of Quebec something like 335,000 square miles that were originally timbered. Of this area about 100,000 square miles has been cut over and burned over. Of the balance, 200,000 square miles in round numbers, are Crown lands, from which we are practically excluded under the present regulations, leaving but 35,000 square miles available for the American operator, even if he were not put in active competition with the Canadian operator. But additional burdens have been placed on the American operator, not only in requiring the wood from the Crown lands to be converted into pulp in Canada, but when that did not seem to be sufficient they made an additional requirement that one-half of the product of the pulp mills should be converted into paper in Canada.

Can there be any doubt that it is to be the policy of all the Provinces of Canada to compel the manufacture of wood into pulp and of pulp into paper within those Provinces? So our plants which have been dependent on that source of supply are going to lose their business, and in addition we are going to allow the finished product to come in here in competition with our own product.

I hope the committee will give the whole subject further consideration. I feel sure that it is entitled to a thorough going over, and that it will be a gross injustice if this legislation is allowed to pass in its present form.

Mr. SMOOT. Mr. President, I was going to refer to the same subject matter referred to by the senior Senator from Massachusetts [Mr. Lodge] relative to the paper paragraphs. He has so admirably presented the questions involved that I am not going to take the time of the Senate now to go over the same ground.

Of course, I can see that it will immensely please some people in this country, who are and have been deeply interested in rates on print paper, if the bill passes in its present form, because then the great amount of money which they have spent will be justified and the fight they have made for years will be successful.

As I say, I am not going to take the time of the Senate to emphasize what was so well said by the Senator from Massa-chusetts. But I am in full accord with every word he uttered, and I believe when the committee carefully considers the question again it will come to the same conclusion and this provision will be modified before the Senate is asked to vote on it.

In this connection I wish to call the committee's attention to another point, and that briefly. It is the statement that was made by Mr. Doherty in relation to paragraph 330, fo which I now wish to revert. This is what he says:

This paragraph covers only printing paper which is valued at over 2½ cents per pound. All other printing paper is transferred to the free list, paragraph 572. The provise imposing countervailing duties is changed so that it operates only in the event that an "export duty, export license fee, or other charge of any kind whatsoever (whether in

the form of additional charge or license fee or otherwise)" is imposed by the foreign country. The additional duty imposed is the amount of the export duty or export charge, and it applies only to dutiable printing paper, not to free paper. No penalty is imposed here for the restriction or prohibition of exportation by the foreign Government. See paragraph 651.

An interesting point to consider here is the effect of the enactment of this paragraph on that portion of section 2 of the act of July 26, 1911 (Canadian reciprecity act), which admits to entry free of duty paper imported from Canada valued at not more than 4 cents per pound. With respect to printing paper valued at more than 2 cents per pound. With respect to printing paper valued at more than 2 cents and not more than 4 cents per pound, it is manifest that there is a complete repugnance between the two statutes, for by the terms of one of them, the act of 1911, it is free of duty, and by the terms of the other, H. R. 3321, it is subject to a duty of 12 per cent ad valorem. Nor can the two statutes be se construed as to stand together. Under such circumstances the rule of law is that the statute of later date must prevail over the earlier statute, as being the latest expression of the legislative will, and that consequently the earlier statute stands repealed by implication.

In that connection I desire to refer, without reading, to the decision in the case of District of Columbia v. Hutton (143 U. S., 18) and also United States v. Ranlett & Stone (172 U. S., 133), holding squarely to that doctrine.

Of course there are many expressions in the reported cases to the effect that repeals by implication are not favored, and especial emphasis has been laid upon this rule in the construction of revenue laws. Nevertheless, there is no manner of doubt as to the result when the later statute is in direct conflict with the earlier one, as is the case here. That is shown in Butler v. Russell (Cliff., 251).

In considering this matter there are two things which it is important to keep in mind: First, that section 2 of the Canadian reciprocity act did not depend for its effectiveness upon ratification or acceptance by Canada, but went into effect immediately upon the President signing the bill, and it is the law to-day.

Mr. HUGHES. Mr. President, there is no doubt about that point, but it was understood on this side that this language would be substituted for that of the act of 1911. We intended to change that so far as the valuation is concerned.

Mr. SMOOT. My object in calling attention to this matter is that the Canadian reciprocity act admits free of duty paper up to 4 cents a pound.

Mr. HUGHES. Four cents a pound; and this bill cuts it

down to 21 cents a pound.

Mr. SMOOT. But that is not what the law says; and I do not believe the authorities or courts who construe this bill when it becomes a law will say that the Canadian reciprocity act is repealed by implication when the proposed bill says that the value of the paper shall be  $2\frac{1}{2}$  cents a pound, whereas the Canadian reciprocity act provides it shall be under 4 cents a

Mr. HUGHES. That is what we believe. We believe that in effect the rate of duty existing between this country and Canada is changed by this bill, as other rates existing between this country and Canada and other countries are changed by the provisions of this bill.

Mr. SMOOT. I think that would be a perfectly fair construction to be put upon it, although it does not say that it is re-pealed in any way in the bill; and perhaps that construction could be put upon it if the values of the papers were the same in the present law and the proposed law. But there is that difference; and what is the officer administering the law going to do when the question comes up as to the difference between 2½ cents a pound and 4 cents a pound? There will be no question about it up to 24 cents a pound; but what construction is going to be placed upon the paper imported into this country between 2½ cents a pound and 4 cents a pound?

Mr. HUGHES. Why, the officer is going to hold, I imagineat least I confidently hope he will—that that law has been repealed by this bill.

Mr. SMOOT. Mr. President, I very much doubt whether it will be, and some of the best attorneys with whom I have discussed this subject hold the same view.

I am going to leave it entirely with the committee to consider this question, along with the question that has been submitted here by the senior Senator and the junior Senator from Massachusetts.

In this connection I desire also to say that every prediction that was made at the time of the passage of the Canadian reciprocity act in relation to the increased manufacture of paper in Canada has been verified, and more than verified. I call attention to the companies which have been organized for the purpose of manufacturing pulp and paper in Canada since the agitation concerning section 2 of the Canadian reciprocity act began about three years ago. I shall ask, without reading, to have printed in the Record a list of the companies that have been organized in Canada, the location of those companies, and their capitalization.

The PRESIDING OFFICER. There appearing to be no objection, that order will be made.

The matter referred to is as follows:

Name of company.	Located at—	Capitaliza- tion.

		51,300,000

Mr. SMOOT. So that the Senate may know, without going into detail, I shall call its attention only to the total capitalization, which amounts to \$152,180,000, that has been invested in Canada within the last three years in companies for the purpose of making pulp and print paper to send to the United States free of duty.

I also have here a list of nearly half as many more companies that are not yet organized but are proposed to be organized. While this has been going on in Canada we have not increased our output, nor have we increased the number of manufacturers here by 1 per cent. In fact, I believe there are less mills running to-day than there were three years ago. Of course. that does not have any particular bearing upon the question that I rose to discuss. That is a matter of policy, but I want to record my protest against any such policy.

Mr. HUGHES. I presume the Senator is familiar with the provision found in T, repealing all acts and parts of acts inconsistent with this act.

Mr. SMOOT. I am familiar with the language, but I do not think that paper between 2½ and 4 cents per pound would be inconsistent with this act. That is my position.

Mr. GALLINGER. Mr. President, after the exhaustive and, from my viewpoint, conclusive arguments already made on

this item. I will not detain the Senate more than a few

On the 18th day of June, 1909, when this question was before the Senate, I made a somewhat exhaustive argument on the subject, and was gratified to find that we had legislation in that bill which was not entirely destructive to this industry. At that time protests were made against this proposed legislation by the Adirondack Timber Land Owners of New York; the Forestry Commission of Maine; the Forestry Commission of New Hampshire; the American Builders of Machines for Paper Making; the American Manufacturers of Machinery for Paper Making; the American Manufacturers of Paper Makers, Felts, and Jackets; the American Manufacturers of Fourdinier Wire Cloth, composing 16 independent concerns; the American Paper and Pulp Association; the Congress of the Knights of Labor; the International Brotherhood of Pulp, Sulphite, and Paper Mill Workers; and the International Brotherhood of Paper Makers.

So far as I know, there has been no change of opinion on the part of the people and corporations who protested against legislation such as is contemplated in this bill. That opposition stands to-day as it did four years ago, and on the other side stands to-day, as he did four years ago, Mr. John, Norris, the representative of the great metropolitan newspapers of this country, a man who has seemed to have in matters of legislation on this subject an influence that to my mind is quite unaccount-

able, but it is at the same time quite undeniable.

I had supposed, Mr. President, from some matters that came to my attention a little while ago, that the committee would report an entirely different provision from what is found in the bill, and I still hope that after the discussion had to-day the committee will see the wisdom of making some change in the bill that will protect our own people in the manufacture of paper and not give the industry entirely over to our Canadian

neighbors

This bill, Mr. President, from beginning to end-not intentionally-legislates in favor of Canada as against the United States. It is a matter of congratulation, as I chance to know, on the part of the Canadians that they are accomplishing even more through the passage of this bill and its enactment into law than they could possibly have expected. On this matter of papers and paper making of wood pulp it seems to me that we could well pause and ask ourselves seriously the question whether we should at least not have real, genuine reciprocity between this country and the Dominion of Canada.

I content myself, Mr. President, with that simple suggestion, repeating the hope that the committee will, upon further consideration and contemplation, come to the conclusion that we are being discriminated against in this legislation and that some reasonable degree of relief should be given to the industry

in the United States.

Mr. JOHNSON. Mr. President, this is a question of vital importance to a large number of people in the State of Maine. I had the opportunity when the reciprocity bill was before Congress to offer at that time the predictions which were made by people interested in paper making in my State, and in others as to the result which would follow the passage of that law. That went into effect August 1, 1911, I believe, and since that time the importations of paper from Canada which have come in free have equaled somewhere about 80 per cent, I think, the Senator from Utah [Mr. SMOOT] stated. Since that time we have had free importations of news print paper, not only of paper valued at 2½ cents a pound, but of paper paying as high as 4 cents a pound.

The bill, the Senate will notice, admits free of duty only paper costing 2½ cents a pound. That is intended to take news print paper, the commercial value of which is about \$40 a ton. Above that, paper which enters into the making of magazines and books bears a rate of duty under the bill of 12 per cent ad valorem, a very little less than it bears under the Payne-Aldrich law. That is an equivalent ad valorem of a little over 15 per cent. There is some slight reduction made.

The Senator from Utah said that the predictions made when we had the reciprocity hearings in regard to the effect upon our paper makers in this country and upon our paper interests had been borne out. I want to call attention to the fact that last year we produced in this country \$99,000,000 worth of paper valued at less than 24 cents a pound; that we imported only \$940,000 worth; and that we exported \$3,700,000 worth of that same kind of paper.

Mr. SMOOT. Will the Senator permit me?

The PRESIDING OFFICER. Does the Senator from Maine yield to the Senator from Utah?

Mr. JOHNSON. Certainly.

Mr. SMOOT. So that the Senator may not misunderstand me or I him, as the case may be, I wish to say that in saying that I had reference to the predictions which had been made in 1911 to the effect that it would not be many years before the business would increase in Canada, and that through that increase and through the competition in that country with free paper it would then interfere with our paper manufacturers in this country. In substantiation of that, to show that the prediction had been borne out, I called attention to a list of something over 60 new concerns incorporated in Canada, with a combined capitalization of \$152,000,000, and all those organizations have been formed since the Canadian reciprocity act.

Mr. JOHNSON. I think I understood the Senator, and I did not misrepresent his position in the matter. But I want to call his attention to a fact well known to me, that the forests, even those unbroken forests in Maine to which the Senator from Massachusetts alluded, are fast disappearing. I see little slender poles cut and floated down the rivers to-day where when I was a boy I saw good-sized logs brought to the mills. It will be only a matter of a few years before those forests will

disappear.

The places where mills are going to be erected will be where the logs can be obtained. That is the reason why the pulp and paper industry largely of course goes over to the Canadian

side. It is because there they get vast supplies of timber.

In my own State those supplies have been pretty well bought out. The concerns which established themselves there, and they are good, reliable corporations, have looked ahead and been farsighted enough to get supplies of spruce which will last for many years to come. I say they are all supplied, or practically so; and it would be pretty difficult for any big concern to go into that State and find to-day a supply of spruce which would be adequate for a paper mill of any size. The Great Northern Paper Co., which has a large news-paper plant, I think perhaps the largest one in the county, at Millinocket, in the State of Maine, making news print paper, has behind it large tracts of forest land which it purchased years ago with wisdom and farsightedness

With the conditions which exist with us the evil consequences which were predicted did not follow. The price of news print paper did not go down, neither did Canada flood us with paper. We were able to export, as is shown by the figures I have given, last year four times as much as we imported of this particular

kind of paper.

I fully sympathize with the position which has been taken and so well stated by the senior Senator from Massachusetts [Mr. Lodge] that something should be done, if possible, to compel Canada to give us access to her forest products. I should like to see that done if possible. But I do not believe it is necessary to provide for a duty upon print paper under the conditions which exist and when the trade journals claim that the last year has been a most successful one for the paper makers in this country. However, I should welcome any legislation which would compel Canada to open up her forest products so that we might get them for the use of our mills. But at the present time I know of no way that we can legislate to make Canada let us have her forest products unless she desires to do so. The countervailing duty which has been put in the bill, and to which the Senator from Massachusetts called attention, is but a slight one, resting only upon the chemical wood pulp, and that is but a small part of the importations. I think he is not quite correct in saying that we do not import any from Canada. I think we import some.

Mr. LODGE. I mean spruce. Mr. JOHNSON. Some of it comes from Norway, Germany, and Sweden.

Mr. LODGE. It is not an effective retaliation.
Mr. SMOOT. Can the Senator give us a reason why the countervailing duty only applies to chemical wood pulp and not to the mechanically ground wood pulp?

Mr. JOHNSON. No; I will have to confess that I do not

understand why it should not have been applied to all kinds of

pulp as well as chemical wood pulp.

Mr. SMOOT. I believe I know myself why a powerful organization in this country wants it to apply only to chemical wood pulp. It is because of the fact that the importations are so small that they amount to nothing, and all they are interested in is to have mechanically ground wood pulp come in. I wondered why mechanically ground wood pulp was not included here in connection with the chemical wood pulp.

Mr. JOHNSON. I am unable to give the Senator the information he asks for. I know that the chemical wood pulp is used only to a slight extent in the manufacture of print paper. About one-fifth is chemical wood pulp, and about one-fourth is mechanically ground wood pulp. The proportion is about four

Mr. SMOOT. Then I ask the Senator does he not believe that the duty should apply to mechanically ground wood pulp the same as to chemical wood pulp? If we are going to have a countervailing duty at all, should it not apply to both?

Mr. JOHNSON. I would be very glad to state my personal opinion about it. I should like to see it apply.

Mr. SMOOT. Then I hope the Senator will change the

schedule and make it apply to all pulp.

Mr. CLARK of Wyoming. Mr. President, the plous hope just expressed by the Senator from New Hampshire [Mr. Gallinger] and which is now repeated by the Senator from Utah [Mr. Smoot] that the committee would take this and other schedules under more careful and prayerful consideration before final action does not find any echo in my mind. Upon that point I have a few observations which I have been desirous of making, and I

think I will take this opportunity.

I am fully convinced that, so far as this bill is concerned, any and all argument is utterly futile. Undoubtedly the result is already fixed both in Committee of the Whole and in the Senate. The Democratic Party in this body believes, or at least accepts, the conclusion that the verdict of a Democratic caucus is the last word of wisdom on the question of the tariff. It is the first time, in this body at least, when the conscience of the representative of a State and the interests of his State are both sought to be smothered by a majority vote in secret caucus. It is no secret that on this measure if each Senator was free to vote as his conscience and judgment dictate, the bill as it would finally pass the Senate would be a vastly different bill in many of its provisions from the one now before us and which, against rhyme or reason, will be written into law under a false plea of party loyalty and against the best judgment of the majority of the Members of this body. It is generally believed that the party edict has even gone out that this bill must be voted for as prepared, and that no amendments, even if they should be in themselves just and beneficial, shall be for a moment accepted or tolerated unless the same shall be proposed by the Democratic members of the Finance Committee. The Democratic majority have in their action in preparing, presenting, and passing this bill struck a blow at the very foundations of our Government. Free and open discussion and liberty of conscience is as effectually destroyed as though it were done by armed force or the leaden bullet.

An almost incomprehensible fact in connection with this bill is the complete reversal of conviction which has taken place on the other side of this Chamber; Senators who for years have been preaching against closed committee doors and the party caucus have suddenly seen a new light and now, judged by their action at least, believe that the part of wisdom is found in preparing this bill behind locked doors and with a secrecy that makes every former action along that line look like the widest publicity; Senators who have preached and clamored insistently, in season and out of season, for the widest publicity in legislative procedure, have consented to an iron-bound and copperriveted agreement on this great measure, which affects as no other legislation can affect the great mass of the American peo-ple. For the first time in the history of Congress the party caucus on general legislation has made its appearance in the Senate, and I am told that under the persuasive influence of the party lash, Senators are going to vote items and schedules into this bill against their own judgment and conscience and which they believe will seriously injure their own States and cripple, if not utterly destroy, legitimate industries without compensating benefits to the Nation at large.

It is, of course, urged, both in private and in public discussion, that a Senator should make concessions on single items in this bill in order to supplant the present law with a real Democratic measure "all wool and a yard wide," and with the "name blown in the bottle," and that the choice lies between the existing law and the measure now before us, and that party regularity is to be tested by the ability to swallow this bill practically without amendment as to policy or rates and without the crossing of a "t" or the dotting of an "i," but the choice does not lie between the present law and the proposed bill. It could lie between the present law and the proposed bill amended in such particulars as that individual judgment and conscience might not be smothered and so that legitimate industries might not be entirely destroyed. I believe it is in the power of Democratic Senators on this floor, from sugar-producing States, who do not believe in free sugar, who do believe that it will work great harm in their States, and who do not believe that free sugar, judging from any party declaration, is or should be made test of party loyalty, to so amend this bill as to preserve

the industry in their States, satisfy their own consciences and at the same time, judged by any just standards, maintain their party fealty, but because of influences that have been brought to bear from all quarters, from the highest to the lowest, I fear greatly that no such amendments will be offered by those Senators, and if offered by others will be by them voted against. I believe there are Senators on the other side of the Chamber from wool-growing States who do not believe in the policy of free wool, who believe that such a policy will be most harmful to their State and people, who could avert such a calamity by proposing an amendment restoring wool to the dutiable list if not at its present rate, at least at such a moderate rate as would minimize the disaster. This would in no sense mean that the theory of a tariff for revenue had been abandoned or that the result would be a virtual reenactment of the Payne law, but would simply mean that in tariff, as in other legislation, some respect would be paid to the necessities and welfare of the States represented by such Senators; but I fear no such amendment will be by them offered, and if it shall be offered by other Senators they will be recorded against it; their judgment and consciences and the welfare of that industry in their States will be in bond until the passage of this bill.

But it is still urged as a reason for the passage of this bill, or, perhaps, to be more accurate, as an excuse for its passage, that some bill must be passed because of the iniquities of the present law. That argument does not appeal to me. If the purpose is to pass a just and scientific bill, suited to conditions, that evidence must, however, be found in the bill itself and not in comparison with any other bill or law. I will, however, pause to say that in the comparison of the present bill and the Payne-Aldrich law, that law does not suffer in the slightest degree. I am not one of those who see no good in the present law. My belief is that under that law the country has had a period of prosperity which it is an idle dream to think can be continued or approached under the pending bill. Aldrich law took due notice of the welfare of established and growing industries and recognized the necessity of a difference of wage and conditions between the American workman and the workman beyond the seas. This bill, both in its terms and in the statements of its sponsors and advocates in this Chamber, frankly and affirmatively disregards both. The Payne-Aldrich law recognized the protective policy generally applied to producer and manufacturer alike. The present bill cuts the manufacturer to the quick and leaves the farmer and other producer of America stripped to the buff and sends him to compete on unequal and destructive terms in the open market of his own country. No, Mr. President, the Aldrich law does not suffer by comparison, and it would be well for this country if in the construction and consideration of this measure we had the wise counsel and the broad knowledge of the former Senator from Rhode Island.

You Senators from beet-sugar States bear no command from your States nor from the Nation to strike down a great and growing and beneficial industry of that State at the command of party caucus. You are not impelled to do so on the ground that a revenue tariff is for the best interests of the country, for your own tariff makers have repeatedly declared that sugar is par excellence the great and natural revenue producer, large in results, easy and sure of collection, and equitably distributed. You are throwing away a magnificent revenue, destroying a great industry, crippling your States, and benefiting no one except the foreign grower and the great sugar-refining companies, long since convicted of falsifying weights and defrauding your Government. And to what end? Do you think the breakfast table will be any cheaper because of the \$50,000,000 you are giving to the refineries? You are well aware that sugar is about the only article of general consumption that has not responded to the rise of prices in this country and the world over, and that while any raise in price would be passed on to the consumer, any benefit from a reduction in the tariff would stop with the foreign producer and the American refiner. It is an unexplainable thing to me that Senators will vote into this bill free sugar, with all its attendant consequences-loss of revenue, a great industry destroyed, depreciated land values, and closing the door to future splendid development and early supply for all home consumption-at the demand of other Senators, with no command from their own States or from the country at large.

And this sacrifice of personal judgment and the best and proper legitimate interests of States and constituents, with all the attendant disastrous results, are to be brought about in the name of party regularity. The individual Senator becomes a simple and responsive machine whose sole duty and ambition is to mechanically register the will of the majority of his party colleagues, and that majority, in turn, receives the commands and surrenders its legislative integrity and judgment to the persuasive influence of Executive interference. Of course, this is denied by our friends across the aisle. It is denied that any improper influence has been or is being exerted by the Executive, and assert with apparent candor and a knowing wink that the Democratic caucus did not pass any resolution binding particular Senators to abide by the will of the majority. What is improper influence by an Executive, and what is the binding force of caucus action depends probably on the point of view.

One of the results of this legislation, and, indeed, a prime purpose, is to largely increase the imports of goods produced in foreign countries by foreign labor. Analyzed, just what does this mean? The statisticians of the committee estimate the increased importations for the year will be \$123,000,000. With an equal market and an equal ability to purchase, this means that \$123,000,000 worth of goods heretofore produced in our own country and with our own labor will be produced abroad. At a low estimate the actual labor in the cost of such goods here would be 25 per cent, or more than \$30,000,000. In othe, words, this bill, aside from the injury to our manufacturers, proposes to take \$30,000,000 annually from the wages of the American workman and generously donate that amount, by the mere passage of this bill, to the foreign producer and the foreign workman. I am a protectionist, and this argument and conviction appeals to me as it does not to our friends on the other side of this Chamber. In my vote I am, upon my conscienc., compelled to consider the question of wages and other costs of production, and being so interested in the wages, I want, with all my heart, to produce in America, so far as is possible, the goods to supply the needs of the American market. In other words, I have the earnest wish that, so far as possible, America shall do her own work. Therefore I can not look with your complacency on the sorry spectacle of transferring \$30,000,000 annually from the pay envelope of the American workman to that of the workmen in like industries across the sea. We are in this bill throwing open to the labor of the world the splendid American market, the greatest on earth; and as you boast that in fixing rates in this bill no consideration whatever has or will be paid to the cost of production, including labor, that means that you are planning to admit to our market full competition of foreign labor with our own, with no consideration of the differences of wage scales, standard of living, or any of the other differences of conditions here and abroad. This can produce but one final result, and that will be an equalization of wages in the competing industries here and abroad.

I for one do not like that outlook. I do not believe conditions or the country demand such a sacrifice, and at the risk of arousing the ire of my friend, the distinguished senior Senator from Missouri, I must submit that as it appears to me the future industrial condition of the Nation under this bill is far from rosy. The Senator from Missouri was, I am afraid, in something of a temper when he was scolding Senators on this side because of their style of debate. In his haste to ayert the effect of just criticism of the bill, he attacked the integrity of the debate on this side in the following remarkable language:

Every Senator who has spoken on that side has in some way assured the country that ruin was coming by leaps and bounds. And, Mr. President, I believe it to be true that it is a part of the fixed program of the Republican side of this Chamber to create a widespread impression and a fear throughout the country of coming disaster, with the hope of precipitating industrial and commercial conditions that will redound to their party and political advantage.

Mr. President, the Senator from Missouri is mistaken. The Senators on this side are not prophets of evil, but they know the tariff history of this country and are impressed with the danger and folly of this bill, and some of them, at least, believe that if the bill were especially designed to cripple the American farmer in his own country, drive the American mechanic from our own shops, and finally force the American manufacturer to an unfair and destructive competition in our own market place, then that design has been most skillfully and ruthlessly carried out.

Mr. SMITH of South Carolina. Mr. President, we have just listened to another dissertation upon the iniquities that are about to be perpetrated upon the people of this country, especially upon the so-called American laborer, and I wish merely for a few moments to submit some figures, to show just what good faith we are keeping in this respect, which I have prepared carefully from authorities in this country that I quote, and I hope Senators will, if they doubt the accuracy of the figures, take the pains to ascertain whether or not they are correct.

In the discussion of the tariff the argument used by the protectionists in the main has been to the effect that it is necessary to legislate for protection in order to grant to American wage earners a higher rate of wage than obtains in foreign countries. This is based upon the contention that the genius of our Government, differing from foreign Governments, should insure to the

wage earner, by virtue of that difference, his share in whatever prosperity this country may enjoy. This contention in reference to the wage earner is held as only a part of the theory of the protectionists. The advocates of this school of politics also claim that protection is necessary in order to keep alive certain American industries.

Another element that enters, more or less accepted by all those of this faith, is that protection is essential in order to start development of enterprises in America, properties which without protection would not be started or developed. It has been very interesting to some of the Democrats to see the different lines of argument offered. The first inception of the idea of protection was based upon the necessity that this country stood face to face with developing its own manufacturing enterprises and other industries where like enterprises and industries were developed in older countries, and these being developed in foreign countries were able to supply the markets of the world at a price which could not be maintained by the industries in America, by virtue of the fact that the cost incident to establishing these industries and training unskilled labor put them at such a disadvantage that they practically could not live and compete with old and well-established lines of industry similar to the ones they were attempting to promote. In the beginning this seemed to be a plausible line of argument. In this present debate on the tariff question, men not only of the Republican or protectionist faith, but some Democrats, have been so bold as to state that certain industries, among them sugar, were made possible by protection, had only lived by virtue of protection, and would die without it. But the most strenuous advocates of the protective theory are those, both of the standpat faction and the progressive faction in the Republican ranks, who maintain that protection is essential for the benefit of the American laborer.

I shall not take up a great amount of time of the Senate, but I want to call attention to this particular phase of their argument—their love of the laborer, their desire to see that he gets an American wage; in other words, that he becomes the sole object of their legislation and practically the sole beneficiary of whatever duties are levied upon an article that he is employed to produce. I shall take as an illustration the manufacture of cotton goods. With this I am more familiar, perhaps, than with any other form of manufacture in America.

Mr. Taft originated a Tariff Board. After a lengthy service and supposedly fairly minute research into this subject the commission have practically reached the conclusion that the cost of manufacturing cotton goods in America and abroad is about equal. They submit numerous tables to show that in some of the heavier and coarser fabrics America can inanufacture cheaper than Europe, while in some of the finer goods the foreigner or European manufacturers can manufacture cheaper than America. The labor cost in the two countries can only be ascertained by taking the total number of those employed in producing a given amount at home and abroad; in other words, I am attempting to show, and will attempt to show, that in this country, on account of certain conditions, the labor cost in cotton manufacturing is less per unit of product here than in Europe. This is because in this country labor-saving machinery, has been installed, reducing the number of operatives to a minimum and substituting machinery to the maximum.

The Tariff Board report, beginning on page 10, says:

English manufacturers make little use of automatic looms, of which there were less than 6,000 in May, 1911, in the whole of England, while in the United States there are well over 200,000. It is estimated that there are now about 10,000 of these looms in use in England and about 15,000 on the Continent. Where automatic looms can be used a single weaver commonly tends 20 looms and sometimes as many as 28. The result is that whereas the output per spinner per hour in England is probably as great or greater than in this country, the output per weaver per hour is upon a large class of goods—

Practically all-

less than in the case where automatic looms are used in this country and plain looms in England it is very much less.

In the Harvard Economic Series, volume 7, Dr. Melvin Thomas Copeland, writing upon the subject "The cotton-manufacturing industry of the United States," in chapter 4, says what I shall read in a moment.

I invite the attention of Senators to this fact, because I wish to show that not only are labor-saving devices used in this country, but that where labor-saving devices are installed cheap immigrant labor is put to tend those automatic machines, to the detriment of American labor, which our friends on the other side of the Chamber have so insistently said are the objects of their tender care. I invite their attention to this economist.

Mr. SMOOT. Mr. President—

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Utah?

Mr. SMITH of South Carolina. I do.

I suppose the Senator from South Carolina Mr. SMOOT. knows that it has been admitted that automatic looms are used more largely in this country than in Europe, as he has stated?

Mr. SMITH of South Carolina. I merely want to suggest to the Senator from Utah, before he again interrupts me in the line of my argument, that I shall be glad to hear him when I have finished, for I do not care to have the continuity of what I am about to prove, and which I think I shall prove, interrupted in the minds of Senators. So, if the Senator will permit me, he may ask me any question he desires at the close of my remarks

Mr. SMOOT. Of course, if the Senator objects, I have

nothing to say

Mr. SMITH of South Carolina. I object.

Mr. CLARK of Wyoming, Mr. President—
The PRESIDING OFFICER. Does the Senator from South

Carolina yield to the Senator from Wyoming?

Mr. SMITH of South Carolina. If the Senator from Wyoming will allow me, I think I have a message for the Senate which they are waiting impatiently to hear.

Mr. CLARK of Wyoming. I want to challenge the quotation the Senator from South Carolina has made. I want to ask him if the quotation which he has made is not interspersed

with his own language?

Mr. SMITH of South Carolina. I indicated where my own interpolation was and also what the Tariff Board said; and if the Senator will turn to page 10 of their report he will see it, and he will see some other quotations that are even more pertinent than that.

Mr. CLARK of Wyoming. I have read it, and I think the Senator in his citation, giving the quotation direct from the

Tariff Board report, should quote accurately.

Mr. SMITH of South Carolina. I will not allow the Senator from Wyoming to challenge the accuracy of my quotation. will take it verbatim, et literatim, et "spellatim." He can tur He can turn

to page 10 of the report and find it.

Mr. CLARK of Wyoming. I take the Senator's statement just made, that which he has on the written page, and the statement taken down by the stenographer, and I think they will show that the Senator did-I do not believe he did it purposely-make an inaccurate statement.

Mr. SMITH of South Carolina. In what respect?

Mr. CLARK of Wyoming. The Senator, in reading from the Tariff Board's report, said:

The result is that whereas the output per spinner per hour in England is probably as great or greater than in this country—

Mr. SMITH of South Carolina. That is correct.

Mr. CLARK of Wyoming. But the Senator continued;

The output per weaver per hour upon a large class of goods, practically all-

Mr. SMITH of South Carolina. Upon a large class of goods it is less than in the United States.

Mr. CLARK of Wyoming. Ah, but the Senator interpolated the words "practically all."

Mr. SMITH of South Carolina. Upon a large class of goods it is less in cases where automatic looms are used in this country

and plain looms in Europe by a very much greater per cent.

Mr. CLARK of Wyoming. If the Senator cares to correct his former statement-

Mr. SMITH of South Carolina. That is what I read.

Mr. CLARK of Wyoming. No; the Senator read "practically all" in so many words.

Mr. SMITH of South Carolina. That was an interpolation

of my own, which I indicated.

Mr. CLARK of Wyoming. That is what I wanted to know.

Mr. SMITH of South Carolina. All right. call the attention of the Senator to the following:

The chief advantages of the Northrop loom consists in a saving of labor. It has reduced the labor cost of weaving one-half, a fact which is particularly significant since the labor cost of weavers previously constituted one-half of the entire labor cost of manufacturing cotton cloth. This saving has resulted from the increased number of looms per weaver. One weaver now tends from 14 to 30 Northrop looms, where before he tended 6 to 8 common looms. At the same time less skill is required on the part of the operative. Notwithstanding this increased output of the weaver, there has been no lack of work for this class of mill operatives. Rather has the change relieved a strain felt by the manufacturers, who often found it difficult to obtain enough weavers.

I want to call the attention of the Senate, Mr. President, to the fact that I am taking the different stages, the different processes, through which cotton goods are carried in order to show just what has been done in that department.

On page 61 of the same work, the author, in speaking of the comber used in the American mills, says:

In the American comber the speed was increased from 85 or 90 nips autom per minute to 130 and 135 nips per minute, the number of heads per place.

machine from 6 to 8, and the width of the lap from 82 inches to 12 inches. Yet the quality of the work was not impaired. The effect of these improvements has been to cut in two the labor cost of combing, doubling the output per operative.

On page 73 he says:

The ring frame, unlike the mule, required little experience or skill. Consequently the wives and children of the French Canadian, the Irishman, the Pole, and the other foreigners that we find in the mill to-day could be employed as ring spinners. Here, as in many other American industries, the possibility of employing the unskilled immigrants and the adaptation of machinery to that end has been an important factor in promoting the success of manufacturing.

On page 74, continuing the same argument, he states:

The fundamental reasons for the throwing out of the mules from the American mills are those just stated—

Which I recapitulate, namely, the strong nature of the labor unions operating the mule spindles in the foreign country the lower labor cost of spinning on the ring frame, the greater output per operative, and the possibility of employing "cheap labor" for this work in this country.

Mr. LIPPITT. Mr. President-

The PRESIDING OFFICER. Does the Senator from South

Carolina yield to the Senator from Rhode Island?

Mr. SMITH of South Carolina. Well, Mr. President, I should like to keep this matter together; but if the Senator will ask me any question when I am through I will be glad to answer anything that I can.

Mr. LIPPITT. I am quite willing to leave it in that way. Mr. SMITH of South Carolina. Again, the same author says, in reference to knotting machines in tying broken threads:

The knotter saves at least 10 per cent in the time of spooling.

Those who are familiar with the operation will know exactly what that means

Moreover its economies do not stop there, since it ties the ends better than they are tied by hand. Consequently in warping the yarn of its tying, there are fewer breaks, and less time is lost in plecing. In weaving, its effects are no less apparent, since bad knots are very likely to cause imperfections in the cloth. The percentage of "seconds" in weaving is cut down by its use.

That means imperfect cloth.

Last but not least, the knotter not only reduces the labor cost by saving time, but also makes possible the employment of less skilled labor by doing the work which required most skill on the part of the operative.

In reference to preparing the dyed weft yarn for the shuttle, he says:

But the introduction of the long-chain quiller for preparing the dyed weft yarn for the shuttle has reduced the labor cost of that operation. This long-chain quiller is another recent American invention. It requires but one operative, a woman or girl, who with the aid of this machine, does the work for which eight or nine men were formerly employed. Yet, in spite of the reduction in the labor cost of preparing dyed yarn for the loom during the last 10 years, the extra labor involved therein is still one of the chief reasons for the greater cost of manufacturing goods in which dyed yarn is used.

Mr. GALLINGER. Mr. President, I do not want to interrupt the Senator, but I should like to ask him what authority he is quoting?

Mr. SMITH of South Carolina. I have already stated it was Dr. Copeland, who is the author of the Harvard Economic Series, in relation to American manufactures.

Mr. GALLINGER. I did not understand the Senator. Mr. SMITH of South Carolina. In the use of the slasher, Mr. Tyron, in an address before the New England Cotton Manufacturers' Association, in 1894, said:

One dresser formerly would only supply warp for 100 looms on ordinary sheeting at a labor cost of from \$18 to \$24 per week; at present one slasher will supply warp for from 500 to 700 looms on the same class of goods at a cost of from \$9 to \$12 per week.

Mr. Copeland, in commenting on this, says:

In addition to this economy in labor the quality of the product has been improved, since the yarn is more evenly sized.

In the weaving department there is a machine known as the Barber warp-tying machine.

It was offered to the trade for the first time in 1904-

Says Mr. Copeland, on page 81-

Says Mr. Copeland, on page 81—
To quote from one of the men engaged in introducing it, "the broad principle of the machine is to tie the ends of the last of an old warp to the corresponding ends of a new warp." When one warp is nearly used up the ends are cut so as to leave a short piece of each thread in the harness. Then, when it is desired to weave another piece of cloth of the same pattern the harness, with these ends still in it, is brought to the tying machine, which ties together one by one the ends of the old warp and those of the new. The principle of the machine is the same as that of the spooler knotter previously described. It ties about 250 knots per minute, and does the work of 20 girls. Drawing in by hand had always been a relatively heavy expense to the manufacturer; by the use of this machine the labor cost is cut down two-thirds. facture thirds.

On page 84 the same author states:

The improvement in the quality of the product of the loom and the diminution of the amount of necessary attention have been facilitated by the application of better stop motions—devices which stop the loom automatically when a warp thread breaks or when the shuttle is out of

I want the attention of the Senate particularly here, for the reason that we have heard on this floor arguments to the effect that in the higher and finer grades of our manufactured goods we need a greater protection because of the greater labor cost. I am quoting this author, who himself is ranked as one of the first authorities, and Senators can investigate for themselves as to whether or not he is telling the facts. He says:

Those warp stops which had been introduced prior to the Civil War were adapted only to looms weaving coarse cloth. With the increase in the manufacture of fine and medium goods it became desirable to apply warp stop motions to the looms on those grades, and as a result of the successful use of finer and thinner wire in their manufacture they are now found in every up-to-date mill on all grades of work. These stop motions have received their greatest improvements and exploitation in this country. As a result of the use of the stop motion and an increase in the length of the shuttle the piece rate for weaving was reduced 33½ per cent in Fall River.

In speaking of the improved loom, the Northwey loom, the

In speaking of the improved loom-the Northrop loom-the same author says, page 86:

It has reduced the labor cost of weaving one-half, a fact which is particularly significant, since the labor cost of weaving previously constituted one-half of the entire labor cost of manufacturing cotton cloth. This saving has resulted from the increased number of looms per weaver. One weaver now tends from 14 to 30 Northrop looms where before he tended 6 to 8 common looms. At the same time less skill is required on the part of the operative.

On page 90 he says the number of looms per weaver in the English mills is about one-half of that in American mills, and summing up his entire observations on the American manufacture of cotton goods, he says:

Owing to the strength of the labor unions in the English cotton industry the weaver is paid at the same rate per cut without reference to the number of looms which he tends. In American mills, on the contrary, a weaver is paid less per cut when he tends more looms.

As I have shown by these quotations, the whole trend of American manufacture has been to install labor-saving devices, increasing the quality and output per machine, and vastly increasing the number of machines, and thereby the amount of product per individual, while there has been no appreciable increase in wage to the individual who now tends a greater

number of machines and makes a greater output.

It will also be observed that both the Tariff Board and Dr. Copeland, from whom I have quoted, show that as the me-chanical devices are perfected the necessity for skilled labor is eliminated and the more ignorant, less-skilled laborers are brought into service, decreasing the labor cost and increasing the labor production.

In this connection I quote from the Immigration Commission, volume 1, No. 747, 1910-11, on page 304:

Information was secured for a total of 66,800 cotton-mill operatives in the North Atlantic States, and a detailed study made of 1,061 households the heads of which were employed in the cotton-goods manufacturing industry. Of the total number of employees 68.7 per cent were of foreign birth, 21.5 per cent were of native birth but of foreign father, and 9.4 per cent were native born of native father.

Mr. SMITH of Arizona. Does that refer to New England? Mr. SMITH of South Carolina. To the North Atlantic States—the New England States. I continue the quotation from the report of the Immigration Commission:

the report of the Immigration Commission:

Of the races of old immigration, the French Canadians, English, and Irish were principally employed, these races reporting to the number of 13,043, 5,274, and 4,287, respectively. The southern and eastern Europeans were represented in greatest numbers by the Poles, with 8,920; the Portuguese, with 5,911; and the Greeks, with 2,739. Of the male operatives of foreign birth 15.8 per cent and of the females 34,5 per cent had been engaged in the same industry abroad. On the other hand, 56.2 per cent of the male and 50.7 per cent of the female employees who were foreign born had been farmers or farm laborers in their native countries. The average weekly wage for male employees 18 years of age or over was \$9.68 and that for females 18 years of age or over was \$7.97. The average annual earnings of male heads of families who were employed as cotton-mill operatives were \$470 and the average annual family income was \$791. Of the total number of families studied 32.2 per cent depended entirely upon the husbands for their support, while 9.3 per cent were maintained by earnings of husbands supplemented by the contributions of children.

Mr. KENYON. I know the Senator does not want to be in-

Mr. KENYON. I know the Senator does not want to be interrupted, but I wish merely to inquire if this report shows

the ages of the children employed?

Mr. SMITH of South Carolina. It does not. I did not notice that. I would have been glad to have done so; but I was trying to condense, in order to present certain facts and fix them in the minds of Senators.

Mr. KENYON. Was that investigation limited to the Northern States?

Mr. SMTTH of South Carolina. Oh, no; I will have something to say later in reference to other States. The report continues:

Of the households the heads of which were foreign born 21,2 per cent had boarders or lodgers as against 14.5 per cent of those the heads of which were of native birth. The attempt to reduce the cost of living or to supplement the earnings of the heads of families by keeping boarders or lodgers resulted in a high degree of congestion, especially in the immigrant households. The average number of persons per room in households the heads of which were foreign born was 1.26, and the average number per sleeping room 2.13 as contrasted with

eighty-three one-hundredths person per room and 1.79 per sleeping room in households the heads of which were native born. The average monthly rent payment per capita in immigrant households was \$1.47, and in households the heads of which were native born \$2.41. None of the households the heads of which were of native birth used all their rooms for sleeping purposes, while 3.3 per cent of the immigrant households slept in all rooms. Of the families the heads of which were native born 6.9 per cent, and of those the heads of which were foreign born 6.1 per cent, owned their homes.

I hope the Senators will keep that in mind, as there is a significant fact to follow.

Of the foreign-born employees 57 per cent and of the native born 42.6 per cent were married. Of the employees of foreign birth 80.6 per cent were able to read, and 77.8 per cent able both to read and to write. Of the total number of foreign-born employees of non-English-speaking races 42.1 per cent were able to speak English. The naturalized persons among the employees of foreign birth 21 years of age or over and resident in the United States at least five years form a proportion of 29.8, while 8.8 per cent had taken out first papers. Only 7 per cent of the foreign-born wage-earning males in the households studied, and 11.3 per cent of the native born were members of labor organizations.

It will be seen from this quotation that the average weekly wage for male employees 18 years of age and over was \$9.68, or about \$1.62 a day; for females 18 years of age and over, \$7.97, or a fraction over \$1.25 a day.

That is the average. I do not know what the lowest was nor what the highest was.

Also that the average annual earnings of the male heads of families who were employed as cotton-mill operatives was \$470, and that 32.2 per cent of all the families—which included 66,800 mill operatives studied by this commission-were dependent upon the earnings of the male members, which means that if they were heads of families there was more than the head, and that their annual dependence was \$470. If there were but two-husband and wife-their annual income was \$235 each; if there were an average of three, it was slightly over \$100. The report did not give the average membership of the families.

It is also to be observed that 85 per cent or more were foreigners.

In the last part of the paragraph quoted it states only 7 per cent of the foreign wage-earning males and 11.3 per cent of the native born were members of labor organizations. Now, it will be observed that Mr. Copeland says that the reason why labor-saving devices could not be successfully employed in Europe was because of the strength of the labor organizations, they being in old countries, with homogeneous population, with a long line of hereditary operatives, they demanded a certain scale of wages per piece; and it made no difference how many labor-saving devices were installed or how great was the increase per operative, the devices simply increased the income of the operative and not the income of the mill, whereas in America, by virtue of the fact that we are the dumping ground for every nationality and race and tongue and kindred under the sun, it is impossible to organize into a compact labor organization alien races, because of a barrier of difference of speech, difference of training, difference of nation, and the consequence is that, according to the testimony of the Immigration Commission, the manufacturers of New England have installed their labor-saving devices, eliminated the necessity of skilled labor, and by virtue of the impossibility of organizing, as I say, these alien people of diverse tongues and diverse nationalities, are employed at the miserable price of \$470 per family per year, and with a system that increases as the machinery increases the output for the benefit of the manufacturer, while the laborer himself receives no increase.

On page 511 of the report of the Immigration Commission, it

The Americans, who formerly composed the bulk of the cotton-mill operatives in the North Atlantic States, at the present time form only about one-terth of the total number of the employees in the cotton mills, and are divided in about equal proportions between males and females. If the employees of the second generation of immigrant races, or, in other words, persons native born of foreign father, be added to this pure American stock, or those native born of native father, the total number of native-born operatives amount to about three-tenths of the operating forces of the North Atlantic mills. The remaining part of the operatives, or about seven-tenths, is composed of employees of foreign birth. Of the total foreign-born operatives about one-half are representatives of races of southern and eastern Europe and the Orient, the remainder being composed mainly of English, Irish, and French Canadians, with a relatively small number of Scotch, Germans, Swedes, Dutch, and French. The French Canadians, among the foreign born, are employed at present in greater proportions than any other race, the proportion of French-Canadian cotton-mill operatives exceeding that of the Americans. The English furnish about one-tenth and the Irish about one-twentieth of the total number of employees in the industry. Of the operatives from southern and eastern Europe, the Poles, Portuguese, and Greeks, in the order named, furnish the largest proportions, the total number of these races constituting more than one-fourth of the total number of these races constituting more than one-fourth of the total number of the order named, furnish the largest proportions, the total number of these races constituting more than one-fourth of the total number of these races constituting more than one-fourth of the total number of these races constituting more than one-fourth of the total number of these races constituting more than one-fourth of the total number of these races constituting more than one-fourth of the total number of these races constit

French-Canadian operatives, of both the first and second generations, together with large proportions of Portuguese and Polish women. The American females, as already stated, form only about one-tenth of the total number of female operatives.

Fall River, New Bedford, and Lowell, Mass.; Manchester, N. H.; and other centers of the same sort, all have a large proportion of French-Canadians, Manchester showing the highest percentage of employees of that race. Manchester has also the largest proportion of Polish operatives, although that race is well represented in the other three cities. The Irish and English, who are employed extensively in all localities, have their largest representation in Lowell and New Bedford. The Portuguese are employed in largest proportions in New Bedford and Fall River. Only an unimportant percentage of Greeks are working in Fall River and New Bedford, but in Manchester, N. H., the Greeks make up one-twentieth, and in Lowell more than one-seventh of the total number of operatives. The other races are scattered in comparatively small numbers through all the localities.

Therefore, according to the showing of the report of the Immigration Commission, there is no incentive to the native-born American to enter into the mill work, for the reason that it makes no difference how long he may be employed therein there is no chance, comparatively, for his skill to add anything to his earning capacity. This is delegated and handed over to the American inventor, who, immediately upon the wage of the operative becoming burdensome to the mill, finds a device that eliminates him and his skill and turns it over into the hands of the ignorant immigrant. Therefore, according to the testimony of the Tariff Board report, the comments by Dr. Copeland, the report of the Immigration Commission, the plea of the protectionists that we need these high duties for the benefit of American labor is a miserable sophistry, a lie that is not borne out by any facts.

It is plain from the quotations that I have been at pains to gather that the only protection that an American native-born laborer has is the price of the steerage passage from Europe to America, and such law as Congress may see fit to pass restrict-

ing immigration into this country.

In sharp contrast to the wage of \$470 a year for the head of a family engaged as an operative in cotton manufacturingaccording to the World Almanac for 1902-in Massachusetts alone there were 324 millionaires, more than three times as many as in all the Southern States combined. In the nine cotton-growing States of the South that produce the entire raw material there were in North Carolina, in 1902, one of these nine cotton-growing States, 8 millionaires; in South Carolina, 5; in Georgia, 5; in Arkansas, 5; Mississippi, 3; Florida, 7; Texas, 34; Louisiana, 27-a total of 94. While in Massachusetts, Vermont, Connecticut, Maine, New Hampshire, and Rhode Island there were 520. When the number of millions they own is taken into consideration there was nearly a thousand times more millions in the New England States than in all the cottongrowing States combined. We produce the raw material that supplies all the cotton manufacturers of America, and as a result of our splendid system of economics in this country, the States that produce \$1,000,000,000 worth of the raw material do not produce a single millionaire among those engaged in cotton growing, while in the New England States the millionaire manufacturers are numbered by the hundreds. It was reported and debated on the floor of the Senate a few days ago—whether facetiously or in earnest I was not exactly able to determinethat the Senator from Rhode Island, Mr. Lippitt, when interrogated, before he became a Senator, before the Ways and Means Committee of the House, as to what he considered a great fortune, said three-quarters of a billion. Mr. Lippitt was then spokes-man for the cotton manufacturers of the New England States.

I presume, as some Senator asked during the debate, anything under that was a small fortune. It would be quite interesting if we had one of the mill operatives from the New England States before us and asked him what he would consider a reasonable competency for himself and his family while he is

living on \$470 a year.

Mr. LIPPITT. Mr. President—
The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Rhode Island?

Mr. SMITH of South Carolina. I do, since I have mentioned

his name; yes.

Mr. LIPPITT. I merely wish to ask the Senator from South Carolina if the wage paid in his State for this same occupation is not in the neighborhood of one-third less than that paid in New England, and if the hours the people work in his State are not more than 10 per cent greater for that wage, and if it is not true that there is practically no age limit for the children

employed in the cotton mills in his State?

Mr. SMITH of South Carolina. I will reply to the Senator from Rhode Island that those we employ in my section of the country are native born, and whatever they get goes back to an American for the work an American does, and we have not used the pauper labor of Europe to displace him.

Mr. LIPPITT. I should like to ask the Senator from South Carolina if he thinks native-born Americans should be paid 33

per cent less wages than New England is willing to pay the people who come from abroad? New England pays her nativeborn Americans more than she pays these people from abroad; and yet the Senator from South Carolina is boasting that in his own State, for more hours of employment, he is satisfied to pay 66% per cent of the wages New England pays.

Mr. SMITH of South Carolina. When we take into consideration the number of millionaires there are in the New England section and the number of millionaires we have in our section, I do not think the Senator and I will find much to

Mr. LIPPITT. I will say to the Senator from South Carolina that I think it is no great credit to the people of his own State, with labor only two-thirds the price of the labor in New

England, if he has not a few millionaires down there.

Mr. SMITH of South Carolina. I will say to the Senator in that taking the population, the per capita wealth, and the difficulties under which we labor through our miserable banking currency system, we have so many commissions to pay, by virtue of certain unfortunate conditions to which I will not now advert, that we have maintained the integrity and the purity of our people and have not opened our doors to the foreigner; and have not, except so far as economy required, installed labor-saving machinery, and wherever we have done so we have appointed a native to operate it. But I wish to say to the Senator from Rhode Island that I am not here making a plea for my mill owners as against his mill owners, for the reason that I rather suspect that a great deal of New England capital is down in the South, taking advantage of the poverty of the people to help pile up some of those millions in New England

Mr. LIPPITT. I suspect the Senator from South Carolina was very glad to see come there whatever proportion of New

England capital is invested in those mills.

do not desire to carry this discussion further now. as the Senator is through I shall take occasion to read the exact figures representing the wages that are paid in the New England mills and in the mills of the section of the country which the Senator so honorably represents. I only wish to say now, if he will allow me, since he says the South has not opened her doors to immigration, that if I am not mistaken it was only two or three years ago that the Representatives of his own State were so anxious to get immigration that the citizens of Charleston, S. C., formed a committee for the purpose of trying to get immigrants there. They found it was an utter failure, however, because the immigrants from the foreign countries went to the part of the United States where they could get the highest wages, and the people of South Carolina were unable to make any progress in persuading them to come there, for the simple reason that the market for their wages was so much higher in other parts of the country.

Mr. SMITH of South Carolina. I will say to the Senator from Rhode Island that we have not gotten the taste of that sort of thing out of our mouths yet. We are not accustomed to that sort of cattle, and we shipped them back where they

came from.

I have submitted these facts for the reason that the contention of the protectionists that they desire protection for the purpose of benefiting American labor is absolutely untrue and not

borne out by the facts.

Another element in this question of whether or not the rates of duty on cotton are necessary, I invite the attention of the Senate to the fact that a few days ago, under the discussion of the metal schedule, it was developed that where England had her supply of raw material in the form of iron ore and iron-manufacturing plants, that the cost of freight from England to the ports of America gave a very fair protection to the American manufacturer of like goods. In other words, it was claimed by those debating this question that the extra cost of freight from the European or the English manufacturing point to the ports just about measured the difference in cost of production in America and abroad. This, I take it, would be accepted by protectionists in reference to practically most of the articles of any appreciable bulk where the raw material and the manufacturing plant are both in foreign countries as well as in this country. In the case of cotton, America produces practically 70 per cent of the total world's supply.

The foreigner is dependent on America for his raw material. An English manufacturer buys his cotton in America at the very same price that the American manufacturer buys his. He ships that cotton from the interior point where it is purchased to the port, pays the local or through freight from the purchasing point to the port, pays the expense of the purchaser, pays the expense of exchange from English money into American money, pays the compressing, the expense incidental to l loading aboard the vessel, the ocean freight rate, the ocean in-

surance, ships it across the ocean to Europe, there defrays expenses of unloading and the local freight from the European port to the mill wherever situated, converts it into cloth, re-ships it through the same channels at practically the same expense or greater back to America, and undersells, according to the claims of the protectionists, the American manufacturer to such an extent that the American manufacturer must have 35 or 40 per cent duty on the goods, while the American mills are located, practically half of them, within calling distance of the cotton fields. It makes no difference what argument may be used as to the cheapness of ocean freight or the discrimination of the railroads in the interior, or what other argument may be put up, if it is true that the Englishman can manufacture and sell his goods made out of American cotton in America cheaper than the American manufacturer can sell them, then whenever an American purchases a piece of cotton goods he pays the freight from the cotton fields of the South to Europe and other incidental expenses attached thereto plus the cost of conversion by the European mills plus shipment back here of the finished article. No kind of sophistry, no kind of distortion of facts or twisting of figures, can disprove that statement.

In other words, to put it in another form, the protectionists say that the American manufacturer can not manufacture cotton goods in the cotton fields of America any cheaper than the cost of handling the cotton crop from here to Europe, hiring European labor to manufacture it, and ship it back to America plus the duty. According to this contention of the protectionists it would be economy on the part of the cotton producers of America to engage Englishmen to manufacture their goods, ship the whole crop abroad, bring it back to America without a duty, and sell it at 35 to 40 per cent less, now claimed by the protectionists.

These are some of the facts that I would like to lay before the Senate. They are facts that can be verified by any student who takes the time to study the situation.

In conclusion, Mr. President, what I have attempted to prove is this: Not only have we installed labor-saving devices in America for the purpose of eliminating the labor cost, but we have installed cheap immigrant labor to take advantage of the labor-saving devices to such an extent that the members of the Immigration Commission, two of whom are Members of this body—the Senator from Vermont [Mr. Dillingham] and the Senator from Massachusetts [Mr. Lodge]—state that the majority of all the operatives in the mills of the North Atlantic States are these foreign laborers. If we are going to stand fairly and squarely by American labor, we ought to shut the doors to the importation of this European influx; and when we have installed labor-saving devices which increase the output, we ought to give the American laborer the benefit of those labor-saving devices.

Buckle says, in his History of Civilization, that the only three steps in civilization are wealth, leisure, and learning. If we are patriotic Americans and do find some means by which the laborer may be in a measure released from toil and become the beneficiary of the product of any mechanical device, let us make the laborer the beneficiary to the extent of giving him sufficient leisure and capital to educate himself to become an American citizen. Let us not, as the protectionists are now doing, put whatever profits may come from our modern inventions into the pockets of the manufacturer. Let the American laborer become the beneficiary of this increased production by virtue of his operating a labor-saving machine and not install in his place a foreigner.

I say it is high time for us to investigate these questions and find out the real facts, which I have tried to do, and which no man can controvert.

Mr. LIPPITT obtained the floor.

Mr. GALLINGER. Mr. President—
Mr. LIPPITT. I yield to the Senator from New Hamp-

shire if he wishes to say something.

Mr. GALLINGER. I desire to ask the Senator from South Carolina whether he has any information which will enable him to state the number of Americans out of employment in New England to-day who could be obtained to take the places of the foreigners of whom he has spoken?

Mr. SMITH of South Carolina. In reply to that question, I will say that I do not think it is necessary; I do not think that question touches the point at issue at all. It remains a fact that wherever a foreigner supplants an American he must live; and while there may not be any Americans out of employment in New England, according to the testimony I have read here if the American has any employment in the mills there he has it upon the plane of the imported, cheap, ignorant immigrant; and nobody knows it better than the Senator from New Hampshire.

Mr. GALLINGER. Mr. President, the Senator from New Hampshire does know better than that. The Senator from New Hampshire knows that the ignorant foreigners about whom the Senator is talking constitute the very lowest class of labor in this country, next to the colored labor of the South.

Mr. LIPPITT. And the white labor.
Mr. GALLINGER. And the white labor of the South as well—certainly the mountain labor.

I will ask the Senator from South Carolina whether he has taken the trouble to ascertain how many millions of dollars these foreigners have sent back to their homes in the lands from which they came, and how many millions of dollars they have put in the savings banks of New England during the last year?

Mr. SMITH of South Carolina. I will state to the Senator from New Hampshire that about a year ago I made a speech on this floor in which I called attention to the fact—I am not sure I am accurate as to the figures, but this is about the proportion—that the amount of money brought into this country for the decade from 1900 to 1910 by foreigners as compared with the amount of money sent out by foreigners was about as 1 to 10. In other words, the foreigners who came into this country in the decade from 1900 to 1910 sent out of this country something like a billion dollars-my figures may not be exactly accurate-while they have brought into this country something over \$200,000,000.

Mr. GALLINGER. Yes; and that billion of dollars was composed of their surplus earnings, and yet the Senator is talking about their being ill treated so far as wages are concerned.

Mr. SMITH of South Carolina. The Senator must remember that he knows, and that it is notoriously true, as he can walk

down the street and see at any time, that the average southern European coming into this country lives in a manner in which no American would live. Refuse bananas and a few rotten oranges constitute almost his entire bill of fare; and in spite of his getting but \$470 a year he does save enough to send back large sums to Europe.

Mr. GALLINGER. Who is to blame for his living in that

manner?

Mr. SMITH of South Carolina. The protective system which brings him here and supplants American labor with him.

Mr. GALLINGER. Why, he can go home at any time that he gets enough money to pay his passage; and these people have an abundance of it. They have an abundance of it in the savings banks of New England-millions and millions of dollars. When the Greek war broke out there was no trouble about hundreds of these people drawing money from the savings banks and going back to Greece to fight the battles of their country; and the same thing is true of Italy.

Mr. SMITH of South Carolina. The Senator from New Hampshire will not gainsay the fact that when they went back their places were taken by others of the same kind of stuff,

and the Americans did not supplant them.

Mr. GALLINGER. Most of them who were not killed are back now, occupying the same places they formerly held. They were glad to come back and accept the wages that are given in New England.

Mr. SMITH of South Carolina. And they were employed

when they came back, too.
Mr. GALLINGER. They found employment.

Mr. SMITH of South Carolina. Mr. President, I should like to call the attention of the Senator from New Hampshire

The PRESIDING OFFICER. The Senator from Rhode Island [Mr. LIPPITT] has the floor.

Mr. SMITH of South Carolina. Will the Senator from Rhode Island, then, permit me to make a further observation?

Mr. GALLINGER. The Senator from Rhode Island yielded to me; and, as I have accomplished my purpose, I will surrender the floor to him.

Mr. LIPPITT. I yield; certainly. Mr. SMITH of South Carolina. I should like to state, in conclusion, as I yielded to the Senator, though I do not make that an excuse for asking his indulgence, that I just happened to pick up this afternoon a paper in which it was stated that the influx of immigrants into this country during the past six months has exceeded any influx since 1907, which was the record-breaking year.

Mr. LIPPITT. Mr. President, I confess I have listened with so much astonishment to the remarks of the Senator from South Carolina [Mr. SMITH], in what I fancy, more from the tone in which he made his remarks than from any figures he presented, was meant to be an arraignment of New England's customs, that I scarcely know how to answer him.

If the arraignment had come from almost any other source on this floor, I might think it was due to a lack of knowledge of the relative conditions as between South Carolina and New

Hampshire, Massachusetts, Rhode Island, and Connecticut. But when the Senator from South Carolina stands in his place here and gives a list of the wages paid in the cotton mills of New England as though they were low wages, when he gives statistics after statistics about the wages that are paid to the different classes of employees in the cotton mills of New England and criticises the nationality of the people to whom those wages are paid, although in his own State the wages that are paid in the same industry do not exceed 663 per cent of what New England is paying, and although those wages are paid, not for the 54 or 56 hours weekly that prevail in New England, but for hours of labor per week that run from 60 to 66, and although those wages are paid, not to young people whose age for employment must exceed 14 years as in New England, but to children whose age for employment is practi-cally without limit, where children 10, 11, or 12 years of age are employed for 60 hours a week, longer hours than a grown man is employed in New England cotton mills, I scarcely know how to answer such a charge.

Nevertheless, I shall take occasion to answer the Senator in

the only way in which an answer is irrefutable. I will quote from the census report of 1905. I am reading from the compendium, I think, of that census, on page 24, which gives, in the first place, the average weekly earnings of all wage earners in the cotton mills of New England and of the Southern States.

For cotton yarns the average of all the wage earners for New England is \$6.93 a week, almost \$7. For the Southern States it is \$3.95, not quite \$4. Seven dollars in New England and \$4 in the State of South Carolina as an average of all the workers in the mills.

Mr. SMITH of South Carolina. My attention was distracted for just a minute. From what is the Senator quoting?

Mr. LIPPITT. I am quoting from the Census of Manufactures of 1905, which are the last figures on this subject that

have been collated, as I understand it. Now let us go on. Men 16 years and over in the Northern States, \$8.22. the Southern States, including South Carolina, \$5.12. Some \$3 a week more is paid in the Northern States than is paid in South Carolina, and the Senator from that State says that the wages in New England are not as high as they should be.

Well, Mr. President, I am not going to deny that it would not be an advantage to the whole country if the wages of labor perhaps were higher, but I shall have something to say in a few minutes, after I have put these statistics in the Record, in regard to one of the reasons why wages in the cotton industry in New England and in the woolen industry of New England are not higher.

Women 16 years and over in New England, \$5.88; in the

Children under 16 years, \$4 in New England and \$2.54 in the Southern States, for 10 per cent more hours than any man works in any cotton mill in any New England State.

Mr. SMITH of Georgia. I wish to ask the Senator to read that statement once more. Is it that the average pay of women over 16 years of age is only three dollars and something a week?

Mr. LIPPITT. No; children under 16 years of age.
Mr. SMITH of Georgia. I thought the Senator said over 16,

and I was sure that was incorrect.

Mr. LIPPITT. If I did so I read it wrong. I should have said children under 16 years.

Mr. SMITH of Georgia. I may have misunderstood the

Mr. LIPPITT. I did give what the women 16 years and over earned. It is \$3.76 in the Southern as against \$5.86 in the Northern States. That is the average.

Mr. SMITH of Georgia. Over 16 years of age?
Mr. LIPPITT. Women 16 and over. Of course, the Senator understands that a woman of 16 is a child; at least she is in the North. I read the official figures.

Mr. SMITH of Georgia. I understood the Senator correctly as stating that the pay in the factories of women 16 years and

over is less than \$4 a week?

Mr. LIPPITT. Three dollars and seventy-six cents in the Southern States, according to the census report of 1905.

Mr. SMITH of Georgia. My reason for interrupting the Senator is that I am sufficiently familiar with the facts in my own State to know that that is utterly incorrect.

That is the average. I should like to state that the same thing happens very often in quoting the average price paid for men in the woolen mills or the cotton mills of this country. It is not what is paid a man or a woman, but it is the average price, taking in all the number who may be em-

ployed, and whether it be for short or long hours.

Mr. GALLINGER. If the Senator from Rhode Island will permit me, very probably both in the North and the South those wages have been increased. These are statistics seven years

Mr. LIPPITT. I will say further that I thoroughly agree with the Senator from Georgia that these figures do not represent the wages that are paid to-day in his State or in any other Southern State.

Mr. GALLINGER. Or in New England.

Mr. LIPPITT. They have been advanced since that date; and also the figures the Senator from South Carolina has been reading in the same way do not represent the present wages in New England. They also have been advanced, and they have been advanced a larger amount than the wages in the South, if I understand it correctly, for this reason: When you advance wages 10 per cent and the wage is \$7 a week, you advance the wage 70 cents a week; but when you advance wages 10 per cent and the wage is \$5 a week, you advance it 50 cents a week. Those are the two conditions which prevail in the South and the North.

Now, let me go on. I have gone so far, I think, as to give the average wages which are paid on cotton yarns between the two sections, the New England States and the Southern States.

Now, let me put into the RECORD the average wages that are paid in converting plain cloths for printing and for converting purposes in the two sections. The average on this product of all wage earners in New England was \$7.62; in the Southern States \$4.16, \$3.46 more in New England than was paid in the For men 16 years and over, \$8.52 in the North, \$5.14 in South the South.

Women, 16 years and over, \$7.23 in New England and \$3.77 in the States of the Carolinas, Georgia, and Alabama—\$7.23 and \$3.77, a difference of \$3.46—practically 50 per cent more in the New England States than in the South.

Mr. LODGE. For all laborers?
Mr. LIPPITT. That is the average for women 16 years and

Mr. LODGE. In all the mills?
Mr. LIPPITT. In the cotton mills only. All the figures that I have given are the figures for the cotton industry of the two

Children under 16 years, \$4.45 as against \$2.73.

A little farther down is given the per cent of distribution between the number of children employed. I am not going to read all these figures. There is almost a half a page of them. I have read the representative ones, and anyone interested further can find ample verification of what I am saying among the other figures here.

Per cent of distribution of children earning less than \$3 Children under 16 years of age who earned less than \$3 in New England, 12.1 per cent; in the South, 66.9 per cent-

is, making yarns.

On printing cloth, in New England, 15.4 per cent; in the South, 58.8 per cent. In the South from 58 to 66 per cent of the children employed earn only \$3 per week as against 12 to 15 per cent in New England. Yet the Senator from South Carolina confines his criticisms to New England.

Now, here is some comment that is made by the Census De-

partment. It is also to be found on page 24:

The average weekly earnings of the men in the 11 establishments selected to represent the production of cotton yarns in New England amounted to \$8.22, or \$3.10 more than the average for the men employed in the 45 selected establishments manufacturing the same products in the Southern States. In the case of women the average weekly earnings in the same establishments in New England were \$5.88, or \$2.12 more than the average for operatives of this class in the selected mills of the South. The children employed in the northern mills earned on an average \$4.60 a week, which was \$2.06 more than the average earnings of the children in the southern mills shown in the table.

Mr. President, that is a statement of the facts in regard to those two sections, not as I have drawn it out of my imagination, not as the selected figures of some writer whose purpose in writing I do not know, but the official figures of the Census Bureau taken under similar conditions in the two sections.

If the Senator from South Carolina in his remarkable arraignment of New England wages thinks that the industry there is carried on under conditions that are not in accordance with American institutions, I would like to ask him what he thinks the men who for the last 20 years have built up and maintained that industry in New England had to contend with when they found in the market place the cloths made in the southern mills at wages \$3 a week less than they had to pay and being sold at prices that the employers of the high-priced labor of New England had to compete with?

It may be that the industry there is not carried on under as creditable conditions as it might be. I never yet have seen an industry in which improvement could not be made, and I do not claim that improvement can not be made in the way this industry and the other manufacturing industries are carried

on in my own section of this country. But I do say that considering the competition of the low wages with which New England has struggled for the last 20 years it is a remarkable England has struggled for the last 20 years it is a remarkable tribute to the skill, the efficiency, hard labor, and hard thought of the managers of these New England factories that to-day there are 18,000,000 spindles still running in what are called the New England States as compared with 12,000,000 spindles

that have been established in the South.

I for one do not object to the establishment of these industries in the South. I am glad to see them established there, and I would not have for a minute brought up this comparison between the Carolinas and my own section of the country if the unfounded charge had not just been made by the Senator from South Carolina as to the way the industries of New England were carried on. I believe that the effect of these manufacturing industries in the South is going to be an enormous help to our entire Nation. I know that they are progressing in a remarkable way; that starting with a crude form of manufacturing output, they are going up into the higher and more perfected forms of it.

I have no doubt that as time goes on the humane conditions that exist in New England will be established in the cotton mills of the South. I have no doubt that in the not distant future the Carolinas and Georgia will establish laws limiting the age of employment of women and children to what in the North is already considered reasonable. I see the Senator from Georgia [Mr. SMITH] smile.

Mr. SMITH of Georgia. We have already adopted a childlabor law.

Mr. LIPPITT. It was only three weeks ago that the Legislature of Georgia failed to adopt-

Mr. SMITH of Georgia. We have already adopted a law limiting child labor to 14 years.

Mr. LIPPITT. I beg the Senator's pardon.

Mr. SMITH of Georgia. But it is true. I had the pleasure of addressing the legislature on it myself when they adopted it, and we have adopted some laws limiting the ages of those who work. I concede that we have not gone as far as I would

be willing to go.
Mr. LIPPITT. Mr. President, the remarks of the Senator from Georgia are entirely in line with what I was prophesying would be the case and what I expect will be the case as this industry progresses in that region. I do not for one minute claim that the people of the section the Senator from Georgia represents and the section that I represent differ in humanity, but I do claim that the great pioneers in that class of legislation have been the New England States.

If what the Senator from Georgia says is correct about his State having adopted a law limiting the employment of children to 14 years, I am very glad to know it. I can only say that only three weeks ago I read in one of the New York papers a statement that a law to that effect had been passed by the house of representatives of his State, but that the senate had refused to pass it and it was not put upon the statute book on that account; and even at that the law proposed only limited the employment to 13 years and not 14, as it is in New England. I accept the correction of the Senator from Georgia and I have no doubt that what he says about it is true.

Mr. SMITH of Georgia. There was an exception in the case

of indigent women. The proposition was to strike out that exception, but the limitation was passed about four or five years

Mr. LIPPITT. I should like to ask the Senator, did not that limit the employment of children to 12 years of age?

Mr. SMITH of Georgia. No; 13 or 14, I do not remember There was a limitation in the case of indigent women or widowed mothers, and we were unwilling to strike out that

Mr. LIPPITT. I am sure if a proper law has not been passed

it will not be many years before it will be.

Mr. SWANSON. Mr. President, I desire to state that in Virginia we have had a law for three or four years limiting child labor to 14 years, and it is rigidly enforced by a strong force of factory inspectors.

Mr. LIPPITT. I am very glad to know that Virginia has followed the precedent set by Massachusetts, and really Massachusetts should be given the credit for it, for Massachusetts has been the pioneer in all that class of legislation.

Now, Mr. President, I think I have said enough to show that the arraignment by the Senator from South Carolina is certainly not altogether well founded.

He has criticized Massachusetts. I am not a resident of that great Commonwealth, but I am her near neighbor and ardent admirer and will say to the Senator that she stands to-day as

she always has stood, behind her rock-bound coast, the central figure of that matchless New England country.

She has been the pioneer in humane labor legislation. has gathered into her hospitable arms the industrially oppressed of every nation. She has welcomed them, educated them, assimilated them, and shared with them her heritage of freedom. First the Irish came, fleeing from famine in their own country. At first they were ridiculed for their uncouth ways and grotesque costumes, but to-day they are foremost in her councils. Then came the French-Canadians. "Birds of passage," they were called because they sent home their surplus pay and sometimes went back themselves. To-day they stand among the sturdy yeomanry of New England. The governor of my own State is one of them, a man whose patriotism is as broad and generous as any American, regardless of what parentage he sprung from, and whose popularity has given him the honor of being elected more times to that office than any man in the history of the State, I think, certainly of recent years. Then came the Portuguese and the Italian and now the Polander and the Greek.

They came there not as the slave comes, in shackles and in tears, but gladly, with smiling lips and laughing eyes, and they sent back their letters to their relatives and friends and neighbors, who, in response to these white-winged messages of hope, traveled over thousands of niles of land and sea to share in the prosperity of Massachusetts.

There are 140,000,000 cotton spindles in the world to-day, scattered in almost every part of the globe; but these people who want to improve their condition do not go to the mills of China or Japan or India or Ceylon. They do not look for work in Italy or France or Germany or Belgium or Russia. They do not knock at the mill doors of England's 60,000,000 spindles. They do not go to the Carolinas or to Georgia, but they do come to help run the 18,000,000 spindles of New England, because there is not on this globe to-day, nor was there yesterday nor was there on any yesterday since that far-off day when the departure of Adam and Eve from the Garden of Eden made the wearing of clothes necessary, a single spot where the men and women engaged in the textile industry receive now or ever did receive as high wages for such short hours of labor and under such humane conditions of employment as they do in Massachusetts and her sister New England States.

Mr. SMITH of South Carolina. Mr. President, I should like to make just one observation. The Senator from Rhode Island has been at pains to show the difference between the wages paid in the South and in the New England States. The Senator, of course, is entirely familiar with the difference in the conditions that exist in the South as compared with those which have existed in the New England States, and the difference between an old-established industry and a new one.

The Senator called attention to the difference between the wages of children employed in the Southern States and in the New England States. The Senator will not forget, nor will the Senate forget, that the conditions in that section of the countr, were such that even children of tender age not only had to work in a factory to support life, but they had to work in the fields as well. They were compelled to do this, not only by the exigencies of a terrible war, but by the horrible imposition placed upon them as an agricultural country having to pay the burdens of a protective tariff without any return whatever. had no remedy. We had to buy from you, and all our earnings went to you. Therefore, you could establish your plants, and you could exact from us a stipend that you were not entitled We have not yet reached the point of installing all laborsaving machinery in order to supplant American industry, but whenever we did put in labor-saving machinery we employed native-born Americans to attend it. When we shall have gotten through the initial expense of installing our factories, we will gradually rise to a point, I hope, where the manufacturing will be done in the South.

I ask the consent of the Senate to have the following read in answer to the argument of the Senator from Rhode Island for humane treatment of the operatives in the mills in Massachusetts and in that section of the country. It comes from a New York paper of repute, and I would be glad to have just that short article read.

Mr. LIPPITT. What is the paper?

Mr. SMITH of South Carolina. Collier's Weekly. I should like to have the article read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary proceeded to read the article, Mr. LIPPITT. Mr. President, my attention was momentarily diverted. Does this refer to some particular concern?

Mr. SMITH of South Carolina. It does not; it merely has reference to the manufacturing interest there. It refers to Lawrence, Mass., where the strike occurred.

The Secretary resumed and concluded the reading of the article, which is as follows:

[From Colller's Weekly.] A PORTRAIT OF PROTECTION.

The words quoted below are taken from a description of Lawrence, ass., written at the time of the textile strike there a little over a

The words quoted below are taken from a description of Lawrence, Mass., written at the time of the textile strike there a little over a year ago:

The stock is closely held by about 600 stockholders.

The stock is closely held by about 600 stockholders, and the stock was very bought into the company at a time when the stock was very bought into the company at a time when the stock was very low—as low as \$75 a share—and have seen their property rise in value more than fiftyfold, until to day the same shares are worth \$300 ms \$75 a share—and have seen their property rise in value more than fiftyfold, until to day the same shares are worth \$300 ms \$75 a share—and have seen their property rise in value more than fiftyfold, until to day the same shares are worth \$300 ms \$75 ms a share and not women. Very few of them, in the store winds and are among the most cultured and delightful people in the world, and any of them are interested in "all good works." It can almost have ontributed more liberally to the education and the store windows, mo good society. So the owners their own money comes first, so the owners with the store windows, mo good society. So the owners with only one of the important mill managers who lives in Lawrence. The others live in the beautful, peaceful town of Andover or elsewhere out of the off where wello-do citizens of the wello-do citizens of the two wello-do citizens of the wello

Mr. ASHURST obtained the floor.

Mr. GALLINGER. Mr. President, will the Senator from

Arizona kindly yield to me for one moment?

The VICE PRESIDENT. Does the Senator from Arizona yield to the Senator from New Hampshire?

Mr. ASHURST. I do so very cheerfully.

Mr. GALLINGER. Mr. President, in the near future I shall discuss this question at considerable length. I only wish now to say that the death rate in Lawrence, Mass., is much lower than the death rate of the District of Columbia. I want also to say that the average death rate from tuberculosis in the great textile manufacturing cities of New England is less than the average death rate of the New England States, including the country towns. So such statements as have been read, which have been written for a purpose, are not correct.

I thank the Senator from Arizona for his courtesy. Mr. ASHURST. Mr. President, I shall occupy but a very few moments, and I address the Senate at this time because the able and illuminating speech of the Senator from South

Carolina [Mr. SMITH] seems to make the remarks which I have now to deliver particularly appropriate. I wish further to say that if, during the delivery of my remarks, it should occur to any Senator that my line of reasoning is incorrect or that my historical references are inaccurate, I shall very cheerfully welcome interruptions, for no one is more desirous of being correct and having inconsistencies and inaccuracies, if any there be, pointed out than am I. So I premise my remarks by saying that I shall be pleased to have any interruptions made which any Senator may see fit to make.

Mr. President, a local newspaper, the Evening Star, if I remember correctly, once said that "The high-tariff speech a Senator makes lives after him, but the low-tariff speech he makes is oft interred with his bones." There is a vast deal of history summed up in that paraphrase, but I doubt if it contains

much of prophecy.

The opponents of the pending tariff bill seem to predicate their gravest objections to it, and appear to base their most serious epposition to it, upon the ground that in drafting the bill the Democratic Members of the Senate and House did not afford the highly protected industries of the country an opportunity to thwart the will of the people, deprive them of the fruits of their justly earned victory in the recent election, allow these highly protected industries further to exploit the people, and continue to fatten on unearned increments. In other words, the chief ground of objection which the Republican minority present to this bill is that this minority were not allowed to write the bill. The Republican minority—and I say nothing with disrespect or unfriendliness-has filled the circumambient atmosphere with lugubrious jeremiads-with mournful, doleful complaints—because the Democratic majority did not violate its pledged word to the American people and hand over to this Republican minority the great duty of writing this bill. The Democrats in Congress were commissioned by the American people at the last election to perform this function of revising the tariff downward, and it would have been the part of political treachery for the Democrats of the Senate to have evaded the issue.

To some persons tariffs seem to be insoluble mysteries, abstruse cryptograms, and it is my opinion that some of our tariff barons and their apologists have adopted a policy of mystifying the tariff question by muddying and darkening the situation as much as possible to shut out the light.

Jean Baptiste Colbert defines a tariff to be "an art of taxation which consists in so plucking the goose as to obtain the largest amount of feathers with the least possible amount of squawk-

ing."

A tariff may be imposed solely for and with reference to the production of revenue (called a revenue tariff or a tariff for revenue), or for the artificial fostering of home industries (a protective tariff), or as a means of coercing foreign Governments, as in the case of retaliatory tariffs intended to compel the grant of reciprocity privileges. In United States history the most important tariffs are: The high protective tariff of 1828, called by its opponents "the tariff of abominations," which led to the nullification movement; the tariff of 1833, known as the "compromise tariff," introduced as a compromise measure by Henry Clay, which provided for a gradual reduction in the duties year by year until 1842, when they should stand at 20 per cent as a horizontal rate; the Walker tariff of 1846, framed by Robert J. Walker, then Secretary of the Treasury, which modified the protective duties and grouped articles into various schedules at different rates, all of the articles in each paying the same rate; the Morrill tariff, introduced by Justin S. Morrill, which increased the duties on iron and wool, substituted specific duties for ad valorem duties, and in general fixed rates somewhat above those of 1846. Since the Morrill tariff a high protective tariff has been maintained most of the time. The McKinley Act of 1890 raised duties to a high point. The Wilson Act of 1894 was a miserable pretense and the act was denounced as a piece of "party perfidy and national dishonor," although it lowered duties in many lines, and the suspicion has been created (unfounded, of course) that some of the antagonism displayed by the Republican minority against the pending bill arises from the chagrin and disappointment experienced by the minority over the fact that the Democratic majority has not repeated the performance exhibited with reference to the Wilson bill. Dingley Act of 1897 in general increased duties, and finally came the act of August 5, 1909, known as the Payne-Aldrich law, whose indefensibly high rates of duty hurled the Republican Party from the lofty eminence upon which a succession of dazzling victories had placed it to the lowest depths of political disaster.

The subject of revenue was a vexatious one in the time of the United Colonies and of the United States under the Articles of

Confederation. Until 1789 the various States controlled the imposition of customs duties. Each State that had a seaport applied its own tariffs and no two tariff schedules were alike. Protection was begun in the first tariff act whose object, said its preamble, inter alia was "the encouragement and protection of manufactures."

The tariff bill of 1789 was the first matter debated in the Committee of the Whole in the first House of Representatives. James Madison, who introduced the subject, was then in the early maturity of a life of much usefulness. His wisdom as a counselor, and his superiority as a draftsman of laws and constitutions were everywhere recognized. He said, among other things, in his speech of April 8, 1789, "A national revenue must be obtained, but the system must be such an one that while it secures the object of revenue it shall not be oppressive to our constituents," and he urged the collection of this national revenue without oppression upon the people. The next day the general discussion began and Mr. Fitzsimmons, of Pennsylvania, whose father-in-law, Robert Meade, was at that time the richest man in Philadelphia, stated that he extended his views further than the other speakers, and among other observations, he stated that the duties should be calculated to encourage the protection of our infant manufactures. Here we see a line of division drawn by a Pennsylvania hand. Madison had proposed revenue as the chief object, and Fitzsimmons, the Pennsylvanian, suggested protection as the chief object. So the tariff bill of 1789 was approved on July 4. One of its objects, I repeat, according to the preamble, was the "protection of infant industries." Inasmuch as many of these industries have been protected ever since that date it would seem, as was well said by the Senator from Montana [Mr. MYERS] and the Senator from Kentucky [Mr. James] in their recent speeches in the Senate, that these infants by this time should be old enough to wean. Suckling calves, however, never wean themselves; when you attempt to wean a suckling calf it bellows, and the longer its weaning is postponed and the larger it grows, the louder it will bellow, and thus these protected industries are to-day, just as they were on July 4, 1789, an "infant mewling and puking in the nurse's arms" and still bellowing lustily for protection.

During the past six months, however, it has frequently been stated that a number of highly protected industries were not especially complaining at this time over the fact that they are no longer to have special favors in the way of tariff bounties. If they have ceased complaining it is probably because they are similar to Joseph Addison's valetudinarian, who continued to complain that he was dying of starvation until he became so corpulent and healthy that he was shamed into silence.

We have all read history, and we remember the description of the system in vogue in England in the seventeenth and eighteenth centuries, where the Government exchanged earl-doms, dukedoms, and estates for votes. We have read with We have read with shocking amazement of the avarice of the Duke of Marlborough, who for gold and power, without scruple and without shame, betrayed both the exiled and the reigning monarch. We have read of the sordid rapacity of Seymour, Leeds, and Sir John Trevor, but their raids upon the earnings and revenues of the people were tame and prosaic when compared with the spolia-tions committed by some of the tariff laws in United States

Some tariff beneficiaries pretend and profess to look upon the protective system with veneration, and resent any suggestion of tariff reduction with simulated indignation and affected alarm. Year in and year out, campaign after campaign, they have held out the delusive hope that if the voters will sustain a protective tariff system every person would eventually reach the goal of unlimited prosperity; but there is no parallel in American history where promises have been so prolific but so barren of performance.

The early history of the United States conclusively shows that all, or nearly all, of the public men of the various political parties looked upon the protective system as temporary only and never contemplated that the protective tariff would remain a permanent system in this Government.

In 1833 Henry Clay said:

Give time, cease agitation for nine years, and the manufactories in every branch will sustain themselves against foreign competition.

In 1840 he said:

No one in the commencement of the protective policy every supposed that it was to be perpetual. We hoped and believed temporary protection extended to our infant manufactories would bring them up to enable them to withstand competition with those of Europe. If the protective policy should cease in 1842 it would have existed 26 years from 1816, 18 years from 1824—quite as long as at either of these periods its friends supposed might be necessary.

Mr. Vice President Dallas, in casting the deciding vote upon the tariff act of 1846, explaining his vote, said:

For more than 30 years the system of high taxation has prevailed with fluctuations of success and failure. It ought to be remembered that this exercise of the tax power was originally intended to be temporary, the design having been to foster feeble infant manufactures, especially such as were essential to the advance of the country in time of war. These industries, starting as saplings, have taken root and become vigorous, expanding, and powerful, and are prepared to enter the field of fair, free, and universal competition.

In 1864, referring to the tariff bill then under discussion, Senator Morrill, of Vermont, said:

This is intended as a war measure, a temporary measure, and we must give it our support.

In 1890 Secretary of Agriculture Rusk, in the Harrison Cabinet, speaking in reference to the sale of agricultural machinery to foreign farmers and wheat growers at less money than they are sold to the American farmer, said:

This will not do, and I need not offer any argument to prove the weight of the truth of the assertion. The first thing the farmer will do when he is acquainted with the facts will be to make a howl against the trusts and protection that does not protect.

Senator Edmunds said:

In the main, all these taxes come out of the consumer.

In 1899 Gov. Mount, of Indiana, said to the Republicans:

Remove the protection from the articles controlled by the trusts, thereby permitting open competition, and see how quickly these trusts will come to their senses.

Horace Greeley, in his Political Economy, says:

Horace Greeley, in his Political Economy, says:

Whoever will consult Alexander Hamilton's report on manufactures, the writings of Matthew Carey, Hezeklah Niles, and others, with the speeches of Henry Clay, Thomas Newton, James Todd, Walter Forward, Holand C. Mallary, and other forensic champions of protection with the messages of our earliest Presidents—Washington, Adams, Jefferson, Madison, Monroe, and Jackson—and the messages of Govs. Simon Snyder, George Clinton, Daniel D. Tompkins, De Witt Clinton, and others can not fail to note that they champion not the maintenance but the creation of home manufactures. When transportation was expensive, money high, markets local, manufacturers were given temporary protection to offset these conditions, but at no time was the measure considered permanent and to be indefinitely extended for the benefit of well-developed industries.

Starting with premises of which there may be no dispute, we have only to be careful of our steps to reach a conclusion of which we may be absolutely certain, and we may test problems

by analyzing, separating, and combining them.

Every political truth must of necessity be a moral truth. would be a bold man who would say that a protective tariff—which taxes the many for the enrichment of the few—is a moral truth; yet if such a protective tariff is not a moral truth, it is not a political truth.

Every person is by intuition a fairly good political economist, especially as it relates to his own income, and it does not require familiarity with calculus or the Euclid for a man to ascertain whether he is growing richer or growing poorer. Every housewife knows that she does not grow richer when she is required to pay \$1.92 for \$1 worth of sugar, as she is required to do under the Payne-Aldrich tariff bill. The farmers of the Nation are quite accurate reasoners, and it does not require a labored speech or the services of an analyst to convince the farmer that he is not growing richer by being required to pay \$120 for \$100 worth of farm implements.

It has been stated in the Senate that "the proposed tariff bill bears the birthmark of ill will against the American farmer." Consider, for instance, sewing machines. I presume that in nearly every farmhouse of this Nation there will be found a sewing machine. Under the Payne-Aldrich bill when the farmer purchased \$100 worth of sewing machine he received \$70 worth of sewing machine and \$30 worth of protec-Under the pending bill when the farmer pays \$100 on sewing machines he receives \$100 worth of sewing machine. Is this an evidence of ill will? Under the Payne-Aldrich bill, when the farmer paid \$100 on agricultural drills, mowers, horserakes, and so forth, he received \$85 worth of agricultural drills, mowers, horserakes, and so forth, and \$15 worth of protection. Under the pending bill it is proposed that when an American farmer pays \$100 for agricultural implements he will receive \$100 worth of implements. Is this an evidence of ill will? The distinguished Senator from Minnesota [Mr. Clapp], during the course of his able speech in the Senate on August 13, said:

Last summer, I think it was, the gentleman who was conducting Mr. Taft's campaign issued a statement to the people of the country in which he showed the total amount of tariff revenue received at the customhouses of the Nation. I do not just recall the figures, I seems to me it was about \$500,000,000, which, divided by the accepted population of the country, left something like \$7 or \$8 to each individual; and he closed that statement with the suggestion: "Is there any patriotic citizen who would object to contributing seven or eight dollars a year toward the unparalleled prosperity of the United States?"

Every Republican, every Progressive, and every Democrat ridiculed the idea that a man in this day and age could force upon the American

people a belief that the only tax they bore by reason of a protective tariff was the tax paid at the customhouses. His statement was attacked from one end of this country to the other, and especially by our Democratic friends, and justly attacked. It was, sir, almost an insult to the intelligence of the American people to try to make an American citizen to-day believe that his only contribution under the protective tariff upon competitive articles, and they must be competitive if they are protected, is the little pairry sum that is collected at the custom-houses.

Four years ago, I think it was, sitting here in my seat, I listened to an argument from the lips of the senior Senator from Georgia [Mr. Bacon], in which he went on and gave the figures to show the vast sum that private individuals and corporations collected from the people through a protective tariff as against the small sum that the Government received from the protective tariff at the customhouses.

Without further taxing the patience of the Senate, I ask unanimous consent that I may here insert a table which I have prepared showing a list of some articles used on farms, with the rate of duty under the Payne-Aldrich tariff bill and the rate of duty under the proposed law.

The VICE PRESIDENT. Is there any objection? The Chair

hears none.

The matter referred to is as follows:

Name of article.	Tariff tax on each \$100 worth under pending bill.	Tariff tax on each \$100 worth under Payne- Aldrich bill.

Heading blocks. Sewing machines Typewriters.	do do	20 30 30

Mr. SMOOT. Mr. President, does the Senator believe the duty that is imposed upon sewing machines is added to the retail price that the consumer pays for a sewing machine?

Mr. ASHURST. I believe the user—the consumer—pays the tax

Mr. SMOOT. Then I should like to ask the Senator how it could possibly be, when a \$65 sewing machine is sold to the people of his State never costs more than \$11.72 to make in this It would be impossible for 30 per cent duty on a sewing machine, if it did not cost any more in the foreign country than it did here, or if it cost as much, to amount to more than \$3.30, and with the \$11.72 and the \$3.30 added it could not possibly cost, landed in this country, more than \$15. Yet the Senator knows that those same sewing machines sell to the people of his State for \$65. It is not the tariff that makes the difference; it is the expensive way of distributing goods in this

I want to say very frankly to the Senator that the only reason I advocate a duty upon sewing machines is to compel the Singer Sewing Machine Co., which controls the great bulk of the sewing machines manufactured in this country, to make them in this country. It is not to protect the company. It is not because of the fact that the ultimate consumer is going to buy his machine for a cent less or pay a cent more. But with a product of that kind and a great company like the Singer Sewing Machine Co., if we had free entry of sewing machines to-day, I have not the least doubt but that they would increase their plants in Scotland and in France and in different foreign countries and make sewing machines there for the American trade.

It is for that reason that I believe in a protection on sewing machines-to compel that company and similar companies that control the production of that class of goods to make them in this country and give employment to American workmen, rather than employment to foreign labor.

Mr. MARTINE of New Jersey. Mr. President, will the Sena-tor from Arizona yield to me for just a moment?

Mr. ASHURST. Yes; I yield.

Mr. MARTINE of New Jersey. In answer to the criticism of the Senator from Utah with reference to the Singer Sewing Machine Co., I wish to say that I feel that I know something of the situation. He says: "Compel the Singer Sewing Machine Co. to manufacture in this country." The Singer Sewing

Machine Co. do manufacture in this country very, very extensively

Mr. SMOOT. Certainly. Mr. MARTINE of New Jersey. They have a plant at Elizabeth, N. J., in which I passed a good part of my life, in which they employ over 7,000 hands. For many years it has been told us in Elizabeth, in each campaign, by the owners or their agents—I have stumped under the shadows of their factories hundreds of times—that the high tariff was necessary in order to pay the wage to the laboring men. The fact is that within the past six months, since we have had under consideration the Democratic tariff bill which proposes to put sewing machines on the free list, the Singer Sewing Machine Co., instead of carrying their shops to Germany or to Scotland to manufacture, as has been threatened by many other concerns; or, as the Senator now says they will do, to Scotland, have laid out plans for an addition costing over \$1,000,000 and for the employment of over 5,000 men in that immediate vicinity. This has been done with the full knowledge of the fact that the bill making sewing machines free of duty was about to be passed.

This I know: They have appealed to the common council of the city of Elizabeth for the privilege of closing some streets in order that they may make further and greater extensions. I cite this as one of the notable examples—not like the Sharples Separator Co., of Pennsylvania, who, it is said, are going to Germany. This concern is going to stay. Its profits undoubtedly will be curtailed; but there is a rich field yet for the

Singer Sewing Machine Co.

Mr. SMOOT. The Senator certainly must have misunderstood what I said, or he would not have made that statement in answer to what I did say.

Mr. MARTINE of New Jersey. I understood the Senator to say that they would manufacture in Scotland. Did he not say

Mr. SMOOT. They are manufacturing in Scotland, as I stated.

Mr. MARTINE of New Jersey. Of course they are,

Mr. SMOOT. And they are manufacturing their machines in France now, and I understand they are going to manufacture them in Russia.

Mr. MARTINE of New Jersey. I do not know about Russia. Mr. SMOOT. So I understand. I understand, also, that they are going to manufacture their machines in Germany. I said was that I would favor putting a duty upon sewing machines for the purpose of compelling them to be made in this country. I am fully aware of all the Senator has said in relation to the great number of people employed by the Singer Manufacturing Co. I know they are located at Elizabeth, N. J. I know they have a wonderful plant, and I want to see them increase that plant. I want to compel them to have the sewing machines sold to the people of this country made by laborers in this country.

The Senator must know that if we have free trade in sewing machines, and the Singer Sewing Machine Co. have a plant in Scotland and a plant in Germany and a plant in France, if anything should occur here in the way of a dispute between themselves and their employees, and the employees demanded

an increase of wages or a shortening of hours——
Mr. MARTINE of New Jersey. They have demanded an increase of wages, and the labor organizations of the county of Union and the city of Elizabethport compelled the company

to increase them.

Mr. SMOOT. I should be glad if the Senator would wait until I get through. Suppose the employees demanded an increase of wages and shorter hours. The State of New Jersey could not compel the Singer Sewing Machine Co. to run their plant.

Mr. MARTINE of New Jersey. We realize that. Mr. SMOOT. Then, if they had free machines, they could say to the workingmen of this country, "You can strike, and we will close up here, and we will manufacture our goods in Scotland, in Germany, and in France." The only difference would be the cost of transportation, which is a mere bagatelle.

Mr. MARTINE of New Jersey. They do that even to-day; but whether they do or whether they do not, I say sewing machines are a necessity for the housewives. They are a necessity for the thousand and one little homes throughout the length and breadth of our land. If a tyrannical, arbitrary, wealthy corporation will pursue such high-handed methods as those, then I say God speed the day of the open door.

Mr. SMOOT. Mr. President, the Senator certainly must have misunderstood me if he thought I said anything intimating that sewing machines are not a necessity and are not used by the

poor people of this country.

Mr. MARTINE of New Jersey. Oh, no; I do not think the Senator said that.

Mr. SMOOT. Just a minute, and then I will not take any more of the time of the Senator from Arizona.

Mr. MARTINE of New Jersey. I ask the Senator's pardon. Mr. ASHURST. Of course I yield, but I wish to conclude the

discussion as soon as possible.

Mr. SMOOT. Then I will surrender the floor. Mr. ASHURST. I wish the Senator from Utah to understand that I will yield to him now if he wishes me to do so, but I do not want my speech to consume too much time. I trust he will not feel that I have attempted to cut him off.

I do myself no injustice when I say that I feel presumptious in placing my experience with, and my study of, the tariff question against his. But, limited as my experience and observations are upon the subject, I nevertheless have some very

definite views.

I call the attention of the distinguished Senator from Utah to the fact that sewing machines manufactured in Connecticut, and selling in the United States to the American housewife for \$40, sell abroad for \$20 and \$15, just as McCormick reapers manufactured near Chicago sell for much less than the American price in cities in the southern part of Russia, and just as the steam shovels and steam plows that are manufactured in Pennsylvania sell in Egypt and South Africa for much less than they do at home.

Mr. SMOOT. I was going to answer the question of the Senator as I have certain figures here upon that very subject, and I could give the answer at this time, but I shall not intrude

any longer upon the Senator.

Mr. ASHURST. To resume, Mr. President, the tariff, in my judgment, affects the earning capacity of a man; it enters into the expenses of the home builder and the housekeeper; the prices of the children's clothing from hats to shoes are fixed and determined by it; and therefore it is of the utmost importance that husbands and wives, fathers and mothers, should acquaint themselves as fully as possible with the subject.

During the past 40 years the protected interests of this country, with marvelous success, have deluded the public into accepting and believing the ridiculous and false proposition that low tariffs bring low wages and that high protective tariff schedules bring high wages. Nothing could be falser or further from the

Tariffs are levied for revenue or for protection. Sometimes for both. Revenue tariffs contemplate the bringing of goods into the country. Protective tariffs contemplate the exclusion of goods, and are therefore always higher than revenue tariffs. Under a protective tariff the domestic manufacturer, with a monopoly in the home market, by adding the amount of the duty to the prices of his goods, forces the consumer to pay more for the goods than he—the manufacturer—could sell them for in an open, competitive market. Hence when tariffs are high the consumer pays all the goods are worth, plus the amount of the tariff, and in this way the consumer becomes a contributor out of his earnings and savings to the enormous profits of the trusts and protected industries.

Did you ever hear of a protected industry raising wages be-cause the tariff increased its profits? Never. On the contrary, as has been pointed out so specifically by the Senator from South Carolina [Mr. SMITH], the American workman is compelled to throw his labor into an open, unprotected market and compete with the cheap European and Asiatic laborers who come here. The captains of these great protected industries have a maxim which is as follows: "We buy our labor where we can get it the cheapest." And then these captains of industry, while selling goods at protected prices and while bringing the cheapest labor of the world into competition with the American workman, have the effrontery to say that high-tariff schedules

protect American labor.

The system of tariff for protection taxes the consumer and does not raise his wage, and the fictitious prices of goods, under the tariff's operations, are obtained by the false pretense of protection to labor.

The tariff baron is privileged to buy labor in the open market, and then, under the thin disguise of protecting labor, he sells

his product to the people at enormous prices.

I now ask that an article from the Albany Times-Union, en-titled "The Impossible Man," be read at the desk at this time

as a part of my argument.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[From the Albany Times-Union.] THE IMPOSSIBLE MAN.

That American Woolen Co., at Lawrence, Mass., which recently settled a strike in its mills, triumphantly announces that it gives work to 30,000 employees and has an annual pay roll of \$13,000,000.

Let the reader "make believe" that he is an average one of the 30,000.

Then, you receive for a year's work \$433.33. Let's see what you can do with your money, presupposing that you are really willing to get along with the cheapest things. Now, the figures we are going to give are estimates based on average prices in various localities, and the quantities named will vary, too, according to localities, so that these figures will be most satisfactory to the reader if he compares them with what he knows about prices and quantities from his own experience.

Cost of clothes per year: Hats, \$2; two suits, \$25; three pairs of shoes, \$9; overcoat, \$10; three suits of underclothes, \$4; six shirts, \$5; 10 pairs of stockings, \$2; hedelothes and laundry, \$52. Total, \$109.

Cost of food per year: Three loaves hread per week, at 6 cents, \$9.36; 4 pounds meat per week, at 15 cents, \$31.20; 8 pounds potatoes per week, at 6 cents, \$24.96. Total, \$65.52.

Cost of other things per year: House rent, at \$8 per month, \$96; water rent, at 50 cents per month, \$6; fuel, at \$3 per month, \$36. Total, \$138.

Grand total, \$312.52. Income, \$433.33.

water rent, at 50 cents per month, \$6; fuel, at \$3 per month, \$36. Total, \$138.

Grand total, \$312.52. Income, \$433.33.

Glory hallelujah! There's \$120.81 to put in the bank! "Do not spend all your income" is printed in big type on the back of the pay envelopes of the American Woolen Co., and, praise be, we've just figured out how we can put \$10 per month in the saving bank! But, wait a minute. Let's see what sort of a workman, what sort of a citizen of the United States we've created in this imaginary fellow.

First, he is a single man. He is ruined if he marries, damned to everlasting retrogression and misery if he has children. Therefore, while he may be the very sort of fellow the woolen company wants, he is not the sort of fellow that the United States wants.

Secondly, our imaginary workman has no collars, neckties, handkerchiefs, rain coat, rubbers, or umbrelias, and never shaves or bathes, for we've not put the cost of these things in our list. Forsooth, our imagination has created an habitual slouch citizen. He never rides on a street car, never goes to an amusement, never buys a book or a flower. He is just a working fellow without ambition or self-respect, and hence a poor animal.

Thirdly, we have created an impossible man. We make him deny himself tobacco, coffee, milk, tea, pickles, preserves, pastry, and condiments of every sort. He never has to have the services of doctor or dentist. He does his own cooking and housework.

But the American Woolen Co. will say there's the \$10 he's saving monthly. He is one of our contented workmen. We like his sort. Let's see.

Let's see.

Living the dog's life we have pictured, he has got to save for nearly three years to be able to live one year when accident, old age, or the wear and tear of just bread, meat, and potatoes, or disease, knocks him down. Else somebody else must support him finally.

Thirty thousand employees at Lawrence up against a proposition that is an impossibility to them and which means to the Nation race suicide and impoverished old age! Some time our people will seriously and enthusiastically promote the policy of a minimum wage, under which hopelessness must give way to opportunity, to progress, through which men can rise from the condition of confirmed beasts of burden to valuable and valued citizenship.

Mr. THOMAS. Mr. President-

The VICE PRESIDENT. Does the Senator from Arizona yield to the Senator from Colorado?

Mr. ASHURST. I do. Mr. THOMAS. It seems to me to be quite appropriate in this connection to refer to the report of the Massachusetts commission, I think, for 1911, about the time of the Lawrence troubles, which, among other things, recites:

If an industry is permanently dependent for its existence on under-paid labor its value to the Commonwealth is questionable,

Mr. GALLINGER. Would the Senator from Arizona kindly tell us precisely the comforts that same man probably got in his own country before he came to America, when he was getting less than half the wages that are paid here?

Mr. ASHURST. With all respect to the Senator, it is not a question of the wage he received in his own country before he came here. The question is, What do they get here and whom has he displaced by coming here. What American workman

has he displaced by coming here?

Mr. GALLINGER. Mr. President, that point has been discussed so often that I will not impose upon the courtesy of the Senator to restate it beyond saying that he has not displaced anybody. The Americans in New England are employed. They would not take employment in the mills if they had an opportunity. They can do better. The foreigners coming here to better their condition are given employment in the mills. a very low grade of labor, and they are getting more than twice what they received in their home countries.

Mr. ASHURST. The difficulty, Mr. President, is that some captains of industry persist in treating labor as a commodity. just as they treat coal, iron, and wood as commodities. Some captains of industry forget that labor is human and also that it must be housed, fed, and clothed, and its material and its idealistic wants and desires ministered to as well. Labor may

be a commodity, but it is human also. Mr. WEEKS. Mr. President

The VICE PRESIDENT. Does the Senator from Arizona yield to the Senator from Massachusetts?

Mr. ASHURST. I do.

Mr. WEEKS. I perhaps did not get the full import of what the Secretary has just read, but I caught something about the wages paid by the American Woolen Co. and the savings in the savings banks in the city of Lawrence. I am led to remark that the wages paid in the woolen industry of Massachusetts are higher than the wages paid in that industry anywhere else in the United States or in the world, and that those 30,000 work-

men in Lawrence, to whom I heard the Senator from Arizona refer just now, have more money in the savings banks per capita in the aggregate than probably all the people in Arizona put together. They certainly have \$325 per capita at least in the savings banks of Lawrence, and they had at the time of the strike to which reference has been made.

Mr. ASHURST. Mr. President, one of the excellent features of the pending bill is that an effort has been made to place as many rates of duty as possible upon the ad valorem principle. The specific-duty system tends to disguise and conceal the true character and burden of the tariff, and thereby to keep the consumer, who pays the same, in the dark as to the precise amount of money he pays. There is fundamental merit in the ad valorem principle feature, for it tends sharply to bring to the attention of the people the fact that they furnish the money which the Government spends.

One of the wise, equitable, and just features of the pending bill is the income tax feature. It will be remembered that some 17 years ago the income tax was decided to be unconstitutional, but the people of the United States recalled that decision through the medium of an amendment to the Constitution of the United States, and this Congress is now enabled to lay a tax on incomes. The income tax is a much fairer manner of raising revenue than by tariff tax, and its directness will in all probability tend to educate us to a less extravagant idea of national expenditures.

Many criticisms have been directed against this pending bill for the alleged reason that it will injure many American indus-tries. In reply the Democratic Party says: "We envy no man what he makes: we only challenge what he takes.'

Some criticisms have been made of the President because of his earnest desire that his party shall observe the promises made in its recent national platform; but in spite of criticism, the Democratic Party, under the leadership of President Wilson, has again become a living rampart of civic freedom.

His administration is now approved by the vast majority of American citizens, and the historian will write it down as an excellent, useful, and honorable portion of the history of this Republic, for it stands to-day the impregnable bulwark of the liberty of the people, a barrier against the insidious encroachment of special privilege.

I ask permission that I may include in the RECORD, without reading the same, as a part of my remarks, an article entitled "The plot against cheap sugar," by James Creelman, which I have clipped from Pearson's Magazine.

The VICE PRESIDENT. Is there objection? The Chair

hears none.

The article referred to is as follows:

THE PLOT AGAINST CHEAP SUGAR.

(By James Creelman.)

(By James Creelman.)

It is only a few weeks since Dr. Wiley, the burly hero of the fight for pure and honest food in America, stood among hundreds of banqueters in one of New York's great hotels and, with upraised hands and flashing eyes, declared that the real prosperity of a people should be judged largely by the average quantity of sugar they consumed.

As the Government's great food expert uttered this thought a roar of applause burst from representative men drawn from all parts of the American Continent.

One of the most amazing things about the struggle to reduce the cost of living in the United States by lowering the tariff on foods is the small attention given to sugar, which is not only the great luxury of the poor but a substantial and nourishing food that offers relief from the high prices of meats, butter, and other common means of life.

The great cane-sugar trust known as the American Sugar Refining Co., and its army of lawyers and lobbyists, used to fight both openly and secretly for the removal of the heavy customs tax on raw sugar, and Henry O. Havemeyer, the enmillioned despot of the refining industry, who taxed the food of the Nation with almost governmental powers, would lay his hand on his breast, roll his shifty eyes upward, and say that the tariff was the mother of trusts.

That was when the cane-sugar trust was trying to throttle the competition of the beet-sugar industry in the West. But since the cane-sugar trust has bought practical control of or made combinations with enough of its former rivals to dominate 64 per cent of all the beet-root sugar made in the United States the cry for free sugar has been abandoned and a singular and significant silence has followed—not a silence altogether, for the spokesmen of the trust, having secured ownnership of 41 per cent of the stock of the principal beet-sugar companies, now speak with emotion of the interests of about 100,000 persons, a large pare of them Asiatics and illiterate European immigrants, engaged in growing cane and sugar beets in

duties levied on other things.	Duty.
SugarPer cent	78, 87
Champagnedo	70
Automobilesdo	45
Fursdo	50
Wheatdo	30 15
Paintings and statuarydo	10

Yet this increasonable tax on sugar, which is collected on the meals of the whole American people three times a day, at a time when the

cost of living is almost intolerable, does no good to American farmers, who get no more for their beets from the greedy refiners than is paid to the beet growers of Europe, where the standard and expense of life is so very much less.

One authority estimates that with the duty on raw sugar removed the Nation would at once be relieved of a tax of \$150,000,000 a year on its food. Another authority, taking the average duty on all raw sugars to be only \$1.41 a hundred pounds, figures the lessened cost of free sugar to the people at more than \$110,000,000.

Whatever difference there may be in reaching a reliable average in the varying duties on raw sugar, it is quite certain that if sugar were free from import taxation the American housewife could buy from a quarter to a third more sugar for the same price, and this without disturbing the present profits of the cane or beet growers or the retail dealers.

disturbing the present profits of the cane or beet growers or the retail dealers.

Think of the morality of a national policy that taxes sugar 78 per cent of its value while laying a tax of only 15 per cent on paintings and statuary and 10 per cent on diamonds.

Small wonder that a beet-sugar refinery, protected by the abnormal sugar tariff, can pay enormous profits—41 per cent of which goes to the American Sugar Refining Co., which virtually controls both the cane and beet sugar industries—while the farmer who grows beets gets only about \$5 a ton for his product, barely enough to support life and sometimes less than the cost of production, and the grocer has to sell sugar almost without profit.

The slightest investigation of the facts shows how greatly the excessive and unnecessary duty on sugar has contributed to the shameful food tragedy of America. Greed and corruption have inspired and controlled governmental policies, while statesmanship has been blind, helpless, or complaisant.

#### THE CONTROL OF SUGAR.

The controlled governmental policies, while statesmanship has been blind, helpless, or complaisant.

THE CONTROL OF SUGAR.

Think of taking \$110,000,000 or \$150,000,000 a year from the American people—and the sugar tax bear relatively more on the poor than on the rich—for the sake of a handful of financial promoters and refiners. Consider the infamy of a food tax nearly twice as high as the tax on automobiles and nearly eight times higher than the tax on diamonds.

On diamonds.

The consider the financy of a food tax nearly twice as high as the tax on automobiles and nearly eight times higher than the tax on diamonds.

The processes are simple and comparatively inexpensive, in spite of the sattempt to make them appear complex and costly.

For many centuries the sugar-making industry was confined to attempt to make them appear complex and costly.

For many centuries the sugar-making industry was confined to a state of the sattempt to make them appear complex and costly.

For many centuries the sugar-making industry was confined to a state of the sattempt to make them appear complex and costly.

For many centuries the sugar-making industry was confined to a state of the sattempt to make them appear complex and costly.

For many centuries the sugar-making industry was confined to a state of the sattempt to make them appear complex and costly.

For many centuries the sugar-making industry was confined to the light of the sattempt to make them appear complex and costly.

For many centuries the sugar-making industry was confined to the sattempt of the sattempt to make them appear complex and costly.

For many centuries the sugar state of the sattempt of th

Although there is a slight chemical element in sugar refining, the industry is an almost purely mechanical one. In a high-grade modern refinery little human labor is required. The principal work is done by

refinery little human labor is required. The principal work is done by machinery.

The tremendous bearing of the abnormal duty on raw sugar on the daily life of the American people may be partially understood by the testimony of Claus A. Spreckels, president of the Federal Sugar Refining Co., an independent organization, who informed a congressional committee that the duty on raw sugar increased the price of sugar to consumers in the United States about 2 cents a pound.

This would mean an extra and unnecessary cost of more than \$150,000,000 on the 7,504,795,200 pounds of sugar consumed in the country in 1910. It may be that Mr. Spreckels's estimate of the average duty on raw sugar was too high, and that, assuming the lowest average rate of duty, the extra burden borne by the people in 1910 was nearer to \$110,000,000.

But the vital thing to remember is that only part of this enormous sum, so wrung from the masses, goes into the National Treasury. Nearly all the rest of it goes into the pockets of the sugar refiners, controlled by a few multimillionaires.

The sugar tax grinds hard on the poor. Stale bread may be made into puddings with the help of sugar. Sweetened rice may enrich the humblest meal. The broken fragments of coarse fare, the leavings and pickings, may be turned into palatable dishes, with the addition of sugar. A few handfuls of flour, with a little sugar, may be transformed into cake and, with the cheapest fruits, into pies. Coffee and tea become luxuries when flavored with sugar. The candy consumed in the United States every year, mostly by the working masses, costs \$500,000,000. Nine-tenths of this candy is of the cheaper sort used by those of limited means. With sugar or sirup pancakes are a Joy. Sugar refines and bewitches porridge and corn mush. Even a slice of bread becomes an enchanted thing when sirup or molasses is poured over it.

Sugar refines and bewitches porridge and corn mush. Even a slice of bread becomes an enchanted thing when sirup or molasses is poured over it.

It is the poor, above all, who feel the weight of the duty imposed on sugar, for it touches their necessities morning, noon, and night, and every day in the year; and such a tax on food, maintained year in and year out, reminds one of the intolerable food conditions in England of which Buckle wrote:

"It is now known that marriages bear a fixed and definite relation to the price of corn; and in England the experience of a century has proved that, instead of having any connection with personal feelings they are simply regulated by the average earnings of the great mass of the people; so that this immense social and religious institution is not only swayed, but is completely controlled, by the price of food and by the rate of wages."

With free sugar the fruit growing and canning industries of the country would be greatly stimulated. When there is a great crop of strawberries, peaches, apples, cherries, or any other fruits that lend themselves to preserves, jams, and jellies, and when these wholesome fruits are so cheap that the poorest may buy them, a large part of the crop perishes in decay because the price of sugar is too high to permit families of limited means to make preserves or jams. This is a common form in which great losses are inflicted on the people generally and upon fruit growers particularly. The professional preserving industries of the United States use more than 240,000 tons of sugar a year. It is estimated that the preserving done in homes uses three times as much as the factories. The enormous annual losses inflicted in this way upon the fruit growers of the country, to say nothing of the deprivations suffered by the consuming public, cught to be sufficient to arouse general attention to the destructive character of the excessive duty on sugar and the direct economic and social disaster which it works.

The shameful character of this high tax on impo

to arouse general attention to the destructive character of the excessive duty on sugar and the direct economic and social disaster which it works.

The shameful character of this high tax on imported raw sugar was shown only a few months ago, when the beet-sugar refiners deliberately robbed the American people of at least \$10,000,000 in a single season by an unjustified advance in prices under cover of the tariff on raw sugar. This is the sober truth.

The growing European beet-sugar crop of 1911 indicated a marked shortage. In addition to this, there was a shortage of 300,000 tons of raw cane sugar in Cuba. In consequence of this, the price to the refiner of imported raw sugar advanced almost 2 cents a pound. The retail price of refined cane sugar advanced from an average of 5 cents a pound to nearly 8 cents a pound.

Now, this had nothing to do with the beet-sugar refiners. Out of the 3,500,000 tons of sugar consumed in the United States, the beet-sugar refiners furnished less than 500,000 tons. These refiners were not in any way affected by the advance in the price of imported raw sugar. They paid no more for their beets than before. They gave the farmers the smallest price at which they would consent to grow beets. There was no reason why they should have advanced prices. The cost of producing beet sugar was just what it had been, neither more nor less. Yet, as soon as imported cane sugar—which had to pay a heavy duty in addition to the advance in price—rose to nearly 8 cents a pound at retail, the beet-root sugar refiners, acting in concert with the powerful American Sugar Refining Co., in cold blood increased the price of beet-root sugar to just a fraction below the staggering price of cane sugar. The extra prefits extorted from the American public by the beet-sugar refiners in that one campaign are moderately estimated at about \$10,000,000; and in the face of spoliation like this, without the slightest benefit to the farmer who grew the beets, the Sugar Trust lawyers will tell you that the immense duty

independent refiners, has taken the matter up, puts the case in this way:

"The excessive profits made possible by our high tariff are obtained in refining and not in cultivating sugar beets.

"Evidence of this is found in the fact that the total capitalization of the domestic beet-sugar factories exceeds \$100,000,000, and, as stated above, they produced only 450,595 tons of sugar. A cane-sugar refinery, located in New York, with \$10,000,000 capitalization, has a producing capacity of nearly 400,000 tons. This is sufficient to show that the domestic beet-sugar men have capitalized their ability to exact excessive profits from the consumer by reason of our high tariff, in fact they have capitalized the tariff.

"This contention is further supported by the fact that beet factories do not grow their own beets if it can possibly be avoided. They prefer to have the farmer do this part of the work, and then 'gerew' him down as much as possible on the price of sugar beets delivered at the factory. It is true that there are some factories that do cultivate some beets, but this is only done where it is found impossible to get farmers to grow them in sufficient quantities to supply the factory, or in the way of conducting experimental work."

It has been proved through the mouths of the ablest refiners that cane sugar, without paying duty, can be refined and sold at retail in

the United States at from 3½ to 3½ cents a pound. This price, of course, would be subject to fluctuations, upward and downward; but it represents a fair average. It has been shown also that well-managed beet-sugar refineries, established in sections where beets can be advantageously grown, rather than in neighborhoods not favorable to beet cultivation, could sell sugar at an equally low price and still make fair dividends on their invested capital. The tariff on sugar simply serves to keep up the Wall Street price of water securities at the expense of the American people as a whole.

Before 1887 there was free competition in the sugar industry of the United States. In August of that year Harry D. Havemeyer brought about a consolidation, in the form of a \$50,000,000 trust, of the 17 leading sugar-refining companies which controlled 90 per cent of the sugar industry and trade of the country. This conspiracy to secure a monopoly resulted at once in the dismantling and abandonment of the factories of the North River Sugar Refining Co.; the Dick & Meyer Co.; Moller, Sierck & Co.; the Oxnard Bros. Co.; Bay State Sugar Refining Co. In 1889 the factories of the De Castro & Donner Sugar Refining Co. and of the Havemeyer Sugar Refining Co., in Brooklyn, were also dismantled. The monopolies. under Mr. Havemeyer's ruthless leadership, went at their work boldly.

THE TRUST AND MR. ARBUCKLE.

The formation of the Sugar Trust resulted in mighty profits. Apparently the American public was at the mercy of Mr. Havemeyer and his fellow conspirators, for the independent refiners were in a weak position. But in 1890 the New York court of appeals declared the trust to be illegal whereupon Mr. Havemeyer had the combination reunited in the form of the American Sugar Refining Co., under the laws of New Jersey, with a capital stock of \$50,000,000, which was afterwards increased to \$75,000,000.

However, the work of completing the plot to control sugar and give the trust an actual power of taxing the people went on. The elder Claus Spreckels and two of his sons surrendered their refineries in California and in Pennsylvania to the sugar king. The Delaware Sugar House, the Franklin Sugar Refining Co., and the E. C. Knight Co. were captured and eliminated from the field. Presently the trust controlled 98 per cent of all the refined sugar made or sold in the United States.

It boots little to tell the story of alternate coercion, seduction, and double intrigue through which the monstrous sugar plot was realized by Mr. Havemeyer and his friends and hirelings. In those days Mr. Havemeyer was the loudest advocate of free raw sugar. His agents were everywhere pressing the fight for a reduction in the tariff. The trust was anxious to destroy the weak but growing beet root sugar industry in the West. The whole country is familiar with that desperate and ceaseless struggle between the trust and the beet-sugar refiners.

In the meantime tall John Arbuckle gave battle to the trust. Mr. Arbuckle and his brother Charles had been wholesale.

refiners.

In the meantime tall John Arbuckle gave battle to the trust. Mr. Arbuckle and his brother Charles had been wholesale grocers in Pittsburg, but in the early eighties he came to New York City, established a coffee-roasting plant in Brooklyn, and developed an enormous business in coffee put up in small paper bags. About 1890 the Arbuckle firm, which had become enlarged by the addition of William A. Jamison, William B. R. Smith, and James N. Jarvie, began to put up and sell on a large scale packages of sugar put up in paper bags. John Arbuckle was a man of genius, energy, and courage, and the business of the Arbuckle Bros, grew prodigiously. The firm owned a remarkable weighing machine which made paper bags and filled them with an almost uncanny exactness. The Arbuckles bought their sugar from the trust.

able weighing machine which made paper bags and filled them with an almost uncanny exactness. The Arbuckles bought their sugar from the trust.

But the greedy eyes of Mr. Havemeyer were upon that wonderful weighing machine which enabled the independent firm to build up such an enormous trade in package sugar. The trust wanted to buy the machine, but the Arbuckle brothers refused to sell it. Thereupon Mr. Havemeyer ordered the trust not to sell any more sugar to the firm which had dared to refuse obedience to him.

John Arbuckle's answer was characteristic of the man. He at once started to build a sugar refinery of his own in Brooklyn. Enraged by this defiance of the Sugar Trust the Havemeyer interests bought control of the Woolson Spice Co., of Toledo, Ohio, and began selling package coffee at cut rates in order to break down the trade of Arbuckle Bros. Mr. Havemeyer and John Arbuckle met about that time.

Said Mr. Havemeyer, "Mr. Arbuckle, I want to buy 60 per cent of your sugar refinery."

Said Mr. Arbuckle, simply, "As long as I live and have my health and strength you will never own one penny's interest in either my sugar or coffee business. But the world is wide and there is no reason why we can't both live in it."

Then followed a furieus war between the American Sugar Refining Co. and the Arbuckle Bros. When John Arbuckle originally went into the sugar business he told his partners that he was too old to undertake anything new, but when he was attacked by the trust he forgot his years and white hair and engaged in the battle in a way that has become historic. Mr. Havemeyer undersold the Arbuckle Bros. and the Arbuckle Bros. undersold the trust. The price of sugar went down sensationally. There was no truce and no parley. By 1990 the Arbuckle Bros. had lost several hundred thousand dollars in the fight and \$2,000,000 of the trust's surplus had disappeared. Mr. Havemeyer abandoned the fight and raised the price of sugar again. John Arbuckle had fought the trust to a standstill.

Still the trust containued

# THE TRUST ITSELF.

While the trust was trying to strangle its rivals, the beet-sugar industry had grown in the West. It was able to undersell cane sugar in the interior of the country. Mr. Havemeyer decided to capture the beet-sugar industry in order that the trust might be in a position to realize its dream of an absolute monopoly and tax the country at will. Up to 1898 only 40,000 tons of refined beet sugar were made in the United States. But under the stimulation of the tariff of 1897 beet-sugar production had increased to 165,000 tons in 1901.

Intent on capturing the beet root sugar industry, Mr. Havemeyer increased the capital of the American Sugar Refining Co. from \$75,000,000 to \$90,000,000, and with the war fund thus provided and with secret rebating arrangements with railroad companies, the trust first manufactured and stored an enormous surplus of sugar and

suddenly opened the war against the beet-sugar companies by underselling them in their own territory. The trust appointed a "beet-sugar committee," with power to buy control of the beet-sugar companies. In 1901 and 1902 the trust invaded the beet-sugar companies.

In 1901 and 1902 the trust invaded the beet-sugar companies.

In 1901 and 1902 the trust invaded the beet-sugar companies were face to face with ruin. One after another sold out to the trust. Mr. Havemeyer was shrewd. He did not waste a dollar. When he had the beet-sugar companies helpless, the trust bought just enough stock to dominate the industry. The ownership of 45 per cent in the stock of a company whose securities are scattered about in the open market is usually sufficient to establish control.

The Havemeyer conspirators had one supreme idea in view. The granting of a 20 per cent reduction in custom duties to Cuba had warned them that the high tariff was in danger. With the beet-sugar refinerles in their control they could raise the cry that lower duties on sugar would threaten a struggling native American industry and strike at American beet farmers. Thus they could fix prices in the East and West and gradually destroy their competitors.

It never seemed to enter into Mr. Havemeyer's head that some day there might be an irrestible demand for duty-free sugar in the interest of more than 90,000,000 Americans, to whom sugar as a common food had become a necessity; that the millions of fruit growers of the country might ask for cheap sugar as a preservative and condiment in order to prevent waste of their mighty crops; or that the Nation might not be impressed by high-tariff arguments intended to keep up the Wall Street price of watered stocks.

The United States Government has traced this plot of the Sugar Trust in all of its ramifications, and in its formal petition for the dissolution of the combination makes the following solemn declaration: "Thirty-seven companies, which opening the end of the shock holding therein by defendants are set out

## WHAT IT MEANS TO YOU.

WHAT IT MEANS TO YOU.

In the light of these facts it is easy enough to understand why the price of beet sugar is always fixed in advance on the basis of the price of cane sugar named by the American Sugar Refining Co. And one has only to look at the multitudes of Japanese, Hindus, and Chinese coolies at work in the sugar-beet fields of California and the Asiatics, Polacks, and other Ignorant immigrants employed in the growing of beets in Colorado, Utah, and other States, to say nothing of the underpaid negro labor which cares for southern sugar cane, to understand the hypocrisy of the trust's claim that the high tariff on sugar must be maintained to protect the American farmer.

When it is considered that the cane-sugar refiners, who have to import their raw materials, make only from 15 to 20 cents a hundred pounds, and that the competition of the cane-sugar independents is too fierce to allow any increase in profits, it will be seen that the effect of abolishing or lowering the amazingly high tariff on raw sugar would be simply to compet the beet-sugar refiners to adopt high-grade methods and content themselves with reasonable profits in order that the people as a whole may have cheaper food.

The average cost of imported Cuban and standard granulated raw sugar without duty in New York for the last 10 years has been 2.443 cents (barely 2½ cents) a pound. The cost fluctuates, however. During 1911 the cost of imported raw sugar to New York refiners without duty averaged, with freight paid, 2.8773 cents (more than 2½ cents) a pound. The duty averaged 1.3480 cents (or about 1½ cents) a pound. The full cost to the refineries, duty, freight and insurance paid, was 4.2396 cents (almost 4½ cents) a pound. The average net wholesale price of the refined sugar was \$5.1182 (a fraction less than \$5.12) a hundred pounds, This left a fraction less than \$8 cents a hundred pounds (exactly \$7.86 cents) to the refiners, out of which the cost of refining and distribution must be taken—say, 65 cents a hundred pounds, or a shade m

cents a hundred pounds, or a shade more than one-fifth of a cent a pound.

The tariff and the cost of transportation from Europe keeps all foreign-refined sugar out of the United States. Yet the competition of the cane-sugar refiners in the Eastern States keeps the price of sugar about one-half of a cent a pound lower than would be possible if they took extreme advantages of the full tariff protection. So that if the duty on raw sugar were removed it is practically certain that the consuming public would get the whole benefit of the reduction in the cost of production, and the trust-dominated beet-sugar refineries would have to meet the lowered prices.

To appreciate the importance of this reform to the lives of the masses of the people it is only necessary to know that the beet-sugar refiners base their selling price on the New York price with the freight rate from New York added. In other words, they tax the interior of the country as high as they can without inviting the competition of the independent cane-sugar refiners of the East. If the duty were removed from raw sugar, they would have to drop their prices accordingly. No wonder the Sugar Trust, which also controls the beet-sugar industry, has abandoned its fight to reduce the tariff and is now the loudest shouter for protection by taxation.

It is urged that our treaty with Cuba gives that Republic the right to a reduction of 20 per cent in our tariff and that it is impossible to have 20 per cent lower than nothing. But if that argument is to be considered it would be entirely proper to reduce the tariff on sugar to just 20 per cent of its present figures and admit Cuban sugar free.

Even if it be necessary to levy some tax on sugar for the sake of national revenue, why should such an enormous tax as the present rate

of duty be laid on an article of food at a time when the high cost of living has attracted the attention of the whole world to the abnormal and alarming social and political condition of what should be the most prosperous and contented people on earth?

When one has studied these hard facts and considers what the duty on sugar means to every man, woman, and child of the 94,009,000 population in the United States, except, of course, the few beet-sugar men who have grown wealthy, often beyond the dreams of Wall Street get-rich-quick adventurers, it is necessary to think of who pays the bills. How long is it going to take the American people to wake up to the fact that they have some rights which should be considered, and particularly at this time, when breadwinners find it hard to make ends meet and prevent that hungry, pinched look on the faces of the little ones who meet them when their day's toil is ended?

Members of Congress are supposed to represent the people and serve their needs. How many congressional districts, if the people had their say, would fail to vote down the duty on sugar? Let the rich, who can afford diamonds, furs, automobiles, and champagne, pay fairly for their luxuries, and let the people at large have free sugar and free everything that goes to make up the daily expense of the great army of toilers.

After all, the final responsibility for existing conditions rests upon the ordinary American citizen. The people have but to write to their Representatives and Senators in Washington in plain unmistakable language to win this great battle. It is the only way.

The VICE PRESIDENT. The reading of the bill will be resumed.

resumed.

The Secretary. On page 98 the committee report to strike out paragraph 331-

Mr. SMOOT. Did paragraph 330 go over?

Mr. JOHNSON. Paragraph 330 did not go over, but I will say to the Senator I should like to have paragraph 651 go over. Mr. LODGE. That went over when we passed on the free

Mr. SMOOT. Paragraph 651 went over. Mr. LODGE. Paragraph 330 has been disposed of. The VICE PRESIDENT. It has been.

Mr. JOHNSON. Does the record show that paragraph 330 has been disposed of?

The VICE PRESIDENT. It does.

The next amendment of the Committee on Finance was to strike out paragraph 331, in the following words:

331. Papers commonly known as copying paper, stereotype paper, bibulous paper, tissue paper, pottery paper, letter-copying books, wholly or partly manufactured, crêpe paper and filtering paper weighing not more than 10 pounds per ream of 480 sheets, and articles manufactured from any of the foregoing papers or of which such paper is the component material of chief value, 30 per cent ad valorem.

And in lieu thereof to insert:

And in field thereof to insert:

331. Papers commonly known as copying paper, stereotype paper, bibulous paper, tissue paper, pottery paper, and all papers not specially provided for in this section, weighing not more than 10 pounds per ream of 480 sheets on a basis of 20 by 30 inches, letter-copying books, wholly or partly manufactured, crêpe paper and filtering paper, and articles manufactured from any of the foregoing papers or of which such paper is the component material of chief value, 30 per cent ad valorem.

Mr. LODGE. Mr. President, these fine papers are of great ost to manufacture, and the cut of 30 per cent is very serious. The costs are much higher here than abroad. Apart from the difference in labor of our paper mills running 24 hours a day, as the paper mills have to run, on three 8-hour shifts in place of the 12-hour shifts used in foreign countries, while we have three shifts and they have two, greatly increasing the cost, the much greater in the mills making. proportionate cost of labor is much greater in the mills making tissue paper and other high-grade specialties where the product is necessarily limited than it is in large mills making paper of heavier weight.

I merely wish to call attention to this and ask that I may have printed with what I have just said a statement made in regard to these fine papers showing the cost and the difficulty they would have to meet with in doing business under the 30 per cent rate. I shall not delay the Senate by speaking further on it.

The VICE PRESIDENT. The Chair hears no objection to the request of the Senator from Massachusetts.

The matter referred to is as follows:

BRIEF IN RELATION TO PARAGRAPHS 410 AND 413, SCHEDULE M, AND PARAGRAPH 475, SCHEDULE N, OF THE TARIFF ACT APPROVED AUGUST 5, 1909.

To the Committee on Ways and Heans, House of Representatives, Washington, D. C.:

The undersigned are manufacturers of tissue papers and certain special high-grade and lightweight papers.

They desire to make the following suggestions in regard to said paragraphs 410, 413, and 475:

# PARAGRAPH 410.

"410. Papers commonly known as copying paper, stereotype paper, bibulous paper, tissue paper, pottery paper, and all papers not specially provided for in this section, colored or uncolored, white or printed, weighing not over 6 pounds to the ream of 480 sheets, on the basis of 20 by 30 inches, and whether in reams or any other form, 6 cents per pound and 15 per cent ad valorem; if weighing over 6 pounds and less than 10 pounds to the ream, and letter copying books, whether wholly or partly manufactured, 5 cents per pound and 15 per cent ad valorem; crepe paper and filtering paper, 5 cents per pound and 15 per cent ad valorem: Provided, That no article composed wholly or in chief value of one or more of the papers specified in this paragraph shall pay

a less rate of duty than that imposed upon the component paper of chief value of which such article is made."

We ask that no change be made in this paragraph, as our manufacturers have adapted themselves to it, and under present prices, low cost of production in foreign countries, and conditions of the market in this country the rates in this paragraph are equitable.

We call particular attention to the fact that up to the present time very little of the papers mentioned in the first section of this paragraph are made in this country, and for that reason this section of the above paragraph is practically a tariff for revenue only, and therefore should certainly not be reduced, but should be maintained at the present rate or increased, if in the judgment of your committee it be wise to do so. Under the rates fixed in this paragraph the manufacturers in this country are brought into direct and reasonable competition with the foreign market. A lowering of these rates would drive the American manufacturer out of the market, destroy competition, and leave the market open to the foreign manufacturers.

The following table shows the relation of the present duties on these papers to their final value when they reach this country in competition with the same kinds and grades of paper manufactured in this country. The above paragraph divides these papers into two classes:

First. Those "weighing not over 6 pounds to the ream of 480 sheets, on the basis of 20 by 30 inches."

Value per unit of quantity.

\$0.246

(See report of Treasurer for fiscal year ending June 30, 1912.)

The value to the American manufacturer of this second class of papers is practically the same, to wit, 21 cents, thus leaving an absolute competition in this grade.

#### PARAGRAPH 413.

"413. Writing, letter, note, handmade paper and paper commercially known as handmade paper and machine handmade paper, Japan paper, and imitation Japan paper, by whatever name known, and ledger, bond, record, tablet, typewriter, manifold, and onionskin and imitation onlon-skin papers, calendered or uncalendered, weighing 6½ pounds or over per ream, 3 cents per pound and 15 per cent ad valorem; but if any such paper is ruled, bordered, embossed, printed, lined, or decorated in any manner other than by lithographic process it shall pay 10 per cent ad valorem in addition to the foregoing rates: Provided, That in computing the duty on such paper every 180,000 square inches shall be taken to be a ream."

We suggest the following amendment to paragraph 413:
Insert, in line 6, after the words "per ream," the words "whether in reams or in any other form."

The reason we suggest for the above change is as follows:
Large quantities of this class of paper are being imported and classified as printing or tracing paper in rolls, on which classification lower duties are paid. These papers are subsequently sold in this country by the importers as imitation onlonskin, etc., after being cut into commercial sizes. This has resulted in underselling the American manufacturer, and also has resulted in a loss to the United States Government of the duties properly chargeable.

SCHEDULE N—PARAGRAPH 475.

## SCHEDULE N-PARAGRAPH 475,

SCHEDULE N—PARAGRAPH 475.

475. Pipes and smokers' articles: Common tobacco pipes and pipe bowls made wholly of clay, valued at not more than 40 cents per gross, 15 cents per gross; other tobacco pipes and pipe bowls of clay, 50 cents per gross and 25 per cent ad valorem; other pipes and pipe bowls of whatever material composed, and all smokers' articles whatsoever, not specially provided for in this section, including cigarette books, cigarette book covers, pouches for smoking or chewing tobacco, and cigarette book covers, pouches for smoking or chewing tobacco, and cigarette paper in all forms, 60 per cent ad valorem.

We also beg to refer to the item of cigarette papers included in Schedule N, paragraph 475. "Pipes, smokers' articles," etc. It is respectfully suggested that this is the paragraph where it properly belongs, but no less duty than 60 per cent ad valorem, the rate assessed under the present tariff, will enable domestic manufacturers to compete with the foreign producer. The importation of these articles amounted in value for the fiscal year ending June 30, 1912, to \$600,072.50, with duties amounting to \$350,583.50.

It is a well-known fact that the proportionate cost of labor is much greater in all paper mills making tissue paper or other high-grade and expensive papers than in those making the cheaper grades.

The following comparisons indicate the conditions of our market as contrasted with those in Germany, which country would be the chief galner by lowering the tariff on these grades of paper.

The statistics as to German wages are obtained from the report of the German Imperial Government supplying labor items of German mills for the year 1910, as incorporated in the report of the United States consul general, Robert P. Skinner:

Germany.

Skilled labor_____Unskilled labor_____ - 8 cents to 16 cents per hour. - 6 cents to 11 cents per hour. America.

1 25 cents to 50 cents per hour. 13 cents to 25 cents per hour. Skilled labor____ Unskilled labor_ 

We most carnestly request that the present method of having a specific duty as well as ad valorem duty be continued on these papers, because from our experience we have found that when an ad valorem duty only is to be collected there is a constant temptation to importers to under-

value goods, thus causing great hardship and loss to the American manufacturer and honest importer; also a loss of revenue to the Government on account of smaller duties paid.

We earnestly hope that your honorable committee will adopt the above suggestions, and thus maintain an important industry.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. JOHNSON. I ask that paragraph 332 be passed over at this time for further consideration.

The VICE PRESIDENT. It will be passed over.

The next amendment of the committee was, on page 101, to strike out paragraph 333, in the following words:

strike out paragraph 333, in the following words:

333. Pictures, calendars, cards, labels, flaps, cigar bands, placards, and other articles composed wholly or in chief value of paper lithographically printed in whole or in part from stone, metal, or other material (except boxes, views of American scenery or objects, and music, and illustrations when forming part of a periodical or newspaper, or of bound or unbound books, accompanying the same, not specially provided for in this section) shall pay duty at the following rates: Labels, flaps, and cigar bands, if printed entirely in bronze printing, 15 per cent ad valorem; if printed otherwise than entirely in bronze printing, but not printed in whole or in part in metal leaf, 30 per cent ad valorem; if printed in whole or in part in metal leaf, 30 per cent ad valorem; booklets, books of paper, or other material for children's use, not exceeding in weight 24 ounces each, fashlon magazines or periodicals, printed in whole or in part by lithographic process, or decorated by hand, booklets, decorated in whole or in part by hand or by spraying, whether or not lithographed, 12 per cent ad valorem; decalcomanias in ceramic colors, whether or not backed with metal leaf, and all other decalcomanias, except toy decalcomanias, 20 per cent ad valorem; pictures, calendars, cards, placards, and all other articles than those hereinbefore specifically provided for in this paragraph, 20 per cent ad valorem.

# And in lieu thereof to insert,:

And in lieu thereof to insert;:

333. Pictures, calendars, cards, booklets, labels, flaps, cigar bands, placards, and other articles composed wholly or in chief value of paper lithographically printed in whole or in part from stone, gelatin, metal, or other material (except boxes, views of American scenery or objects, and music, and illustrations when forming a part of a periodical or newspaper or of bound or unbound books, accompanying the same, not specially provided for in this section) shall pay duty at the following rates: Labels and flaps printed in less than eight colors (bronze printing to be counted as two colors), but not printed in whole or in part of metal leaf, 15 cents per pound; cigar bands of the same number of colors and printings, 20 cents per pound; labels and flaps printed in eight or more colors (bronze printing to be counted as two colors), but not printed in whole or in part of metal leaf, 25 cents per pound; labels and flaps printed in whole or in part of metal leaf, 35 cents per pound; cigar bands of the same number of colors and printings, 25 cents per pound; labels and flaps printed in whole or in part of metal leaf, 35 cents per pound; labels and flaps printed in whole or in part of metal leaf, 35 cents per pound; cigar bands printed in whole or in part of metal leaf, 40 cents per pound; cigar bands printed in whole or in part of metal leaf, 40 cents per pound; exceeding eight one-thousandths of an inch and not exceeding twenty one-thousandths of an inch in thickness, 15 cents per pound; exceeding eight one-thousandths of an inch and not exceeding twenty one-thousandths of an inch in thickness and 35 square inches cutting size in dimension, 8 cents per pound; exceeding twenty one-thousandths of an inch in thickness, 6 cents per pound, providing that in the case of articles hereinbefore specified the thickness which shall determine the rate of duty to be imposed shall be that of the thinnest lithographed material found in the article, but for the purpose of this paragraph and the foun

Mr. LODGE. Mr. President, the lithographic industry is a very large one. There are some 40,000 wage earners employed in it. It is purely domestic. I think they have no exports to speak of. I will not undertake to argue the case of this proposed reduction, because I know the reduction will be made, but I should like to ask leave to have printed in the RECORD a memorial from the press feeders, men who work at this business. I also should like to have printed a letter from a very large lithographic company in my own State. I desire to put in the Record the objections to the reductions that are proposed to be made.

The VICE PRESIDENT. Is there objection? The Chair hears none.

The papers referred to are as follows:

A memorial addressed to the Committee on Finance of the United States Senate.

A memorial addressed to the Committee on Finance of the United States Senate.

In the interest of the 40,000 wageworkers engaged in the American lithographic industry, not only in the allied trades but in all departments necessary to the completion of the lithographic product, a respectful but most emphatic protest is herewith submitted against the reduction in Schedule M as proposed in H. R. 3321, as a basis of which protest we submit as follows:

The American lithographic industry is solely a domestic industry, engaged in producing a commodity marketable only in the United States, it having no foreign market, due to the fact of the lower wages and longer hours under which foreign lithographic workmen are employed, all of which makes competition not only impracticable but impossible.

With this condition in mind, facing the inevitable fact that even under our present tariff law we are already to a very large extent at this moment compelled to meet the competition forced by active and energetic importers securing orders on this side to be produced by foreign workmen, we feel justified in contending that the proposed reduction as contemplated in the House bill will seriously interfere with the steadiness of our present employment, which we may well add here is as much an important question to us as the amount of our weekly wage itself.

As a matter of fact, our industry already shows signs of a possibly dull season, brought on, we believe, not through any deliberate attempt on the part of the employer, but on the part of large customers through the mere probability or possibility of a change or reduction in the present tariff law.

For your information let us state that the American lithographic industry is one of the highest stady and much labor; one enters our industry as a boy and must pass through the various branches before he reaches the ultimate goal of highest perfection. Our workmen represent the highest type of the American workmen. More than 95 per cent are citizens, born or naturalized; one language

own market.

Our industry is composed of the following craftsmen: Lithographic artists, pressmen, transferrers, provers, engravers; the wages of whom range from \$20 to \$100 per week, in accordance with the skill required. In addition we have the stone grainers, press feeders, paper cutters, and embossers, all of whose wages range from \$14 to \$20 per week, and in many cases higher; and then we have the press tenders, bronze feeders, and many thousands of men and women engaged in putting the finishing touches on our product before it reaches the ultimate consumer.

and in many cases nighter; and then we have the press tenders, broade feeders, and many thousands of men and women engaged in putting the finishing touches on our product before it reaches the ultimate consumer.

From the above you may readily get a brief idea that it is a highly skilled trade, paying a wage in excess of industries enjoying a higher rate of protection. It is most unjust to compare our industry with some other industries which seek to employ labor willing to live at a standard lower than ours.

We want to be judged alone on our merits. If our ports of entry are thrown open to the labor of the world, we must meet their competition here, and in addition it is unreasonable for us to be compelled to meet a competition of the production of the same workmen when they are engaged and employed abroad. Their low wages and longer hours especially place us at a thorough disadvantage to them. Is it fair, now, to try, as some of the importers and foreign workmen's friends would wish to do, to create a condition between this country and abroad whereby the foreign workmen would have a better chance on printing such lithography as the American consumer might desire, while the low-wage conditions abroad deny us the same right?

The dominant party was not put in power for this purpose; it was to rectify wrongs and not create them. Downward revision, in our humble judgment, was not meant to place the American workmen in open and unfair competition with the markets of the world. To do so in our industry would inevitably tend to lower our standard of living to that of other countries, not through any reduction of our weekly wage, but through lack of work.

It must be borne in mind that in the event of lack of work in our industry our working people can not find equally remunerative work in other industries. Such a thing is impossible; our people have spent years in attaining their skill and could not work at any industry except at its lowest order; you could not expect a lawyer who had lost his practice to make an e

and the sunceres will be the American workness. To this end here are a few illustrations:

Lithographic cigar labels are used in 1 color and upward to 15 colors; some at times desire more style to their box and use metal leaf. Therefore some labels are ten times as expensive as others. Does any consumer of a cigar notice any change in the price when the label is changed to a less expensive one? Therefore the consuming public will not benefit by the proposed cut; if enacted into law the beneficiary will be the foreign workmen; the sufferer the American workmen.

The same principle will apply to the cigar band; the proposed reduction will not change the price of a cigar; it will only result, as before stated. In a detriment to our work people.

Will the proposed cut in decalcomania make the retail price of a Singer sewing machine, an Underwood typewriter, or a Steinway plano less because by the cut in decalcomania duties one-quarter of 1 cent is saved in deconating the machine? We all know that the general public will be paying the same price for the above instruments regardless of the cut; and we further know that the American workmen will suffer and foreign labor benefit thereby.

Will the retail price of a booklet with colored cover and insert, which represents only about one five-hundredth part of the cost of manufacture per thousand, be less if the cut in the tariff is made, as provided in the Underwood bill? Will such a cut be a benefit to the consumer?

And will it not hit hard the American workmen to have this work done abroad?

Cutting the duty on calendars will not reduce the price of the goods sold by the man buying the calendars, but it will mean that American manufacturers will have less calendars to print and less work for American workmen.

Gentlemen, these few illustrations should be convincing enough to prove that the proposed cuts in our schedule will not benefit the consuming public, but will injure the American workmen. The general public is not appealing for a reduction in the lithographic schedule; the only ones appealing for this reduction are the importers, who want the lithography consumed in this country printed by foreign workmen; and we American workmen protest against this. We are compelled to support our country in times of peace, as well as war; and we can not do it well unless we have work. There might be reason to bring about a reduction if the consuming public was demanding it, but they are not.

Why do not they open up a plant in this country and give work to the American people under the present tariff rate? One firm has moved its entire plant to New York from Germany and is employing our people.

Prior to the Payne-Aldrich bill you were unable in the city of Wash-

its entire plant to New York from Germany and is employing our people.

Prior to the Payne-Aldrich bill you were unable in the city of Washington to buy a view card or picture card that was not made in Germany. Thanks to the present tariff rates, you are now able to buy a picture of the White House and other national buildings that is printed by American workmen.

The importer says that the present tariff rate is prohibitive. As an answer to this, we refer you to page 258 of the Government Tariff Handbook, which will show you that importations have increased under the present tariff law.

We could cite many other cases, but feel that enough has been stated to show that American workmen will be injuriously affected if any change is made in the existing law. We appeal to you to make no change. We want work; the cost of living, increasing as it is, makes that imperative. So we ask you to give preference to American workmen over foreign workmen, when it is clearly shown that the general public is not abused or overtaxed.

In closing, we appeal to you to give this your earnest consideration and careful thought, and that our industry will be judged alone and on its merits; and that our efforts to convince you will be fruitful of results and remove from our minds the frightful thought of duil times before us.

Thanking you in advance for any consideration given, I am,

Thanking you in advance for any consideration given, I am,
Respectfully,
W. O. COAKLEY,

W. O. COAKLEY,
General President International Protective Association of
Lithographic Press Feeders, United States and Canada.

General President International Protective Association of Lithographic Press Feeders, United States and Canada.

Boston, Mass., April 16, 1913.

Hon, Henry Carot Lodge,

United States Senate, Washington, D. C.

Dear Sir: In reference to Schedule M, paragraphs 337 and 341, pages 82 and 83, H. R. No. 10, the proposed reduction in duties in lithographic material is such an extreme cut in the rate that it will reduction in the rate is a serious matter and yet the Ways and Means Committee have embedded in their bill the tariff on a strictly ad valorem rate.

As far back as the Wilson bill, it was recognized that the ad valorem reason the authors of the bill—although Dencerate as the present majority of the Ways and Means Committee is—recognized the justice of having a specific rate, which they applied to most of the items on the lithographic schedule.

The Dingley bill made some further additions to the items bearing specific rate, and the Payne-Aldrich bill was made an absolutely specific rate as applying to the general line of lithography. The contention of the American lithographer that the rates affecting lithography should be specific was indorsed strongly by the customs officials having to do with the enforcement of the law, as it is absolutely impossible for any person to decide upon a fair valuation of lithographic work, as there are so many different conditions entering into this, such as quantity ordered, the method of production, etc.

When the lithographic schedule was on an ad valorem basis or a partly ad valorem basis, it was notorious that the goods were undervalued and there was no means of preventing same.

Our company employs from 800 to 1,000 people all at the highest rate of wages, and wages that are as four to one as compared with Germany, although in order to have no controversy on this point the National Association of Employing Lithographers—of which we are members—in brief filed with the Ways and Means Committee (of which we inclose copy) stated the basis as about three to one, being the wag

THE FORBES LITHOGRAPH MFG. Co., F. J. BLANEY.

Mr. SMOOT. In that connection I desire to say that I have a memorial addressed to the Committee on Finance of the United States Senate similar to the one just presented by the Senator from Massachusetts, but as he has presented a memorial

on the subject I shall not present the one I have.

Mr. GALLINGER. Mr. President, this is a matter in which
I have felt a great deal of interest; but while I greatly regret

that these large reductions have been made, I shall not ask for a yea-and-nay vote. The importations of this line of goods are already very large, and it seems to me that it would be good policy for us to encourage domestic production rather than to lower the duty and encourage additional importations. latter, however, seems to be the policy of the Senators in charge Of course, we have got to submit to it, and it would be idle to waste time in calling the roll. So I simply will content myself with the observation I have made.

The VICE PRESIDENT. The question is on agreeing to the

committee amendment.

The amendment was agreed to. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 334, page 103, line 21, after the word "note," to insert the word "drawing"; and in line 25, after the word "typewriter," to strike out the word "manifold," so as to make the paragraph read:

334. Writing, letter, note, drawing, handmade paper and paper commercially known as handmade paper and machine handmade paper, japan paper and imitation japan paper by whatever name known, and ledger, bond, record, tablet, typewriter, and onlonskin and imitation onlonskin papers calendered or uncalendered, whether or not any such paper is ruled, bordered, embossed, printed, lined, or decorated in any manner, 25 per cent ad valorem.

Mr. LODGE. Mr. President, I merely wish to say that this reduction on writing paper is a very severe one. I have here a table that was calculated on some earlier drafted tariff bill, in which it was proposed to impose a duty of 30 per cent, whereas here it is 25 per cent, and the reduction on the basis of 30 per cent ranges from 56 per cent to 27 per cent. They are enormous reductions. This is a very expensive grade of paper, made by mills which have to import a great deal of their material, on some of which they have to pay a heavy duty. I have a brief statement here, which I shall ask to have printed in my remarks, and I shall say nothing further about the matter.

The VICE PRESIDENT. Without objection, permission to do so is granted.

The statement referred to is as follows:

WRITING-PAPER INDUSTRY.

 Investment
 \$54,000,000

 Employees
 16,000

 Wages annually
 \$10,000,000

There are 88 mills located in the following States: Maine, Massachusetts, Connecticut, Pennsylvania, New York, Ohio, Michigan, Wisconsin, District of Columbia.

## LABOR CONDITIONS.

The departments in our mills which work 24 hours per day are run on three shifts of 8 hours each, and in those departments which work days only the 9-hour day prevails. No children are employed, and women work 50 to 54 hours per week. No women or minors are employed at night. The work done by women is light and not injurious to health. The mills are well lighted and ventilated and no injurious fumes or gases are employed in the process.

## WAGES.

The following comparisons indicate the conditions in America as contrasted with those in Germany, which country will be the chief gainer by lowering the tariff on these grades of papers. The statistics as to German wages are obtained from a report of the German Imperial Government incorporated in a report by the United States consul general, Robert P. Skinner.

GERMANY.

Skilled labor, 8 to 16 cents per hour. Unskilled labor, 6 to 11 cents per hour.

AMERICA.

Skilled labor, 25 to 50 cents per hour.
Unskilled labor, 13 to 25 cents per hour.
In addition to this, both skilled and unskilled labor in America works shorter hours than similar labor in Germany.

## RAW MATERIALS.

The raw materials from which writing papers are made, namely, rags and sulphite pulp, must be imported in a very large per cent from the foreign countries which are our strongest competitors on these grades of papers. On these importations, amounting in 1912 to over 100,000 tons of rags alone, must be paid at least one profit to the importer that the foreigner does not pay, as well as freight to this market. It is obvious, therefore, that in importing these raw materials and paying much higher wages in the manufacture, the American manufacturer is at a decided disadvantage. The domestic manufacturer must also pay freight on all waste material, wrappings, etc., which is a considerable item, as may be seen when we remember that it takes from 120 to 160 pounds of raw material to make 100 pounds of fnished paper.

Comparison of Paune-Aldrich rates with Underwood bill (par, 331).

Comparison of Payne-Aldrich rates with Underwood bill (par. 331).

Price per pound.	Old duty.	Proposed duty.	Reduc- tion.
7 cents	Per cent. 86 77 71 65 60 57	Per cent. 30 30 30 30 30 30 30 30 30	Per cent. 56 47 41 35 30 27

We propose a uniform duty of 40 per cent.

#### PARAGRAPH 222

Note that photographic paper, sensitized and ready for use in making photographs, pays the same duty as the plain basic paper. There should be a compensatory duty of at least 10 per cent.

Comparison of Payne-Aldrich rates with Underwood bill (par. 334).

Price per pound.	Old duty.	Proposed duty.	Reduc- tion.
5 cents. 6 cents. 7 cents. 8 cents. 9 cents. 10 cents. 1	Per cent. 75 65 58 52 48 45	Per cent. 25 25 25 25 25 25 25 25 25 25	Per cent. 50 40 35 27 23 20

We suggest a uniform duty of 40 per cent.

H. A. Moses, Chairman. Charles McKernon. A. W. Esleeck.

Mr. SMOOT. The equivalent ad valorem under the present law on writing paper enumerated in this paragraph is 45.23 per

cent, and it is now proposed to reduce it to 25 per cent.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The reading of the bill was resumed; and the Secretary read paragraph 335, as follows:

335. Paper envelopes, folded or flat, plain, bordered, embossed, printed, tinted, decorated, or lined, 15 per cent ad valorem.

Mr. SHERMAN. Mr. President, I wish respectfully to protest against the rate of duty fixed in that paragraph. The paragraph fixes an ad valorem rate of 15 per cent on paper envelopes. The paper stock out of which the envelopes are manufactured is dutiable at 25 per cent ad valorem. The envelope manufacturers in this country, who are obliged to buy paper stock with the rate fixed at 25 per cent, find themselves in a very disadvantageous position in the market. It is a discrimination, not intentionally made I am quite sure, but, nevertheless, the effect of it is of a highly dicriminating character. It puts the paper manufacturer on the market with a 25 per cent duty on the stock, while it puts his product on the market with only a 15 per cent rate of protection. It is in the same category as a number of other productions. Taking a larger subject to illustrate the same thing, wheat for a time was proposed to be made dutiable at 10 cents a bushel under the House bill rate, while flour was free listed. The manufacturer of paper envelopes in this country finds himself in precisely the same condition when paragraph 335 is read alongside of paragraph 332, which contains in it the paper stock which the manufacturer is obliged to buy on the market for the manufacture of the article. It puts him in a very disadvantageous position in the manufacture

and will result in some injury to the industry.

Before resuming my seat I wish to give notice that on tomorrow at the conclusion of the address of the senior Senator from Kentucky [Mr. Bradley] I shall address the Senate on

House bill 3321. Mr. JOHNSON. Mr. President, I wish simply to make a suggestion, in answer to what the Senator from Illinois has said, that there is in the present law the same difference between envelopes and writing paper. The paper out of which envelopes are made is now dutiable at 40 per cent and the envelopes at 20 per cent. There has always been this difference, and we have simply followed the same precedent.

Mr. SHERMAN. What paragraph is paper stock now in? Is it in paragraph 332?

Mr. HUGHES. It is in paragraph 415, the basket clause of the present law and the basket clause of the proposed law.

Mr. JOHNSON. Writing paper, I will say to the Senator, is under paragraph 334.

Mr. HUGHES. The stock out of which envelopes are made is paper not otherwise specially provided for.

Mr. SHERMAN. I should be very much obliged if the committee would adjust the discrimination in some way.

Mr. HUGHES. I will say to the Senator that the same apparent discrimination exists in the present law, yet it seems that, in spite of the fact that there is a much higher rate on paper out of which envelopes are made than on the envelopes themselves, there have been practically no importations. It seems to be one of those curious items that we run across occasionally in the bill where the ordinary rule does not seem to apply. I presume it is on an ad valorem basis, because the manufactured envelope being much more valuable than the paper stock, the duty is relatively higher; at any rate, the fact is that envelopes are not imported to any extent, under the present law, although the discrimination therein is greater than the one proposed in this bill.

Mr. SHERMAN. Under the present law is there both a specific and an ad valorem duty?

Mr. HUGHES. No; it is merely an ad valorem duty. There is in the existing law an ad valorem rate of 20 per cent upon plain envelopes.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 336, page 104, line 9, after the word "paper," to strike out "and wrapping paper not specially provided for in this section," so as to make the paragraph read:

336. Jacquard designs on ruled paper, or cut on Jacquard cards, and parts of such designs, cardboard and bristol board, press boards or press paper, paper hangings with paper back or composed wholly or in chief value of paper, 25 per cent ad valorem.

The amendment was agreed to.

The Secretary proceeded to read paragraph 337.
Mr. STERLING. Mr. President, it seems to me that paragraph 337 ought to go over and be considered in connection with paragraph 434 on the free list, which refers to books and pamphlets printed in languages other than English. I ask that paragraph 337 go over.

Mr. GALLINGER. To what paragraph in the free list does

the Senator refer?

Mr. STERLING. I have asked that paragraph 337 go over, to be considered in connection with paragraph 434 of the free list.

Mr. JOHNSON. I did not hear the Senator, but I understand

that he refers to books printed chiefly in other languages than

the English language, does he not?

Mr. STERLING. Yes, sir.

Mr. JOHNSON. The classification is different here—

Mr. STERLING. The first clause of paragraph 337 refers to all books not specially provided for, and provides an ad valorem duty of 15 per cent; but it would seem, from a reading of the remainder of the paragraph and a reading of paragraph 424 that books and namphlets printed chiefly in languages. 434, that books and pamphlets printed chiefly in languages other than English are the only other books not specially provided for.

Mr. LODGE. Those are stricken from the free list, and that throws them under this paragraph at 15 per cent. I think the two paragraphs should be considered together, as the Senator

Mr. STERLING. Yes; that is what I have asked.
Mr. HUGHES. I suggest to the Senator that the paragraph
may be considered now, as the question can be taken up in connection with the consideration of paragraph 434 of the free list.

The VICE PRESIDENT. Does the Senator from New Jersey

wish the paragraph to be acted on now?

Mr. JOHNSON. We should like to have it read by the Secretary and acted upon.

The VICE PRESIDENT. The Senator from North Dakota

has asked that the paragraph go over.

Mr. STERLING. I will say that the first clause in paragraph 337 is the important clause and has relation to paragraph 434. The first clause in paragraph 337 imposes a duty of 15 per cent ad valorem on books of all kinds, bound and unbound, not specially provided for. Mr. HUGHES. Wil

Will the Senator permit an interruption?

Mr. STERLING. Yes, sir. Mr. HUGHES. The Senator, I presume, desires to make a change with reference to certain books that have been stricken from the free list?

Mr. STERLING. Yes. Mr. HUGHES. The fact that the Senate agrees to this paragraph will have no effect upon that. It is the free-list paragraph in which the Senator is interested, so that we can agree to this without affecting that in any way. Of course, if anything is done in connection with the paragraph on the free list which would make it necessary to return to this paragraph, that can be done later.

Mr. STERLING. If that is certain, I have no objection to the consideration of this paragraph, but I think books not otherwise specially provided for in the first clause of paragraph 337—Mr. HUGHES. If we put them upon the free list, they are

specially provided for.

specially provided for.

Mr. NELSON. If the Senate amendment to paragraph 434 is disagreed to, that would settle the matter and would leave the provision as the House bill had it.

Mr. HUGHES. The Senator is correct about that.

Mr. NELSON. On Saturday I asked that paragraph 434 go over with a view to having it further considered by the committee, so as to see if the House provision could not be restored.

Mr. HUGHES. The action we are attempting to take now is in perfect accord with that understanding.

The VICE PRESIDENT. The Chair understands that para-

The VICE PRESIDENT. The Chair understands that paragraph 337 will be considered. The Secretary will state the amendments to the paragraph.

The Secretary. In paragraph 337, page 104, line 12, after the word "unbound," it is proposed by the committee to strike out "including," and insert "not specially provided for, 15 per cent ad valorem"; in line 16, after the word "foregoing," to insert "wholly or in chief value of paper"; in line 20, after the word "inch," to insert "in thickness"; in line 23, after the word "cards," to strike out "occupying 35 square inches or less of surface per view"; and in line 25, after the word "form," to strike out "45 per cent ad valorem," and insert "25 cents per pound." so as to make the paragraph read: pound," so as to make the paragraph read:

pound," so as to make the paragraph read:

337. Books of all kinds, bound or unbound, not specially provided for, 15 per cent ad valorem: blank books, slate books and pamphlets, engravings, photographs, etchings, maps, charts, music in books or sheets, and printed matter, all the foregoing, wholly or in chief value of paper, and not specially provided for in this section, 15 per cent ad valorem. Views of any landscape, scene, building, place or locality in the United States, on cardboard or paper, not thinner than eight one-thousandths of 1 inch in thickness, by whatever process printed or produced, including those wholly or in part produced by either lithographic or photogelatin process (except show cards), bound or unbound, or in any other form, 25 cents per pound; thinner than eight one-thousandths of 1 inch, \$2 per thousand.

The amendment was agreed to. Mr. GALLINGER. Mr. President, I simply rise to express gratification at the fact that the duty, as I understand, on "views of any landscape, scene, building, place, or locality in the United States" has been largely increased by the Senate committee. This is an industry that was made possible only a few years ago by a provision in the law. It has developed into a large industry, employing a great many people, and they are doing a magnificent work, I think equally as good as is done in Germany or in any other foreign country. I am delighted, if I understand the matter correctly, to observe that the duty has been kept at a point where there is no danger of the industry being harmed.

Mr. LODGE. Mr. President, I desire to say that the duty on books has hitherto been confined to books in the English language less than 20 years old, and the duty for many, many years has been 25 per cent. A large reduction has been made

in paragraph 337.

Speaking from some knowledge of the question of books, I will say that it is true that more and more of our printing is being done abroad. Our wages have risen here over 30 per cent and the working hours have decreased.

In a brief which I shall later ask to have printed, I find the

following statement:

Proprietary article manufacturers and dealers in patent medicines and many others are now having their advertising literature printed abroad and distributed in this country through the foreign mails, and publishers of periodicals and magazines who give bound books as premiums with a year's subscription are beginning to ship their electrotype plates abroad to be printed from.

The interest which has been shown by Congress in the printing trade is best witnessed by the fact that under the copyright laws no book can be copyrighted which is not made in this An English author seeking a copyright must have his country.

book printed in this country.

The profits in the printing trade have not been great, and the competition has been so severe that the employees in that business for the past two years have not averaged over 250 days' work out of 300 working days. I know how great the competition has been not only in printing our books but in binding them. The binding business, especially that of fine bindings, has been almost extinguished in this country under present legislation, and I do not think it can possibly stand very much more reduction.

This is a matter affecting particularly the printers; it has nothing to do with the publishers. They can easily have their printing done wherever it can be done the cheapest. Many

books now come over in sheets.

I wish to have printed in the RECORD two brief statements which have been made and which I have here, one from the Typothetæ of the City of New York and the other from the Allied Printing Trades Council of Greater New York, composed of working printers and constituting one of the largest and most important trade organizations in the country. I ask that the statements to which I have referred may be printed with my remarks.

The VICE PRESIDENT. In the absence of objection, permission is granted.

The matter referred to is as follows:

BRIEF OF THE TYPOTHETE OF THE CITY OF NEW YORK, AN ORGANIZATION COMPOSED OF OVER 100 PRINTING AND PRINTING SUPPLY HOUSES, REFORE THE COMMITTEE ON WAYS AND MEANS, UNITED STATES HOUSE OF REPRESENTATIVES, IN THE MATTER OF TARIFF RATE ON BOOKS AND PRINTED MATTER.

For almost 50 years the tariff rate on books and printed matter has been 25 per cent ad valorem. Since the act of 1864 to the present day it has been uniformly the same. This is a significant circumstance when it is remembered that in that time there have been many tariff acts in the preparation of which the same careful and diligent investi-

gation of the conditions of the trade have been made as is now being made by the opening committee. Bearining with 1857 wages have steadily increased (over 20 per cent) and working hours have steadily increased (over 20 per cent).

It would appear therefore that the time has come for an increase of the trailir acts to at least 35 per cent of the state of the trailing and the control of the trailing that was formerly done this country has been done abroad.

Proprietary article manufacturers and dealers in patent medicines abroad and distributed in this country through the foreign malls, and publishers of periodicals and magazines who give bound books as promiums with a year's subscription are beginning to ship their electrons.

It is profitable for the foreign prints to do this worken, because his hourse of labor are longer and the wages paid to his worken are only a little over one-third as much as paid in this country. It is profitable for the foreign prints to do this work, because his abroad, notwithstanding the present duty and the freight charges added to the foreign cost of printing. Forty years ago the making of books are broad, notwithstanding the present duty and the freight charges added to the foreign cost of printing. Forty years ago the making of books printing and binding, was done almost entirely by hand; few of the order of the control of t

ALLIED PRINTING TRADES COUNCIL OF GREATER NEW YORK, New York, June 6, 1913.

Hon. Henry Cabot Lodge, United States Senate, Washington, D. C.

United States Senate, Washington, D. C.

Dear Six: This letter is in reference to that part of the proposed tariff bill which affects the printing industry and known as "Schedule M." The paragraphs of that schedule particularly affecting photo-engraving, electrotyping, stereotyping, composition (typesetting), presswork, and bookbinding are Nos. 333 and 337, also paragraph 427 of the free list.

Paragraph 333 refers to pletures, cards, and post cards printed in whole or in part from metal, which means copper, zinc, and aluminum (metals used in the photo-engraving industry for the manufacture of these articles).

Paragraph 337 refers to books of all kinds, bound or unbound, pamphiets, engravings, photographs, etchings, etc. On page S4 of bill H. R. 10 this paragraph also refers to post cards. Under this heading every branch of the printing industry is affected. The present rate is 25 per cent ad valorem, and it is proposed to reduce this to 15 per cent.

If. R. 10 this paragraph also refers to post cards. Under this heading every branch of the printing industry is affected. The present rate is 25 per cent ad valorem, and it is proposed to reduce this to 15 per cent.

Under the present rate of 25 per cent the foreign manufacturers, a large percentage of whom are now using improved American machinery and have the advantage of longer hours and lower wages, are able, through the use of this improved American machinery, to manufacture all of the articles coming under the heading of paragraph No. 341 so much cheaper that the American publishers send their work to Europe, have same shipped back here, pay the present duty of 25 per cent, and are then able to place the article upon the market at a lower price than it is possible to produce the same article for in this country. We mention these conditions in order that you may fully realize that under the present tariff abuses are existing which, if allowed to continue, will work serious injury to the printing industry. The printing industry is the second largest in the State of New York and the sixth largest in the United States. A large percentage of our members are getting fairly good wages and desirable conditions, which have been secured only through their power of organization, and we are very sure that there is no desire on your part or that of any other member of the committee to do anything which will be detrimental to this important industry.

Paragraph 425, page 105, of H. R. 10 of the free list, permits Bibles, and I presume extracts from Bibles, and other religious tracts, to be admitted free. This we vigorously protest against, and see no reason why any exception should be made on this class of printing as it is the American wage earner's money that pays for these articles, and there is no reason why the American wage earner should not have the first opportunity of getting the benefit of the expenditure of this money if it is possible to give it to him. This the Senate can give by putting a competitive tari

that sufficient statistics are given to show that the abuses already exist. The following is a table taken from page 4941 regarding bookbinding, which was filed by one of the bookbinders in this city, a firm that had to compete more than other firms with the foreign manufacturers:

"The American extra binder is unable to compete with the foreigner, first, because his wages vary, as follows:

" ENGLAND.

"Girls, 10s, to 16s. (\$2 to \$4).
"Forwarders, 30s. (\$7,50).
"Assistant finishers, 32s. to 36s. (\$8 to \$0).
"Finishers, 36s. to 44s. (\$9 to \$11).
"UNITED STATES.

"Girls, \$8 to \$10 (increase 250 to 400 per cent).

"Forwarders, \$21 (increase 200 per cent).

per copy	24.60	6.15	4.25	40.00		40.00	60

On page 4966 is the following table, taken from an investigation made the United States Department of Commerce and Labor, and it is authentic:

Table of comparative wages of compositors and pressmen of the United States and continental Europe.

Country.	Workmen.	Weekly	wages.	Weekly hours.
UNITED STATES.		a sai		1
New York	Compositors, hand	\$25.00 to 26.00 to 26.00 to	30.00	48
ENGLAND.				
London	Compositors, hand Compositors, machine Pressmen	12.00 to	10.00 12.00 15.00	50 50
SCOTLAND.	(Comments on New 2		0. 80	
Edinburgh	Compositors, hand Compositors, machine Pressmen	9.00 to	8.50 10.00 12.00	50 50
GERMANY.				HI TO ALLY
Berlin	Compositors	9.00 to 7.00 to	10.00	54 54
Paris	Compositors, hand Compositors, machine Pressmen		8.00 12.00 10.00	60 48 60

The above table deals only with pressmen and compositors. No information is given as to the other branches of the printing industry, such as photo-engraving, electrotyping, and bindery work; but it is safe to assume the difference in the wages paid in electrotyping and photo-engraving is about the same as that paid for composition and presswork. As to the prices paid for bindery work, I believe it is in the tables given on pages 4941 and 4944.

When reading the testimony given at these hearings it is advisable to note that all of the people who appeared in favor of a reduction of the tariff on printed matter are publishers and not manufacturers, and only a small percentage of the manufacturers have appeared before your committee. Those few who have appeared have very ably presented to you the reasons why the tariff on printed matter should remain as it is, and particularly the Bible manufacturers have given good reasons why Bibles should not be placed upon the free list.

We hope that you will take all of these things into consideration and give them your closest attention. We beg to submit the following amendments to the proposed tariff bill, which amendments were submitted to the Democratic caucus, but went the way of all other amendments—received no serious consideration from that body:

"Amend, section 337, page 82, line 12, by striking out the figures '15' and inserting in lieu thereof the figures '25'; also by striking out in line 21, same section and page, the figures '12' and inserting in lieu thereof the figures '25'; also by striking out of the proposed bill all of section 427, page 105, lines 6 and 7; also by striking out of section 341, page 83, by adding after the word 'including' in line 20 a new line to read as follows: 'Bibles, comprising the books of the Old or New Testament or both'; and by striking out of the proposed bill all of section 427, page 105, lines 6 and 7; also by striking out of section 341, page 83, ine 24, the figures '15' and inserting in lieu thereof the figures '25'; also by

in the United States and the small amount imported; and they were of the opinion that a little more competition should be introduced. On analyzing those conclusions, we find that there is no reasonable excuse for including the money invested in newspapers, the money invested in magazines, and that money which is invested in what may be termed purely commercial printing—that is, printing which would have to be done in this country regardless of how low the tariff may be. In other words, they based their conclusions on the amount of money invested in the printing industry as a whole, when they should have only arrived at their conclusions according to that part of the industry in which there is competition with foreign countries. If they had done this, we feel very well satisfied that there would not be any serious complaint on our part, for the very good reason that they would not have recommended the present reduction.

Now, there are no monopolies or trusts in the printing trades. It has been impossible to organize one up to the present time, and owing to the small margin of profit upon which printers do their business the industry is not very attractive to people who would like to organize a trust or monopoly. We are of the opinion, from our experiences with the printing trades and our knowledge of other industries, that printers do a larger business on a narrower margin of profit than any other industry in the country. They are now reduced to the minimum, and if the tariff bars are going to be let down and they are thrown into competition with the cheap labor of foreign countries, it is going to result in a very serious injury to our business. It will mean that a large number of our people will be thrown out of employment, that we will not be able to keep up either the high wages or decent working conditions which have been secured through our power of organization.

We sincerely trust that your committee will give this matter their deepest consideration and investigation, and we are sure that after you have

matter.
Placing this office at your disposal for any information or assistance we can render, I remain, Yours, very truly, PETER J. BRADY, Secretary.

Mr. GALLINGER. Mr. President, I wish to give notice that when the bill is being considered in the Senate I shall ask for a yea-and-nay vote on the first amendment in paragraph 337, reducing the duty on books to 15 per cent.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 105, to strike out all of paragraph 340, in the following words:

340. All papers and manufactures of paper, or of which paper is the component material of chief value, not specially provided for in this section, 25 per cent ad valorem.

And to insert in lieu thereof:

340. Papers or cardboard, cut, die cut, or stamped into designs or shapes, such as initials, monograms, lace, borders, or other forms, and all post cards, not including American views, plain, decorated, embossed, or printed, except by lithographic process, and all papers and manufactures of paper or of which paper is the component material of chief value, not specially provided for in this section, 25 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary proceeded to read paragraph 341, on page 105, under the heading Schedule N—sundries."
Mr. HUGHES. I ask to have that paragraph passed over.
The VICE PRESIDENT. It will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 106, to strike out paragraph 342, in the following words:

342. Braids, featherstitch braids, fringes, gimps, gorings, all the foregoing of whatever material composed, and articles made wholly or in chief value of any of the foregoing not specially provided for in this section, 50 per cent ad valorem.

And to insert in lieu thereof the following:

342. Ramie hat braids, 40 per cent ad valorem; manufactures of ramie hat braids, 50 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 343, page 106, line 10, after the word "bark," to strike out "ramie," and in the same paragraph, line 16, after the word "bark," to strike out "ramie," so as to make the paragraph read:

"railile," so as to make the paragraph read:

343. Braids, plaits, laces, and willow sheets or squares, composed wholly or in chief value of straw, chip, grass, palm leaf, willow, osier, rattan, real horsehair, cuba bark, or manila hemp, suitable for making or ornamenting hats, bonnets, or hoods, not bleached, dyed, colored, or stained, 15 per cent ad valorem; if bleached, dyed, colored, or stained, 20 per cent ad valorem; hats, bonnets, and hoods, composed wholly or in chief value of straw, chip, grass, palm leaf, willow, osier, rattan, cuba bark, or manila hemp, whether wholly or partly manufactured, but not blocked or trimmed, 25 per cent ad valorem; if blocked or trimmed, and in chief value of such materials, 40 per cent ad valorem. But the terms "grass" and "straw" shall be understood to mean these substances in their natural form and structure, and not the separated fiber thereof.

The amendment was agreed to.

Mr. LODGE. Mr. President, I wish to call attention to the fact that in this paragraph the duty has been left the same on braids, which are the raw material of the industry and which are largely imported, while the duty on the finished product has been severely reduced. I have called attention to several such incidents in the bill, where a double burden is put upon the American manufacturer, and he is not only exposed to the loss of the tariff on his product, but his foreign competitor is given the benefit of a high rate on the raw material. It seems

to me the raw material and the others ought both to have been reduced, or neither.

As showing the competition which we are obliged to meet, I desire to submit an extract from a consular report as to the manufacture of hats in China, which I think ought to be con-I shall not ask sidered by the committee in this connection.

to have it read.

The VICE PRESIDENT. Without objection, the matter referred to will be printed in the RECORD.

The matter referred to is as follows: TSINGTAU, CHINA, March 24, 1913.

Transmitting report on the manufacture of straw hats. I have the honor to inclose herewith a report on the manufacture of straw hats in this district. This report is submitted in response to a request for information on the subject by Mr. Charles H. Guye, of 568-578 Broadway, New York, N. Y., and I have the honor to request that a copy be transmitted to him.

I have the honor to be, sir,
Your obedient servant,

JNO. A. Bristow,

JNO. A. BRISTOW, American Vice Consul in Charge.

MANUFACTURE OF STRAW HATS IN TSINGTAU DISTRICT.

American Vice Consul in Charge.

Manufacture of straw hats for sale to Chinese and to foreigners has been made the subject of investigation by the straw-braid exporters of Tsingtau for several years. The possibilities for the success of such an enterprise were enormously increased by queue cutting among the Chinese, which seemed popular among them during and following the revolution in 1911-12. It is evident now to a traveler in North China that this radical change of custom has reached only a very small percentage of the population.

While there is a market among foreigners and those Chinese who have come in contact with foreigners in the treaty ports, it is assumed that in establishing a factory for the manufacture of straw hats greater dependence would be placed on the sale of a very cheap hat. Some protection for the head is necessary to the majority of the population, whose work keeps them outside under a powerful sun for long hours. Should queue cutting become prevalent the market is there.

First among the Tsingtau exporters to show his faith in the possibilities of the trade, was an English straw-braid exporter. He had an unfortunate business experience while seeking capital from the Chinese, and was finally obliged to start on a very small scale. As indicated above, greater attention was given to the manufacture of a large, soft hat, costing about 8 cents to make, and retailing at 20 or 25 cents. Better grades, retailing at 40 cents and \$1, also find sale.

Eight cheap Japanese machines are used in this factory, costing about \$12 gold each. The braid used is that rejected by the English exporter, so the factory enjoys an advantage over the small Chinese manufacturer who uses perhaps only enough braid for one machine.

The establishing of a separate agency for the Province of Shantung by the Singer Sewing Machine Co., with headquarters in Tsingtau, has brought to the field a foreigner, who, by reason of his interest in the sale to a mission school in the interior, where straw-braid and straw-hat making

JNO. A. BRISTOW, Vice Consul in Charge.

TSINGTAU, CHINA, March 24, 1913.

The reading of the bill was resumed, and the Secretary read paragraph 344, page 106, as follows:

344. Brooms, made of broom corn, straw, wooden fiber, or twigs, 15 per cent ad valorem; brushes and feather dusters of all kinds, and hair pencils in quills or otherwise, 35 per cent ad valorem.

Mr. WEEKS. I should like to ask the Senator in charge of this schedule what reason was advanced for reducing the duty on brushes. There seems to be keen competition in that industry in this country and in foreign countries as well. In a speech made here not long ago I called the attention of the Senate to the fact that English and Japanese made brushes are used in the cloakrooms of the Senate; and I notice, from the statistics of importations, that there seems to be very keen

competition, not only in this country, but with foreign countries.

Mr. HUGHES. I wish to say to the Senator that the investigation we made led us to the conclusion that this was a fair competitive rate. I think, perhaps, brushes could have stood more of a reduction, but there is considerable revenue involved. The fact that imported brushes appear in our cloakrooms does not mean anything in particular. You will find our brushes in the very countries from which these brushes are imported,

Mr. WEEKS. Not to the same extent, however, because we import more than three times as many brushes as we export.

Mr. HUGHES. Our exports are quite considerable, as the

Senator will see.

Mr. WEEKS. Yes: I notice that they are about one-third of the imports.

Mr. HUGHES. Those interested in the manufacture of brushes came before the committee and made their arguments, and the opinion of the committee was that this was a fair rate. I am not prepared to say that we would not have lowered the rate further had we not considered this a legitimate object for raising revenue. We found brushes were being exported to quite a considerable extent.

Mr. WEEKS. I think the Senator will find that the importations are made entirely to nonmanufacturing countries con-

tiguous to us, and not to manufacturing countries.

Mr. BRISTOW. I simply desire to call the attention of the committee to the duty on brooms and brushes. from Massachusetts complains of the reduction on brushes from 40 per cent to 35 per cent. Broom corn has been placed on the free list, and in the case of manufactures of broom corn the duty has been reduced from 40 per cent to 15 per cent. Broom corn goes directly from the producer of broom corn, the farmer, to the manufacturer.

This is simply another indication that wherever the farmer has a direct or indirect interest in a product the lowest possible

duty is placed on it or it is put on the free list.

The manufacturers of bristle brushes complain of a duty of 35 per cent; but the agricultural classes in our part of the country are not treated with anything like the consideration that the manufacturers of the finer articles of commerce are.

Mr. LODGE. I will say to the Senator, in that connection, that the makers of brooms feel this just as severely as the farmers. Of course they are the farmers' customers.

Mr. BRISTOW. Certainly.

Mr. LODGE. They will be, they think, put out of business.

As to bristles, I think some of those come from the farms.

As to bristles, I think some of those come from the farms.

Mr. BRISTOW. But the farmer has very little interest in the bristles. Those are a by-product of the packer. The farmer does have a very great interest in the growing of broom corn, however.

Mr. NELSON. If the Senator will yield to me, as a farmer will say that when we butcher hogs we never save the bristles.

Mr. LODGE. I will not enter upon a discussion of the matter, as I know it is useless to attempt to change the duty; but I should like to ask that some letters from constituents of mine. who are deeply interested in this matter, may be printed at this point.

The VICE PRESIDENT. In the absence of objection, that order will be made.

The matter referred to is as follows:

BOSTON, MASS., May 26, 1913.

Hon. Henry Carot Lodge,
Senator from Massachusetts, Washington, D. C.

Dear Sir: In the tariff bill now before the Senate of the United States, the Underwood bill, H. R. No. 10, it is proposed to reduce the duty on house brooms from the present duty of 40 per cent ad valorem to 15 per cent.

Owing to the very large number of small factories throughout the country engaged in manufacturing brooms such keen competition is produced that the margin of profit to the manufacturer is now very small, so that any increased importation of foreign brooms will work a real hardship on those now engaged in broom manufacturing in the United States. Already brooms are being imported from Japan in considerable quantities, and with the proposed reduction of the duty Japan will be able to flood the country with her cheap-made goods to the detriment of those in this country who are paying American wages for their labor.

their labor. We earne their labor.

We earnestly request that you use your best efforts against any reduction in the present tariff on brooms in the interest of your constituents engaged in this business in the State of Massachusetts.

Very respectfully,

LEE BROOM & DUSTER CO.

FLORENCE MANUFACTURING Co., Florence, Mass., April 30, 1913.

FLORENCE MANUFACTURING CO.,

Florence, Mass., April 30, 1913.

Senator Henry Cabot Lodge,

Washington, D. C.

Dear Senator Lodge: Perhaps it is utterly useless for us or any other manufacturers in our line to make any appeal in behalf of the tariff schedule as it affects our line of brushes. Your personal attitude, of course, we are thoroughly familiar with, and know that if the matter were of your own doing you would at least give us a courteous hearing. While the Ways and Means Committee of the House have not made a very big cut in our schedule, at the same time a cut of 5 per cent on brushes means as much as some of the terrible cuts that have been made on some of the other schedules.

While we heartily appreciate the position in which you find yourself at the present time, perhaps you will be unable to do very much for us, at the same time we feel that we should like to lay the facts before you, and ask that you be good enough to do whatever you consistently can to have the duty on brushes at least retained where it is at the present time, namely, 40 per cent ad valorem. What we really ought to have is 50 per cent, which would not be in any sense prohibitive and not at all protective.

I do not want to burden you with all the details, as I know you have plenty to do as it is, and are already in possession of more briefs than you can possibly read, so I just merely wish to call the matter to your attention in this way, and would appreciate anything that you can do for not only us but the brush manufacturers as a whole.

The writer will probably have to be in Washington some time during the middle of the month, when the tariff bill is reported to the Senate, in the capacity of a member of a committee selected by the brush manufacturers of the United States, to do everything in our power to have the schedule put back to 40 per cent, or, if possible, advanced to 50 per cent. The latter I think will probably be out of the question under the existing conditions.

With kindest regards, I am,
Cordially, yours,

WM. CORDES.

FLORENCE, MASS., January 20, 1913.

Hon. OSCAR W. UNDERWOOD, M. C., Chairman Ways and Means Committee, Washington, D. C. BRUSHES-SCHEBULE N, PARAGRAPH 410.

Statement by Florence Manufacturing Co., Florence, Mass.

The present duty on brushes is ad valorem 40 per cent. We petition that brushes be made subject to 50 per cent ad valorem

We petition that brushes be made subject to 50 per cent ad valorem duty.

The principal raw material used in the manufacture of brushes is hogs' bristles, which are subject to 7½ cents per pound. This is the condition in which nearly all bristles are imported.

The duty on bristles is nearly 3 per cent of the value of brushes in which they are used.

Bristles in crude state are imported free of duty, but we know of none of any consequence being imported in this shape, as quality and value can not be intelligently judged, and cost of preparing is so much greater in the United States than in foreign countries, owing to the great difference in the cost of labor.

The census of the United States for 1909 gives the sale value of brushes manufactured in the United States for that year as \$14,694,000. There are about 400 brush manufacturing establishments with an average profit of each less than \$5,000.

Importation of brushes and bristles from 1909 to 1912 were as follows:

Year ending June—	Brushes.	Bristles.
1909	\$1,430,321 1,732,290 2,241,966 2,067,149	\$2,583,482 3,111,872 2,970,481 3,032,231

There has been an increase, according to this statement, in importa-tion of bristies, comparing 1909 with 1912, of 20 per cent. Brushes imported for the corresponding period have increased 44 per cent. You will please notice that the increase in the importation of brushes as com-pared with bristles imported was even of more injury to the brush manufacturers in the United States in the comparison of 1909 with 1911.

It is fair to estimate that one-third of the better kind of brushes used in the United States are of foreign make, and of the variety of brushes imported there are not made in the United States in value more than \$5,000,000.

Of tollet brushes, such as hair, tooth, cloth, etc., one-half of those used in the United States are foreign made. This statement can be easily verified by examination of the brushes effered for sale by retailers of brushes in department stores, drug stores, etc., anywhere in the United States.

Our customhouse records for seven years state importation of brushes.

Our customhouse records for seven years state importation of brushes as follows:

Leading countries.	1905	1906	1907	1908	1909	1910	1911
	\$1,440 654,750 187,428 294,991	199,946	240, 422	\$9,065 747,225 242,661 473,680	\$6,593 598,235 191,741 401,274	677,091 281,471	\$12,967 801,847 416,900 736,781
United Kingdom: England	156,176	171,236	194, 251	194,411	221,571 142 2	239, 267 270	256, 667 85 58

Total imports of brushes from all countries.	
1905	\$1, 306, 446
1906	1, 357, 114
1907	1, 586, 556
1908	1, 681, 640
1909	1, 430, 321
1010	1, 732, 200
1911	2, 241, 066
1010	2, 067, 149

For many years we have been manufacturing toilet brushes, and for a number of years we have tried to make some popular priced tooth-brushes, but find with our labor costs we are unable to compete with the European and Asiatic manufacturers, where most of this class of merchandise is made, because they are able to bring these goods into the United States for even less money than our actual bare manufacturing costs. Consequently we employ less labor than we would it brushes were protected; certainly the brush industry has never been protected under a protective tariff. A few facts bearing on the Japanese labor conditions furnish positive evidence that an equitable tariff for revenue duty should be on a higher ad valorem basis.

In Japan children are more or less employed at about 1 cent per hour (we employ no children). Women in the United States earn from 10 cents to 20 cents per hour; in Japan women earn from 1½ to 25 cents per hour. Male labor in the United States is paid from 15 to 35 cents per hour; in Japan male labor is paid 5 cents per hour. Workers in Japan work from 7 a. m. to 6 p. m. 7 days a week, generally 312 days a year—one large factory works 230 days in a year.

When modern brush machinery is introduced in Japan, such as is in general use in Europe, especially in Germany and Austria, coupled with the Japanese low-priced labor, the brush industry in the United States would be practically ruined.

As a further proof of labor costs in Japan, a few years ago an importer of Japanese products sent us some toothbrush handles made of bone ready to have the bristles drawn in. The price he quoted, duty paid to New York, in comparison with similar handles made in our own factory, showed an advantage in favor of the Japanese maker of 25 per cent, in spite of the very fact that most of the bone used in the manufacture of toothbrush handles is bought in the United States and shipped to Japan. While it is improbable that handles for toothbrushes will be made in Japan and sent to this country (United States, we simply give these facts to show that labor costs in the brush industry, especially tooth and toflet brushes, are lower in Japan than anywhere in the world, and in view of the rapidly increasing importations of brushes from Japan, our industry is not sufficiently protected, Although the United States Government does not permit Japanese labor to enter, it seems inconsistent that it does permit one of Japan's products in the form of brushes to come in in increasingly large quantities.

quantities.

In Austria and Germany many of the operations in the making of brushes are performed by women where we are obliged to employ men, consequently creating a much wider difference in labor costs than is apparent in an actual comparison of wages paid. In Japan this condition is much worse, as women are paid a great deal less than in Germany and Austria. In Belgium and Germany women dress bristles and de classes of work which are not and can not be performed by women under United States conditions.

The foregoing statistics from the United States customs department records show conclusively that with this continual increase in importation of brushes, surely an ad valorem duty of 40 per cent is not fair to the brush industry. With a duty of 50 per cent ad valorem this importation would become smaller, and we could probably in a short time give employment to more people making brushes here. The United States census for 1909 gives the following details regarding brush manufacturing on percentage basis:

a br chime Current Sinces.	
COSTS.	Per cent.
Materials	48%
Wages	201 91 71
Expenses 1	94
Salaries	74
Total cost	864
Per cent profit	13.4
Tor ten promise	1010
Total cost and profit	100
For Massachusetts.	
COSTS.	Per cent
Materials	
Wages	221
Expenses 1	12
Salaries	71
	-
Per cent prefit	89
fer cent pront	11
Total cost and profit	100

The items of expenses do not include interest on capital, depreciation of plants, or losses from bad accounts.

tion of plants, or losses from bad accounts.

The item of wages you will observe in Massachusetts is 22½ per cent among all brush manufacturers in this Commonwealth. In our own factory—Florence Manufacturing Co., one of the largest in the United States—this one item of wages alone on toothbrushes is between 30 and 20 per cent.

No very large profit is shown by these statistics to the brush industry of the United States. Furthermore, these profits would in all probability be somewhat decreased by omissions on the part of individuals who omitted to include their own salaries.

Of the various items that enter into the cost of making brushes, materials are in every country where brushes are manufactured of the same value, so that labor in the United States would be the only item which could be reduced and that should not be on any lower basis than it is now.

Not only does labor cost less in foreign countries, but such items as

which could be reduced and that should not be on any lower basis than it is now.

Not only does labor cost less in foreign countries, but such items as rent, incidental expenses, and interest are less than in the United States. To further show why the importation of brushes from Japan and Europe are increasing so rapidly, we ask you to kindly examine the table of statistics attached regarding wages paid in foreign countries in the manufacture of brushes. Please note the difference in wages paid between the United States and Germany, and the marked difference between the United States and Japan. This statement will prove that the brush industry is not protected and has a hard struggle with this foreign competition. Any reduction of duty would seem unreasonable and certainly mean fewer brushes made and the number of people employed in the brush industry in the United States would be greatly reduced.

A comparison of American and foreign wages in brush manufacturing.

Austria.—Blind skilled workers earn per day 60 cents; seeing skilled workers earn per day \$1.20. Brushworkers are very largely blind, perhaps 50 per cent are blind, and much of the work is done in homes. Germany.—Average male employed, per week, \$6.66; average female employed, per week, \$3.33; skilled males earn, average, \$7.14 to \$9.76; skilled females earn, average, \$4.05 to \$5.47. In small village, all minors—males, \$2.14 to \$4.28; females, 95 cents to \$1.67.

Japan.—Males, 28 cents to 38 cents per day; females, 13 cents to 18 cents per day; children, 8 cents to 11 cents per day.

Above rates are for all departments of brush making.

Drawing hands, female, up to 22 cents per day.

Employees work in Japan from 7 a. m. to 6 p. m., seven days a week; generally 312 days a year. One large factory 330 days a year.

Our company, the Florence Manufacturing Co., have our factory here at Florence, Mass. We have a cash capital invested of \$200,000 in the manufacture of brushes. We employ over 500 persons making tollet brushes from the raw materials to the finished goods; that is, all the wood and bone work, handles, etc. Our pay roll is between \$200,000 and \$212,000 yearly. We are also using in very large quantities lumber, bone, aluminum, steel, leather, lacquers, varnishes, and many other supplies that are produced in the United States.

There are very few large brush manufacturers in the United States; most of the brushes made come from small factories. There is no brush trust or combination in the United States. Competition between American brush manufacturers is very keen and profits are not at all large. We export a verw few of our brushes, and what we export we sell at the same prices as we do to the United States market. We do not solicit export business; it comes to us in most cases direct, due to the fact that our brushes are trade-marked and have a national reputation created through advertising, and in this way we get inquires in a small way from foreign countries.

Florence Manufacturing Co.,

FLORENCE MANUFACTURING Co., WILLIAM CORDES, Treasurer and General Manager.

FLORENCE, MASS., January 20, 1913.

Hon. OSCAR W. UNDERWOOD, M. C., Chairman Ways and Means Committee, Washington, D. C.: BRISTLES-SCHEDULE N, PARAGRAPH 411.

Statement by Florence Manufacturing Co., Florence, Mass.

We are further handicapped in the manufacture of brushes by being obliged to pay 7½ cents per pound duty on bristles, which are not produced to any extent in the United States. We petition that this duty be either reduced or removed entirely. If it is required for revenue purposes, we would be willing to have it remain as it is, provided the duty on brushes is made 50 per cent ad valorem.

Respectfully submitted.

FLORENCE MANUFACTURING Co., WILLIAM CORDES, Treasurer and General Manager.

BOSTON, January 21, 1913.

Hon. Henry Cabot Lodge,

United States Senate, Washington, D. C.

Dear Sir: We inclose you a brief on the matter of importation of brushes, the duty on which now is 40 per cent, and we think should be as expressed in the brief, 50 per cent.

We hope you will be able to interest yourself in our behalf, and do what you can for us.

Thanking you in advance, we remain,
Yours, respectfully,

A. & E. Burton Co.,
F. H. Carter, Treasurer.

A. & E. BURTON Co., F. H. CARTER, Treasurer.

Hon. OSCAR W. UNDERWOOD, Chairman Ways and Means Committee, Washington, D. C.

DEAR SIR: The undersigned individual brush manufacturers of the United States respectfully request your honorable committee on consider the following facts regarding tariff as it affects the brush industry. We are not bound together by any trade agreements or combinations of any kind whatsoever, and no likelihood of any ever being brought

BRUSHES.

Schedule N, paragraph 410. The present duty on brushes is 40 per cent ad valorem.

We petition that brushes be made subject to 50 per cent ad valorem, for the following reasons.

We petition that brushes be made subject to 50 per cent ad valorem, for the following reasons.

Brush manufacturing in the United States is an industry which suffers abnormally from competition by foreign brush manufacturers.

It is an unfortunate fact that fully one-fourth, or perhaps more, in market value of all the brushes consumed in the United States are of foreign manufacture.

With a tariff for revenue duty approaching the difference in the cost of labor and other items of the cost of production, all brushes consumed in the United States could be made here. The brush industry has never been protected under a protective tariff.

Of the kinds of brushes in which labor is the principal Item of cost, more than one-half used here is manufactured abroad.

Tooth and nail brushes are nearly all foreign made, as a visit to any drug or department store will verify.

Hair and other toilet brushes are considerably more than one-half foreign made.

An abstract from United States Consular Powerts in

foreign made.

An abstract from United States Consular Reports in regard to brush making in Japan and Austria shows clearly the very low prices for labor in this industry. The United States Department of State has received reports of American consuls at Nuremberg, Germany, and London, England, giving information as to rates of wages in those countries in the manufacturing of brushes. The following is from the report of the American consul at Nuremberg:

"The manufacture of brushes is a very considerable industry in in Nuremberg and vicinity. This branch of industry here gives employment to about 3,000 men, women, and children: 2,300 of whom are employed in the factories in Nuremberg and 700 in the smaller factories in near-by villages. In the city about two-thirds of all em-

ployees are females and 12 to 15 per cent are minors; in the villages the percentage of minors is somewhat higher. The annual production is of the value of about \$3.335,000, of which total only about \$250,000 is from the factories outside Nuremberg.

"In Nuremberg there are 20 brush factories. One large concern—the largest in Germany—which employs about 1,100; three others employ from 100 to 200 each; the others are all very small concerns, sometimes with only half a dozen employees and from that number up to 75 or 80. One factory in the town of Dinkelsbuhl has about 100 employees and smaller concerns in the villages of Markt, Beehofen, Wilhermsdorf, Burk, and Schopfloch gives employment to about 600 persons. The so-called factories in these villages depend to a very considerable extent on "house industry"—that is, the work is done in the homes and the whole family participates to a greater or less extent. When there is no work in the fields, father, mother, and all the children turn to brush making. Wages are much lower than in the city factories and these grades of goods are there turned out at much less cost than would be possible in the larger concerns.

"The brush industry here in Nuremberg is apparently a very prosperous one. The largest concern here has for a number of years declared a regular annual dividend of 15 per cent. The leading concern here, which has a branch factory in the United States and ships much raw material and partially finished products, is the largest concern of its kind in Germany. Only one-third of its employees are males, two-thirds being females. Of male employees 13 per cent are minors and of the female employees, 12 per cent. The average wage paid to male employees is \$3.63 per week. Skilled male workmen earn \$7.14 to \$9.76 per week, and skilled female brush makers from \$4.05 to \$5.47 per week.

"Still another brush manufacturer, whose plant is located in a small village some distance from Nuremberg, states that about one-third of its employees are minors from 95 cents to \$1.67

Fancy toothbrush handles are all fashioned by hand by men who earn from \$6 to \$7 a week at this trade. Handles that do not require great skill in the making, yet that are not the straight, ordinary kind, are made by both boys and girls who earn from \$2.50 to \$4.50 per

week.

While competition with European manufacturers—Germany, England, France, and Austria—is very severe, yet it does not compare with the terrible competition that we are experiencing with Japan. The Government prevents Japanese labor from entering the United States, but one of its products, in the form of brushes, is arriving constantly in very large quantities and increasing in volume very rapidly, the increase being 3.856 per cent since the McKinley Tariff Act became effective in 1891, as can be readily determined from the United States Treasury Department statistics covering the time stated.

Years 1891 to 1912—21 years—3,856 per cent increase.

The foregoing and a few facts bearing upon the Japanese labor conditions furnish conclusive evidence that as equitable tariff-for-revenue duty should be on a higher ad valorem basis.

In Japan children are more or less employed, at about 1 cent per hour. Women in the United States earn from 10 cents to 20 cents per hour; in Japan from 1½ cents to 2 cents per hour. Male labor in the United States is paid from 15 cents to 35 cents per hour; in Japan male labor is paid about 5 cents per hour.

Employees work in Japan from 7 a. m. to 6 p. m., 7 days a week, generally 312 days per year. One large factory, 330 days per year.

There are about 8,000 persons engaged in the brush industry in the United States, of which number only 304 are minors.

Capital invested, about \$11,000,000; value of product, about \$15,000,000; number of establishments, about 400.

SCHEDULE N-PARAGRAPH 411.

SCHEDULE N—PARAGRAPH 411.

The present duty on bristles is 7½ cents per pound specific.
In conclusion: The brush manufacturers are further handicapped to the extent of paying 7½ cents per pound for bristles, which are not produced to any extent in the United States, and while it is a hardship and adds to the cost of the manufactured product, we would be willing to concede, if necessary, for revenue purposes that the bristle schedule remain as it is, provided the duty on brushes is made 50 per cent ad valorem.

valorem. Respectfully submitted.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 107, to strike out paragraph 347, in the following words:

347. Buttons or parts of buttons and button molds or blanks, finished or unfinished, not specially provided for in this section, and all collar or cuff buttons and studs composed wholly of bone, mother-of-pearl, or ivory, 40 per cent ad valorem.

347. Buttons of vegetable ivory in sizes 36 lines and larger, 35 per cent ad valorem; below 36 lines, 50 per cent ad valorem; buttons of shell and pearl in sizes 26 lines and larger, 25 per cent ad valorem; below 26 lines, 50 per cent ad valorem; agate buttons and shoe buttons, 15 per cent ad valorem; parts of buttons and button molds or blanks, finished or unfinished, and all collar and cuff buttons, studs, composed wholly of bone, mother-of-pearl, ivory, or agate; all the foregoing and buttons not specially provided for in this section, 40 per cent ad valorem.

Mr. CUMMINS. Mr. President, I call the attention of the committee to the item of buttons made of shell or pearl below 26 lines in diameter. I should like to know whether any member of the committee has inquired with regard to the cost of making buttons of that kind in Japan?

Mr. HUGHES. I will say to the Senator that it was not necessary to inquire. We had abundant information upon that sub-

ject furnished to us without the slightest inquiry.

Mr. CUMMINS. What is the cost of making a gross of 26-line

Mr. CUMMINS. What is the cost of making a gross of 26-line fresh-water-shell buttons in Japan?

Mr. HUGHES. I will say to the Senator very frankly that I do not know. I do not think it amounts to anything. They can be made very cheaply. I understand, in addition, that in Japan these buttons are made by men with little hand machines, who stand and punch them out all day with their feet and their hands, and yet they are able, it is said, to produce buttons cheaper than they can be produced with the comparatively low-paid labor in the button factories of this country. They are made more cheaply, it is said, than the machines can produce them

I will say to the Senator that if these gentlemen can not continue the manufacture of buttons at this rate of duty, in my opinion the industry is not a legitimate one.

Mr. CUMMINS. Mr. President, I do not intend to enter

legitimate or otherwise. It is a large industry in my State. I desire, however, to record my prophecy that the substitution for the present duty of this one, however large it seems to be, will annihilate the business. I think it is impossible for the shell-button enterprises to be carried on under an ad valorem duty at all unless that ad valorem duty were so large that in itself it would be shocking. The only way in which to protect the industry is by putting a specific duty upon these low-grade buttons.

Mr. SMITH of Georgia. Does the Senator mean that the duty is to be shocking, but is to be hidden behind a specific rate?

Mr. CUMMINS. I mean that the opportunity for undervaluation is so great, and it will be so easy to bring in these cheap buttons at a valuation that no one can pursue in the way of investigation, that the protection hitherto afforded to the industry will be practically denied by this amendment.

I know that 50 per cent seems to be a very high rate of duty, and ordinarily I should agree that the duties ought not to be higher than 50 per cent. But these buttons are made and sold in Japan for 2 and 3 and 4 cents a gross. The cost of a button at that rate seems almost infinitesimal, but I believe this country will be better off if these industries are preserved. They can be preserved by very reasonable specific duties, but they can not be taken care of with this ad valorem duty. Mr. STONE. When the Senator speaks of a specific duty,

do I understand that he wishes a specific rate that will be

higher than 50 per cent?

Mr. CUMMINS. My belief is, and I have given some attention to the matter-

Mr. STONE No; but let us be absolutely frank with each other.

Mr. CUMMINS. Yes; I will be perfectly frank.

Mr. STONE. Here is a 50 per cent duty, which the Senator says is a high ad valorem duty. Is the Senator one of these progressive reformers who think we ought to have a higher rate than 50 per cent; and does he wish to disguise it under a specific rate so as to make it 75 or 80 or 100 per cent?

Mr. CUMMINS. I do not; because it is very easy to reduce specific rate upon a given importation to an equivalent ad

valorem rate. I do not wish to disguise it at all.

Mr. STONE. Then what difference does it make whether it is specific or ad valorem, if it is more than 50 per cent?

Mr. CUMMINS. My view of the tariff is that we ought to attach to an article a duty that will fairly measure the difference between the cost of production here and abroad. The Senator from Missouri knows very well what that view is. I have announced it a great many times. I have not departed

from it at any time, and I adhere to it now.

With 50 per cent ad valorem duty, coupled with the opportunity for undervaluation, we will not be able to preserve this industry. I have said that I think it ought to be preserved, and therefore I think there ought to be put upon these buttons a duty that would measure the difference between the cost of producing them here and the cost of producing them abroad. I have looked into the matter, and I think probably a duty of about one-half or, say, three-quarters of the present duty would accomplish the object.

Mr. SMOOT. Mr. President-

Mr. CUMMINS. I yield to the Senator from Utah. Mr. SMOOT. I was rather surprised at the statement which was made by the Senator from New Jersey, wherein he stated that any article which required over 50 per cent ad valorem was an illegitimate industry.

Mr. HUGHES. I did not say any industry, if the Senator please.

Mr. SMOOT. Then my hearing was very poor indeed.

Mr. HUGHES. I said in this industry.
Mr. CUMMINS. The Senator said this industry was not legitimate if it could not be protected by that duty.

Mr. SMOOT. That is, this particular article was not a legitimate industry if it could not exist with a duty of 50 per cent.

Mr. CUMMINS. I should like to know whether the friends on the other side look upon these buttons as necessities or luxu-

Mr. HUGHES. I think that is not the distinction. It seems to me that the industry was brought into existence by an abnormally high tariff. I think the people of the State of Iowa could be much better employed than by engaging in an industry which makes it necessary to saddle a tax burden upon the whole people of the United States in order to keep them economically employed in that business. We found this to be a very complex and intricate schedule. The question of grades is one of the most difficult problems that confronted me, as far as I am concerned, in the consideration of the bill. I went about it in a upon an inquiry or an argument as to whether the industry is | spirit of absolute fairness and devised this method of differentiating between the high quality of buttons and those about which the rates make little or no difference.

Mr. CUMMINS. Why is not the Senator from New Jersey willing, at any rate, to convert the 50 per cent ad valorem into

a specific duty and put it upon these buttons?

Mr. HUGHES. I will tell the Senator from Iowa why. would be necessary to establish a specific rate of duty on a line basis for each size of button practically. My investigation of the pending bill showed me that in countless instances if specific rates were adopted on articles of this character overnight a change in the method of manufacturing would be likely to take place. I can point to an instance where through the operation of a specific rate of duty intended to be 40 per cent equivalent ad valorem went up to 159 or 160 per cent equivalent ad valorem. Some one has said, and I have no doubt it is true, that if specific rates in the Wilson bill had been retained to the present day they would have been higher than the equivalent ad valorem of the Payne-Aldrich rate. I do not think a specific rate of duty should be laid upon anything that can be called a necessary of life.

Mr. CUMMINS. Mr. President, I know how futile it is to make an argument in behalf of this industry. I thought perhaps, however, that when it is remembered that the State from which the Senator who has just spoken comes has 80 per cent of her industries upon the dutiable list and the State from which I come has less than 40 per cent of her industries upon the dutiable list, he might look with some mercy upon this one enterprise. It is one of the few large manufacturing enterprises of my State, and I have a natural desire to see it prosper.

Mr. HUGHES. Will the Senator permit an interruption

right there?

Mr. CUMMINS. Very gladly.
Mr. HUGHES. There are a great many button factories, salt-water shell and vegetable and ivory button factories in my I understand we have no sweet-water-shell button factory there. I will say to the Senator that I look upon this as an exceedingly difficult question. I realized that we were confronting a condition and not a theory, and we left a rate which in judgment will permit the ivory button factories and the other factories to operate.

I will say further this is the first intimation I have had since the paragraph went into print that the rate here imposed is not

Mr. CUMMINS. I have not had any appeal from the industries since the committee appeared before the Finance Committee, but I know something about the facts. I know something about what it costs to make these buttons in my State, and I know something about what it costs to make them abroad. I know that with the opportunity for undervaluation, which is very great on an article of this sort, this duty will not adequately or sufficiently protect.

But I do not intend to offer any amendment. I desire simply to record my protest against the destruction of this business in my State, a destruction which I believe will inevitably follow

the passage of this bill.

Mr. GALLINGER. Mr. President, several attempts have been made during the discussion to define what is meant by competitive tariff. The item under consideration, it seems to me, is already competitive. We imported \$1,004,168 in value of buttons and exported \$723,784 worth. We imported between 30 and 40 per cent more than we exported. I do not know what competitive means unless that is a competitive tariff.

The same is true of several items which we passed recently. As an illustration: Of brushes we imported \$2,074,324 worth and exported \$603,143 worth. We imported three times as many as we exported. That seems to be competitive to me. The same is true of brooms and other items that have been considered.

Now, in this matter of buttons why should we reduce the duty for the purpose of making the tariff competitive when we are exporting only about two-thirds what we are importing? I wish some Senator on the other side would tell me why that is necessary to secure competition and to make the tariff competitive.

Mr. HUGHES. Of course the Senator knows we import about 5 per cent of our consumption. As far as buttons produced in Iowa are consumed, my information is that we are importing practically none. I do not think the Senator or any Senator on the other side will, on reflection, find any fault with this particular paragraph.

Mr. SIMMONS. I wish to say to the Senator from Iowa, who seems to be uneasy about the importation of buttons from

Mr. CUMMINS. No; I am not uneasy about the importation of buttons from Japan. There is practically a prohibitive duty on these buttons now.

Mr. SIMMONS. Yes.

Mr. CUMMINS. They can not be imported at all, and they are not imported.

Mr. SIMMONS. The rate is 48 per cent now, and this bill

contains a rate of 40 per cent.

Mr. CUMMINS. Of course the Senator from North Carolina has beguiled himself with these figures a long time. There are none of these buttons imported. There can not be any equivalent ad valorem duty. There are buttons of larger size, more expensive buttons, imported, and the duty on them is 48 per cent. But if you will take the low-grade buttons there are none of them imported into this country under the present duty.

Mr. SIMMONS. I understand the Senator to be making the point that the particular buttons he is speaking about bear a higher ad valorem than the average ad valorem I read a few minutes go. I desire to call the attention-and that was my only purpose in taking the floor-to the fact that last year there were only \$21,648 worth of buttons imported from Japan

of all kinds

Mr. CUMMINS. Of all kinds and none of these; and the duty now is 11 cents a line besides an ad valorem. button, which is practically a half-inch button, the duty would be 30 cents a gross, and they sell in this country of our own manufacture for a great deal less than that. Of course, there

could be none imported.

Mr. WILLIAMS. Before the Senator from Iowa sits down, I wish to ask him a question for my own information. He asked the Senator from New Jersey a question, and the Senator did not possess the information. I inferred perhaps from the fact that the Senator from Iowa asked the question that he did possess it. It is something about the labor cost of these buttons. Can the Senator from Iowa tell me the labor cost of gross of these buttons in Japan?
Mr. CUMMINS. Yes; I can.
Mr. WILLIAMS. What is it?
Mr. CUMMINS. They sell there for about 2 cents a gross.
Mr. WILLIAMS. For 2 cents a gross?

Mr. CUMMINS. They are made for 2 cents a gross, the

poorer quality.

Mr. WILLIAMS. What do they sell for here?

Mr. CUMMINS. They sell here for about 8 to 18 cents a gross.

Mr. WILLIAMS. Is the Senator giving in both cases the

wholesale price?

Mr. CUMMINS. I am simply reiterating what the men who are engaged in the manufacture have told me.

Mr. WILLIAMS. Is that the price at which the domestic producer-the man who makes the button-sells them, or the price at which some storekeeper or jobber or somebody else sells them?

Mr. CUMMINS. I think the price at which the manufacturer sells them is from 6 cents a gross to 20 cents. I am speaking now of the lower grade small buttons made from fresh-water

shells.

Mr. WILLIAMS. If the entire price of the article in Japan is only 2 cents per gross, the entire cost of its manufacture, which includes the material and the manufacturers' part of the labor cost in Japan, it can not possibly be as much as 2 cents a gross?

Mr. CUMMINS. I would think not.
Mr. WILLIAMS. It could not possibly be, if the Senator's figures are correct as to the labor cost.

Mr. CUMMINS. There is a labor cost. They are made individually, to a great extent, by a man with the machinery under his own foot or under his own hand.

Mr. WILLIAMS. Perhaps the Senator did not understand

my question. He has stated that the entire cost was 2 cents on the entire price. I suppose that includes the profit, or did he mean to say the cost or the price in Japan?

Mr. CUMMINS. In Japan the small poor grade button is manufactured for 2 cents a gross. That is what was told me. Mr. WILLIAMS. The Senator then does not mean the price;

he means the cost of manufacture.

Mr. CUMMINS. That is it.
Mr. WILLIAMS. If that cost includes the entire cost—I suppose the shell is worth something; I do not know what that is-then certainly the labor cost in Japan can not be over

2 cents per gross; it must be less than 2 cents. Mr. CUMMINS. From 2 to 10 cents, according to the grade of

the button, of course.

Mr. WILLIAMS. I find the equivalent ad valorem stated in 1910 at 55%; in 1912, 48% per cent. Now, during that time, with the protection of that equivalent ad valorem, there were only \$23,000 worth of Japanese buttons imported into this country. If it costs us 18 cents a gross to make them and it costs the Japanese only 2 cents per gross to make them, and if the equivalent ad valorem was in round numbers one 55 per

cent and another 48 per cent, which would be, say, an average of 50 per cent, which would be an addition of 1 cent to this particular class of buttons, why in the world did they not just invade our market?

Mr. CUMMINS. The reason is that none of the figures Mr. WILLIAMS. In other words, if the Senator's calculations are correct, this protection was entirely insufficient.

Mr. CUMMINS. Nothing that the Senator has stated from the record is true with regard to these buttons. These buttons have not been imported into the United States. The paragraph covers a very large range of buttons

Mr. WILLIAMS. Then it is worse than I thought, if none

of them have been imported.

Mr. CUMMINS. I should like the Senator to be accurate, The half-inch button has a duty now of more than 30 cents a gross, and they do not command that price in this country. Our own manufacturers make them and sell at much less than that. The duty is at the present time exorbitantly high. There is no defense for it whatever.

Mr. WILLIAMS. I want to ask the Senator another question. He has told the Senate what the cost of production of these buttons is in Japan. Would he mind telling us how he arrived at that result, from what basis and upon what au-

thority?

Mr. CUMMINS. But the Senator did not hear what I said; he was giving no heed to it. I said it was told me by the men who make these buttons in our country that they were

made abroad and sold at from 2 to 8 cents a gross.

Mr. WILLIAMS. Oh, well, I did misunderstand the Senator. I thought he said he was told by the people who made the buttons here that they cost 18 cents per gross here, I had no idea the Senator was relying upon a witness in Iowa who does not know anything about it.

Mr. CUMMINS. How does the Senator know the people of

Iowa know nothing about it?

Mr. WILLIAMS. I do not suppose anybody in Iowa making those buttons knows definitely and scientifically what is the cost of producing those particular buttons.

Mr. CUMMINS. They know what the people of Japan say. Mr. WILLIAMS. If the Senator had some information from

some official source, from some reliable source

Mr. CUMMINS. It is a reliable source, but not an official

Mr. WILLIAMS. Now it turns out that the Senator's information, the Senator's testimony, is hearsay, and the witness from whom the hearsay is taken is an interested witness.

Mr. CUMMINS. That is quite true.
Mr. WILLIAMS. He is the manufacturer of this competing

product in Iowa.

Mr. CUMMINS. But if the Senator from Mississippi had not permitted hearsay testimony to inform him with regard to this tariff we would not have had any tariff for a very long time to come. Nearly all the information that you have is hearsay testimony.

Mr. WILLIAMS. Ah, but the Senator-

Mr. CUMMINS. And this is just as good as any of the rest that you have. It comes from people just as reliable.

Mr. WILLIAMS. No; I think it is not. Now, I think if the Senator wants to find out the cost of production of a thing in Japan he had better go to a Japanese source to find it out.

Mr. CUMMINS. I have not had time to do that. Mr. WILLIAMS. So far as my taking hearsay evidence is concerned, I can assure the Senator I have taken precious little of it from interested witnesses.

Mr. CUMMINS. I think that is probably true. I do not think they have taken much of it from any witnesses or from any source. I think the whole bill is largely a matter of imagination.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. GALLINGER. I assume the Senator from North Carolina does not care to proceed with another schedule.

Mr. SIMMONS. No; I ask that the bill be laid aside for the

# EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 5 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 25 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, August 26, 1913, at 11 o'clock a. m.

### NOMINATIONS.

Executive nominations received by the Senate August 25, 1913. PROMOTIONS IN THE ARMY.

## MEDICAL CORPS.

Maj. Alexander N. Stark, Medical Corps, to be lieutenant colonel (subject to examination required by law) from July 13, 1913, vice Lieut. Col. Charles E. Woodruff, retired from active service July 12, 1913.

Capt. Allie W. Williams, Medical Corps, to be major from July 13, 1913, vice Maj. Alexander N. Stark, promoted.

### APPOINTMENTS IN THE NAVY.

The following-named citizens to be professors of mathematics in the Navy from the 21st day of August, 1913:

Theodore W. Johnson, a citizen of Maryland, and Carlos V. Cusachs, a citizen of Maryland.

The following-named citizens to be assistant surgeons in the Medical Reserve Corps of the Navy from the 18th day of August,

Arthur E. Younie, a citizen of Oregon; Walter C. Espach, a citizen of Oregon; and John F. X. Jones, a citizen of Pennsylvania.

## POSTMASTERS.

James C. Burns to be postmaster at Bay Minette, Ala., in I. Dinwiddie. Incumbent's commission expired August 4, 1913.

H. W. Crook to be postmaster at Bessemer, Ala., in place of John H. McEniry, removed.

Albert M. Espey to be postmaster at Albertville, Ala., in place of Thomas M. McNaron, resigned.

### ALASKA.

Elna Olson to be postmaster at Treadwell, Alaska, in place of Daniel Webster, resigned.

#### CALIFORNIA.

Isidore J. Proulx to be postmaster at Willow, Cal., in place of John J. West. Incumbent's commission expired February 20, 1913.

Eliza Stitt to be postmaster at Vacaville, Cal., in place of George F. Wooderson, deceased.

Alice E. Tate to be postmaster at Lone Pine, Cal. Office became presidential January 1, 1913.

Georgia A. Wiard to be postmaster at Chula Vista, Cal., in place of William B. Farrow, removed.

## COLORADO.

William A. White to be postmaster at Holyoke, Colo., in place of F. M. Smith, resigned.

## FLORIDA.

J. B. Potter to be postmaster at Mulberry, Fla., in place of H. K. Murphy, resigned.

George D. Rhode to be postmaster at Punta Gorda, Fla., place of H. R. Dreggors. Incumbent's commission expired May 27, 1913.

## GEORGIA.

Mary L. Carswell to be postmaster at Jeffersonville, Ga. Office became presidential July 1, 1913.

D. F. Davenport to be postmaster at Americus, Ga., in place of Frank P. Mitchell, removed.

Bolling H. Jones to be postmaster at Atlanta, Ga., in place of Hugh L. McKee, removed.

A. L. McArthur to be postmaster at Cordele, Ga., in place of Frederick G. Boatright, removed.

J. J. Baker to be postmaster at Mount Vernon, Ill., in place of G. G. Gilbert, removed.

A. A. Dobson to be postmaster at Elburn, Ill., in place of Fred W. Pattee. Incumbent's commission expired December 14, 1912.

J. C. Dorfler to be postmaster at Area (late Rockefeller), Ill.,

in place of William Knigge, to change name of office.

John H. Henson to be postmaster at Xenia, Ill., in place of Mary A. Paine. Incumbent's commission expired July 26, 1913. John H. McGrath to be postmaster at Morris, Ill., in place of Willard C. Magner. Incumbent's commission expired April 5,

John E. Rethorn to be postmaster at Chandlerville, Ill., in place of W. M. McDonald. Incumbent's commission expired January 14, 1913.

Wilbur A. Woods to be postmaster at Pawpaw, Ill., in place of Sadie A. Case. Incumbent's commission expired January 26,

#### INDIANA.

William B. Latshaw to be postmaster at Oaktown, Ind., in place of Juanita Bond, removed.

Earl Talbott to be postmaster at Linton, Ind., in place of Clinton T. Sherwood, resigned.

#### IOWA.

E. R. Ashley to be postmaster at Laporte City, Iowa, in place of George Banger. Incumbent's commission expired December 14, 1912.

Henry F. Eppers to be postmaster at Montrose, Iowa. Office became presidential October 1, 1912.

Anton Huebsch to be postmaster at McGregor, Iowa, in place of Anton Huebach, to correct name of appointee.

Ben Jensen to be postmaster at Onawa, Iowa, in place of William R. Prewitt, resigned.

### MASSACHUSETTS.

Edmund S. Higgins to be postmaster at Lynn, Mass. Revocation of order of discontinuance.

Michael T. Kane to be postmaster at Ludlow, Mass., in place of George A. Birnie. Incumbent's commission expired January

James Nagle to be postmaster at Concord Junction, Mass., in place of Benjamin Derby. Incumbent's commission expired February 1, 1913.

Martin H. Ryan to be postmaster at Northboro, Mass., in place of Asa B. Fay. Incumbent's commission expired December 14, 1912.

#### MISSISSIPPI.

R. L. Broadstreet to be postmaster at Coffeeville, Miss., in place of H. W. Durrant, removed.

#### NEVADA.

George A. Myles to be postmaster at Austin, Nev., in place of F. Littrell. Incumbent's commission expired February 7,

Harry T. Allen to be postmaster at Vincentown, N. J. Office became presidential January 1, 1913.

## NEW MEXICO.

Susano Ortiz to be postmaster at Las Vegas, N. Mex., in place of Ignacio Lopez, removed.

## NEW YORK.

John J. Costello to be postmaster at Maulius, N. Y., in place of G. W. Armstrong. Incumbent's commission expired January 29, 1913.

John J. Kesel to be postmaster at Syracuse, N. Y., in place of William Cowie. Incumbent's commission expired December 16,

Edward S. Moore to be postmaster at Norwich, N. Y., in place of J. Johnson Ray. Incumbent's commission expired December 16, 1912.

James A. Traphagen to be postmaster at Waterloo, N. Y., in place of J. B. H. Mongin, removed.

## NORTH CAROLINA.

Ernest L. Auman to be postmaster at Ashboro, N. C. Office

became presidential January 1, 1908.

O. A. Snipes to be postmaster at Rocky Mount, N. C., in place of George W. Robbins. Incumbent's commission expired May 20, 1912,

## NORTH DAKOTA.

Frank Lish to be postmaster at Dickinson, N. Dak., in place of Nelson C. Lawrence, removed.

V. F. Nelson to be postmaster at Cooperstown, N. Dak., in place of Percy R. Trubshaw, resigned.

## OHIO.

Benjamin F. Price to be postmaster at Lancaster, Ohio, in place of H. Clay Drinkle, deceased.

David M. Welty to be postmaster at Bremen, Ohio, in place of Edson B. Connor. Incumbent's commission expired May 26,

A. R. Wolfe to be postmaster at Chillicothe, Ohio, in place of G. W. C. Perry. Incumbent's commission expired December 17, 1912.

### OKLAHOMA.

George E. Baker to be postmaster at Gage, Okla., in place of Alfred M. Clark. Incumbent's commission expired December 17,

L. E. Chase to be postmaster at Westville, Okla., in place of Charles W. Waters, declined. C. N. Fluke to be postmaster at Boynton, Okla., in place of

James E. Sutton, resigned.

J. P. Ford to be postmaster at Konawa, Okla., in place of Joel E. Cunningham, removed.

M. B. Hickman to be postmaster at Coalgate, Okla., in place of W. E. Rathbun. Incumbent's commission expired May 17,

J. N. Hopkins to be postmaster at Boswell, Okla., in place of G. D. Duncan. Incumbent's commission expired August 4, 1913. Blanche Larkin to be postmaster at Delaware, Okla. Office

became presidential July 1, 1911. W. S. Livingston to be postmaster at Seminole, Okla., in place of Frank J. Van Buskirk, resigned.

#### OREGON.

J. C. Lamkin to be postmaster at Hillsboro, Oreg., in place of B. P. Cornelius. Incumbent's commission expired May 22, 1913.

### PENNSYLVANIA.

S. O. Bender to be postmaster at Trafford, Pa., in place of Roger A. McCall. Incumbent's commission expired January 14, 1913.

Daniel Clarey to be postmaster at Sayre, Pa., in place of Timothy J. Leahy. Incumbent's commission expired February

Samuel K. Henrie to be postmaster at Youngwood, Pa., in place of George R. Laird. Incumbent's commission expired July 13, 1913.

George F. Kittelberger to be postmaster at Curwensville, Pa., in place of Samuel P. Arnold. Incumbent's commission expired February 11, 1913.

Albert K. Kneule to be postmaster at Norristown, Pa., in place of Henry M. Brownback, resigned.

Harry B. Krebs to be postmaster at Mercersburg, Pa., in place of William F. McDowell, resigned.

Edward J. Loraditch to be postmaster at Sand Patch, Pa. Office became presidential October 1, 1912.

William H. McQuilken to be postmaster at Glen Campbell,

Pa., in place of Annie K. Stadden. Incumbent's commission expired July 23, 1913.

John H. Shields to be postmaster at New Alexandria, Pa., in place of James G. Cook. Incumbent's commission expired January 22, 1912.

## SOUTH DAKOTA.

J. W. Applegate to be postmaster at Edgement, S. Dak., in place of J. R. Johnston. Incumbent's commission expired August 5, 1913.

George L. Baker to be postmaster at Britton, S. Dak., in place of Herbert B. Tysell. Incumbent's commission expired August 4, 1913.

J. A. Churchill to be postmaster at Hurley, S. Dak., in place of Frank B. Williams. Incumbent's commission expired July 3,

James Gaynor to be postmaster at Springfield, S. Dak., in place of Alvah T. Bridgman, deceased.

A. D. Griffee to be postmaster at Faulkton, S. Dak., in place

of James P. Turner. Incumbent's commission expired August 4, 1913.

William Moore to be postmaster at Armour, S. Dak., in place of Ernest E. Edwards. Incumbent's commission expired May 22, 1912,

Peter Schnitt to be postmaster at Waubay, S. Dak., in place of William A. Abbott. Incumbent's commission expired August 4, 1913.

E. B. Wilbur to be postmaster at Oacoma, S. Dak., in place of John N. Fulford, removed.

Cora Lee Baker to be postmaster at Buffalo, Tex. Office became presidential January 1, 1913.

John Dunlop to be postmaster at Houston Heights, Tex.

Office became presidential January 1, 1912.

Lee D. Ford to be postmaster at Brookshire, Tex. Office be-

came presidential April 1, 1912.

T. W. House to be postmaster at Houston, Tex., in place of Seth B. Strong, deceased.

Annie Watson to be postmaster at Sugar Land, Tex., in place of W. R. Crittenden, resigned.

#### VIRGINIA.

C. Moncure Campbell to be postmaster at Amherst, Va., in place of James F. Williams. Incumbent's commission expired June 12, 1913.

H. G. Shackelford to be postmaster at Orange, Va., in place of Thomas W. Carter, resigned.

## CONFIRMATIONS.

Executive nominations confirmed by the Senate August 25, 1913. POSTMASTERS.

Artemas D. Barton, Pine Plains. John E. Hoffnagle, Westport. William A. Hosley, Belmont. Frank E. Ingalls, Brownville. Henry D. Nichols, Mexico. Mabel B. Williams, West Hampton Beach.

# SENATE.

# Tuesday, August 26, 1913.

The Senate met at 11 o'clock a. m. Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D.

# CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum. I notice that there are very few Senators here.
The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gore	Nelson	Simmons	
Bacon	Hitchcock	Norris	Smith, Ariz.	
Bankhead	Hollis	O'Gorman	Smith, Ga.	
Bradley	Hughes	Oliver	Smith, S. C.	
Brady	James	Overman	Smoot	
Bristow	Johnson	Page	Sterling	
Bryan	Jones	Penrose	Sutherland	
Catron	Kenyon	Perkins	Swanson	
Chamberlain	Kern	Pomerene	Thomas	
Chilton	La Follette	Ransdell	Thompson	
Clapp	Lane	Robinson	Tillman	
Clark, Wyo.	Lea	Root	Townsend	
Crawford	Lodge	Saulsbury	Vardaman	
Cummins	McCumber	Shafroth	Walsh 4	9
Fall	McLean	Sheppard	Williams	1
Fletcher	Martin, Va.	Sherman		
Gallinger	Martine, N. J.	Shively		
Cumper	20244 40000 211			σ

Gallinger Mr. McCUMBER. I wish to announce that my colleague [Mr.

GRONNA] is necessarily absent.

The VICE PRESIDENT. Sixty-six Senators have answered to the roll call. There is a quorum present. The Secretary will read the Journal of the proceedings of the preceding session.

## THE JOURNAL.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. Gallinger and by unant-mous consent, the further reading was dispensed with and the Journal was approved.

## ANNUAL REPORT OF THE PATENT OFFICE.

The VICE PRESIDENT laid before the Senate the annual report of the operations of the Patent Office for the fiscal year ended December 31, 1912, which was referred to the Committee on Patents and ordered to be printed. (H. Doc. No. 946, 62d Cong., 3d sess.)

## MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had agreed to a concurrent resolution providing that the two Houses of Congress assemble in the Hall of the House of Representatives on Wednesday, the 27th day of August, 1913, at 12 o'clock and 45 minutes in the afternoon, for the purpose of receiving such communication as the President of the United States shall be pleased to make them, in which it requested the concurrence of the Senate. (H. Con. Res. 16.)

## ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (S. 1353) to authorize the board of county commissioners of Okanogan County, Wash., to construct, maintain, and operate a bridge across the Okanogan River at or near the town of Malott, and it was thereupon signed by the Vice President.

# PETITIONS AND MEMORIALS.

Mr. NELSON presented a resolution adopted by the Minnesota Bankers' Association, in convention at Duluth, Minn., favoring

the adoption of a 1-cent letter postage, which was referred to the Committee on Post Offices and Post Roads.

Mr. HITCHCOCK presented a resolution adopted by the Platte Valley Transcontinental Good Roads Association, at Fremont, Nebr., favoring an appropriation for the construction of good roads throughout the country and particularly for the construction of a central transcontinental highway, which was referred to the Committee on Agriculture and Forestry.

Mr. JONES presented petitions of sundry citizens of Mount Vernon, Wash., praying for the adoption of an amendment to the Constitution to prohibit the manufacture and sale of intoxicating liquors, which were referred to the Committee on the

He also presented petitions signed by sundry citizens of Mount Vernon, Wash., praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which were ordered to lie on the table.

## REPORTS OF COMMITTEE ON MILITARY AFFAIRS.

Mr. HITCHCOCK, from the Committee on Military Affairs, to which were referred the following bills, reported them each with amendments and submitted reports thereon:

S. 2560. A bill authorizing the Secretary of War to donate to the Grand Army of the Republic, Post No. 45, of Smith Center, Kans., two cannon or fieldpieces (Rept. No. 105); and S. 2561. A bill authorizing the Secretary of War to donate to the city of Hays Kens, and cannon or fieldpiece (Part No. 102)

the city of Hays, Kans., one cannon or fieldpiece (Rept. No. 106).

Mr. HITCHCOCK, from the Committee on Military Affairs,

to which was referred the bill (S. 2816) authorizing the Secretary of War to donate to the city of Abilene, Kans., two cannon, reported it with an amendment and submitted a report (No. 107) thereon.

## HEARINGS BEFORE THE COMMITTEE ON PRIVILEGES AND ELECTIONS.

Mr. SHAFROTH, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 170, submitted by Mr. Kern on the 25th instant, reported it favorably without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on Privileges and Elections, or any subcommittee thereof, be authorized during the Sixty-third Congress to administer oaths, send for books and papers, to employ a stenographer at a price not to exceed \$1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before said committee, to cause the proceedings before said committee to be printed, if by said committee deemed expedient; that the committee or subcommittee may sit during the sessions or recess of the Senate, and that the expense thereof shall be paid out of the contingent fund of the Senate.

## WORKS OF ART IN CAPITOL BUILDING (S. DOC. NO. 169).

Mr. GALLINGER. I am directed by the Committee on Printing to report back favorably without amendment Senate resolu-tion 74, providing for the printing of a document entitled "Works of Art in the United States Capitol Building, Including Biographies of the Artists," and I ask for its present considera-

Mr. SIMMONS. Mr. President—
Mr. GALLINGER. It will take but a moment.
Mr. SIMMONS. There will be no debate, I understand.

The resolution was considered by unanimous consent and agreed to, as follows:

Resolved, That the document herewith submitted, entitled "Works of Art in the United States Capitol Building, Including Biographies of the Artists," compiled, under the direction of the Superintendent of the United States Capitol Building and Grounds, by Charles E. Fairman, be printed as a Senate document.

## AFFAIRS IN INSULAR POSSESSIONS (S. DOC. NO. 173).

Mr. FLETCHER. I am directed by the Committee on Printing to report favorably a resolution to print as a Senate document a compilation of the acts of the Sixty-second Congress, and so forth, and I ask for its present consideration.

The resolution (8. Res. 172, 8. Rept. 109) was read, considered by unanimous consent, and agreed to, as follows:

Dy unanimous consent, and agreed to, as follows:

Resolved, That a compilation of the acts of the Sixty-second Congress, treatles, proclamations, decisions of the United States Supreme Court, from June 1, 1911, to June 1, 1913; opinions of the Attorney General from March 4, 1911, to March 3, 1913; and list of officials, relating to noncontiguous territory, Cuba, and Santo Domingo, and to military affairs, prepared by the Bureau of Insular Affairs, War Department, be printed as a Senate document.

## THE MISSION OF WOMAN (S. DOC. NO. 174).

Mr. FLETCHER. I report from the Committee on Printing Mr. FLETCHER. I report from the Committee on Frinting a resolution to print the article entitled "The Mission of Woman," by Dr. Albert Taylor Bledsoe, in pursuance to its reference to the committee, and I ask for its adoption.

Mr. GALLINGER. The Senator, I think, ought to state that the paper has been changed somewhat from its original form; that is certain aliminations have been made.

that is, certain eliminations have been made.

Mr. FLETCHER. Yes; as contemplated by the Senator from South Carolina [Mr. TILLMAN] and approved by the committee. The resolution (S. Res. 171, S. Rept. 110) was read, considered by unanimous consent, and agreed to, as follows:

Resolved. That the article entitled "The Mission of Woman," by Albert Taylor Bledsoe, LL. D., which was printed in the Southern Review of October, 1871, be printed in the Congressional Record and also as a Senate document as reported by the Committee on Printing.

Mr. FLETCHER. I assume that the adoption of the resolution carries with it an order to print the article as now prepared in the Record and also as a public document.

Mr. GALLINGER. I will ask the Senator from Florida if

he has had inserted in the document the date of its authorship? Mr. FLETCHER. Yes; that has been done. That appears in the document as presented by the committee.

There being no objection, the article was ordered to be printed as a document and also to be printed in the RECORD, as follows:

#### THE MISSION OF WOMAN.

(By Albert Taylor Bledsoe, LL. D.)

(By Albert Taylor Bledsoe, LL. D.)

[This discussion by this distinguished scholar, philosopher, and writer first appeared October, 1871, in the Southern Review, of which he was the brilliant editor. It is even more pertinent at the present time than when Dr. Bledsoe first gave it to the public.]

One of the subjects which now, for the first time in the history of the world, is beginning to attract the attention which its importance demands is the mission, the education, and the influence of woman. In his History of Morals, Mr. Lecky devotes the last and best chapter of the work, consisting of more than a hundred pages, to a learned, comprehensive, and eloquent survey of "the position of woman." And among the discourses of the celebrated Adolph Monod there are several on "the mission" and on "the life" of woman. We mention these productions only because of all the innumerable discussions of the same subject they are the only ones to which we shall have occasion to refer.

NOTHING TOO ABSURD TO SUCCEED.

NOTHING TOO ABSURD TO SUCCEED.

NOTHING TOO ABSURD TO SUCCEED.

We have been accustomed to regard the woman's rights movement as too insignificant and too absurd to deserve serious attention. But in some portions of the border States, as well as in the universal North, this movement is assuming proportions and manifesting a spirit which inspire some of our most thoughtful minds with no little alarm. They are beginning to fear that, after all, this most absurd movement may gain the ascendancy in this country.

One thing is certain, namely, that nothing is too absurd to fail of success in this "the most enlightened Nation on the face of the globe." We appeal to facts. We now see recently emancipated slaves—utterly ignorant and wholly unfit for such duties—in our legislative halls, in the highest judicial offices of some of the Southern States, and on boards of trustees as the conservators and guardians of the interests of the higher education. Could anything be more absurd? Or would anything, only a few years ago, have been pronounced more utterly impossible, if anyone had been bold enough to predict such a result? In view of such fects, indeed, we are almost inclined to believe that the more absurd anything is the greater are its chances of success under the more absurd anything is the greater are its chances of success under the radical rule of the present day. * * * Women may never have the right to vote in this country; but whether they have or not, their prospects for the enjoyment of that "right" are now apparently better than were those of the blacks previous to the late war. Who knows, then, what may happen, or, in the course of time, go down with the sovereign people composed of all colors, all ages, and both sexes?

A SIMILAR MOVEMENT IN THE ROMAN EMPIRE.

# A SIMILAR MOVEMENT IN THE ROMAN EMPIRE.

A SIMILAR MOVEMENT IN THE ROMAN EMPIRE.

If, however, the movement in question should succeed, it would be nothing new under the sun. History would only repeat itself; and, in the light of past facts, we may easily predict the result. The women of Rome at one period succeeded in securing all "their rights," as they are called, and the effects of their emancipation from the laws of God and nature are recorded in the annals of the Empire.

"A complete revolution," says Mr. Lecky, "had thus passed over the constitution of the family. Instead of being constituted on the principle of autocracy it was constituted on the principle of coequal partnership—the very thing now aimed at in this country. The legal position of the life had become one of complete independence, while her social position was one of great dignity." How glorious! But, adds the historian, "The more conservative spirits were naturally alarmed at the change," And the effects of the revolution, as they now stand recorded on the page of history, justify their alarm.

## THE FRIGHTFUL RESULTS THAT FOLLOWED.

"Another and still more important consequence," said Mr. Lecky, "resulted from the changed form of marriage." Being looked upon simply as a civil contract, entered into for the happiness of the contracting parties, its continuance depended on mutual consent. Either party might dissolve it at will, and the dissolution gave both the right to remarry. There can be no question that under this system the obligations of marriage were treated with extreme levity. We find Ciero repudiating his wife, Terentia, because he desired a new dowry; Cato ceding his wife, the thind the consent of her father, to his friend Hortensius, and resuming her after his death; Maecenas continually changing his wife; Sempronius Sophus repudiating his wife because she had once been to the public games without his knowledge; Paulus Aemilius taking the same step without assigning any reason and defending himself by saying, "My shoes are new and well made, but no one knows where they pinch me." Nor did women show less alacrity in repudiating their husbands. Seneca denounced this evil with especial vehemence, declaring that divorce in Rome no longer brought with it any shame, and that there were women who reckoned their years rather by their husbands than by the consuls. Christians and Pagans echoed the same complaint. According to Tertullian, "divorce is the fruit of marriage." Martial speaks of a woman who had already arrived at her tenth husband; Juvenal of a woman who had already arrived at her tenth husband; Juvenal of a woman who had eight husbands in five years. But the most extraordinary recorded instance of this kind is related by St. Jerome, who assures us that there existed at Rome a wife who was married to her twenty-third husband, she herself being his twenty-first wife.

INCREASING CELIBACY AND A DECREASING BIRTH RATE. Cleero repudiating his wife, Terentia, because he desired a new dowry; Cato ceding his wife, with the consent of her father, to his friend Horizon tensius, and resuming her after his death; Maecenas continually changing his wife; Sempronius Sophus repudiating his wife because she had once been to the public games without his knowledge; Paulus Aemilius taking the same step without his knowledge; Paulus Aemilius taking the same step without assigning any reason and defending himself by saying, "My shoes are new and well made, but no one knows where they pinch me." Nor did women show less alacrity in repudiating their husbands. Seneca denounced this evil with especial vehemence, declaring that divorce in Rome no longer brought with it any shame, and that there were women who reckoned their years rather by their husbands than by the consuls. Christians and Pagans echoed the same complaint. According to Tertullian, "divorce is the fruit of marriage." Martial speaks of a woman who had already arrived at her tenth husband; Juvenal of a woman who had eight husbands in the renth husband; Juvenal of a woman who had eight husbands in its related by St. Jerome, who assures us that there existed at Rome a wife who was married to her twenty-third husband, she herself being his twenty-first wife.

INCREASING CELIBACY AND A DECREASING BIETH RATE.

The evil did not stop here. The family being constituted not on the principle of autocracy, but on that of a coequal partnership, it if anyone ask, then, whether Venus is equal or superior or inferior to the principle of autocracy, but on that of a coequal partnership, it if anyone ask, then, whether Venus is equal or superior or inferior to the principle of autocracy, but on that of a coequal partnership, it if anyone ask, then, whether Venus is equal or superior or inferior to the principle of autocracy, but on that of a coequal partnership, it is any principle of autocracy.

became instead of a well-organized social unit a two-headed, self-fighting monster. Hence, in the language of Prof. Seeley, "precisely as we think of marriage, the Roman of imperial times thought of cellbacy; that is, as the most comfortable but the most expensive condition of life. Marriage with us is a relation for which a man must pay; with the Romans it was an excellent pecuniary investment, but an intolerably disagreeable one." The marriage relation, in one word, having degenerated into a civil contract for convenience merely, it became so "intolerably disagreeable" that men shunned it as they would have shunned the plague. And to this cause it is that Prof. Seeley ascribes the decline, the fail, and the ruin of imperial Rome. "Whatever the remote and ultimate cause may have been," says he, "the immediate cause to which the fail of the Empire can be traced is a physical, not a moral decay.

"In valor, discipline, and science the Roman armies remained what they had always been, and the peasant Emperors of Illyricum were worthy successors of Cineinnatus and Caius Marius. But the problem was how to replenish the armies. Men were wanted; the Empire perished for want of men." "A stationary population," he continues, "suffers from war or any other destructive plague far more and more permanently than a progressive one." Accordingly we are told "that Julius Caesar, when he attained the supreme power, found an alarming thinness of population. Both he and his successors struggled carnestly against this evil. The grand maxim of Metellus Macedonicus, that marriage is a duty which, however painful, every citizen ought manfully to discharge, acquired great importance in the eyes of Augustus. He caused the speech in which it was contained to be read in the senate. Had he lived in our days, he would have reprinted it with a preface. To admonition he added legislation. The Lex Julia is Irretragable proof of the existence at the beginning at the imperial time of that very disease which four centuries after destroyed the Em

# WHY THE ROMAN EMPIRE FELL.

than our own brief enjoyment."

WHY THE ROMAN EMPIRE FELL.

"In the midst of this torrent of corruption a great change was passing over the legal position of Roman women. They had not at first been in a condition of absolute subjection or subordination to their relations. They arrived during the Empire at a point of freedom and dignity which they subsequently lost and have never altogether regained." So true is it that the right constitution of the family, or the marriage relation, lies at the very root of national greatness, power, and glory. The women of Rome, indeed, acquired the rights of men; but the consequence was that woman, with all her short-lived independence, dignity, and glory, soon sank beneath the ruins of the Empire. She tasted the forbidden fruit, and it proved fatal to the glory for which God had intended her.

"Men were wanting, and the Empire perished for the want of men. The proof of this," says Prof. Seeley, "is in the fact that the contest with barbarism was carried on by the help of barbarous soldiers." The Emperor Probus began this system, and under his successors it came more and more into use. As the danger of it could not be mistakable. It must have been because the Empire could not furnish soldiers for its own defense that it was doomed to the strange expedient of turning its enemies and plunderers into its defenders. Yet on these scarcely disguised enemies it came to depend so exclusively that in the end the Western Empire was destroyed, not by the hostile army but by its own. How different had been the result if, instead of aspiring to the independence and dignity and the rights of men, the women of Rome had been, as in the days of the glory of the Republic, content to furnish, educate, and train men for the defense of the Empire. Shall we repeat the same stupendous folly? Shall we, in spite of the Word of God and the lessons of experience, run the same race of madness and ruin? Shall we, too, in spite of all our boasted wisdom and high Christian civilization, fall miserable victi

# THE ROOT OF THE MISCHIEF.

Jupiter, we answer she is neither. Jupiter is superior to Venus in size and in effulgence; but, then, Venus, the evening and the morning star, exerts a far more powerful influence over our heart and feelings and imagination than Jupiter. Everything which God has made is beautiful in its own place and season, and hence it is no part of our aim or philosophy to revise or to recenstruct the work of His hands. We would not for the world have Venus put in the place of Jupiter or Jupiter in the place of Venus. Much less would we have woman thrust into man's sphere or man into woman's sphere. And we, we to the people or nation or society by whom they shall be made to exchange places or to occupy the same sphere. We are, for our part, satisfied with the world as God made it without feeling the least desire to revise or correct the moral code of the universe.

MADE FOR A DIFFERENT WORK.

# MADE FOR A DIFFERENT WORK.

to revise or correct the moral code of the universe.

MADE FOR A DIFFERENT WORK.

First a strong-minded woman and then a weak-minded man wrote a great book consisting of some 600 pages or more to prove that Lord Bacon wrote Shakespeare's plays. Now the man or the woman who can not see the difference between Shakespeare and Bacon ought to be excused for denying the difference between man and woman and for joining the woman's rights movement. They have, in our humble opinion, an inherent and inalienable right to make such fools of themselves; that is to say, if nature has not done the business for them. Bacon could no more have written the "Novum Organum" or the "Advancement of Learning." The attempt of the author in question to show that Bacon was a great poet is simply ridiculous. He had the reason, but he lacked the rhythm of the poet. He had the imagination, but he wanted the plastic power and soul of a Shakespeare. In one word, to use the language of Shakespeare, "he had no music in his soul," and was therefore better fitted for "strategems and spoils" than for the building of "the lofty rhyme." His villainous translation of some portions of the Psalms stands in the way of our author's theory, but he apologizes for this on the ground that the "thoughts were not his own." True, the thoughts were not his own; they were too grand and beautiful for any uninspired mind; but, then, "the rhythm" was all his own. Let us look at this, then, and see the likeness between Shakespeare and Bacen. A single specimen will suffice, and here it is:

Ye monsters of the mighty deep,
Your Maker's praises spout;
Up from the sound ye coddings peep;
And wag your tails about.

How like the sublime strains of Othello or Macbeth or Lear or Hamlet! Who, after reading such glorious lines, can doubt that Bacon composed Shakespeare's dramas?

UNITY IN DIVERSITY.

The universe everwhere presents itself to our contemplation under

#### UNITY IN DIVERSITY.

UNITY IN DIVERSITY.

The universe everywhere presents itself to our contemplation under the great law of unity in diversity, or diversity in unity. To select only one out of innumerable examples which might be adduced, if we look at the extremities of the limbs of different animals, we see this wonderful unity in diversity, or diversity in unity. For, as Prof. Owen, the greatest of living comparative anatomists, assures us, the hand of man, the hoof of the horse, the paddle of the mole, the fin of the fish, and the wing of the bat are all constructed on the same archetypal idea or internal plan. Here in all these diversified forms we have a unity of design or plan. The human hand, with its manifold flexible fingers and delicate tactual sense—how admirably is if adapted to the uses and purposes of man! We find the same bones or parts in the forefoot of the horse, but there they are sheathed in a solid hoof with which he strikes the hard earth with impunity. In like manner the same parts and the same internal plan exists in the paddle of the mole, but yet in its external form it is so modified and adjusted to the little animal's mode of life that it "may almost be said to swim through the earth." Again, how admirably is the fin of the fish, with the same internal structure or relation of parts, adapted to its peculiar wants or mode of life. How admirably, in other words, it answers the purpose of an oar, cleaving the waters and directing the course of the fish as it darts through the element in which it-lives. Finally, the wing of the bat, without departing from the same structure of parts, is so formed that the animal beats the air therewith and flies above the earth. One model, and yet how many different modifications, to answer different purposes or spheres or modes of life. Innumerable llustrations of the same great law and the same wonderful adaptation exist in all departments of nature. In the language of the great comparative anatomist already referred to we everywhere behold "the same organ in different a

#### THIS LAW APPLIES TO MAN.

to the particular function it is required to perform.

THIS LAW APPLIES TO MAN.

But man, who in this lower world is the brightest of all God's creatures, is also the brightest manifestation of this great law of the universe. He is one, and yet two. "God said, 'Let us make man in our own image, after our own likeness.'" "So God created man in his own image; in the image of God created He him;" and yet "male and female created He them." Now, it was the mind of man and not the body which God created in his own image; and it was this image, this mind, which He created "male and female." Hence, when Coleridge says "there is a sex in our souls," he but echoes the voice of God. In the work of Mrs. Elizabeth Strutt, entitled "The Feminine Soul; Its Nature and Attributes," this "sex in our souls" is well, is admirably, illustrated. In the two celebrated discourses, also, on "The mission of woman," by Adolph Monod, the difference between the male and female soul is unanswerably established by an appeal to both reason and revelation.

The sphere or mission of woman given, as presented in the Word of God, it is easy to see that the nature and attributes of the feminine soul are exactly adapted to the design of the Creator. Or, on the other hand, the nature and attributes of the "feminine soul" being good, as they are set forth both in the work and the Word of God, it is easy to determine the sphere and mode of life for which she was created. Let not the sphere of woman, then, be confounded with that of man, and let not her soul be unsexed to do the work of man; unless, indeed, it be our object to subvert the order of nature, to "uproar the universal peace and pour the sweet milk of concord into hell." This thing was done in Rome; let it not be done in America.

THE QUEENS OF WIT AND BEAUTY.

"After the revival of letters," says Miss More, "the controversy about the equality of the sexes was agisted with greater warmth than wisdom. The process was instituted and carried on (precisely as it is at the present day) with that

says, it was urged then, as it is in our day, by "women vain of their wit." The beauties took no part in the contest. "There is," says Miss More, "a singular difference between a woman vain of her wit and a woman proud of her beauty. The beauty, though anxiously alive to her own fame, is indifferent about the beauty of other women. Provided she is sure of your admiration, she does not insist on your thinking that there is another handsome woman in the world. The wit, more liberal at least in her vanity, is jealous for her whole sex and contends for the equality of their pretensions, in which she feels her own involved. The beauty vindicates her own rights; the wit, the rights of women. The beauty fights for herself; the wit for a party. The beauty would be a single queen for life; the wit for a party. The beauty would be a single queen for life; the wit would abrogate the Salique law of intellect and enthrone a whole sex of queens."

Now, for our own part, we infinitely prefer the silent queen of beauty to the wrangling queen of wit. The queen of beauty, seeing man at her feet, is content to reign over his heart, his house, and his home. But the queen of wit, seeing nobody subject to her dominion, denounces all men—the ungaliant wretches—as tyrants and seems determined to put them under her feet, even as Jezebel did Ahab.

WHAT THE SCRIPTURES TEACH.

#### WHAT THE SCRIPTURES TEACH.

put them under her feet, even as Jezebel did Ahab.

WHAT THE SCRIPTURES TEACH.

"A woman," said Miss Olive Logan, "has a right to vote and to hold a seat in Congress, because she is as good as a negro." We think, for our part, that a woman, especially if she is not a strong-minded one, is far better than a negro, and that, therefore, she had far better eschew the dust and dirt, the fray and fury of a contest with negroes for a seat in Congress or in the places of political power and profit. We think she is better than a negro, or a white man, either, and had, therefore, better keep within the high and holy sphere for which both nature and the God of nature intended her.

It may be deemed a want of gallantry in us, but still we must insist on "the Salique law of the intellect." For, in fact, the sun shines not more clearly in the heavens than this law does in the Word of God, as well as in His works. "The man," says St. Paul, "is the head of the woman." The family, as organized by Christ, is can social unit, a harmonious whole, with one head and not a two-headed, discordant, self-fighting monster. "Husbands, love your wives," is the word of divine wisdom, in which is so tenderly summed up all the obligations of the husband. "Husbands, love your wives, even as Christ loved the church"; "therefore, as the church is subject unto Christ, so let the wives be subject to their own husbands in everything." Again writes St. Paul to the Ephesians, "Wives, submit yourselves unto your husbands as unto the Lord"; "for the husband is the head of the wife, even as Christ is the head of the church." As in writing to the Corinthians he said. "the head of the church." As in writing to the Corinthians he said. "the head of the church." As in writing to the corinthians he said. "the head of the church." As in writing to the corinthians he said. "the head of the church." As in writing to the corinthians he said. "the head of the church." As in writing to the corinthians he said. "the head of the church." As in writing to the corners

## THE DIVINE STANDARD OF SERVICE AND GREATNESS.

For after this manner in the old time, the holy women also, who trusted in God, adorned themselves, being in subjection to their own husbands."

THE DIVINE STANDARD OF SERVICE AND GREATNESS.

Ah! ye strong-minded women, how ye must hate these words—"being in subjection unto their husbands?! Have you no husbands because you hate these words? Or do you hate these words because you have no husbands? Have you no husbands because the old-fashloned forms require you to "love, honor, and obey." or because nobody has asked you? Be this as it may, it is certain that many nowadays are willing enough to promise to love and honor, but not to obey, in order to the marrimonial knot. They take their stand against the word "obey" as if it were a degradation of their sex. They know neither the word nor the spirit of the great Teacher, who says: "Ye know that the princes of the Gentiles exercise dominion over them, and they that be great exercise authority upon them. But it shall not be so among you; but whosoever will be great among you, let him be your minister; and whosoever will be chief among you, let him be your servant; even as the Son of Man came not to be ministered unto, but to minister, and to give His life a ransom for many." If any woman is, then, offended by the leading idea of the present paper, this is because she is animated by the spirit of the world and not by the spirit of Christ. It is because the love of power and the lust of dominion rather than the sublime meekness and humility of the Lamb of God rules in her wretched, restless heart. It is, in other words, because that which is most hateful in man—the dominering pride of a wicked heart—reigns over and obscures in her that which is most hateful.

The first caused Lucifer "to fall like fire from heaven"; the last alone can raise "a mortal to the skies." We seek, then, not to degrade, but to elevate woman when we say it is her mission of Christ Himself. Though it reduced Him physically to the form of a servant. It raises the most into the world. He said, "L

## INFERIOR ANIMALS BUT SUPERIOR BEINGS.

Woman is sometimes contemptuously called "the inferior animal." "What," several ladies once asked us, "do you think of that sentiment?" "We think it perfectly just," was the reply. "What!"

they exclaimed, "do you, with all your pretended gallantry and admiration of the sex, call woman the inferior animal?" "Yes," we fearlessly replied, "that is precisely our opinion of the sex—inferior animals but superior beings." In brute force, in all that constitutes the mere animal frame and nature, women are inferior to men; but in purity of mind, in refinement of sentiment, in all that most nearly assimilates our race to the good angels above, they are superior to men. Mr. Darwin in his "Descent of Man" has proved at least one thing, namely, that man is actually an animal. No one after reading his very learned work can doubt that man is really an animal or deny that the proud biped eats and drinks and sleeps like his four-footed brethren that perish. But, after all, we are inclined to think that we are, in nature and in kind, a little better than baboons. Many of our strong-minded women do, we are aware, differ from us respecting Mr. Darwin's great discovery of the essential identity of nature between men and monkeys. Hence, rather than quarrel with them or with women of any description we are willing to admit that they are superior animals and also to allow them to choose the species of beast with which it is proper to classify them. * * *

FIRST SYMITOMS AND CURE OF THE DISORDER.

#### FIRST SYMPTOMS AND CURE OF THE DISORDER.

with which it is proper to classify them.

FIRST SYMPTOMS AND CURE OF THE DISORDER.

There are, we are sorry to say, some of the sweetest and most intelligent and most lovely young ladies in our land who seem favorably inclined toward the woman's rights movement. We would do anything to save them, except marry a strong-minded woman; and if we were a widower we fear we might be induced to do even that, in order to rescue the beautiful creatures from their perilous condition, for, indeed, widowers do so many strange and unaccountable things that no man can say what he would not do if he were deprived of his "better half." But if we know ourself we would never marry a strong-minded woman. In this respect we feel as if we were like the old Romans who, after the women had acquired "all their rights," absolutely refused to marry them; consequently, as Prof. Seeley says, "the Empire perished for the want of men." It is, however, a hardly supposable case that any really beautiful and lovely woman will in her right mind actually join the ranks of the woman's rights movement, for whatever her nascent inclination or premonitory symptoms, matrimony will be apt to arrest her in her career and cure her of the inciplent disease.

The first symptom of the disorder is perhaps the determination never, in case of matrimony, to use the word "obey." This symptom is a dangerous one and requires heroic treatment, such as that which Bishop Hobart is said to have administered to a young lady in New York. This young lady, so the story goes, vowed that if she were to get married a hundred times she would never once promise to obey her husband. Accordingly, when the bishop, who had been called in to marry her, came to the words "love and honor and obey" she held down her head meekly and remained silent, hoping he would attribute her silene to her modesty and so pass on. The good bishop, always stern and infexible in the discharge of his official duties, repeated the words, but still no response. A third time he pronounced the words and wi

#### BOTH WEAKER AND STRONGER THAN MAN.

BOTH WEAKER AND STRONGER THAN MAN.

We can not deny, however, that, although woman is the "superior being," she is the "weaker vessel." for such is the express declaration of the Word of God. She is evidently the "weaker vessel." The frailer form, the more delicate organs, the more sensitive and timid nature, all proclaim her "the weaker vessel." Above all, the ease with which the balance of her judgment is disturbed by the impulses of kindness or of cruelty show that she is "the weaker vessel." While man, during the Civil War, displayed his strength by the greatness and the heroism of his deeds, woman betrayed her weakness by the violence of her sentiments. She would have raised the black flag and caused it to wave in all the darkness of desolation over the heads of her enemies even while she was the ministering angel of mercy to her friends. It is the weakness of human nature, and especially in the female sex, that it is always prone to rush into extremes of both hate and love.

But, on the other hand, it must be conceded that woman is weaker than man only in regard to the mission or the work of man. For her own sphere or mission she is endowed with far greater strength than man. In strength of passive will, in the courage and fortitude to endure, to bear the ills that flesh is helr to, she is far, very far, superior to man. In force of aggressive will, in the meek, Christlike capacity to suffer and to bear she is superior to man. She is more like the Lamb of God—a willing sacrifice for the good of man; and this is her glory. In this respect as well as in many others she is most admirably adapted to the sphere of private life, and, above all, to the home circle. This, it is true, is a narrow sphere, but it is nevertheless a high and holy one—the very highest and holiest upon earth. Of all the institutions of society that which is the most important to its order and happiness is the constitution of the family and its government. Over this government woman is, in a special manner, called to preside. From the ce

# ONLY THE MOTHER ADEQUATE TO THE TASK.

"As a general rule," says a celebrated historian, "superior men are the children of their mother." Infancy is the decisive moment in education. In the earliest years is formed the strong bias which gives shape to the entire life. But these years belong to the mother. Paganism took them from her and gave them to the State, but Christ took them from the State and gave them back to the mother. They are too delicate and important for the State or for strangers to meddle with, and they are too exacting for the father. For the training of the young aptness, time, opportunity, patience, long suffering, and self-sacrifice are wanting to all persons, except to the mother. She alone is fit for the work which God in his providence has appointed her to do.

Consider, for example, the man whose strong heart and unconquerable courage now braves alike the wrath of a prince and the fury of the people, and who seems determined to justify the proud maxim, "Man can do what he will." You ascribe, perhaps, the glory of the man to the energy of his nature. But know that in his childhood he appeared so irresolute and so vacillating in his character that everyone said, "He will never make a man." He will, on the contrary, always be a "reed shaken of the wind." But a woman has made him a man, and that woman is the same who brought him into the world. She alone has never despaired of him. Sustained by love and guided by instinct, she alone has discovered beneath all his weakness the hidden germs of greatness, which by her tender, her humble, her patient, and persevering labors she has developed into his present glorious manhood. The child was not and never could have been the father of the man but for the constancy and the care of the woman. She is, indeed, the mother of the man as well as of the child. She has divined everything, conceived everything, planned everything. By trials and conflicts, wisely graduated to his growing strength, she has developed the hidden germs of virtue in his soul, until by degrees the weakness of the child has passed away, and "nature h.velf can stand up and say to the world this is a man." Such is the work, the mission, the glory of woman.

#### SOME REFLECTIONS.

The divorce evil, by its rapid and widespread growth in the United States, has become a danger so deadly that it threatens not only the moral health but the very life of the Nation. Within the last 50 years divorce has increased on an average more than three and one-third times as fast as the population. In the year 1912 it may safely be said that 100,000 divorces were granted and it is conservative to say that 100,000 children, mostly under 10 years of age, were made divorce orphans, being deprived of one or both parents. (Illinois Commission on Uniform Marriage and Divorce Laws.)

The late census shows a steadlly increasing decline in the rate of growth for the native white race of the United States. From 1880 to 1890 the rate of increase was 24.5 as against 23.1 from 1890 to 1900 and 20.8 during the decade 1900-1910. * • Your suffragette may say that her right to vote has nothing to do with the birth rate, and that such right can not militate against the highest ideals of motherhood. But mothering requires the very flower of a woman's days. If she is to bear and mature children under wholesome conditions, she must have the blessed quiet of a home free from the nerve strain of publicity. (Mrs. F. L. Townsend, in the Methodist Review.)

As for America, I appeal to the twentieth century. Either some Cæsar or Napoleon will seize the reins of Government with a strong hand, or your Republic will be as fearfully plundered and laid waste by barbarians in the twentieth century as the Roman Empire was in the fifth century, with this difference, that the Huns and Vandals who ravaged Rome came from without her borders, while your Huns and Vandals will be engendered within your own country and by your own institutions. (Thomas Babington Macaulay.)

# REPORT ON COTTON MARKETING (S. DOC. NO. 175).

Mr. FLETCHER. From the Committee on Printing I report favorably, with a request that it be printed as a Senate document supplemental to Senate Document No. 113, a report by J. S. Williams, chairman, and Clarence Ousley, subcommittee to study the production and marketing of Egyptian cotton, and I ask for its present consideration.

Mr. SIMMONS. I make no objection if it will lead to no debate.

Mr. FLETCHER. It will lead to no debate.

The VICE PRESIDENT. Is there any objection to printing the report? The Chair hears none, and that action will be

NINTH INTERNATIONAL COTTON CONGRESS (S. DOC. NO. 176).

Mr. FLETCHER. From the Committee on Printing I submit a request in favor of printing as a Senate document the report of the Ninth International Cotton Congress of the International Federation of Master Cotton Spinners and Manufacturers' Associations held at Scheveningen, Holland, June 9, 10, and 11, 1913.

The VICE PRESIDENT. Is there objection to printing the report? The Chair hears none, and the report will be printed.

THE CONGRESSIONAL DIRECTORY (S. REPT. 108).

Mr. FLETCHER. From the Committee on Printing I report back the joint resolution (S. J. Res. 66) providing for a second edition of the Congressional Directory for the second session of the Sixty-third Congress, and I submit an adverse report (No. 108) thereon. The report can either be read or printed in the I will ask that it be printed in the RECORD.

Mr. SMOOT. And that the joint resolution go to the calendar. Mr. FLETCHER. Very well.
The VICE PRESIDENT. That action will be taken.

The report this day submitted by Mr. Fletcher from the Committee on Printing is as follows:

SECOND EDITION OF THE CONGRESSIONAL DIRECTORY FOR SIXTY-THIRD CONGRESS, FIRST SESSION.

Mr. Fletcher, from the Committee on Printing, submitted the following adverse report, to accompany S. J. Res. 66:

The Committee on Printing, to which was referred the resolution (S. J. Res. 66) providing for a second edition of the Congressional Directory for the first session of the Sixty-third Congress, having had the same under consideration, report said resolution adversely for the following reasons:

First. An edition of the Congressional Directory consists of 22,164 copies, to print and bind which would cost approximately \$8,000.

Second. From a month to six weeks would be required to compile, print, and bind another edition of the Directory. Consequently a new edition would not be available before October I, even if completed at the earliest date possible.

Third. The next regular edition of the Directory will be issued on Monday, December I, the law (28 Stat. L., 617) requiring that the first edition of the Congressional Directory for a regular session of Congress shall be distributed on the first day of the session.

Fourth. The first edition of the Directory for this session of Congress was corrected up to April 16, 1913, since which date some of the departments and establishments of the Government have issued directories or lists of their officers that are available to Members of Congress. The vest-pocket edition of the Congressional Directory, issued by the Clerk of the House of Representatives, was corrected to June 17, 1913. The pamphlet directory of the Senate compiled under the direction of the Secretary of the Senate is corrected up to August 20, 1913. In addition to these directories, both the Secretary of the Senate and the Clerk of the House issue lists of the committees of the Senate and the House, respectively, which are kept corrected up to date, a new list being printed whenever a change in committee assignments occurs.

Your committee is of the opinion, therefore, that the expenditure of \$8,000 for another edition of the Congressional Directory for this session of Congress is not justified in view of the fact that it would be used for only two months at the utmost and would contain but little Information in addition to what is available already in the various directories issued by the Government.

## EMPLOYMENT OF STENOGRAPHER.

Mr. BRISTOW. I submit the resolution which I send to the desk, and ask that it be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The resolution (S. Res. 173) was read, as follows:

Resolved, That Senator Joseph L. Bristow be, and he is hereby, authorized to employ a stenographer, at a salary of \$1,200 per annum, to be paid from the contingent fund of the Senate, for a period of 30 days.

Mr. WILLIAMS. If it be in order, I ask unanimous consent for the immediate consideration of the resolution, and will give briefly the reasons for so doing. The stenographer who was in the employ of the Senator from Kansas [Mr. Bristow] was shot the other night, as we all know, and is now in a hospital. It would be a very cruel thing for him to be deprived of his pay while he is there, and the Senator can not do his work without having some one to take the place of this young man. I would suggest to the Senator from Kansas that he make the resolution cover a period of 30 days, and if his stenographer is not well by that time it could be continued. If there should be a fatal result, of course the new employee would take the place of the old one. I ask unanimous consent for the present consideration of the resolution.

The VICE PRESIDENT. Under the law the Chair will have to rule that the resolution must go to the Committee to Audit

and Control the Contingent Expenses of the Senate.

Mr. WILLIAMS. The Chair is right. Under the law it goes to the committee. It can not be considered until after it has been reported by the committee. I ask that it be referred to the committee, and then the Senator can poll the committee this afternoon, after which I will ask unanimous consent for its consideration.

Mr. WILLIAMS, subsequently, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred the foregoing resolution, reported it favorably, and it was considered by unanimous consent and agreed to.

## BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TOWNSEND:

A bill (S. 3044) to provide for the erection of a public building in the city of Hancock, Mich.; to the Committee on Public Buildings and Grounds. By Mr. PENROSE:

A bill (S. 3045) granting a pension to Sarah E. Gelser; and A bill (S. 3046) granting an increase of pension to Truman H. Tryon (with accompanying paper); to the Committee on Pen-

By Mr. THOMPSON:

A bill (S. 3047) to correct the military record of Hiram Lane (with accompanying papers); to the Committee on Military Affairs

By Mr. NELSON:
A bill (S. 3048) for the survey and construction of a public highway through the Superior National Forest, Minn.; to the Committee on Agriculture and Forestry.

By Mr. PERKINS:

A bill (S. 3049) for the relief of Edward R. Wilson, passed assistant paymaster, United States Navy; to the Committee on Naval Affairs.

By Mr. LODGE:

A bill (S. 3050) granting a pension to Margaret Gately; and A bill (S. 3051) granting an increase of pension to David N. Landers (with accompanying paper); to the Committee on Pensions.

#### AMENDMENT TO THE TARIFF BILL.

Mr. JONES submitted an amendment intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

#### SENATOR FROM ALABAMA (S. DOC. NO. 170).

Mr. BANKHEAD. I present opinions by Hon. Hannis Taylor and R. B. Evins, legal adviser to the governor of the State of Alabama, with reference to the appointment of the Hon. HENRY D. CLAYTON as a Senator from the State of Alabama. I ask that the opinions be printed as a Senate document.

The VICE PRESIDENT. Without objection, it is so ordered.

JOINT SESSION OF THE TWO HOUSES.

The VICE PRESIDENT laid before the Senate the following concurrent resolution of the House of Representatives, which was read :

#### House concurrent resolution 16.

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Wednesday, the 27th day of August, 1913, at 12 o'clock and 45 minutes in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make them.

Mr. KERN. I move the adoption of the resolution. The motion was agreed to.

#### THE TARIFF.

The VICE PRESIDENT. The morning business is closed.

Mr. SIMMONS. I ask unanimous consent that the Senate

proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government. and for other purposes.

Mr. BRADLEY. Mr. President, it is a little dangerous for a Republican to warn the opposition of the results of the present bill lest he should be immediately accused of joining in a con-

spiracy to produce a panic.

I will say to our Democratic friends nothing is further from my purpose. In all I say I am attempting to show the folly of the present bill, and if possible thereby to avert a panic. If the future is to be judged by the past, I think I shall amply demonstrate that I have the best reasons for believing that the present bill threatens most serious consequences.

It has been said if any manufacturer closes his factory or reduces the number or compensation of his workmen he is to be mercilessly prosecuted and punished. Although he will be forced by this bill to compete with cheap labor, nevertheless he must continue to pay full prices, and even if he becomes bankrupt he will be punished for assisting in a panic.

This reminds me of the boy who was training a bull pup, who insisted that his father should move over the floor on all fours, when he would sick him on. The old man was persuaded to go through the motion, and when the pup fastened his teeth in his flesh the young teacher shouted, "Bear it, pap, bear it; it will be the makin' of the pup!" [Laughter.] And so you say to the manufacturer when foreign competition based on cheap labor is set upon him, "Bear it, bear it; it will be the makin' of a glorious measure that will reflect great great great upon a Demogratic ous measure that will reflect great credit upon a Democratic administration!"

I have many devoted friends in the Democratic Party who are bound to me by hooks of steel, men of the most exalted patriotism who are honestly politically chasing a feather, but, while I respect them and their party in many particulars, in view of their tortuous and contradictory tariff history, I do not believe their tariff opinions are entitled to serious weight. The history of Democracy on this question is one of continuous contradiction, as shown by its various declarations in national platforms. And to this history I refer in order to show either that they do not understand the question, or, what is worse, do not understand themselves. In either case they are not qualified to draft a proper bill.

In 1856, when Buchanan was nominated, it was announced in national convention that-

the time has come for the United States to declare in favor of free seas and progressive free trade throughout the world, and by solemn manifestations to place their moral influence at the side of their successful example.

Notwithstanding the disastrous results of Buchanan's administration, the Democratic national convention, in 1860, in-

dorsed the platform of 1856. In 1864 McClellan and Pendleton were nominated, but in view of the ocular demonstration of the effectiveness of protection under Lincoln, the Democratic Party in its national convention had nothing to say concerning the tariff. It would have

been better for the prosperity and happiness of our people had it remained silent to this good hour.

In 1868 Seymour and Blair were nominated, and the Democratic Party again dragged the tariff into prominence, so much changed, however, as to be scarcely recognizable when compared with the declaration of 1856. In that platform they declared for "a tariff for revenue only and such taxation under the internalrevenue laws as will afford incidental protection." In the same platform they declared for "equal taxation of every species of property according to its real value, including Government bonds and other public securities."

In 1872 they had no platform of their own, but adopted the Liberal Republican platform, which declared in favor of a "system of Federal taxation which will not unnecessarily interfere with the industry of the people and which shall provide the means necessary to pay the expenses of the Government, etc.," and further declared, "and recognizing that there are in our midst honest but irreconcilable differences of opinion with regard to the respective systems of protection and free trade" (still recognizing the fact, notwithstanding the declaration in 1868 to the contrary, that the Democratic Party was wedded to the doctrine of free trade) "we submit the discussion of the subject to the people in their congressional districts and to the decision of the Congress thereon, wholly free from Executive interference or dictation." How does the latter part of this declaration correspond with the Democratic position of to-day, when admittedly the present bill is the creature of the Presiwhen admittedly the present bill is the creature of the President, who refused to allow(?) Congress to adjourn? When he cracks his whip every pony, gaily caparisoned, prances into the ring. When he fiddles the Democratic Congress dance, and when he ceases they all take on a funereal look and anxiously await more music. [Laughter.] He is indeed "monarch of all he surveys; his right there is none to dispute."

In other words, in the struggle of 1872 the Democratic Party had no opinion on the subject which it was willing to announce, the whole object being by combination with disgruntled Republicans to succeed at any cost and under any circumstances. Having failed in that campaign, in 1876 it became more independent in its platform declarations and demanded that "all customhouse taxation shall be only for revenue."

In 1880 it again declared in favor of "a tariff for revenue only.

In 1884 the Democratic national convention again changed front.

After declaring in favor of reducing taxation it pledges the party "to revise the tariff in a spirit of fairness to all interests. But in making reductions in taxes it is not proposed to injure any domestic industries, but rather to promote their healthy growth." Continuing, it declares-

From the foundation of this Government, taxes collected at the customhouse have been the chief source of Federal revenue. Such they must continue to be. Moreover many industries have come to rely upon legislation for successful continuance, so that any change of law must be at every step regardful of the labor and capital thus involved.

Continuing, it is said:

The process of reform must be subject in the execution to this plain dictate of justice; all taxation must be limited to the requirements of economical government. The necessary reduction and taxation can and must be effected without depriving American labor of the ability to compete successfully with foreign labor, and without imposing lower rates of duty than will be ample to cover any increased cost of production which may exist in consequence of the higher rate of wages prevailing in the country.

How radically different are these declarations to the Democratic position on the pending bill.

This tariff declaration substantially favors protection, and not only differs with previous Democratic utterances, but is in direct conflict with the bill now being pressed for passage.

In 1888, when Mr. Cleveland was renominated, the Democratic platform followed somewhat the lines of 1884 in saying:

Crafte platform followed somewhat the lines of 1884 in saying:

Our established domestic industries and enterprises should not and
need not be endangered by the reduction and correction of the burdens
of taxation. On the contrary, a fair and careful revision of our tax
laws, with due allowance for the difference between the sages of
American and foreign labor, must premote and encourage every branch
of such industries and enterprises by giving them assurance of an
extended market and steady and continuous operations.

Here was a direct declaration that due allowance between the wages of American and foreign labor should be made. In the construction of the proposed law we have been told time and again that the cost of production here and abroad was not even considered in committee or caucus in the construction of the pending bill

In 1802, however, when Mr. Cleveland was again renominated, the Democratic Party sang a different song. In that platform it declared "We denounce Republican protection as a fraud—a robbery of the great majority of the American

mental principle of the Democratic Party that the Federal Government has no constitutional power to impose and collect tariff duties, except for the purposes of revenue only " * * * and we promise its repeal as one of the beneficial results" of Democratic success.

How does this compare with the declarations of 1884 and 1888, that the wages of American labor should be protected against that of foreign labor and that no industry should be endangered?

After four years of incalculable disaster under Cleveland, it became necessary for the Democratic Party in 1896 to haul in its tariff sails, and the free-silver idea was advanced as the great panacea for all national ills. The only reference to the tariff was that "the tariff should be levied for the purposes of revenue" (the word "only" being studiously omitted), and the further observation that "until the money question is settled we are opposed to any agitation for further changes in the tariff laws except such as are necessary to meet the deficit in revenue caused by the adverse decision of the Supreme Court on the income tax." In other words, the tariff question was relegated to the rear.

In 1900, after the overwhelming defeat of Mr. Bryan, it became necessary to find a new issue, and the doctrine of imperialism was brought to the front, while free silver was again declared for and the tariff given but little notice. The Democratic Party, as usual, was hunting for a new stalking horse and ready to change front in order to succeed. The only reference to the tariff was to declare in favor of putting the products of the trust on the free list and condemning the Dingley tariff law, notwithstanding the terrible result of Democratic legislation under Cleveland and the great prosperity under the Dingley law. This remarkable platform concluded with a pitiful wail: "Believing that our most cherished institutions are in great peril, that the very existence of our constitutional Republic is at stake, and that the decision now to be rendered will determine whether our children are to enjoy the blessed privilege of free government which have made the United States great, prosperous, and honored, we earnestly ask for the foregoing declaration of principles the hearty support of the liberty-loving people, regardless of previous party alliance." What a manifestation of falsehood and hypocrisy! Who believes that the Democratic Party was honest in that declaration? How were our cherished institutions imperiled? How was their existence at stake? How was the decision of the American people in that contest to determine "whether our children were to enjoy the blessed principles of free govern-ment?" That wail of despair was answered by the American people as it deserved, by the overwhelming defeat of the Democratic Party, and yet our cherished institutions are preserved, our constitutional Republic exists, our children enjoy the blessings of free government, and our country in the last 13 years has advanced in prosperity and power more than in any similar period of our history.

In 1904, again imperialism was advanced; the action of the Republican Party in regard to the trusts was reiterated and once more the tariff issue was resuscitated. Again we were told that protection was robbery, although Republican protection had opened the factories closed by the Wilson bill, had taken railroads out of the hands of receivers, and brought prosperity to every class of American citizens. However, it was gravely announced in the platform that the Democratic Party favored a tariff so levied as not to discriminate against any industry, class, or section. Certainly, we may assume that this declaration did not favor the reenactment of the Wilson law, as it had none of the attributes described. In that platform no fear was expressed for the "safety of the Republic, or the freedom of our children" as in the convention of 1900, the Democrats having recovered from their fright.

Again the American people weighed the Democratic Party in the balance and found it wanting.

In 1908, again Mr. Bryan was nominated, a revenue tariff made one of the issues, the position of the Republican Party in its convention of 1908 misrepresented, and various other issues presented. However, they declared that it should be so levied

as not to discriminate against any industry, class, or section." Now, we come to 1912, when the tariff question was again brought to the front, together with the high cost of living, for which we are solemnly assured the tariff is responsible. How-ever, it was declared, "we recognize that our system of tariff taxation is intimately connected with the business of the country and we favor the ultimate attainment of the principle we advocate by legislation that will not injure or destroy legitimate industry." Has this declaration been carried out? Let the present bill answer the question. The distinguished leader in people for the benefit of the few. We declare it to be a funda- the House has said that three years are given the cane and

beet sugar manufacturers in which to liquidate. In other words, they must then go out of business and surrender the market to the foreign producer. I might instance wool and other legitimate industries which this bill will destroy, but will not now detain the Senate. May we not well conclude that the last platform was made to get in on, but not to stand on.

This is a brief history of the various positions of the Democratic Party on the tariff. From a declaration favoring progressive free trade to silence, from silence to favoring protection, from favoring protection to an attitude of meek submission to Congress, from that back to protection, and from that to a declaration that a tariff for protection is unconstitutional and favoring a tariff for revenue only. It has twisted and turned, and turned and twisted so rapidly, that it reminds one of the man at the barbecue who danced so fast and whirled so quickly that no one could tell whether the patch on his pants was in front or behind. [Laughter.]

#### THE PAYNE-ALDRICH TARIFF BILL.

The Republican platform of 1908 and the Payne-Aldrich bill have been grievously misrepresented, and as I supported that bill I am impelled to come to its defense. The statement so often made that the platform pledged a downward revision of the tariff is not true. Its exact language is:

The Republican Party declares unequivocally for a revision of the tariff by a special session of the Congress immediately following the inauguration of the next President and commends the steps already taken to this end in the work assigned to the appropriate committees of Congress which are now investigating the operation and effect of these schedules. In all tariff legislation the true principle of protection is best maintained by the imposition of such duties as will equal the difference between cost of production at home and abroad, together with a reasonable profit to American industries.

The Democratic position is the reverse of this. That party does not think that in making a tariff the difference in cost of production to the manufacturer or the farmer at home and abroad, whether superinduced by pauper labor or otherwise, should be considered. Indeed, the distinguished chairman of the Finance Committee has stated on this floor that this element was not even considered by his committee. Neither does it believe that a reasonable profit should be allowed to American industries. In other words, our manufacturers and farmers are supposed to be broad-minded and liberal-minded philanthropists who are not working for profit in this world, but solely for reward in the world to come. [Laughter.]

The Dingley bill proved a great blessing to our people. Before its passage many manufactories were closed, many thousands of laborers out of employment, and the farmers struggling for a precarious existence. As soon as it became the law manufactories were opened and others erected, wages increased, and employment given to every man who sought it. Agriculture took on new life, the products of the farm increased in value, and the song of prosperity and plenty was heard in every home.

Of course there were some inequalities in that law, as there always have been and will be in any tariff law. In the course of 9 or 10 years it became apparent a revision was necessary in order to meet the changed conditions of commerce and provide more revenue. If to accomplish these results it was found necessary to change its provisions, the Republican Party was ready to make the change, and it was equally as ready to increase duties when necessary as to curtail them. A special session was called by President Taft in conformity with the party declaration of 1908, and the committees continued their work of investigation. A thorough investigation was made extending over several months, and after full debate the Payne-Aldrich bill was passed. There were a number of provisions in that bill that I did not approve, but there was so much of good in it and so comparatively little harm and so great a necessity for canceling the deficit of \$58,000,000 then existing and placing the Government on a safe and secure financial basis that I voted for the bill, and for that vote I have no apologies to offer. There is no sane man who will say that it was not an improvement on the Dingley bill, and yet its defeat would have left the latter in full force, and our deficit would have increased instead of being replaced with a large surplus, until an issue of bonds would have been necessitated to meet current expenses and indebtedness.

If a tariff bill had to be so framed as to satisfy every member of the majority of the party undertaking its enactment, then no tariff bill would ever be enacted. I did not feel that my individual views should outweigh those of the large party majority; nor do I believe that any man, or any comparatively small number of men, have more wisdom than an overwhelming majority. I felt that when the opposition was drawn up in battle array I should rally to our bugle call and fight the common enemy rather than lag in the rear. I do not criticize the

integrity of those of my party friends who held a different opinion, but I do question their judgment. I believe in party unity. Without it defeat is inevitable, as we have learned to our sorrow. However many mistakes were embraced in the Aldrich law, the present bill is infinitely worse, and, all Republicans agree, is fraught with most serious consequences.

And right here I will add that I have no sympathy for those who vote for protection of an interest in their own State and against protection of any interest in other States, for if protection is right in one State it is right in all. They simply vote as one of old prayed—

Lord, bless me and my wife, My son John and his wife; Us four and no more.

[Laughter.]

It has been charged an almost countless number of times that the Payne-Aldrich law was not a downward revision of the tariff, and it has been charged many times that it was an upward revision. These charges are utterly without foundation and yet many believe them to be true.

That bill contained the most liberal free list ever proposed up to that time, a number of articles in which have been eliminated by the present bill and placed on the dutiable list.

Again, that was the first bill which contained a maximum and minimum provision which fully enabled the President to protect American commerce from unjust and unfair discrimination abroad.

Some of the schedules of the Dingley bill were not altered and others not materially changed, among the latter the wool and sugar schedules, notwithstanding which our critics on the stump charged in many localities that the duties on these two articles had been increased. In the House, reductions were made in 654 numbers, increases in 120, and 1,150 remained unchanged. About the same proportion was maintained in the Senate, and yet we have been told it was not a downward revision.

The price of every article of food was reduced, but prices, nevertheless, have continued to advance, thus showing conclusively that the tariff is not the cause of present high cost of living.

The increases in the Payne bill were largely on liquors, wines, silks, perfumes, fancy ornaments, ostrich feathers, high-priced cotton, and such articles as were in use by the rich and lowered on articles of prime necessity and common use.

But still we are told it was not a downward revision.

Following its passage our imports increased, over those of 1909, \$245,027,206 in 1910; in 1911, \$215,305,881; in 1912, \$341,344,710; and in 1913, \$501,058,010, or more than a half billion, the total increase in the four years over those of 1909 being the enormous sum of \$1,302,735,807. And yet we are told that a bill accomplishing this enormous increase of imports in four years was not a downward revision.

Again, the amount of free importation increased many millions every year until in 1912 the per cent of free imports compared with total imports was 53.73, showing that considerably over one-half of all imports were free of duty. And yet we are told, in the face of this convincing fact to the contrary, that the bill was not a downward revision of the tariff. Under the Dingley law the average ad valorem duty coliected on all imports was 25.48 per cent, under the McKinley law 22.12 per cent, under the Wilson-Gorman Democratic law 21.92 per cent, while under the Payne law it was for three years 19.98 per cent (I have not been able to obtain the statistics for last fiscal year), thus showing that it was nearly 2 per cent less under that law than it was even under a Democratic tariff, and yet we are told that the revision was not downward.

The average duty collected on dutiable imports alone under the Dingley law was 45.76 per cent, under the McKinley law was 47.10 per cent, under the Wilson-Gorman law 42.84 per cent, and under the Payne law for three years was only 40.95 per cent, thus showing a decrease of nearly 2 per cent of the rates of a Democratic tariff, and yet this law, which has been fully vindicated by time, has been denounced as not being a downward revision. But while this law was a downward revision and has accomplished such good results as to importations, the rates were so adjusted that exports have largely increased every year over those of 1909, amounting in all to \$1,812,477,052, the last fiscal year showing them to have been \$2,465,884,149, the largest annual exportation this Nation has ever enjoyed. And yet our Democratic critics, unwilling to correct any equalities that may exist under the present law, are embarking upon threatening seas, with no compass save that of caucus, in a rudderless ship, which must go down when it encounters the breakers, only a little ahead. Like the swan, they will sail majestically on, utterly unconscious of the unfathomable depths beneath. [Laughter.]

LOW TARIFF.

History proves that low tariff legislation has been a failure. One of the most convincing proofs of the truth of the assertion that low tariffs have proven disastrous is the fact that during the existence of low tariffs in this Nation, covering a period of 59 years, imports exceeded exports \$514,054,941. In other words, during that time we purchased abroad that amount more than we were able to sell. The nation which buys more than it sells abroad can not be said to be prosperous. Its homemanufactured goods are not only displaced by foreign-made goods, but its money is sent abroad, thereby diminishing the home circulation to that extent.

There is no year under the Payne bill that we did not sell as much as \$215,000,000 more than we bought and in the last fiscal year we sold nearly \$652,905,915 more than we bought, and of course we gained that much in our circulating medium. In other words, we were enabled from what we received abroad to replace every dollar we had sent abroad and increase our circulating medium at home with foreign money to that ex-

For a few moments I call attention to the Walker tariff, which is claimed to be the masterpiece of Democratic tariff That bill went into effect December 1, 1846, and was followed by another of like character with some changes

with lower ad valorems on July 1, 1857.

During its continuance our country was for a time in a degree prosperous. Prices were fairly good and people were going to the West, buying farms, and improving the farming industries of that section. But the Walker tariff was not the cause of the prosperity. For some four years during the existence of that tariff the Crimean War furnished a market for a ence of that fariff the Crimean War furnished a market for a vast amount of farm produce. During the early period of its existence the Mexican War created an unusual demand for American goods and foodstuffs. In 1849 gold was discovered in California and was largely mined every year thereafter, augmenting greatly our national wealth and enabling us to pay foreign balances. Besides, during this time, there was a famine in Ireland, which increased exportation. These were all fortunate circumstances for the law, in the absence of which it would have brought untold ruin and disaster. In 1847, about seven months after the passage of the law, it is true that exports exceeded imports \$34.317,249, but this was the exception. Every year thereafter up to and including 1857 imports exceeded exports, in all during that period \$346.512.980. ports exceeded exports, in all during that period \$346,512,980. Therefore, crediting the surplus of 1847 the next result of the Walker bill was an excess of imports over exports of \$312,195,731.

The amended Democratic tariff law went into effect July 1, 1857, and at the end of the year exports exceeded imports \$8.672,620. But this was only spasmodic, for in 1859, 1860, and 1861 imports again exceeded exports in all \$128,228,061, the net

excess of imports for four years being \$119,555,441.

The Walker bill and the amendment thereto combined inflicted a net increase of imports over exports of \$431,761,172. Besides during this period Treasury certificates were issued for \$40,000,000 to maintain the Government. Compare this, if you please, with four years of the Payne tariff. During that time our exports have exceeded imports one thousand nine hundred and fourteen millions of dollars.

On the 8th day of December, 1852, after six years' operation of the Walker bill, President Fillmore, in his third annual message, called attention to the injury it had inflicted. Said he:

sage, called attention to the injury it had inflicted. Said he:

In my first annual message to Congress I called your attention to what seemed to me some defects in the present tariff, and recommended such modifications as in my judgment were best adapted to remedy its evils and promote the prosperity of the country. Nothing has since occurred to change my views on this important question.

Without repeating the arguments contained in my former message in favor of discriminating protective duties, I deem it my duty to call your attention to one or two other considerations affecting this subject. The first is the effect of large importations of foreign goods upon our currency. Most of tife gold of California, as fast as it is coined, finds its way directly to Europe in payment for goods purchased. In the second place, as our manufacturing establishments are broken down by competition with foreigners, the capital invested in them is lost, thousands of honest and industrious citizens are thrown out of employment, and the farmer, to that extent, is deprived of a home market for the sale of his surplus produce. In the third place, the destruction of our manufactures leaves the foreigner without competition in our market, and he consequently raises the price of the article sent here for sale, as is now seen in the increased cost of iron imported from England.

Later, on December 8, 1857, after 11 years of its operation.

Later, on December 8, 1857, after 11 years of its operation, surrounded by the ruin it had wrought, a Democratic President, Mr. Buchanan, in his annual message, said:

We have possessed all the elements of material wealth in rich abundance, and yet, notwithstanding all these advantages, our country in its monetary interests is at the present moment in a deplorable condition. In the midst of unsurpassed plenty in all the productions of agriculture and in all the elements of national wealth, we find our manufactures suspended, our public works retarded, our private enterprises of

different kinds abandoned, and thousands of useful laborers thrown out of employment and reduced to want. The revenue of the Government, which is chiefly derived from duties on imports from abroad, has been greatly reduced, whilst the appropriations made by Congress at its last session for the current fiscal year are very large in amount.

By reason of the unfortunate results of the Walker tariff law and its amendment, when the Republican Party came into power in 1861, it found our industries crippled, business stagnated, and faced an indebtedness of \$90,867,826.

And this is the history of the wonderful tariff bill which is the boast of the Democratic Party.

Bad as was the Walker bill, it was not a tithe as destructive as the Wilson-Gorman bill of 1894.

In the Democratic platform of 1892, it was declared that Republican protection was a fraud—a robbery of the majority for the benefit of the few; that the Federal Government had no constitutional authority to impose and collect duties except for revenue only; that the McKinley tariff bill was the culminating atrocity of class legislation, and its repeal pledged.

This was the strongest anti-tariff declaration made up to that time since 1856. It put every manufacturer and producer on notice as to the future. After the election of Mr. Cleveland, knowing that the storm was certain to come, men of large business affairs begun to haul in their sails. Production was materially curtailed, wages were lowered, manufactories reduced to half time, and in many instances closed, and hundreds of thousands of laborers thrown out of employment, who in a starving condition thronged the streets of the large cities where they were fed by public charity. Meanwhile, Mr. Cleveland called a special session for tariff and other legislation. This only increased the terrible condition of affairs. Banks suspended, railroads went into the hands of receivers, large business houses became bankrupt, and the prices of farm products and live stock enormously decreased in value. Of these conditions Samuel Gompers, the great labor leader, said in the labor convention of 1893:

Since August of this year we have been in the greatest industrial depression this country has ever experienced. It is no exaggeration to say that more than 3,000,000 of our fellow tollers throughout the country are without employment and have been so since the time named.

* * Never in the history of the world has so large a number of people vainly sought for an opportunity to earn a livelihood and contribute to the support of their fellows.

In his message to the called session of Congress August 8, 1893, President Cleveland said:

With plenteous crops, with abundant promise of remunerative production and manufacture, with unusual invitation to safe investment, and with satisfactory assurance to business enterprise. SUDDENLY financial distrust and fear have sprung up on every side. Numerous moneyed institutions have suspended because abundant assets were not immediately available to meet the demands of frightened depositors. Surviving corporations and individuals are content to keep in hand the money they are usually auxious to loan, and those engaged in legitimate business are surprised to find that the securities they offer for loans, though heretofore satisfactory, are no longer accepted. Values supposed to be fixed are fast becoming conjectural, and loss and failure have invaded every branch of business.

In his annual message four months later, December 4, 1893, President Cleveland said:

At this time, when a depleted Public Treasury confronts us, when many of our people are engaged in a hard struggle for the necessaries of life, and when enforced economy is pressing upon the great mass of our countrymen, I desire to urge with all the earnestness at my command that congressional legislation be so limited by strict economy as to exhibit an appreciation of the condition of the Treasury and a sympathy with the straitened circumstances of our fellow citizens.

From this time until the conclusion of his administration Mr. Cleveland seems to have remained silent concerning the condition of the country, for he was unable to see any light breaking through the gloom of woe and desolation. Not only did he fail to find any consolation, but Mr. Gompers, in a signed statement published in New York January 1, 1898, said:

published in New York January 1, 1898, said:

That terrible period for the wage earners of this country which began in 1893 and which has left behind it such a record of horror, hunger, and misery practically ended with the dawn of the year 1897. Wages had been steadily forced down from 1893 till toward the end of 1895, and it was variously estimated that between two million and two and a half million wage earners were unemployed. It is agreed by all that the wage earners are the principal consumers of American products, and it necessarily follows that a reduction in wages involves a diminution in the power of consumption, and consequently a proportionate decrease in production, and, naturally, also in the force of labor required for the production. A reduction of wages, therefore, results in an increase in the army of the unemployed, and any circumstances or combination of circumstances that will check reductions in wages, and hence the diminution of consumption by the masses, is a humane act, based on the soundest laws of economics and of progress.

There can be no doubt that hard times commenced immediately following the election of Mr. Cleveland, for the very reason he himself gives: "Suddenly financial distress and fear sprang up on every side." Now, for a few moments let us look at the other side of the picture. In his last annual message, President John Adams

I observe, with much satisfaction, that the product of the revenue during the present year has been more considerable than during any former period. This result affords conclusive evidence of the great resources of the country and of the wisdom and efficiency of the measures which have been adopted by Congress for the protection of commerce and preservation of the public credit.

In December, 1832, concerning the results and benefits of eight years of protection under the tariffs of 1824 and 1828, President Andrew Jackson said:

Our country presents on every side marks of prosperity and happiness, unequaled, perhaps, in any other portion of the world.

Indeed, among all the Presidents from Washington to Buchanan I have found no complaint of disaster or ruin having accrued by reason of protection. I will let Mr. Gompers testify (Gompers's Report, 1899) as to the improved conditions following the Cleveland administration:

The revival of industry which we have witnessed within the past year is one for general congratulation, and it should be our purpose to endeavor to prolong the era of more general employment and industrial activity. In this effort no power is so potent as organized labor, if we but follow a right and practical course. It is beyond question that the wages of the organized workers have been increased and in many instances the hours of labor either reduced or at least maintained.

Instead of imports exceeding exports under protective tariffs, exports have exceeded imports more than eight thousand eight hundred and sixty-five millions. These enormous figures are the most overwhelming testimony of the benefit of protection. And it must not be forgotten that of this large balance of exports more than eight thousand four hundred and eighty-two millions accrued since 1897, under the Dingley and Payne bills, a period of only 16 years.

THE PENDING BILL.

The bill which we now have before us should have the title changed so as to read:

An act to reduce tariff duties, to provide revenue for the Government, to encourage foreign manufacturers and farmers, to reduce the wages of American workmen, and for other benign and laudable purposes apparent in the bill, but not elsewhere.

[Laughter.]

At the special session of 1911 and the last regular session bills were passed regulating the chemical, metal, and wool schedules and providing for a farmers' free list. All of them were vetoed by President Taft. The present bill deals with all these subjects and no more resembles those vetoed than an alligator resembles a woodchuck. [Laughter.] Either those bills were right and this bill wrong or the present bill is right and they were wrong If the former be true, the present bill should be defeated; if the latter be true, the first-mentioned bills exhibited a woeful amount of ignorance and a reckless disregard of American interests. Our antagonists can choose either horn of the dilemma with but small satisfaction. [Laughter.]

It is admitted that the present bill was framed without considering the difference in cost of production, here and abroad. Such an admission, however, is unnecessary, for the bill speaks

for itself.

This bill is substituted for a law that breathed new life into failing industries, that found work for thousands of idle cars and hundreds of motionless engines, that increased wages and gave employment to hundreds of thousands of idle workmen; that took railroads and banks out of the hands of receivers; that gave just remuneration to the farmer for his products that has paid the expense of the Government and caused our export and inland trade to expand as never before. They propose in this bill to remove the motive power that accomplished all these results, the power of protection, and restore the principle contained in the Wilson law that caused so much injury and which was repealed by the Dingley law—and yet they tell us we shall all prosper and be happy. The poison of 1913 is the poison of 1804, and as like causes produce like results we must expect the repetition of all the troubles growing out of the Wilson bill. It is true that up to this time disasters have not afflicted us to such an extent as in 1893-94 and the following years. This is doubt-less due to the declaration in the platform of 1912 that, "recognizing that tariff taxation is intimately connected with the business of the country, we favor the ultimate attainment of the principles we advocate by legislation that will not injure or destroy legitimate industry.

But, nothwithstanding this, there has been a material shrinkage in the value of stocks and bonds, amounting to millions of dollars. The distinguished Senator from Utah [Mr. Smoot] in his recent very able and exhaustive speech read articles from leading and reliable sources showing remarkable shrinkage in the value of mill stocks, textile stocks, and in orders for goods, while the senior Senator from Pennsylvania [Mr. Penrose] re-

ferred to numerous instances of depression and loss in his State. All this is but the beginning of the end.

The substitution of ad valorem for specific duties is a grave mistake. Such rates must be applied on the value of the goods in the foreign country on the day of their shipment notwithstanding values are exceedingly uncertain and constantly fluctuating, sometimes each hour. The matter of values is at all times perplexing to customs officers and serve as a shelter for the dishonest importer. Hence, they are an element of great uncertainty to the manufacture and sale of American products. In flush periods when prices are high the duty will be correspondingly high, while in times when prices are low the duty

will be correspondingly low.

Not only have all our Secretaries of State, except Mr. Walker and Mr. Bryan, I believe, objected to this method, but also a large majority of our great statesmen. Among the latter notably stands one of the ablest Democratic Presidents—Mr. Buchanan. His discussion is so forceful and unanswerable that I trust I may be pardoned for inserting it at such length. In his second annual message, December 6, 1858, he said:

I trust I may be pardoned for inserting it at such length. In his second annual message, December 6, 1858, he said:

In regard to the mode of assessing and collecting duties under a strictly revenue tariff, I have long entertained and often expressed the opinion that sound policy requires this should be done by specific duties in cases to which these can be properly applied. They are well adapted to commodities which are usually sold by weight or by measure and which from their nature are of equal or of nearly equal value. Such, for example, are the articles of iron of different classes, raw sugar, and foreign wines and spirits.

In my deliberate judgment specific duties are the best, if not the only means of securing the revenue against false and fradulent invoices, and such has been the practice adopted for this purpose by other commercial nations. Besides, specific duties would afford to the American manufacturer the incidental advantages to which he is fairly entitled under a revenue tariff. The present system is a sliding scale to his disadvantage. Under it, when prices are high and business prosperous, the duties rise in amount when he least requires their aid. On the contrary, when prices fall and he is struggling against adversity, the duties are diminished in the same proportion, greatly to his injury.

Neither would there be danger that a higher rate of duty than that intended by Congress could be levied in the form of specific duties, It would be easy to ascertain the average value of any imported article for a series of years, and instead of subjecting it to an ad valorem duty at a certain rate per centum, to substitute in its place an equivalent specific duty.

By such an arrangement the consumer would not be injured. It is true he might have to pay a little more duty on a given article in one year, but, if so, he would pay a little less in another, and in a series of years these would counterbalance each ofter and amount to the same thing, so far as his interest is concerned. This inconvenience wo

In his fourth annual message, December 3, 1860, he again called attention of Congress to this matter, as follows:

In his fourth annual message, December 3, 1860, he again called attention of Congress to this matter, as follows:

In this aspect I desire to reiterate the recommendation contained in my last two annual messages in favor of imposing specific instead of ad valorem duties on all imported articles to which these can be properly applied. From long observation and experience I am convinced that specific duties are necessary, both to protect the revenue and secure to our manufacturing interests that amount of incidental encouragement which unavoidably results from a revenue tariff. As an abstract proposition it may be admitted that ad valorem duties would in theory be the most just and equal. But if the experience of this and of all other commercial nations has demonstrated that such duties can not be assessed and collected without great frauds upon the revenue, then it is the part of wisdom to resort to specific duties. Indeed, from the very nature of an ad valorem duty this must be the result. Under it the inevitable consequences is that foreign goods will be entered at less than their true value. The Treasury will therefore lose the duty on the difference between their real and fictitious value, and to this extent we are defrauded.

The temptations which a valorem duties present to a dishonest importer are irresistible. His object is to pass his goods through the customhouse at the very lowest valuation necessary to save them from confiscation. In this he too often succeeds in spite of the wigliance of the revenue officers. Hence the resort to false invoices, one for the purchaser and another for the customhouse, and to other expedients to defraud the Government. * * *

They are thus enabled to undersell the fair trader and drive him from the market. In fact the operation of this system has already driven from the pursuits of honorable commerce many of that class of regular and conscientious merchants whose character throughout the world is the pride of our country.

The remedy for these evils is to be found in sp

temptations to the appraisers of foreign goods, who receive but small salaries, and might by undervaluation in a few cases render themselves independent.

Besides, specific duties best conform to the requisition in the Constitution that "no preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another." Under our ad valorem system such preferences are to some extent inevitable, and complaints have often been made that the spirit of this provision has been violated by a lower appraisement of the same articles at one port than at another. * *

Specific duties would secure to the American manufacturer the incidental protection to which he is fairly entitled under a revenue tariff, and to this surely no person would object. * *

Under the present system it has been often truly remarked that this incidental protection decreases when the manufacturer needs it most and increases when he needs it least, and constitutes a sliding scale which always operates against him. The revenues of the country are

subject to similar fluctuations. Instead of approaching a steady standard, as would be the case under a system of specific duties, they sink and rise with the sinking and rising prices of articles in foreign countries. It would not be difficult for Congress to arrange a system of specific duties which would afford additional stability both to our revenue and our manufactures and without injury or injustice to any interest of the country.

But it is contended not only that protection is a violation of the Constitution, but is morally wrong. The dominant party proposes not only to enforce the Constitution, but to go forth in the great field of morality and become reformers par ex-

cellence in this favored land.

Hence, while it is true that duties are now levied to protect the producer and the wageworker in mine, in factory, and on the farm, it is proposed that they shall be largely reduced in many instances, and, if necessary, eliminated, in order that

more goods may be purchased abroad at cheaper rates and thereby increased amounts of revenue collected.

Now, notwithstanding all goods imported displace that much home-manufactured goods, in consequence of which home wages are impaired and the market for home products nome wages are impaired and the market for nome products correspondingly decreased in price and volume which must necessarily bring down to the foreign level all prices of labor, they claim they will nevertheless bring about a golden era of prosperity in every branch of national industry. The statement of such a proposition is its most complete refutation. They might just as well tell us that we can eat our cake and still have it, that the farmer whose grain and live stock are forced down to the level of the Canadian market, and for that matter to the market of every other country in the world, will thereby be benefited, and that the workingman will flourish like the green bay tree when his wages have been placed on the level of those paid abroad. We must conclude from this contention that they believe the farmer and the wageworker are making more money than they are entitled to, and that when this condition ceases, for all losses they sustain they will be more than compensated by cheap food, clothing, and other articles. They seem to forget that the farmers produce nearly all they consume, and if the value of their products is materially decreased the great loss caused thereby can not be compensated by the small amount they pay for the few articles they do not produce; and that the small amount saved by the wage earner will not compensate his great loss in wages

The full effect of this bill is heavy reductions on finished products and increased duty on many raw materials which can

not be produced in this country.

That this bill is sectional there can be no doubt. The powerful and unanswerable speech of the senior Senator from Iowa [Mr. Cummins] conclusively proves this to be true. I will refer to only a few instances sustaining this charge. Cotton bagging is free, while bags or sacks for the grain of the farmers of the West and elsewhere bear a duty of 10 per cent ad valorem or must be made from fabrics woven in this country that bear a duty of 20 per cent ad valorem. Tobacco, an almost entirely southern product, bears a good rate of duty, to which I do not object, but why should this be provided on the theory of producing revenue, when the immense beet-sugar industry of the West and the great wool industry, mostly confined to that section, are made free, the two producing a revenue five times as great as tobacco. And especially is this course objectionable when foreign countries in some instances give assistance to the sugar industry, the Russian Government paying a bounty on exports.

Even the small duty of three-tenths of 1 cent per pound on cotton ties has been removed, and they have been placed on the free list. As I understand, each bale of 500 pounds requires six ties. These ties weigh 9 pounds and are sold for 2 cents a pound-18 cents. The farmer receives, say, 121 cents per pound for his bale of cotton, the ties being sold as a part of the purchase price. In other words, he receives \$1.12\frac{1}{2}\$ for ties which cost 18 cents, thus making, clear profit, 94½ cents on the transaction. But this is not enough. The object of the present bill

is to give him the full profit of \$1.121.

Not only are the farmers, especially of the West, injured, but the manufacturers of finer fabrics of cotton in the East are punished, while the cotton manufacturer of the South is strictly cared for, the rate of duty on the finer fabrics, which cost enormously more to produce, being entirely inadequate.

## PROTECTION

One of the strongest arguments that protection is right is the frequent change of the Democratic Party on the subject. They

do not seem to be certain of anything.

We are told that the levying of a tariff for protection is without constitutional authority, and that at stated periods beginning with Washingon and down to the present time the Consti-

tution has been openly and notoriously violated. This declara-tion is not only untrue, but is a slander on the memories of all the great and good tariff Presidents this country has ever had. Each of them took an oath to support the Constitution. From Washington to Wilson, except Polk, Pierce, Van Buren, Bu-chanan, and Cleveland, if we are to believe this contention, all our illustrious and patriotic Presidents have soiled their souls with a lie. Not only has Congress the power (sec. 8, art. 3) under the Constitution to lay and collect taxes, duties, imposts, and excises to pay the debts and provide for the common defense and also for the general welfare of the United States, but it has the further power "to regulate commerce with foreign

This language is so manifestly plain that it seems "a way-faring man though he be a fool can not err therein." Not only has Congress the power to lay and collect duties to provide for the general welfare, but in the regulation of commerce it has the power not only to tax but to absolutely prohibit for-

eign commerce.

We are frequently told that many of the great statesmen of the past favored protection because our manufactories were in their infancy and now that they have grown older protection

should be withdrawn.

When our industries were established, by reason of slow and exorbitant transportation, they had comparatively little competition. Years ago steam displaced sailing vessels, transportation became much cheaper and much more rapid, and freight rates now are not more than one-fifth their cost in the distant past. It has been estimated by experts that of late years every

ton of coal carries 35 times more of cargo than before.

In 1790 the value of imports was only \$23,000,000; now their value is \$1,815,970,234, having increased in volume nearly 79 times. We are now in rapid communication with all the countries of the world, and their products may be easily brought to our doors. American wages are about double those in the most favored foreign lands, and in addition to cheap labor there we are facing the pauper labor of India, China, and Japan. Hence, protection is even more necessary now for the safety of our manufactories, farmers, and laborers, than it was in the infancy of the Republic. We must erect the necessary barrier to keep out the products of cheap labor, or our manufacturers, farmers, and laborers, indeed all our people, will be overwhelmed. We must either do this or adopt the common level of labor abroad, and when that is done national destruction awaits us. We hear much of protecting the despised manufacturer. True, he is protected. He can not be expected to maintain factories merely for philanthropic purposes, or for his health; for in such a case he would lose his health and philanthropy would end in bankruptcy. But at last, protection is inspired mainly for the good of those who labor in factories, mines, on the farms, and elsewhere. It is necessary not only for the well-being of the laborers to maintain good wages, but also for the benefit of the farmer, for they are his customers. When their wages are decreased their purchasing power is decreased; when their wages cease they are shorn of all purchasing power.

Again, we must have protection in order to keep our gold at

home and thus maintain our circulating medium.

According to the census of 1909, the number of salaried employees and wage earners in the manufactories was 7,405,313; the number of wage earners in the mines was 1,175,188; and the number of farm laborers about ten millions-making in all 18,580,501. These people with their families, which we will average at three, aggregate 55,741,503-more than one-half our entire population, and all of them are consumers. Add to these, laborers with good wages engaged in other gainful pursuits with their families and dependents; the manufacturer, the farmer, and the mine owner, and we will have fully 80 per cent of our population, all of whom are consumers and nearly all of whom are dependent on good wages. All of them, except the farmer, are the customers of the farmers. The farmers need not to be told that when the wages of this great industrial army are reduced that they have no longer the same purchasing power and that a material reduction in their wages will bring disaster to them. The prosperity of manufacturing, mining, and farming require a hearty cooperation of each with the other, and these three great industries constitute the very bone and sinew of prosperity. When the farmers, the mine owners, and the manufacturers are prosperous the whole country is prosperous. When in addition to the injury to mine and factory, in-flicted by this bill, wool, sugar, live stock, and grain are admit-ted free, the condition of the farmer will be indeed appalling.

I have not seen reports as to the number of wage workers in 1913, but it follows as a matter of course that they have

largely increased during the last four years.

England is now our chief competitor in cotton, but the day is near at hand when Japan shall take her place. It is not far distant from the cotton fields of India and China, where wages are comparatively nominal. In Japan wages are only a fractional part of those paid here. She has an abundance of labor. Four-fifths of her operatives are women and children, who receive comparatively, with our country, no wages.

The mills in Japan do not stop on Sunday. They have two holidays in each month, the 1st and the 15th. They commence work at 6 o'clock on the morning of the 2d and continue until 6 o'clock on the morning of the 15th. On the morning of the 16th they again commence at 6 o'clock and continue until 6 o'clock on the morning of the 1st, no stop being made for luncheon, the hands taking 30 minutes in rotation and spare hands taking the places of each set. They have bought the most approved machinery here for models and readily reproduced them by their cheap labor at only a tithe of their cost here. We must soon confront these people, and yet the present bill renders us unable even to meet existing conditions.

Our Democratic friends have thrown down the bars and issued a cordial invitation to the cheap labor of the whole world to compete with American labor, and yet they tell us we will prosper under the results that will come from this wonderful measure, which has all the vices and but few of the virtues of its predecessors.

So far as this bill attempts to injure the great iron and steel companies it will fall short of its purpose. They are rich and powerful and can withstand the shock. But it will fall with crushing effect upon the smaller companies, thereby centralizing all the business of this country in the hands of the one powerful organization.

They tell us they desire to remove duties from articles manufactured by our trusts. They seem not to have thought of the trusts abroad which will reap the benefit of this legislation. Does it not seem reasonable that we can better contend with our home trusts, which we can actively prosecute, than with foreign trusts entirely beyond our control?

It is charged in the late Democratic platform that the tariff is the cause of the high cost of living, and a pledge is made to reduce the cost. That the present tariff has nothing to do with the cost of living has been demonstrated time and again. 12 years preceding the passage of the Payne law it was substantially the same on foodstuffs, and for a number of years the prices did not increase. Four years ago duties were lowered 20 to 30 per cent on nearly every article of food by the Payne law, notwithstanding which prices continued to advance. is no protective tariff in Great Britain; nevertheless, the British Board of Trade has recently issued a report in which it is stated that present prices in that country are the highest known in 25 years. That retail prices of food have advanced far more than prices of wages since 1890, and that prices of almost all foodstuffs, except tea and sugar, have rapidly increased, the greatest being 32 per cent in bacon and 46 per cent in potatoes. It is an indisputable fact that prices of food have increased steadily throughout the world for the past 10 years or more; even in Japan they have more than doubled in the last 10 years. One reason for this is the large increase in the coinage of gold, which furnishes the highest standard of value, and to this standard all other values are forced to conform. reason is that there has been great progress throughout the world, and with progress always comes increased prices. In this country there are many other causes. Among them is the large increase in city and decrease in rural population. Boys are not content to live on the farm. Years ago the farmer who had 10 sons reared nearly all of them for farmers; occasionally one entered some other profession; but the farmer who has 10 sons now is fortunate if he can induce one to continue on the farm. They almost universally desire to be lawyers, doctors, preachers. engineers, teachers, politicians, etc. Hence, quack doctors, jack-leg lawyers, starving preachers, and worthless politicians have increased, while the number engaged in agricultural pursuits has diminished. [Laughter.] Again, our population has increased a much greater per cent than our farm products. Another reason for the high prices is the largely increased cost of distribution and delivery of food. Now it is ordered over the telephone and delivered by wagon or automobile.

Another is the extra demand for foodstuffs to maintain the 8,000.000 immigrants who have come to this country during the last 11 years, not 5 per cent of whom have sought work on the farm, the other 95 per cent having gone into the factories, mines, and public works and became consumers. Another reason is the enforcement of pure-food laws which exclude from consumption large quantities of food heretofore placed on the market. Another is the scale of prices adopted by the middleman and the retailer. Another is that our people of all classes are living more extravagantly than in any period to the commercial world.

of our past history. Another is that the value of land and the amount of taxes have largely increased, as have also the wages paid for farm labor. There are many other reasons that might be assigned, but time forbids. In my judgment, the only practical and substantial relief from present conditions will be found in the practice of economy, in the increase in farming, and in the better and more scientific cultivation of land so that the quantity produced will be largely increased.

quantity produced will be largely increased.

If I remember correctly, during Mr. Cleveland's administration there was no complaint concerning the price or scarcity of food; the trouble was then to get the money to pay for it. In one instance alone during that period 3,000 men out of employment tramped the streets of the comparatively small city of Seattle and were fed at public expense. I am told at that time a notice was posted at one point in the city which read:

BILL OF FARE,

Soup, one kind of meat, potatoes, one kind of pie, one cup of coffee. Price for the meal, 5 cents.

And yet it has been said that there were then in Seattle 3,000 people who did not have that 5 cents. [Laughter.]

There is only one way in which the tariff can affect the price of food, and that is by so adjusting it as to destroy the prosperity of the country. Our Democratic friends may succeed in this way in keeping their pledge to decrease the cost of living, but it must follow that they will materially lessen or destroy the ability to purchase.

The more wages paid for producing a given commodity, the greater will be the cost of producing it. Therefore, the producer who pays these wages will have the highest cost of production and consequently needs the highest price for his product. Again, if American products cost more on account of wages paid, it follows when they are reduced to the price of foreign products the price of labor will fall.

No country can prosper that has not the necessary amount of circulating medium. The mere possession of money amounts to nothing if it does not circulate. Active and plentiful circulation of good money is as necessary to the commercial life of a nation as is active and plentiful circulation of pure blood to human life. No nation can succeed that robs itself of its gold by sending it abroad. The operation of a protective tariff goes further to accomplish the retention and circulation of money at home than all other agencies combined. Indeed, without a protective tariff the preservation of our circulation is impos-When we buy here we have both the goods and the When we buy abroad we have the goods, but have parted with the money. Every dollar that goes abroad lessens to that extent the circulating medium here. Every dollar of goods purchased abroad takes the place of that much produced here. When we decrease our money and decrease our market for home products, we not only open the barrel at the spigot, but also at the bunghole.

A wholesale merchant in Louisville, Ky., desires to purchase a stock of goods costing \$100,000. He concludes that he can purchase in London 10 per cent cheaper than in New York; he goes to London, buys the goods, and gives in exchange \$100,000 of American gold. It follows necessarily that our circulation is decreased \$100,000 and that of England increased to the same extent. He brings his goods to America, and upon reaching this country they displace \$100,000 worth of goods made by the American workingman, thereby inflicting an injury on him. Another merchant in Louisville concludes to purchase the value of goods in New York. He pays in New \$100,000 for American-made goods, and that money continues to be a part of our home circulation and the American workingman is assisted to that extent. The New York merchant concludes to invest in tobacco and buys \$100,000 worth of tobacco in Kentucky, and the money returns. The tobacconist concludes to buy \$100,000 worth of rice, and the same money concludes The tobacconist concludes that purchase in South Carolina. The dealer in South Carolina invests the money in sugar in Louisiana, and the sugar planter with the same money pays the expenses of the running of his plantation, such as the laborer in the field, the cooper, the insurance agent, and various other creditors. These persons pay their creditors, and they in turn pay theirs, so that the same \$100,000 has performed the function of \$600,000. It has remained here, circulating from place to place, canceling indebtedness, developing commerce, and stimulating American enterprise and labor, while the \$100,000 sent abroad, instead of performing those functions here has accomplished them abroad.

It required but a short time for Bismarck to discover the truth of his statement that the protective tariff was the main cause of American prosperity and acting upon our example to establish protection in Germany. The vast increase in prosperity following that action has been a source of astonishment

France, inspired by our example, also adopted protection, and the result has proven most salutary. Both her prosperity and national wealth have enormously increased. The doctrine of protection has been adopted throughout Europe with the most favorable results.

England is the only country on earth of any importance that opposes protection. Her agricultural interests were sacrificed in order that the worlds market for manufacturers might be gained. But even in the world's market for manufacturers she has been surpassed by the United States. If Great Britain were blockaded for 90 days her people would be in a state of starvation, but no blockade however prolonged could have

that effect on the United States. England's great colonies refused to follow her example and adopted a protective tariff. A few years ago Canada was making poor progress, but after she enforced protection her prosperity has been most remarkable. And when the pending bill shall have become a law, giving her in many important respects free access to our markets, we shall see her prosperity advance by leaps and bounds and immigration from the United States

to her borders will largely increase.

The statement that the tariff is the mother of trusts has not been made for a long while. That the tariff has no effect on trusts is exemplified by the fact that they exist as plentifully in free-trade England as they do in the United States. Probably the opposition have learned that competition alone is the breeder of trusts. A, B, and C are manufacturing the same article and are selling at small profits on account of competition. Hence, they conclude to merge, not only for the purpose of paying the expense of one management instead of three, but to raise the price, and thus we have a trust. Much was done under the administrations of Roosevelt and Taft to curb and dissolve trusts, while comparatively nothing was done under the administration of Mr. Cleveland.

But we are told that the consumer pays the tariff. This may be true in the beginning of an industry, but it has almost, if not universally, been demonstrated that after an industry has become properly established competition ensues and prices go I might especially instance steel rails, nails, silk, and The reason for this is quite apparent. A sees that B is prospering in a given line of a new industry, and hence concludes to embark in that business, and others seeing his success do likewise. Thus competition springs up on every hand. Out of competition grows increased manufactures, and following that reduction in prices. As prices are lowered the demand increases, and each manufacturer has increased sales. they sell they can well afford to lower the price on account of the quantity sold, for a small margin of profit on a large quantity of goods produces more than a much larger margin on a small quantity.

Though comparatively a child, I remember that in 1860 the axes, hoes, table cutlery, razors, dishes, and blankets in use in my home were all made in England; but under the operation of a protective tariff conditions changed, and all of them were produced in immense quantities in the United States, and I have seen them bought for one-half, and in many instances for one-fourth, their cost in that day. In 1860 a gold hunting-case watch cost \$250 to \$300; now it can be bought for \$75. then cost \$400; it can now be bought for \$100. Then every little town had its hatter shop and cabinet shop, where hats and furniture were made, but these have disappeared, and articles made in them are now made by the factories and sold for less

than half their price at that time.

The most forcible illustration in our history of the results of protection and free trade is found by recurring to the Civil War period.

The constitution, adopted by the Confederate Congress March

11, 1861, in section 8, provided that-

No duties or taxes on importations from foreign nations shall be paid to promote or foster any branch of industry.

The Congress of the United States promptly enacted a pro-lective tariff law. Under the operation of that law factories sprang up like magic on every hand. Clothing, blankets, the necessary means for transportation, canteens, knapsacks, and all the munitions of war were quickly furnished for the Union soldiers and good money provided to support the Government and successfully carry on the war. On the other hand, but few factories were erected in the South, and money was made in some instances from portable presses throughout the country, which of course proved worthless. The people who formerly carried their money in their pocketbooks and their marketing in their baskets were forced to adopt the opposite rule and carry their money in their baskets and their marketing in their pocketbooks. [Laughter.] The Confederate soldiers were poorly fed and clothed, and want prevailed throughout the Confederacy.

The farmer need not be told that if the American workingman's wages are cut in half he will have only one-half of his purchasing power and can purchase but one-half as much produce as before unless the price be correspondingly reduced. He need not be told that the same agency that reduces the purchasing power of his customer must necessarily produce a corresponding loss to him in the price of his commodity.

The American workingman now receives from one and a half to twice as much wages as the workingman in the most favored countries abroad and many times as much as is paid the workingman in India, Japan, and China. Our wage earners are not only the best fed and best clothed, but are the most independent

and self-reliant in the world.

During this era of protection our railroads have increased their mileage many thousands of miles, and the oceans been connected by bars of steel, resulting in immense reduction in the price of transportation. Telegraph and telephone lines have been constructed to all portions of the country and cables laid beneath the rolling waters of the mighty deep.

The great West and Northwest have developed into fruitful fields and populous cities and are now disputing with other sections for national supremacy. The South has marvelously advanced, and we lead the world in wealth, invention, and all

that is required to make a nation great.

Under protection manufactories have multiplied with marvelous rapidity, and the increase of farms and farm values almost defy computation. We have become not only the largest export

Nation, but the workshop and granary of the world.

Under protective tariffs we have sold abroad more than we have purchased-eight thousand eight hundred and sixty-five millions of dollars more than we have purchased. As already stated, commencing with the passage of the Dingley bill alone, our exports have exceeded imports eight thousand four hundred and ninety-eight millions, all our balance of imports prior to 1897 aggregating only something over three hundred and eightythree millions of dollars. And notwithstanding this remarkable prosperity our opponents are not satisfied, but will entirely revolutionize the policy under which it was accomplished.

Immense as has been our foreign trade, it can not be compared to our internal commerce, which is twelve times as great. To obtain access to this the foreigner is bending every energy. This home market is the outgrowth of protective policy. It is the sale and interchange of commodities among the States. It is the interchange between farm and factory among our own people. Day and night it is in progress. We see it in great steamers on lakes and rivers and along the coasts; we see it in the tens of thousands of cars heavily laden coursing over bars of steel; we hear it at all hours of the day and nightindeed a constantly moving and shifting panorama of commercial activity. Through its operation our currency is constantly circulating, performing its functions a countless number of times, always, however, remaining in this country.

The nations of the world for many years have been and are now clamoring to enter and enjoy this home market upon terms of equality with us, and nothing has prevented save protection

of American industries.

This fair industrial fabric of internal commerce, the monument of our Nation's greatness, is the wonder and the envy of the world. It is preserved for those who pay taxes to sustain the Government and who are ready, willing, and at all times liable to be called to risk their lives for the flag rather than open to those abroad who contribute nothing to sustain our Government and who, in case of war, instead of being willing or called to defend our national honor, may be drawn up in battle against us.

It is truly the foundation of our national prosperity. It has been erected by the farm laborer as he drives his team afield or revels in the harvest of golden grain; by the miner as, shut out from the light of day, he delves into the bowels of the earth and brings up its hidden riches; by the workman in the factory, surrounded by the whir of countless spindles, the music of re-volving wheels, the throbbing pulsations of mighty machinery, and the whistle of countless locomotives-all under the sheltering wings of protection.

We can not, we dare not, we will not sit idly by while preparation for the work of demolition and destruction proceeds. We will not join in the invitation to the world to come here and enjoy its benefits, to tear it down and feast upon its scattered

fragments. I know our protest will be vain; that it will fall on ears that hear not and hearts that feel not. Nevertheless, we

shall have the consciousness of duty well performed.

You will overwhelm us now, but I advise you to make hay while the sun shines, for soon darkness shall enshroud you! Go on, and gather the flowers that bloom by the wayside, for soon they shall wither and you will gather only thorns. on, Senators, go on in your worse than mad career, but remember as you "walk blindfold on, behind you stalks the heads-While you are receiving the plaudits of the Old World, Canada, Australia, Mexico, and South America, while you will extort crocodile tears of gratitude from the people of foreign lands, the tremendous majority registered last year in favor of the protection taught by Washington, Hamilton, Madison, Clay, Lincoln, Harrison, and McKinley, in the presence of national disaster will forget past dissension, and augmented largely by those who were deceived by you last year, will gather in every hamlet and city, on every hilltop and in every valley, and with a power resistless as the fury of the storm, will rush over your prostrate forms, sweeping you from power, so that the places that know you now will know you no more forever.

The Republican Party is coming back. The injury inflicted on the country will furnish a platform upon which all will

safely and gladly stand.

And when it returns it shall bear healing upon its wings; it shall rebuild all that has been destroyed; it shall lift up and breathe new life into our failing industries; it shall return to the farmers the prosperity they now enjoy; it shall again rescue the Nation from danger and disaster; and move onward and upward in the great highway of American advancement and prosperity.

Mr. SIMMONS. Mr. President, I ask that we proceed with

the reading of the bill.

The reading of the bill was resumed, beginning with para-

graph 348, page 107.

The next amendment of the Committee on Finance was, in paragraph 351, page 109, line 3, after the words "ad valorem," to strike out "crude artificial abrasives, 10 per cent ad valorem," so as to make the paragraph read:

351. Emery grains and emery, manufactured, ground, pulverized, or refined, 1 cent per pound; emery wheels, emery files, emery paper, and manufactures of which emery or corundum is the component material of chief value, 20 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 109, to strike out paragraph 353, in the following words:

353. Fulminates, fulminating powders, and other like articles not specially provided for in this section, 5 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 109, to strike out paragraph 354, in the following words:

354. Gunpowder, and all explosive substances used for mining, blasting, artillery, or sporting purposes, when valued at 20 cents or less per pound, one-half cent per pound; valued above 20 cents per pound, 1 cent per pound.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read paragraph 355, on page 109.

I ask that that paragraph may be passed over. The PRESIDING OFFICER (Mr. Lewis in the chair). There being no objection, the paragraph will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 356, page 110, line 2, after the word "caps," to strike out "75 cents" and insert "\$1," so as to make the paragraph

356. Percussion caps, cartridges, and cartridge shells empty, 15 per cent ad valorem; blasting caps, \$1 per thousand; mining, blasting, or safety fuses of all kinds, 15 per cent ad valorem.

The amendment was agreed to.

The Secretary proceeded to read paragraph 357, on page 110.
Mr. HUGHES. Mr. President, my recollection is that it was agreed that this paragraph should be passed over. I understand there are several Senators interested in it who are absent, so I think, perhaps, it had better be passed over.
Mr. SMOOT. Mr. President, I was going to say that if the

Senator had not requested that the paragraph go over I should have done so, or else have called for a quorum, because I know there are Senators who are especially interested in the para-

Mr. HUGHES. That is my understanding, and I think in fairness to those Senators the paragraph should be passed over.

Mr. SMITH of Georgia. Mr. President, I am perfectly willing to have the paragraph passed over for the present, although I think an incorrect view of just what it undertakes to do has been scattered throughout the country. I have received letters from enthusiastic friends of birds who were under the impression that this paragraph was to be of some great service to our own birds, while in point of fact it has no application to the protection of birds in the United States, the killing of birds in the United States, or the use of the feathers of birds which live in the United States in connection with the ornamentation of hats. It applies exclusively to the birds of foreign countries, I agree that it shall be passed over.

and undertakes in some way to help protect the birds of foreign countries by forbidding the introduction into this country of their feathers

While I believe every member of the committee is a most earnest friend of our own birds, and some of the members have made records in helping pass legislation for the protection of birds here at home, in acting upon the paragraph the subcommittee doubted whether the exclusion of the feathers of foreign birds would protect birds in the United States, but, on the contrary, it might increase the desire to kill them for use

Mr. LODGE. Mr. President—
The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Massachusetts?

Mr. SMITH of Georgia. Certainly.

Mr. LODGE. On the question of these being merely foreign birds, I understand exactly the reverse is the case. stand these feathers are very largely taken from American birds, carried to Europe, and there prepared for the millinery This is the only way we have of protecting our own birds.

Mr. SMITH of Georgia. If the Senator will investigate the question I think he will find that is an inaccurate statement.

Mr. LODGE. I have investigated it with some care, and I

am satisfied that it is just what happens.

Mr. SMITH of Georgia. The large majority of the feathers that are imported are those of foreign birds. If they are the feathers of our own birds they will be put in shape here, any-

Mr. LODGE. If the Senator will allow me, what the committee has retained in the paragraph, the egrets, come almost exclusively from Florida. On the basis of the Senator's argument there is no sense in putting egrets in here.

Mr. SMITH of Georgia. I really do not think there is. I really do not think any of it ought to be in a bill of this sort. Mr. LODGE. The egrets come from Florida, and they are

taken over to Europe, and there they are prepared.

Mr. SMITH of Georgia. But they do not come exclusively from Florida. They are found in other places and to a large extent in other places. If they do come in large part from Florida it would justify the provision retained. The Senator was not here at the time I began what I was going to say. I do not wish to discuss the paragraph at this time.

Mr. LODGE. Oh, I did not know that.

Mr. SMITH of Georgia. We intend to pass over it. I only desired to make a very brief statement to let it be known that in striking out the House provision the committee were in no sense hostile to the protection of birds. I believe every member of the committee is a warm advocate of protecting birds; but it did seem a little irrational to exclude the feathers of foreign birds from this country. We could not see why that would prevent the foreign birds from being killed and the feathers used somewhere. We did feel that their exclusion, instead of helping birds in the United States, might increase the effort to kill birds here to procure their feathers, as the feather supply would be confined to domestic birds. Furthermore, there is a revenue approaching \$2,000,000 in connection with the duty upon the importation of these feathers; and it was for these reasons that the subcommittee was disposed to strike out this provision.

Mr. LODGE. The paragraph is going to be passed over, I

understand.

Mr. McLEAN. Mr. President-

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Connecticut?

Mr. SMITH of Georgia. I do.

Mr. McLEAN. I think the Senator from Georgia realizes the revenue is derived largely from ostrich plumes, and they constitute a very large percentage of the importations.

Mr. SMITH of Georgia. Yes; I believe that is true.

Just one word more. I think some of the persons interested in this matter have been extreme both in their expressions and in their feelings upon the subject. Their conduct and speech has almost amounted to idealizing a bird the farther off the bird might be. For myself I can not understand why a bird in the wilds of a foreign country is any more to be idealized than the beautiful birds around the farm home.

I take my full part of the responsibility for the action of the subcommittee. I feel called upon to say this because I agreed to do so at the meeting of the subcommittee, when adverse action was had.

I think I have received more letters upon the subject, and, perhaps, more unpleasant letters, than upon any branch of the entire legislation, and I wish to accept my part of the responsibility for believing that what was proposed to us is impracticable and unnecessary legislation. With this brief statement

Mr. SIMMONS obtained the floor.

Mr. BRANDEGEE. Mr. President

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Connecticut?

Mr. SIMMONS. Probably after I make a statement the Senator will not want the floor.

Mr. BRANDEGEE. I do not wish to debate the question. I desired to ask a question of the Senator from Georgia on this

Mr. SIMMONS. Very well. Mr. BRANDEGEE. I do not wish to interfere with the Senator from North Carolina, however.

The PRESIDING OFFICER. The Chair recognizes the Sen-

ntor from Connecticut for the question.

Mr. BRANDEGEE. The Senator from Georgia states that he believes in protecting the domestic birds, but expresses some doubt about the efficacy of the House provision to protect domestic birds in the heart of forests in other countries. wanted to ask the Senator is this: Does not the Senator concede that domestic birds in large numbers and in many varieties go into the forests of other countries during the winter and they can be killed there and their plumage sent back to this -to the destruction of our domestic birds?

Mr. SMITH of Georgia. To some extent that is true; but I believe the way to accomplish that is to proceed rather by international agreement than to undertake arbitrarily a com-

plete exclusion of such feathers from importation.

Mr. McLEAN. Mr. President-

The PRESIDING OFFICER. Does the Senator from Georgia

yield to the Senator from Connecticut?

Mr. SMITH of Georgia. Yes. It was not my purpose to provoke a discussion at this time. So much has been said against this measure, I only wished to go far enough to let it be understood that the subcommittee sought to treat this question in a sane manner, with full regard to bird preservation in the United States. So far as the trade in feathers is concerned, I care little for it. I would not be moved by the interest of the men who desire to engage in the trade in feathers; but we did believe that it was unnecessary to pass such a provision.

Mr. McLEAN. Mr. President, I have no desire to go into any

discussion-

Mr. SIMMONS. I hope as this matter is to go back to the committee we will not engage in a discussion of it at this time.

Mr. McLEAN. I understand, I merely want to make a statement which it seems to me may be properly made at this

time.

I understand the Senator from Georgia to say that he is entirely in harmony with the general proposition of bird conservation, and it is a question of means with him and not any purpose to interfere with a reasonable effort to protect the useful birds wherever they may be found. I think it is important to call his attention, and perhaps the attention of the Senate, to the fact that the House of Commons have recently had under consideration a proviso in substance the same as the proviso which was adopted by the House. It is my information that after a long hearing, in which the plumage trade was represented and fully heard, the committee decided to report a bill prohibiting the importation of plumage, and that bill has been introduced in the House of Commons as a Government

This Government having requested the President to negotiate conventions with foreign nations for the purpose of protecting the useful birds of the world, it seems to me that it becomes very important that the United States at this time should not right about face and by an act of Congress legalize this trade, but should set an example which will carry conviction when it invites foreign nations to act in harmony with the position which we have taken.

That is all I care to say now. I think that the Senator from Georgia realizes that the only way in which we can ultimately secure the end in view is to prohibit the trade. As long as you permit the trade in feathers the profit is so tremendous the birds will be killed. That is the result of experience, and no other result can be expected.

I want to say to the Senator from North Carolina [Mr. SIM-Mons I that I understood, when the matter was up the other day, that it was agreed that this proviso should be returned to the committee.

Mr. SMITH of Georgia. It is to be recommitted, and we have so stated. I only rose for the purpose of expressing a few reasons that influenced me in writing this substitute and urging it and to entirely disclaim any purpose in doing so of being antagonistic to the birds' protection, because I have been quite active in protecting them in my own State. I believe in protecting them. I believe in protecting them all over our own coun-

try where we have the power to protect them, not simply as a matter of sentiment, but because they are both a source of great pleasure and service to mankind. I considered the advocates of this measure much like the man with a beam in his own eye who went off and hunted for the mote in somebody else's; that instead of doing the work in our own country and protecting our own birds it was going off to somebody else's country to protect theirs. While I voted with a great deal of pleasure for the resolution seeking international cooperation for bird protection—and I would be glad to see an international agreement to stop the trade and protect birds everywhere-it seemed to me it was rather straining at the subject to put through this provision in the shape it was. The only reason why I rose was to let some expression of the reason that influenced us go into the RECORD and not to argue the question.

Mr. McLEAN. I sincerely hope that the Senator from Georgia will find it impossible to agree with the unanimous opinion of the Democratic Party in the House of Representatives that this particular trade is an illegitimate trade. I hope he will not single out this trade as the only one which should receive pro-

tection in this bill.

The PRESIDING OFFICER. May the Chair ask the Senator from North Carolina what is the motion he makes for the disposition of this particular paragraph?

Mr. SIMMONS. If the Chair will permit me for just a minute

Mr. SMITH of Georgia. It has been passed over. The PRESIDING OFFICER. The Senator from North Caro-

lina will proceed.

Mr. SIMMONS. The only controversy about this paragraph is with reference to the proviso beginning in line 21. There are a number of committee amendments outside of that proviso, and if there is no objection I would like to have those amendments offered by the committee agreed to or disagreed to, as the case may be.

Mr. BRANDEGEE. Mr. President-

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Connecticut?

Mr. BRANDEGEE. The Senator is still talking about para-

graph 357.

Mr. SIMMONS. Yes, Mr. BRANDEGEE. My understanding was that the entire

paragraph had been recommitted to the committee.

Mr. SIMMONS. I was going to ask that the proviso be recommitted and that before the proviso is recommitted we might act on the amendments, in view of the fact that the only controversy is as to the proviso.

Mr. BRANDEGEE. I do not care what course is taken, ex-

cept I thought

Mr. SIMMONS. I withdraw the suggestion if there is to be any discussion.

Mr. BRANDEGEE. I am not objecting. I am stating that my impression is that when we reached it before it was recommitted to the committee, whereupon the Senator from Missouri-

I have withdrawn my suggestion.

Mr. BRANDEGEE. I desire to finish the sentence—
The PRESIDING OFFICER. The Senator from Connecticut

Mr. BRANDEGEE. Whereupon the Senator from Missouri said it would have to go to caucus if recommitted to the committee, and the Senator from North Carolina assented. If it is before the Senate, I have no objection to agreeing to such parts of it as may not be objected to. If it is withdrawn from the Senate, I do not see how we can agree to it without reconsidering the action we took the other day.

Mr. SIMMONS. There was no action taken the other day, as I understand. It was under discussion, and the statement was made by myself and the Senator from New York [Mr. O'GORMAN] that when it was reached we would ask that it go back to the committee, and that is what we are doing now, so far as that part of the paragraph is concerned about which there is a controversy.

Mr. BRANDEGEE. But the question-

Mr. SIMMONS. I withdrew the suggestion, Mr. President-Mr. BRANDEGEE. The question is a matter of record. If the clerks' records show that the paragraph was not recommitted, I have no objection.

Mr. SMITH of Georgia. There is not any doubt about the Senator from Connecticut being wrong. The Senator's colleague made a speech before the paragraph was reached, and this is the first time that it has been reached in reading the bill. Mr. HUGHES. The paragraph was never before the Senate

for action until this morning.

Mr. BRANDEGEE. The RECORD will show the situation. I simply made what is practically a parliamentary inquiry.

Mr. SIMMONS. The motion is withdrawn.

The PRESIDING OFFICER. The Chair will ask the Senator from Georgia what is the question, then, before the Senate regarding the disposition of the paragraph? What is the dispo-

Mr. HUGHES. I ask unanimous consent-

Mr. LODGE. Mr. President—
The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Massachusetts?

Mr. HUGHES. Certainly. Mr. LODGE. I wish merely to ask a question, as I was not here when these paragraphs were first taken up, having been out for a moment. We are now on paragraph 357, I understand.

Mr. HUGHES. And I was about to make a motion in reference to that paragraph; at least, I was about to ask unanimous consent that the paragraph be recommitted to the committee.

Mr. LODGE. I, of course, have no objection. I wanted to

make an inquiry about paragraph 355.

Mr. SMOOT. I asked that it go over, and it went over.

Mr. LODGE. It is all right, if paragraph 355 has gone over, because there ought to be an amendment made to that paragraph to which I have drawn the attention of the chairman of the committee.

Mr. SIMMONS. I wish to say to the Senator from Massachusetts that I will see that the amendment he has called to my attention is brought to the attention of the committee. I think, Mr. President-I am stating my own opinion about it-there will be no trouble about agreeing to the amendment offered by the Senator from Massachusetts. I think it is a very proper amendment.

The PRESIDING OFFICER. The Senator from New Jersey may now recur to the motion in which he was interrupted.

Mr. HUGHES. I ask unanimous consent that paragraph 357

be recommitted to the committee.

The PRESIDING OFFICER. The Senator from New Jersey asks unanimous consent that paragraph 357 be recommitted to Without objection, such is the order. the committee.

Mr. GALLINGER. Mr. President—
The PRESIDING OFFICER. Does the Senator from New Hampshire hold the floor for any further purpose regarding paragraph 357?

Mr. GALLINGER. I propose to hold the floor but a moment. I simply desire to express my approval of the action taken by the Senator from New Jersey in making this request. I will further express the hope that the committee will give this matter, as I am sure the committee will, the most careful and diligent consideration. It is a very important matter, and there will be a great deal of debate upon it unless some arrangement can be reached whereby we will substantially agree upon it.

The next amendment of the committee was, in paragraph 358, page 111, line 3, to strike out "Furs and fur skins of all kinds not dressed in any manner, except undressed skins of hares, rabbits, dogs, and goats, sheep, and not specially provided for in this section, 10 per cent ad valorem; furs," and insert "Furs"; and in line 7, before the words "per cent," to strike out "30" and insert "20," so as to read:

Furs dressed on the skin, not advanced further than dyeing, 20 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 358, page 111, line 8, after the words "ad valorem," to insert "plates and mats of dog and goat skins, 10 per cent ad valorem."

The amendment was agreed to.

The next amendment was, in paragraph 358, page 111, line 12, after the word "crosses," to insert "except plates and mats of dog and goat skins," and in line 14, before the words cent," to strike out "40" and insert "35," so as to read:

Manufactures of furs, further advanced than dressing and dyeing, when prepared for use as material, joined or sewed together, including plates, linings, and crosses, except plates and mats of dog and goat skins, and articles manufactured from fur not specially provided for in this section, 35 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 358, page 111, line 16, after the word "which," to strike out the word "fur" and insert "hides or skins of cattle of the bovine species, or of the dog or goat"; in line 17, to strike out "is" and insert "are"; and in line 18, before the words "per cent," to strike out "50" and insert "15," so as to read:

Articles of wearing apparel of every description partly or wholly manufactured, composed of or of which hides or skins of cattle of the bovine species, or of the dog or goat are the component material of chief value, 15 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 358, page 111, line 18, after the words "ad valorem," to insert:

Articles of wearing apparel of every description partly or wholly manufactured, composed of or of which fur is the component material of chief value, not specially provided for in this section, 45 per cent ad relevant ad valorem.

The amendment was agreed to.

Mr. SMOOT. I desire to call the attention of the Senator in charge of this schedule to what I consider a defect in this paragraph in that it does not provide a rate for furs which have been dressed and dyed and have also been further advanced, but not so far as to make them dutiable as manufactures of fur. I have reference to fur skins which have been dressed, dyed, and prepared, so called. There is a great deal of litigation which has taken place on account of such a provision being absent from the present law. The customs court hold such furs dutiable and classify them as nonenumerated articles, was in the case of United States against Burkhardt.

If the Senator having this part of the bill in charge desires time to consider it, I have no objection to having the paragraph passed over, but I believe if he does give it consideration he will certainly provide for that class of skins. If not, I think there is not any question but that they will come in the future as nonenumerated articles, the same as they are doing to-day under the present law, not being specifically mentioned or

provided for.

Mr. HUGHES. Does the Senator refer to the words "manufactures of furs, further advanced than dressing and dyeing,

when prepared for use as material"?

Mr. SMOOT. Those are manufactures of furs. These are not Mr. SMOOI. Those are manufactures of furs. These are not manufactures; they come in between the dressing and the manufacture. For instance, furs come in here repaired, and that was the particular case I had reference to. The claim was made that they were dressed furs, as they had been repaired. The customs court held that they did not fall under dressed furs nor did they fall under the manufacture of furs, but they held in that they fall under the manufacture of furs, but they held in that case that they fell under the nonenumerated articles.

Mr. HUGHES. What language does the Senator suggest? I have not prepared the exact wording, but if Mr. SMOOT. the Senator will let the paragraph go over I will frame it in a

very few minutes and hand it to him.

Mr. HUGHES. I will be very glad to do so. I ask that this paragraph may go over. I wish to make a further suggestion in connection with the last two lines of the paragraph. Let the entire paragraph go over for the present.

The PRESIDING OFFICER. The Senator from New Jersey requests that the paragraph go over for the present. There

being no objection, such course will be taken. The reading of the bill was continued.

The next amendment was, in paragraph 361, page 112, line 3, after the word "raw," to strike out "uncleaned and not drawn, so as to read:

Human hair, raw, 10 per cent ad valorem.

Mr. SMOOT. I notice that in striking out the words "uncleaned and not drawn" the idea is to have human hair, raw, at 10 per cent.

Mr. HUGHES. I will say to the Senator that we had extensive hearings on this paragraph and at the hearings the examiner at the port of New York was present and explained at great length the technical side of this business.

Mr. SMOOT. What I was going to say to the Senator is that brair not drawn under the bill is made to depend upon a

commercial designation.

Mr. HUGHES. Yes. I will explain the situation. The hair is sometimes cut from the head, in which case nothing further is done with it as raw hair, but if the hair is picked up from the floor, from sweepings, it is necessary to treat it in order that it may be conveniently handled, but it is not drawn in the commercial sense. When hair is commercially drawn the process is something like this: They drop it in a tub of water for a certain length of time and allow all the roots of the hair to come to the top, so it may be uniform at the base. The hair is then taken out and it is drawn. Sometimes raw hair as the first product is laid in more or less uniform lengths in order to make it convenient to handle in shipment. It has been heretofore classed as drawn hair, whereas as a matter of fact it was It was raw hair that had to be afterwards drawn. otherwise.

Mr. SMOOT. The Senator's understanding is exactly the same as mine in that particular. All I wanted to know was whether it was the intention to have hair drawn to depend upon

the commercial designation as it is known to-day.

Mr. HUGHES. That was our intention.

The amendment was agreed to. The next amendment was, in paragraph 361, page 112, line 5, before the word "drawn," to insert "commercially known as," and, after the word "drawn," to strike out the words "wholly or in part," so as to read:

If cleaned or commercially known as drawn, but not manufactured, 20 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 361, page 112, line 6, after the word "hair," to insert "including nets and nettings,"

Manufactures of human hair, including nets and nettings, or of which human hair is the component material of chief value, not specially provided for in this section, 35 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was continued.

The next amendment was, in paragraph 364, page 112, line 19, before the words "per cent," to strike out "40," and insert "45," so as to make the paragraph read:

364. Hats, bonnets, or hoods, for men's, women's, boys', or children's wear, trimmed or untrimmed, including bodies, hoods, plateaux, forms or shapes, for hats or bonnets, composed wholly or in chief value of fur of the rabbit, beaver, or other animals, 45 per cent ad valorem.

Mr. BRANDEGEE. I move to amend the committee amendment by striking out "45," before the words "per cent," in line 19, and substituting in lieu thereof the numeral "50," so that it will read "50 per cent ad valorem."

Mr. President, this hat industry is one of great importance in several States of the Union, and especially in the State of Connecticut. There are many factories manufacturing fur-felt hats in the cities of Danbury, Bethel, Norwalk, and other cities and towns in my State.

This subject has been before Congress several times. Extensive hearings were held upon this paragraph, I remember, at the time the Payne-Aldrich bill was passed. This industry is not in any sort of a trust or combination. It is not an industry that makes any great amount of money.

I wish to call the attention of the Senate to the statement made by Mr. James Marshall, of Fall River, Mass., before the Committee on Finance on this paragraph. He states:

I represent manufacturers who are not going to run away from this thing. The very last thing on earth we will think of doing is going down with this or shutting down factories. We are going to make a fight as hard as we know how. We are at the present time running short time. We will continue to run short time. It is the only item, I think, of the whole 4,000 that shows a constant advance of importations in the last 10 years; I mean by that, year after year a steadily increasing advance.

When I was before the committee four years ago there were only 20,000—

He means 20,000 dozen-

this year there were 55,900 came in. That does not look like much, but we figure it about 5 per cent. If that doubles in the next three years, as it has in the last three, it will be 10 per cent duty. If you cut that some more, as they have done, it is only just a question of time until they have the home market. We depend on the home market; we can not export. The people in the open-door countries, like China, India, and Africa, wear fezes or turbans or something of that kind, as a part of their religious beliefs. The other countries have prohibitive tariffs, with the exception of England. All of our material originates abroad. There is not a solitary thing we use but what originates over there, and we get it with that \$1.84 against us in material alone before we start to manufacture, as against the foreigner. We can not help it, He has his first choice, and we have to pay a certain amount of revenue.

Senator SIMMONS asked him the following question:

Senator Simmons asked him the following question:

Have you specified the foreigner who causes you the most trouble in competition?

Mr. Marshall. I have not specified him in my brief, because I wanted to be fair about it. I took Great Britain, where they have union labor, and the union does as they have in this country, where they agree on prices each year over there as they do here. About the 1st of May they agree on a schedule of prices. The hat that causes us the most trouble comes from Austria and Italy. But I did not specify them. I also obtained in Great Britain their schedule of prices that is printed, that is agreed upon between the masters and the men, and so there is no question as to my figures in that respect. It states throughout there that all minimum bills or prices shall be based on 32 to 36 shillings a week for 36 hours, or \$8 to \$9 a week. From time immemorial it has always been piecework prices in the hat business—so much a dozen. The English price all through this little book is so much a dozen. The American union specifies there shall be \$22 a week for 50 hours. Just those two items show a difference between the two hats I exhibited. If you go back to Austria and Italy you will have a still greater difference. But it was not necessary. The case was amply proved without doing that, being absolutely fair.

Fortunately for us, the whole thing was divided into brackets—

He is speaking of the House bill—

He is speaking of the House bill-

and one of the reasons they gave for not giving us more duty was that some of those brackets were omitted. For instance, there were only a few \$4.50 hats came in. As a matter of fact, there were no fur-felt derbies at \$4.50—

He means per dozen, of course-

They showed under that bracket 68 per cent. Hats ranging in value from \$4.50 to \$9 showed 58 per cent. Hats ranging in value from \$9 to \$18 a dezen showed 50 per cent. Then hats ranging from \$18 upward a dozen showed 48 per cent. We wanted to be fair; we wanted the Democratic Party, we wanted ourselves, to be on record as saying that the hats that were a necessity of life could be reduced. We were

perfectly willing to have a reduction on every one of those brackets, on the hats at \$18 and above, because for that hat, when it is landed here, the average price under that clause was \$25 a dozen.

I have skipped some of the Senator's questions in order to consolidate this into Mr. Marshall's testimony. He proceeds:

Fifty per cent would have been perfectly fair-

That, by the way, Mr. President, is the amount that I have proposed to substitute for that named in the committee amend-

that is, reducing it from 68 and 58 down to 50 would have been fair. But we also ask 50 on the other.

He states in another place:

It is the old story of running in multiples of 50, \$1, \$1.50, \$2, \$2.50, and if you reduce to the retailer 10 cents a hat, you are never going to get him to drop. That is all that happens, and the result would be the in-between man, the retailer or the jobber, will simply absorb that, and nobody gets anything.

Mr. President, I read from the brief filed before the Committee on Finance, as follows:

Under these circumstances, and particularly as the industry has been crying for work for the past two or three years, and the importations have been doubling in the meantime, we desire to know why we deserve a cut under Democratic platform and Democratic promises.

Importations of fur-felt hats for fiscal years ending-1905-1906-8, 143 14, 536 19, 194 21, 892 32, 714 42, 940 46, 009 55, 311 1908____ 1909____ 1910____ 1911____ 1912___

First quarter of 1913 shows 24,065 dozen; at this rate the fiscal ear will show 96,000 dozen.

Doubling every four years does not require much of a mathematician of figure where American manufacturers are coming out.

From 1909 on is the present tariff.

Almost 600 per cent increase in 10 years.

In the importations, he means,

At the time of the Payne-Aldrich bill, in order that there might be no question concerning the actual cost of labor at home and abroad, we sent abroad at great expense the very best expert we could find, having with him letters of introduction from the then Secretary of State, the Hon. ELIHU ROOT, to the various United States consuls, and his orders were, having ascertained exact condition and prices in each hatting district, to then go to the nearest United States consul and have them verified, so there would not be the slightest question about them.

them.

This he did, visiting the consul in Manchester, in Paris, in Milan, and we present to you the following comparison of the average popular-priced hat, the one selling at retail for \$2.

These prices have not varied greatly in the last four years, and we have brought them right down to date.

Mr. President, I ask leave to insert, without reading, the tables, which I shall hand to the Reporter, marked.

The PRESIDING OFFICER. There being no objection, the

request is granted.

The tables referred to are as follows:

	Foreign hat made in England and deliv- ered in the United States, duty, etc., paid, at \$14.40 a dozen net.	American hat sold at \$16.50 per dozen, less trade dis- count of 10 per cent, or \$14.85 per dozen net.
Material: Fur. Leather Band and binding Satin. Shellac. Alcohol. Dyestuff Chemicals Wire Boxes and cases. Miscellaneous	.53 .50 .37 .18 .07 .03 .06	\$1.98 .80 1.07 1.10 .40 .18 .09 .04 .06 .70
Labor Overhead charges	4, 59 2, 74 - 40	6.64 7.23 .61
Factory eost	7.73	14. 45

SUMMARY OF THE CHANGES THAT THE NEW HOUSE BILL MAKES FOR

Changes against us: This grade of hat received 58 per cent ad valorem. The new bill allows 40 per cent. This, therefore, reduces us 18 per cent on \$9 per dozen, or a total of \$1.62.
Changes in our favor: They have reduced the item of fur 5 per cent, making a difference of 9 cents per dozen.
Reduced the item of band and binding 10 per cent, making a difference of 5 cents per dozen.
Reduced the item of satin 10 per cent, making a difference of 5 cents per dozen.
All the other items remain the same, so it makes a total in our favor of 19 cents.

#### SCHEDULE N-PARAGRAPH 364

Hats, bonnets, or hoods, for men's, women's, boys', or children's wear, trimmed or untrimmed, including bodies, hoods, plateaux, forms or shapes for hats or bonnets composed wholly or in chief value of fur of the rabbit, beaver, or other animals.

1910		Quantity.	Value.	Duties.	Foreign value per dozen.	Duty reduced to actual ad valorem.
1910	per dozen and 20 per cent: 1910	0.149	. 068	. 044	3. 15	Per cent. 65 68 63
1910	1910	15. 308	120, 696	70.064	7.88	57 58 58
1910. 8. 646   221. 898   104. 901   25. 66   1911   10. 261   258. 040   123. 438   25. 15	1910	15. 410	215.098	120. 671	13.95	59 56 56
	1910	10, 261	258. 040	123. 438	25. 15	47 48 48

You will note that the first two brackets, the foreign value of which is from \$3 to \$8 per dozen, could be called necessities of life.

The last two paragraphs, the foreign value of which is from \$12 to \$25, with the duty added—these could not be sold at retail at less than \$3 to \$6 per hat, and are a luxury, not a necessity.

# Mr. BRANDEGEE. The brief continues:

Particular attention is called to the second bracket, from \$4.50 to \$9, showing that at an ad valorem of 57 per cent to 58 per cent the importations still come in, in practically the same volume, year after year, showing that this is exactly where the balance between ourselves and the foreigners comes in, and where we would have an equal chance

and the foreigners comes in, and where we would have an equal chance to compete.

Particularly note that when the ad valorem goes under 55 per cent the volume increases very rapidly.

Now, what we claim is, by reducing all of it to 55 per cent would be cutting down the tariff on articles of necessity, retaining it on articles of luxury, and giving us an opportunity to compete on the better grades. Therefore, we feel that 55 per cent is the very least that could be given us under a scientific revision.

Mr. President, as I have said, these hat factories employ many thousands of laborers in my State. The testimony here is that they are not paid large rates of wages, but they are paid much more than are the people with whom they are competing in other countries; they are paid all that the industry can afford to pay them under the present circumstances.

It is going to be a great calamity for all those people and to the capital invested in those industries to handicap them further. From what I know personally of the situation there and from what has been placed before the committee here, it seems to me to be apparent that this industry is merely struggling along. I do not think any useful purpose will be served in this country by giving them another push, thus submerging them and putting them out of business. They testify that even now, under the present rate of duty, they are only running on

They do not make anything that could be regarded as a threat in attempting to influence this legislation by saying that they are going to shut down their factories. On the contrary, they say that they will make the best fight they can to struggle along and try to keep going. Of course, they will have to go on even shorter time, as they say, than they now do. I do not see what good is to come from closing up these industries and placing us entirely in the hands of the foreigners who are now producing these articles. Of course, the minute the foreigners get the market we shall be absolutely subject to them and their demands, and it takes more credulity than I am possessed of to believe that they will not immediately raise the prices of these articles, so that the consumer in this country, instead of having a domestic competitor competing with the foreigner, will be absolutely at the mercy of the foreign producer. I do not think that would be wise or good policy. Therefore I have offered that would be wise or good policy. Therefore I have offered the amendment which I have sent to the desk, and which I hope

will receive some consideration at the hands of the Senate.

Mr. HUGHES. Mr. President, I can not imagine the Senator from Connecticut is serious in reference to this amendment. I feel sure that if he has given this subject the investigation that it is entitled to be must know that the rate in the pending bill is perfectly satisfactory to the hat manufacturers.

I agree with a great deal of what the Senator has said. This is one industry-one of the very few industries-in this country in which the protection, whatever it may be, is handed down to the operatives. That is largely brought about by the

fact that the operatives do not compete to any extent one with the other; the rate of wages is fixed; and, so far as industrial conditions are concerned, the hat operatives are as well off as any body of operatives in the United States.

It is true that whims and caprices of fashion affect this trade and cause violent fluctuations in its condition, and the habit, which is growing up in this country, as it has already overspread England, of wearing cloth caps has brought the manufacturers and operatives engaged in the manufacture of fur-felt hats upon hard times. That is not due, as the Senator must know, of course, to importations, because I remember making a calculation in 1912, as I recollect it; I turned the dozens into units and found that there were only 600,000 hats of this kind in all imported into the United States; and they could be easily accounted for by the number of men who insist upon wearing imported hats regardless of what the tariff duty may be.

I was in favor of leaving this duty fairly high for the reason, as I have said, that if there is any protection in it it is handed down-in my judgment there is not any protection in it-and for the reason that the manufacturers themselves are competing most keenly one with the other, the rate of wages is fixed, and the price of most of the material is the same to one as it is to another. So it comes down to the question of the ability to turn out a good article.

A 45 per cent duty upon the hats that do come in and will come in is, in my opinion, not too much. I am satisfied, and I believe that those who are interested in the business are satisfied, that this rate of duty will do nothing to interfere with the success and the prosperity of the manufacturers of fur-felt hats in this country.

Before I close, I will say that half the hats which were imported last year came in at a duty of 48 per cent, while the average duty was 51 per cent. I assure the Senator from Connecticut that there is nothing in this rate that will disturb anybody who is interested in this industry.

Mr. LODGE. Mr. President, I merely desire to say that the argument of the Senator from Connecticut [Mr. Brandegee] has covered the question raised as to this paragraph so thoroughly that I have no desire to attempt to duplicate it. One of the largest factories producing this class of goods is in my State, at Fall River. All that the Senator from Connecticut and the Senator from New Jersey [Mr. Hughes] have said in regard to the industry is absolutely accurate as to its condition. There is very severe domestic competition; the importation of foreign hats is increasing; and the development of the cloth hat makes the struggle for the business more severe than ever. I was informed by an officer of the Hatters' Union when he was here representing the hatters throughout the country, that the men employed in the industry within the last year had not been making, on an average, over \$7 a week, owing to short time and the shutdowns which had come from the depressed condition of the business. Under those circumstances I think a reduction of duty on this particular industry is extremely likely to bring more hardship; and I wish that the rate of duty could be raised. I do not suppose that is possible, but I think it should be raised.

Mr. PENROSE. Mr. President, I desire to simply concur in what the Senator from Massachusetts [Mr. Lodge] and the Senator from Connecticut [Mr. Brandegeer] have stated. This industry is very generally carried on all over the eastern part of the United States. Numbers of these hatters are located in eastern Pennsylvania. They are a very thrifty, deserving class of people. They are small industries, and there is no suggestion of any combination or trust among them. There is absolute competition among the American producers, and I do not know of any industry that is more worthy of encouragement by the American Congress than the hat industry. The representatives of the industry were down here four years ago in very great numbers, as all Senators who were then here will recall, and presented a case which appealed most strongly to the then majority of this body. As the Senator from Massa-chusetts has said, their industry is steadily being encroached upon by foreign-made hats of different material and different make, and I have grave apprehension if this paragraph passes, and I expect it will, that these deserving workers will suffer materially

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Connecticut [Mr. [Putting the question.] By the sound, the noes BRANDEGEE]. seem to have it.

Mr. HUGHES. I ask for the yeas and nays. The PRESIDING OFFICER. The Senator from New Jersey asks for the yeas and nays.

Mr. HUGHES. I withdraw the request.

The PRESIDING OFFICER. The Senator from New Jersey withdraws the request. The noes have it, and the amendment is rejected. The question recurs on the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 366, page 113, line 15, before the word "pearls," to "imitation," so as to make the paragraph read :

insert "imitation," so as to make the paragraph read:

366. Jewelry, commonly or commercially so known, valued above 20 cents per dozen pieces, 60 per cent ad valorem; rope, curb, cable, and fancy patterns of chain not exceeding one-half inch in diameter, width, or thickness, valued above 30 cents per yard; and articles valued above 20 cents per dozen pieces designed to be worn on apparel or carried on or about or attached to the person, such as and including buckles, card cases, chains, cigar cases, cigar cutters, cigar holders, cigarette cases, cigarette holders, coin holders, collar, cuff, and dress buttons, combs, match boxes, mesh bags and purses, millinery, military, and hair ornaments, pins, powder cases, stamp cases, vanity cases, and like articles; all the foregoing and parts thereof, finished or partly finished, composed of metal, whether or not enameled, washed, covered, or plated, including rolled gold plate, and whether or not set with precious or semiprecious stones, pearls, cameos, coral, or amber, or with imitation precious stones or imitation pearls, 60 per cent ad valorem. Stampings, galleries, mesh, and other materials of metal, whether or not set with glass or paste, finished or partly finished, separate or in strips or sheets, suitable for use in the manufacture of any of the foregoing articles in this paragraph, 50 per cent ad valorem.

The amendment was agreed to.

The amendment was agreed to.

Mr. LODGE. Mr. President, in connection with paragraph
366 I should like to ask the Senator in charge of this schedule whether as this paragraph is worded, taking it in conjunction with paragraph 169, it will not throw a large number of the articles which this paragraph makes dutiable at 60 per cent into paragraph 169, which is the basket clause of the metal schedule, at 50 per cent?

The portion of paragraph 169 to which I refer reads as

169. Articles or wares not specially provided for in this section, if composed wholly or in part of platinum, gold, or silver, and articles or wares plated with gold or silver, and whether partly or wholly manufactured, 50 per cent ad valorem.

Would it not be better to have a separate paragraph covering those articles, making it conform to paragraph 366?

Mr. HUGHES. My information is that the word "jewelry" properly differentiates those two paragraphs.

Mr. LODGE. Undoubtedly "jewelry" does; but further on in the paragraph there is mentioned a large number of articles, the paragraph providing:

All the foregoing and parts thereof, finished or partly finished, composed of metal, whether or not enameled, washed, covered, or plated, including rolled gold plate.

That is, all such articles or parts thereof which are plated are covered in paragraph 366 by a duty of 60 per cent, and yet paragraph 169 provides:

Articles or wares plated with gold or silver, and whether partly or wholly manufactured, 50 per cent ad valorem.

Mr. HUGHES. So far as any danger of conflict between these paragraphs is concerned, I think that will be controlled by the word "jewelry." Paragraph 366 begins:

Jewelry, commonly or commercially so known.

The committee considered the question which has been raised, and came to that conclusion.

Mr. LODGE. It is quite possible that the Senator is correct in his interpretation, but it seems to me that it is better to remove the ambiguity beforehand rather than to leave an opening for controversy as to whether one paragraph or the other controls. I merely desired to bring to the attention of the committee the question whether it would not be better to make a separate paragraph covering articles plated with platinum, gold, or silver instead of putting them in the basket clause of the metal schedule. Why not make them conform more accu-

rately with paragraph 366?

Mr. HUGHES. My judgment, so far as the investigation I have made is concerned, is that it is not necessary. I shall be glad to consider any language the Senator desires to submit; but the advice I have received from those in charge of the administration of the law and who are administering the law is that the present language is clear enough, and that there will be no practical difficulty in the way of administering the law

as proposed.

Mr. LODGE. That may be so. The change I have proposed would not alter the intent of the bill in the least, but would only make it clear.

Mr. HUGHES. Has the Senator suggested any change in

language?

Mr. LODGE. I would simply form a new paragraph, to be known as paragraph 1684, covering articles composed wholly or in part of platinum or of gold, or else take those articles out of paragraph 169 and put them in paragraph 366.

I desire, Mr. President, in this connection to have printed in the RECORD the letter which I send to the desk.

The VICE PRESIDENT. In the absence of objection, permission is granted.

The letter referred to is as follows:

ATTLEBORO, MASS., March 29, 1913.

The letter referred to is as follows:

ATTLEBORO, MASS., March 29, 1913.

Hon. Henry Cabot Lodge,
Senate Chamber, Washington, D. C.

Dear Sir: We respectfully and urgently solicit your careful consideration of the proposed treatment of the duty upon jewelry and novelties in the forthcoming tariff law, and trust we may rely upon your support and cooperation in our efforts to maintain the present rates.

As is well known, these rates are 60 per cent on gold and platinum jewelry and 85 per cent on other classes of jewelry. Furthermore, one of the two briefs filed with the congressional Committee on Ways and Means petitions Congress to take out of the "catch-ail" paragraph of the metal schedule the words "gold," "silver," and "platinum," and to form a new paragraph, carrying a rate of 60 per cent in the said schedule, exclusively for manufactures of gold, silver, and platinum, not specially provided for in any other paragraph of the act.

Our committee is also applying for a new draft of the jewelry paragraph, in order to avoid improper classifications.

Any change in the present absolutely necessary rates of duty on jewelry can not help but hurt the industry, not only the individual manufacturers engaged therein, but also the employees and all those directly or indirectly connected therewith. A reduction of duty on the product of our factories would read this astrously to this business, which is very largely centered in Providence, R. I., and the Attleboros, and is made up of a considerable number of individual concerns, no large corporations nor any semblance of a combination of any sort, with prosperous employees, most of them owning their own homes and earning large wages, as a result of their individual initiative and skill, which are given a peculiar opportunity for development in this particular business.

Any lowering of the present rates would mean an influx of foreignmade goods, already, indeed, much in evidence, made under conditions and at a wage that our employees would not tolerate or could not live u

made goods, already, indeed, much in evidence, made under conditions and at a wage that our employees would not tolerate or could not live upon.

We particularly call your attention to the condition which to-day prevails in the manufacturing jewelry centers of Germany, such as Pforzheim, Hanau, and others, as compared with 10 years ago. Within that period German manufacturers have sent their young men to the United States, who have obtained positions as workmen in our factories, thoroughly familiarized themselves with American methods and machinery, which has resulted in a complete reorganization of their home factories—better described by the word "Americanized"—which with their cheap labor to-day places the American manufacturer, particularly of gold-filled goods, in a position where it would be absolutely impossible to compete successfully in our market with the German manufacturers without the present protective duty on this class of goods.

This statement of the situation can be readily corroborated by any competent person who has visited the jewelry centers of Germany and Austria within the past decade.

Your earnest and thoughtful attention is invited to this, and we hold ourselves ready to furnish you with any specific data relative to our industry that you may be interested to obtain.

R. F. Simmons Co.,
By H. E. Sweet.

R. F. SIMMONS Co., By H. E. SWEET.

Mr. WEEKS. Mr. President, I want to add merely a word to what my colleague [Mr. Lodge] has said. In the administration of the present law, owing to considerable ambiguity, many of the articles which were supposed to bear 85 per cent duty have been brought in under the 45 per cent rate. It is of vital importance to the manufacturers, the reduction having been made from 85 per cent to 60 per cent, that they in all cases obtain at least that rate of duty. In many cases 85 per cent or more than 85 per cent of the cost of jewelry covered by this paragraph is labor, and a duty of 60 per cent is little enough to give the manufacturers of this class of jewelry the protection which would enable them to continue their business. It would be a very perilous thing, from the standpoint of the manufac-turers of this character of jewelry, if the appraisers should decide that any part of it should only bear a 50 per cent rate.

Mr. HUGHES. I assure the Senator that, so far as jewelry

is concerned, there can be no question about it. The words "jewelry, commonly or commercially so known," are about as

perfect a designation as the mind can conceive of.

Mr. WEEKS. There are a great many things which seem to me to be perfectly clear and undoubtedly would seem perfectly clear to the Senator from New Jersey and to the Senate as a whole, but when such matters are brought before the administrative officers, decisions are sometimes made which do not conform with the intent of the law. I hope the committee will give this paragraph sufficient additional attention so that they may be sure that the class of articles covered by it will receive the 60 per cent duty which the paragraph carries.

Mr. JOHNSON. Mr. President, I will simply say to the Senator from Massachusetts that this very question was raised before our subcommittee. We had before us officers charged with the administration of the law, and this very question was discussed. I should be glad to have the paragraph go back to the committee so that we may again consider it and make it more clear; but we thought that this language was sufficiently clear and precise to describe the articles which it was intended should bear the duty of 60 per cent. In our opinion there was no confusion with paragraph 169.

Mr. WEEKS. I am not prepared to say that it is not sufficiently clear to cover the articles intended to be covered, and yet I know that in the last three or four years there have been in dispute a great many of the articles included in the para-graph which have involved rulings of the appraisers, and it has been a great embarrassment to manufacturers, I hope this paragraph will be made clear beyond any possibility of controversy.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 367, page 113, line 24, after the word "process," to strike out "including glaziers' and engravers' diamonds not set, miners' diamonds," and on page 114, line 1, after the word "and," where it occurs the second time, to strike out "diamond dust" and insert "marine coral uncut and unmanufactured," so as to make the paragraph read:

as to make the paragraph read:

367. Diamonds and other precious stones, rough or uncut, and not advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, whether in their natural form or broken, and bort; any of the foregoing not set, and marine coral uncut and unmanufactured, 10 per cent ad valorem; pearls and parts thereof, drilled or undrilled, but not set or strung; diamonds, coral, rubles, cameos, and other precious stones and semiprecious stones, cut but not set, and suitable for use in the manufacture of jewelry, 20 per cent ad valorem; imitation precious stones, including pearls and parts thereof, for use in the manufacture of jewelry, doublets, artificial, or so-called synthetic or reconstructed pearls and parts thereof, rubles, or other precious stones, 20 per cent ad valorem.

The amendment was agreed to.

The amendment was agreed to.

Mr. SMOOT. Mr. President, the history of tariff rates upon diamonds, if repeated after the passage of this bill, will show a great decrease of revenue from cut diamonds. In a very few words I wish to call the attention of the Senate to some of the experiences in the past in trying to collect a duty of 20 or 25 per cent upon diamonds.

As far as I am personally concerned, I would not care if the rate were 100 per cent if it could be collected. But diamonds can be smuggled into this country very easily indeed, and if the rate exceeds 10 per cent the history of diamonds shows that they are smuggled into this country, and the Government is defrauded annually of many millions of dollars of revenue.

In 1891 the imports of diamonds were \$12,380,000, and the duty collected on them was \$1,238,000, or at the rate of 10 per cent ad valorem. In 1892 the imports of diamonds were \$12,131,000, and the duty collected was \$1,226,100, at the rate of 10 per cent ad valorem. In 1896, after the passage of the Wilson bill, with a rate on diamonds of 25 per cent, the importations fell to \$3,351,000, with a duty collected of \$750,000. 1897 there were but \$1,378,000 of diamonds imported upon which duties were collected, and the revenues had fallen to \$285,000.

Mark you that in 1891 the imports were \$12,380,000, and at a 10 per cent ad valorem rate there was collected revenue amounting to \$1,238,000. I have no doubt in my mind that if we impose a rate of duty of 20 per cent upon diamonds smuggling will immediately begin, and the honest merchant of this country who will not indulge in smuggling will be compelled to purchase his diamonds from the smuggler rather than from the foreign merchant. If that is not the case, then 20 per cent duty on cut diamonds is not enough. If the rate has no relation to the amount of importations into this country, and does not affect at all the question of smuggling, it seems to me the very lowest rate we can consistently put upon diamonds is what we put upon other luxuries, or at least 50 per cent.

If I thought cut diamonds would be imported at the 20 per

cent rate, I should not hesitate a minute to vote for the rate, or, as I stated before, for a great deal higher rate. But the result of such a rate would be that the smuggling of diamonds would be immediately undertaken in this country, and those who desire to do a legitimate business would be compelled to purchase their diamonds of those who would smuggle them into this country, as they were compelled to do so in the past, when a rate of 25 per cent was imposed.

I know that there has been a great deal of sentiment manufactured in this country against the low rate on diamonds. I know that it has been held up to the American people that the present law imposes a duty of only 10 per cent upon diamonds, while woolen goods, which the people are compelled to wear, carry a duty five or six or seven times as great. There is not a Senator upon the other side of the Chamber who does not know that past experience has shown that whenever a rate of even 25 per cent has been imposed upon diamonds there has

been a systematic smuggling of diamonds into this country, and very little revenue has been collected by the Government from direct importations to men who have been trying to do a legitimate business.

Diamonds, rough or uncut, are now upon the free list in paragraph 555, while cut diamonds carry a duty of 10 per cent. The reasons for this were that experience has shown that 10 per cent is about the highest rate at which cut diamonds can be imported into this country and smuggling stopped. It seems

that a rate of 10 per cent will not justify the danger of being apprehended and the expense incident thereto; and the 10 per cent difference between cut and uncut diamonds is the difference between the cost of doing that work in this country and in a foreign land.

I predict now that if a duty of 20 per cent is imposed upon cut diamonds, immediately upon the passage of the bill a systematic smuggling of diamonds into this country will begin; and instead of the Government receiving an increase of revenue from importations of diamonds, there will be a decrease of revenue from those that are imported legitimately into this country.

I do not know that I care to say anything more at this time upon this subject. If I thought it would do any good to offer an amendment, I should offer one at this time. I am quite positive from our past experience, however, that it will not; and there-fore I shall content myself with the few remarks I have made upon the subject.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 368, page 114, line 12, after the word "Laces," to strike out "lace braids," and on line 14, after the word "whatever," to strike out "material" and insert "yarns, threads, or filaments," so as to read:

368. Laces, lace window curtains not specially provided for in this section, coach, carriage, and automobile laces, and all lace articles of whatever yarns, threads, or filaments composed.

The amendment was agreed to.

Mr. HUGHES. Mr. President, I ask that this paragraph may be passed over.

Mr. SMOOT. I was going to ask the same thing, Mr. Presi-

The VICE PRESIDENT. The paragraph will be passed over. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 115, to strike out paragraph 369, in the following words:

369. Chamois skins, 15 per cent ad valorem; planoforte, planoforte action, and glove leathers, 10 per cent ad valorem.

And to insert in lieu thereof the following:

369. Seal, sheep, goat, including lamb and kid skins, calfskins, and other skins and leather dressed and finished, including patent, japanned, varnished, or enameled leather, not specially provided for in this section, and not for boot or shoe manufacturing purposes, chamois skins, planoforte, planoforte action, glove leather, enameled upholstery, automobile or furniture leather, 10 per cent ad valorem: Provided, That leather cut into forms suitable for conversion into manufactured articles not specially provided for in this section shall be subject to a duty of 15 per cent ad valorem.

Mr. SMOOT. Mr. President, I have just sent word to the Senator from Vermont [Mr. Page], who desires to submit a few remarks upon this paragraph. I shall be glad if it may be passed over temporarily, without action, until he can arrive.

Mr. HUGHES. I understand it is desired to pass it over only temporarily, until the Senator from Vermont returns?

Mr. SMOOT. Yes. We can revert to it just as soon as the Senator arrives in the Chamber.

Mr. HUGHES. Very well; I shall be glad to have that done. The VICE PRESIDENT. Paragraph 369 will be temporarily

passed over.

The reading of the bill was resumed.

The next amendment was, in paragraph 370, page 116, line 8, after the word "leather," to insert "or parchment"; in line 9, after the word "leather," to insert "or parchment"; in line 11, after the word "section," to insert "30 per cent ad valorem"; after the word "section," to insert "30 per cent ad valorem"; in line 12, before the word "the," to strike out "all "and insert "any of"; in the same line, after the word "foregoing," to strike out "whether or not"; in line 14, after the word "and," to strike out "similar" and insert "other"; in the same line, after the word "sets," to insert "of articles of utility"; and in the same line, before the words "per cent," to strike out "30" and insert "40," so as to make the paragraph read:

370. Bags, baskets, belts, satchels, card, cases, pocketbooks, iewel

and insert "40," so as to make the paragraph read:

370. Bags, baskets, belts, satchels, card cases, pocketbooks, jewel boxes, portfolios, and other boxes and cases, made wholly of or in chief value of leather or parchment, not jewelry, and manufactures of leather or parchment, or of which leather is the component material of chief value, not specially provided for in this section, 30 per cent ad valorem; any of the foregoing permanently fitted and furnished with traveling, bottle, drinking, dining or luncheon and other sets of articles of utility, 40 per cent ad valorem.

Before final action is taken upon this paragraph I should like to ask that it may also be passed over temporarily until one or two Senators who wish to say something about it can arrive.

Mr. CLARK of Wyoming. I wish to call the attention of the

The VICE PRESIDENT. Does the Senator object to having the committee amendment first passed upon?

Mr. CLARK of Wyoming. No; except that I simply wish to call the attention of the Senator from New Jersey to a matter

that might be considered at the same time; that is, in line 14, page 116, whether the word after the word "luncheon" should not be "or" instead of "and." The word "and" indicates that the satchel, or whatever it is, shall be furnished with all these accessories. I suppose the intention is that it may be furnished with any of them.

Mr. HUGHES. "Dining, luncheon, and other sets"-is that

the Senator's suggestion?

Mr. CLARK of Wyoming. I think it should be "luncheon or

Mr. HUGHES. Yes; I think so, too. I think if we should strike out the word "or" and insert a comma, leaving in the word "and," that would make it all right.

Mr. CLARK of Wyoming. It depends, of course, upon exactly

what the committee means.

Mr. HUGHES. Then it would read: "Dining, luncheon, and other sets of articles of utility." Would that express the mean-

ing of the Senator?

Mr. CLARK of Wyoming. If that is the meaning that the committee wishes to express, all right; but with the word "and" there it strikes me that the accessories would include all these things-traveling, bottle, drinking, dining or luncheon and other sets. I suppose it was intended to be "or other sets.

Mr. HUGHES. Yes; I think that would improve it. I should like to have the committee amendment passed upon first.

The VICE PRESIDENT. The question is upon agreeing to

the amendment of the committee.

The amendment was agreed to.

Mr. HUGHES. I now move to strike out the word "or" before the word "luncheon" and insert a comma.

The VICE PRESIDENT. The amendment will be stated.

The Secretary. On page 116, line 13, after the word "dining," it is proposed to strike out the word "or" and insert a comma.

The amendment was agreed to.

Mr. HUGHES. Then, after the word "luncheon" and before the word "other" I move to strike out the word "and" and in-sert the word "or."

The VICE PRESIDENT. The amendment will be stated.

The Secretary. On page 116, line 14, after the word "luncheon," it is proposed to strike out "and" and insert "or."

The amendment was agreed to.

Mr. HUGHES. Does the Senator ask that this paragraph

may be temporarily laid aside?

Mr. SMOOT. The Senator from Vermont [Mr. Page] is now here. He can take up paragraph 369 now, I presume, and by that time we can pass upon this one.

Mr. HUGHES. I ask that we may return to paragraph 369,

which has been read.

Mr. PAGE. Mr. President, I simply wish to say that while perhaps the reduction of this duty to 10 per cent will not prove fatal to the leather interests they have made many appeals to me to see if I could not secure a change in the duty. No one knows about this matter better than the Senator from New Jersey [Mr. Hughes], who has given it a great deal of study. I have assured these gentlemen that I thought there was no possible chance of changing the schedule, and I do not know that I care to take the time of the Senate by moving to increase the duty from 10 to 15 per cent. I think if the Senator from New Jersey were left to exercise his own judgment he would say that ought to be done. Under the circumstances I rather think I shall not take up the time of the Senate by making any motion to amend in view of the fact that the Senator from New Jersey and myself have perhaps reached a fairly reasonable conclusion about the matter.

Let me, however, put myself on record now as saying that this duty of 10 per cent on seal, sheep, goat, and other skins prepared for pocketbooks and fancy leathers is going to work a great hardship upon the manufacturers of leather in the Senator's own State, especially the large concerns in Newark and in Jersey City. I wish he felt disposed to add 5 per cent to the duty; but I suppose it is useless to ask it.

Mr. HUGHES. I feel disposed to do it. [Laughter.]

Mr. PAGE. The Senator is so good-natured about it that I am going to make a motion that the duty be increased from 10 to 15 per cent, by striking out the numerals "10" on the first line of page 116, and inserting in lieu thereof "15." I ask the Senator from New Jersey to accept that amendment, if he

Mr. HUGHES. I will say to the Senator that it would be impossible for me to accept the amendment. I should feel much better about it if I could accept it. This represents the very best judgment of the committee on this question. I think

it is a fair solution of the very complex problem that presented itself to the committee.

The leather manufacturers undoubtedly are somewhat harshly treated by this bill, particularly the patent-leather manufacturers, but that was a necessary corollary to placing boots and shoes upon the free list. It happens, unfortunately for me, that a great many of these particular industries are located in my State; and I shall have to bear the burden, I suppose. I must say for the members of the committee that they were fair and did their best to arrive at a solution of this

very, very difficult problem.

We have arranged the language so that there will be a duty upon leather which enters into the manufacture of articles that are taxed, but when we went to the length of putting boots and shoes upon the free list, we could not, in conscience, leave a tax upon patent leather and other leathers that enter into the manufacture of boots and shoes. To that extent this para-graph is a discrimination against the makers of that leather.

Mr. PAGE. But I think the Senator from New Jersey will confess that everything that is included in this paragraph is in the nature of a luxury. None of this leather goes into boots and shoes. Leather for that purpose is especially ruled out by the language of the paragraph. I am not at this time attacking the provision with regard to making free the leather which enters into boots and shoes. This, however, is the class of leather that goes into pocketbooks and fancy bags, and things of that kind, that are used by the wealthy people of the country. I wish to say, in this connection, that the manufacturers have come to me and have shown me samples of leather which have been exhibited to them, manufactured in Scotland, and they have been assured that that leather could be delivered to them at a price which they say is less than they can make it for.

As the Senator from New Jersey knows, there is no more plucky set of men in this country than the leather men; and in spite of these things they say, "We shall not say that we are going out of business. We have our factories all in running order, and we are not going to play the baby act to the extent of saying that we are going to close our factories if you pass this bill; but we do say that you are inflicting upon us a damage which ought not to be inflicted, and which is not necessary, in order that you may carry out your idea in regard to free leather entering into shoes."

Mr. HUGHES. I will say to the Senator that, of course, as he is aware, we can not deal with this paragraph without taking into consideration the paragraph in the free list. I have received absolutely no complaint from the manufacturers of leather, so far as these classes of leather are concerned. I agree with the Senator from Vermont that there is no more plucky set of manufacturers in the United States than the leather manufacturers. I will say, too, that I believe they are the greatest leather makers in the world.

A glance at the exports of leather will show that despite the fact that a great many of the materials which enter into the production of their leather are taxed, and we were unable to find any way to free a great many of them from that tax, they are still able to compete in the markets of the world. I think an American citizen can say without boasting that they have overcome disadvantages of various kinds-legislative disadvantages-and they stand foremost to-day among the leather makers of the world. I have not the slightest doubt about their ability to go on under the provisions of this bill, but, as I said a while ago, I must admit, and every fair man must admit, that the manufacturers who are making leather that is put upon the free list and are still compelled to pay a tax upon a great many of the materials which go into the making of leather are discriminated against by this bill. I can not see any way to avoid it myself.

Mr. PAGE. I only wish to say that I expect to do no more

than enter a protest in behalf of these tanners. I must make that protest, I think, by moving the amendment I suggested. If desired, I will restate the amendment.

I move, on page 116, in the first line, to strike out "10" and insert "15" in place thereof.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Vermont to the amendment of the committee.

Mr. PAGE. I ask for the yeas and nays on the amendment. The yeas and nays were ordered.

Mr. ASHURST. I ask that the question may be stated. The VICE PRESIDENT. The Secretary will state the amendment to the amendment of the committee.

The Secretary. On page 116, line 1, in the committee amendment, it is proposed to strike out "10" and insert "15," so as to make it read "15 per cent ad valorem."

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. JACK-As he is not present, I withhold my vote.

Mr. SHEPPARD (when Mr. Culberson's name was called). My colleague [Mr. Culberson] is unavoidably absent. He is paired with the senior Senator from Delaware [Mr. DU PONT].

I ask that this announcement may stand for the day.

Mr. McCUMBER (when Mr. Gronna's name was called). My colleague is necessarily absent. He is paired with the junior Senator from Illinois [Mr. Lewis]. I wish this announcement to stand for the day, and upon each vote taken upon this schedule.

Mr. McCUMBER (when his name was called). general pair with the senior Senator from Nevada [Mr. New-LANDS]. I transfer that pair to the junior Senator from Cali-

fornia [Mr. Works], and will vote. I vote "yea."

Mr. PENROSE (when his name was called). I have a general pair with the senior Senator from Mississippi [Mr. WILLIAMS]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh], and will vote. I vote "yea." Mr. REED (when his name was called). I wish to inquire if the

senior Senator from Michigan [Mr. SMITH] will be present to-day? The VICE PRESIDENT. The Chair can not say as to that.

The Chair will say that he has not voted.

Mr. REED. I will withhold my vote, then, because I am paired with that Senator. If I were at liberty to vote, I should vote "nay."

Mr. MARTIN of Virginia (when the name of Mr. SMITH of Maryland was called). The senior Senator from Maryland is unavoidably absent from the city. He is paired with the senior Senator from Vermont [Mr. DILLINGHAM].

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). The senior Senator from Michigan [Mr. SMITH] is absent on important business. He is paired with the junior Senator from Missouri [Mr. Reed]. I desire this announcement to stand for the day.

Mr. THOMAS (when his name was called). I have a pair with the senior Senator from Ohio [Mr. BURTON]. that pair to my colleague [Mr. Shafroth] and will vote. I vote "nay."

Mr. TILLMAN (when his name was called). I have a general pair with the junior Senator from Wisconsin [Mr. Stephenson]. As he is absent, I withhold my vote. I ask that this announcement may stand for the day.

Mr. O'GORMAN (when Mr. Thornton's name was called). I wish to announce the unavoidable absence of the senior Sen-

ator from Louisiana [Mr. Thornton].
The roll call was concluded.

Mr. BANKHEAD. I have a pair with the junior Senator from West Virginia [Mr. Goff]. I transfer that pair to the senior Senator from Louisiana [Mr. Thornton] and will vote. I vote "nay."

Mr. HOLLIS. The junior Senator from Delaware [Mr. SAULSBURY] is absent on important business. He is paired with the junior Senator from Rhode Island [Mr. Colt]. I ask that

this announcement may stand for the day.

Mr. GALLINGER. I am requested to announce the pair of the senior Senator from Delaware [Mr. DU PONT] with the senior Senator from Texas [Mr. Culberson].

The result was announced—yeas 22, nays 46, as follows:

	YE	AS-22.		
Bradley Brandegee Clapp Clark, Wyo. Gallinger Jones	Kenyon Lippitt Lodge McCumber McLean Nelson	Oliver Page Penrose Penris Root Smoot	Sterling Townsend Warren Weeks

So Mr. Page's amendment to the amendment of the committee was rejected.

Mr. HUGHES. I wish to suggest a change in punctuation. In line 21, after the word "skins," I move to strike out the comma and insert a semicolon.

Mr. SMOOT. I wish to call the Senator's attention to the proposed amendment, striking out a comma and putting in the

semicolon

Mr. HUGHES. After the word "skins." I think that is where the Senator wanted to have it inserted, so as to read, and other skins; and leather dressed and finished."

Mr. SMOOT. I understood the Senator to say it was to come in after "skins" where it first occurs.

Mr. HUGHES. No.

The amendment to the amendment was agreed to.

Mr. HUGHES. In line 24, after the word "purposes," I move to strike out the comma and insert a semicolon.

The amendment to the amendment was agreed to.

Mr. HUGHES. In line 25, after the word "pianoforte," I move to insert "and," so as to read, "pianoforte and pianoforte action."

The amendment to the amendment was agreed to.
Mr. HUGHES. After the word "action" in the same line, I move to strike out the comma and insert the word "leather."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to. Mr. SMOOT. Referring to paragraph 370, I wish to call the attention of the Senator to the amendment offered by the committee in line 9, page 116, inserting the words "or parchment" after "leather." I have no objection to that amendment, but

I think the Senator will admit that by the addition of those words the same words ought to follow after the word "leather" in line 10, so as to read:

And manufactures of leather or parchment, or of which leather or parchment is the component material of chief value.

Mr. HUGHES. I agree with the Senator.

Mr. SMOOT. I will offer that amendment if the Senator will accept it.

Mr. HUGHES. I will accept it.
The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment of the committee was, in paragraph 372, page 116, line 21, to strike out "Men's, women's" and insert "Women's"; in line 24, after the word "pairs," to insert "additional," and after the word "each," in the same line, to strike out "additional," so as to make the paragraph read:

372. Women's or children's "glacé" finish, Schmaschen (of sheep origin), not over 14 inches in length, \$1 per dozen pairs; over 14 inches in length, 25 cents per dozen pairs, additional for each inch in excess of 14 inches.

The amendment was agreed to.

The next amendment was, in paragraph 373, page 117, line 1, after the word "other," to insert "women's or children's"; in line 3 to strike out "\$2" and insert "\$2.50"; in line 4, after the word "dozen," to insert "pairs additional," and after the word "each," in the same line, to strike out "additional," so as to read:

All other women's or children's gloves wholly or in chief value of leather, not over 14 inches in length, \$2.50 per dozen pairs; over 14 inches in length, 25 cents per dozen pairs additional for each inch in excess of 14 inches.

The amendment was agreed to.

The next amendment was, in paragraph 373, page 117, line 5, after the word "inches," to insert:

All men's leather gloves not specially provided for in this section, \$3 per dozen pairs.

The amendment was agreed to.

The next amendment was, in paragraph 374, page 117, line 11, after the word "silk," to insert the word "leather," so as to make the paragraph read:

374. In addition to the foregoing rates there shall be paid the following cumulative duties: On all leather gloves when lined with cotton or other vegetable fiber, 25 cents per dozen pairs; when lined with a knitted glove or when lined with silk, leather, or wool, 50 cents per dozen pairs; when lined with fur, \$2 per dozen pairs; on all piqué and prix-seam gloves, 25 cents per dozen pairs.

The amendment was agreed to.

The next amendment was to strike out paragraph 376, in the following words:

376. Harness, saddles, saddlery in sets or in parts, finished or unfinished, not specially provided for in this section, 20 per cent ad valorem.

And in lieu thereof to insert:

376. Manufactures of amber, catgut, or whip gut, or worm gut, including strings for musical instruments; any of the foregoing or of which these substances or any of them is the component material of chief value, not specially provided for in this section, 20 per cent advances.

Mr. SMOOT. I notice in paragraph 377, as it came from the House

Mr. PENROSE. That has not been read yet.

Mr. SMOOT. But that has reference also to what I am going to say.

In paragraph 377 catgut or whip gut or worm gut are placed by the House at a rate of duty of 10 per cent ad valorem.

The Senate committee has taken catgut or whip gut or worm gut from paragraph 377 and made a new paragraph, paragraph 376, and included those items, imposing a rate of duty of 20 per cent ad valorem. Can the Senator having the schedule in charge tell why that was done?

Mr. HUGHES. We discovered in our investigation that there was not any such thing, strictly speaking, as manufactured cat-Catgut is already a manufactured article. We found this rather peculiar situation of affairs. A musical-instrument string is brought in at a rate of duty as a manufacture of catgut, whereas as a matter of fact it is nothing but catgut itself, not being a manufacture at all.

Mr. SMOOT. The Senator will notice in the wording of the paragraph that it says "manufactures of" just the same as in

paragraph 377.

Mr. HUGHES. We did that in order to conform to the general notion as to what catgut is, but we provided for musicalinstruments strings at one rate of duty and we provided for surgeons' catgut and whip gut in the free list. I think we have improved the administration of the law so far as this article is concerned; we laid varying rates of duty in accordance with I think it is a distinct improvement over the old law.

Mr. SMOOT. It is an improvement perhaps as to the rate, but I want to know why there was an advance in the rate. The wording in both paragraphs is the same, because it says "manufactures of" and then enumerates the articles in both paragraphs, catgut, and whip gut, and worm gut.

Mr. JOHNSON. Mr. President, there are manufactures of catgut. Tennis rackets are made from catgut. That is one of the articles.

Mr. SMOOT. I do not make the statement that there are no manufactures because I have always understood that there are. What I wanted to know is why the rate was increased. The House provided for a rate of 10 per cent upon manufactures of catgut, worm gut, and whip gut, and now the Senate committee has made a change and increased that rate from 10 per cent to 20 per cent. All I wanted to know was why it was done. For what reason was it done?

Mr. JOHNSON. Manufactures of catgut, whip gut, worm

gut, and strings for musical instruments are in the same para-

graph.

Mr. HUGHES. The manufacture of it might be doubtful sometimes.

Mr. SMOOT. The words "including strings for musical instruments" are used. That is only an additional specification. The rate on whip gut, catgut, or worm gut is increased 10 per cent by the committee.

Mr. HUGHES. Tennis rackets, we understood, are made of catgut. That is information we had not learned that the House had. There are some other articles like that which will be covered by it.

Mr. SMOOT. Catgut has always been used in the manufac-

ture of tennis rackets. There is no doubt about that.

Mr. HUGHES. I do not want to be understood as sayingalthough I think I did say-that there is not any such thing as manufactured catgut. I meant that articles called catgut are not manufactured of catgut, but they are simply catgut. For instance, musical-instrument strings which heretofore have been regarded as a manufacture of catgut are catgut itself.

Mr. SMOOT. This language applies to manufactures of cat-gut also. We had the question up in 1909 and thrashed it out

very thoroughly.
Mr. HUGHES. I will say to the Senator that there is quite a difference between a musical-instrument string, a tennis racket, and articles of that sort, and catgut and whip gut used by surgeons. We have put one rate of duty upon the manufactures of strings and we have put catgut for surgeons on the free list.

Mr. SMOOT. If that was the intention of the Senators, they have absolutely missed it in the bill, because they specifically provide for the manufactures of catgut, whip gut, and worm gut, and then say "including strings for musical instruments." So all that means, of course, is not only that it shall include manufactures of every kind of catgut, but it shall include the strings for musical instruments.

Mr. HUGHES. I do not know whether I make myself clear

We struck out the differentiation for the reason I have stated, that it was found to be the practice at the ports to

charge one rate of duty for the commodity when it was entered as a musical-instrument string and another when it was entered as catgut.

Mr. SMOOT. The Senator certainly has provided just the opposite.

Mr. HUGHES. No: I think not.

Mr. SMOOT. Because it says here-

Manufactures of amber, catgut or whip gut, or worm gut, including strings for musical instruments.

They are all the same. They are 20 per cent ad valorem. Mr. HUGHES. Yes; "all manufactures of" will incl strings for musical instruments. Tennis rackets, if catgut is the component of chief value, and other articles made out of catgut may come in at 20 per cent, thus doing away with the difficulty we had in administering the law, which depended entirely upon the use that the commodity was to be put to after it came in. I think the Senator will see that now we have provided a rate for the manufactures of catgut, including musical-instrument strings, which will apply whether a man brings in a ball of catgut and intends to make tennis racquets or intends to make strings for musical instruments out of it. Then, to enable surgeons to get catgut, which up to the present time came in for that purpose at a low rate of duty, we provided that catgut

for that use should go on the free list. Mr. SMOOT. I remember that in 1909 there was a good deal of discussion in the Senate and considerable criticism against the then senior Senator from New Jersey for trying to increase the rate upon catgut, as it was produced largely in New Jersey. I thought I would call attention to the fact that the change had been made from the House provision of 10 per cent to 20 per cent upon this particular item. I wondered why the change was made.

as made. That is the reason why I asked the question.

Mr. JOHNSON. In view of what the Senator states, I will say that under the present law the duty upon musical-instrument strings is 45 per cent ad valorem. They are made of catgut.

Mr. SMOOT. But they are not the only things manufactured out of catgut.

Mr. JOHNSON. The House cut the rate down from 45 to 25 per cent.

Mr. SMOOT. The House cut the rate down to 10 per cent. Mr. JOHNSON. No; the House fixed the rate on musical instruments at 25 per cent, and we have cut it to 20 per cent.

Mr. SMOOT. I am talking of the great bulk of catgut that is manufactured in this country.

Mr. JOHNSON. When it comes to this country it is used for musical strings, is it not?

Mr. PENROSE. It is used for surgical purposes and for

medical purposes.

Mr. SMOOT. And tennis rackets. Mr. HUGHES. I will say to the Senator that we found that the catgut that is used ordinarily by surgeons can be put right on a fiddle, and that it can be made an E string and a G string on the cello, and can often be used for making tennis rackets. In the Payne-Aldrich law there is a duty as high as 45 per cent and a duty as low as 10 per cent and the rate charged depended upon what a man was going to use the catgut for.

Mr. SMOOT. I remember the rate is 40 per cent in the

present law.

Mr. HUGHES. Forty-five per cent.

Mr. SMOOT. And that applied only to stringed instruments. Mr. HUGHES. So far as the language of the law is concerned-

Mr. SMOOT. The other rate in the present law is 25 per cent. I notice that the rate on the manufacture of all catgut, whip gut, or worm gut under the amendment reported by the committee of the Senate is placed at 20 per cent instead of 10 per cent, as provided by the House in paragraph 377.

The amendment was agreed to.

The next amendment of the committee was, in paragraph 377, page 117, line 25, after the words "manufactures of," to strike out "amber," and in the same line, after the word "bladders," to strike out "catgut or whip gut or worm gut," so as to make the paragraph read:

377. Manufactures of asbestos, bladders, or wax, or of which these substances or any of them is the component material of chief value, not specially provided for in this section, 10 per cent ad valorem; yarn and woven fabrics composed wholly or in chief value of asbestos, 20 per cent ad valorem.

Mr. PENROSE. Mr. President, I desire to speak for a few moments upon paragraph 377. The paragraph itself and the amendment to it open up a vista that gives the Senate and the country an idea of the impartial way in which the measure has been framed.

As the Senator from Utah [Mr. Smoot] has said, four years ago-it is well known to every member of the Finance Committee on the then majority side, and they are all still Members of this body, although now in the minority-catgut and its cognate products were put on the dutiable list with an adequate duty largely at the request of the then Senator from New Jersey, Mr. Kean. It must be highly gratifying to the citizens of that great Commonwealth that they still have a representative in this body able, regardless of the Democratic theories of free trade and duties for revenue only, to preserve the important product of catgut and the manufactures thereof from the invasion of the manufactures of the pauper and oppressed labor of Europe.

At the same time while they deliberately saved catgut from impending ruin they calmly and deliberately leave asbestos and manufactures thereof at a duty of 50 per cent reduction from that existing in the present law.

Mr. SMOOT. And as to bladders.

Mr. PENROSE. I am not so much interested in bladders because I do not know where they are manufactured, but I do discover that Pennsylvania produces all but a very imperceptible amount of the manufactures of asbestos, and notwithstanding the fact that these two States adjoin, only having the river to separate them, catgut is saved and asbestos and the manufactures thereof are opened to ruin. Such is the logic of the bill. Both these industries are small, but they will doubtless go down to history as illustrative of Democratic consistency-New Jersey catgut saved, Pennsylvania asbestos and the manufactures thereof destroyed.

It has been suggested to me by a Senator sitting behind me that perhaps asbestos is better qualified to be damned.

ter.]

Even to-day the aggregate sales of all the asbestos textile mills in the United States producing yarns, fabrics, and other articles therefrom do not exceed \$2,000,000 annually, and the total capital invested in the industry is \$2,500,000. Of this, \$1,750,000 is

in Pennsylvania.

I suppose if these gentlemen had moved over into New Jersey last winter, when assurances were given that no legitimate inwas to suffer any serious injury, they might still have hoped to at least be kept on a parity with catgut and far removed from paragraph 377, where they unfortunately languish, and enjoy the full efflorescence of prosperity which will accompany paragraph 376.

Mr. HUGHES. I call the attention of the Senator from Pennsylvania, in order that he might not spoil his speech or

argument

Mr. PENROSE. I can not hear the Senator from New Jersey. and certainly could not understand all his explanations about

Mr. HUGHES. I call the Senator's attention, in order that he may not do his State an injustice, to the fact that the production

of asbestos, instead of being \$2,000,000, is \$12,000,000

Mr. PENROSE. I was talking about the manufacture of asbestos textiles, and I hope the Senator will not embarrass the unfortunate gentlemen who have failed to keep pace with catgut by making a technical objection of that kind. I dis-tinctly said that I referred to the textile manufactures in the present bill. As it came from the House the bill read:

Manufactures of amber, asbestos, bladders, catgut, or whip gut, or worm gut, or wax, or of which these substances or any of them is the component material of chief value, not specially provided for in this section, 10 per cent ad valorem; yarns and woven fabrics composed wholly or in chief value of asbestos, 20 per cent ad valorem.

Then the Senate committee takes out of the paragraph catgut or worm gut manufactured in New Jersey and leaves the Pennsylvania textile at the mercy of the inclemencies of next winter. The Payne law provided for the manufactures of amber, asbestos, bladders, catgut, whip gut, or worm gut, or wax, and so on, not specially provided for in this section, 25 per cent ad valorem. It reads:

Manufactures of amber, asbestos, bladders, catgut, or whip gut, or worm gut, or wax, or of which these substances or any of them is the component material of chief value, not specially provided for in this section, 25 per cent ad valorem; woven fabrics composed wholly or in chief value of asbestos, 40 per cent ad valorem.

Here I might call attention to the broad-minded patriotism of the Payne bill and the great virtues of its framers in that, with a breadth of patriotism, they took equally good care of the cat-gut of New Jersey and the asbestos textiles of Pennsylvania.

As applied to manufactures of asbestos, the above provision ritally affects two classes of commodities, namely, asbestos yarns and asbestos woven fabrics. The proposed new bill reduces the duty on woven fabrics from 40 per cent ad valorem to 20 per cent ad valorem and on yarns from 25 per cent ad valorem to 20 per cent ad valorem. All other manufactures of asbestos are reduced from 25 per cent ad valorem to 10 per cent ad valorem.

These reductions, in my opinion, Mr. President, are drastic. The industry is located in part in Lancaster County, Pa.; not far from Philadelphia. I am familiar with the conditions under l

which it is being conducted, and have known the circumstances and surroundings of this new industry for several years. These reductions will seriously handicap an industry comparatively new in this country without accomplishing any of the purposes of the measure under consideration. Surely it is not the intention of Congress to endanger invested capital, or at least such was the declaration prior to the election of last November, especially where the compensating virtue of general good or public benefit does not follow or the production of increased revenues will not result.

As a domestic industry the asbestos textile business is comparatively new and relatively small. Only within the last 10 years have its products become real commercial commodities. Even to-day the aggregate sales of all of the asbestos textile mills in the United States producing yarns and fabrics and other articles therefrom, as I have already stated to the Senate, do not exceed \$2,000,000 annually, and the total capital invested in the industry is \$2,500,000. Whether this investment of American capital compares with the dimensions of capital invested in New Jersey catgut, I am not informed [laughter], but certainly the discrimination exercised against this industry in favor of the other excites my sympathy, commiseration, and condemnation.

Of this investment fully \$1,750,000 is in Pennsylvania. It is a new industry on the threshold of development. To subject it to unequal competition from abroad will endanger its present

standing and retard its growth.

The maintenance of the present duty of 40 per cent ad valorem on woven fabrics and the placing of asbestos yarns in the same class will work no hardship against the common good. Reducing the duty will effect no general public benefit. The objections to existing tariff rates put forth by the advocates of the proposed bill do not apply against asbestos textiles. Principal among these objections are the following, which I will only refer to briefly:

How can it be seriously stated that a project the total sales value of which in a whole year does not exceed \$2,000,000 could have had any perceptible influence toward increasing the cost of living? Had the volume of sales been sufficient during the last 10 years to affect ultimate living costs, the influence would have been the other way, for prices have steadily declined instead of increasing, due largely to foreign competition; yet the increased cost of living is one of the first reasons given

for a lowering of present duties.

The development of industrial combinations or trusts is another reason advanced in favor of tariff reductions. There is no suggestion of a trust or combination in this small and in fant industry; there are approximately but eight domestic coz.cerns all told. Six of them are located in Pennsylvania, one in South Carolina, and one in New York. Surely the Finance Committee majority members must have forgotten that one of these concerns is located in South Carolina. Each is a separate corporation, with absolutely independent and varelated stock ownership, and all are in active competition with each other.

Exhaustion of the natural resources, unless a fresh supply is gained or curtailment of a domestic supply induced through importations from abroad, need not be feared, for the raw materials from which asbestos textiles are manufactured is not produced within the confines of the United States. It comes almost exclusively from Canada. The same country also supplies extensive quantities of crude asbestos to foreign manufacturers, and delivers it to them at the same prices at which American manufacturers can have the material laid down at their factories

Obsolete plants and methods of manufacture are practically unknown in this industry. As already stated, it is comparatively new. All of the plants are equipped with substantially the same kind of machinery, which is the most efficient yet devised for this work. Instances of machines or processes or plants in operation "60 years old" or "hopelessly behind the times," which ought to be relegated to the scrap heap, are not to be found. Domestic plants and processes are not only the most modern known to American manufacturers, but are as modern and efficient as those of foreign competitors. Consequently another favorite argument of the tariff revisionist is absent in this case.

The authors of the pending bill, Mr. President, say they have "kept in mind the distinction between necessaries and luxuries of life, reducing the tariff burdens on the former to the lowest possible point commensurate with revenue requirements and making the luxuries of life bear their proper portion of the tariff responsibilities.

I am not quite certain whether that quotation is from the last platform of the Democratic national convention or some equally authentic document; probably it may be a later message of the

Asbestos textile products can not be classed as necessaries of life. One of the largest uses to which this material is put is the making of the friction facing on automobile brakes. large quantity is also used in the making of high-pressure steam packing for engines, pumps, and the like, and gaskets for boilers, steam-pipe joints, and so forth. The effect of the price of asbestos products used for such purposes on the ultimate cost of manufactured articles from plants using such products, or on the cost of operation of processes wherein they are used, is so infinitesimal that it can scarcely be found. A relatively small quantity is used in the making of theater curtains, while a fair proportion is used in electrical insulations. Outside of these fields the use is small and insignificant.

I have, Mr. President, some statements and figures on the cost of production of this article here and abroad. I know that statements of the difference of cost of production fall on deaf ears, so far as the majority in this Chamber is concerned. shall not, therefore, detain the Senate by reading them, but I will ask permission to have them inserted as a part of my remarks.

The VICE PRESIDENT. Permission will be granted, in the

absence of objection.

The matter referred to is as follows:

COST OF PRODUCTION.

COST OF PRODUCTION.

Difference in the cost of production here and abroad is the primary reason why domestic asbestos textile manufacturers are asking for a maintenance of the 40 per cent duty on woven fabrics and a like duty on yarns. The cost of production theory has been rejected as a reliable guide in fixing the duty on many articles, because in many industries cost accounting has not been uniform and affords no satisfactory basis for comparison, while in many others official investigation showed a great variation in cost of the same article in different factories. A thorough canvass of the subject of cost in the asbestos textile industry shows a wonderful uniformity. All of the factories practically agree on the factory cost of production per pound of yarn, which is the base unit. The cost of the average or medium grade of yarn is about as follows:

Asbestosper	pound	\$0.10
	do	. 10
Overhead.	do	. 05

A study of the conditions under which the foreign manufacturer operates shows his costs on the same grade of goods to be as follows: Asbestos _ Labor____ .05 Overhead_

Total Adding to the foreign competitors' cost of production the 25 per cent now levied under the existing bill on asbestos yarns, allows him to set his goods down here at a total cost per pound of yarn of 22.5 cents; or, adding to it the 40 per cent duty which was asked for by the domestic manufacturers before the Ways and Means Committee of the House, in its recent hearings on the bill under consideration, makes the foreigner's cost 25.2 cents per pound, thus placing the domestic and foreign manufacturer on a fair competition basis.

Comparative table.

Yarn.	Here.	Abroad, under present law.	Abroad, under 40 per cent law.
Asbestos Labor: Overhead Duty	Cents. 10 10 5	Cents. 10 5 3 4.5	Cents. 10 5 3 7.2
Total	25	22.5	25, 2

A like comparison of the cost of woven fabrics, which carry a 40 per cent duty under the present bill, shows the following:

Cloth-	Here.	Abroad.
Asbestos Labor Overhead Duty at 40 per cent	Cents. 10 13 6	Cents. 10 6,5 4 8,2
Total	29	28.7

From which it is seen that even at the present tariff rates the for-eigner has the advantage on the cost of production. Under the rates of the bill now before Congress the comparative costs would be:

Yarn.	Here.	Abroad.
Asbestos, per pound Labor, per pound Overhead, per pound Duty, at 20 per cent	Cents. 10 10 5	Cents. 10 5 3 3.6
Total	25	21, 6

Cloth.	Here.	Abroad.
Asbestos Labor Overhead	Cents. 10 13 6	Cents. 10 6. 5 4 4
Total	29	24, 5

Mr. PENROSE. Wages are fairly good in this industry, as things go. Men receive \$15 per week, boys \$8.50, and girls I will ask to have all this matter relative to the difference in wages here and abroad inserted as a part of my remarks.

The VICE PRESIDENT. In the absence of objection, permission to do so will be granted.

The matter referred to is as follows:

Does our labor cost seem high? Compared with the cost of labor in the cotton and woolen textile industries—which are the standard textile industries in this country—it is indeed high. State and Federal investigation into the question of wages paid in the great mill district of New England reveal an average wage scale much lower than is paid in the asbestos textile industry. The prevailing average wage paid by all of the asbestos textile factories is:

	r week.
Men	\$15.00 8.50 7.00

These are living wages. The best evidence is that the employees are satisfied. It is desirable that this condition should continue, for low wages bring discontent and inefficiency. If lower selling prices for the goods manufactured by American milis are forced, through a reduction of tariff duties and the resulting increase in foreign competition, these wages can not be maintained, for the margin of profit in the business is now so small that domestic manufacturers can not reduce selling prices without reducing wages.

wages can not be maintained, for the margin of profit in the business is now so small that domestic manufacturers can not reduce selling prices without reducing wages.

Comparative cost of production aside, the fact remains that the importation of woven fabrics and yarns has increased 125 per cent in the last five years, while the increase in the manufacture of domestic fabrics and yarns has been 100 per cent, demonstrating that the foreigner can produce at a lower cost and profitably compete in our markets. In 1806 the value of imported asbestos under a 25 per cent duty was \$21,313.25, and in 1912 it was \$241,064. In addition to this the importation of fabrics carrying 40 per cent duty amounted, in 1912, to \$96,488. If we add the 25 per cent duty to the importations in 1912 of articles carrying that rate, and the 40 per cent rate, the value of the imported products at the cost price here is \$436,413. The factory cost of domestic yarns and fabrics manufactured in 1912 did not exceed in the aggregate \$1,500,000. The importation, therefore, under present rates is about one-third of the amount of domestic production and, as shown above, is increasing at a greater pro rata rate than the domestic manufacture of similar products. If American manufactures could afford to sell their goods at lower prices, it is hardly likely they would have permitted importations to increase at a greater rate than their own business. The domestic producers, however, have not kept their prices up under the protection of a tariff wall, but have been forced to reduce them to the lowest point through foreign competition. A lower duty will seriously curtail American production or compel the sale of goods at a loss.

# COMPETITIVE TARIFF.

compet the sale of goods at a loss.

COMPETITIVE TARIFF.

A 40 per cent ad valorem rate on yarns and woven fabrics is not inimical to the competitive-tariff idea. As seen from the cost comparisons hereinbefore, such rate will not enable the American manufacturer to make a profit before the foreign competitor can enter the field. On the contrary, it will only equalize conditions and allow competition on a fair or equal cost basis.

The Democratic principle, as stated on page 16 of the printed report of the Ways and Means Committee of the House, accompanying H. R. 3321, is:

1. The establishment of duties designed primarily to produce revenue for the Government and without thought of protection.

2. The attainment of this end by legislation that will not injure or destroy legitimate industry.

From this viewpoint alone a duty of 40 per cent ad valorem on yarns and fabrics is warranted. As a revenue producer the 40 per cent rate will be more efficient than the proposed rate. In 1912 the 40 per cent rate on woven fabrics returned revenues to the Government of \$38,595,20 (see p. 286, sec. 378, in the appendix to the above report of Ways and Means Committee). The estimated returns under the proposed 20 per cent rate will be only \$20,000 (p. 286). The revenues for 1912 from yarns and other products carrying a 25 per cent rate was \$60,268. Under the proposed new rate, covering all manufactures of asbestos excepting yarn and woven fabrics, the Government's estimated income will be only \$30,000. In each case the revenue is cut in half.

On what theory can this curtailment of revenues be justified? Only upon the theory that thereby the common good is served or the greater portion of the general public is benefited through the enforced reduction of prices to the consumer by reason of the resulting competition. But we have seen (and exhaustive investigation of the subject will confirm the statement) that a reduction in the price of these goods will work no perceptible benefit or advantage to any considerable number of perso

Mr. PENROSE. Such, Mr. President, is the condition of an industry which happens unfortunately to be located in Pennsylvania. I shall not offer any amendment to this paragraph as I know it would be useless. Whether the textile products of asbestos, which are most remotely distant from the ultimate consumer and enter into the early preliminaries of articles

which ultimately reach him, more imperatively demand a reduction of duty in order that the consumer may be benefited than does the catgut, from which the strings of the violin are made, in order that the consumer may be entertained with the sweet strains of music, I do not know. I merely call the attention of the Senate to the discrimination and will abide by the result.

Mr. HUGHES. Mr. President, I want to say, in order to ease the mind of the Senator from Pennsylvania, that if there is a catgut-manufacturing concern in the State of New Jersey I do not know of it. I do not know where such a factory is

located.

Mr. PENROSE. Everybody knew it four years ago, because those interested in that industry were here all winter, and I think they have been down here during the past winter. They must, of course, have known that the Senator represented the State of New Jersey.

Mr. HUGHES. Probably the atmosphere was more congenial four years ago to those gentlemen. At any rate I have no recollection of having seen them before the subcommittee. The action the subcommittee took was taken with reference to the situation as we found it. We found the law was impossible of fair administration.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 377, page 117, line 25, after the word "bladders," to strike out "catgut or whip gut or worm gut," so as to make the paragraph read:

377. Manufactures of asbestos, bladders, or wax, or of which these substances or any of them is the component material of chief value, not specially provided for in this section, 10 per cent ad valorem; yarn and woven fabrics composed wholly or in chief value of asbestos, 20 per cent ad valorem.

The amendment was agreed to.

Mr. HUGHES. I ask that the next two paragraphs, 378 and 379, be passed over for the present in order to save time.

Mr. PENROSE. I desire to be here when those paragraphs are considered. When does the Senator desire to bring them up?

Mr. HUGHES. I think I shall be able to bring them up to suit the convenience of the Senator. If he wishes to be present when they are considered, I shall try to arrange it in a manner satisfactory to him.

Mr. PENROSE. Does the Senator wish to have them go over simply because they will lead to discussion? Is that the

Mr. HUGHES. No; I want to suggest to the other members of the subcommittee and of the committee certain changes in

each of those paragraphs.

Mr. PENROSE. Very well; of course I have no objection to that. I hope the Senator will not call them up in my absence.

Mr. HUGHES. I shall not. I will try to arrange the matter to the satisfaction of the Senator.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 380, page 119, line 9, after the word "Masks," to strike out "composed of paper or pulp" and insert "of whatever material composed"; and in line 10, before the words "per centum," to strike out "20" and insert "25," so as to make the paragraph read:

380. Masks, of whatever material composed, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 383, page 119, line 17, after the word "thereof," to strike out "strings for musical instruments, not otherwise enumerated in this section," so as to make the paragraph read:

383. Musical instruments or parts thereof, planoforte actions and parts thereof, cases for musical instruments, pitch pipes, tuning forks, tuning hammers, and metronomes; strings for musical instruments, composed wholly or in part of steel or other metal, all the foregoing, 35 per cent ad valorem.

The amendment was agreed to.

Paragraph 384 was read, as follows:

384. Phonographs, gramophones, graphophones, and similar articles, or parts thereof, 25 per cent ad valorem.

Mr. SMOOT. Mr. President, in paragraph 384 the words "and similar articles" are used.

Mr. HUGHES. Those words are in the old law, as the Sena-

tor of course knows.

Mr. SMOOT. But the preceding paragraph, paragraph 383, provides that musical instruments or parts thereof shall carry a rate of duty of 35 per cent, while phonographs and similar articles covered by paragraph 384 carry a rate of 25 per cent.

Mr. HUGHES. Does the Senator pretend that a phonograph is a musical instrument?

Mr. SMOOT. If the Senator will wait a moment until I ask him a question, he will then understand what I mean. Take a music box, for example. Is that a similar instrument to a phonograph, or is it a musical instrument?

Mr. HUGHES. I should say that it is a musical instrument

and not a phonograph.

Mr. SMOOT. I know it is not a phonograph, but is it an

Mr. SMOOT. I know it is not a photograph;
article similar to a phonograph?
Mr. HUGHES. No; I think not.
Mr. SMOOT. Why not?
Mr. HUGHES. I do not know that I am able to give reasons that would be satisfactory to the Senator, but, of course, absolutely different processes are involved in the reproduction of the musical sound.

Mr. SMOOT. If they should both carry the same rate of duty there would be no question about it; but both reproduce sound from a record, and I can not see how the customs officers are going to administer the two paragraphs.

Mr. HUGHES. Of course, the Senator knows that there is a different principle involved in the reproduction of sound by the phonograph and by the music box.

Mr. SMOOT. So there is in the phonograph, in the grapho-

phone, and in the gramophone.

Mr. HUGHES. The same principle is involved in those.

They reproduce sounds which have already been made and recorded, while in the other case music is made de novo, if it is music. I am not prepared to say that the sounds which emanate from music boxes are always music, but at any rate they are made over and over again, and the sounds are not necessarily the same, as the Senator very well knows. However, I do not think he ought to call upon me to make an explanation upon a subject about which he knows as much as I do. In the phonograph, the gramophone, and the graphophone the principles involved are entirely different from those involved in music boxes.

Mr. SMOOT. The mechanical workings, Mr. President, are virtually the same. Of course I recognize that the phonograph causes a reproduction of the voice or of music which has been recorded, whereas the music box gives a reproduction of music that has been written, perhaps, for some other musical instru-ment. It seems to me that if the rates were the same—and I do not see why they should not be the same, and why there should be a distinction—then there would be no conflict what-ever, but it does seem to me that if the provision is left as it is now with different rates, then in the administration of the law conflicts will arise.

Mr. HUGHES. I think the Senator, on reflection, will see that there can not be any conflict between a phonograph and a musical instrument.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 120, beginning in line 1, to strike out paragraph 386, as follows:

386. Paintings in oil or water colors, pastels, pen and ink drawings, and sculptures, not specially provided for in this section, 15 per cent ad valorem.

And in lieu thereof to insert:

386. Paintings in oil or water colors, engravings, etchings, pastels, drawings, and sketches, in pen and ink or pencil or water colors, and sculptures not specially provided for in this section, 25 per cent ad valorem, but the term "sculptures" as used in this paragraph shall be understood to include only such as are cut, carved, or otherwise wrought by hand from a solid block or mass of marble, stone, or alabaster, or from metal, and that are the professional productions of a sculptor only, and the term "painting" as used in this paragraph shall be understood not to include such as are made wholly or in part by stenciling or other mechanical process.

Mr. HUGHES. I ask that paragraph 386 be passed over. The VICE PRESIDENT. Paragraph 386 will be passed over at the request of the Senator from New Jersey.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 388, page 120, line 18, after the word "lead" where it occurs the second time, to strike out "and" and insert ", 36 cents per gross, but in no case shall any of the foregoing pay less than 25 per cent ad valorem"; and in line 20, after the word "pencils," to strike out "all the foregoing," so as to make the paragraph read:

388. Pencils of paper or wood, or other material not metal, filled with lead or other material, pencils of lead, 36 cents per gross, but in no case shall any of the foregoing pay less than 25 per cent ad valorem; slate pencils, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 120, to strike out paragraph 390, as follows:

390. Photographic dry plates or films, not otherwise specially provided for in this section, 15 per cent ad valorem. Photographic film negatives or positives, imported in any form, for use in any way in connection with moving-picture exhibits, or for making or reproducing pictures for such exhibits, including herein all moving, motion, motophotography or cinematography film pictures, prints, positives or duplicates of every kind and nature, and of whatever substance made, 20 per cent ad valorem.

And in lieu thereof to insert:

390. Photographic cameras, photographic dry plates or films, not specially provided for in this section, 15 per cent ad valorem; photographic-film negatives, imported in any form, for use in any way in connection with moving-picture exhibits, or for making or reproducing pictures for such exhibits, exposed but not developed, 4 cents per linear or running foot; if exposed and developed, 5 cents per linear or running foot; photographic-film positives, imported in any form, for use in any way in connection with moving-picture exhibits, including herein all moving, motion, motophotography or cinematography film pictures, prints, positives or duplicates of every kind and nature, and of whatever substance made, 12 cents per linear or running foot.

Mr. SMOOT. Mr. President, I call the Senator's attention to what seems to me an inconsistency. In line 8 it is provided:

Photographic dry plates or films, not specially provided for in this section, 15 per cent ad valorem.

If the Senator will turn to paragraph 5804, he will find that "photographic and moving-picture films, sensitized and not ex-

posed or developed," are put on the free list.

Mr. President, it has been held that a photographic film ceases to be a film for tariff purposes after it has been exposed or developed; and therefore we find ourselves in the position of having in one place photographic and moving-picture films upon the free list, and in paragraph 390 carrying a duty of 15 per cent ad valorem. I think, if the Senator will look up the case which was decided, he will make a change to cover the point I have suggested.

Mr. HUGHES. I will say to the Senator that I have noticed the apparent conflict, but I am not prepared to say that it is a real conflict. My judgment is that the language in the free list will control. A dry plate is a film on glass. We considered A dry plate is a film on glass. We considered that apparent conflict and left it as it is; but I am not prepared to say that the language could not be improved, and I expected at some time to ask permission to make a change in the phraseology if I should come to the conclusion that it could be improved.

Mr. SMOOT. Then the Senator asks that the paragraph go

over for the time being?

Mr. HUGHES. I should like to have the paragraph approved, with permission to return to it for the purpose of changing, if it be thought desirable, that particular phraseology.

Mr. SMOOT. Well, Mr. President, it seems to me if we want photographic dry plates or films to be on the free list, we ought to exclude the words in paragraph 300; and if we want them to carry a duty of 15 per cent, we certainly ought to take them

out of paragraph 580. Mr. HUGHES. The only trouble in striking out the word "films" and leaving in "photographic dry plates" is that it might put on the free list certain photographic supplies that

we do not want to put upon the free list.

Mr. SMOOT. No; the paragraph would then only apply to dry plates. Even if the Senator desires dry plates to remain there, all he would have to do would be to strike out the words or films.

Mr. HUGHES. I am inclined to think the Senator is right about that. I have had my doubts about the language, and in order to get rid of the paragraph I move now to amend the amendment reported by the committee by striking out the words or films," with the understanding that we may revert to it and ask that the phraseology may be further changed if subsequently it shall be deemed advisable.

Mr. SMOOT. That is satisfactory.
The VICE PRESIDENT. The amendment offered by the Senator from New Jersey [Mr. Hughes] to the amendment reported by the committee will be stated.

The Secretary. In the amendment of the committee in paragraph 390, page 121, line 8, after the word "plates," it is proposed to strike out "or films."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 391, page 122, line 3, after the words "ad valorem," to insert "meerschaum, crude or unmanufactured, 20 per cent ad valorem," so as to make the paragraph read:

391. Pipes and smokers' articles: Common tobacco pipes and pipe bowls made wholly of clay, 25 per cent ad valorem; other pipes and pipe bowls of whatever material composed, and all smokers' articles

whatsoever, not specially provided for in this section, including cigarette-book covers, pouches for smoking or chewing tobacco, and cigarette paper in all forms, except cork paper, 50 per cent ad valorem; meer-schaum, crude or unmanufactured, 20 per cent ad valorem.

Mr. LODGE. Mr. President, I desire to call attention to the severity with which this business has been treated. Not only has there been a great reduction in the duty on these articles, but a duty has been added to meerschaum, the raw material. A duty was placed on brierwood for the first time in the Payne-Aldrich law, which led to a very great decrease in the manufacture and sale of brierwood pipes in this country. With a duty on amber and a duty on meerschaum, it will be almost impossible for the manufacturers to continue in business.

The industry employs some 3,000 men. Of course, they are workmen of high skill, receiving from \$12 to \$50 a week. They have to compete with a great deal of work done in small towns in Europe at very low labor prices. There is no substitute for amber. The imitation amber and imitation meerschaum are both so inferior that they can not be used in the manufacture

of articles of high grade.

I merely wish to call attention, as I have said, to the severity with which this particular industry has been treated and to ask leave to print in the Record a statement which gives in full detail the difficulties which surround the industry. I will not waste time in asking the Senate to vote upon an amendment to the paragraph, because I know it would be useless; but it seems to me that even if it were an article of luxury we might permit its manufacture. We tax tobacco, which is consumed in the pipes, both by customs and internal taxation, to the limit which it will bear, and now we are putting an additional burden on this industry by imposing a duty on the amber and meer-schaum which are used and which have to be imported. I fear it will make it impossible for those engaged in this industry to continue in business

The VICE PRESIDENT. In the absence of objection, the papers referred to by the Senator from Massachusetts will be printed in the RECORD.

The papers referred to are as follows:

planers referred to by the Senator from Massachusetts will be printed in the Record.

The papers referred to are as follows:

The Underwood tariff bill provides for a duty on raw amber of \$1 per pound, equal to about 10 per cent ad valorem. We are engaged in the manufacture in this country of briar and meerschaum pipes. The mouthpieces of these pipes are made of amber. The most of these amber mouthpieces represent about one-third of the entire value of the finished article.

For a long number of years there has been no duty on amber, nor on any other materials entering into the manufacture of smoking pipes. There is, however, a duty of 60 per cent on the finished article. Under the Payne tariff bill of 1909 for the first time a duty of 15 per cent was levied on the raw briar wood, whilst the duty on the manufactured article remained at 60 per cent.

The industry of manufacturing pipes in this country now employs about 3,000 persons; of these about two-thirds are skilled laborers, whose wages range from \$12 to \$50 per week.

The duty of 60 per cent on the finished article does not prevent the importation of pipes in very large quantities. In fact, authentic figures show that there has been a constant increase in the amount of pipes imported into the United States until same now reaches more than 50 per cent of the entire amount consumed yearly.

The imported pipes are manufactured mainly in small towns of France, Austria, and England, where the price of labor is exceedingly low and lower the price of labor is exceedingly low and lower the price of labor is exceedingly lower than 10 per cent of the entire amount consumed yearly.

The duty of 15 per cent on briar wood, levied for the first time under the Payne tariff bill of 1909 (now proposed to be reduced to 10 per cent, was a serious blow to our industry. Some of the largest factories in New York and elsewhere were forced for the first time under the Payne tariff bill on low under consideration, instead of relieving the above-stated unfavorable conditions, is i

Boston, Mass., June 21, 1913.	MANUFACTURED IN AUSTRIA.
Hon. HENRY CABOT LODGE, United States Senate, Washington, D. C.	Material (meerschaum)
DEAR SENATOR: We duly received your letter of May 12, in an-	Labor 3, 75 Overhead charges 1, 50 Depreciation 15
to thank you for the interest you have taken in our behalf.	Depreciation
DEAR SENATOR: We duly received your letter of May 12, in answer to ours regarding duty on amber and brierwood pipes, and wish to thank you for the interest you have taken in our behalf.  We now learn that the Democratic members of the Committee on Finance instead of giving us the relief asked for have added another additional duty on our materials, namely, 20 per cent on crude meer-	Total18. 90 Plus 50 per cent as proposed under the Underwood bill 9. 45
This material has always been on the free list, since no crude	Total28.35
meerschaum is found in this country or any other country except Turkey. It would involve an additional hardship on the manufacturers of meerschaum pipes, and would further, as shown in sworn statement, Exhibit 2, hereby annexed, not only make it impossible to compete with foreign manufacturers, but that it would wipe out the entire industry in this country.  There is an article called "American meerschaum" found in New Mexico and worked by the American Meerschaum Co., of Ogdensburg, N. Y. This, however, is not real meerschaum, and can not be used for	The above exhibits show that under the Payne-Aldrich tariff bill we were fully protected against foreign competition, but under the proposed duties in the Underwood bill and Senate Finance Committee bill, which would add 20 per cent to the cost of meerschaum materials and \$1 per pound (equal to 10 per cent on amber), we would not longer be able to compete. The cheapest article we could produce in meerschaum could be landed here, duty paid, at \$28.35 per dozen, whilst the same article would cost us to manufacture \$32.40.  In the phone exhibit we have assumed that the metaviele covaried
real meerschaum pipes, such as we and all other manufacturers in this country are producing.  We had in the meantime answered the interrogatories propounded by the Committee on Finance, and had sent a copy to Senator Simmons and Senator LA FOLLETTE, and now inclose copies of these answers to you, to all of which we beg you to please give your earnest consideration and attention so that we may get the relief asked for.	charges, etc., should cost the European manufacturer exactly the same as it does us. The probabilities are, however, that the European manufacturer can get his materials somewhat less than we have to pay, and also that the transportation of the material to the United States is somewhat greater than to Austria.  We also believe that the everylead charges in Austria are not as greater.
Very truly, yours, EHRLICH & KOPF.	as here, yet, in order to be perfectly fair, we have assumed all of these charges to be the same over here as there.  Does the consumer profit by buying the foreign-made meerschaum pipe in preference to the meerschaum pipe made in the United States?
EXHIBIT 1.  LOWEST ARTICLE WE MANUFACTURE IN OUR FACTORY.	No. Our legitimate profit in selling the \$32.40 meerschaum pipe to the retailer is about 20 per cent, or he would buy our pipe at \$39 per dozen.
Materials. \$3, 80 Plus duty on brierwood under Payne-Aldrich tariff bill and duty on minor materials and difference in cost of transportation 55	retailer is about 20 per cent, or be would buy our pipe at \$39 per dozen. Assuming the European manufacturer sells with the same margin of profit, namely, 20 per cent, the article would be sold to the retailer here at \$34 per dozen. The consumer would have to pay at retail \$5, precisely the same whether the pipe cost the dealer \$3.25 (which would be our price), or \$2.83 (which would be the foreign manufacturer's price). Therefore the only people who would be benefited by assessing the duties as proposed in the Underwood bill and by Senate Finance Committee would be the foreign manufacturer's price).

	(c) Men
	(d) Women
	(e) Children
	(f) Native born
	(g) Foreign born
	(h) Citizens

22. Wages paid during 1910-11-12 represent about 60 per cent of the total value of production.

23. Requires special scientific machinery for carving brier root, cutting and bending amber, modeling meerschaum. In use from three to five years.

24. Cost of production in foreign countries for same quality, grade, and style as we produce is about one-half.

25. The difference of percentage of labor cost between the United States of America and respective European countries is about 70 per cent

This knowledge is derived from our factory manager and from our foreman, who worked in factories in Austria, France, and England, and from inquiries gathered abroad by the deponent, a member of the firm, and is further verified by the fact that the importation of smoking pipes, the finished article, has steadily increased since the Payne-Aldrich tariff bill went into effect in spite of the 60 per cent duty levied thereon.

26. Have not sufficient data to answer positively. We sell to all the principal cities in this country.

27. Cost of transportation from Austria, France, and England to the principal cities of this country would be same as from our factory plus respective freight and steamer charges to port of entry.

28. Under the Payne-Aldrich tariff bill we worked with a loss owing to the duty of 15 per cent on raw brierwood levied for the first time in the history of the business. The 60 per cent levied on the finished article was not sufficient to keep out the foreign-made pipes. The importation has steadily and materially decreased.

ANSWERS BY EHRLICH & KOPF, OF BOSTON, MASS., TO INTEREOGATORIES PROPOUNDED BY SENATOR LA FOLLETTE, A MINORITY MEMBER OF THE CO. MITTEE ON FINANCE, UNITED STATES SENATE.

1. Brierwood pipes and meerschaum pipes (for smoking purposes).

2. (a) Raw brier root, (b) raw amber and amberoid, (c) raw meerschaum, (d) various other materials of minor import.

3. Do not know.

4. Consumption very much larger than the quantity sold during 1912 by the American manufacturers. With existing plants working at full time the American manufacturer could supply the entire consumption, but we can not compete with foreign product in spite of the 60 per cent duty levied on the finished article.

5. About 12 concerns.

6. Wm. Demuth & Co., New York; Kaufman Bros. & Bondy, New York; S. M. Frank & Co., New York; Kaufman Brier Pipe Co., New, York; S. M. Frank & Co. New York; Manhattan Brier Pipe Co., New, York; Courselves), Ehrlich & Kopf, Boston, Mass.

7. For the lowest priced article which we manufacture, about \$1.50 per dozen; for the highest priced article which we manufacture, about \$48 per dozen.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed and continued to the end of paragraph 395, on page 122, which is as follows:

395. That there shall be levied, collected, and paid on the importation of all raw or unmanufactured articles not enumerated or provided for in this section a duty of 10 per cent ad valorem, and on all articles manufactured, in whole or in part, not provided for in this section a duty of 15 per cent ad valorem.

Mr. SMOOT. Mr. President, I notice the wording of this paragraph is the same as the present law. The paragraph is designed to take care of all articles not enumerated in the section, but I find that unmanufactured articles carry a rate of duty in this paragraph of 10 per cent, the same as in the present law, while on manufactured articles a reduction has been made from 20 per cent to 15 per cent.

Of course, if the committee have decided upon that, well and good, but I want to call their attention to what happened between the years 1897, when the Dingley law was passed, and 1909, when the Payne-Aldrich bill was enacted. During that 12-year period there fell into that particular paragraph in the Dingley law some 62 articles that were not known at the time of the passage of the Dingley law, in 1897.

I believe, Mr. President, that it would harm no one; but it might be of inestimable value to the future production of articles which may hereafter be discovered and used in all

parts of the world.

If the Senator having this schedule in charge has taken that under consideration, I will say no more; but, in my opinion, it will be very much better to have at least the 20 per cent rate on the manufactured articles not enumerated. That certainly would not be a high rate, and it would only fall upon items that we know not of now, but which may in the future be discovered and which we may want to manufacture in this country, and to enable us to manufacture them a duty of at least 20 per cent would be required. I ask the Senator, with that explanation, if he is not of the opinion that 20 per cent would not be too high?

Mr. HUGHES. I will say to the Senator that of course this basket clause, covering articles not enumerated, applies to the whole bill.

Mr. SMOOT.

Mr. SMOOT. Everything that is not enumerated. Mr. HUGHES. Everything that is not enumerated; and it does not apply merely to the particular schedule which we have been considering this afternoon and with which I have taken some liberties. I should prefer that the Senator would propound his query to the chairman of the committee.

I hope the Senator did not think I thought this Mr. SMOOT.

paragraph applied only to this particular schedule.

Mr. HUGHES. I know that very well, but I wanted other Senators to understand it; and I would rather have the Senator ask the chairman of the committee.

Mr. SMOOT. The chairman of the Finance Committee heard my statement, and I should like to address the question to him. Mr. SIMMONS. I was not listening to the remarks of the Senator when addressed to the Senator from New Jersey, and

really did not catch the purport of them.

Mr. SMOOT. I was calling the attention of the Senator from New Jersey, as I thought he was in charge of this matter, to paragraph 395. This is a paragraph to take care of all unenumerated articles, both unmanufactured and manufactured. The present law provides for a duty of 10 per cent on unmanufactured articles and a duty of 20 per cent upon manufactured articles not enumerated in the bill. I stated to the Senator that during the years from 1897, the time of the passage of the Dingley bill, to 1909, the year of the passage of the Payne-Aldrich bill, there were some 62 articles that came into the commerce of this country that were not known at the time of the passage of the Dingley bill in 1897. Of course all such articles fell in the paragraph of the present law corresponding to paragraph 395 of the pending bill. Many of these items-in fact, I know of quite a number of them-were manufactured abroad and could have been manufactured in this country, but the 20 per cent duty was not sufficient to enable their being made here.

What I wish to ask the Senator is, if it would not be better, in the case of that paragraph, to leave the duty at least 20 per cent, so that it will take care of such articles that may come into the commerce of the country that are not known to-day? Nearly everything is enumerated; and the very next paragraph is the similitude paragraph, which takes in everything there is, it seems to me, except the articles that may come into commerce that are not known to-day. I do not believe 20 per cent duty will be too much to take care of such articles, and I therefore ask the Senator if he will not change the 15 per cent to 20 per cent.

Mr. SIMMONS. Mr. President, the articles that have come in heretofore under this paragraph, under all of our tariff acts, have been very limited. I find here that in 1897 the total value of articles imported under this paragraph amounted to only \$17,562 and the revenue amounted to only \$3,512. In the year 1906 the amount that came in was only \$13,000 and the revenue only

Mr. CUMMINS. Mr. President, we are unable to hear the Senator from North Carolina.

Mr. SIMMONS. I was stating the fact that the amount of imports under this paragraph under the Dingley Act had been very, very small. In fact, under all of our revenue laws since 1894 the imports under this paragraph have been absolutely negligible.

Mr. SMOOT. I wish to say to the Senator that the provisions of the paragraph are not supposed to prevent any known article from coming into this country. That is not the object of the paragraph.

Mr. SIMMONS. I understand that.

Mr. SMOOT. If the bill were absolutely perfect, upon its passage there would be nothing imported under the paragraph, because the other provisions of the bill would cover everything.

Mr. SIMMONS. Of course that is obvious, Mr. President. That is self-evident and does not require any statement. An effort has been made by the tariff makers to enumerate every known article, and after several hundred years of experience there are very few articles that are not known and enumerated. Most of the imports under this section would be of new things, of undiscovered things. Then of course we have the next paragraph, which is generally spoken of as the similitude paragraph.

Mr. SMOOT. I have referred to that. Mr. SIMMONS. That prescribes a duty for articles of similar character to those upon which duties are imposed. We have reduced to the minimum the number of things that may come in under this paragraph. The Senator says 20 per cent is the duty prescribed in the present law. I find that 20 per cent is the duty that has been prescribed in every act beginning with 1894

Mr. SMOOT. I believe that is true, Mr. President. Mr. SIMMONS. Yes; that is true. That is the duty that has been prescribed in the various acts that carried high protective

Mr. SMOOT. No; the Senator is mistaken. Mr. SIMMONS. The 20 per cent duty applied to the Wilson bill also, I think.

Mr. SMOOT. But I wish to say to the Senator that the rate

in this paragraph is not a protective duty.

Mr. SIMMONS. Then why does the Senator want it in-

creased, if it is not a protective duty?

Mr. SMOOT. I will tell the Senator why. Of course we do not know what new articles of commerce may be discovered. What I did say was that I thought if a 20 per cent duty were provided we would have a better chance to take care of such articles.

Mr. SIMMONS. I understand by that term that the Senator means a better opportunity to protect them. If he does not mean that, I do not know what he does mean.

Mr. SMOOT. I would not say that a rate of 20 per cent

would afford very much protection on such articles.

Mr. SIMMONS. I do not wish to take much time about this matter, Mr. President, I was going to say that under the Dingley Act and under the Payne-Aldrich Act the rate upon these unenumerated manufactured articles has been placed at 20 per In this bill we are radically reducing the rates of those I think it is entirely logical, when we come to this paragraph, which is a sort of basket paragraph that catches everything that we do not know anything about and are not able to designate eo nomine, that we should make some slight reduction. I do not think it is a matter of much consequence one way or the other. For the last 20 years there have not been any considerable imports. They are absolutely negligible, and the revenue is absolutely negligible. I think the rate of 15 per cent conforms to and is in harmony with the rates we have prescribed in the bill, and I am not disposed to agree to any increase in the rate.

The reading of the bill was resumed, and the Secretary read to line 12 of paragraph 396, page 123, as follows:

to line 12 of paragraph 396, page 123, as follows:

396. That each and every imported article, not enumerated in this section, which is similar, either in material, quality, texture, or the use to which it may be applied, to any article enumerated in this section as chargeable with duty, shall pay the same rate of duty which is levied on the enumerated article which it most resembles in any of the particulars before mentioned; and if any nonenumerated article equally resembles two or more enumerated articles on which different rates of duty are chargeable, there shall be levied on such nonenumerated article the same rate of duty as is chargeable on the article which it resembles paying the highest rate of duty; and on articles not enumerated, manufactured of two or more materials, the duty shall be assessed at the highest rate at which the same would be chargeable if composed wholly of the component material thereof of chief value; and the words "component material of chief value," wherever used in this section—

Mr. LIPPITT. I wish to call the attention of the chairman

Mr. LIPPITT. I wish to call the attention of the chairman of the committee, and particularly of the Senators who have the three or four textile schedules under their charge, to the fact that at this point in the bill there is a definition of the words "component material of chief value." At an earlier period of "component material of chief value." At an earlier period of the discussion I pointed out the great inconsistencies which ran through all the tariff schedules in the use of this phrase, "component material of chief value," and other phrases which I presume were intended to be synonymous with it.

The phrase "composed in whole or in part" frequently alternates during sections with this expression, "component material"

of chief value." As I have pointed out before, the inference is that one means something different from the other; or if both mean the same thing, I think it is very important, for the purpose of avoiding litigation, that the language of those four schedules-I am speaking now of the cotton, silk, wool, and flax schedules-should be made so that the different parts of each may conform one to another. In all there are six different phrases in those four schedules that are used to express the same idea.

I wish to call the matter to the attention of the Senators in charge of the bill. It has nothing to do with the rates, but it has a great deal to do with the amount of litigation that is apt to go on under the bill after it becomes a law.

Mr. SIMMONS. I do not know that I altogether understand the Senator. Does the Senator suggest that we ought to define, in this section, the exact meaning of all of those phrases, such as "in whole or in part," as we have defined here the phrase

"component material of chief value"?

Mr. LIPPITT. No; that is not what I mean. I mean that in the silk schedule, as an illustration, in some places it says value," and a few lines farther on it will say "an article composed wholly or in part of silk," or "wholly or in chief value of silk." The idea, I presume is that the words "the lines of silk." "an article of which silk is the component material of chief chief value"

Mr. SIMMONS. Does the Senator see much difference between the meaning of that phrase and this phrase?

Mr. LIPPITT. I should like to ask the Senator from North Carolina if there is any difference?

Mr. SIMMONS. At first blush I do not myself see very much difference in the meaning, although there may be a difference

Mr. LIPPITT. I think it is intended that the terms should be synonymous, and should mean the same thing.

Mr. SIMMONS. That is my impression. Mr. LIPPITT. They are undoubtedly intended to mean the same thing; but it is manifest that if in one place you use one set of words to describe an idea and two or three or four lines farther on you use another set of words to describe exactly the same idea, a critic coming to examine the bill will naturally infer that there is some different meaning; otherwise you would not have changed your language.

I wish to say to the Senator that in the past little variations in expressions of that kind have led to an enormous amount of litigation. This bill is going to be examined by very expert customhouse lawyers on the date of its passage. In fact, it is now being examined by them, and whether or not those two phrases will mean exactly the same thing after they have been exposed to the very technical interpretation of the courts is certainly a matter of doubt.

I am only suggesting this to the Senator as a means of perfecting his bill. Manifestly, if he means the same thing all the time, and expresses it in the same language, there can be no misinterpretation of it. But if he uses six different expressions to convey a single idea there is great probability that there will be different interpretations put upon them.

Mr. SIMMONS. Have not all our tariff bills, and especially the existing law, used these terms repeatedly, all through them, as interchangeable and synonymous terms?

Mr. LIPPITT. No, sir.
Mr. SIMMONS. Especially the two to which the Senator has referred, "in whole or in chief value" and "component material of chief value." Are not those two terms used very frequently

in the present law?

Mr. LIPPITT. I think they are not. I think there is only one expression used in the present cotton schedule, and that is "component material of chief value." I think that expression is used all the way through the cotton, wool, and flax schedules.

When it comes to the silk schedule, which was rewritten in its form in the present law, the Payne-Aldrich law, and probably written by some different hands or different minds that did not have the usual expressions well in mind, in that schedule there is used for the first time, I think, as I read over it hastily, the expression "composed wholly or in chief value." In all the previous schedules, if my recollection is correct, the words "component material of chief value" are used. Certainly they are used for the greater part of the time.

Mr. SIMMONS. If the Senator will pardon me, I think where we have used the one term or the other we have in almost every instance been following out the language of the old law. While we have changed rates in this bill, we have conformed our language very largely to the present law, except as to rates, where there was no change in principle. I think we were wise in doing that, because the terms used in our tariff laws, where they have involved any ambiguity or uncertainty, have been the subject of construction by the courts and by the appraisers, and the meaning of the words has been defined.

I think the Senator will find that we have not violated the rule of uniformity to which he has appealed any more than the old law has done so. I think he will find that where we have used one phrase instead of the other, we have generally done so in pursuance of the form of the old paragraph.

We are discussing this matter, not in a controversial spirit, but both of us with a desire to perfect the bill as best we can. I wish to say to the Senator if he will point out any instance in which uncertainty and doubt may grow out of the use of any improper term as he sees it, we shall be very glad indeed to con-

Mr. LIPPITT. I was not bringing up the matter for any other purpose than for the purpose of having the bill as perfect as possible.

Mr. SIMMONS. I have not imputed to the Senator anything

but the very best motives in bringing it up.

Mr. LIPPITT. If the Senator will turn to page 78—

Mr. SIMMONS. 'I should not care to have the Senator call my attention to it now; but if he will examine the provisions to which he has reference and call my attention to them, I shall be very glad indeed to take up the matter for consideration.

Mr. LIPPITT. I should like to say to the Senator that this is the third time I have called the attention of Senators on the other side to this matter, which, to my mind, is a very glaring inconsistency and, without meaning any insinuation, a great imperfection in the bill. I had hoped there would have been some consideration given to it and some change made in it.

Mr. SIMMONS. I think the Senator spoke to me privately about it yesterday, and I think I assured him that if he would make a memorandum of the matter and submit it to me I would

take it up and look into it.

Mr. LIPPITT. No; I meant by saying "the third time" that it is the third time I have called the matter to the attention of Senators on the other side in public on the floor. I shall be

glad to submit it to the Senator, however.

Mr. SIMMONS. The Senator understands that I would not like right here on the floor, without any opportunity to consider the matter, to settle a question of that sort. I simply ask that he will make a memorandum of it and let me have it.

Mr. LIPPITT. I did not expect the Senator to do so. I was only trying to impress it upon his attention.

Mr. PENROSE. Mr. President, does the chairman of the committee intend now to proceed to the consideration of the income-tax provision?

Mr. SIMMONS. That is the desire of the committee.
The VICE PRESIDENT. The reading of this paragraph has not yet been completed.

Mr. SIMMONS. That is true; we have not yet finished this paragraph.

Mr. PENROSE. Before we leave the tariff schedules I should like to call attention for about two minutes to some matters I have here.

Mr. CUMMINS. If the Senator will yield to me, I desire to say that before we pass to the income-tax provision I have an amendment which I desire to offer to the bill, the proper place for which is immediately following the free list. I am prepared to do it as soon as the Senator from Pennsylvania has concluded.

Mr. SIMMONS. We have not yet quite finished Schedule N,

Mr. CUMMINS. I believe not. I shall wait until the sched-

ules are concluded.

Mr. PENROSE. Then, if I may be permitted, I will introduce the matter to which I referred when this schedule is closed. I thought we had completed it.

The VICE PRESIDENT. The Secretary will conclude the

reading of paragraph 123.

The reading of the bill was resumed, and the Secretary read as follows:

Shail be held to mean that component material which shall exceed in value any other single component material of the article; and the value of each component material shall be determined by the ascertained value of such material in its condition as found in the article. If two or more rates of duty shall be applicable to any imported article, it shall pay duty at the highest of such rates.

Mr. PENROSE. Mr. President, I have on my files a very large number of letters sent to me by different people in Pennsylvania and other parts of the country, showing how the foreign manufacturer is preparing under the pending bill to enter the American market just as soon as the bill becomes a law. I shall not cumber the RECORD or detain the Senate by producing for the consideration of this body or for future reference too many of these communications, but I have here three which I should like to have embodied in the RECORD at this point.

One is from Donisthorpe & Co. (Ltd.), of Leicester, England, and is as follows:

DONISTHORPE & CO. (LTD.), WORSTED, MOHAIR, LAMB'S WOOL, MERINO AND COTTON YARNS, Leicester, May 20, 1913.

Messrs, Simons & Struve Hosiery Co.

Dear Sirs: If you will be interested in importing yarns when your tariffs have been reduced we shall be very pleased indeed to answer any inquiry you may intrust us with, or, better still, if you will kindly send us a small sample of any particular line which you are using and wish to import we shall be pleased to match same and quote our keenest prices. We trust to be favored with your esteemed commands in the very near future and beg to remain,

Yours, very truly,

DONISTHORDE & CO. (LTD.).

DONISTHOBPE & CO. (LTD.), A. COLTMAN.

This is a letter indicating the prospects in front of the hosiery

I have another letter here from Betts & Co., No. 1 Wharf Road, City Road, London, describing themselves on their letter-head as "The largest makers of bottle capsules in the world." It is as follows:

REDUCTION IN TARIFF.

BETTION IN TARIFF.

BETTS & CO. (LTD.),
London, N., May, 1913.

Dear Sies: We have previously quoted on your requirements of bottle caps, but up to now have not been successful in obtaining a share of your business.

The bill before Congress provides for a considerable reduction in duty, and for this reason you may be holding up your, orders until the new tariff becomes law. Please note, however, that on orders placed with us before the new tariff is in force, but shipped after it becomes operative, we shall give a rebate in price proportionate to the saving in duty.

operative, we shall give a relate in proceeding ordering even for forward duty.

There is accordingly, no reason to delay ordering even for forward delivery, and the advantage of ordering forward is that such orders will be proceeded with awaiting shipping instructions, thus insuring prompt shipment when you are in need. If, however, orders are not sent until after the new tariff becomes operative, there is likely to be such a demand as to make prompt delivery almost impossible.

Yours, very truly,

BETTS & Co. (LTD.),

BETTS & Co. (LTD.), J. POPPLE,

Mr. MARTINE of New Jersey. I should like to inquire just what particular industry these gentlemen were engaged in?

Mr. PENROSE. Caps for bottles.

Mr. MARTINE of New Jersey. I thought it was a medicine.
Mr. PENROSE. The Senator is familiar with the industry.
The factories are found in New Jersey and eastern Pennsylvania and all over the eastern part of the country-small, active

industries producing an article of general use.

Mr. MARTINE of New Jersey. We disagree sometimes as to the brand. Some use the caps and others the other kind.

Mr. PENROSE. Others prefer the cork. [Laughter.]

Mr. MARTINE of New Jersey. The Senator's heart and mine beat in unison.

Mr. PENROSE. Here is another letter from Germany. Dr. Heinrich König & Co. write this letter:

LEVYTYPE Co., Philadelphia.

LEYTTYPE Co., Philadelphia.

Gentlemen: We are informed that for the new tariff a considerable reduction is under consideration as to the duty for chemicals to be imported into your country.

We therefore take the liberty to draw your special attention to our chemical products for engraving purposes as named hereafter:

Perchloride of iron, cyanide of potassium, asphalt in finest powder, collodion, iodine, chromium salts.

Will you be good enough to favor us with your inquiries, stating at the same time the quantities you require. We have no doubt that our prices will lead to business, and looking forward to your kind and favorable reply, we are, gentlemen,

Yours, truly,

Dr. Heinr. König & Co.,

DR. HEINR. KÖNIG & Co., Gesellschaft mit Beschränkter Haftung.

LEIPZIG-PLAGWITZ, July 11, 1913.

I could produce many hundred letters if necessary.

Mr. MARTINE of New Jersey. I think I can recall without a very far reach of memory when a medicine or tonic that is used much in this country bore a most inordinate tariff. I can not now just recall the rate, but the general trend of public thought was that it was a grave abuse, and the Democratic Party insisted that it should be put upon the free list. I recall very well, since the Senator cites Philadelphia—I think it was

very well, since the Senator cites Philadelphia—I think it was about 18 years ago—what a howl went up from the Commonwealth of Pennsylvania, particularly from the city of Philadelphia and from a great firm of manufacturing chemists, that if this article was put on the free list it would be ruination.

Mr. PENROSE. To what article does the Senator refer?

Mr. MARTINE of New Jersey. The article was quinine. I think it was sold for about \$5 an ounce. I am corrected. I am told that it was sold for \$4.84 an ounce. It was put upon the free list. We were told that the people in the low latitudes would shake themselves to death with fever and ague because we would have no quinine to counteract it if we put that article we would have no quinine to counteract it if we put that article on the free list. But, notwithstanding that claim, it was put on

the free list and it is now sold for about 45 cents an ounce instead of \$4.84 an ounce.

How well I remember the calamity howl of that day. It was fact that if you had occasion to buy quinine you could go into a drug store and all you could get for half a dollar you could put inside of a lady's watchcase and put the crystal down without harming the crystal or the article put beneath it. But we put it on the free list and now it will almost take a nail keg to contain the quinine you can get for half a dollar. [Laughter.] That is, I know, a slight exaggeration.

What I desire to say is that the industry of the manufacture of quinine in Philadelphia has prospered beyond compare and that the firm of druggists in Philadelphia, Powers, Weightman & Co., who said that they were going to be driven out of existence, to-day have multiplied their concern and have made most fabulous wealth, and the people at the same time have that

commodity correspondingly cheaper.

So I think when our friend from Pennsylvania tells these stories of what is to come we can simply cite the question of free quinine out of the desolation and ruin and sadness pictured for the general industries that we have had.

Since the Senator has been so much inclined to read I believe I will do a little reading. Some one said the other day when the Senator and I got into a little controversy that it seemed like a frame up. It does seem a little like a frame up. I want to say that I happened to pick up the New York Tribune of to-day, and rather than cut it out and mutilate the paper, since it came from the Secretary's office, I copied it. As I said before it is on our file. On August 26 the New York Tribune says:

Fail River Iron Works plant employing five to seven thousand hands goes into operation to-day after a shutdown of 15 weeks.

I trust the Senator from Pennsylvania will listen. Of course this comes from the Commonwealth of the Senator from Massachusetts [Mr. Weeks]. I also read from the Tribune of today showing that there was no need of protection of the great iron industry of Pennsylvania, which has been fattened and favored so liberally in years past. I quote also from the Tribune, showing no need of protection here:

Forty-five cars leave Bethlehem, Pa., to-day with an iron mill costing \$2.500,000. made by the Pollock Co. of Youngstown, Pa. This is a modern 500-ton blast furnace complete. It will be erected at Newcastle, New South Wales, Australia.

We have been told right along that we needed this tariff in order to compete with foreign countries, and here we see that the sales go right along.
Mr. LODGE. Mr. President

The VICE PRESIDENT. Does the Senator from New Jersey yield to the Senator from Massachusetts?

Mr. MARTINE of New Jersey. Certainly. Mr. LODGE. I desire to ask the Senator did I understand him to refer to the Fall River Iron Works?

Mr. MARTINE of New Jersey. This is the quotation:

The Fall River Iron Works' plant, employing five to seven thousand hands, goes into operation to-day after a shutdown of 15 weeks.

Lest the Senator may doubt it, I will let a page go and get

the Tribune of to-day.

Mr. LODGE. It was not that. I wanted to ask the Senator if he referred to that as an indication that the iron trade is improving.

Mr. MARTINE of New Jersey. They manufacture textiles as well, do they not?

Mr. LODGE. They do.

Mr. MARTINE of New Jersey. I do not care whether-

Mr. LODGE. They manufacture nothing but textiles.
Mr. MARTINE of New Jersey. All right; I read what it
id. I suppose it assumed that everybody knew. I am not so well versed in Massachusetts, but I do not care whether it was the iron industry or the textile industry; I only quote it to show that with all the stories of woe and misery and general prostration of industries, the facts do not warrant them.

The Senator from Pennsylvania is now telling us of the letters he has and the half dozen he wants to read. I have one here that I have held for a day or two, and I want to present it now. It says.

FALLS, PA., August 6, 1913.

Senator Martine, United States Senate, Washington, D. C. Dear Sir: I read with interest your—

The first paragraph amounts to nothing, but I will read it all-

The first paragraph amounts to hothing, but I will read it all—
I read with interest your discussion yesterday with Senator Pennose regarding business conditions in Pennsylvania, and am surprised that our Senator should deliberately attempt to depress and ruin the business of his own State.

I have traveled Pennsylvania for 10 years and have never had the business I have had this spring season, and the last two weeks were the biggest of any two of the year. Other salesmen report the same, and the universal report of the merchants is the heaviest they have ever had, and that it is keeping up right now in the usual dull season.

I have heard of no "shutdowns" or rumored "shutdowns," but, on the contrary, that help is scarce and impossible to get.

In 1908, when the panic was on, we were told not to discuss hard times, not to talk the poor conditions of one town in another; but now, when all is going along better than ever, the business world is disgusted with the calamity howlers in Washington.

This town of New Castle, Pa., where I am at this writing, a steel and tin-plate town, was never more prosperous than now.

Yours, respectfully,

LEWIS EVITTS.

My friend said there was no name to the one I had here the other day, but this one is signed Lewis Evitts and it is from New Castle, Pa.

Mr. PENROSE. Will the Senator permit me

Mr. MARTINE of New Jersey. Certainly.
Mr. PENROSE. I am glad this communication is signed.

Mr. MARTINE of New Jersey. It is better than yours was on Spreckels the other day.

Mr. PENROSE. I am not acquainted with the gentleman who has signed it, but I will investigate his character and standing and advise the Senator as to how much credit should be given to his communication.

I may state, however, in this connection that New Castle, in Lawrence County, is on the extreme western border of Penn-I do not pretend to say that this tariff legislation has

seriously affected that section of the country yet.

The result of the agitation is most seriously and certainly definitely felt in the textile industries and in many of the metal industries in the eastern seaboard section of Pennsylvania and of the United States. I have already said that when you are talking about a territory some 400 miles in extent it seems hardly fair to quote a witness who is 400 miles from the point affected.

Mr. MARTINE of New Jersey. I realize-

Mr. PENROSE. How far this gentleman is an authority I do not know, but I will try to find out. It may be that the result of my investigation will indicate that the Senator would have been better off with an anonymous communication. He

may find a Democrat hunting a post office.

Mr. MARTINE of New Jersey. I do not know whether there is a Democrat hunting a post office in Pennsylvania. That has not been the case in its past history under the good partisan management of the Senator. Owing to the great influence of the Senator from Pennsylvania, entirely commensurate with the magnificent area of his State, I still feel that the boundless world is his; but I want to know how he explains the Fall River business, how he can explain the way these iron mills are sending out machines, and all that amidst this picture of

are sending out machines, and all that amidst this picture of gloom and general prostration.

Mr. LIPPITT. When the Senator from New Jersey refers to the concern in Fall River, does he mean to emphasize the fact that it has been stopped for 15 weeks, or does he mean to emphasize the fact that it may start up for awhile?

Mr. MARTINE of New Jersey. I simply said that which the New York Tribune states. Oh, heavens, how you rolled the words, "the New York Tribune," as a sweet morsel under your tongue years ago. I have only been stating what the New York Tribune says, but for fear that the authority may not be York Tribune says, but for fear that the authority may not be just what the Senator from Pennsylvania [Mr. Penrose] and the Senator from Rhode Island [Mr. Lippitt] want, here is another sort of an adjunct to the Republican Party for a great many years, the New York Times. I send it to the desk and ask the Secretary to read the portion I have marked. It is on the effect of the tariff revision on the business outlook.

The VICE PRESIDENT. Is there objection? The Chair

hears none, and the Secretary will read as requested.

Mr. MARTINE of New Jersey. I have had this matter for some time, and I would not have inflicted it on the Senate, but I declare I can not help it; it is too good since the Senator from Pennsylvania moved out with fresh evidences of prostration, degradation, misery, and woe.

The Secretary proceeded to read the article, and was inter-

rupted by-

Mr. SIMMONS. I wish to ask the Senator from New Jersey if he will not consent to have the balance of the article printed

in the RECORD without reading?

Mr. MARTINE of New Jersey. If it is the pleasure of the

Senate, I am quite willing to do so. I have no desire to take up the time of the Senate. I realize as much as the Senator from North Carolina the necessity of moving on, but I did feel that there should be some antidote furnished for the poison used by our friend the Senator from Pennsylvania in holding up a picture of holy horror.

The matter referred to is as follows:

FACTS OF THE BUSINESS OUTLOOK.

Some think that Congress has done its best to kill prosperity and some think Congress has done its worst, which may be another way of saying the same thing. What those of the differing ways of thinking

ought to consider is not their differences of opinion, but the facts in the case. And the fact is that all records are broken for the facts of trade under such conditions as those now existing regarding legislation. We published yesterday a Chicago dispatch, quoting leading men of business and such bankers as Mr. Forgan, to the effect that business is good and improving, regardless of the money market among of a representative of Claffin & Co. to the effect that there is no compilair of the buying for the fall season. It is the buyers' business to know what the quality of the selling will be. Goods are scarce, and buyers must take them while they can get them, because latter on there will be greater scarcity, unless there is such activity in production as will cause the market of the selling will be. Goods are scarce, and buyers must fake them while they can get them, because latter on there will be greater scarcity, unless there is such activity in production as will cause the more scarcity. There are \$100,000,000 worth, and calamity hunters may think that spells prostration of manufacture.

There was published on Monday the official statement of the goods piled up in bonded warehouses awaiting release under the new rates of duty. There are \$100,000,000 worth, and calamity hunters may think that spells prostration of manufacture.

Materials of manufacture are not accumulated for fun nor to put into cold storage indefinitely. Those materials are imported to be turned into goods for saic, and the larger the quantity the larger the demand for labor and the stronger the testimony to the importers' belief that it is going to be worth while to make the materials into the fluished seven and such as a su

Mr. SMOOT. Mr. President, I listened to the speech of the Senator from New Jersey and the wonderful story he told about quinine with a good deal of pleasure. After he made that statement I ran back over the tariff acts to find out when quinine was put upon the dutiable list. I understood the Senator to say that it was done about 18 years ago.

Mr. MARTINE of New Jersey. I think 18 or 20 years ago.
Mr. SMOOT. I find that in the act of March 3, 1883, it was
on the free list. I find that in the act of October 1, 1890, it was on the free list. I find that in the act of 1904 it was on the free list and in every act since that date. So I suppose the Senator must have been mistaken and he only imagined that he heard that cry

Mr. MARTINE of New Jersey. No; the Senator will not deny

that quinine was dutiable.

Mr. WILLIAMS. There is hardly a child in the South who does not know that about 1888 or 1889, somewhere along there, quinine, which was on the dutiable list, was placed on the free list. When that was done Powers, Weightman & Co. and all the other great manufacturers of quinine swore that you would ruin the entire quinine industry in the United States. Notwith-standing that, it was put on the free list, and it was put on the free list by a bill introduced by McKenzie, of Kentucky, who was known for that reason as Quinine McKenzie, Prior to that

time the price was \$4.84 an ounce, and some time after that it went down to eighty-odd cents an ounce.

Mr. MARTINE of New Jersey. And now it is 45 cents an

ounce.

Mr. SMOOT. I do not take the word of the Senator from Mississippi nor of the Senator from New Jersey, nor do I want them to take my word. Here is the act of March 3, 1883, and it is on the free list, paragraph 2503, and here is the sulphate of quinine.

Mr. WILLIAMS. I may have gotten 1883 mixed up with

1888; but I remember-

Mr. MARTINE of New Jersey. I am frank to say that I remember the circumstance very well.

Mr. WILLIAMS. I understood the Senator to say that it was on the free list in 1833.

Mr. SMOOT. I did not make any such statement.

Mr. WILLIAMS. I thought he did say 1833 and followed it down and substantially denied that it had ever been taxed, that it always had been on the free list, as I understood him.

Mr. SMOOT. Mr. President, the Senator says that I said that quinine was free under the act of 1833. There was no such act in 1833. I never mentioned any such act. I mentioned the fact that the act of March 3, 1883-

Mr. WILLIAMS. Ah! Mr. SMOOT. Then I mentioned the act of October 1, 1890, and stated that it had been free in every act since, and I know that I am right.

Mr. MARTINE of New Jersey. The Senator from Utah, I think, will not deny the fact that quinine was dutiable at a time about 18 or 20 years ago.

Mr. SMOOT. I have gone back to 1883 and it has been free

ever since that.

Mr. MARTINE of New Jersey. I will not attempt to fix the date, but I recall the circumstance very well. The Senator from Mississippi referred to McKenzie. I remember very well having read that they called him "Quinine Jim" for years and years on account of his fight for free quinine. Whether it occurred just 18 or 20 years ago or 16 years ago I do not care, the facts are the same that the same picture of disaster was held up then that is held up now. I think the Senator from Massachusetts [Mr. Lodge] will remember the fact.

Mr. SIMMONS. I hope we may now proceed with the bill. Mr. LODGE. Mr. President, I did not rise with any intent of engaging in the quinine controversy. Quinine has been on the free list ever since I can remember-

Mr. WILLIAMS. If the Senator from Massachusetts will

pardon me just a moment-Mr. LODGE. Ever since I can remember-I was going to

finish the sentence—anything about tariff laws. Mr. WILLIAMS. The Senator can certainly remember as

far back as 1883.

Mr. LODGE. That was the first tariff-

Mr. WILLIAMS. Was the Senator in the House of Representatives at that time?

Mr. LODGE. No; I entered the House of Representatives in 1887.

Mr. WILLIAMS. It was shortly before you entered the

Mr. LODGE. I know about the tariff of 1883, because it was Senate tariff that was substituted.

Mr. WILLIAMS. The Senator from New Jersey made a mistake in his dates, that is all.

Mr. LODGE. For 30 years and more it has been on the free list in the tariff law. I do not remember how long, and I think it is better to look at the statutes than to trust to

The Fall River Iron Works, which is a very large establishment, operating under a charter nearly a hundred years old, were shut down for 15 weeks, which was a very serious blow to Fall River at the time. It was the public understanding-I have not made inquiry about it—that they were shut down on account of uncertainty in the outlook in the cotton industry owing to pending legislation and unwillingness to accumulate a great stock of goods. I had no idea it would remain continuously shut down, but a shutdown of 15 weeks of that great mill is a very serious thing to Fall River no matter for what purpose it was done.

Mr. President, I want to ask, before we leave the tariff por-tion of this bill, that I may have printed some letters which I meant to have printed yesterday when we were on the free list, but we took it up rather unexpectedly, and I omitted to ask then that they be printed. One is a brief letter in regard to the placing of blankets on the free list in paragraph 427½; another is in regard to tacks; and another relates to the

placing of sewing machines on the free list, which will do no harm to the great Singer organization, but will be severe upon all the independent companies. I shall not, however, offer amendments, because I know it is entirely useless and only takes the time of the Senate in needless votes; but I ask that these three statements be published in connection with my remarks.

The VICE PRESIDENT. Without objection, the letters will be printed in the RECORD.

The letters referred to are as follows:

BOSTON, July 23, 1913.

Hon. Henry Cabot Lodge,
United States Senate, Washington, D. C.

Dear Sir: As manufacturers and selling agents for blanket mills, we wish to protest against the following item going on the free list, Calendar 62. H. R. 3221 (p. 130, No. 427½):
"Blankets composed wholly or in chief value of wool, valued at less than 40 cents per pound."
This item, if placed on the free list, will do a great deal of harm, both to the manufacturer and mill employees.
The principal renson of objection is that we pay 60 to 100 per cent more wages here than is paid in Great Britain, as the following table will show:

Average full-time earnings 55.6 hours.

Average full-time earnings 55.6 hours.

	United States, average weekly earnings.	Great Britain, average weekly earnings.
Woolsorters	\$12.38 8.21	\$7.22 4.93
Card strippers and tenders         do           Wool spinners (mule)         do           Warp dressers         do	7. 81 10. 40 12. 94	5, 45 5, 98 6, 53
Woolen weavers         do           Do         female           Burlers         do           General laborers         male	10, 63 10, 54 6, 15 8, 21	6, 21 3, 83 3, 20 4, 74

These figures are quoted from the report of the Tariff Board, volume 3, page 286.

Now, if blankets, as quoted on page 130, No. 427½, should come in on the free list and we pay 60 to 100 per cent more for our labor than does Great Britain, as far as we can see, it would mean, if the manufacturer wants to retain his trade, that he would have to reduce the wages of his employees, and we would strongly urge upon your honorable body the crossing off of item No. 427½, on page 130, as blankets on Schedule I, page 82, which are cotton blankets, and Schedule K, page 88, which are wool blankets, rated at 25 per cent ad valorem, covers all kinds of blankets, and we trust you will use your influence against this item, namely:

"Blankets composed wholly or in chief value of wool, valued at less than 40 cents per pound."

Yours, very truly,

THOMAS KELLY & Co.

FAIRHAVEN, MASS., December 28, 1912.

Hon. Henry Carot Lodge,
United States Senate, Washington, D. C.

Sir: At a recent conference of the manufacturers of tacks and small nails relating to the proposed new tariff bill it was shown that any further reduction of the duty on this class of products would result in very great hardship to the manufacturers of this country, and in all probability in the importation of foreign goods to an extent which would put many of those exclusively engaged in that line out of business, or compel a reduction in wages, which does not seem desirable, feasible, or even possible.

It became evident that even in the tariff bill of 1909 an unjust discrimination was made against this class of products, and we were only saved from foreign importations under the existing duty because of the extremely low prices which have prevailed until very recently in the cost of raw material in this country and the almost destructive competition which has existed in our home trade.

We therefore appeal to your sense of justice and your known desire to be of service to your constituents in all proper ways to give us the benefit of such assistance as we feel sure you can render in insuring, proper consideration being given to this class of product by those concerned in the revision of the tariff which is now being undertaken and upon which hearings will be held before the Ways and Means Committee on the 10th proximo.

Briefly stated, the facts as they apply to our industry are as follows:

In the revision of 1909, notwithstanding the protests of all the manufacturers engaged in producing this class of goods, the duty upon them was reduced one-half, or from 1½ cents per pound on the plate and sheets from which tacks and small nails are made, the duty of one-half cent per pound was retained (sec. 125, Schedule C), thus leaving only from one-eighth cent per pound, while on the plate and sheets from which tacks and small nails are made, the duty of one-half cent per pound was retained (sec. 125, Schedule C),

a duty of only three-tenths cent per pound under the provisions of section 133 of Schedule C, thus giving a protection of \$9.67 per 100 pounds to the labor making steel wood screws, or approximately 37

a duty of only three-tenths cent per pound under the provisions of section 133 of Schedule C, thus giving a protection of \$9.67 per 100 pounds to the labor making steel wood screws, or approximately 37 per cent.

These comparisons are made not for the purpose of trying to show that the other products referred to are unduly protected, but as a basis for an inquiry as to why the tack manufacturer should be the "gort."

What the present views of the Ways and Means Committee may be in this connection we, of course, can not say, but assuming that the bill which passed the House of Representatives on January 29, 1012 (H. R. 18642), represents its views, a still further injustice would be done to the tack-making industry, as that act placed tacks upon the free list, while a duty of 15 per cent ad valorem is retained upon the free list, while a duty of 15 per cent ad valorem is retained upon the free list, while a duty of 15 per cent ad valorem is retained upon the free list, while a duty of 15 per cent ad valorem is retained upon the free list, while a duty of 15 per cent ad valorem is retained upon the free list, while a duty of 15 per cent ad valorem is retained upon the free list, while a duty of 15 per cent ad valorem is retained upon the free list, while a duty of 15 per cent ad valorem is retained upon the free list the free list the fermany on January 1, 1912, as from \$33.32 to \$34.51. Allowing the American differentials for sheets of heavier gage—sheets gaging from 17 to 21 which are used in tack making—would make the price for such sheets \$29.32, as against the lowest price quoted in this country for the last 10 years, at least, of \$31. With tacks upon the free list the German tack manufacturer, buying his raw material at a price lower than it has been sold in this country under the severest competition, and with labor at little more than one-half the cost in this country, would only have the freight against him—approximately 10 cents per cubic foot from Antwerp to New York—or not to exceed \$2.75 per ton c. i

dian duty.

In view of these facts, are we not entitled to better consideration, and will you not render us such assistance as you can in seeing that our business receives it?

Respectfully, yours,

ATLAS TACK Co., WM. F. DONOVAN, President.

The honorable the Senate Committee on Finance, United States Senate, Washington, D. C.:

Referring to paragraph 197, Schedule C. Payne-Aldrich tariff. House of Representatives (the Underwood bill, No. 3321), Schedule C, paragraph 167, and free list, paragraph 451, now pending in the Senate: SEWING MACHINES.

We would respectfully invite the attention of the committee to the following facts relating to sewing machines as an industry, the tariff rate and classification under the present law, and the proposed removal of duties and reclassification under the Underwood bill.

THE INDUSTRY.

of duties and reclassification under the Underwood bill.

THE INDUSTRY.

Following the invention of the sewing machine and for years thereafter, while enjoying the protection of basic patents and the natural growing demand for a mechanical device which revolutionized so important a department of industrial and domestic life, the manufacture and marketing of sewing machines was admittedly a profitable business. This favorable condition was in a measure continued by tariff duties upon imports based upon the difference in the scale of wages paid by foreign manufacturers and that paid in this country. It was continued, too, by the fact that most foreign-made machines were for a time but crude imitations of American machines and by the further fact that the names of the first American inventors conferred prestige on the American machine in all foreign markets.

This is all ancient history, for the relation of which we beg your indulgence, but it is necessary for you to understand the basis for the wide misunderstanding of and misinformation regarding the industry. The popular belief that the business is vastly profitable, that American manufacturers are selling American-made machines in Europe cheaper than in America, or that American makers have any considerable trade in Europe is a legacy from a former generation.

The product of foreign sewing-machine manufactories, especially those of Germany, in quality of material used, efficiency in skilled workmanship and finish is now equal to our own. Great Britain excepted, the markets of Europe are practically closed to us by tariff duties as high or higher than those of the United States under the present law, while the foreign manufacturer has a labor cost not more than 50 per cent of the cost of American manufacturers. Over an imaginary line on the north, Canada, with a duty of 30 per cent ad valorem, practically holds that market for her own capital and labor. By reason of low tariff duties and our early entrance into that market, South America affords us a somewhat

#### CLASSIFICATION.

We ask your attention to paragraph 197, Schedule C, of the present law, where sewing machines are classed with machine tools, printing presses, and other items bearing a duty of 30 per cent ad valorem. We are of the opinion that every item named in that rate of duty in the above paragraph enjoys some degree of protection from patents, except the sewing machine made for domestic use. The first two items named above are placed upon the dutiable list (par. 167, Schedule C, in the Underwood bill), while sewing machines are placed upon the free list (par. 451). Why do not sewing machines need the same degree of protection? Whatever value there may be in a "dumping clause" against a producing country, where lower costs of production prevail than in the country whose market is sought, is it entirely fair to deprive the one item which needs it most of whatever advantage might accrue?

accrue?

It is said that sewing machines afford no appreciable revenue under the present law at 30 per cent ad valorem (\$21,000 in 1912). That revenue surely can not be increased under the Underwood bill, but it might be if the duty were not prohibitive and sewing machines restored to the dutiable list.

#### RECIPROCAL BASIS.

Speaking only for our own company (though we believe we express the views of all our home competitors in the industry with one exception), we submit to your honorable committee that we can not see any other than disastrous consequences to both ourselves and our employees if the proposed bill, unchanged, becomes a law. We wish not to seem unreasonable nor unmindful of the sense of obligation resting upon the majority in Congress to correct tariff abuses wherever found and to make a fair and satisfactory revision of the law, but we believe justice can only be done our industry and the views of low-tariff advocates reconciled by reciprocal adjustments with producing countries. We believe it worth your consideration to reflect that the world production of sewing machines has attained a balance in quality and workmanship that makes less difficult the abolishment of tariff advantage, and the United States might afford to make the first overtures for its reciprocal abolition without destroying our home industry as a preliminary step. Free trade could only be fair or even tolerable with the freedom going as well as coming. This, we think, everyone must concede.

#### SEWING MACHINE COMPANIES.

The Singer Sewing Machine Co.. as all know and agree, is the dominating force in the industry. It is thought to control at least 50 per cent of the American trade and a much larger proportion of the foreign trade. Aside from its factory in the United States it has even large ones in Scotland, Germany, Russia, and Canada. Its foreign workmen and operatives constitute perhaps 75 per cent or greater of its mechanical force. It is for this reason that for all import or tariff purposes the company is practically regarded as a foreign company. It manufactures special machines for a great variety of uses by power as well as machines for domestic or family use. It is not, therefore, concerned, so far as we know, about tariffs by this or any other country. It is everywhere behind the tariff wall and secure.

INDEPENDENT COMPANIES.

There are seven independent companies so called manufacturing

everywhere behind the tariff wall and secure.

INDEPENDENT COMPANIES.

There are seven independent companies, so called, manufacturing sewing machines in the United States, as follows:

National Sewing Machine Co., Belvidere, Ill.; capital, \$1,050,000. Incorporated under the laws of Illinois.

Free Sewing Machine Co., Chicago, Ill.; capital, \$500,000. Incorporated under the laws of Illinois.

Foley & Williams Manufacturing Co., Chicago, Ill.; capital, \$500,000. Incorporated under the laws of Illinois.

New Home Sewing Machine Co., Orange, Mass.; capital, \$3,000,000. Incorporated under the laws of Massachusetts.

Davis Sewing Machine Co., Dayton, Ohio; capital, \$1,200,000. Incorporated under the laws of Ohio.

Standard Sewing Machine Co., Cleveland, Ohio; capital, \$869,000. Incorporated under the laws of Ohio.

White Sewing Machine Co., Cleveland, Ohio; capital, \$1,098,000. Incorporated under the laws of Ohio.

These companies manufacture and market machines of a variety of grades and types, but their product is almost exclusively designed for domestic or family use. They are "independent" in the sense that they are all competitors one with the other, and also "independent" of and in no manner connected with the Singer Co. The combined capital of these companies is approximately \$8,500,000. They produce about 650,000 machines per annum. They employ about 6,500 operatives. Skilled labor is paid from \$3.50 to \$5 per day and unskilled labor from \$1.75 to \$2.50 per day. It is estimated that between 75 and 80 per cent of the cost of manufacture is labor cost. So far as our company is concerned, and we believe it may also be said of the six other independent companies, our books and any technical information of which we are possessed will be freely at the service of the committee, and we tender our assistance and cooperation as far as it may be desired by your committee for the purpose of arriving ultimately at a just and satisfactory adjustment of the tariff question as affecting our industry; and we ask that sewing

THE NEW HOME SEWING MACHINE Co., By James M. Richardson.

Mr. PENROSE. Mr. President, when the metal schedule was under consideration I asked to have paragraph 143, relating to umbrella and parasol ribs and stretchers, passed over. I did not persist in that request, and I believe the paragraph has been agreed to; but I desire, before we leave the dutiable part of this bill, in about three minutes, if the committee will permit me, to explain the unequal way in which this bill operates on umbrellas, merely as an illustration. Paragraph 143 pro-

Umbrella and parasol ribs and stretchers, composed in chief value of iron, steel, or other metal, in frames or otherwise, and tubes for umbrellas, wholly or partially finished, 35 per cent ad valorem.

A considerable reduction from the Payne rate.

The articles referred to in that paragraph, Mr. President, are the thin metal tubes and wires of an umbrella. To show how little the consumer will be benefited by the proposed reduction, I will state that those articles are furnished to the trade which assembles the umbrellas into the final covered form in which they reach the consumer, according to my recollection-I have not the figures here-anywhere from 4, 5, 6, 10, or 11 cents for the whole umbrella. Therefore these tubes and wires of delicate workmanship entering into the cost of the umbrella of ordinary use, which retails for \$1, \$1.50, or \$2, are furnished at from 5 to 10 cents.

There are about six small concerns-moderate-sized concerns-making these articles, scattered through Pennsylvania and New Jersey. They have had a hard time getting along. Some of them have been embarrassed financially and have got into the hands of receivers. The last information I had from them, about a month ago, was that they were working about half time. It is a story that will fall on callous ears, I suppose; but this particular article is made in Japan, and it will be absolutely impossible for the American manufacturers, at the American rate of wages, to stand up very long against the Japanese importation at that rate of duty. So much for the

first article entering into an umbrella.

Then we come to paragraph 326, on "woven fabrics, in the piece or otherwise, of which silk is the component material of chief value," and so on, "45 per cent ad valorem." That is a considerable duty levied on the silk, which is largely

the principal element in the cost of an umbrella, for it is the cover of an umbrella. The frames are made in the eastern part of Pennsylvania and in New Jersey, as I have said. The silk is made in all the Eastern States, but notably in Pennsylvania and in New Jersey. Then, in other sections the actual umbrella is manufactured, which consists very largely in the assembling of the various parts of the umbrella, putting in the wire rods, and then covering the frame with the silk.

Now, see where the final manufacture is left under the devious course of these preliminaries in this bill. A correspondent

The main thought apparent in its construction is the lightening of the duties upon the raw materials essential to American industries without any lowering of the tariff upon the manufactured product commensurate with the proposed relief of the imported raw materials. In the exceptional case of the industry we represent, by what seems to us has been an oversight, this policy has been departed from, with the inevitable result—if the bill becomes operative—of a serious crippling if not total destruction of an important branch of industry representing millions of invested capital and active business and employing thousands of operatives. sands of operatives

The concern to which I now refer is located in Lancaster, Pa.:

The work of our factories is the assembling of the parts, i. e., buying the parts made by others, putting them together, and placing them on the market. Heretofore the duty on manufactured umbrellas and parasois has never been less than the duty on the component parts. From this historic fact, and because its continuance seemed to be entirely in line with the main purposes of the proposed new tariff system, no brief was filed nor appearance made on our behalf before the Ways and Means Committee.

As the bill stands (comparing Schedule N, par. 394, p. 97. with Schedule L, par. 326, p. 79) the duty on silk cloth and silk mixed cloth—the costliest component of our manufacture—is fixed at 45 per cent, while the duty on the manufactured article into which these enter is only 35 per cent—10 per cent less. The situation places the American manufacturer and workman entirely at the mercy of foreign competition, and permits the importation of the finished product at a lower rate of duty than the raw materials separate.

There is absolutely free and keen competition in the umbrella and parasol industry, and while it can doubtless meet foreign competition if the duty on the finished product is at least as great as the maximum of the parts, yet we can not survive with a duty of 45 per cent on silk cloth and only 35 per cent on the finished product.

Thus, Mr. President, a cheeseparing policy is adopted on um-The concern to which I now refer is located in Lancaster, Pa.:

Thus, Mr. President, a cheeseparing policy is adopted on umbrella frames, which will undoubtedly destroy six or eight moderate sized plants, and at the other end of the line by the failure to provide for adequate reductions on the silk the manufacturers of the finished umbrella or the parasol are likely to be unable to compete with the foreign manufacturers.

Mr. CUMMINS. Mr. President, I desire to offer an amend-

The VICE PRESIDENT. The Chair understands this paragraph was passed over at the request of the Senator from Utah [Mr. Smoot], made in behalf of the Senator from Pennsylvania [Mr. Penrose]. The Chair desires to inquire whether the paragraph can now be taken up and disposed of?

Mr. SIMMONS. Mr. President, my understanding was that we adopted that paragraph. I understood the Senator from

Pennsylvania agreed that it might be disposed of.

Mr. PENROSE. I withdrew my request, and simply brought the matter up before we proceeded to other parts of the bill.

Mr. SIMMONS. That is my understanding. Then, I ask

that that paragraph be acted on now. Mr. PENROSE. I think it has been acted on.

Mr. THOMAS. No; it has not.
Mr. PENROSE. Very well; let it be acted on now.
Mr. SIMMONS. I thought it had been acted on, but the
presiding officer says otherwise. I should like to have it acted on now

The Secretary. Page 96, paragraph 396——
Mr. SIMMONS and Mr. SMOOT. That is not the paragraph.
Mr. THOMAS. The paragraph is 143.
Mr. LODGE. The umbrella and parasol paragraph.
Mr. THOMAS. Schedule C, paragraph 143.
The VICE PRESIDENT. Paragraph 326 went over at the request of the Senator from Utah for the Senator from Pennsylvania.

Mr. SMOOT. No; Mr. President-

The VICE PRESIDENT. It has been read in connection with paragraph 143, which will now be read.

Mr. SMOOT. No, Mr. President; I asked that paragraph 326 go over, and said that I myself intended to offer an amendment to it. That is the broad silk paragraph, but paragraph 143 relates to umbrella and parasol ribs and stretchers. I requested that that be passed over on account of the Senator from Pennsylvania desiring to speak upon it; and, subsequently, I withdrew that request.

Mr. LODGE. That paragraph has now been disposed of.

Mr. SIMMONS. It is paragraph 143 on which I ask action now.

The VICE PRESIDENT. It has been read; there are no amendments to it.

Mr. CUMMINS. Mr. President, I offer an amendment, to be inserted in the bill immediately following paragraph 659.

The SECRETARY. On page 164, after line 5, it is proposed to

insert the following

The VICE PRESIDENT. The Chair will inquire of the Senator from Iowa if this is an amendment to the amendment proposed by his colleague [Mr. KENYON]?

Mr. CUMMINS. It is not.

The VICE PRESIDENT. But, nevertheless, it is an amendment proposed to follow paragraph 659.

Mr. CUMMINS. Is the amendment proposed by my colleague pending?

The VICE PRESIDENT. It has been referred to the committee. The Chair only made the statement in order that the

record might be kept clear.

Mr. CUMMINS. This is another amendment to follow the last paragraph of the free list. I do not care whether it takes its place after the amendment proposed by my colleague or before it. That is entirely immaterial, because the two amendments do not cover the same subject at all.

The VICE PRESIDENT. The Secretary will prepare the rec-

ord so that there will be no question about it. The amendment

will be stated.

The SECRETARY. On page 164, after line 5, it is proposed to in-

sert a new paragraph, as follows:

sert a new paragraph, as follows:

It shall be unlawful from and after January 1, 1914, for any common carrier to charge, collect, or receive a higher rate for the transportation of any of the articles or commodities hereinbefore mentioned, or of substantially similar articles and commodities having been grown, produced, or manufactured in the United States, over the same line in the same direction than it charges, collects, or receives for the transportation of such articles or commodities when imported into the United States from a foreign country; and all through rates between common carriers bringing such imported articles or commodities to this country and carriers transporting them into the interior are hereby declared to be unlawful.

No common carrier in conforming to the foregoing provision shall increase any rate without the approval of the Interstate Commerce Commission, entered after a full hearing upon an application for such increase.

Mr. SIMMONS. Mr. President, I ask the Senator from Iowa if he will not permit that amendment to be referred to the

Finance Committee?
Mr. CUMMINS. I understand the Senator from North Carolina to suggest that the amendment be referred to the Committee on Finance.

Mr. SIMMONS. That was my suggestion.

Mr. CUMMINS. I do not intend to resist that suggestion. am very anxious that the amendment shall be adopted, and I shall be very glad if the committee will carefully consider it. I submitted the amendment long ago, and it was formally referred to the Committee on Finance; but I assume that, in the great variety of work in which it has been engaged, this amendment has not challenged the committee's attention. quite willing that the amendment shall be so referred, simply saying that when the committee reports it or before the pending bill passes from consideration as in Committee of the Whole, I expect to discuss the matter at reasonable length.

The VICE PRESIDENT. The proposed amendment will be

referred to the Committee on Finance.

Mr. SIMMONS. I ask that section 2, known as the incometax section, be taken up, and that the Secretary read it.
Mr. WILLIAMS. Mr. President, that section having been taken up I want to call attention to the fact that the Senator from New York [Mr. Root] has offered an amendment, which is pending, in which he seeks to cure what he concedes to be a defect in the bill, to wit, the basing of the income tax upon the income of the year preceding the enactment of the income-tax law itself.

I hold in my hand, Mr. President, a letter from the Attorney General, transmitting a memorandum from the Department of Justice, being an opinion of the special assistant to the Attorby Representative Hull, of Tennessee, who was for the major part the draftsman of the income-tax provision as it left the House; I also hold in my hand a very able opinion prepared at the request of the Finance Committee by the Senator from Tennessee [Mr. Shields], all upon this subject, and demonstrating, as I conceive, that the position taken by the Senator from New York is untenable. I ask unanimous consent to insert them in the RECORD for the benefit of Senators, so that they may be read to-morrow.

The VICE PRESIDENT. Is there objection? The Chair

hears none,

The matter referred to is as follows: THE INCOME TAX (S. DOC. 171).

Memorandum prepared by Representative Hull, of Tennessec, August 5, 1913.

THE INCOME TAX (S. DOC. 171).

Memorandum prepared by Representative HULL, of Tennessee, August 5, 1913.

The amendment proposed by Senator Root on July 18, 1913, is based upon the theory that the proposed income-tax law can not reach for taxation any income accruing prior to the date of its taking effect, which was required to be taxed under the rule of apportionment under the decision in the Pollock case, even though such income accrued subsequent to the ratification and promulgation of the income-tax amendment to the Constitution. The essence of this contention is that within the meaning of the proposed tax law the tax is limited to the particular iacome as a specific fund out of which the tax is to be taken, and also that such income becomes principal whenever received, and that principal, therefore, can only be reached for taxation by apportionment, notwithstanding the effect of the recent amendment and the usual method of levying and measuring income taxes by the rule of uniformity as embraced in the proposed law and in former laws and practices of the United States Government.

Prior to the Pellock decision Congress had exercised the broadest power to impose the tax on incomes by the rule of uniformity, from whatsoever source derived. The great question raised in the Pollock case did not go to the power had been exercised according to the method prescribed by the Constitution—that is to say, whether a power to tax, limited only by one exception and two qualifications, was being used according to the restrictions as to the method prescribed for its exercise. The Pollock decision held that only certain classes of incomes were excise taxes and as such leviable by the rule of uniformity, while certain other classes, viz, rent of real estate, and incomes derived from invested personality, were of such a nature that a tax laid upon the same constituted a direct tax, and which must fall under the rule of apportionment. Prior to this decision the policy of the Government and the decisions of the courts were to t

taken for the measure of all future years.

Again—

"unless the Constitution prohibits retrospective legislation, the basis of the assessment of taxes may as lawfully be retrospective as the reverse; that is to say, it may as well have regard to benefits theretofore received as to those that may be assessed thereafter." (Cooley on Taxation, 3d Ed., 492.)

Retrospective legislation is not prohibited.

In Drexel & Co. v. Commonwealth (46 Pa. St., 31, at p. 40) the Supreme Court said:

"It is clearly constitutional as well as expedient in levying a tax upon profits or income to take as a measure of taxation the profits or income of the preceding year. To tax is legal, and to assume as a standard the transactions immediately prior is certainly not unreasonable."

Additional authorities might be cited to the same effect. As stated, these authorities only had in mind the imposition of an income tax as an excise or indirect tax by the rule of uniformity, whereas it should be borne in mind that under the Pollock decision incomes from rent of real estate and invested personalty are direct taxes, and until the ratification of the recent amendment could only be levied by apportionment.

The recent amendment, however, provided that Congress might impose a tax on incomes without apportionment, whether considered as direct or indirect taxes. It is evident, therefore, that in so doing the rule of uniformity must govern. The question then arises as to whether Congress may thus impose a tax upon all incomes from whatever source derived, whether considered direct or indirect taxes, in the same manner in all essential respects that it had, previous to the Pollock decision, imposed the tax upon incomes as an excise and under the rule of uniformity. If so, it necessarily follows that the tax may be measured by all income accruing from and after the ratification of the constitutional amendment.

Does not the very nature and purpose of a tax on incomes accord with the foregoing view? In the broad and usual sense of tax laws the Government, for example, might impose a tax upon property according to its value by a direct and specific levy upon the property itself, and in concrete form, either real or personal; this would be done by apportionment; or if it was sought to impose a capitation tax, which is one upon the person solely, without any reference to his property, real or personal, this would be effected by apportionment, while, upon the other hand, a tax laid upon any business, or franchise, or employment, or income would fall under the rule of uniformity.

The Pollock decision held the income tax invalid not on the ground that income could become capital and escape the tax, but on account of its origin; that it was, in effect, a tax on realty and personality. The only proper inquiry in the light of the recent amendment, therefore, is not as to the origin or disposition of the income in question, but what amount of income accrued to a taxable individual during a given period. It must follow that the account of annual income required of a citizen is for the purpose solely of ascertaining what amount of tax ought to be imposed upon him in consequence of his having made profits and collected by the Govern

In the language of the Supreme Court (8 Wall., 234):

"The tax is payable by the person because of his income, according to its amount and without reference to the way in which it was obtained to be an expected to the substitution of the country of the country

"One which relates to the product or income from property or business pursuits." (97 Ky., 394; 30 S. W., 973.)

Under the general property laws of the States the taxable status of property, real and personal, relates to the date fixed by law for its assessment. The assessment, when later made, must fix its value as of this date. This may be any day during a taxable year. (141 Ind., 159; 109 Fed., 726.)

An income tax is assessed and collected during the year subsequent to the accrual of the income returned and by which the tax is measured. Under a tax imposed with respect to net incomes the citizen may be required to return for the purpose of the measurement of the tax either his income for the preceding year, or his average income for a designated number of preceding years, or his estimated income for the current year. That view is sustained by previous citations herein.

for the current year. That view is sustained by previous citations herein.

It therefore follows that Congress at least during any period of the present year may impose and collect a tax on all incomes accruing subsequent to the promulgation of the recent constitutional amendment, and it is strongly probable that the constitutional amendment had the effect to empower Congress to measure the tax by all income accruing from the 1st day of January last. The power to impose the tax has existed during the entire year, and there has been no impediment to its imposition under the rule of uniformity during most of the year, and under the weight of authority in the States, together with the construction placed upon the National Constitution by the Supreme Court in the Legal Tender and other cases, no reason appears why the tax now proposed could and should not be measured by the income accruing from the first of the year.

Such latter provision would provide for the doing of no act prior to December 31 next which would otherwise have been done by the citizen. It would undo nothing; it would neither take away nor impair any vested right. (4 Nev., 313.)

"The language of a constitutional amendment should be read in connection with the known condition of affairs out of which the occasion for its adoption may have arisen, and then construed if there be therein for its adoption may have arisen, and then construed if there be therein forward the known purpose or object for which the amendment was adopted." (Maxwell v. Dow, 176 U. S., 581.)

DEPARTMENT OF JUSTICE, OFFICE OF THE ATTORNEY GENERAL, Washington, D. C., August 6, 1913.

Hon. F. M. SIMMONS, United States Senate.

Wy Dear Senator: Replying to your letter of July 30, in which you inclose an amendment offered by Senator Root to the income section of House bill 3321, together with his remarks at the time of its introduction, and asking for my views with reference to the Senator's contention, permit me to say:

I am sending you two separate memorandums, one which Congressman HULL very kindly prepared upon my request, and the other prepared by one of the assistants in the department. I hope they will answer your demands.

It seems to me that the Senator's proposition is not well founded. The practice in the past, the necessity for moving along practical lines with respect to tax matters, together with the other suggestions contained in the inclosed memorandums, are adequate to overthrow his contention.

With best wishes, faithfully, yours,

J. C. McReynolds, Attorney General.

RE MR. ROOT'S PROPOSAL TO AMEND INCOME-TAX LAW.

[Memorandum for the Attorney General by T. M. Gordon, July 31, 1913.] Mr. Root suggests that the income-tax law must be amended to operate only from the date of passage. His theory is that income, once accrued, becomes principal. Hence there can be no such thing as an "income tax" on past income Such a tax is a tax on principal, a direct tax, still requiring apportionment, despite the fifteenth amendment. I do not agree with Mr. Root.

The whole question turns upon what the words "taxes upon incomes from whatever source derived" mean as used in the sixteenth amendment.

The whole question turns upon what the words "taxes upon incomes from whatever source derived" mean as used in the sixteenth amendment.

An income tax is sul generis. It is a legal fiction, a purely metaphysical conception, very difficult to define or classify. It seems to me, however, that it must be treated in a practical sort of way, and that the definition which Mr. Roor's argument assumes builds up an unduly elaborate legal fiction, unwarranted by authority and very unfortunate in its results.

Of course Mr. Roor can not have in mind that a tax to be an income tax must actually be collected, or even assessed, before income ceases to be income. Such a requirement would be wholly impossible to comply with. For example, such a requirement would render it improper to assess the tax upon income for the preceding year, as is done by this law, and as is the universal custom of income-tax laws both in this country and in England.

Apparently Mr. Roor does assume, however, that a tax can not be a "tax upon income" unless the law levying the tax is in active operation at the precise instant that the income accrues, so that it may then selze upon the income constructively; i. e., in legal fiction. The law is conceived as a sort of invisible net interposed between the individual and his source of income. The Federal 1 per cent is caught, branded, and turned loose again, as it were, to be counted and collected at a later day by the assessor. Of course physical analogies can not express precisely how the legal fiction solves such difficulties as the fact that any individual's yearly income can not be known till the end of the year, or the situation of the merchant who may gain in one transaction and lose in the next; nevertheless it must be admitted that such a conception of a tax on income, though very refined and metaphysical, is intellectually possible.

I do not think, however, that usage, as evidenced by prior laws upon the subject and by judicial decisions, has ever restricted the meaning of the words to tax laws

a fashion.

I. First, as to the word "income," I do not think that word necessarily implies a specific fund from which the tax must be taken. A man who possessed no vested right to anything might properly say, "My present income is \$5,000 a year." If that is his "present income," why may he not be taxed upon it?

II. That leads to the significance of the word "upon." This word is used in such a wide variety of ways that it is very difficult to define exactly what we do mean when we say a tax "upon" anything. Taxes,

generally speaking, are really contributions from persons, who are classified for tax purposes with reference to various characteristics, as ownership of land, carrying on a certain kind of business, etc. The factor or factors with reference to which individuals are classified is usually said to be the thing "upon" which the tax is levied. (24 Harward Law Review, pp. 41-42). Thus Mr. Kennan, in his recent book on Income Taxation, defines an income tax as "a tax the amount of which is determined with reference to the income of the taxpayer" (p. 9). In other words, "upon" usually means "with reference to," or "based upon", or "meased upon", or "meased upon", or "meased upon", or "meased upon income or measured by income, not carved out of a specific fund of income.

In this sense a tax can be "upon" a thing which a person no longer owns or a state of things which has now ceased to exist. As Mr. Cooley says (Cooley, Taxation (3d Ed.), pp. 492, 493, 494):

"Unless the Constitution prohibits retrospective legislation the basis of an assessment of taxes may as lawfully be retrospective as the reverse; that is to say, it may as well have regard to benefits theretofore received as to those which may be assessed thereafter. (Locke o. New Orleans, 4 Wall., 172, p. 492.)

"" No "n in apportioning the tax between individuals is there any valid objection to making it on consideration of a state of things that may now have come to an end; as where a tax is imposed on the extent of one's business for the year to come. (Drexeli v. Commonwealth, 46 Pa. St., 31; People v. Gold Co., 92 N. Y., 383.) " One may be taxed upon property which he has long ceased to own when the tax is levied" (pp. 493-494).

Locke v. New Orleans (4 Wall., 172), cited supra, held a State statute imposing an additional tax on property according to the assessment for the previous year, and also according to the assessment for the previous year, and also according to the assessment for the previous year, and also according to the assessment for the previous

amount of the same, with the interest and other expenses of collection until paid.

"It is clearly therefore perfectly constitutional as well as expedient, in levying a tax upon profits or income, to take as the measure of taxation the profits or income of a preceding year. To tax is legal, and to assume as a standard the transactions immediately prior is certainly not unreasonable, particularly when we find it always adopted in exactly similar cases. The tax is graduated upon each individual upon his individual receipts."

In People v. Gold Co. (92 N. Y., 383) a tax upon the franchises of corporations, based upon dividends for the year preceding the passage of the law, was upheld.

"The fact that the amount of the tax may in some cases be fixed by reference to the business of the company during the year does not make the act retrospective. The burden it imposes is future and for future expenditures. It is competent for the legislature to adopt such method of valuing the franchises or property of corporations for the purpose of taxation as it deems proper" (pp. 390-391).

In Glasgow v. Rouse (43 Mo., 479) an additional tax on incomes, levied according to the assessment of the preceding year, was upheld. The court declared this to be "in entire harmony with the then existing revenue law, which provided that the taxes collected for any year should be based on an assessment made for the previous year" (p. 488). IH. As appears from the cases supra, the courts do not go through an elaborate fiction to prove that the income is still income at the time the tax attaches. An income tax is still an income tax whether it is levied on this year's income or last year's income or (as has actually been done in the case of professional incomes by the English income-tax statutes since earliest times) on the average income for a period of years.

Furthermore, every one of the earlier Federal income-tax statutes and period of years.

Income-tax statutes since earliest times) on the average income for a period of years.

Furthermore, every one of the earlier Federal income-tax statutes and every one of the English statutes that I have examined not only based each year's tax upon the income for the preceding year, but also based the tax for the first year upon income which had already accrued before the passage of the act. It is only fair to assume that the kind of income tax to which the sixteenth amendment refers is the kind of income tax which had been called an income tax in Federal statutes and levied and collected many times theretofore.

The Federal income-tax laws are as follows:
Act of August 5, 1861 (12 Stat., 292):

"The tax herein provided shall be assessed upon the annual income of the persons hereinafter named for the year next preceding the time for assessing said tax, to wit, the year next preceding the time for assessing said tax, to wit, the year next preceding the time for assessing said tax, to wit, the year next preceding the time for assessing said tax, to wit, the year next preceding the time for assessing said tax, to wit, the year next preceding the time for everying and collected upon the income for the year ending the 31st day of December next preceding the time for levying and collecting such duty; that is to say, on the 1st day of May, 1863, and in each year thereafter."

Act of June 30, 1864 (13 Stat., 223, 281, 283):

"And the duty herein provided for shall be assessed, collected, and paid upon the gains, profits, or income for the year ending the 31st day of December next preceding the time for levying, collecting, and paying such duty (p. 281, sec. 116).

Act of July 4, 1864 (13 Stat., 417):

" * " There shall be levied, assessed, and collected on the 1st day of October, 1864, a special income duty upon the gains, profits, or income for the year ending the 31st day of December next preceding the time herein named."

Act of March 2, 1867 (14 Stat., 471, 478, 480):

"And the tax herein provided for shall be asse

Act of March 2, 1867 (14 Stat., 471, 478, 480):

"And the tax herein provided for shall be assessed, collected, and paid upon the gains, profits, and income for the year ending the 31st day of December next preceding the time for levying, collecting, and paying the tax (p. 478).

"Provided, That the tax on incomes for the year 1866 shall be levied on the day this takes effect" (p. 480).

Act of July 14, 1870 (16 Stat., 256):

* * * " the tax hereinbefore provided shall be assessed upon the gains, profits, and income for the year ending on the 31st day of December next preceding the time for levying and collecting said tax, and shall be levied on the 1st day of March, 1871."

Act of August 27, 1894 (28 Stat., 553, s. 27):

"Tax to be levied January 1, 1895, on income for the year ending December 31 next preceding time of levy" (s. 1 and s. 30).

English income-tax laws are as follows:

Act June 22, 1842 (5 and 6 Vict., c. 35): Taxed income from April 5, 1842.

Act June 28, 1853 (16 and 17 Vict., c. 34): Taxed income from April 5, 1853.

English income-fax laws are as follows:

Act June 22, 1842 (5 and 6 Vict., c. 35): Taxed income from April 5, 1842.

Act June 28, 1853 (16 and 17 Vict., c. 34): Taxed income from April 5, 1853.

Since 1860 the English tax has been reenacted annually (16 Halsbury's Laws of England, 609). The act of April 29, 1910 (10 Edward VII and 1 Geo. V. c. 8, s. 65), is an example, which provides:

"(1) Income tax for the year beginning on the 6th day of April, 1909, shall be charged at the rate of 1s. 2d.

"(2) All such enactments as were in force on the 5th day of April, 1909, shall, subject to the provisions of this act, have full force and effect with respect to any duties of income tax hereby granted."

IV. The economic conception of an income tax is against Mr. Root's interpretation.

From the economist's point of view the income tax is a contribution by each individual, based upon his ability to pay, measured by his income. A man's income for the preceding year is the most natural measure of his ability. And, as we have seen above, all previous income-tax measures have been levied on that basis.

Nor would it make the tax a "capitation" tax to consider it in this way. "Capitation" taxes, in the constitutional sense, are poil taxes, levied upon all men equally, without regard to wealth or extrinsic circumstances. (Cooley, Taxation (3d Ed.), p. 28; Hylton v. U. S., 30 Dall., 171; Springer v. U. S., 102 U. S., 586; Head Money cases, 18 Fed., 135, 139; Glasgow v. Rouse, 43 Mo., 480.]

It is true that in Pollock v. Farmers' Loan & Trust Co. (158 U. S., 601) the court stated the economic theory and expressly refused to follow it to its logical conclusion in the case of income from property, insisting upon the necessity of considering also the source whence the income its property, but because the tax reaches back through the income to property is a tax upon the property itself, not because the income to property at a tax upon the property itself, not because the income to property with less measured by its income. As was s arose hereafter. Faithfully,

THURLOW M. GORDON, Special Assistant to the Attorney General,

AMENDMENT OFFERED BY MR. ROOT TO H. R. 8321, JULY 18, 1913. Opinion of Hon. John K. Shields, Senator from Tennessee, furnished Finance Committee at request of the chairman of that committee.

Finance Committee at request of the chairman of that committee.

The section of the bill imposing an income tax is in these words:

"A. Subdivision 1. That there shall be levied, assessed, collected, and paid annually upon the entire net income arising or accruing from all sources in the preceding calendar year to every citizen of the United States, whether residing at home or abroad, and to every person residing in the United States, though not a citizen thereof, a tax of 1 per centum per annum upon such income except as hereinafter provided; and a like tax shall be assessed, levied, collected, and paid annually upon the entire net income from all property owned and of every business, trade, or profession carried on in the United States by persons residing elsewhere."

where."
Subdivision 2 merely provides for an additional tax upon larger incomes in all things as provided in subdivision 1. (Sec. 2, subdivs. 1 and 2, p. 165.)
Thus it plainly appears that the tax is imposed regardless of whether the income or property represented by it had its source in profits or gains from real and personal property or business, and includes them

the income or property represented by it had its source in pronts or gains from real and personal property or business, and includes them all.

The method provided for computing or assessing the tax makes no distinction on account of the source of the income, and is the same whether it arises from property or business. That portion of the billi providing for this, after allowing certain deductions, contains a provision in these words:

"The said tax shall be computed upon the remainder of said net income of each person subject thereto, accruing during each preceding calendar year ending December 31: Provided, however, That for the year ending December 31: 913, said tax shall be computed on the net income accruing from March 1 to December 31, 1913, both dates inclusive, after deducting five-sixths only of the specific exemptions and deductions herein provided for." (Sec. 2, div. D, pp. 172-175.)

The amendment proposed by Mr. Roor, July 18, 1913, is as follows:
"On page 172 strike out the word 'March,' and on page 173 all of line 1, and in line 2 the words 'both dates inclusive,' and insert in lieu thereof the words' the passage of this act."

The object of this proposed amendment, or at least its effect, would be to reduce the measure of the tax imposed for the current year to incomes accruing after the passage of the bill,

The reasons advanced by Mr. Roor in support of the amendment, as stated by him at the time it was proposed, are as follows:

"I have introduced a brief amendment to the tariff bill, which I shall ask to have referred to the Committee on Finance; but I wanted to call the Senators' attention to the precise point of the amendment. It is an amendment to the provision that the income tax shall be computed on incomes accruing from March 1 to December 31, 1913.

"I think the provision will encounter very serious question. The change I propose is to have the income for the first year computed from the passage of the act, rather than from a fixed date—March 1, 1913.

"The reason why I think it would be wise to make the change is that all direct taxes must be apportioned unless they come within the amendment relating to the income tax. We can impose a tax upon incomes without apportioning it because of the amendment, but we can not impose any other direct tax without apportionment. When income is received it immediately becomes principal. The income that was received, became principal, and no law hereafter can tax it without apportionment, any more than we can tax now the income that was received, became principal, and no law hereafter can tax it without apportionment, any more than we can tax now the income that was received for the committee you will find yourselves endeavoring in one sentence to tax income that comes under the amendment, and to tax past income, income received, reduced to possession, and turned into principal before the passage of the act, and that you can not do without apportionment.

"It is to avoid that difficulty, which I am sure is very serious, that I propose the amendment which I now ask to have referred to the Committee on Finance." (Congressional Recomp, p. 2788.)

The argument advanced to support the contention of the Senator is predicated solely upon the assumption that profits, dividends, and other moneys, constituting an income, when received, immediately become "principal," or, in other

especially the receipts of a private person or a corporation from property."

This is the natural and obvious sense of the term, and it is so used in the constitutional amendment and in this bill. The gain, profit, or acquisition constituting the income when it accrues and is ascertained becomes an entity and property as much as a farm, bonds, corporate stocks, or other property from which it may have had its source. That it may automatically immediately become incorporated into the estate of the owner or invested thereafter to yield an income, or is spent, given away, or consumed, does not destroy the property entity of the value it had when it accrued. The fact that the property existed and was owned by the taxpayer at one time is indestructible.

I suppose the objection of the Senator goes only to computations on incomes arising from property, real and personal, and not to those on incomes from business.

The question really presented for consideration is whether the

I suppose the objection of the Senator goes only to computations on incomes arising from property, real and personal, and not to those on incomes from business.

The question really presented for consideration is whether the provision of the bill for the tax for the current year is retroactive in its operation and imposes a liability for taxes before the enactment of the law, and is for this reason unconstitutional.

The constitutional amendment under which this tax in part is imposed without apportionment ordains:

"The Congress shall have power to lay and collect taxes on incomes from whatever source derived, without apportionment among the several States and without regard to any census or enumeration."

It is well settled that—

"The language of a constitutional amendment should be read in connection with the known condition of affairs out of which the occasion of its adoption may have arisen, and then construed, if there be therein any doubtful expressions, in a way, so far as is reasonably possible, to forward the known purpose or object for which the amendment was adopted." (Maxwell v. Dow, 176 U. S., L. Ed., Book 18, p. 597.)

It is a part of the history of this country that much of the personal property owned by everyone, and the great accumulations of wealth in the hands of the few, had for years escaped taxation. They could not be taxed direct without apportionment, which was not deemed advisable. The income-tax law of 1894 was enacted to remedy this injustice and to make this property bear its just proportion of the expenses of the Government.

The Supreme Court of the United States held that tax, in so far as it was imposed upon incomes received from real estate and personal property, to be a direct property tax and, being levied without apportionment, unconstitutional. The tax upon incomes which arose from other sources, and upon which an excise tax could be imposed, was not held void for that reason, but the contrary conceded. (Pollock v. Farmers' Loan & Trust Co., 158 U. S., 618, 630; L. Ed., Bo

1123.)

The sixteenth amendment to the Constitution was proposed and adopted to authorize Congress to impose a tax like that of 1894, after which this is modeled, and which is proposed to be enacted under that power, in so far as it taxes incomes arising from real and personal property. Congress already had the power to impose a tax without apportionment on incomes arising from gains, profits, or other acquisitions in a business ordinarily called an excise tax. (Filint e. Stone Tracy Co., 220 U. S., 106; 55 L. Ed., 398.)

There are two grounds upon which, in my opinion, the tax for the current year can be sustained.

First. The Congress has general power to lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense and general welfare of the United States, unlimited save that duties, imposts, and excises shall be uniform throughout the United States, and no capitation or other direct tax shall be laid unless in proportion to the census or enumeration, directed to be taken decennially, nor on articles exported from other States. (Constitution, Art. I. secs. 8 and 9.)

The Constitution contains no provision prohibiting the Congress from imposing a tax upon property owned or business done by the taxpayer previous to the enactment of the law levying the tax. The general

rule is that the Congress, within constitutional limitations, has absolute power to determine the objects of taxation and the method of the assessment of the tax. (Cooley's Con. Lim., 737; Flint v. Stone Tracy Co., 220 U. S., 167; Weston v. City of Charleston, 2 Pet., 466.)

Therefore if the bill be construed to impose the tax for the current year on account of the ownership of incomes received—property owned and business done previous to the enactment of the law—it is within the power of Congress, without constitutional objection, and valid.

There is no constitutional prohibition of retroactive legislation which will affect this tax. (Black's Con. Law, 753; Cooley's Con. Lim., 529; Satterlee v. Mattheson, 2 Pet., 380 Drehman v. Stifle, 8 Wall., 595.)

If the constitutional amendment changes or authorizes Congress to change the classification of a tax on incomes derived from property from that of a direct tax to that of an excise tax, and the tax here imposed is one of the latter class, then the provision for computing incomes before the enactment of the bill is clearly a mere method of assessment and not only allowable, but usually done in assessing excise taxes. The authorities authorizing this manner of assessment of excise taxes will be hereafter stated.

Second. The provision of the bill requiring incomes received by the taxpayer from all sources, from March 1, 1913, to be computed in ascertaining the tax to be paid for the current year is not the imposition of a retroactive tax, but the method of assessment of the tax imposed for that part of the current year after the enactment of the law, consisting in part of a property tax and in part of an excise tax, and is valid and constitutional.

It is immaterial what the tax is called. The courts will treat it according to its correct classification as ascertained by the legislative intent disclosed in the bill when construed in the light of its legislative and judicial history. I am inclined to think the tax imposed is a property tax in part and an excise tax

tionment, by the constitutional amendment under which it is proposed to be enacted.

It is an excise tax so far as it is imposed on incomes from all other sources, as has been decided by the Supreme Court in many cases.

There seems to be no valid objection to imposing the two classes of taxes in the same law. This was done in the act of 1894 and not considered objectionable. The court, referring to it in the Pollock cases, expressly stated that this point did not affect its decision. (158 U. S., 636; L. Ed., 1125.)

The Congress, within constitutional limitations, has plenary power to select the objects of taxation and the methods by which the tax imposed shall be levied, assessed, and collected. It may, with proper uniformity, tax all the property of the taxpayer or only a portion or a certain kind of it. It may impose an excise tax on all business, avocations, or on part of them. It also has almost unlimited power in providing for the selection of the property to be taxed, and all necessary machinery for the assessment of the same for taxation and for the collection of the tax. These principles are elementary. (Cooley's Con. Lim., 737, 739; Cooley's Taxation, vol. 1, 602-604.)

In the case of Flint v. Stone Tracy Co. (230 U. S., 167; 55 L. Ed., 420) it is said:

"We must not forget that the right to select the measure and ob-

"We must not forget that the right to select the measure and objects of taxation devolves upon the Congress and not upon the courts, and such selections are valid unless constitutional limitations are overstepped."

jects of taxation devolves upon the Congress and not upon the courts, and such selections are valid unless constitutional limitations are overstepped."

All the authorities agree that the basis of an assessment for taxation may be retrospective. (Cooley on Taxation, vol. 1, p. 492.)

The same method, it is true, is here provided for assessing the property tax and the excise tax imposed, but I can see no objection to the bill on this account. It is equally applicable to both taxes and makes the machinery less compilicated and easier of operation. Direct taxation by reason of the ownership of property and an excise tax upon business are merely different methods by which the same end is reached; that is, by which the taxpayer is made to contribute out of his property to the support of the Government.

As before stated, the provision of the bill requiring the computation of incomes received by taxpayers during the periods mentioned in the bill is merely the basis for the assessment of the tax, and it is well settled that incomes received before the law is passed may be considered in ascertaining the tax to be paid for the first year.

The excise case decided by the Supreme Court of the United States sustain these conclusions. They are directly in point in so far as the property taxed arises from incomes from business subject to an excise tax and clearly analogous where the income arises from real and personal property, both of which are to be found in this bill.

The court has held in all these cases that the tax to be collected may be measured by the business done, the prefits made, the dividends accrued, and the gains made for periods previous to the enactment of the law imposing the tax, in some other cases a part of the year, like the present law, and in others the year previous to the tin which the law was enacted.

It is also held that where the basis fixed for the assessment is a percentage on the capital stock or business done by a corporation, and that in this way assets which are exempt from taxation and

and dividends for the purpose of determining the amount of the tax to be enacted each year. The validity of the tax can in no way be to be enacted each year. The validity of the tax can in no way be falled to the constitutional objection lies in the way of a legislative body preserving any mode of measurement to determine the amount it will charge for the privilege it bestows."

Serbing any mode of measurement to determine the amount it will charge for the privilege it bestows."

Sex levied by the State upon railroad corporations for the privilege of exercising their franchise within the State, the tax being fixed by a certain percentage of the transportation receipts of the company, including interstate and foreign commerce, for the previous year. The tax was assailed upon the ground that it was a burden upon interstates and foreign commerce, for the previous year. The tax was assailed upon the ground that it was a burden upon interstate and foreign commerce, for the previous year. The tax was assailed upon the ground that it was a burden upon interstate and the tax. In the opinion, among other things, it is said:

"The character of the tax or its validity is not to be determined by the mode adopted in fixing its amount for any specific period or the time of its payment. The whole field of inquiry into the extent of revenue from sources at the command of the corporation is open to the corporation of the privilege. "It is not to be determined by the mode adopted in fixing its amount for any specific period or the river of the privilege." It is not to the fixed of the year in which the tax is collected it is conceded that the validity of the tax would not be affected; and in to, fixed the privilege were limited to the receipts of certain past years instead of the year in which the tax is collected it is conceded that the validity of the tax would not be affected; and in to, fixed the privilege conferred."

In Stockdale v. Atlanticity of the tax of the previous previously were also as a subsequent of the privileg

vided that—
"the tax herein provided shall be assessed upon the annual incomes of
the persons hereinafter named for the year next preceding the 1st of
January, 1862, and the said taxes when so assessed and made public
shall become a lien upon the property or other sources of said income
for the amount of the same, with the interest and other expenses of
collection until paid." (12 Stat. L., 309.)

Here the tax was imposed upon the incomes accruing between January
1, 1861, and August 5 of that year, the day of the enactment of the
law

1, 1861, and August 5 of that year, the day of the enactment of the law.

The act of July 14, 1862, superseding the one above stated, provided for the assessment upon incomes received from and after January 1 of that year, or for a period of six months before the act was passed.

The income tax of 1894, enacted in August of that year, provided for the taxation of incomes from the beginning of the current year and was attacked upon this ground. The question was not decided in the cases which reached the Supreme Court of the United States, but it was held by the Supreme Court of the District of Columbia in the case of Moore v. Miller, decided January 23, 1895, that there was nothing in the objection. In that case Hagner, J., said:

"This provision is of the same character as those appearing in the former income acts of the United States.

"The first act, passed on the 5th of August, 1861, declared that from and after the 1st of January, 1862, there should be levied an income tax, which should be assessed in the first instance 'upon the annual income for the year preceding the 1st of January, 1862, thus including in return the income that had accrued during the seven months next preceding the passage of the law.

"The act of the 14th of July, 1862, which superseded the first law, declared that the tax should be levied on the 1st of May, 1863, upon the income of the preceding year ending the 31st of December, 1862, including thereby the six months and a half of the year that had expired at the time the act was passed.

"The English act of 1853, passed on the 28th of June, 1853, declared that the income tax thereby established should be operative from and after the 5th day of the preceding April.

"No authority was quoted in support of this contention, and I have been unable to discover any if it exists."

"Allace, 331 (Stockdale e. Ins. Co.), where Mr. Justice Miller said: The right of Congress to have Imposed this tax by a new statute, although the measure of it was governed by the income of the past years, can not be doubted; much less can if be doubted that it could that year had elapsed when the statute was passed. The joint resolution of July 4, 1864, imposed a tax of 5 per cent on all incomes of the previous year, although one tax on it had already been paid; and no one doubted the validity of the act or attempted to resist it."

"This act clearly intended to levy a tax of 3 per cent on the profits or incomes, a similar question was presented and held not to affect the validity of the law:

"This act clearly intended to levy a tax of 3 per cent on the profits or income of the business in which the defendants were engaged. The English income tax and the United States income tax are based upon the incomes received in preceding years. The present United States for the state income tax and the United States income tax are based upon the incomes received in preceding years. The present United States for the Stoff of August. 1561 (12 Stat. L. 200), expressly declares that the tax herein provided shall be assessed upon the annual income of the persons hereinafter named, for the year next preceding the list of January, 1862, and the said taxes, when so assessed and made phones of become a lien upon the property or other resources of said that it is to January, 1862, and the said taxes, when so assessed and made phones of become a lien upon the property or other resources of said neone for become in the profits or income, to take as the measure of traction the profits or income, to take as the measure of traction the profits or income, to a preceding year. To tax is legal, excertainly not unreasonable, particularly when we find it always adopted in exactly similar cases. The tax is graduated upon each indi

Mr. SUTHERLAND. Mr. President, I suggest to the Senator from Mississippi that it might be well to have these opinions

printed also as a Senate document. The matter will be in better type and more readable if we have them printed in that

Mr. WILLIAMS. If that is desired, then I shall also ask that these opinions may be printed as a Senate document. I make that request.

The VICE PRESIDENT. Is there any objection? The Chair

hears none, and it is so ordered.

Mr. BRISTOW. Mr. President, before we begin on the income-tax provision I should like to inquire of the chairman of the Finance Committee when he expects to return to the paragraphs that have been passed over? There must be 100 of them, and it seems to me we ought to know just when we are to take them up and finish them.

Mr. SIMMONS. I am sure that by the time we have finished the income-tax section and the administrative sections of the bill the committee will be through its consideration of the various matters that have been referred back to it. It was our plan then to begin at the beginning and take up each paragraph

and consider and determine the matters that have been passed

Mr. BRISTOW. The Senator desires first to take up the income-tax and the administrative features before he returns to the paragraphs that have been passed over?

Mr. SIMMONS. That is the plan I desire to follow.

Mr. BRISTOW. The reason I spoke of it was that I thought Senators ought to know about when those paragraphs will come up.

I am very glad the Senator asked the ques-Mr. SIMMONS tion, so that I might make a general statement on the subject, because Senators are coming to me and asking me about the matter from time to time.

The reading of the bill was resumed, beginning on page 165, under the heading "Section II."

The next amendment of the Committee on Finance was, in Section II, subdivision 1, page 165, line 2, before the word "and," to insert "collected"; in line 7, after the word "income," to strike out "over and above \$4,000" and insert "except as hereinafter provided"; and in line 9, after the word "levied," to insert "collected," so as to make the paragraph read:

A. Subdivision 1. That there shall be levled, assessed, collected, and paid annually upon the entire net income arising or accruing from all sources in the preceding calendar year to every citizen of the United States, whether residing at home or abroad, and to every person residing in the United States, though not a citizen thereof, a tax of 1 per cent per annum upon such income, except as hereinafter provided; and a like tax shall be assessed, levied, collected, and paid annually upon the entire net income from all property owned and of every business, trade, or profession carried on in the United States by persons residing elsewhere.

The amendment was agreed to.

The Secretary proceeded to read subdivision 2, on page 165, and read down to line 20, as follows:

Subdivision 2. In addition to the income tax provided under this section (herein referred to as the normal income tax) there shall be levied, assessed, and collected upon the net income of every individual an additional income tax (herein referred to as the additional tax) of 1 per cent per annum upon the amount by which the total net income exceeds \$20,000 and does not exceed \$50,000.

Mr. BORAH. Mr. President, I am not going to enter upon any extended discussion of this provision, but I suggest to the committee, or to the Senators having this part of the bill in charge, that it seems there ought to be a different arrangement and proportion with reference to the surtax.

The bill now reads:

One per cent per annum upon the amount by which the total net income exceeds \$20,000 and does not exceed \$50,000, and 2 per cent per annum upon the amount by which the total net income exceeds \$50,000 and does not exceed \$100,000, and 3 per cent per annum upon the amount by which the total net income exceeds \$100,000.

If I were permitted to have my way, I would have the provision read as follows:

One per cent per annum upon the amount by which the total net income exceeds \$10,000 and does not exceed \$30,000, and 2 per cent per annum upon the amount by which the total net income exceeds \$30,000 and does not exceed \$50,000, and 3 per cent per annum upon the amount by which the total net income exceeds \$50,000 and does not exceed \$100,000, and 4 per cent per annum upon the amount by which the total net income exceeds \$100,000.

I think we ought to bear in mind that which is proven to be well founded in experience, and that is that the man with a small income always pays more completely upon his income than the man with a large income. If a man has an income of \$5,000 a year, he will come closer to paying the tax upon \$5,000 a year than the man who has an income of \$40,000 a year. presume that has been the experience of all countries with reference to this matter. Therefore, if we are going to reach proportionately the men with large incomes, it seems to me we must raise the grade of taxation more than is here specified.

I think I shall not offer the amendment formally, because I presume the matter has been thoroughly considered by the committee and the amendment would not prevail. But if it is the design of the committee to reach the man who pays \$50,000 as fully as the man who pays \$20,000, they will have to change the rate of tax from that which is found in the bill. Besides, I think a person who has an income of \$100,000 a year can well afford to pay a tax of 4 or 5 per cent upon that amount, and he will not suffer inconvenience in so doing, and it will not be so difficult for him to part with that amount of money as in the case of the man who pays the rate here proposed upon an income of \$10,000 or \$15,000 a year.

Mr. BRISTOW. Mr. President, if the Senator will yield for a moment, I desire to offer an amendment to this part of the bill. I have not the amendment prepared now, because I had no idea this part of the bill would be taken up this afternoon, and I do not wish to be foreclosed from offering the amendment in the morning.

Senator from Idaho [Mr. Borah]. There is a fiscal question involved here as well as an economic question. With us the fiscal question is of first moment.

The Senator from Idaho is evidently discussing this matter largely from the economic standpoint. There is a difficulty always confronting a body that has to pass upon the question of where an income tax should begin. In England it begins with an income of £160, about \$800. Here we have fixed it at \$3,000, or at nearly four times as high an amount.

It is difficult to grade an income tax on the theory on which the Senator from Idaho proceeds. Of course it requires about so much to sustain a family. While there are large differences as to the amount of income required in this station in life and that station in life, the question confronting us was a fiscal question, a question of raising sufficient income which, added to

other income, will pay the expenses of government.

Mr. GALLINGER. If the Senator will permit me, the Senator suggested that we had fixed the minimum at four times that of Great Brittin, or more than that. Has not the committee fixed it at \$3,000 by amendment?

Mr. WILLIAMS. It has fixed it at \$3,000 for a single man, and \$4,000 for a man with a family.

Mr. GALLINGER. So that it would be a little less than four times as much.

Mr. SHIVELY. The minimum would be a little less than four times as much.

Mr. GALLINGER. Precisely.

Mr. BORAH. I do not understand the difficulty in the fiscal proposition as applied to my amendment. It does not make any difference, except that it is calculated to raise more revenue. Senators on the other side may be assured that they will not have any surplus. Besides that, if there is going to be a remitting of taxes it can very well afford to be elsewhere than upon fortunes which bring in an income of \$100,000 a year.

I do not see where the difficulty arises as to the fiscal proposition. I realize perfectly how difficult it is to adjust an income tax in the first instance to all conditions, but I do not understand at this time where the difficulty arises with reference to this particular suggestion.

The Senator from Indiana [Mr. SHIVELY] has referred to the fact that England has an exemption of about \$800. That is true, but England also has a rebate which she allows up to \$3,500, and in addition to that England raises her revenue in an entirely different way proportionately from the way in which we raise ours.

According to the estimates made this year in the budget speech of Mr. Lloyd-George the customs income of that country this year will be £32,200,000, and the excise income £38,850,000. Those are the indirect taxes which fall most heavily upon the consumer. The direct taxes are as follows: Death duties, £26,760,000; land taxes and house duties, £2,230,000; income and surtax, £45,950,000.

We will raise about one-eighth of our income, according to this bill, from the income tax. The rest of it will be raised from taxation upon consumption. The English Government, on the other hand, raises practically one-half of its income from the income or direct tax system. So when we have adjusted the matter in accordance with the actual facts it will be found, in my judgment, that the English Government has quite as large an exemption as this Government will have even after we have adopted the suggestion I have made.

In addition to that, England has adopted the differentiation plan. That is to say, England distinguishes as to the sources of income. In addition to the exemptions to which I have referred, she provides for a lower rate for all earned incomes and a higher rate for all unearned incomes, or incomes over \$10,000. If the two bills are laid down side by side, it will be found, in my judgment, that we are giving no greater exemption than the English law does in its practical workings.

Mr. LODGE. If the Senator will permit me, I think the English additional tax to which he has referred goes on at £3,000, or \$15,000. I think it is £3,000, or \$15,000, in round numbers, in our money.

Mr. BORAH. The Senator may be correct. I thought it was £2,000, or \$10,000; but the Senator may be correct.

I think I shall offer the amendment, anyhow. I shall not

take up the time of the Senate in discussing it, but I shall ask to have it passed upon. I will state the entire amendment, so

that it will be in consecutive form.

After the word "exceeds" in line 19, page 165, I move to strike out all down to the period after the figures "\$100,000" in line 3, page 166, and to insert in lieu thereof the following:

Mr. SHIVELY. The Senator certainly will not be foreclosed.

I do not propose to discuss at length the question raised by the

by which the total net income exceeds \$50,000 and does not exceed \$100,000, and 4 per cent per annum upon the amount by which the total net income exceeds \$100,000.

Mr. LODGE. The Senator has read the amendment. It seems to me he has not got the proportion quite right. He makes a jump of 1 per cent from \$10,000 to \$30,000, then he makes a jump of 1 per cent from \$50,000 to \$100,000. The gap between \$50,000 and \$100,000 is a great deal bigger than the gap between \$10,000 and \$30,000.

Mr. BORAH. Yes; perhaps it would be better to make the

correction suggested.

Mr. LODGE. I am not quarreling with the amount of tax the Senator imposes on the \$100,000 income or the \$50,000 income; but in dividing the \$100,000 it seems to me he makes his first increase too soon. I think it would better reach the same point and would be better proportioned if he divided more equally. From \$10,000 to \$30,000 he jumps once.
Mr. BORAH. And from \$30,000 to \$50,000.

Mr. LODGE. And from \$30,000 to \$50,000. Mr. BORAH. And from \$50,000 to \$100,000.

Mr. LODGE. That is a jump of \$20,000 each time at first and then \$50,000. It is merely a question of proportion.

Mr. BORAH. I will take the suggestion.
Mr. LODGE. It seems to me the only way to distribute the rise before you get to \$100,000 is to distribute it every \$20,000, or whatever you divide on.

Mr. JONES. Why not jump from \$50,000 to \$75,000 and then

from \$75,000 to \$100,000?

Mr. NORRIS. I should like to suggest to the Senator a jump from \$50,000 to \$75,000 at 4 per cent, or put another step in there, and then above \$100,000 make it 5 per cent instead of 4

per cent.

Mr. BRISTOW. Mr. President, while suggestions are being made, if the Senator will yield to me, I should like to suggest what I had in mind when I made the statement and expected to offer an amendment-1 per cent per annum upon the amount by which the total net income exceeds \$10,000, and that then we go up step by step, adding 1 per cent for each additional \$10,000 until we reach the maximum of \$100,000, making the total income tax 10 per cent on all over \$100,000. That does not have as large jump, and the man who is receiving \$100,000 a year can afford to pay \$10,000 a year tax to the Government just as well as the man who has an income of \$10,000 a year can afford to pay what this would impose upon him, and much better. is not any greater hardship and would secure a more equitable adjustment.

I make the suggestion to the Senator. I should like to have him fix his amendment that way, and if he does not I should like to offer mine, because that comes more nearly meeting my judgment than anything which has yet been suggested.

Mr. BORAH. I think I shall ask to have the amendment voted on as I offer it, and perhaps when the Senator from Kansas offers his amendment we can get another chance to meet that proposition.

Mr. SHIVELY. Permit me to inquire of the Senator from Idaho if he has made an estimate of the amount of revenue that would be produced in the event his amendment is adopted.

Mr. BORAH. No, Mr. President, I have not; neither have I seen any estimate made by anyone else that was worth anything to anybody as a guide. The estimate which has been made, so far as I can ascertain, is purely speculative.

Mr. SHIVELY. Of course there will always be an element of uncertainty and speculation in putting in force an income tax. It has been estimated that the tax as provided in the bill when in full force will produce about \$100,000,000 annually. Of course the main purpose is to provide for the fiscal necessities of the Government, not to provide a system for the redistribution of property or a system with reference particularly to its economic effect. It is with more particular reference to raising the required means with which to pay the expenses of the Government, and on that basis this has been provided in

I hope we shall have a vote on the amendment.

Mr. BORAH. If the estimate which the committee has made with reference to the proposed income tax be even made with any degree of certainty or accuracy, then it would not be very difficult to tell what this rate would produce. But, Mr. President, even at the present time, after all the experience which has been had in regard to the income tax in other countries, it is the most uncertain tax with reference to estimates that there is. A few years ago when they changed the tax entirely in England, when Mr. Asquith introduced the differentiating feature, he estimated they would lose a certain amount, a very large amount. Instead of losing that amount they actually collected a very large amount in excess of what the tax had been the year before.

Therefore, I do not criticize or find fault with what I believe to be the purely speculative estimate of the committee, but I think it is purely speculative.

The VICE PRESIDENT. The question is on the amendment

proposed by the Senator from Idaho [Mr. Borah].

Mr. WILLIAMS. Mr. President, this schedule constitutes to the extent to which it goes the introduction of an entirely new fiscal system. It is, so far as it goes, revolutionary of existing tax methods. The object of levying the tax, of course, is to pro-It is, so far as it goes, revolutionary of existing vide a revenue, and in addition to that, to a large extent to relieve the backs and the stomachs of people of burdens under the present system and to place those burdens, as far as may be, upon the backs of those who are able to stand them, to begin a system at any rate, of taxing people according to their ability to pay and not according to their necessities.

Now, like every new thing, the best speed is made in the long run by going slowly at first. It is always the safest method to make your first effort as simple as you can and not compli-

cate it with too many other things.

What we are doing with this income tax is a totally different thing from what we hope to do some day. We do not want to collect any more revenue than we need. The Senator from Idaho says it is largely speculation instead of calculation; but we have calculated as well as we could how much income tax we would need after the reduction of the duties upon consumption. Evidently his amendment would very much increase whatever sum we might attain. Having concluded that we had enough, we are not taxing the people's incomes even for fun, nor are we taxing them for the purpose of building up a system. The time may come, and I hope will come some day, when all taxes for the Government will be raised by taxing the citizens in proportion to their ability to pay. But the Senator knows as well as I do that we can not go at that sort of thing too quickly. We can not revolutionize things too rapidly. We must have some regard to existing conditions. In revising the tariff we have tried to have that in view. In the opinion of most of you on the other side of the Chamber, our attempt is awkward and approximate, and all that, while in our own opinion it is about as intelligent as anything you ever did on the subject.

Having accomplished that, we made up the difference that we need in revenue from the income tax. We think this will make it. We saw no use in either raising the rate or changing the point of demarcation so as to increase the amount of revenue,

which is what would be the effect.

Now, the Senator says, and says very properly, that this income tax might be complicated so as to make it still fairer than it is in a way. For example, there might be a difference in It is in a way. For example, there might be a difference in exemptions, a difference in rates dependent upon the source of the income, whether it came from inherited estates, whether it came from bonds that were laid by, or whether it came from the compensation in the shape of salary or wage to the tax-payer; but we thought it well now to proceed slowly and cautiously and upon as simple grounds as we could inaugurate the system, and after awhile the American people will have people here to represent them who will perfect it, and as it is perfected the taxes upon consumption will dwindle more and more and the income tax will more and more take their place.

I hope for those reasons the amendment will not be adopted. Mr. BRISTOW. Mr. President, the Senator from Mississippi speaks of the amount of revenue. It seems to me that this tax on incomes could be very properly increased and the tax on corporations abolished. It is a well-known fact that nine-tentlis or more of the tax on corporations is simply passed on to the consumers. The corporation, in fact, does not pay it; it charges it up as an expense, and the public pays the tax.

Now, if you abolish the tax on corporations altogether and increase the tax on incomes on a graduated scale you will get a far more equitable system, it seems to me, than that proposed

in the pending measure.

Mr. WILLIAMS. Then the result of the Senator's scheme would be to tax the individual citizen and leave the corporation untaxed. Now, whether the corporation can or can not pass on all this tax is a question. Of course it can pass some of it on, but the Senator will note that throughout the bill the socalled additional tax is not levied upon corporations at all. It is only the normal tax that corporations pay.

Mr. BRISTOW. I know, but—
Mr. WILLIAMS. So when you get above a certain amount this additional tax levied upon corporations is not a thing that would be subject to the objection made by the Senator. They pay merely the normal tax. To say that the great Steel Trust, merely because it may be that it can pass on the tax, shall pay nothing, strikes me as taking a position that the Senator will reconsider.

Mr. BRISTOW. My position so far as the corporation tax is concerned is the same that it was four years ago. I voted against a corporation tax then because I favored an income tax instead of a corporation tax. A stockholder in a corpora-tion who holds only a thousand dollars' worth of stock pays just as much in proportion to what he has got as if he owned a million dollars' worth. I do not think it is an equitable or just system of taxation.

Then the Senator must know that these corporations simply charge up the corporation tax only as an expense which they incur in doing business, the same as any other expense, and it is charged to the people who consume their product or who utilize their facilities, whatever the character of the operation may be.

The income tax is a tax levied upon the income a man has, and if it is properly proportioned it rests far more equitably

upon his ability to pay than the corporation tax possibly can.

Mr. WILLIAMS. There is no distinct corporation tax in this, if that is what the Senator means, except for a part of a year to continue the old tax. The taxes levied upon corporations here is simply an income tax, and a normal income tax

Mr. BRISTOW. It continues the old tax. That is what I am objecting to.

Mr. WILLIAMS. We continue the old tax for a part of the year, during which we can not levy the new tax. Then after that time that part of the tax upon corporations becomes an

Mr. CUMMINS. Mr. President, I think it can not be disputed that we ought to limit our taxing power to the needs of the Government. It would be wrong and indefensible to collect \$200,000,000 if we needed but \$100,000,000.

I assume that the committee in making the estimate with regard to this phase of the law has some information as to the number of men who would pay 1 per cent upon incomes up to \$20,000, the number of men who would pay a tax upon incomes from \$20,000 to \$50,000, and from \$50,000 to \$100,000. It would, therefore, be a very easy problem to take the information which the committee undoubtedly has to limit the effect of the law in producing a revenue, even though a redistribution were made

concerning the rate of taxation.

I intend to vote for the amendment proposed by the Senator from Idaho, but if it really becomes a serious matter that we shall receive too much money by so doing, then I would want some such adjustment as this: That on incomes up to \$20,000 only one-half of 1 per cent be levied, upon incomes from \$20,000 to \$50,000 three-quarters of 1 per cent, and go up in But when you reach the high incomes, from \$50,000 on, then I think the rate proposed by the Senator from Idaho ought to be employed in order to put the burden of government where it belongs, even though upon the incomes below \$50,000 you reduce the rate of taxation.

There is no difficulty about that computation if the committee has an estimate of the number of men who are in possession of these various grades of incomes from \$3,000 to \$100,000 and

Therefore I hope the amendment proposed by the Senator from Idaho will be adopted, because it recognizes the right principle. Then, if we discover upon further investigation that it will bring too much money into the Treasury, let us reduce the rate upon the men of lesser income. In that way we will reduce the whole revenue and at the same time do full justice as between those who have the smaller incomes and the larger

If it were not, Mr. President, for the fact that I think it is good public policy that a large number of people shall feel that they are contributing to the Government of which they are citizens, I would be in favor of raising the limit very much. I think it is a sound proposition that most of the people of the country ought to feel that they are contributing something to the maintenance of their Government in order to create a proper interest upon their part in the management or the conduct of their Government. If it were not for that, I would be in favor of increasing the limit proposed in the bill; but if, in order to levy a very fair and reasonable rate of taxation upon a man with an income of \$100,000 a year, it is essential that the man with an income of but \$3,000 shall pay one-half of 1 per cent, that is the arrangement which should be made. However, until proof is made in some way or other that the amendment proposed by the Senator from Idaho would raise more money than would be wise to put into the Treasury of the United States, I shall stand and vote for his amendment, but if the objection made to it is valid or has any foundation it is very easy to reduce the rate upon the lesser incomes.

Mr. BORAH. Mr. President, if we have any real fear of raising too much revenue, we can easily control that matter,

in my judgment, when we get over to the exemptions by raising the exemption as may seem necessary; but what I rose to do was to ask leave to modify my amendment in accordance with the suggestions of some Senators, and I will restate it.

I move to strike out all after the word "exceeds," in section 2, subdivision 2, page 165, line 19, down to and including the figures "\$100,000," on page 166, line 3, and in lieu thereof to

insert:

Ten thousand dollars, and does not exceed \$30,000, and 2 per cent per annum upon the amount by which the total net income exceeds \$30,000 and does not exceed \$50,000, and 3 per cent per annum upon the amount by which the total net income exceed \$50,000 and does not exceed \$80,000, and 4 per cent per annum upon the amount by which the total net income exceeds \$50,000 and does not exceed \$100,000, and 5 per cent per annum upon the amount by which the total net income exceeds \$50,000 and does not exceed \$100,000, and 5 per cent per annum upon the amount by which the total net income exceeds \$100,000.

I ask for the yeas and nays on the amendment, Mr. President. The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I announce my

pair as on the former ballots and withhold my vote.

Mr. KERN (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. Bradley] and therefore withhold my vote.

Mr. LEWIS (when his name was caled). I have a general pair with the Senator from North Dakota [Mr. GRONNA].

Mr. REED (when his name was called). I announce my pair with the senior Senator from Michigan [Mr. SMITH] and withhold my vote. If at liberty to vote, I should vote "nay."

Mr. SAULSBURY (when his name was called). I have a general pair with the junior Senator from Rhode Island [Mr. COLT] and therefore withhold my vote.

Mr. SMITH of Maryland (when his name was called). I have a general pair with the Senator from Vermont [Mr. Dil-

LINGHAM] and therefore withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from Ohio [Mr. Burron], and I therefore withhold my vote.

Mr. O'GORMAN (when Mr. Thornton's name was called). The senior Senator from Louisiana [Mr. Thornton] is unavoidably absent. If he were present he would vote "nay."

Mr. TILLMAN (when his name was called). I have a general pair with the junior Senator from Wisconsin [Mr. Stephen-

son].

The roll call was concluded.

Mr. BANKHEAD. I transfer my pair with the junior Senator from West Virginia [Mr. Goff] to the senior Senator from

ator from West Virginia [Mr. Goff] to the senior Senator from Virginia [Mr. MARTIN], and vote. I vote "nay."

Mr. KERN. I transfer my pair with the Senator from Kentucky [Mr. Bradley] to the Senator from Louisiana [Mr. Thornton] and vote. I vote "nay."

Mr. GALLINGER. I am requested to announce the pair existing between the Senator from Connecticut [Mr. Branders].

isting between the Senator from Connecticut [Mr. Brandegee] and the Senator from Ohio [Mr. Pomerene].

Mr. CHILTON. I transfer my pair with the Senator from Maryland [Mr. Jackson] to the Senator from Arizona [Mr. Ashurst] and vote. I vote "nay."

Mr. McCUMBER. I have a general pair with the senior Senator North Country of the senior Senator of the senior of the senior Senator of the senior of t

ator from Nevada [Mr. NEWLANDS]. He being absent, I with-

Mr. POMERENE (after having voted in the negative). cast my vote a moment ago without recalling the fact that I am paired with the Senator from Connecticut [Mr. Brandegee].

That being the case, I withdraw my vote.

Mr. JAMES. My colleague [Mr. Bradley] is unavoidably detained from the Senate, but he has a general pair with the Senator from Indiana [Mr. Kern]. I will allow this announcement to stand for the day.

The result was announced-yeas 17, nays 47, as follows:

### YEAS-17

So Mr. Borah's amendment was rejected.

Mr. BRISTOW. Mr. President, as I have said, I desire to offer one or two amendments to subdivision 2, but I have not had time to prepare them since we took up the income-tax provision. I do not wish the section adopted until I can have an opportunity to offer the amendments. I will have them ready to-morrow morning.

Mr. WILLIAMS. I will make no objection to the Senator offering them to-morrow morning, and meanwhile we can pro-

ceed with the section.

Mr. BRISTOW. It is all right to proceed with the section, but I want an opportunity to offer the amendments to-morrow morning and have them voted on.

Mr. WILLIAMS. We agree that the Senator shall recur to

that to-morrow morning for the purpose of offering the amendments.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in section 2, subdivision 2, page 166, line 5, after the word "applicable," to insert "and are not inconsistent with this subdivision of paragraph A"; and in line 10, after the word "his," to strike out "total" and insert "entire," so as to read:

Subdivision 2. In addition to the income tax provided under this section (herein referred to as the normal income tax) there shall be levied, assessed, and collected upon the net income of every individual an additional income tax (herein referred to as the additional tax) of 1 per cent per annum upon the amount by which the total net income exceeds \$20,000 and does not exceed \$50,000, and 2 per cent per annum upon the amount by which the total net income exceeds \$50,000 and does not exceed \$100,000, and 3 per cent per annum upon the amount by which the total net income exceeds \$100,000. All the provisions of this section relating to individuals who are to be chargeable with the normal income tax, so far as they are applicable and are not inconsistent with this subdivision of paragraph A, shall apply to the levy, assessment, and collection of the additional tax imposed under this section. Every person subject to this additional tax shall, for the purpose of its assessment and collection, make a personal return of his entire net income from all sources, corporate or otherwise, for the preceding calendar year. Subdivision 2. In addition to the income tax provided under this sec

The amendment was agreed to.

The next amendment was, in section 2, subdivision 2, page 166, line 12, after the word "year," to insert:

Under rules and regulations to be prescribed by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury. For the purpose of this additional tax, taxable income shall embrace the share of any taxable individual of the gains and profits of all companies, whether incorporated or partnership, who would be legally entitled to enforce the distribution or division of the same, if divided or distributed, whether divided or distributed or otherwise, and any such company, when requested by the Commissioner of Internal Revenue or any district collector of internal revenue, shall forward to him a correct statement of such profits and the names of the individuals who would be entitled to the same if distributed.

Mr. WILLIAMS. Mr. President, I ask, in behalf of the committee, that the amendment the Secretary has just read shall be recommitted to the committee. There is an amendment

which the committee wants to propose to it.

Mr. ROOT. Mr. President, before the amendment goes back to the committee, I desire to ask that the committee consider the question whether it is possible that the gains and profits referred to in this provision can be regarded as the income of the individual stockholder when they are not divided or dis-As I understand, this clause would have the effect of imposing an income tax on the aliquot share of each stockholder of a corporation in that part of the profits of the corporation for the year which might have been distributed but were not distributed.

Mr. WILLIAMS. Not precisely that; but such part of the income of the partnership or corporation as a partner or shareholder would have the legal right to force the distribution of.

Mr. ROOT. Not quite that, Mr. President. Mr. WILLIAMS. That language, "if divided or distributed," is somewhat awkward, and for that very reason we want it to go back to the committee; but the object of the amendment was this: Here is a partnership, for example; the partners might make a very large amount of money, but they can effect an agreement whereby, instead of setting aside to each partner his income for that year, they allow it to go into the business, each partner to draw against the firm and make a showing of having no income at all from the partnership. Then, it was thought that for the purpose of obtaining revenue a corporation might now and then pass up a portion of its profits to surplus or otherwise refrain from distributing them. The clause, as here written, we wish to amend, because we do not think that it clearly accomplishes the purpose which we had in view; but what I have stated was the purpose we had in our mind.

Mr. ROOT. Mr. President, I understand that, but the clause is very blind.

Mr. WILLIAMS. And for that reason we put in the words

legally entitled to enforce the distribution."

Mr. ROOT. But taking it altogether, particularly considers ing the concluding words, I think it does aim to tax as income of the stockholder the profits of the corporation which are not divided. The concluding words are that the company "shall forward to the Commissioner of Internal Revenue a correct statement of such profits and the names of the individuals who would be entitled to the same if distributed."

I understand the law to be-I think it is the law in all of our States-that no stockholder has a right to demand a dividend from the profits of a corporation against the judgment of the

directors or trustees of the corporation.

Mr. WILLIAMS. Then, in that case, it would not be legally enforceable.

Mr. ROOT. But there are no words here which impose such a limitation. The tax is to be imposed upon the individual stockholders' share of the profits when they are not distributed. It is the share he would have if they were distributed. It seems quite clear to me that that is not his income; he does not get it; he has no right to get it by law. He may sell his stock, and when those profits come to be divided in future years they would go to the purchaser. He may die, and those profits would go to any person who happened to have acquired the stock after his decease. It can not by any possibility, in accordance with our existing law, be regarded as income of the stockholder until the directors of the corporation have declared a dividend on it.

Mr. WILLIAMS. There is no doubt about that.

Mr. ROOT. And if you wish to reach the surplus profits of a corporation which ought to be divided, but are not divided, you must do it by taxing them as income of the corporation, not as income of the individual stockholder, because the moment you tax the interest of the individual stockholder in those profits you are taxing the interest represented by his stock—that is to 3 say, you are taxing his principal and not his income.

Mr. BORAH. Mr. President—

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Idaho?

Mr. ROOT. Certainly.

Mr. BORAH. I wish to say to the Senator from New

Mr. WILLIAMS. Just one word, if the Senator from Idaho will pardon me. I do not think the Senator from New York has paid quite sufficient attention to the phrase "who would be legally entitled to enforce the distribution or division of the same." However, we want to amend the classes it mean more clearly what we want it to mean.

Mr. BORAH. Mr. President, I have spent considerable time upon this clause, and so far I have been unable to determine, as a legal proposition, what it means. I entirely agree with the Senator from New York [Mr. Root] that until the directors declare a dividend it is not the property of the stockholders, and it could not be their income.

Mr. WILLIAMS. I suppose nobody ever disputed that legal

proposition.

Mr. BORAH. I am very glad to have the Senator from Mississippi indorse it, because that makes it absolutely correct. This clause says:

For the purpose of this additional tax, taxable income shall embrace the share of any taxable individual of the gains and profits of all com-panies, whether incorporated or partnership, who would be legally entitled to erforce the distribution or division of the same, if divided or distributed.

While the Senator from Mississippi seems to think some of these propositions are indisputable, I should like to know what that means. To me, as a legal proposition, it is difficult to unravel. The language is "legally entitled to enforce." A stockholder is not legally entitled to enforce it until the board of directors have declared a dividend.

Mr. HUGHES. Would it not be possible that a dividend

might be declared and not paid?

Mr. BORAH. Yes; that would be possible, but that would not meet this situation.

Mr. HUGHES. Then he would be entitled to enforce payment of the dividend at the hands of the corporation, and we ought to tax him on it.

Mr. BORAH. Yes; but it says "whether divided or dis-tributed or otherwise."

Mr. ROOT. That is to say, this is to be taxed as income against a person who would be entitled to sue for it if it were divided, although it is not divided.

Mr. BORAH. Yes; but the difficulty is that if it is not divided he is not entitled to sue for it. Until the board of directors have declared a dividend, a stockholder is not entitled te sue for his dividend.

Mr. ROOT. That is the foundation of my proposition.

Mr. BORAH. Exactly; and I agree perfectly with the Senator in regard to that; but, on the other hand, if that is taken out, then the question which will be submitted to the committee is, How are you going to avoid these large estates incorporating and availing themselves solely of the corporation tax and entirely escaping the payment of an income tax?

Mr. ROOT. By taxing the income of the corporation.

Mr. BORAH. Yes; you tax the corporation 1 per cent upon its net profits or earnings, and then you would get but the 1 per cent. The very difficulty which I presume this amendment was adopted to meet is the fact that they might incorporate and the second seco porate, pay the 1 per cent upon their net earnings, and entirely escape the graduated tax or surtax. If there is not some way to meet that, that is precisely what may happen.

So it seems to me that as a legal proposition this language is somewhat involved and complex; and while the committee is readjusting the language it must take into consideration the fact that unless there is some provision by which to reach this kind of an income, it will entirely escape under the corporation

Mr. WILLIAMS. Mr. President, has the request of the committee been put to the Senate?

The VICE PRESIDENT. To what portion of the paragraph

does the Senator refer?

Mr. WILLIAMS. The clause beginning "For the purpose of this additional tax, taxable income shall embrace, forth, going down to the end of that amendment, should be sent back to the committee, and the rest agreed to.

The VICE PRESIDENT. The question is on agreeing to the portion of the committee amendment above line 14, page 166.

The portion of the amendment above line 14 was agreed to. The VICE PRESIDENT. The remainder of the paragraph goes back to the committee.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in subdivision B, page 167, line 13, after the word "by," to insert the word "gift," so as to read:

B. That, subject only to such exemptions and deductions as are hereinafter allowed, the net income of a taxable person shall include gains, profits, and income derived from salaries, wages, or compensation for personal service of whatever kind and in whatever form paid, or from professions, vocations, businesses, trade, commerce, or sales or dealings in property, whether real or personal, growing out of the ownership or use of or interest in real or personal property, also from interest, rent, dividends, securities, or the transaction of any lawful business carried on for gain or profit, or gains or profits and income derived from any source whatever, including the income from but not the value of property acquired by gift, bequest, devise, or descent.

Mr. CUMMINS. Mr. President, I do not rise to question the amendment immediately before us, but I should like a little information on the general principle involved in this paragraph.

If I understand this aright, if I have a farm and sell it for a thousand dollars, the money I would receive as the purchase price of the farm would be accounted as income; but if anyone were to give me a thousand dollars during the year, or if I were to receive it by bequest, devise, or descent, that would not be accounted as income.

Surely there must be some reason for that; and I should like to know the difference in principle between money I would receive from a sale of property I own and money I would receive by gift, devise, or bequest. If the one is income, why is

not the other?

I-may be wrong about my initial proposition, and if I am I should be very glad to be corrected; but if I am right about it, then I very much object to the exclusion of gifts and bequests.

Mr. SHIVELY. Mr. President, if I understand the Senator correctly, he is inquiring, for the purpose of illustrating what he has in mind, whether the price of a piece of land sold during the year would be regarded as income. My answer is that it would not be. The price of that land would be principal.

Mr. CUMMINS. Then, Mr. President, if that be true, the

paragraph will have to be rewritten.

Mr. WILLIAMS. If the Senator will pardon me, I think I can tell him where he is making the mistake. He has gotten hold of the words "or sales or dealings in property, whether real or personal." He has forgotten to note that prior to that, and modifying and limiting and defining it, is this language:

The net income of a taxable person shall include gains, profits, and

incomes derived from

Then there follow, later on, the words:

Sales or dealings in property-

As well as various other things. So it refers only to gain, profits, and income derived from these things,

Mr. CUMMINS. Yes.

Mr. WILLIAMS. In other words, if a man during the year had bought a piece of property for \$10,000 and sold it for \$12,000, he would be taxable upon the \$2,000.

Mr. CUMMINS. I do not so read it, Mr. President. It is said that

The net income of a taxable person shall include gains, profits, and income.

And it does not define income as gains and profits, but it makes them all substantive-

gains, profits, and income derived from salaries, wages, or compensation for personal service of whatever kind and in whatever form paid, or from professions, vocations, businesses, trade, commerce, or sales or dealings in property.

Mr. WILLIAMS. Why, of course. But for that a real estate dealer would escape with all of his profits during the year.

Mr. CUMMINS. It seems to me, in view of the language, that the amount received from the sale of property during a year would be regarded as income received during the year.

Suppose I had a piece of property for which I had paid \$950 some time before and I sold it during the year for \$1,000, does the Senator from Mississippi say that only \$50 of that would be income?

Mr. WILLIAMS. The Senator seems to attach to the word "income" a meaning that is not attachable to it in this connection. "Income" means the net gains or profits. He seems to think that the word "income" is a broader word than "gains or profits derived from any source whatever.'
Mr. CUMMINS. What is it used for?

Mr. WILLIAMS. Mr. WILLIAMS. A man's taxable income means his gains and profits during the year. Those gains and profits or income derived from any business of any description are taxed. If a man is engaged in dealing in horses, if he buys horses and sells horses and makes a profit or an income out of that dealing, he must pay a tax upon the income.

I do not know that I exactly catch the Senator's point. But if I do catch it, he seems to have in mind the idea that the word "income" means receipts of every sort. The income within the contemplation of a tax law does not mean that. It means net income, and is so defined in the bill. That means

profits or gains.

Mr. CUMMINS. The Senator from Mississippi must certainly understand what I am trying to say. If applied to a general business, in which purchases and sales take place and gains and profits are reckoned, I can very well understand that the Senator from Mississippi is right, under the language of this bill. But suppose 10 years ago I had bought a horse for \$900, and this year I had sold him for \$1,000, what would I do in the way of making a return?

Mr. WILLIAMS. I will tell the Senator precisely what he

would do.

Mr. CUMMINS. I mean, what would other men do?
Mr. WILLIAMS. I know; but what I mean is precisely what the Senator would do, or precisely what he ought to do. He bought the horse 10 years ago and sold him this year for a thousand dollars. That thousand dollars is a part of the Senator's receipts for this year, and being a part of his receipts, that much will go in as part of his receipts, and from it would be deducted his disbursements and his exemptions and various other things

Mr. CUMMINS. Would the price I paid for the horse originally be deducted?

Mr. WILLIAMS. No, because it was not a part of the transactions in that year; but if the Senator turned around and bought another horse that year, it would be deducted.

Mr. CUMMINS. Mr. President, the answer of the Senator from Mississippi has disclosed very clearly the weakness that I have been attempting to point out. This provision, in the form in which it appears, is utterly unworkable. It would involve chaos among the people of this country if returns were attempted to be made in the way suggested by the Senator from Mississippi.

I have no amendment that will meet the emergency, because I did not dream that we would enter upon the consideration of the income-tax provision to-day. I only have to suggest that the sort of thing involved in the homely illustration of the purchase and sale of a horse-an instance which might not occur very often-would occur thousand of times every day in the sale of other kinds of property.

Mr. GALLINGER. Particularly real estate.

Mr. CUMMINS. Yes; by men who are not engaged in what is known generally as a vocation, but who do have occasion to

buy and sell property from time to time.

Mr. BRISTOW. Mr. President, I desire to ask a question, and see if I have this matter clear in my mind. As I understood the question of the Senator from Iowa, it was, if he bought a horse 10 years ago for \$100Mr. CUMMINS. Nine hundred dollars.

Mr. BRISTOW. And sold it this year for a thousand dollars, whether or not that thousand dollars would be counted as a part of his income for this year, regardless of what he paid for the horse 10 years ago. Is that correct?

Mr. WILLIAMS. No; I did not say that. It would be a part of his gross receipts for the year, of course, but it may not necessarily be a part of his net receipts, and therefore not a part of his income that is taxable.

Mr. CUMMINS. But I asked the Senator from Mississippi specifically whether, in the case I put, the price that was originally paid for the horse could be deducted from the price received.

Mr. WILLIAMS. The price paid 10 years ago? No; of course not. How could it? When a man puts in his return for his income of the previous year in order to be taxed he puts down everything he has received and everything he has paid out, subject to the exemptions and limitations otherwise provided in the bill. Necessarily that is so. To answer the Senator, I want to read the precise language of the provision.

Mr. ROOT. May I make a suggestion to the Senator from Mississippi? That necessarily implies something which is quite impossible, and that is that the Senator from Iowa would sell

a worthless horse. [Laughter.]
Mr. CUMMINS. In these days of automobiles most horses

are of little value.

Mr. WILLIAMS. Here is the language, and I think if it read this way and the words "and income" are left out it never would have struck the gentlemen as unobjectionable in any respect:

That, subject only to such exemptions and deductions as are hereinafter allowed, the net income of a taxable person shall include gains, profits, and income—

Now leave out the word "income," the repetition of which has confused-

derived from salaries, wages, or compensation-

Gains and profits now-

derived from salaries, wages, or compensation-

For what?

for personal service of whatever kind and in whatever form paid, or

What else?

professions, vocations, businesses, trade, commerce, or sales or dealings in property, whether real or personal, growing out of the ownership or use of or interest in real or personal property—

And, then, again-

also from interest, rent, dividends, securities.

There is not the slightest lack of clearness in it, to my mind, unless it grows out of putting a double definition upon the word and I see no objection to striking out the word "income," if you want to strike it out.

Mr. GALLINGER. Mr. President, it is evident that this income-tax provision will not be settled to-day, and 6 o'clock has arrived. I suggest that we either have an executive session

Mr. WILLIAMS. I have no objection to that, if the Senator

will wait until this paragraph is read and finished.

Mr. CUMMINS. I hope the paragraph will be passed over until I can have an opportunity to present an amendment to it, because, when it is taken in connection with the subsequent paragraph prescribing the deductions that may be made from the income, the point that I have endeavored to make clear will be manifest. I ask that the paragraph may go over until to-

EXECUTIVE SESSION.

Mr. KERN. I move that the Senate proceed to the considera-

tion of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 45 minutes spent in executive session the doors were reopened and (at 6 o'clock and 45 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, August 27, 1913, at 11 o'clock a. m.

### NOMINATIONS.

Executive nominations received by the Senate August 26, 1913. PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Lieut. George B. Landenberger to be a lieutenant commander in the Navy from the 1st day of July, 1913.

Lieut. (Junior Grade) Herndon B. Kelly to be a lieutenant in

the Navy from the 1st day of July, 1913.

The following-named citizens to be second lieutenants in the Marine Corps from the 20th day of August, 1913, to fill vacancies:

Henry L. Larsen, a citizen of Colorado. John C. Foster, United States Navy.

William H. Rupertus, a citizen of the District of Columbia. James L. Underhill, a citizen of California. Louis E. Fagan, jr., a citizen of Pennsylvania. Keller E. Rockey, a citizen of Pennsylvania. Bryan C. Murchison, a citizen of South Carolina. Egbert T. Lloyd, a citizen of the District of Columbia. Allen H. Turnage, a citizen of North Carolina. George W. Hamilton, a citizen of New York. Louis M. Bourne, jr., a citizen of North Carolina. George L. Davis, a citizen of New Jersey. David H. Miller, a citizen of New Jersey. Matthew H. Kingman, a citizen of Iowa.

#### POSTMASTERS.

#### TEXAS.

Lon Davis to be postmaster at Sealy, Tex., in place of W. F. Viereck. Incumbent's commission expired April 15, 1913.

W. T. Hall to be postmaster at La Porte, Tex., in place of Manly B. McNitt. Incumbent's commission expired July 30,

#### VIRGINIA.

Byrd Anderson to be postmaster at Blacksburg, Va., in place of Lulu O. Hoge. Incumbent's commission expired December 13,

#### WEST VIRGINIA.

J. L. Butcher to be postmaster at Holden, W. Va., in place of William J. Crutcher. Incumbent's commission expired June 9,

### CONFIRMATION.

Executive nomination confirmed by the Senate August 26, 1913. POSTMASTER.

KANSAS.

Sophia M. Dickerson, Gypsum.

# HOUSE OF REPRESENTATIVES.

Tuesday, August 26, 1913.

The House met at 12 o'clock noon.

The Chaplain, the Rev. Henry N. Couden, D. D., offered the

following prayer:

We bless Thee, infinite Spirit, our heavenly Father, that Thou art ever working in and through Thy children with persistent energy and power, moving them upward and onward to larger life and nobler achievements in both the material and spiritual fields of endeavor; and we most fervently pray that, though we are dull of apprehension and prone to wander from the paths of rectitude and duty, Thou wilt continue Thy work, chiding us when we go wrong, encouraging us when we go right, that we may be faithful and profitable servants both .o will and to do of Thy good pleasure; that Thy plans and purposes may be fulfilled in us, to the honor and glory of Thy holy name. In the spirit of Jesus Christ our Lord. Amen.

The Journal of the proceedings of Friday, August 22, 1913,

was read and approved.

### MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bill of of the following title, in which the concurrence of the House of Representatives was requested:

S. 2065. An act to provide for participation by the Government of the United States in the National Conservation Exposition, to be held at Knoxville, Tenn., in the fall of 1913.

### SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee as indicated below:

S. 2065. An act to provide for participation by the Government of the United States in the National Conservation Exposition, to be held at Knoxville, Tenn., in the fall of 1913; to the Committee on Appropriations.

# LEAVE OF ABSENCE.

Mr. Martin, by unanimous consent, was granted leave of absence, indefinitel, on account of illness.

JOINT SESSION OF THE HOUSE AND SENATE TO-MORROW.

Mr. UNDERWOOD. Mr. Speaker, I move the adoption of the resolution which I send to the Clerk's desk.

The SPEAKER. The gentleman from Alabama [Mr. Underwood] sends a resolution to the Clerk's desk. The Clerk will report it.

The Clerk read as follows:

House concurrent resolution 16.

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Wednesday, the 27th of August, 1913, at 12.45 o'clock in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make them.

Mr. UNDERWOOD. Mr. Speaker, the President has advised me that he desires to communicate a message to Congress to-I offer this resolution to carry out his request,

Mr. MANN. Mr. Speaker, I take it from the statement of the gentleman from Alabama [Mr. Underwood] that the President does not intend to communicate any message on the Mexican situation to the Congress to-day?

Mr. UNDERWOOD. No. I will say to the gentleman from Illinois that the President first lesired to communicate with Congress to-day, but subsequent telegrams from Mexico required some changes, and he desires to address the joint assembly of the House and Senate to-morrow.

Mr. MANN. I thought that the reading of the resolution ought to be loud enough to reach even the galleries.

The SPEAKER. If this resolution passes, the President will address the joint assembly of the House and Senate to-morrow instead of to-day. The question is on agreeing to the resolution.

The resolution was agreed to.

JOINT REPUBLICAN CAUCUS.

The SPEAKER. The Chair lays before the House a rather unusual document, but under the circumstances he thinks it ought to be read. The Clerk will report it.

The Clerk read as follows:

WASHINGTON, D. C., August 26, 1913.

Dear Sir: The joint Republican caucus will meet als evening in the conference room, third floor, House Office Building, instead of in the Chamber of the House of Representatives.

JACOB H. GALLINGER,

Chairman Senate Caucus.

WILLIAM S. GREENE,

Chairman House Caucus.

JUDGE EMORY SPEER

Mr. CLAYTON. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I ask the Clerk

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 234.

House resolution 234.

Hereas on the 16th day of August, 1913, the Attorney General of the United States transmitted to the Committee on the Judiciary of the House of Representatives a report of a special examiner duly designated by the Attorney General to investigate various charges of alleged misconduct of Emory Speer, a United States district judge for the southern district of Georgia, which charges had been brought to the attention of the Department of Justice; and hereas the charges embodied in said report are accompanied by exhibits and affidavits and are of such grave nature as to warrant further investigation: Therefore be it

further investigation: Therefore be it

Resolved, That the Committee on the Judiciary be, and it is hereby, anthorized to inquire into and concerning the official conduct of Emory Speer, United States district judge for the southern district of Georgia, touching his conduct in regard to the matters and things set forth in said report; and further to inquire whether said judge has been guilty of any misbehavior for which he should be impeached and report to the House of Representatives the conclusions of the committee in respect thereto, with appropriate recommendations; and said committee is hereby authorized to send for persons and papers, administer oaths, take testimony, employ a clerk and stenographer if necessary, and to appoint and send a subcommittee whenever and wherever it may be necessary to take testimony for the use of said committee; the said subcommittee, while so employed, shall have the same powers in respect to obtaining testimony as are herein given to said Committee on the Judiciary, with a sergeant at arms, by himself or deputy, who shall serve the process of said committee and the process and ordered and as directed thereby, and that the expense of such investigation shall be paid out of the contingent fund of the House; that said Committee on the Judiciary, or subcommittee thereof, shall have power to sit during the sessions of this House or in vacation.

The SPEAKER. Is there objection?

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, it seems to me there ought to be something before the House in the way of information before the House orders an investigation upon which the possible impeachment of anybody may be predicated.

Mr. CLAYTON. Mr. Speaker, I can perhaps give the gentle-man the information he desires. It was my purpose to make a statement to the House before the gentleman interposed his reservation of an objection. I am very glad he did so, and I ask the indulgence of the House, so that I may make the statement.

The preamble to the resolution recites the manner of the getting before the Committee on the Judiciary of certain charges relating to the conduct of Judge Speer, of Georgia. The committee took the report of the examiner and the exhibits and made an examination of the papers and the charges. The action of the committee was unanimous in finding that the charges were of so grave a nature, and that there was enough vania had discriminated against him in the shipment of his coal

evidence in support of the charges, to warrant the committee in making a further examination into the facts touching these

The committee are without authority to make this investiga-tion, and therefore I am instructed by the committee to bring this resolution to the House authorizing the committee to investigate the facts in this case, and after such investigation has been made to report the conclusions of the committee with an appropriate recommendation to this House.

I may say that not only the members of the Judiciary Committee but other Members of this House have given the subject matter of this resolution very patient and careful consideration. The members of the Judiciary Committee and the others who have investigated this matter reached the conclusion—that is, that the charges are apparently well enough supported and are of such a character that an investigation ought to be made. They also reached another conclusion. No member of the committee, and so far as I know at this time no Member of the House, felt willing to impeach the judge in his responsible place at this time, for the reason that no member of the committee or other Member of this House has had the opportunity of talking with or examining the witnesses who it is said will be relied upon to support these charges. We did not feel authorized to impeach the judge unless we had better knowledge of the accusations brought against him.

Mr. MURDOCK. Will the gentl Mr. CLAYTON. With pleasure. Will the gentleman yield right there?

This is the third occasion upon which I Mr. MURDOCK. have seen this sort of proceeding started in the House. gentleman will remember that when the impeachment proceedings were inaugurated against Judge Swayne the first step was taken by Mr. Lamar, a Congressman from Florida, who rose in this House and in his individual representative capacity impeached the judge.

Mr. CLAYTON. That is correct.

Mr. MURDOCK. He gave the specific charges which he alleged against the judge.

In the case of Judge Archbald, my recollection is that a resolution was introduced by a Member of the House.

Mr. CLAYTON. Yes. Mr. MURDOCK. Giving the charges

Mr. CLAYTON. The resolution in the Archbald case was a resolution calling for information. It did not make charges.

Mr. MURDOCK. I thought it made charges.

Mr. CLAYTON. No.

Mr. MURDOCK. In this case the House at the present time has no knowledge of the allegations, and the origin of this proceeding, as I understand the gentleman, is with the Attorney General, and he bases his complaint upon the report of a special agent who has investigated the conduct of the judge. Is that correct?

Mr. CLAYTON. I would not state it exactly as the gentleman

has stated it

Mr. MURDOCK. I wish the gentleman would explain what the difference is.

Mr. CLAYTON. Yes; with pleasure. Shall I make the explanation now?

Mr. MURDOCK. I wish the gentleman would do so, in view of the fact that when the Swayne impeachment was begun in the House the assertion was made that any individual Member of the House had a right to rise up and begin impeachment proceedings.

Mr. CLAYTON. That is correct.
Mr. MURDOCK. The origin of this proceeding does not seem to be in the House, but in a department of the Government, and it seems to me that is materially different.

Mr. CLAYTON. Mr. Speaker, I think my recollection is not at fault either as to the Swayne case or as to the Archbald As the House knows, I took part in both those cases.

In the Swayne case Mr. Lamar, a Representative from the State of Florida, arose in his place on this floor and impeached Judge Charles Swayne, United States judge of the northern district of Florida, of high crimes and misdemeanors, and offered the usual and appropriate resolutions which gave the Committee on the Judiciary jurisdiction of the subject matter and authorized it to proceed with the investigation of Judge Swayne's conduct. Accompanying this charge was a memorial from the State Legislature of Florida preferring certain charges against Judge Swayne and asking for his impeachment.

The Archbald case originated in this way: The Department of Justice, under Mr. Wickersham, had made an investigation of the conduct of Judge Archbald. That investigation grew out of these facts: One W. P. Boland, of Scranton, Pa., had a case before the Interstate Commerce Commission, and my recollection is that he complained that certain railroads in Pennsylor the product of his washery. He had his case before the Interstate Commerce Commission. Incidentally, in talking about that case before Commissioner Meyer-and, I believe, others of the Interstate Commerce Commission connected with it-he made complaint against Judge Archbald which reflected upon his official conduct and involved his personal and judicial in-

tegrity as well.

The commissioner went to the President, who was then Mr. Taft, and told him of the complaint. I need not state all of the details of that complaint, but the President directed the Attorney General to make an investigation of these charges against the judge. The Attorney General called Mr. Boland and Commissioner Meyer, Mr. Cockrill, clerk of Commissioner Meyer, and Mr. E. J. Williams, who was afterwards in the Archbald case denominated the star witness, as well as other witnesses, before him. He made a personal investigation himself. He then designated a special commissioner, who went to Pennsylvania to investigate the official conduct of Judge Archbald, not only touching that particular matter complained of by Mr. Boland, but his conduct in reference to his dealings and his business transactions with railroads and subsidiary corporations in Pennsylvania.

That report, I believe, had been completed, but the Attorney General had not yet submitted it either to Congress or the President. The matter became public through the newspapers. At that time Mr. Norris, then a Representative in this House and now one of the Senators from the State of Nebraska, introduced a resolution of inquiry asking the Attorney General if an investigation had been made concerning the official conduct of Judge Archbald and if a report had been made. That resolution was referred to the Committee on the Judiciary, and the committee was then unanimously of the opinion that it was proper and reported it back to the House, and it was agreed to

and transmitted to the President.

The Attorney General, I presume after conference with the President, turned it over to the President. As to that precise matter I do not remember, but, at any rate, the President replied to that communication and transmitted the report with all the accompanying evidence, documentary and otherwise, to the House and to the Judiciary Committee. In his reply to the House the President said, in effect, that he deemed it advisable on account of the nature of the case, involving the official conduct of the judge, not desiring to prejudice the case, not desiring to give undue publicity to the matter until it had been properly sifted to see whether there was any merit in it or not, he had transmitted under separate cover to the Judiciary Committee the said report and accompanying documents, and therefore the whole report being in possession of a committee of the House would be in the possession of the House itself and the House could do with it as it saw proper.

The House left it to the committee after an appropriate resolution similarly empowering that committee to investigate the The House did not ask that that report be made The House did not demand that any statement of its contents be laid before the House other than what the President had said and what the resolution imported, but left it to the committee as the President suggested, as the wiser proper course, and then adopted a resolution to investigate similar to

the one I have offered to-day.

Mr. DYER. Will the gentleman yield?

Mr. CLAYTON. Certainly.

Mr. DYER. I understand the whole difference between the two procedures is that in one instance the House called on the Attorney General for the information he had of the Archbald case, and in this case he has transmitted to the Judiciary Committee the information he has.

Mr. CLAYTON. That is the difference between the two cases. Mr. DYER. And this investigation has been made by the Department of Justice in answer to complaints that have, perhaps, been made for the year past?

Mr. CLAYTON. Yes; and similar to the course of conduct pursued by Attorney General Wickersham in the Archbald case.
The SPEAKER. 'Is there objection?

Mr. MANN. Reserving the right to object— Mr. CLAYTON. Now, Mr. Speaker, just one moment, if the entleman will indulge me. The committee thought that this gentleman will indulge me. The committee thought that this matter ought to be investigated, to the end that if Judge Speer is not guilty of the wrongful conduct alleged against him a committee of this House and the House itself ought to vindicate one of the judges of our country.

Mr. DYER. Mr. Speaker-

Mr. CLAYTON. In just one moment-and further, that if the committee, after having made the investigation fully, as it would be empowered to do under this resolution now pending, reached the conclusion that Judge Speer should be impeached

and be removed from office this committee owed it to the public and the House owed it to the public to take that course. I will yield to my colleague on the committee.

Mr. Speaker, I was going to ask the gentleman if he would not state, if he feels it is proper to do so, that the Committee on the Judiciary, from what information they have from so far investigating and examining these reports have open minds upon this matter and no opinion has been formed by any

member of the committee upon the charges alleged. Mr. CLAYTON. That is absolutely correct, and I may say, more than that, several members of the committee, speaking for themselves personally, have expressed the hope that this judge is not guilty of the things alleged against him, but we thought it was fair to the public and fair to the judge, inasmuch as so much has been said in the public press that the judge's usefulness would be impaired unless this investigation is made and that public confidence in him would be well-nigh destroyed unless after investigation this committee and the House saw proper to vindicate him against these charges; and they are of the opinion that if these charges are true the judge ought to be removed from office as being an unfit judicial officer.

Mr. HARDWICK. Will the gentleman yield? Mr. CLAYTON. With pleasure. Mr. HARDWICK. I just want to direct the attention of the chairman of the committee to the fact that in the Hanford case, and that is the last case we had, we pursued practically this method, that instead of beginning with the high-privileged resolution of impeachment-

Mr. CLAYTON. No; the gentleman is mistaken. Mr. Berger, of Wisconsin, arose in his place on this floor and in the usual formal way impeached Judge Hanford, and then offered a reso-

lution similar to this,

Mr. HARDWICK. But the resolution we adopted was similar to this-

Mr. CLAYTON. Was similar to this, Mr. HARDWICK. Exactly; there is no difference at all. Mr. CLAYTON. And so was the resolution in the Archbald

case and the Swayne case.

Mr. HARDWICK. If the gentleman will yield further, while undoubtedly it would be a matter of the highest constitutional privilege for any Member of this House to rise in his place and introduce a resolution impeaching any Federal judge

Mr. CLAYTON, Undoubtedly, Mr. HARDWICK (continuing). Still, it is a matter entirely within the province of the House and a matter entirely in accord with some of the precedents, at least, that the House shall proceed in this preliminary way before taking so grave a step.

Mr. WEBB. Mr. Speaker

Mr. MURDOCK. Mr. Speaker, will the gentleman yield right there to me?

The SPEAKER. To whom does the gentleman yield?
Mr. CLAYTON. To the gentleman from Kansas first, and then to the gentleman from North Carolina.

Mr. MURDOCK. Then this case does differ materially from the other two cases in this, that in the Archbald case and in the Swayne case the House and the public were in possession of most of the charges. In this case neither the House nor the public know what the charges against Judge Speer are.

Mr. CLAYTON. No; the gentleman is not entirely accurate in that. The House and the country know just as much about the charges involved in this case as the House and country knew of the charges involved in the Archbald case at the time of the adoption of a resolution in that case similar to this,

Mr. MURDOCK. Now, my understanding is

Mr. CLAYTON (continuing). Or in the Hanford case, for that matter.

Mr. MURDOCK. As the gentleman will remember, in the Swayne case Congressman Lamar, of Florida, rose in the House and gave specifically the charges against Judge Swayne.

Mr. CLAYTON. The gentleman is incorrect about that. the specific charges he gave in the Swayne case, in my recollection, was a memorial from the State Legislature of Florida, which was general in its nature.

Mr. HARDWICK. Just a memorial.

Mr. CLAYTON. It was rather general in its nature, and did not purport to be articles of impeachment.

Mr. MURDOCK. Are the hearings of the Judiciary Committee in any proceedings of this kind secret?

Mr. CLAYTON. Until the committee resolves to make the in-

vestigation, they are secret, but when investigation is ordered the hearings are open.

Mr. MURDOCK. As they were in both former cases?
Mr. CLAYTON. In both cases; and I happen to have been one of the three of the subcommittee in the Swayne case. Henry W. Palmer, who served here with distinction-now gone

to his reward, and blessed be his memory-and Mr. Gillette, of California, afterwards governor, and myself were appointed a special subcommittee to go to Florida. We took most of the testimony in that case in Florida, but we took some here in Washington, and the investigation was always open, as likewise under this resolution it will be open, and just as it was in the Archbald case. The reason why it has not stated these charges and the reason why the committee kept them in rather a confidential nature was because they did not want to do anything that might hurt the judge or prejudice his case; but when the investigation is ordered by the House the taking of the testimony will be in the open and the proceedings of the committee in the open, but at the conclusion of the taking of the testimony the committee will doubtless have an executive session and to consider whether the charges are sustained or not, and if articles of impeachment shall be reported to consider a draft of the charges of impeachment; or, as has been done in a number of cases in years gone by against several judges, whom I could but will not mention, as I do not care to revive an unpleasant or an unjust matter in the career of those judges, the committee may vindicate the judge. Therefore I think that up to this time, with all the publicity that has been given the matter and with justice to the judge and to the public

Mr. MURDOCK. There is nothing in the step which the gentleman takes to-day which precludes an individual Member of Congress rising in his place and impeaching the judge?

Mr. CLAYTON. Nothing. Any Member can do it as soon as

I take my seat, if he wishes to do so.

Mr. WEBB. I would like to suggest, Mr. Speaker, that the course which the Judiciary Committee is asking now to pursue in this case is on all fours with what the House did in the impeachment of Judge Wilfley, the United States judge in China. Mr. Waldo, of New York, I remember—

Mr. CLAYTON. I am glad the gentleman has called my attention to that. He and I were both on the committee at the time. Members may not know it, but we have a United States court in China, and Judge Wilfley was sought to be impeached some years ago, but was not impeached by the committee.

Mr. WEBB. I was going to suggest that Mr. Waldo rose on the floor and impeached him, and that, on the motion of Mr. PAYNE, the House sent it to the Judiciary Committee to investigate the charges and report whether a prima facie case was made out or not. The charges were made. They were investigated by a full committee, and the full committee reported against impeachment.

Mr. TOWNER. As I understand it, when an individual offers an impeachment, he offers at the same time a resolution that the Judiciary Committee make the investigation that is con-templated by this resolution? That is correct, is it not?

Mr. CLAYTON. That is usually the course.
Mr. TOWNER. Yes. I desire to call attention to this fact, that in such a case as that the preliminary information rests only with the individual, and the resolution which makes the inquiry rests presumably upon his individual knowledge. In this case the resolution of inquiry is made upon a preliminary investigation by the Committee on the Judiciary, and therefore a much wider and broader scope is afforded and a better foundation for the action is laid. I desire to commend this as a preferable method, because when a committee like the Committee on the Judiciary of this House shall make a preliminary investigation and then shall say to the House, "It is sufficient to warrant an investigation by its committee, that ought to proceed as such investigations do," it seems to me the House is entirely warranted in giving the committee that power of investigation.

Mr. MANN. Mr. Speaker, I do not remember whether an impeachment proceeding has ever been commenced in any way without some one on the floor making a charge. Certainly the custom has been for a Member of the House, on his responsibility as a Member, to present some charges in the House, and upon those an investigation has been based heretofore. was the case in the Hanford matter, where Representative Berger presented charges, and the committee was authorized to investigate those charges. I think that has been the custom. Whether any other precedent has been set or not I do not know.

Even on the suggestion of so great a committee as the Committee on the Judiciary, for the members of which I entertain profound respect, I doubt the propriety of the House, without having any charges before it, without having any knowledge presented to it, authorizing any committee to enter upon an investigation the only purpose of which is to commence impeachment proceedings.

This matter is brought up without previous notice, so far as know. The gentleman from Alabama [Mr. CLAYTON] states that the country at large has practically the same information

as the committee. Possibly he did not mean that quite that way, because I take it that the committee has the information that was secured by the Attorney General.

Mr. BARTLETT. Mr. Speaker, will the gentleman yield?

Mr. MANN. I have read the publications in the newspapers, and I have seen no charge yet made in the public press worthy of investigation. I do not know whether such charge may have been made and escaped my attention.

Mr. CLAYTON. Does the gentleman think that I ought to

tell him what these charges are at this time?

Mr. MANN. I think the House ought to be informed as to what the charges are.

Mr. CLAYTON. Very well, Mr. Speaker; much as I regret to have to do it-

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois [Mr. MANN] objects.

Mr. CLAYTON. Mr. Speaker, may I ask the gentleman from Illinois will he object to having unanimous consent to call this matter up to-morrow after the President has delivered his mes-

Mr. MANN. I think probably not, although I would not want to say now

Mr. BARTLETT. Mr. Speaker, will the gentleman withhold his objection for a moment?

Mr. MANN. Yes; I will withhold the objection for the present.

Mr. CLAYTON. Yes. I want to say one thing in reply to the gentleman from Illinois [Mr. Mann]. He has correctly stated that in a number of cases the usual practice obtaining in cases of impeachment is for a Member to rise in his place and impeach the judge and offer an appropriate resolution. there is a case exactly in point with this, with one slight difference-but in all essential particulars exactly like this-and that is the case of Judge Archbald. There the Attorney General made an investigation of the conduct of that judge, and made his report to the President, and that report was transmitted to the Committee on the Judiciary in response to a resolution of inquiry, and no charge of impeachment had been made on the floor until the committee had considered the matter and brought in the articles of impeachment. So I may say that except that here the papers were transmitted to the Committee on the Judiciary without being responsive to a resolution, whereas in the Archbald case they were transmitted in response to a resolution of inquiry, that constitutes the distinguishing feature between this case and the Archbald case, and the only distinguishing feature.

Mr. MANN. If my recollection is correct, Mr. Norris made a speech on that subject before the resolution of inquiry was presented to the House. I may be mistaken about that,
Mr. CLAYTON. He might have made a statement; I will

not undertake to say he did not, but I do not recall that he made any statement.

Mr. MANN. I would not wish the gentleman from Alabama [Mr. CLAYTON] or anyone else to think that in my opinion it is necessary for the House to have some Member rise and pre-sent charges before the House can act. Of course, the House has full power in reference to making an investigation in regard to impeachment proceedings and in acting upon any reason that is presented.

Mr. BARTLETT. Will the gentleman permit me?

Mr. MANN. Certainly. I reserve the right to object. Mr. BARTLETT. I merely want to call the attention of the gentleman from Illinois to the fact that so far as I can ascertain this investigation grew out of the fact that in the trial of a case in the United States court in Macon, Ga., a party in that case wrote a letter to the judge in which he made certain allegations of improper conduct not only in that case but in many other cases which was made public in the press. That case became celebrated by reason of the fact that the judge had the party arraigned before him for contempt of court; and that contempt case was tried and those charges by the party to the suit against the judge not only with reference to that case but numbers of other cases became a part of the records of that court, and, of course, a matter of which the Department of Justice took cognizance. The Department of Justice was compelled to assign another judge and another district attorney to try the case. In that way these matters became known not only to the press and to the public but spread upon the records of the court. An investigation was had by the Department of Justice through one of its special examiners, and that examiner has reported to the Department of Justice concerning those matters, the report being accompanied by numerous statements of lawyers and prominent citizens and extracts from the records

of the court. Whether those charges will be sustained or not I am not prepared to say. The charges are most serious. They affect the judge in every way. They affect his capacity to try cases temperamentally. They seriously affect his administration of justice in the court. They charge favoritism, despotism, tyranny, oppression, and maladministration. I do not know from the testimony or from any other source whether the charges are true or not, but I want to say to my friend from Illinois [Mr. Mann] that he could do this judge no greater harm and no greater injury than by attempting to impede or stop an investigation to ascertain the truth or falsity of these It is not for me now to determine or even to express an opinion as to whether the charges are sustained by the proofs submitted by the Department of Justice, but these charges have reached a stage where justice to the people of that district, and above all justice to the judge against whom these charges are made, requires and demands an investigation at the hands of this House.

It should not be necessary for any member of the Judiciary Committee or any other Member of the House to be compelled to rise in his place and proceed to so harsh a proceeding as to "im-peach" the judge in order to have an investigation as to the truth or falsity of these charges, because the judge should not be impeached until it shall be at least reasonably certain that he has violated the law and been guilty of some misdemeanor or misconduct justifying impeachment. But I repeat that any friend of the judge does him no good service, but does him serious harm, by standing in the way of permitting the broad, clear light of publicity to shine and beat upon his actions and his decisions from the time he entered upon this honorable office down to the present day. The people have become restless about judges of the Federal courts, and there is but one way in which we can preserve the honor, the integrity, and the supremacy of the law, and that is by compelling judges, like all other officials, to stand with their conduct open to the broad, white light of publicity and of truth. [Applause.] If you do not want to see judges recalled, if you do not want the socialistic disposition of the time to demand that decisions shall be submitted to the test of a popular vote, then you ought to be careful, aye, you ought to be quick to permit charges made by reputable citizens against the conduct of those who wear the ermine to be investigated. No judge does himself justice, no judge conserves the honor of the bench who would, by an appeal to any friend or acquaintance, stay the fullest investigation of his conduct from the deance, stay the fullest investigation of his conduct from the day he donned the ermine until this good hour.

Mr. Speaker, I hope that no gentleman in this House will be so unjust to the people of that district, so unjust to that distinguished judge, as to prevent a speedy, impartial, full, white-light investigation of his conduct, so that if he has been unjustly accused he shall come forth fully vindicated, freed from suspicion and freed from suspicion of these charges; but unfortunately the charges many of which are most sortions affective. tunately the charges, many of which are most serious, affecting the honor and integrity of the judge, are made, and these people, who say they have been tyrannized over, oppressed, and unjustly

treated by the judge, should have an opportunity to be heard.

Mr. Speaker, "Of law there can be no less acknowledged than that her seat is the bosom of God, her voice the harmony of the world. All things in heaven and earth do her homage—the very least as feeling her care and the greatest as not exempted from her power." The judge is the minister of the law, and the seat he occupies and his ermine should be pure and spotless; no upright and impartial judge can afford to stop or stay or hinder any investigation into his judicial integrity when it is assaulted. [Applause.]

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I presume the gentleman from Georgia is thoroughly familiar with all of the charges made against this judge. Possibly he has communicated with the Department of Justice concerning the investigation which has been made.

Mr. BARTLETT. I have not.

Mr. MANN. It was so reported in the newspapers.
Mr. BARTLETT. Only one-third of what you see in the newspapers is true and two-thirds not true.

Mr. MANN. We are asked to make an investigation based on what the newspapers said, and perhaps we ought to investigate as to whether the gentleman from Georgia has been to the Department of Justice. I am willing to take his denial, but the gentleman himself would not be willing to do that. I can

see no reason for acting on this resolution to-day.

Mr. CLAYTON. Mr. Speaker, of course the gentleman from Illinois is familiar with the rules of the House. I have had occasion to examine the precedents contained in the third volume of Kinds' Precedents, and while the question as to whether it is a privileged resolution or not is doubtful, I think the weight of authority is that it is not privileged. I reached I

that conclusion, and I may state frankly to the House that that was the conclusion of the present distinguished occupant of the chair. Some Speakers have ruled to the contrary, but the weight of authority and the reason in support of that weight is

against its being privileged.

Now, there are two ways to have this resolution made privileged so that it can come before the House—one is by a special rule and the other is the usual way, by a Member impeaching the judge on the floor of the House.

Now, I ask the gentleman from Illinois, in view of all the circumstances, if he would not be willing that this resolution be called up to-morrow after the President has delivered his message to Congress and be then considered and no objection thereto be made?

Mr. MANN. I stated to the gentleman from Alabama a while ago that I might be willing to agree to that to-morrow, but I was not willing to agree to it to-day.

The SPEAKER. Is there objection? Mr. MANN. For the present I object.

## MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment the following resolution:

House concurrent resolution 16.

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Wednesday, the 27th day of August, 1913, at 12 o'clock and 45 minutes in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make them.

#### CONTESTED-ELECTION CASE.

Mr. POST. Mr. Speaker, I call up for consideration the privileged resolution which I send to the Clerk's desk.

The Clerk read as follows:

House resolution 231.

Resolved, That William J. MacDonald was duly elected a Representative from the twelfth congressional district of Michigan to the Sixtythird Congress, and is entitled to a seat therein.

The SPEAKER. Is this a unanimous report?

Mr. POST. It is; yes, sir.
Mr. RUCKER. Mr. Speaker, I think this matter should be discussed some before the vote is taken on it. I presume the gentleman from Ohio desires to make some remarks.

Mr. POST. A parliamentary inquiry, Mr. Speaker. The SPEAKER. The gentleman will state it.

Mr. POST. Am I entitled to an hour?
The SPEAKER. Yes; and if the previous question is not ordered any Member who can get recognition is entitled to an

Mr. RUCKER. I should like some time. Mr. POST. I will yield to the gentleman.

Mr. RUCKER. I want to hear the gentleman from Ohio

first, and then I want to be recognized in my own right.

Mr. POST. I will say to the gentleman that I will not ask for the previous question.

The SPEAKER. Is the gentleman from Missouri [Mr.

RUCKER] a member of this committee?

Mr. RUCKER. No, sir; but I am a Member of the House.

The SPEAKER. The Chair wanted to know in reference to recognition. The practice is that if any member of the committee desires recognition, he is entitled to it in preference to converte the Member. any other Member.

Mr. MANN. A parliamentary inquiry, Mr. Speaker. The SPEAKER. The gentleman will state it.

Mr. MANN. Where a committee makes a unanimous report and a member of the committee takes the floor in favor of sustaining it, is not a Member who is opposed to it entitled first thereafter to recognition?

The SPEAKER. Yes; that is true.
Mr. MURDOCK. Mr. Speaker, the gentleman from Ohio
[Mr. Post] has the floor in his own right for one hour?
The SPEAKER. Yes.

Mr. MURDOCK. And he has the right at any time to move the previous question?

The SPEAKER. Yes. Mr. MURDOCK. No. Mr. MURDOCK. Now, the gentleman from Ohio has said that he will yield of his time to the gentleman from Missouri [Mr. Rucker]. Does not that provide for the other proposition?

The SPEAKER. But the gentleman from Missouri said he wanted to be recognized in his own right. Of course, he has to take his chance of the gentleman from Ohio moving the previous question.

Mr. Speaker, I would like to know if I can not arrange with the gentleman from Ohio as to a limit of time

for debate upon this question.

The SPEAKER. The gentleman from Ohio will give his attention to the gentleman from Missouri.

Mr. RUCKER. I would suggest the House give unanimous consent to an hour on a side, one half to be controlled by the gentleman from Ohio and the other by myself.

Mr. POST. We have that right under the rule. I will not

move the previous question.

Mr. HAY. I would like to ask the gentleman from Missouri if he is opposed to the resolution?

Mr. RUCKER. Yes; I am opposed to it.

Mr. MANN. Why not make it less than an hour on a side, in order to accommodate your side of the House?

The SPEAKER. What is the desire of the gentleman from

Mr. POST. An hour on a side.

The SPEAKER. The gentleman from Ohio asks unanimous consent that two hours' debate be allowed, one half the time to be controlled by himself and I suppose the other half by the gentleman from Missouri, as he seems to be the only one who wants to be heard. Is there objection?

Mr. UNDERWOOD. Mr. Speaker, reserving the right to object, I would like to ask if the gentlemen can not agree to get along with less than two hours' time. We want to finish up

the currency bill.

Mr. RUCKER. This is an important matter.

Mr. UNDERWOOD. If this is a unanimous report-Make it three-quarters of an hour on a side.

Mr. MANN. Mr. RUCKER. Three-quarters of an hour will be satisfactory

so far as I am concerned; I probably will not use that much.
The SPEAKER. The gentleman from Ohio asks unanimous consent that debate be an hour and a half, 45 minutes to a side, he to control 45 minutes and the gentleman from Missouri the other 45 minutes. Is there objection? [After a pause.]

Chair hears none.

Mr. POST. Mr. Speaker, this case is the contested-election case of William J. MacDonald against Hon. H. Olin Young. The case arises from the twelfth congressional district of the State of Michigan. There were four candidates for Congress in that district at the last general election in 1912. Mr. Young was the candidate on the Republican ticket and Mr. MacDonald was the candidate on the National Progressive ticket, but Mr. Young having resigned his seat we have not anything to contend with except the question of whether or not Mr. Mac-Donald under the evidence he produced before the committee is entitled to a seat in the House. Now, I do not care to take up time in the discussion of this question, because the committee was unanimous in its report that Mr. MacDonald was entitled to a seat under the evidence he had produced before the committee. In the State of Michigan they have a primary That primary act provided that a person in order to be entitled to be a recipient of votes must enroll or register before officers provided for that purpose his party affiliations, and it was contended in the hearing of the case that because of that Mr. MacDonald at the time of the primary and at the time of the general election was not qualified to be the recipient of votes. Now, I do not care to discuss the question more than to say the committee found that there was nothing in that contention. In other words, we found that the provisions of the primary act if applicable to the general law superadded a qualification to the qualifications requisite for a Member of this House, which the Legislature of the State of Michigan was not authorized to do. Now, when Congress convened in extraordinary session Mr. Young appeared at the bar of the House and was sworn in. I might state prior to that, however, that it was generally understood in the district, until the State board of canvassers of the State of Michigan had canvassed the vote—that is, on the 10th of December—that Mr. MacDonald was elected. Everybody conceded his election up to that time. There were 15 counties in the district, and in all the counties in the district except one county, Ontonagon County, Mr. Mac-Donald's name was printed upon the ballot under the designa-tion of "William J. McDonald."

In Ontonagon County it was printed on the ballot as "Sheldon William J. McDonald." The committee thinks this was purely a mistake, and it occurred in this way: Under the law of Michigan it is the duty of the chairman and secretary of the committees to certify the entire ticket to the commissioners of election for the purpose of enabling them to print and to prepare the ballot. This was done in every county of the district, but afterwards it was discovered that this certificate spelled the name as "McDonald," when, in fact, his name was "Mac-Donald." When this was discovered the secretary of the National Progressive Party of the State committee telegraphed to the clerk of each board of county commissioners a dispatch

something like this:

The name of the candidate for Congress is spelled William J. Mc-Donald correct.

The receiver of the telegram in Ontonagon County misconceived or misinterpreted the characters which stand for the word "Sheldon" and the word "spelled" and interpreted the telegram to read "Sheldon William J. McDonald." And in that county his name appeared upon the ballot under that designate the county has not been supported by the county has not been supported by the county has name appeared upon the ballot under that designate the county has name appeared upon the ballot under that designate the county has name appeared upon the ballot under that designate the county has name appeared upon the ballot under that designate the county has name appeared upon the ballot under that designate the county has name appeared upon the ballot under that designate the county has not been considered to be cons nation. Now, Mr. MacDonald received in 14 of the counties 17,975 votes. In Ontonagon County there was cast for the Progressive candidates on the Progressive ticket 458 votes, and the election commissioners in canvassing the vote in Ontonagon County canvassed the vote for the candidate for Congress under the name of "Sheldon William J. McDonald," so the State board of canvassers when they canvassed the entire district on the 10th day of December canvassed the 14 counties under the name of "William J. MacDonald," and in Ontonagon County they canvassed the vote as 458 votes cast for "Sheldon William J. McDonald," and issued the certificate of election to Mr. Young, notwithstanding the fact that everybody up to that time had conceded the election of Mr. MacDonald. Your committee has found that the board of canvassers should have treated the word "Sheldon" as mere surplusage. They contended that under the laws of the State of Michigan that they were bound by and could not look beyond the face of the ballot to determine the intention of the voters. But this House, by a long line of precedents, has established the rule that we can go behind the face of the ballot and we can take into consideration the circumstances surrounding the election, and if we find that a ballot has been improperly printed, we have the right to make that correction. And for that reason we say that Mr. Mac-Donald is fairly entitled to the 458 votes cast for him in Ontonagon County. It was a mistake pure and simple. It was a mistake simply in printing the name upon the ballot. I do not care to say anything further on that question, Allowing the votes that were cast for the National Progressive ticket in the twelfth congressional district of Michigan, he would have a clear plurality of 243 votes, and we think, beyond question, on those propositions he is entitled to a seat in this House.

Mr. MURDOCK. Will the gentleman yield?
The SPEAKER. Will the gentleman from Ohio yield to the gentleman from Kansas?

Mr. POST. Yes.

Mr. MURDOCK. Did not the committee also find in its investigations that there was no question at all of the intention of the voters in that county, by reason of the fact that the same number of votes that William J. MacDonald received was the number received by other Progressive candidates for office?

Mr. POST. You will find that in the report. Mr. MacDonald,

under the name of "Sheldon William J. McDonald," in Ontonagon County received the same number of votes practically that the presidential electors and State officers received whose names appeared on the National Progressive ticket in that county.

Mr. Young made a speech in this House on the 10th day of May, at the time he resigned his seat, and he conceded upon the floor of the House that it was the intention of the electors who cast the 458 votes in Ontonagon County to cast them for the candidate for Congress on the National Progressive ticket.

Now, there was another question which I understand that some gentlemen wished to be heard upon, and it is this: On the 26th of October, 1912, Mr. MacDonald filed his account with the Clerk of this House of his expenses up to that time, which were incurred in his campaign. He was also required by the Federal statute to file his account after the election, but he filed no account until the 13th day of April, 1913. Subsequent to the 13th day of April, 1913, he filed an additional account. Now, some question is made as to his neglect in filing within the time prescribed by law this account which the statute requires should be filed subsequent to the day of election.

The statute was enacted in the year 1910. It was amended in the year 1912. The statute, to my mind—and I am not speaking for the committee in this respect—is mandatory by its very I think it is mandatory upon a candidate for Congress to file these accounts that are required to be filed by the statute. The law not only requires the candidate to file an account of all the sources of his campaign funds, but excluding advertising and postage and telegrams and telephone expenses and personal expenses, it also requires him to file an account of all dis-

bursements made by him.

But I want to call the attention of the House to this significant fact, that the statute is a penal statute. The statute does not go to the qualifications of a Member of the House, and the view that your committee has taken of that is this, that where there has been neglect, through a mere omission to file an account, not purposely to conceal bribery or fraud or to cover up an unfair election, it should not deprive a Member of a seat in this House.

I may say the statute is highly penal. It provides a penalty of a thousand dollars fine as a maximum, with one year in the penitentiary as the maximum of imprisonment. But we do not think that because the statute is a penal statute and because it does not go to any of the qualifications required by a Member of Congress ground would be afforded for refusing a seat. But beyond that we think that if the neglect or omission to file an account was done purposely, was done for the express purpose of covering up an unfair and an unjust election, to cover up bribery or fraud in an election, then this House has a perfect right to take into consideration the failure, either by omission or willful neglect, to file an account.

Now, there is another proposition touching upon this question. The Federal statute requires that within a certain time the contestant shall file notice upon the contestee of the grounds upon which he is going to rest or base his contest. The statute provides that the contestee shall file an answer to that notice, and in that answer he shall either affirm or deny the allegations in

the notice, and by way of countercharge set up any new matter.

Now, in this case, in making up the issues that were made up between the contestant and the contestee, the question of the omission or neglect to file this expense account was not made an issue, but if you will examine the records of the case you will find that testimony was taken upon this proposition, and taken without objection, that being the reason why the committee considered the question. But what I want to point out to the House is this, that by the decisions of this House in contested-election cases the House has uniformly held that its Committees on Elections must confine their consideration to the issues joined between the contestant and the contestee, and in this case there was no issue made of the question of the neglect or omission to file an expense account. Notwithstanding that, we did consider the question.

Now I yield, Mr. Speaker, to the gentleman from Missouri

[Mr. RUCKER].

Mr. FRENCH. If the gentleman from Miscouri prefers to speak now, I can wait. I am favorable to the proposition.

Mr. POST. Mr. Speaker, I reserve the remainder of my time. How much time have I consumed?

The SPEAKER pro tempore (Mr. MURRAY of Oklahoma). The gentleman has consumed 15 minutes.

### [Mr. RUCKER addressed the House. See Appendix.]

Mr. MANN. That provision of the law has nothing to do with the filing of the account. You do not have to include expenditures for printing under that section. That is a provision for the purpose of specifically covering the \$5,000 limitation.

Mr. MURDOCK. Will the gentleman explain that and clear

up that point?

I will if I have time. Mr. MANN.

Mr. MURDOCK. I hope the gentleman may have the time. When the gentleman makes the assertion that a thing is not covered by the law, which we all understand is covered by the law, I should like to know the reason.

Mr. MANN. I think everybody understands. There is a provision that certain expenses shall not be covered by the section. That is a provision in order to permit you to expend \$5,000, plus the printing.

The SPEAKER. Will the gentleman from Illinois suspend to allow the Chair to ask a question?

Mr. MANN. Certainly.

The SPEAKER. What did the gentleman from Missouri [Mr. RUCKER] intend to do with his remaining 13 minutes?

Mr. MANN. The gentleman yielded some time to me. Mr. RUCKER. I yield to the gentleman from Illinois such time as he wants out of my 13 minutes.

The SPEAKER. The Chair only wanted to keep the time

straight

Mr. MANN. I do not want the 13 minutes.

When the Missouri case was before the House in the last Congress, the Democratic side of the House insisted that the gentleman from Missouri, who was a contestee, had violated the State law with reference to the amount of money to be expended. The Republican side of the House insisted that he had not violated the law, but, as I understand, both sides of the House practically agreed that if he had violated the law he would not have been entitled to his seat. Now, since I have been a Member of this House I have heard a great deal about campaign publicity. I have never been extremely enthusiastic over the laws that have been passed upon the subject, because I have feared that they might be onerous to men who would endeavor to obey the law, but would not trouble those who did not care to obey it. It is proposed to-day to wipe the publicity law off the map. Why should anybody obey it? Here is a man who deliberately violates the law and is unquestionably subject I friends. I yield back the balance of my time.

to a criminal prosecution, but nobody wants to prosecute him criminally. There never has been a criminal prosecution under this publicity law; and when in the last Congress a report came in from a committee designed to call the attention of the Attorney General to the matter so that he might investigate and see whether the law had been violated, it was laid on the table by the House

What is the publicity law for? Is it to have gentlemen publish their expenditures and their receipts, or only those gentlemen who are honest enough to do it?

Mr. RAKER. Will the gentleman yield right there? Mr. MANN. Well, that depends.

Mr. RAKER. Just for a question. Is it not a fact that in addition to the expenditures, he must set out the fact that he has made no promise or agreement of any kind for any office?

Mr. MANN. Oh, yes. The law says that he can not make a promise, and then requires him to say, if he did make one, that he had made it. If he makes a promise he violates the law, and if he does not say that he has made it he violates the law.

I do not propose to criticize the committee in reference to its report-

Mr. POST. Will the gentleman yield? If Congress had intended

Mr. MANN. Let me discuss that. Mr. POST. I want to put a question to you. If Congress had intended to make a failure to comply with this act a disqualification for membership in this House, would it not have put into section 10, in addition to the \$1,000 fine and the one year's imprisonment, the statement that upon conviction the party should be ineligible to hold his office?

Mr. MANN. I do not think so, because I doubt whether Congress has that power. The Constitution of the United States fixes the eligibility of a Member of this House; but the House, not Congress, determines whether the Member is duly elected or not. The Senate has nothing to do with that.

Mr. HELM. Will the gentleman yield?

Mr. MANN. I should like to make a consecutive statement first, and then if I have a moment I will yield. I do not propose to criticize the committee for their report.

Mr. RUCKER. Will the gentleman yield to me for just one

moment?

Mr. MANN. Certainly; as the gentleman has offered to yield me time.

Mr. RUCKER. I have a suspicion that somebody, euphoniously called a Bull Mooser, has looked up my campaign expenditures and has them here on the floor. I would be glad if he would present them.

Mr. MURDOCK. The gentleman is not alluding to me.
Mr. RUCKER. Not at all.
Mr. MURDOCK. I have not looked up the gentleman at all.
Mr. RUCKER. I am sure the gentleman has not.

Mr. MANN. Mr. Speaker, I do not propose to criticize the committee for having made the report that it has made. I am inclined to think that if I had been a member of the committee I would have taken the same view that the committee have taken. And yet the situation is this: Here was a contest between a Progressive and a Republican. The Republican resigned. The only question now is whether the Progressive will be admitted to the floor as a Member. The Democratic Party, without a two-thirds majority in this House, would have met the question between a Progressive and a Republican without bias, and certainly it is in a position to-day to do so when there is no contest between anybody. All sides of the House, I think, can meet this question without bias except the gentlemen who follow my distinguished friend from Kansas. have a right to be biased in his favor, and ought to be. the House is setting a precedent. If the House determines in this case that a failure to file the statement required by the law concerning expenditures and receipts is not a disqualification, I hope in the future when partisan feeling is running high neither side will turn some one out because he has failed to file a statement of his expenditures and receipts. I hope the distinguished gentleman from Kansas and other distinguished gentlemen of this House will cease to keep agitating the air about the filing of campaign expenses and about publicity of receipts and expenditures. The only way you can enforce the law is for the House or the Senate to refuse to seat a man or to keep him in his seat for a violation of it.

You can not try cases like this before a petit jury and obtain conviction once in a thousand times. When the House determines that it proposes to seat a Member regardless of his compliance with the law, it determines that the publicity of campaign expenses is good to talk about, but is not worth doing anything about, and that applies especially to our Progressive

Mr. FRENCH rose.

The SPEAKER. For what purpose does the gentleman rise? Mr. FRENCH. Being a member of the committee in favor of

the proposition, I want to obtain some time from the chairman.

Mr. POST. I will yield to the gentleman, but I agreed to yield first to the gentleman from Georgia [Mr. Crisp] five

Mr. RUCKER. How much time, Mr. Speaker, remains on my

The SPEAKER. The gentleman has three minutes.

Mr. POST. Mr. Speaker, I yield five minutes to the gentleman from Georgia [Mr. CRISP].

Mr. CRISP. Mr. Speaker, in the language of a former New York statesman, I am a Democrat, so that I approach this contest between a standpat Republican and a Progressive without any bias in favor of either. From my school of political economy I think the country would be best off if they could kill off each other. [Laughter.]

But seriously, Mr. Speaker, there are only three points in this As an American Representative I have endeavored earnestly and fairly to consider the testimony in the case and try so far as it was within my power to arrive at a fair and just and equitable verdict for the people residing in the twelfth con-

gressional district of Michigan. Now, my good friend, the chairman of the Committee on Election of President and Vice President, Mr. RUCKER-and I have the honor to be on that committee and it will be my pleasure to cooperate and aid him in any way possible to strengthen the campaign-publicity act, to insure and guarantee pure electionshas based his speech solely on the failure of the contestant in this case to file a statement, as required by law. I agree that the law is mandatory and should be obeyed. Mr. RUCKER by his ability has taken away the mind of the House from the facts of the case, and that is the one reason that induced me to make these remarks, because I want to call the attention of the House to the whole case and not let it go off and decide the case on that one bald proposition.

There are three propositions in this case. It is contended that Mr. MacDonald was not legally nominated under the primary law and not eligible to become the nominee of the Progressive Party for Congress in that district. The second point is that there were 458 votes intended by the voters to be cast for Mr. MacDonald in Ontonagon County, and the third question that has arisen, not by notice of contest, not by any of the pleadings in this case, but has arisen subsequent to the resigning of Mr. Young, is that Mr. MacDonald did not file an expense account,

as required by law. Now, as to the first point, as to the nomination. It is contended that because Mr. MacDonald was registered as a Republican it was impossible for the voters of that district to vote for him for Congress on any other ticket than the Republican ticket. I do not think there is any question in the minds of the Members of the House, who have given it any consideration, that this contention is absurd. It would be superadding to the qualifications required by the Constitution of the United States for a citizen to become a Congressman. The Constitution simply requires a man to be 25 years old, seven years a citizen in this country, and an inhabitant of the State to be represented. This contention would require that a citizen, possessing the qualifications required by the Constitution, should also possess the additional qualification that he was registered as a member of some certain political party. This is repugnant to the Federal Constitution and can not be upheld. It would deprive the qualified voters of their inalienable right to vote for the man of their choice, qualified under the Constitution to become their Representative. Such a contention is repugnant to the Constitution and I will dismiss it without further remarks. But as to the facts in this case: One Mr. Rogers was nominated in the regular primary held under the laws of Michigan as the Progressive candidate for Congress. Mr. Rogers had been declared the nominee of the Progressive Party and had received from the secretary of state of Michigan a certificate that he was the duly elected nominee of the Progressive Party for Congress in that district. He resigned. Then the Progressive Party in convention nominated Mr. MacDonald as its candidate. Mr. Rogers sent a declination of his nomination to every county in the district and supported and recognized Mr. MacDonald as the nominee of the party. The chairman and secretary of the State central committee of the Progressive Party of Michigan and the chairman and secretary of the congressional committee recognized Mr. MacDonald as the nominee of the party. All of the election officers of the State of Michigan in every county In the district recognized Mr. MacDonald as the Progressive nominee for Congress in that district, and his name appeared

the district save in one, Ontonagon County, and there his name appeared with the word "Sheldon" affixed in front of it. I believe, speaking for myself, that Mr. MacDonald's nomination was legal.

The laws of the State of Michigan gave the managers, voters, and everyone interested a remedy to have Mr. MacDonald's name stricken from the ballot if improperly thereon. They should have gone to the court and had his name stricken from the ballot, and if they failed to do that it is certainly inequitable to allow them to complain after the election. But beyond this, Mr. Young-and I wish to commend his course in this House; he is an honorable, high-toned man-did not want any office to which he was not elected by the people-

The SPEAKER. The time of the gentleman from Georgia has expired.

Mr. POST. I yield the gentleman five minutes additional. The Republican Assistant Attorney General en-Mr. CRISP. deavored to have Mr. MacDonald's name stricken from the ticket, but Mr. Young opposed this and sent a notice to all the voters of the district, saying that though Mr. MacDonald's nomination was not regular, he believed in the people ruling, and he asked all the election managers to leave his name on the ticket and let the people decide between them. This course was pursued in every county of the district, but in Ontonagon County William J. MacDonald's name was placed on the ticket, not in the Progressive column, but in a separate column, printed in small type. On the Progressive ticket also appeared the name Sheldon William J. McDonald. "Sheldon," which was surplusage, was a mistake by the election clerk, caused by misreading a telegram received by reading the word "spelled" for There was no such person as Sheldon William J. There were 458 votes cast in Ontonagon County for all the Progressive candidates, and Sheldon William J. McDonald received in that precinct the same number of votes that all the other Progressive candidates received-458 votes. Now, the canvassing board of the State of Michigan, they went to consolidate the vote, gave Mr. MacDonald 17,975 in all of the other counties of the district, not counting any votes for him in Ontonagon County. They gave Mr. Young 18,190 votes, and they threw out and did not count for Mac-Donald the 458 votes in Ontonagon County; and they issued the certificate of election to Mr. Young. Mr. MacDonald went to the Supreme Court of Michigan and asked for a mandamus to require this election board to recanvass the vote and count those 458 votes for him.

The supreme court refused to entertain the writ, giving no reason for their refusal to act on the matter, but simply refusing to take jurisdiction. One of the judges, in the public press of Michigan, gave out a signed statement that the reason they did not take cognizance of the case was because they had nothing to do with it; that Congress and Congress alone was the sole and exclusive judge of the qualification of election of its Mem-There is no dispute as to the facts in this case.

Mr. Speaker, in my opinion no one should be permitted to trifle with the people. If Mr. MacDonald was not legally nominated, the interested parties should have appealed to the courts to exclude his name. This was not done, and, in my judgment, all persons are now estopped from contesting Mr. MacDonald's nomination.

No one questions but that the 458 votes in Ontonagon County were intended by the voters to be cast for William J. MacDonald, and Mr. Young, in his place on the floor of this House, conceded as much, and said that he believed that any equitable forum, seeking to be just and do right, would count those votes for MacDonald, and if they did MacDonald would have a majority of 243 votes, and therefore he, Mr. Young, did not care to hold the seat under such terms, knowing a plurality of the people in his district voted against him, and therefore he issigned.

Now, gentlemen, those are the facts in this case. We have a government of the people and by the people, and it has been an inspiration to all the world, but if you by technicalities take steps to thwart the will of the people when honestly, fairly, and impartially expressed at election and to deny them the Representative that they have honestly and fairly chosen you will bring contempt upon law and order, and will do more to destroy our glorious Government than all else you can do. I believe in the people's rule, and a plurality of the electors of the twelfth Michigan district having voted for Mr. MacDonald, he is entitled to represent them, and I shall vote to seat him. [Applause.]

The SPEAKER. The time of the gentleman has again ex-

pired.

Mr. CRISP. I would like to discuss the third proposition, failure to file statement of campaign expenses, but as the time is so limited and others on the committee desire to speak I will on the ballot as the Progressive candidate in every county of not ask further time.

Mr. POST. Mr. Speaker, I yield five minutes to my col-

league on the committee [Mr. French].

Mr. FRENCH. Mr. Speaker, the gentlemen who have pre ceded me in commenting upon the facts in the case have stated them so accurately that I need not dwell upon them. Touching, however, the question of whether or not MacDonald's name had the right to go upon the petition, touching the question again of whether or not we have a right to count the vote of Ontonagon County for William J. MacDonald, touching the right of procedure of the congressional committee in nominating MacDonald, I have not the slightest doubt that all three of those propositions are abundantly sustained by the precedents that have been made by this House along the line that has been suggested by the gentlemen who have just preceded me.

There is another question upon which the greatest interest seems to have turned this afternoon and to which I want to refer, and that is the question of the failure of the contestant to file his election statements prior to and subsequent to the

election in the manner prescribed by law.

The fact of the business is that if you will examine the section of the law to which the gentleman from Illinois [Mr. MANN] has called attention and examine the statement that was filed on October 26 by the gentleman—the contestant in this case—I think you will be abundantly assured that even the disclosures made in that affidavit were surplusage and need not to have been made at all. More than that, the contestant at the end of that statement says that he was to no other expense. The fact of the business is, and it came to the attention of the committee, the contestant was the district attorney in his district. Immediately following the election he had to appear in court for the trial of some 50 cases, or disposition of them, that were upon the calendar. He did not know that he overlooked the filing of these expense accounts. He had been placed upon the ticket only about one month prior to the election.

Mr. MANN. Will the gentleman yield?

Mr. MANN.

Mr. FRENCH. I will yield.

Mr. MANN. Does the gentleman think that the fact that the

man is a criminal prosecutor excuses him from obeying the law?

Mr. FRENCH. On the contrary, I think that very fact ought
to be further notice to him that he should see to it that he comply with the law. But let us consider the facts further in connection with this case. It seems that when the gentleman's attention was called to his delinquency, on April 21, 1913, he filed a supplemental affidavit, on April 24 another one, and endeavored in them to support or amplify the affidavit filed on October 26, and to file an affidavit that would take the place of the one that ought to have been filed 30 days following the election.

Will the gentleman yield to a question right there?

Mr. FRENCH. Yes, sir.

Mr. COX. What affidavit did he make, if anything, as to whether or not he made any promises?

Mr. FRENCH. I will say to the gentleman that that question

was not raised in the hearings at all.

But that is a part of the law.

Mr. FRENCH. I have no doubt that the committee would have been glad to have gone into that question, and I can only speak as one member of the committee. That was a question that was not called to the attention of the committee at all, but I have no doubt that the committee, if it had been called to its attention, or even now, if the matter were to be referred to the committee, as could be done by the Congress, would inquire into and report to this House. That question was never before the committee. However, going back to the question of campaign expenses, the gentleman, when his attention was called to the matter, did try to correct the record that had been made.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. FRENCH. I yield.

Mr. MANN. Were not these last statements filed upon the forms?

Mr. FRENCH. I am not sure whether they were or not. One of them was not. Whether the third one was or not I do

Mr. RUCKER. It was not.

Mr. MANN. I was speaking of the question of promises. If he filed an affidavit upon one of the forms, to that extent he covered the promises, probably.

Mr. RUCKER. He did file one of them on the form on the 23d day of April. Let me ask the gentleman a question.

The SPEAKER. Does the gentleman from Idaho yield?

Mr. FRENCH. I yield.
Mr. RUCKER. Does the gentleman think the statement covering \$120 expended for newspaper publication complies with

Mr. FRENCH. I would say that it does; but if the gentleman says it does not, I would not contest it with him.

Mr. RUCKER. Does not the law require the items to be given in detail?

Mr. FRENCH. Yes.

Mr. RUCKER. Does not the gentleman understand that this \$120 was one item, and no more?

Mr. FRENCH. That is my understanding.

Mr. RUCKER. That is one item only; \$120 for newspaper publication

Mr. FRENCH. That is what I understand is set forth in the statement.

Mr. Speaker, can I have a few minutes more?

Mr. POST. I am sorry, Mr. Speaker, that I can not yield the gentleman more time.

Mr. FRENCH. Then, Mr. Speaker, I will ask leave to amplify and extend my remarks as to the record in this case.

The SPEAKER. The gentleman from Idaho [Mr. French] asks unanimous consent to extend his remarks. Is there objection?

There was no objection.
Mr. POST. Mr. Speaker, I yield one minute to the gentleman from Kentucky [Mr. Helm].
The SPEAKER. The gentleman from Kentucky [Mr. Helm]

is recognized for one minute.

Mr. HELM. Mr. Speaker, if I can not demonstrate to you and the Members of the House in one minute that Mr. Mac-Donald is entitled to his seat, I can not demonstrate it at all. The election was held. The Democratic candidate does not claim that he was elected. Mr. Young, the Republican candidate, states he was not elected. Mr. MacDonald has proven that he was elected, and he was elected. [Applause.]

Now we come back to the proposition of the gentleman from Missouri [Mr. Rucker]: The campaign publicity law defines clearly and fully the acts that constitute the offense. It fixes the degree of punishment with certainty. That degree of punishment must be uniform and must rest upon every citizen of

the United States equally and alike.

A man is elected, like Mr. MacDonald; you undertake to penalize him further by depriving him of his seat. According to the gentleman from Missouri, he would establish one degree of punishment for him and a less degree for the defeated candidate. What are you going to do to the man who was a candidate and was not elected and has failed to file the required statement? Do you think the Congress of the United States had it in its mind to saddle an additional penalty on the man who was elected and allow the one who was defeated to go free of all punishment? [Applause.]

Mr. RUCKER. Mr. Speaker, will the gentleman yield?

Mr. HELM. No; I have got only one minute. [Laughter.] This law has to be equal and uniform. You are punishing one man with one degree of punishment and another man with another degree of punishment, and Congress was never so stupid and farcical as to undertake to put such a statute as that upon [Applause.] the books.

Mr. MANN. The gentleman from Kentucky voted for that

w at the last Congress.

Mr. POST. Mr. Speaker, I yield three minutes to the gentleman from Michigan [Mr. CRAMTON].

The SPEAKER. The gentleman from Michigan [Mr. CRAM-

TON] is recognized for three minutes.

Mr. CRAMTON. Mr. Speaker, as I understand the purpose of this publicity law, it has been to place strictly the rule of our Government in the hands of the people rather than in the hands of corruption.

Now, it seems to me that in this case as there is no suggestion, no evidence of corruption or fraud, or anything whatever to show that the will of the people has been defeated by the improper use of money, to say that this man, elected by 20,000 votes of his district, shall not take his seat because, for sooth, he failed to file his statement on a particular day, as specified in the act, would be defeating the very purpose of the act.

Now, I have not anything more to say, Mr. Speaker, on the merits of this question further than to make this statement: That when the distinguished gentleman from Michigan, Mr. Young, addressed the House with reference to his resignation as a Member of this House I was not in this Chamber. I have, however, read his remarks with the care and interest which they deserve. I have little more to say with reference to them than to acknowledge that I was one of the "three Representatives from Michigan" who "voted for the resolution of the gentleman from Michigan" who "voted for the resolution of the gentleman from Illinois" which proposed the seating of Mr. MacDonald at the opening of this session. While I did not feel then that the resolution in question was properly offered at that time, inasmuch as the membership of the House in general could not be satisfactorily informed as to the merits of the controversy without some investigation by the House, still I felt myself fully and reliably informed and prepared to vote then, and I did vote

then in accordance with my ideas of the demands of justice. That my vote at that time was in accordance with justice is substantiated by the admission of Mr. Young that "it was the intention of those 458 electors to vote for the candidate of the National Progressive Party," by the unanimous action of the Elections Committee, composed of members of three parties, and by the apparent intention of the House itself to seat Mr. MacDonald.

With further reference to Mr. Young's remarks, I only desire to say that, while it is not therein directly so stated, it seems to me to have been the intended inference that I was one of those who had "joined in baiting the supreme court," and perhaps also had engaged in unfriendly attack upon Mr.

Neither inference would be true or just. Whatever may be my opinion as to the wisdom of the action of the State board of canvassers, I have always believed that the Supreme Court of Michigan took the only course it legally could take in deciding Mr. MacDonald's mandamus application. It declines to pass upon the merits of the contest for the reason that jurisdiction was in Congress. Not only have I not "joined in baiting," but I have approved and do approve of that decision.

Not having been honored with the personal acquaintance of either of the parties to this contest prior to the opening of this session I have had no personal animus and I have not joined in any unfriendly attacks Mr. Young may feel have been made upon him. My only public statement heretofore on this case or the parties to it was that which I gave to the Detroit Journal in response to the inquiry of its editor, which statement was published in that paper about the middle of March last and which I now give to this House as my reason for believing Mr. MacDonald should be given the seat in question:

Under the facts as I now understand them I shall certainly vote to seat MacDonald. There appears to me to be no question but what he was fairly chosen by the voters of his district, and their choice should control. I believe my vote should be guided by principles of justice rather than by partisanship; further I believe no party can live or build itself by partisanship at the expense of justice.

Mr. POST. Mr. Speaker, has the gentleman from Missouri [Mr. RUCKER] any further time?
The SPEAKER. The gentleman from Missouri has three

Mr. POST. Will he use that three minutes now?

Mr. RUCKER. Mr. Speaker-

Mr. KELLEY of Michigan. Mr. Speaker-

The SPEAKER. The gentleman from Missouri has the floor. Mr. RUCKER. The gentleman from Kansas [Mr. Murdock] said I did not have the right to it.

Mr. MURDOCK. I thought the gentleman had exhausted his I am always glad to hear from the gentleman from Missouri.

[Mr. RUCKER addressed the House. See Appendix.]

Mr. POST. Mr. Speaker, I yield four minutes to the gentleman from Wisconsin [Mr. Frear].
Mr. FREAR. Mr. Speaker, my reason for speaking is simply to resent the imputation that this Elections Committee in considering this matter has been guilty of negligence, and that this man whom you will probably seat in this body is a criminal. I fear that the gentleman from Missouri, who drew the law, is too proud of his child, and for that reason in trying to protect it forgets more important features connected with it.

Let me say to the gentleman from Illinois that he fails to understand the power that prevents the seating of a man who fails to carry out the provisions of that law.

Will the gentleman yield?

Mr. FREAR. No; I have not the time. Four years ago there was filed with me as the proper officer in my State four sworn statements of gentlemen who ran for the same office, and whose expenditures aggregated \$190,000. They were trying to secure a seat at the other side of the Capitol. It was claimed at that time by candidates that the law was simply a dead letter; that men would not obey it; yet every one of the items in those statements was put down carefully, and it took many pages to show that nearly \$200,000 was spent by these four candidates, all seeking a seat in the United States Senate. Why? Because there were four candidates and three were watching the other one; every man, supposing he was going to get it, was interested in complying with the law. In other words, the law will be enforced by candidates themselves through fear of a disqualification should they fail to obey the law.

Two years later over \$100,000 was expended in trying to defeat the senior Senator from the same State. The same par-ticularity was shown in furnishing every item as required by that law, which now limits such expenditures. Why? it was known that unless they filed it accurately they were subject to the criminal laws of the State, and these laws are sup-

ported by public sentiment. If you would enforce this law, put it in proper form; disqualify a man who willfully refuses to comply with its provisions; then you are in a position to say that the law means something. You may say it is not constitu-tional to seek disqualification. But you are claiming that this is a criminal law; and if so, then men who neglect to file statements are criminals and unfitted to sit in this House. I am afraid, Mr. Speaker, that the true purpose of the law has not been carefully considered. The spirit of the law is to require publicity of election expenditures, to prevent corruption and buying of elections. We have such laws in the various States, and the sentiment in their favor is spreading throughout the country to-day. The criticism here offered is technical and does not affect the merits of the question. The men on this committee who favor a rigid corrupt-practices act and have ever been ready to recognize its growing importance are not willing to say that a man in far-off Michigan, who knew nothing about the law, whose opponent was seated by the State board, should be disqualified because, with no thought of evasion, he neglected for a few days to file his statement. We should not forget the fundamental principles of the publicity law, which are not to impose hardships upon candidates or to prevent men from becoming candidates, but rather to compel a limitation of expenses to reasonable limits and, so far as we may be able, to prevent corruption through improper expenditures, to punish willful concealment or fraud, but not unintentional oversight, as was undeniably the case with Mr. MacDonald. [Applause.]

Mr. POST. Mr. Speaker, I yield the balance of my time to the gentleman from Kansas [Mr. Murdock].

Mr. MURDOCK. Mr. Speaker, first I want to commend the committee for its fairness and for its dispatch, and particularly committee for its fairness and for its dispatch, and particularly

to commend it for dispatch because of the circumstances. William J. MacDonald, the contestant, has come to a seat in Congress with much delay and considerable difficulty, more difficulty than most of us have, and we all of us have more or less trouble in reaching here.

Mr. MacDonald first got upon the ballot. He believed him-self upon the ballot safely and securely until a very few days before the election. Then an antagonistic attorney general, or deputy attorney general, ruled that under the decision of the supreme court MacDonald's name should come off the ballot, and the election boards in various counties were warned to take his name off the baflot. In one precinct the election board did put pasters over the name of MacDonald, and did deprive him of the votes he was entitled to in that precinct. Everyone who runs for Congress knows that any unusual element of doubt such as that introduced into a campaign in the closing hours is a detriment to the man against whom it is directed.

The proposition that an attorney general made that sort of a charge and that then issued that kind of instruction was against MacDonald's chances, but the election board kept his name upon these ballots. His opponent, Mr. Young, issued a statement in which he said he did not believe that MacDonald was entitled to run, but believed the people should rule, and he Young did not believe wanted MacDonald to make the race. MacDonald could be elected. MacDonald was elected. After he was elected there was at first no dispute about his right to the seat. But a little later it was discovered that in one of the counties his name had appeared on the ballot not as William J. MacDonald but with the affix "Sheldon William J. McDonald."

The origin of that mistake everyone here knows. Therefore the certificate of election was issued, not to the man elected, MacDonald, but to Young. MacDonald appealed to the court and the court refused him relief. MacDonald, the man who did not have the certificate, and Young, the man who did have it, came before Congress in the opening days of this session. fact of the business was that at that time Congress, the judge of the qualifications of its own Members, with this data available, could have refused to seat Mr. Young and could have seated Mr. MacDonald. The House refused to do that. It seated Mr. Young. The rightfully elected Member of this House was excluded from his seat. What did he do? He did the regular He filed a contest and he pressed that contest before the Committee on Elections. What now happened? Mr. Young, who was not entitled to a seat in this House, rose before the House and vacated the seat which had been given him. That would seem to have settled this matter. The Democratic candidate did not claim the seat and the Republican candidate said he was not entitled to it. The man who had received a majority of the votes in that district, the Progressive, was asking for it. The House did not grant him the seat. He went through the ordinary course of procedure. He went before the Committee on Elections and pressed his case. Against whom? It has never been very clear in my mind who. Mr. Young was out of the contest; he was no longer contesting this seat. No one apparently

was disputing the right of Mr. MacDonald to the seat in Congress, but Mr. MacDonald, following the forms of the House, following the exact letter of the law, filed his contest for the seat and his brief; an answez was made by the attorney originally retained by Mr. Young, and full time was given for the answer. A supplemental brief was filed by Mr. MacDonald, full hearing was had, and this committee unanimously, made up of members of all three parties, decided that Mr. MacDonald was entitled to his seat. No one here doubts it, and I do not think that anyone here ought to vote against seating him. Now, I want to get to the other proposition—about the gentleman from Missouri and this publicity law. I have a crow to pick with the gentleman from Missouri. He caused me personally trouble. His law is an evolution.

The first publicity law of which I have knowledge was that which was passed and approved on June 19, 1910. Subsequent to that another publicity law was passed, that of August 11, 1911. Those two laws grew out of yet another—an earlier law. This House, in order to inform its Members, printed all three of these publicity laws in a little pamphlet, and they were sent to each Member of the former Congress. I carried one during my campaign. I filed my election expenses before the primary, after the primary, and I filed them before election and then after election. When the time for the filing of the last account approached, I found myself in the city of Chicago with a blank form prepared by the gentleman from Illinois and with the law of the gentleman from Missouri. I sat down to read it, not as a lawyer, but as a newspaper man. I tried not to find the law in it, but the sense in it.

Mr. RUCKER. Will the gentleman yield? Mr. MURDOCK. If the gentleman will permit me to complete this.

Mr. RUCKER. Just a moment. If the gentleman had been here instead of making a Chautauqua campaign, he could have amended that law.

Mr. MURDOCK. As a matter of fact, it was after election day last fall, and I was on my way to Washington from a Chautauqua lecture at the time, but there is nothing in the Constitution that prevents a man from delivering a Chautauqua lecture or trying to live on a wage under \$12,000 a year. I read the law, and the law said expressly that I must make that affidavit as regards my expenditures before a notary in my district. I was 700 miles away from home. I was on my way to Washington. I pay fare, and fare makes quite a hole in the pocket of even a Chautauqua lecturer. I wanted to be sure. I sent a telephone message to the office of the source of all technical information, the gentleman from Illinois [Mr. Mann], in Chicago. Unfortunately Mr. MANN was not there, but one of his very well-informed secretaries told me that it was necessary for me to make my affidavit before a notary in my district. I hiked for home at the rate of 2 cents a mile. I made my affidavit before a notary and came to Washington, and found what not 5 per cent of the membership of the last Congress knew, and I doubt very much whether 5 per cent of the present Congress knows

Mr. MANN. More than 5 per cent of those who were then here knew

Mr. MURDOCK. Well, I doubt whether those here knew. The House was very full when that was passed. Mr. MANN. Mr. MURDOCK. I found that the law had been further amended, so that hereafter a Member making this affidavit as to expenditure might make his affidavit before a notary in the District of Columbia, and I had my long trip for nothing. Now, I strongly hope that when the gentleman from Missouri further perfects his publicity law that he will add—

The SPEAKER. The time of the gentleman has expired. Mr. MURDOCK. Can I have time to say that I hope the gentleman from Michigan, Mr. MacDonald, will be seated?
Mr. POST. Mr. Speaker, I ask unanimous consent to ex-

tend my remarks in the RECORD.

The SPEAKER. The gentleman from Ohio [Mr. Post] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, there are several extensions which have been asked for upon this side of the House about matters that are shortly to come up, and until those are considered and allowed there will be no extension of remarks in the RECORD on matters which are passed.

The SPEAKER. Is there objection?
Mr. MANN. For the present, I object.
Mr. KELLEY of Michigan. Mr. Speaker, I had a few remarks
I wanted to make on this subject, too.
The SPEAKER. The gentleman from Michigan [Mr. Kelley]
asks unanimous consent to extend his remarks in the Record.

Mr. MANN. I shall not object to anybody on this side of the House extending their remarks.

The SPEAKER. Is there objection?

Mr. MURDOCK. Will the gentleman allow me to complete my sentence in the RECORD?

Mr. CRISP. Mr. Speaker, I ask unanimous consent to extend my remarks solely on the proposition of the campaignpublicity act. When I had the floor I could not reach it.

The SPEAKER. The gentleman from Michigan [Mr. Kelley] and the gentleman from Georgia [Mr. CRISF] ask leave to extend their remarks in the RECORD on this case. Is there objection?

Mr. UNDERWOOD. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Illinois [Mr. MANN] to open his heart and allow these gentlemen who have spoken on this proposition, or who are on the committee, to extend their remarks in the RECORD.

Mr. MANN. I would like to have my colleague, Mr. Britten, extend his remarks in the Record on a matter of great importance that is coming before the House, and to have my colleague, Mr. McKenzie, to extend his remarks on a matter of great importance shortly coming before the House, and the gentleman from Minnesota, Mr. Smith, to extend his remarks on a matter shortly coming before the House of great importance, and until those consents are granted there will be none granted to that side of the House.

Mr. UNDERWOOD. I will say to the gentleman from Illinois that I have no objection whatever to their extending their remarks in the RECORD. If the gentlemen ask it now, they may be able to obtain their consent. I think when gentlemen desire to extend their remarks in the RECORD on matters of legislation pending in Congress it is proper that they should do so.

Mr. BRITTEN. Mr. Speaker, I hope that my colleague [Mr. MANN] will withdraw his objections so far as I am concerned.

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois [Mr. MANN] objects. The question is on agreeing to the resolution.

Mr. POST. Mr. Speaker, on that question I demand the yeas

Mr. KELLEY of Michigan. Mr. Speaker-

The SPEAKER. For what purpose does the gentleman from Michigan rise?

Mr. KELLEY of Michigan. I understand there was no objection to my request?

The SPEAKER. All of these requests were put together, and the gentleman from Illinois [Mr. MANN] objected to the whole batch of them. The question now is on agreeing to the resolution.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. RUCKER. Division, Mr. Speaker.

The House proceeded to divide.

Mr. RUCKER (while the House was dividing). Mr. Speaker, withdraw the request for a division.

Mr. ADAMSON. Mr. Speaker, I object. Mr. BOOHER. I renew the request, Mr. Speaker. The SPEAKER. The gentleman from Missouri [Mr. BOOHER] renews the request for a division.

The House again divided; and there were—ayes 175, noes 6.

Mr. RUCKER. Mr. Speaker, in order that my distinguished colleague and personal friend from Missouri [Mr. Booher] may

have the chance to go on record, I demand a roll call.

The SPEAKER. The gentleman from Missouri [Mr. Rucker] demands the yeas and nays. Those in favor of taking the vote by yeas and nays will rise and stand until they are counted. [After counting.] Five gentlemen have arisen in the affirmative—not a sufficient number, and the resolution is agreed to. The gentleman from Michigan [Mr. MacDonald] will come forward and be sworn in.

### SWEARING IN A MEMBER.

Mr. MacDONALD appeared at the bar of the House and took the oath of office.

### INTERNATIONAL CONGRESS ON ALCOHOLISM.

Mr. HENRY. Mr. Speaker, I present a privileged resolution from the Committee on Rules, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the resolution. The Clerk read as follows:

House resolution 235 (H. Rept. 61).

Resolved, That upon the adoption of this order the House shall at once resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 6382) to provide for representation of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes, and the bill (8. 1620) to provide for representation of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes.

poses, the Committee on Appropriations being hereby discharged from the consideration of said bill S. 1620; that the bill shall be read and the chairman recognize Members to offer amendments to the bill S. 1620, allowable under the rule of the House, and amendments so offered shall be considered as pending. That there be one hour of general debate, or so much thereof as may be required, to be divided equally between those favoring and those opposing the said bill. That at the expiration of this time the committee shall rise and report the said bill H. R. 6382 with the recommendation that it be laid upon the table and the bill S. 1620, with the recommendation that it be considered as ordered upon said bill S. 1620 and all amendments to final passage, and the House shall proceed to vote without intervening motion upon the amendments, if any, and the bill to final passage, except one amendment to recommit, as provided by Rule XVI, paragraph 4.

Mr. MANN. Mr. Speaker. I reserve a point of order upon

Mr. MANN. Mr. Speaker, I reserve a point of order upon the resolution, unless the Clerk reported it incorrectly. It is rather long, and I really did not understand what it proposes do. Will the gentleman from Texas [Mr. Henry] tell us?
Mr. HENRY. All right. I will explain it in a few words.

Of course, we have no desire to shut off any discussion. This is in regard to a bill that has passed the Senate, I believe unanimously, in reference to appointing delegates to the alcoholic liquor conference in Milan, Italy. The Committee on Foreign Affairs has reported favorably, and by unanimous vote,

a similar bill to the House.

Mr. MANN. They have reported House bill 6382?

Mr. HENRY. Yes; and this was only to bring before the House for consideration the subject matter of the two bills in order that it may be disposed of to-day, because if it is not done it will be too late to dispose of it in two or three days from now. The resolution states the case as it is,

Mr. MANN. There is a Senate bill pending in the Committee

on Appropriations, is there not?

Mr. HENRY. There is a Senate bill pending on the Speaker's

Mr. MANN. I supposed from the reading of the resolution that the Senate bill was pending before the Committee on Appropriations.

Mr. HENRY.

The SPEAKER. The gentleman from Texas [Mr. Henry] makes a mistake about it. It is not on the Speaker's table.

Mr. HENRY. I corrected that, Mr. Speaker. Mr. MANN. I notice the resolution provides that there should be only one intervening amendment, and that was the amendment to recommit. Is that the way it reads?

The SPEAKER. The Clerk will report the resolution again.

Half of the Members could not hear it.

Mr. MANN. Of course, there should be a motion to recommit, not an amendment.

Mr. HENRY. There will be no disposition to cut off amendments. It provides for amendments.

Mr. MANN. It says "amendment to recommit." It should be "motion to recommit."

The SPEAKER. The Chair will take cognizance of that. The

question is on agreeing to the resolution.

The resolution was agreed to. The SPEAKER. The Clerk will report the bill.

The Clerk read the bill (H, R. 6382) to provide for representation of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes

The SPEAKER. This bill is on the Union Calendar. Mr. FLOOD of Virginia. The rule provides that this bill shall be laid on the table, and that the Committee on Appropriations shall be discharged from the further consideration of Senate bill 1620, and then the House automatically, under the rule, goes into the Committee of the Whole House on the state of the Union for the consideration of Senate bill 1620. That is what this rule provides.

The SPEAKER. There are two bills covered by the rule.
Mr. FLOOD of Virginia. Yes. The rule provides that the
House bill shall be laid on the table and the Senate bill be considered.

The SPEAKER. Under the rule the House will resolve itself into the Committee of the Whole House on the state of the Union, and the gentleman from Illinois [Mr. Foster] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 1620) to provide for representation of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes, with Mr. Foster in the chair.

The CHAIRMAN. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That there be appropriated, out of any money in the Treasury of the United States not otherwise appropriated, the sum of \$4.500 to defray the expenses of delegates, to be designated by the President of the United States, to the Fourteenth International Congress on Alcoholism, at Milan, Italy, September, 1913, including secretarial and stenographic work and transcription of reports.

Mr. SABATH, Mr. Chairman, may I inquire whether the Clerk has read the Senate bill or the House bill?

The CHAIRMAN. The Clerk has read the Senate bill.

Mr. SABATH. What is the desire of the gentleman in charge

Mr. FLOOD of Virginia. The desire of the Committee on Foreign Affairs is to have the Senate bill pass. It was for that reason that they requested the Committee on Rules to bring in this rule.

Mr. Chairman, bills in exactly the same verbiage were introduced in the House and Senate. The bill as it passed the Senate cut down the appropriation from \$6,850 to \$4,500 and struck out the latter part of the bill, which provided for an invitation being extended to this congress to meet here two years from now. That bill passed the Senate.

The House committee in reporting the House bill reduced the amount of the appropriation from \$6,850 to \$5,250, and the provision extending an invitation to this congress to meet in this country in 1915 was left in the bill. Now, we wanted to take up the Senate bill and pass it, so that the delay in passing the Senate may be avoided. This congress convenes on September 23, and if these delegates are to be appointed they must have time to make their arrangements to go to the congress and reach Milan, Italy, by that date, so their appointment will have to

take place very soon.

Mr. SABATH. May I inquire of the gentleman whether such delegations have been appointed by our Government to all the different congresses held on this subject?

Mr. FLOOD of Virginia. Not to all of them, Mr. Chairman.

This is the fourteenth congress. I do not know to how many congresses delegates have been appointed. Certainly they were appointed by this Government and their expenses paid to the last congress, the one held in 1911 at The Hague.

Mr. SABATH. And their expenses paid? Mr. FLOOD of Virginia. Yes.

Mr. SABATH. May I ask what the expenses were? Mr. FLOOD of Virginia. I think they were about \$5,500,

Mr. FLOOD of Virginia. I think they were about 4,5,00, though I am not absolutely certain. That was about the amount.

Mr. SABATH. Can the gentleman give any reasons why we should pay the expenses of these delegates to that congress?

Mr. FLOOD of Virginia. Yes. This congress is a great in-

stitution and is accomplishing much good.

The International Congress on Alcoholism was organized in 1885 at a meeting held at Antwerp, and is the successor of an international philanthropic congress which was organized in 1856. Thirteen congresses have been held, as follows:

Congress,	Place.	Time.	Congress.	Place.	Time.
First. Second Third Fourth Fitth Sixth. Seventh	Antwerp. Zurich Christiania. The Hague. Basel Brussels Paris.	1885 1887 1890 1893 1895 1897 1899	Eighth. Ninth. Tenth Eleventh. Twelfth. Thirteenth.	Vienna Bremen Budapest Stockholm London The Hague	1901 1903 1905 1907 1909 1911

SCOPE AND PURPOSE OF THE CONGRESS.

The scope and purpose of the congress were well set forth in the note of invitation from Her Majesty's Government requesting the participation of the United States. A translation of this note reads:

ROYAL LEGATION OF THE NETHERLANDS, Washington, April 15, 1911.

J. LOUDON.

Mr. SECRETARY OF STATE :

I have the honor to apprise your excellency that an International Congress for the Repression of Alcoholism will be held from the 11th to the 16th of September next at the Kurhaus, Scheveningen, near The Hague, in the Netherlands.

Hague, in the Netherlands.

The questions to be discussed relate to:

A. The State and alcoholism.

(1) Legislation
(2) The consumption of alcohol in the colonies.
(3) The attitude of the courts toward alcoholics, and particularly the application of restraint and conditional sentence.

(4) The furidical, political, and economic causes which make it the duy of the Governments and parliaments to repress alcoholism.

B. Society and alcoholism.
(1) Questions of organization.
(2) Indirect repression of alcoholism; that is to say, by improving the workmen's homes.

(3) The treatment of alcoholics in sanitariums, asylums, and the like.
(4) Medical problems bearing on the subject.

By order of the Queen's Government I have the honor to invite the Government of the United States to send official representatives to the congress. I venture to have recourse to your excellency's good offices to that end.

to that end.

Be pleased to accept, Mr. Secretary of State, the renewed assurance of my highest consideration.

His Excellency Mr. Ph. C. Knox. Secretary of State for the United States.

The congress is a great assemblage of scientists, publicists, jurists, statesmen, and prominent workers in the world-wide fight against the evils of alcoholism. The discussions are protected by the strictest neutrality of politics, religion, and by a free interchange of opinions concerning the methods for combating this evil.

The adherents to the moderate use of alcohol, or of the total abstinence and prohibition, as well as those advocating various forms for regulating the traffic in alcoholics, are allowed equal

rights in the congress.

The discussions embraced not only the physical conditions usually understood from the term "alcoholism," but embraced all forms of the evils, social, medical, and economic, and the various remedies for dealing with the evils, educational, legislative, and other methods.

The periodical mingling of representatives of the various governments to consider the evils of alcoholism and the progress of the many methods of dealing with them, can not fail to produce a broader vision and lead to better methods in treating

these evils.

The congress has received the sanction of the foreign governments where sessions have been held, and our Government having participated in past years by official delegations ought not to take a backward step at this time by failing to appoint dele-

gates to the congress at Milan.

Participation in these congresses does not bind the governments represented or the individuals to any form or system of control which may be advocated, but tend only to the dissemination of knowledge concerning the various methods which have The facts brought out are given publicity so that they are obtainable by all who desire them, and even those connected with the liquor trade can profit by them, and if desired can take what they claim to be the fallacious arguments or theories and adopt them or prove the truth concerning them, especially so because of the class of men who largely compose the congress, especially from foreign countries.

Unquestionably these international gatherings tend to promote a fraternal spirit among the various peoples, and the commingling in conference for the general good help to bring about

the desired universal peace.

Congress has heretofore made appropriation paying the expenses of these delegates, and it should do so again. also made appropriations for paying the expenses of delegates to other international congresses, such as the International Conference on Maritime Law, which meets in Belgium this year.

The questions discussed at these conferences are the various methods for regulating and controlling the manufacture and sale of intoxicating liquors, the general welfare of society and the preservation of its manhood, the happiness of women and children, the prosperity of commerce, the preservation of wealth, the strengthening of law and order, and every man, regardless of his position on the question of prohibition, should favor this conference, and I hope the vote on this bill will be unanimous. [Applause.]

Mr. SABATH. Will the gentleman yield for another question? Mr. FLOOD of Virginia. Yes.

Mr. SABATH. Do I understand that people of all views are represented in this congress?

Mr. FLOOD of Virginia. That is my understanding, and the reports of the discussions show that such is the case.

Mr. SABATH. I was informed a few days ago that at one time a certain delegation appointed by the President was re-fused the opportunity to participate in the deliberations of this congress because some of those delegates had pronounced views against prohibition. Does the gentleman know whether that is true or not?

Mr. FLOOD of Virginia. Does the gentleman mean that they were refused participation?

Mr. SABATH. They were refused admission and participation in the congress.

Mr. FLOOD of Virginia. What congress was that? Mr. SABATH. I do not know; I only ask for information

whether that is true or not.

Mr. FLOOD of Virginia. I never heard of it, and do not think it can be true, for the reason that if you read the reports you will find that there are delegates in the congress who represent every shade of opinion in this world-wide movement to control the sale and use of alcohol.

Mr. SABATH. I admit that I have not read all the reports

of the conventions.

Mr. GALLAGHER. Will the gentleman yield?

Mr. FLOOD of Virginia. Certainly.

Mr. GALLAGHER. Are the reports of the proceedings of

these conventions printed by the Government?

Mr. FLOOD of Virginia. No; not a complete stenographic report; but there is a report made by the delegates of this Government to the Secretary of State, and the President transmits them to Congress, and that report is printed.

Mr. GALLAGHER. The proceedings of the convention are not printed?

Mr. FLOOD of Virginia. Not by our Government.

Mr. CONRY. Will the gentleman yield?

Mr. FLOOD of Virginia. Certainly.

Mr. CONRY. Why is it that the proceedings of the convention are not printed?

Mr. FLOOD of Virginia. They are printed; but I meant, in answer to the gentleman from Illinois, to say that they are not printed at the expense of our Government. They are printed by the congress, and in several languages.

What is the use of sending delegates at the expense of this Government to a convention for deliberations if the proceedings are not printed and circulated by the Government for the benefit of the congress and the people of the

United States?

Mr. FLOOD of Virginia. A report of the deliberations is printed by the congress. A very full and complete report is made by our delegates to this Government, and if you will take the trouble to read the report you will see that it is very valuable.

Mr. CONRY. As I understand it, the actual business or transactions of the convention are not published, but what is published is the report by the representatives of this Govern-

ment. Is that the situation?

Mr. FLOOD of Virginia. That is the situation, so far as our Government is concerned, but the congress itself prints a full report of its proceedings.

Mr. COX. Will the gentleman yield? Mr. FLOOD of Virginia. Yes.

How many delegates are usually appointed? Mr. FLOOD of Virginia. The Secretary of State intends to appoint as many as he can with this appropriation of \$4,500. Probably there would be not over nine.

Mr. COX. How much would it cost each delegate? Mr. FLOOD of Virginia. I should say not under \$500.

Mr. COX. Are the delegates required to make an itemized report of the individual expenses to the Secretary of State?

Mr. FLOOD of Virginia. Yes; the expenses are paid for on vouchers

Mr. COX. And they are filed with the Secretary of State?

Mr. FLOOD of Virginia. Yes. Mr. TOWNER. Mr. Chairman, I think gentlemen have a wrong idea if they believe that there will be no report of the convention published by this Government. That is not what was meant by the chairman of the committee. The report of the commissioner is a report of the transactions of the society, It is not the official report and not the full stenographic report, but it consists of a report of the transactions by our delegates of the particular things that they deem will be of importance or interest to the American people, so that there is a report, and it is in fact a report of the proceedings of the convention.

Mr. FLOOD of Virginia. The gentleman is correct. What I meant was that there was not a full stenographic report of all the proceedings printed by the Government. There is a report made to the Secretary of State by our delegates.

Mr. GALLAGHER. I would like to ask the gentleman from

Virginia if he has any opinion to give the House about how many delegates would go if their expenses were not paid?

Mr. FLOOD of Virginia. I think the gentlemen who would be named would be men of small financial ability, and I do not think we could get a full representation if their expenses were not paid, and that is one reason why I am in favor of paying the expenses.

Mr. GALLAGHER. And that is one reason why I am opposed to paying the expenses.

Mr. COX. How many of these conventions have been held in

this country?

Mr. FLOOD of Virginia. There has been no meeting in this There was a suggestion that the congress be invited to meet here in 1915, and a provision for that was incorporated in the bill; but some objection was raised to it and it was stricken out in the Senate.

Mr. COX. And the Senate bill carries no such provision?

Mr. FLOOD of Virginia. No.
Mr. COX. And it is not the gentleman's intention to offer an amendment?

Mr. FLOOD of Virginia. No. I want the Senate bill passed without a change so that it will not have to go back to the Senate.

Mr. BARKLEY. Would not the congress meet here without an invitation?

Mr. FLOOD of Virginia. The congress would hardly meet in this country unless an invitation was extended by the Government.

Mr. BARKLEY. Does the gentleman mean that the invita-

tion would have to come through Congress?

Mr. FLOOD of Virginia. It would have to come through Congress, because Congress would have to make financial provision for it, and then it has to come through Congress anyhow. Mr. KELLY of Pennsylvania. Mr. Speaker, will the gentle-

Mr. FLOOD of Virginia. I will.
Mr. KELLY of Pennsylvania. Mr. Chairman, this measure is one of great importance to the Nation, far greater than perhaps appears on the surface. It means that the National Government takes cognizance of the fact that alcoholism is an evil of most serious kind and is sending a delegation representing the United States to a congress organized for the purpose of dealing with the evil. It means that the Government established to promote the welfare of the people recognizes the evil of alcoholism, which is so fruitful a cause of disease and degeneracy, pauperism, and crime.

Science has recognized that fact for years, and at the recent International Congress of Medicine, held in London, a large part of the time was occupied with discussions of alcoholism

and the best methods of coping with it.

Many of the liquor dealers of this country deplore alcoholism, and declare that it is an unqualified evil. In the current number of Bonforts Wine and Spirit Circular, an official organ of the liquor trade, is an article which is proof of that fact. writer is T. M. Gilmore, president of the National Model License League of this country. He goes so far as to condemn the treating habit, and recommends the substitution of cafés for saloons in his desire to prevent the evil of alcoholism, which he recognizes as a menace even to the liquor business.

Alcoholism is a disease which degenerates body and mind. It must be treated as a disease both from the standpoint of prevention and cure. That being true, it follows that it can only be treated successfully by being fairly faced and fully

The disease must be studied and understood, and the only way to do that is to secure the united results of the investigations made by scientists and others. That is the whole purpose of this Congress against alcoholism which is to be held next month in Milan, Italy. The invitation sent to this Nation states that the questions to be discussed relate to the State and alcoholism and society and alcoholism, and these two topics cover all aspects of the question.

The great European nations are to be represented by those who have made a special study of alcoholism, and the discussions will be the last word of science and medicine and statesmanship on this disease so dangerous to the individual and the

Nation.

It surely can not be justly said that the appropriation carried in this bill should prevent its passage. The Government spends vast sums every year to study diseases among animals and trees and plants. It is a justifiable expense, but how much more justifiable it is to expend money to deal with one of the greatest evils and most insidious diseases that inflicts mankind, one that not only injures this generation of American citizens but robs future generations of their heritage of being well born.

No more businesslike use of the public funds could be made than to study the evils of alcoholism so that they may be dealt with sanely and effectively. It is always considered good business to spend one dollar to thereby save two, and in this case

the amount to be saved is incalculable.

I sincerely hope that this measure will be passed. [Applause.] Mr. MANN. A parliamentary inquiry, Mr. Chairman. The CHAIRMAN. The gentleman will state it.

Mr. MANN. Was there a division of time?

The CHAIRMAN. There was a division of time, one-half in favor of the bill and one-half against it.

Mr. MANN. Yes; but how does the gentleman from Virginia [Mr. Flood] control the time?

Mr. FLOOD of Virginia. I assume that I control one-half of the time in favor of the bill.

The CHAIRMAN. The Chair takes it that the gentleman from Virginia [Mr. Flood] would control 30 minutes and some one opposed to the bill would control the other 30 minutes.

Mr. FLOOD of Virginia. How much time have I consumed? The CHAIRMAN. The gentleman from Virginia has consumed 13 minutes.

Mr. FLOOD of Virginia. I yield 10 minutes to the gentleman

from Alabama [Mr. Hobson].

Mr. HOBSON. Mr. Chairman, the amount called for in the bill is small. Its purposes to cooperate in an international movement to coordinate the agencies of all nations in the fight against alcoholism are meritorious.

Information is the great need of the peoples of the world on this vital question. • Each such congress as this one advances that much further the information of the world. Two fundamental facts have already been established that place this question in the front of all the great problems of the world justly demanding the cooperation of all nations in seeking the solution. The first great fact is that alcohol is not a natural substance, but that every drop of it has come out of the body of a germ, the ferment germ, and when fermentation is going on germs are carrying on their life processes, devouring the glucose or sugary substance as their food and throwing off alcohol as their excretions, their toxin. Alcohol is thus a toxic poison, and, like the toxin of the diphtheria bacillus, is a poison to all protopiasm, all living tissue. There is a second great fact now established. Take the formula for belladonna, the formula for morphia, the formula for strychnine, and the formula for alcohol. They are all low oxide derivatives of hydrocarbons, and all partake of this characteristic, that each one has an affinity for certain particular tissue. For instance, strychnine has an affinity for the spinal cord, causing death by convulsions or spasms.

They have discovered and established beyond peradventure that alcohol has an affinity for the cells in the line of any creature's evolution, no matter what that line is. Every type and every species is developing or evolving along some particular line. You take a flower that is developing along the line of color and mix alcohol in the water with which you water it and this color will fade. You bring up a dog as an alcoholic and by the time he is grown he will howl like a wolf. You put him back about 6,000 years. Take an Indian and let the fire water come down regularly and you will put him on the warpath; and you will turn a black man into a cannibal. A highly civilized man is put down toward the semicivilized and even to the

level of the semisavage and the brute.

Now, whenever this reversion of the evolutionary process of nature sets in, when degeneracy sets in, nature proceeds to exterminate, and she adopts two methods which are very plain and simple. The first is to shorten the life of the individual, and the second is to blight the offspring of that individual. The amount of the shortening of life has now been practically established from the records of the great life insurance companies.

I will not undertake to go into detail, because I have not the time. But take, for instance, a young man at the age of 20, and if he lives the life of a total abstainer, he will live to the average age of 651 years. Some over and some under, but that is the average. If he is on the books of the insurance companies as a moderate drinker, he will die at the age of 51. The shortening of life due to the degeneracy from that much drinking will be 14 years on the average. If at the age of 20 he is a heavy drinker and remains such, he will die at the average age of 35. He has only 15 years to live. It will take 30 years out of his

Now for the second method by which nature exterminates. Nature is not going to have the earth inherited by degeneracy. Its tendency is to produce higher forms, and when parents degenerate themselves, nature blights their offspring. take a fruit tree-a young tree would be better and more scientific. It is bearing; mix alcohol with water and water that tree with the liquid and it will go to seed; the fruit will fall untimely

You can take a pair of domestic animals, a pair of puppies, for instance, and give them a little ration of alcohol every day in their food-not enough to get them drunk, but just a little ration in their food-and when they are grown and you mate them there will be a phenomena never heard of before. mother will have ills and sufferings and miscarriages, and sometimes she dies in birth pangs. Then if a record is kept of the offspring, many will be born dead, many deformed; only 17 per cent will be normal. Five out of every six of the offspring will be abnormal.

Now, if you bring up another couple beside the first free from alcohol and mate them when grown, the mother will have no troubles and you will find that 9 out of 10 of their offspring will be normal. Nine out of 10 in one case and only 1 out of 6 in the other case.

Investigations along this line have been made abroad, and I remember Dr. Foitinien, of Denmark, two years ago at the congress against alcoholism stated that he had examined 20,000 children, of 6,000 families. This investigation showed the same proportion for the human family. If both parents are total abstainers, there will be no danger in maternity and 9 out of 10 offspring will be absolutely normal; but if both parents are simply moderate drinkers it will double the number of children who will die in the first year of infancy.
Dr. Demme, of Berne, Switzerland, states that up to the age

of 5 five times as many children will die born of drinking

parents as those born of abstaining parents. Infant mortality in the civilized nations is appalling, and is chiefly due to the fact that these infants have been wounded at the hands of their own parents before they were born, and the parents did not know it.

The great question is this: The world does not realize that alcohol is the specific cause of degeneracy. Consequently the people of the United States are consuming this substance now alcoholic beverage-at the rate of 25 gallons per capita for every man, woman, and child. The result is that we are dying off at the rate of 1,000 deaths for 61,000 of our people, when the rate ought to be only 560 deaths for 61,000. If we were total abstainers there would be only 560 deaths instead of 1,000 in every 61,000. Four hundred and forty out of every 61,000 of our people come to an untimely death every year because of the fact of alcohol in our midst. That makes 700,000 a year.

When anyone begins to look into the importance of investigating thoroughly this great question he is appalled by the proposition that thus far scientific information practically demonstrates that alcohol kills 700,000 American citizens every The fact is, all the battles ever recorded in history, all the battles of which there is any authentic report, count only 2.100,000 wounded and 700,000 killed.

You can say that alcohol kills more Americans in one year than all the wars of the world have killed on the field of battle in 2,300 years.

It is vain for Members to intimate that the Government has no interest in this Congress. Its interest is as vital as are the lives of its citizens. The consumption of this beverage increases always in proportion to the density of population, so that when you get to the great cities degeneracy becomes terrific. And when a nation comes to rest upon its great cities for its vitality abnormals multiply, the degenerate vote ere long swamps the electorate and liberty perishes. The Nation's free institutions depend on the solution of this problem for their When a nation falls into degeneracy it is only a question of time when that nation is struck, and when struck it falls. The Nation's very life will ultimately be at stake in the solution of this problem.

Now, take any plant or animal and put it in a fair environ-ment, and it will continue evermore. You can produce a thoroughbred race of horses by breeding and evolution, but in all these thousands of years, with all our favored environment, we have never produced a thoroughbred race of men. You can come to the conclusion of history that a great nation is only born to die; and recent investigations go to show that in those nations that have succumbed degeneracy set in when the nation took largely to city life. No subject is more worthy of investigation; neither the trifling expense nor any other trifling objection should prevent our Government from participating appropriately in this congress. [Applause.]

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. FLOOD of Virginia. Mr. Speaker, I yield three minutes to the gentleman from New Hampshire [Mr. Reed].

Mr. REED. Mr. Chairman, I have only a word to say in relation to this resolution. I am not going to speak upon "affinities" in relation to the main question, inasmuch as I have always understood that "affinities," considered from any standpoint, whether that of science or not, is a dangerous proposition to deal with. [Laughter.]

I am reminded, however, of the fact that there can not be, in the opinion of some people on the floor of this House, any in-

consistency in the consideration of this bill.

Since I have been a Member of this House a few brief months I have heard discussions on the floor of this Chamber in rela-tion to the consideration of appropriations made to defray the expenses of a committee to visit the home of a departed Mem-ber of this body to attend the last sad rites, and objection made to that appropriation on the ground that it encouraged junketing.

It has been stated that this appropriation is for the purpose of defraying the expenses of business and philanthropic people in attending a convention held upon the other side of this globe, and it occurs to me that if this is a group of philanthropists, the least we could expect of them is that they should attend this convention at their own expense. I believe we have a right to expect that.

If we entertain the idea of paying the expenses of committees to attend these various conventions, have not the good-roads convention, the chambers of commerce and board of trade conventions, the river and harbor conventions, the religious conventions, and all of the hundred and one other conventions held each month of every year an equal right to come to Congress and ask that the expenses of attending their convention be defrayed?

As to the main question whether the traffic in liquor should be permitted, I have no desire to make comment at this time.

The question is simply whether it is inconsistent for us to pay the expenses of these delegates to attend this convention and then bicker about the expenses of other delegates who attend other conventions. [Applause.]

Mr. TOWNER. Will the gentleman yield me a couple of minutes?

Mr. FLOOD of Virginia. I have only four minutes left, and will yield the gentleman two minutes of it.

Mr. TOWNER. That is all the time I desire. I only want to say, in response to the suggestion of the gentleman with regard to paying the expenses of delegates, that I think the gentleman misapprehends the character of this convention. It is not made up merely of those who like to go, or merely of those who take an interest in it. It is made up largely of the experts and scientists, of men who can not attend the convention unless their expenses are paid, of men who represent the colleges and universities of the country. At this convention they will meet the delegates from other countries, whose expenses of a like character are paid.

This is not primarily a convention of delegates for the purpose of discussing the general features of this subject, but it is a convention made up largely of experts, who discuss the sub-ject from a scientific point of view. For that reason it is necessary, if this country is to be represented as other countries are, that we should provide for the expenses of the delegates who

attend it. [Applause.]
Mr. SABATH. Mr. Chairman, a few days ago I received a communication from a national organization protesting against passage of the bill now under consideration. Being satisfied that the reasons given in the communication why the bill should not pass are stated in much stronger and clearer terms than I possibly could state them, I desire that the communication be read by the clerk in my time.

The CHAIRMAN. If there be no objection, the communication will be read in the time of the gentleman from Illinois.

The Clerk read as follows:

NATIONAL LIQUOR LEAGUE OF THE UNITED STATES, OFFICE OF GENERAL SECRETARY, Chicago, August 18, 1913.

Office of General Secretary,
Chicago, August 18, 1913.

Hon. Adolph J. Sarath, Washington, D. C.
Dear Sie: On behalf of a vast army of the American people, which embraces the manufacturers, dealers in, and users of alcoholic liquors, I protest against the passage of Senate bill 1620 and House bill 6382, appropriating money to pay the expenses of American representatives to the international Congress on Alcoholism, at Milan, Italy.

Senate bill 1620 originally provided for an appropriation of \$6,850 to pay the expenses of 10 delegates to the Fourteenth International Congress on Alcoholism and to authorize the President of the United States to extend an invitation to the congress to meet in this country in 1915. The Senate, in its wisdom, cut down the appropriation from \$6.850 to \$4,500, the same as two years ago, and struck out the clause referring to the meeting in this country in 1915. This bill is now before the Appropriation Committee of the House.

The prohibition men and women who are at the back of this movement are not satisfied with the bill as amended, and have prevailed upon Congressman Flood, of Virginia, to introduce H. R. 6382, which is identical with the Senate bill before amended, and the same is now before the Committee on Foreign Affairs, of which Mr. Flood is the chairman.

We are opposed to the passage of either bill, not because the liquor question is unworthy of being discussed from every point of view, but because the people behind this movement, and who in the past have been able to dictate who the representatives from the United States should be, are bigoted, one-sided enthuisats on this subject, and represent prohibition organizations solely, whose main object is not to improve or regulate in any way, but with one fell blow to destroy the liquor industries of this country.

These men and women have never as yet suggested any remedy for the liquor evil, if any, or in what way the Government could reimburstisely for the loss of revenue that would be incurred by total prohibition, a revenu

Another reason: If the President is authorized to invite this congress to meet here in 1915, you will be requested to make another appropriation to entertain 1,500 delegates as the guests of the United States, which, as you can easily imagine, will run up into the thousands. Think

of that.

For these most substantial reasons, we ask you to use your best efforts to prevent this most unnecessary appropriation.

Respectfully,

ROBT. J. HALLE,

ROBT. J. HALLE, Secretary National Liquor League of America.

Mr. SABATH. Mr. Chairman, in view of the fact that the chairman of the committee reporting this bill has agreed to the Senate bill, which eliminates the two objectionable features of the House bill, and in view of the fact that I have the utmost confidence in the fairness of our President and Secretary of State that they will appoint fair and reasonable men as delegates to this convention, I personally withdraw any objection I might have had against the bill, knowing that the National Liquor League and other similar organizations do not object to fair consideration of this important question.

Mr. BRYAN. Will the gentleman yield for a question?

Mr. SABATH. I will yield.

Mr. BRYAN. I would like to ask the gentleman if he does not consider the statement about the American people being unable to resist the attacks of Japan or any other country without we have this revenue from the liquor business is an insult

to the American Congress and the American people?

Mr. SABATH. I do not so consider it, because they take this view that the Government, which derives a large share of its revenue from a tax on beer and whisky, the manufacture and sale of which is recognized as legitimate business, which tax amounts, I believe, to over \$300,000,000 a year. And they have a right to believe that if the Government was deprived of that revenue it would be impossible for Congress to appropriate these large amounts for our Navy and our Army. That is their view.

Mr. BRYAN. Does not the gentleman think the statement is

an infamous lie that we can not protect ourselves without the income from the liquor traffic in this country?

Mr. SABATH. I would not say it is an infamous lie, sir. On the contrary, it is true. The Government has derived this large revenue for a great many years, and I suppose it will continue to derive great revenue from this traffic for many more years and until the gentleman will devise a new method of taxation.

Mr. BRYAN. The gentleman and I look at the matter dif-

ferently.

Mr. SABATH. As the Government does derive this revenue and uses it, it does naturally aid and benefit our Navy and to a large extent pays the expenses of our Army and the general expenditures of our Government, and this no one can honestly denv

Mr. HOBSON. Will the gentleman yield?

Mr. SABATH. With pleasure. Mr. HOBSON. Let me put that in another form, a little more scientific. I have made a scientific investigation and a mathematical investigation of how the balance would stand from the question of revenue to the Nation, and I will say to the gentleman, without going into detail-

Mr. SABATH. Where does the gentleman get his figures and

data?

Mr. HOBSON. From the reports of just such congresses as this, and the reports of the French Government and other Governments

Mr. SABATH. The gentleman from Alabama has more confidence in the experts than I have. I have found in my experience that you can get experts to testify to most anything in any branch of the scientific field.

Mr. HOBSON. I am not responsible for the kind of experts

that the gentleman from Illinois usually employs. Mr. SABATH. I do not employ any experts.

I want to tell the gentleman the result of the investigation without going into details. It amounts to the vast total of \$16,000,000,000 a year, the economic loss to the Nation from the use of alcohol.

Mr. SABATH. The gentleman was to ask me a question.

Mr. HOBSON. I want to ask one more question. Suppose we should lose the revenue of \$330,000,000 and suppose we increased the wealth of the Nation \$16,000,000,000, would not it be easier to raise the revenue necessary for war and any other purpose-something in the nature of Gladstone's reply when the brewers waited on him and asked him to support them, because of the revenue derived from their business, and he said, "Give me a sober people who do not dissipate their substance in strong drink, and I will find easy means to raise the revenues needed for the expenses of the Government." [Applause.]
Mr. SABATH. Oh, Mr. Chairman, I was willing to yield to

the gentleman for a question, but I did not yield for an oration. The gentleman is as right in his views on this question as he is that the Government would derive out of the elimination of

alcohol the immense amount of \$16,000,000,000.

Mr. HOBSON. Now, my other question— Mr. SABATH. I wish I had a little more time, I would gladly yield to the gentleman from Alabama, but I have promised to yield some of the time to my colleague from Illinois, and I do not wish to deprive myself of the pleasure of yielding to him. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 19 minutes remaining. Mr. HOBSON. I wanted to ask one more question.
Mr. SABATH. I will yield for another question, but let it be

Mr. MANN. Mr. Chairman, I ask for order, as no one on this side has been able to get the eye of my colleague.

Mr. STEENERSON. I want the gentleman to yield to me for a question.

Mr. SABATH. I can not resist the gentleman from Alabama-

Mr. STEENERSON. I do not want the gentleman to resist;

want him to yield to me. [Laughter.] Mr. SABATH. I will yield to the gentleman from Alabama for one more question; then I will yield to the gentleman from Minnesota.

Mr. HOBSON. I will say to my kind friend from Illinois that I have not been amongst those who have been bitter on this question. My interest has been scientific and disinterested.

Mr. SABATH. Again, that is not a question. [Laughter.] Mr. HOBSON. Now, I am coming to the question. I ha Now, I am coming to the question. I have been associated with many of the men spoken of in the letter which the gentleman has had read from the desk, as being big-They are the most devoted patriots in the country. want to ask one question of my friend, whether the National Liquor League of America, since it opposes the congress against alcoholism, advocates alcoholism?

Mr. SABATH. I really do not know what they advocate. I am not a member of that organization. But I do know that they stand for what they believe is right and just. I received this communication and I have had it read in my time, wishing the House to have the benefit of the entire communication.

Now, I will yield to the gentleman from Minnesota.

Mr. STEENERSON. Mr. Chairman, I would like to ask the gentleman from Illinois a question, in view of his statement that the President of the United States will appoint fair and impartial delegates, and in that idea I concur. The question is this: The only official information I can find is the report of the Committee on Foreign Affairs, and it says that this is a congress against alcoholism, whereas the bill as passed by the Senate appropriated money for a convention on alcoholism. Now you could not very well appoint a fair and impartial delegation to the convention reported by the committee because—

Mr. SABATH. But frequently you will find people who are opposed to alcoholism who are fair. [Applause.]
Mr. STEENERSON. That is very true.

Mr. SABATH. You do not find many of them, but here and there you find some.

Mr. STEENERSON. I want to know which convention we are appropriating for, whether for that referred to by the committee or the one mentioned in the bill. Which is correct? Is it a convention against alcoholism, as stated by the committee, or a convention on alcoholism, as stated in the bill? It is important to know before we vote.

Mr. SABATH. I wish to state to the gentleman I did not see the report of the committee and I did take it for granted that the bill as introduced and passed by the Senate was properly drafted and that it means to do what it states.

Mr. STEENERSON. I wish to say that Senate Document 44 contains the official report of last year's congress and it says:

The present series, however, was begun with that held in Antwerp in 1885, and began as an "International Congress against the Abuse of Alcoholic Liquors." In 1895, the name was changed to the "International Congress against Alcoholism," which name it still retains.

I am afraid this bill as drawn appropriates money for a convention not in existence and there will be trouble for the delegates in getting their pay.

Mr. TOWNER. Mr. Speaker—

The CHAIRMAN. Does the gentleman yield?

Mr. SABATH. I yield to the gentleman.
Mr. TOWNER. I think there ought to be no misapprehension regarding the matter and in answer to the suggestion just

Mr. SABATH. Does the gentleman desire to ask a question? Mr. TOWNER. I desire to answer the suggestion made here just in a sentence. There ought to be no difficulty whatever with regard to the question about alcoholism, for this reason-

Mr. SABATH. Now, I did yield for a question but not for a speech. The gentleman had two minutes, and I presume that is all the time to which he was entitled on his proposition. Now I yield five minutes to my colleague from Illinois [Mr. GALLAGHER].

Mr. GALLAGHER. I do not know that I shall want over two or three minutes. Mr. Chairman, I am not opposed to the holding of this convention. The delegates who want to go there, so far as I am concerned, can go, but I am opposed to the

Government paying their expenses. The Democratic Party started out with a great cry of economy, laying off a number of employees of the Government for the purpose of reducing expenses, and now you are called upon to spend \$6,000 or \$7,000 to provide a junket at the expense of the Government for certain interested people who want to attend an international congress ostensibly to study alcoholism, but in reality to condemn liquor. I do not know whether they are going to discover anything new upon the liquor question, but if there is anybody interested in the liquor question, particularly in prohibition, a perusal of the lecture entitled the "Great Destroyer" might prove of interest to them. I think that will furnish all the necessary information relating to the effect of alcoholism. But a short time ago there was a resolution introduced in this House providing as follows:

That the President be, and he is hereby, authorized to accept an invitation extended by the British Government to the Government of the United States to participate by delegates in an international congress of medicine, to be held in London, without any expense to our Government.

That congress was held, and some of the greatest medical authorities in the world attended that convention at their own expense. The passage of this resolution was objected to upon the floor of this House, and at that time the Committee on Rules did not bring in a rule or make any provision for its consideration, and still it was one of the most important conventions that could possibly be called together, as its object was an investigation and discussion of all the diseases that human flesh is heir to. Notwithstanding the importance of this convention this Congress did not see fit to intrust the President with the power to select delegates, even though it involved no expense to the Government. I do not believe it is fair to come in here with a resolution providing that we pay the expenses of delegates to go to Italy and talk over temperance matters or alcoholism when we refused to give consideration to the resolution which I have mentioned. I am opposed to this Government paying any money to defray the expenses of these delegates which you propose to have the President appoint under this resolution.

Mr. FLOOD of Virginia. Mr. Speaker, I yield one minute to the gentleman from Michigan [Mr. Cramton].

Mr. CRAMTON. Mr. Chairman, I had supposed that the time had gone by when anyone would come in the Congress and deny that the alcoholic liquor traffic was destructive to the best interests of our Government. Mr. Gilmore, president of the National Model License League of this country, in a communication to Dr. Lyman Abbott, admitted that, in his language, it was "the most prolific cause of crime, disease, and poverty" with which we are contending. And now that this traffic has so extended in this country that we derive in revenue from it \$200,000,000 a year, with which to support our Government, can not we afford, out of this \$200,000,000 of revenue-blood money-that we get from the traffic, to spend \$6,000 for consideration of means for its suppression for the good of our [Applause.]

Mr. FLOOD of Virginia. Mr. Chairman, does the gentleman from Illinois [Mr. Sabath] wish to consume any more time?

Mr. SABATH. No.

Mr. MANN. Mr. Chairman, a parliamentary inquiry. Amendments are in order, I believe?

The CHAIRMAN. Amendments are in order.
Mr. MANN. I move to strike out the last word. I would like to make an inquiry of the gentleman. Has there been any estimate made as to the probable cost to the Government if the fifteenth biennial meeting of this congress be held in the United States?

Mr. FLOOD of Virginia. I did not hear the gentleman. Mr. MANN. The resolution reported by the gentleman pro-

vides that delegates from this country shall invite this congress to have its next meeting, which is the fifteenth biennial meeting, in the United States.

Mr. FLOOD of Virginia. That was in the bill as reported from the Committee on Foreign Affairs, but is not in the Senate bill which we are now considering, and which, under the rule, has been substituted for the House bill.

Mr. MANN. Well, I think it was read from the Clerk's desk. Mr. FLOOD of Virginia. It was read as a part of the House

Mr. MANN. The gentleman stated they read the Senate bill. I heard it read, and evidently it was the House bill instead of

Mr. FLOOD of Virginia. I will say to the gentleman from Illinois [Mr. Mann] that the House bill was read in the House, and when we went into the Committee of the Whole the Senate bill was read. The provision is not in the Senate bill that we are now considering.

Mr. MANN. Is it intended, then, that there shall be no invitation extended?

Mr. FLOOD of Virginia. I do not know about that. All I can say is that this bill does not provide for any invitation.

Mr. MANN. What would it cost if such an invitation were extended and accepted?

Mr. FLOOD of Virginia. I have not made any inquiry as to that, and therefore I can not answer the question.

Mr. MANN. The gentleman reported the bill providing for

that?

Mr. FLOOD of Virginia. My colleague, Mr. Sharp, of Ohio, and who is sick now, reported the bill. I did not expect to have charge of the bill here, and since I have taken charge of it I have not expected to ask the House to pass that part of the bill. It would probably take an appropriation of something like \$50,000.

Mr. MANN. How many delegates are there who would at-

tend this congress?

Mr. FLOOD of Virginia. Does the gentleman mean from this

Mr. MANN. No; I mean from all of them. Mr. FLOOD of Virginia. I do not know. All the European countries will be represented.

Mr. KELLY of Pennsylvania. There were 1,200 delegates at the last congress.

Mr. FLOOD of Virginia. The report states there were 1,200 at the last meeting of the congress. But we sent only a small number. I do not think we will send over nine this time.

Mr. MANN. If 1,200 delegates were to come over here, it

would be quite a handsome sum.

Mr. SABATH. But that part of the resolution has been eliminated, I desire to state to my colleague from Illinois. The chairman has made the statement that he will only request that the Senate bill pass and not the House bill.

Mr. MANN. But I am not sure it ought to be eliminated,

will say to my colleague.

Mr. SABATH. Well, I did not know. Mr. MANN. The bill is before the House, and there is a request in the House bill that the President direct an invitation be extended to this congress to meet in the United States next year, or two years from now, or whenever it meets. Why should it not be made here in the Senate bill? The House committee reported it in, recommending that the bill be passed; and without the report of any committee at all, without any consideration by the House or by a committee, it is now proposing to pass a bill which eliminates a provision requiring an invitation to be extended in behalf of the United States, with no reason given for leaving it out.

Mr. SABATH. I beg the gentleman's pardon. The chairman did state and gave the reasons why he desired the Senate bill

Mr. MANN. Yes; but he did not give any reason that I heard for leaving this provision out. The reason he wants the bill to pass is because time is the essence at present, I believe?

Mr. FLOOD of Virginia. Yes; and I further said there was an objection from a number of sources to that provision of the bill, and for that reason the Committee on Foreign Affairs decided not to ask the passage of their own bill, but of the Senate bill.

Mr. MANN. Does not the gentleman think that the House

is entitled to information as to who objected to the provision?

Mr. FLOOD of Virginia. The letter the gentleman from Illinois had read, and those who believe with the writer were some of the objectors.

Mr. MANN. And therefore the gentleman yielded-

Mr. FLOOD of Virginia. Yes; and we yielded for a common-sense reason. We yielded because we want to get this appropriation through without delay for reasons I have stated.

Mr. MANN. You brought in the rule under which to pass it. Does the gentleman mean to say that a two-thirds Democratic vote of this House could not pass the rule providing for the consideration of a measure because they should have to ask the liquor dealers' association whether or not it was in order?

Mr. FLOOD of Virginia. I did not mean to say that and I have not said it. What I wanted to say was that we wanted to get this bill through as soon as possible. The gentleman can not put me in a position of taking orders from a liquor dealers' organization, nor can he put the Democratic Party in any such position as that. I do not think the thrust was exactly fair.

Mr. MANN. I am more courteous to the gentleman than he is

to me. That is all right.

Mr. FLOOD of Virginia. I am not going to make any objection to any statement from the gentleman except the statement that he has made that we are subservient to the liquor interests.

Mr. MANN, The statement is true as far as I made it.

Mr. FLOOD of Virginia. Well, if the gentleman said it and meant it, it is not true. It is absolutely untrue. The reason was perfectly plain. The gentleman knew the reason why we substituted the Senate bill for the House bill. The Senate bill has gone through the Senate, and if we amend it here it will have to go back to the Senate, and the delay on that account will be so great that these gentlemen may not have time to get their appointments and make their arrangements and reach Milan by the 23d of September. That is the reason why we ask to do this. It is a small appropriation for this great cause, a cause that is backed up by thousands and thousands of men and women all over this country. We are asking for a small appropriation to have these delegates sent from this country to a congress in reference to a question affecting the entire country and the entire world.

Mr. KAHN. Mr. Chairman, will the gentleman yield?
The CHAIRMAN. Does the gentleman from Virginia yield to
the gentleman from California?

Mr. FLOOD of Virginia. Yes.

Mr. KAHN. The gentleman also reported a resolution to accept the invitation of the International Medical Congress at London, did he not?

Mr. FLOOD of Virginia. Yes.

Mr. KAHN. Did you provide for any appropriation in that

resolution at all?

Mr. FLOOD of Virginia. No; because we knew that the doctors all have plenty of money. But these men who are devoting their time and means to the uplift of humanity in this country have not the money to pay their expenses in taking these trips abroad.

I move that the committee rise and favorably report the bill

to the House.

The CHAIRMAN. If there are no amendments, the committee will rise.

Mr. MANN. Mr. Chairman, I have an amendment pending, I believe.

The CHAIRMAN. The gentleman can strike out the last word.

Mr. HOBSON. Mr. Chairman, will the gentleman yield for

a question? Mr. MANN. Yes, certainly; if the gentleman will ask the

question. Mr. HOBSON. I will ask the gentleman if the original House

provision in the present bill does not imply that the delegation may invite the convention to meet in this country?

Mr. MANN. It provides that they may not by direction of the President, because the President would have no authority to empower the delegates to make the request.

Mr. HOBSON. It does not prohibit it.

Mr. MANN. It would not authorize any appropriation here-The gentleman from Virginia says it is not because of the liquor dealers' association, and that he does not take orders from the liquor dealers' association. What are the facts? The gentleman himself introduced a bill on June 24.

Mr. FLOOD of Virginia. Mr. Chairman, has not the time for

debate expired?

The CHAIRMAN. The time for debate has expired.

Mr. MANN. The time for general debate has expired, as I understand, but not on amendments.

Mr. FLOOD of Virginia. There is no provision in the rule for debate under the five-minute rule.

Mr. MANN. If that is the case, I did not so understand it. Mr. FLOOD of Virginia. That is exactly the case.

Mr. MANN. Well, we will let the Chair construe it. The gentleman drew it. I did not. Let us see what the Chair says. Mr. FLOOD of Virginia. The Chair was a member of the committee that has jurisdiction of it.

Mr. MANN. Yes; but the Chair has not construed it yet. The CHAIRMAN. The Chair will say that the rule provides that after the bill shall have been read an amendment shall be in order, and the bill shall be considered as pending; and then at the close of one hour of debate the committee shall vote upon the amendment and report the bill to the House.

Mr. MANN. Mr. Chairman, the rule says there shall be one hour of general debate. It authorizes amendments to be offered. Do I understand the Chair to rule that when amendments are

offered they are not to be discussed?

The CHAIRMAN. The rule provides-

That upon the adoption of this order the House shall at once resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 6382) to provide for representation of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes, and the bill (S. 1620) to provide for representation of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes, the Committee on Appropriations being hereby discharged from the consideration of said bill (S. 1620); that the bill shall be read and the Chairman

recognize Members to offer amendments to the bill (S. 1620), allowable under the rule of the House, and amendments so offered shall be considered as pending.

Mr. MANN. That undoubtedly carries with it the right to discuss amendments.

The CHAIRMAN. But the rule also provides that there shall be one hour of general debate.

Mr. MANN. General debate.

The CHAIRMAN. Or so much as shall be required, to be divided equally between those favoring and opposing the bill; that at the expiration of this time the committee shall rise and report the bill. The Chair's construction of the rule is that amendments shall be pending.

Mr. BARTLETT. Does that rule require how the committee shall report the bill, whether favorably or unfavorably?

The CHAIRMAN. The rule provides that the House shall

pass upon the bill. Mr. BARTLETT. It says the committee shall then report the

The CHAIRMAN. Oh, no: the gentleman from Georgia is

mistaken.

Mr. BARTLETT. I did not know whether it directed how the committee should report.

The CHAIRMAN. For the benefit of the gentleman from Georgia and other gentlemen the Chair will read the remainder of this rule.

That at the expirartion of this time the committee shall rise and report the bill, H. R. 6382, with the recommendation that it be laid upon the table, and the bill S. 1620, with the recommendation that it be considered by the House, the previous question being hereby considered as ordered on said bill S. 1620 and all amendments to final passage, and the House shall proceed to vote without intervening motion on the amendments, if any, and the bill to final passage, except one motion to recommit, as provided by Rule XVI, paragraph 4.

Mr. BARTLETT. Mr. Chairman, a parliamentary inquiry. Does not the rule provide that the House bill shall lie on the table without regard to what the Committee of the Whole does? The CHAIRMAN. It so provides, and the House adopted the

Mr. BARTLETT. That is all right. It is a remarkable rule, that is all

The CHAIRMAN. The gentleman had his remedy before the

rule was agreed to.

Mr. BARTLETT. I am not complaining. I think the Committee on Rules is a great committee and has great power, and

this is a demonstration of it.

Mr. UNDERWOOD. Mr. Chairman, I make the point of order that under the rule the Committee of the Whole House on the state of the Union should rise automatically now.

Mr. GALLAGHER. I should like to offer an amendment. Is

an amendment in order?

Mr. MANN. Nothing is in order under a rule like this. The CHAIRMAN. The Chair thinks the amendment is not

in order

Mr. MANN. Did the Chair rule that an amendment is not in order?

The CHAIRMAN. The Chair rules that the amendment is not in order.

Mr. MANN. I respectfully appeal from the decision of the

Mr. BARTLETT. I never heard of such a rule as that.
The CHAIRMAN. The gentleman from Illinois appeals from
the decision of the Chair. The question is, Shall the decision
of the Chair stand as the judgment of the committee?

The question being taken, it was decided in the affirmative. Accordingly the decision of the Chair was sustained.

The CHAIRMAN. Under the rule the committee will rise The committee accordingly rose; and the Speaker having resumed the chair, Mr. Foster, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 6382 and the bill S. 1620, and had directed him to report the same back to the House with the recommendation that the bill H. R. 6382

do lie on the table and that the bill S. 1620 do pass. The SPEAKER. The question is on the third reading of the

Senate bill.

The bill S. 1620 was ordered to a third reading.

The SPEAKER. The question is, Shall the bill pass?

Mr. MANN. Mr. Speaker, I move to recommit the bill to the Committee on Foreign Affairs with the recommendation that it report back the bill forthwith, with an amendment striking out the last word, and upon that I desire to be heard for a moment.

The SPEAKER. The gentleman from Illinois moves that

Senate bill 1620 be committed to the Committee on Foreign Affairs, with instructions that they report it back forthwith, striking out the last word.

Mr. UNDERWOOD. Mr. Speaker, I believe it is in order to move the previous question on the gentleman's motion, but I do not wish to do so if we can agree on a reasonal time. How much time does the gentleman want?

Mr. MANN. I only want five minutes.
Mr. UNDERWOOD. I ask unanimous consent that the gentleman have five minutes, and that at the end of that time the previous question be considered as ordered.

Mr. MANN. The gentleman need not ask unanimous consent; he can take the floor and make the motion for the previous question.

Mr. UNDERWOOD. I desire to limit debate at this time, so

that we can get out.

Mr. MANN. The gentleman need not make the motion to limit the time. I am only going to say a word. I do not propose to detain the House, in view of the fact that the other side of the House is waiting to go into a caucus, which, goodness knows, I hope will soon end.

Mr. Speaker, the gentleman from Virginia [Mr. Flood], for whom I have a very high regard, was somewhat caught by his own statements and used some language which probably he ought not to have used. The gentleman from Virginia, on June 24, introduced a House bill and reported it August 19. The bill might have been disposed of a week ago. He now says that they left out the provision in reference to the invitation for the next congress because it is not in the Senate bill and it would make a day's delay if the bill had to go back to the Senate. They left it out, as he says, because of the objection from certain quarters. When I ask what quarters, the only quarters the gentleman named was the liquor dealers' association. I asked if it had come to a point where the Democratic majority of the House could not report a rule without asking consent of this association, an association which is entitled to consideration

Mr. HOBSON. Will the gentleman yield?

Mr. MANN. No; in behalf of the gentleman's colleagues I

will not yield or take up the time.

I was rather surprised that this provision was left out of the bill, and more surprised at the reason given for it. Now, Mr. Speaker, I withdraw my motion.

The SPEAKER. The gentleman from Illinois withdraws his motion to recommit, and the question is on the passage of the

The question was taken, and the bill was passed. On motion of Mr. Floop of Virginia, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. MURRAY of Oklahoma. Mr. Speaker, in view of the necessity for the Democratic caucus meeting as soon as possible, I desire that the unanimous consent granted me the other day to address the House on tempering the hot winds be extended to the next meeting of the House after to-morrow; that I be granted the same permission at the next meeting of the House after to-morrow.

The SPEAKER. The gentleman from Oklahoma asks permission to address the House for 30 minutes at the first meeting of the House after to-morrow, after the reading of the Journal.

Mr. MANN. Mr. Speaker, reserving the right to object, in view of the fact that all requests from this side of the House have been objected to recently in reference to such matters, I shall have to object for the present.

## ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 10 minutes p. m.) the House adjourned until to-morrow, Wednesday, August 27, 1913, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, recommending a provision in the deficiency appropriation bill relative to the enlargement of the post-office building at Canton, Ohio (H. Doc. No. 203); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Acting Secretary of Agriculture and the Postmaster General, transmitting the results of operations, together with certain recommendations, in accordance with the act making appropriations for the service of the Post Office Department for the fiscal year 1913 (H. Doc. No. 204); to the Committee on the Post Office and Post Roads and ordered to be

#### CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 5216) granting a pension to William H. Bennett and the same was referred to the Committee on Pensions.

### PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memo-

rials were introduced and severally referred as follows:

By Mr. HENSLEY: A bill (H. R. 7751) to provide for the building of good roads through the cooperation of the Federal Government, the States and Territories, and the counties thereof; to the Committee on Roads.

Also, a bill (H. R. 7752) to extend the provisions of the pension acts of June 27, 1890, and of February 6, 1907, to all State militia and other organizations that were organized for the defense of the Union and cooperated with the military or naval forces of the United States in suppressing the War of the Rebellion; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7753) to extend the provisions of the pension acts of June 27, 1890, and of February 6, 1907, to all State militia and other organizations that were organized for the defense of the Union and cooperated with the military or naval forces of the United States in suppressing the War of the Rebellion; to the Committee on Invalid Pensions.

By Mr. LAFFERTY: A bill (H. R. 7754) relating to bills of

lading in interstate and foreign commerce; to the Committee on

Interstate and Foreign Commerce.

By Mr. J. I. NOLAN: A bill (H. R. 7755) to further regulate interstate and foreign commerce by prohibiting interstate trans-portation of the products of convict labor, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROUSE: A bill (H. R. 7756) regulating the salary of rural letter carriers; to the Committee on the Post Office and

Post Roads.

By Mr. CHANDLER of New York: A bill (H. R. 7757) to authorize the construction of a bridge across the Hudson River just above Peekskill, N. Y.; to the Committee on Interstate and Foreign Commerce.

By Mr. THOMSON of Illinois: A bill (H. R. 7758) to provide for the construction of the Patent Office of the United States, including a hall of inventions, and for other purposes; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 7759) specifying the times at which the Congress shall assemble; to the Committee on the Judiciary.

By Mr. CLINE: A bill (H. R. 7760) providing for the pur-

chase of a site and the erection of a Federal building thereon in the city of Fort Wayne, county of Allen, State of Indiana, and appropriating the money therefor; to the Committee on Public Buildings and Grounds.

By Mr. BARKLEY: A bill (H. R. 7761) to amend the antitrust act of July 2, 1890; to the Committee on the Judiciary.

Also, a bill (H. R. 7762) to prevent the duplication or interlocking of directors in banks and corporations engaged in interstate commerce; to the Committee on the Judiciary.

By Mr. TAVENNER: A bill (H. R. 7763) to appropriate \$200,000 for an additional storehouse at the Rock Island Arse-

nal, Rock Island, Ill.; to the Committee on Appropriations.

Also, a bill (H. R. 7764) to appropriate \$65,000 for repairing shop H at the Rock Island Arsenal, Rock Island, Ill.; to the Committee on Appropriations.

Also, a bill (H. R. 7765) to appropriate \$250,000 for increasing the capacity of the field-artillery material plant at the Rock Island Arsenal, Rock Island, Ill.; to the Committee on Appro-

Also, a bill (H. R. 7766) to appropriate \$200,000 for a fieldartillery ammunition plant at the Rock Island Arsenal, Rock Island, Ill.; to the Committee on Appropriations.

Also, a bill (H. R. 7767) to appropriate \$300,000 for a smallarms cartridge plant at the Rock Island Arsenal, Rock Island, Ill.; to the Committee on Appropriations.

Also, a bill (H. R. 7768) to appropriate \$15,000 for a magazine at the Rock Island Arsenal, Rock Island, Ill.; to the Committee on Appropriations.

Also, a bill (H. R. 7769) to authorize the construction of a bridge across the Mississippi River near Keokuk, Iowa; to the

Committee on Interstate and Foreign Commerce.

By Mr. DOOLITTLE: A bill (H. R. 7770) authorizing the Secretary of War to deliver to Pollock Post, No. 42, Grand Army of the Republic, Department of Kansas, of Marion, Kans., one condemned bronze or brass cannon or fieldpiece and a suitable outfit of cannon balls; to the Committee on Military Affairs.

By Mr. BUCHANAN of Illinois: A bill (H. R. 7771) to regulate plastering in the District of Columbia; to the Committee on the District of Columbia.

By Mr. HOBSON: A bill (H. R. 7772) to make the appointment of pay clerks in the United States Navy permanent and to create the grade of chief pay clerk under regulations established by the Navy Department for other warrant officers; to the Committee on Naval Affairs.

By Mr. SPARKMAN: A bill (H. R. 7773) to establish an agricultural, plant, shrub, fruit and ornamental tree, berry, and vegetable experimental station at or near the city of St. Petersburg, Pinellas County, Fla.; to the Committee on Agriculture.

By Mr. LINTHICUM: A bill (H. R. 7774) to regulate the interstate transportation of fish or products or compounds thereof when intended to be used for fertilizer or oil or in the manufacture of fertilizer or oil; to the Committee on Interstate

and Foreign Commerce.

Also, a bill (H. R. 7775) to protect fish not remaining the entire year within the waters of any State or Territory and authorizing the Department of Commerce to define the seasons and regulate the manner and conditions under which they may be taken or destroyed; to the Committee on the Merchant Marine and Fisheries.

By Mr. JOHNSON of Kentucky: A bill (H. R. 7776) to prohibit the practice of extortion upon the hungry, the naked, the sick, and the dead in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. GODWIN of North Carolina: Resolution (H. Res. 232) allowing the Committee on Reform in the Civil Service a clerk at the rate of \$6 per day for the first session of the Sixty-

third Congress; to the Committee on Accounts.

By Mr. MURRAY of Massachusetts: Resolution (H. Res. 233) requesting the Department of the Interior, Department of Commerce, Department of Labor, and the Interstate Commerce Commission to furnish information relative to coal, etc.; to the Committee on Interstate and Foreign Commerce.

By Mr. CLAYTON: Resolution (H. Res. 234) to authorize the Committee on the Judiciary to inquire into and concerning the official conduct of Emory Speer, United States district judge for the southern district of Georgia; to the Committee on Rules.

By Mr. JOHNSON of Washington: Joint resolution (H. J. Res. 121) requesting the President of the United States to take the necessary steps, by negotiating with the British and Ca-nadian Governmens, to establish railway connection between the United States and Alaska; to the Committee on Foreign

By Mr. RICHARDSON: Joint resolution (H. J. Res. 122) to make available the unexpended balance heretofore appropriated for the improvement of the Tennessee River; to the Committee on Rivers and Harbors.

### PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ADAIR: A bill (H. R. 7777) granting an increase of pension to George C. Louthain; to the Committee on Pensions.

By Mr. ASHBROOK: A bill (H. R. 7778) granting an increase of pension to John T. Collins; to the Committee on Invalid Pensions.

By Mr. BORLAND; A bill (H. R. 7779) granting a pension to Harry C. Ketcham; to the Committee on Pensions.

By Mr. BUCHANAN of Illinois: A bill (H. R. 7780) granting a pension to Dorothea Winklehaken; to the Committee on Invalid Pensions.

By Mr. CHANDLER of New York: A bill (H. R. 7781) admitting to citizenship and fully naturalizing Gordon W. Nelson, of the city of New York, in the State of New York; to the Committee on Immigration and Naturalization.

By Mr. COPLEY; A bill (H. R. 7782) granting an increase of pension to Erastus L. Gilbert; to the Committee on Invalid

By Mr. CURRY: A bill (H. R. 7783) granting a pension to John W. Connors; to the Committee on Pensions.

By Mr. DYER: A bill (H. R. 7784) granting an increase of pension to Wilhelmine L. Mahkorn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7785) for the relief of Joseph Sirenick; to the Committee on Military Affairs.

By Mr. GREGG: A bill (H. R. 7786) for the relief of Ten Eyck De Witt Veeder, commodore on the retired list of the United States Navy; to the Committee on Naval Affairs,

By Mr. HAMILL: A bill (H. R. 7787) for the relief of David Crow; to the Committee on Military Affairs.

By Mr. HENSLEY: A bill (H. R. 7789) granting a pension to Mary F. Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7790) granting a pension to Thomas B. Moss; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7791) granting a pension to Elizabeth Bay; to the Committee on Pensions.

Also, a bill (H. R. 7792) granting a pension to Mary E. Harrison; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7793) granting a pension to Joseph W. Alexander; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7794) granting a pension to Joseph Mc-Dowell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7795) granting an increase of pension to Elizabeth Self; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7796) granting an increase of pension to

Mary A. Stitzel; to the Committee on Invalid Pensions.
Also, a bill (H. R. 7797) granting an increase of pension to
Wilson Thompson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7799) granting an increase of pension to Stephen M. McAllister; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7799) granting an increase of pension to Harriet Daniels; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7800) for the relief of Louis Burle, alias Ganter; to the Committee on Military Affairs.

Also, a bill (H. R. 7801) for the relief of Henry J. Tucker; to the Committee on Military Affairs.

Also, a bill (H. R. 7802) granting a pension to Jane Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7803) granting a pension to W. R. Trout:

to the Committee on Invalid Pensions. Also, a bill (H. R. 7804) granting a pension to Annie Burk; to the Committee on Pensions.

By Mr. LAFFERTY: A bill (H. R. 7805) granting a pension to John R. Simons; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7806) granting a pension to Michael H. Spaulding; to the Committee on Pensions.

By Mr. MAGUIRE of Nebraska: A bill (H. R. 7807) granting a pension to James B. Downs; to the Committee on Pensions. Also, a bill (H. R. 7808) granting an increase of pension to

Edwin N. Melton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7809) granting an increase of pension to Walter P. Stockton; to the Committee on Pensions. By Mr. O'SHAUNESSY: A bill (H. R. 7810) granting an in-

crease of pension to Michael Barry; to the Committee on Invalid Pensions

Also, a bill (H. R. 7811) granting an increase of pension to William C. Aldrich; to the Committee on Invalid Pensions.

By Mr. PLATT: A bill (H. R. 7812) granting a pension to William Haubennestel; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7813) granting a pension to Margaret F.

Searle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7814) granting an increase of pension to James McCormick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7815) granting an increase of pension to Alfred Gordon; to the Committee on Invalid Pensions.

By Mr. RAINEY: A bill (H. R. 7816) granting a pension to Eliza Browning; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7817) correcting the military record of

P. Armstrong; to the Committee on Military Affairs.

By Mr. RICHARDSON: A bill (H. R. 7818) for the relief of S. Davis; to the Committee on Claims. By Mr. RUSSELL: A bill (H. R. 7819) granting an increase

of pension to John Rollins; to the Committee on Invalid Pensions.

By Mr. SHERWOOD (by request): A bill (H. R. 7820) granting a pension to Mary F. Cherry; to the Committee on Invalid Pensions.

By Mr. SPARKMAN: A bill (H. R. 7821) for the relief of E. B. Huntley, Noah Harper, and S. Hoagland, sureties on the bond of Mrs. Jewell B. Pope, postmaster at Astor Park, Fla.; to the Committee on the Post Office and Post Roads.

By Mr. STEPHENS of Nebraska: A bill (H. R. 7822) granting a pension to Amy Mapes; to the Committee on Invalid Pensions.

By Mr. STONE: A bill (H. R. 7823) granting an increase of pension to James S. Jones; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 7824) granting a pension to John W. McAndrews; to the Committee on Pensions.

## SENATE.

# Wednesday, August 27, 1913.

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved.

NATIONAL CONSERVATION EXPOSITION, KNOXVILLE, TENN.

The VICE PRESIDENT. The Chair lays before the Senate a communication which will be read.

The Secretary read as follows:

THE NATIONAL CONSERVATION EXPOSITION, Knowville, Tenn., August 25, 1913.

Knoxville, Tenn., August 25, 1913.

To the Hon. Thomas Marshall.

The Vice President of the United States, Washington, D. C.

Dear Sir: The president and board of directors of the National Conservation Exposition at Knoxville, Tenn., the first exposition ever held for the purpose of accenting the necessity for and best methods of conservation of all the natural resources of the country, take pleasure in announcing to the United States Senate that this exposition will open in the city of Knoxville, Tenn., September 1, 1913, and will be open for 60 days, and request the honor of the presence of the Members of the Senate of the United States at some time during said exposition, to be designated by the Senate.

The August President.

T. A. WRIGHT, President. W. M. GOODMAN, Secretary.

The VICE PRESIDENT. The communication will be referred to the Committee on Industrial Expositions.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 1620) to provide for representation of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes.

### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CATRON:

A bill (S. 3052) authorizing the Secretary of the Interior to grant further extensions of time within which to make proof on desert-land entries in the county of San Juan, State of New Mexico; and

A bill (S. 3053) authorizing the Secretary of the Interior to grant further extensions of time within which to make proof on desert-land entries; to the Committee on Public Lands. By Mr. SMITH of South Carolina:

A bill (S. 3054) for the relief of the estate of John J. Driscoll, deceased; to the Committee on Claims.

By Mr. McLEAN: A bill (S. 3055) granting an increase of pension to Mary E. Blinn (with accompanying paper); to the Committee on Pensions

## AMENDMENTS TO THE TARIFF BILL.

Mr. KENYON. I submit an amendment to the pending tariff bill, which I ask may be read, printed, and lie on the table.

The amendment was read, ordered to lie on the table, and to be printed as follows:

Amend paragraph 580h by inserting, after the word "developed," the following:
"Subject to such censorship as the Secretary of the Treasury may

Mr. NORRIS submitted an amendment intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes; which was ordered to lie on the table and be printed.

Mr. HITCHCOCK submitted an amendment intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, which was ordered to lie on the table and be printed.

Mr. SMOOT. When we reached paragraph 326, relating to

woven silk fabrics in the piece, I asked that it might go over and stated that I would offer a substitute. I offer the proposed substitute for the paragraph and move that it be printed and referrred to the Committee on Finance.

The motion was agreed to.

IMPROVEMENT OF COLUMBIA RIVER, OREG.-WASH.

Mr. LANE submitted the following concurrent resolution (S. Con. Res. 8), which was read, considered by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be directed to submit to Congress a supplementary report on the project for the improvement of the mouth of Columbia River, Oreg.-Wash., setting forth, according to latest estimates, the amount that will be required to complete the north jetty; said report also to contain the opinion of the Chief of Engineers and River and Harbor Board as to the advisability of a lump appropriation for said work, with a view to hastening its completion.

## ASSISTANT IN SENATE DOCUMENT ROOM.

Mr. CLAPP submitted the following resolution (S. Res. 174) which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be authorized to employ one additional assistant in the Senate document room, at a compensation of \$1,440 per annum, to be paid out of the contingent fund of the Senate until otherwise provided by law.

#### THE TARIFF.

The VICE PRESIDENT. The morning business is closed. Mr. SIMMONS. I ask unanimous consent that the Senate

proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government,

and for other purposes.

The VICE PRESIDENT. The reading of the bill has proceeded to subsection B of Section II, on page 167.

Mr. BRISTOW. Mr. President, I desire to offer an amendment and I should like a larger attendance of the Senate than there is, because I want Senators to hear the amendment. So

I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Bankhead Gallinger Hollis Norris O'Gorman Oliver Smith, S. C. Smoot Sterling Hughes James Johnson Jones Owen Page Penrose Stone Sutherland Swanson Thomas Borah Bradley Brady Brandegee Bristow Kenvon Perkins Kern La Follette Lane Pittman Pomerene Robinson Shafroth Thompson Tillman Vardaman Warren Bryan Catron Lane
Lea
Lewis
Lippitt
Lodge
McCumber
Martin, Va.
Martine, N. J. Chamberlain Sharroth Sheppard Sherman Shields Simmons Smith, Ariz. Smith, Ga Weeks Williams Works Chilton Clapp Clark, Wyo. Colt Crawford Fletcher

Mr. GALLINGER. I will take occasion to announce the unavoidable absence of the junior Senator from Maine [Mr. Bur-LEIGH], on account of protracted illness.

The VICE PRESIDENT. Sixty-five Senators have answered

to the roll call. There is a quorum present.

Mr. GALLINGER. Mr. President, I desire to give notice that
on Tuesday next, immediately after the routine morning business, I will submit some remarks on the pending bill.

Mr. SHERMAN. Mr. President, the time that I desire to take is limited. I shall not consider in detail the various schedules and provisions of the bill. I shall generalize as far as possible. We have been sitting for some weary weeks on both sides of the Chamber discussing paragraph by paragraph these provisions. I could not add anything to what has been said in criticism of the bill, nor could I reply to the defenses that have been made any better than has been done. I shall content myself with such general observations as I think are now material to the bill.

Every few years a new generation reaches the ballot box. This period approximates the elemental disturbance in the method of national taxation. So long as the question of tax-ation persists there will be a difference of opinion on how taxes are to be levied. Some oppose any restraint whatever on all commerce between nations. Free trade may be dismissed, however, into the realm inhabited by doctrinaires. It is a good deal like socialism; it presupposes conditions impossible to exist either in government or in human nature. When the conditions are such as to make either practicable, both will When the become useless, because government will have become entirely unnecessary. If no governments are to be supported, there are no tariffs to be framed, and these schedules will, accordingly, be forgotten.

All of us learn in various ways. Experience is conceded to

be an efficient instructor. Some learn by experiences, personal and private to themselves; others act so as to involve the general public in the calamities of their educational processes.

The latter include those who are never really happy unless they are taking the industrial mechanism of the country apart in order to see what is inside of it. After they have taken it apart they universally fail to put it together again so that it will run successfully.

#### A NARROW MARGIN.

I apply myself this morning not to a theoretical but to an extremely practical part of this bill in this portion of my comments. The report of the Senate Committee on Finance esti-mates the receipts under this bill for the year ending June 30, 1914, at \$996,810,000.

The expenditures of the Government for the same period are estimated at \$994,790,000. I obtain this information from the majority report of the Senate Committee on Finance. The excess of receipts over expenditures is \$2,020,000. This is a mere paper surplus. Those who think the Government ought to meet the expenses of each year with that year's revenue may be dubious. I could pardon Mr. Micawber for feeling somewhat gloomy in the circumstances.

The fiscal affairs of the United States are still administered under Republican legislation. The Democratic majority so far has confined its successful efforts to appropriation bills to be met by revenue supplied by legislation enacted by Republicans. Anybody can spend money; any political party can empty the Treasury; but it yet remains for the majority party in this Chamber to demonstrate that they can fill the Treasury again. That you have to do for the future. History on this subject is not extremely reassuring.

If industrial effort pause to take stock, to reflect on the change and the future, it is not a conspiracy. The law of supply and demand, the rise and fall in obedience to the inexorable laws that govern the markets, is not a conspiracy against the majority party. It is merely a universal law of business fore-sight. I have seen deficits in the Treasury, as some of you They are storm signals. An experienced mariner, who have. heeds the laws of safe navigation, is to be commended for his prudence, not threatened with indictment. Nobody can be compelled or coerced into keeping his doors open. The inability of the Government to meet its current expenses without resorting to loans is a grave menace to every private occupation.

## DANGER OF A DEFICIT.

This tariff bill is born under the shadow of an anticipated deficit. I wish to preserve in the Congressional Record, that splendid mausoleum of literary effort, the statement that this measure, known as House bill 3321, confesses on its face that it must be flanked by an income tax to provide revenue on one hand and by a currency bill on the other. If perchance the income tax fails, the currency bill can, by enforced contribu-tions from the national banks of the country, furnish enough to keep the Treasury from showing the bottom,

This bill and the estimates made by the Senate Committee on Finance confess so narrow a margin between income and outgo that an error in a single estimate will convert the Treasury from solvency into bankruptcy. Conjecture is the basis of this legislation and public debt is its legitimate offspring. The promised reduction of taxes below the necessary level of self-support is a morbid propensity of some candidates for public office; it is a passport to temporary power. It has been often used and just as often repudiated whenever its debilitating effects on public and private credit have become apparent.

A candid survey of the undisputed conditions is now pertinent. On March 4, 1913, the total regular and permanent annual appropriations were \$1,098,647,960.21. That was for the fiscal year ending June 30, 1914, excluding all authorized contracts for the payment of public money. The appropriations for the fiscal year ending June 30, 1913, were \$1,019,412,710.91, excluding all like authorized contracts. The annual increase of expenses is over \$70,000,000. If the additional liabilities earther expenses is over \$79,000,000. If the additional liabilities authorized by contracts to be entered into are considered for each year, the increase swells to larger figures.

The Government balance sheet is an essential element of every solvent Government—State or National. The appropriations made do not warrant the hopes that are given us by the Senate Committee on Finance. When I read the report of the majority, the only relief in sight from this nearly \$80,000,000 increase in a single year is a platform promise of our Democratic brethren made July 2, 1912, at Baltimore.

We demand-

I am quoting now-

a return to that simplicity and economy which befits a democratic government.

As this promise was made over eight months before the increase of nearly \$80,000,000 in appropriations was made, it does not inspire in most of us that degree of confidence which ought to attend such solemn proclamations. If a person were disposed to be facetious on the subject, it might be said to be

in the nature of an ex post facto law.

The House has the sole power to originate all bills raising revenue. That body has been in the control of our Democratic brethren for two fiscal-year periods, and yet, when I read the items of appropriation for each of those years, I find no befiting simplicity or economy. I find the same expenditures, the same method of handling appropriation bills; I find that method continuing, even against the protest of the heads of committees and of those in charge of and responsible for the legislation of the Democratic House.

#### SEEK INCREASED IMPORTS.

This bill, in the face of these expenditures, notwithstanding nearly \$80,000,000 increase in appropriations in a single fiscal year, in the face of the natural growth inherent in every progressive government, admits that we will collect less money from customs duties under it than we have in former tariff

bills or from the law now in force.

They finally admit upon repeated queries, sometimes with reluctance, sometimes inadvertently, but at all times until recently with some degree of frankness lacking, that there will be an increase of importations. The mathematical result of the lowering of rates and the increasing of importations will, it is hoped, equal the income under the existing law. That, however, is based only on estimates.

The admitted purpose of this bill is to increase importations. It is claimed that more imports at a lower rate will equal less imports at a higher rate. Demonstration, as usual, is answered by prediction. At a time when the country is facing grave responsibility it is proposed to hazard a total recon-

struction of our economic system.

If domestic production is more than home consumption and we show an exported surplus, it is argued that no protection is We have heard that statement repeatedly from Senneeded. ators in charge of this bill. They say when such conditions "we are already selling in the world's markets, reduce duties or free list articles, and let things be cheap or cheaper."

If our domestic production is less than our home consumption, they say the difference must be supplied by importations. "We have," they say, "no export trade and are not producing enough to meet home consumption. Therefore reduce the rates of duty or free list the articles so that they come from abroad and we may again have things cheap or cheaper.'

Both the farmer and the manufacturer are bound on the bed of Procrustes. If they are too short, they are to be stretched;

and if they are too long, they are to be cut off.

# THE THEORY IS UNSOUND.

I shall not attempt an analysis of the 15 schedules of this bill, even if it were possible for any one man to be capable of making it. They are all written on the same theory. If of making it. you were to lay the blue prints down-if it were possible in connection with economic and legislative action to do so-you would find that they are all drawn on the same scale, on the same theory, and attempt to apply the same thing in practice. The theory is unsound. The system put into operation has never yet failed to produce precisely the same results.

The tariff act of 1894 was framed on the lines of this bill, and

it is only occasionally, merely as a matter of historic reference, that it is ever mentioned in this Chamber. When it is mentioned, its friends and apologists spend more time in proving an alibi for it than they do in undertaking to explain the manifold blessings that fell upon us while it was in operation. remember that it conferred on us the pearl of great pricecheapness-and its inevitable handmaid, idleness. It ran the mills of other countries overtime, just as, in my opinion, this bill will do, although I hope I am mistaken. Our own mills then rusted and our pay rolls melted into thin air. The farmer's products shared in the downward revision, and he too learned the cost of turning over our markets to alien hands.

How is it possible, asks a tariff-for-revenue-only disciple or a free trader, to maintain American standards of living at our prices here and ever to export anything to any market where

lower prices obtain?

That can be done only when our producers have the entire American market. A large volume of business permits a manufacturer to reduce the margin of profit on each unit. Ten cents on a barrel of flour is the average margin to the millers of this country. There is no combination among the millers; they do business on a competitive basis both at home and abroad. A divided market on a 10-cent margin of profit does not mean the same thing to a miller that it does to a tariff-bill writer. It does not mean the same thing to the wheat-growing farmer. It does mean to him, though, a diminished market when Canadian and South American fields pour their millions of bushels

into our market. Manufactures are sold on a narrow profit to the producers. That price can be maintained only by keeping all our own market for our own people. This is always the larger question, and it is something that our critics have not successfully answered on the floor of this Chamber.

A leading maxim of tariff for revenue only is that no article needing protection can be successfully exported. I take that from an address of nearly 20 years ago made by a gentle-man from Nebraska who served in the House of Representatives at that time. It was the keynote speech of tariff reform in that year; it is the keystone of that address. That, as I have said, was nearly 20 years ago. Let us see what the

developments since that time have shown.

The exports of tin manufactures in 1912, after providing for the demands of the home market, refute the claim. For the last year, after supplying the home demand, our exports were nearly a million and a quarter dollars of manufactures of tin alone. We have exported manufactures of tin for many years. That industry was created by the McKinley Act of 1890. exports of cotton manufactures in 1912 were over \$40,000,000. That is a protected industry.

#### SEA ISLAND COTTON.

I want to stop here to confirm what I said a day or two ago. On the impulse of the moment, without being able to restrain myself at the time, I stated that I was perfectly willing to vote for a protective duty on sea-island cotton. I am, now or hereafter, willing to do so. If Members of this body are as adequately informed as I think some of them are, if they know business conditions in the States bordering on the Atlantic. where much of the territory susceptible of growing this product lies, where the only American source of production is to-day, they know that there is something wrong with the market for sea-island cotton.

If those who have money invested in the industry, if the banks that have loaned, not their own money but their depositors' money and their shareholders' money, were to be heard, they would tell you that for some reason the market for sea-

island cotton is unsatisfactory.

Let me notice for just a minute what the trouble is about this. I find in 1912 more than \$20,000,000 worth of imports of unmanufactured sea-island cotton. I find that the two ports of Boston and Charlestown, Mass., received during the last fiscal year more than \$15,000,000 worth of imports of that product. That must be exported from some place. Whence does it come? I find that England is shipping a part of it and Egypt a large part of the remainder, with some from India.

Everybody knows that not a cotton boll ever burst in old Eng-We do know that sea-island cotton or a similar quality

of long-fiber cotton is produced in Egypt.

Along in the days when Moses was floating in the bulrushes the Egyptians were not producing any long-fiber cotton for the export trade, but now in that country they are beginning to raise it. England, with her usual foresight and wisdom, has seen the possibilities there. She not only has improved the natural irrigation that comes from the periodical rise of the river, but she has introduced improved methods of agriculture.

England is always intensely practical in her colonies. English race is a race of colonists. The law of primogeniture has sent all except its oldest sons to the four quarters of the world. It causes no surprise that Quebec fell into English hands in the days of Montcalm and Wolfe. It is not remarkable that in Cape Town the English are paramount. It is no wonder that wherever valuable minerals are found, wherever there is commerce to be had, wherever progress is possible under the development of English institutions that they carry with them

around the world, you find they colonize.

In the days of the Khedive, long before Kitchener went down in the Sudan, long before Gordon, down in the desert, fell a victim to the negligence of the military and governmental authorities of the home country-long before that England found Egypt bankrupt, her public obligations defaulted, interest and principal unpaid when due. She found the Egyptians the victims of every enemy, without law, without order, without a sense of public honor or of governmental security. She established a protectorate. Her purpose was to bring law and order and solvency to the Egyptian people. She went further. More than 12 years ago she began the great dam of Assuan, the greatest single piece of engineering of the kind in the world. It is finished; it is in operation.

In the days of the Pharaohs, since the Sphinx and the Pyramids have looked down upon that country of mystery, there was but a thin ribbon of the arable land of the Nile Valley. One could stand on the farthermost eastern edge and look with the naked eye across to the other boundary, and that was the

cradle of the human race when recorded history began. The English improved it, be it said to their everlasting credit. They built the dam. They stored the flood waters of the Nile. dam was built at the First Cataract.

What do they do with it? What is the object of it? Just a curiosity? Not at all. England has added 2,500 square miles, or 1,600,000 acres, to the tillable land of the Nile Valley by this irrigation system. What is done with it? It raises sugar and long-fiber cotton.

That is the story; and that is the reason why to-day every man who believes in the soundness of the principle of protection can consistently vote for a protective duty on sea-island

Fiffeen million dollars' worth of sea-island cotton taken out of the market of such States as produce it means something to the producers of that commodity. The \$15,000,000 worth that came into Boston and Charlestown last year means \$15,000,000 less of sea-island cotton from our own country. The merchants and manufacturers in that part of the country are applying the principles of the people who are framing this bill. They are buying cotton where they can buy it the cheapest. Therefore they are not buying American sea-island cotton. They are going to Egypt and India and England for it, and some of it comes from Germany. They all get it from the same or practically the same source. I would not be so uncharitable as to assume that certain apparent discriminations against the highly manufactured forms of cotton that are explained by the chart on the wall of this Chamber are caused by those importations by New

Mr. LODGE. Mr. President-

The PRESIDING OFFICER (Mr. Lewis in the chair). Does the Senator from Illinois yield to the Senator from Massa-

Mr. SHERMAN. I do.

Mr. LODGE. The Senator has referred to the long-staple cotton exported from Scotland and England. Of course that all comes from the same source; that is, the valley of the Nile. Mr. SHERMAN. Yes, sir; it does.

Mr. LODGE. The ports of Scotland and England are merely

corts of transmission.

Mr. SHERMAN. Yes; it all comes from practically the same

The woolen industry is protected, and it exported goods valued at \$2,500,000 during the last year. Zinc and zinc manufactures are also protected. They exported over \$2,000,000 last

THE SIMPLE QUESTION OF EGGS.

I now come to the simple question of eggs. At present they have a duty of 5 cents a dozen. I was talking with a Democratic brother of mine one day, and I asked him what he had against eggs. He did not reply. I said, "You are reducing the duty on them somewhat." He said, "Oh, they can not be imported now. There is no danger." Well, there is a good deal ported now. There was not any danger 25 years or perhaps 15 years ago, but with the refrigerator process of transportation there is danger of anything. What was perishable before in the poultry line or in the line of garden produce is to-day put into a market from one to three thousand miles away in a practically fresh condition.

Eggs are not so insignificant an item as they may seem. I still have reference to the Statistical Abstract of the United States, notwithstanding a distinguished Democratic Senator denied its reliability the other day. I can understand why. He is a good deal like an old-timer out on the plains who came back to Illinois when I was a lad, and told a story about a mule climbing the only tree there was on the plains. Some doubt was expressed about the ability of the animal so to perform, and he was pressed to give the circumstances. He said, "Well, there was a buffalo bull after the mule and he had to climb the tree." The Senator was in a corner. He had to climb a tree, and the only way to climb it was to put his foot on the Statistical Abstract of the United States and reach for the first limb, and he got away.

reach for the first limb, and he got away.

I am referring now to the same discredited source of authority. In 1910 we produced \$377,000,000 worth of eggs. According to this authority in 1894 we could not export them, but as a matter of fact in 1912 we exported nearly three and a half million dollars' worth of them and imported \$147,000 worth. I suspect the most of the imports were eggs for fancy fowls or improving breeds. They were not used for food.

WHEAT AND ITS MARKET.

nearly \$29,000,000 worth of wheat and nearly \$51,000,000 worth of flour. The reduction of duty made in the House was not so severe. It was to 10 cents a bushel. That would equalize to some degree the difference of cost between the production of wheat here and abroad. But in the Senate committee the duty

has been entirely removed.

In April of this year-I tried to get the figures for August, but failed-a bushel of wheat, cash, including insurance, freight, and other costs, at Buenos Aires, in the Argentine country, was The freight to Liverpool is 15 cents. figures I have from a miller who grinds both the domestic wheat and that from the South American countries. A barrel of flour made from Argentine wheat costs \$3.82, counting  $4\frac{1}{2}$  bushels to the barrel. The same bushel of wheat from Argentina, free listed, costs 70 cents, with 12 cents freight added to New York, Boston, or Philadelphia. A barrel of flour milled from it costs at the latter point \$3.69. The difference between that and the cost of an English barrel of flour from the same wheat is 131 cents. The English miller sells the by-products of the 41 bushels of wheat for at least 20 cents in excess of what the like by-products are sold for here. The freight from England is 15 cents a barrel, as freights ran last spring. will our miller buy wheat on the Atlantic seaboard with wheat free listed? He will buy it from South America, because he can mill his barrel of flour cheaper when he gets it from there than he can when he gets it from the Northwest.

It is said that free listing wheat will cheapen bread. Suppose we concede that the duty of 10 cents a bushel is a tax. and leave the question of domestic competition entirely out of Four and one-half bushels of wheat will mill into a barrel of flour. The duty is 45 cents. The barrel makes 320 loaves of bread. If you divide that, it is forty-five three-hundred-andtwentieths, or nine sixty-fourths, of 1 cent on a loaf. No one believes that this reduction would ever reach the consumer. Like free listing hides, or reducing shoes 60 per cent, the lower production cost will be absorbed either by the jobber or by the

retailer.

FARMERS DIRECTLY INTERESTED.

At one time the farmer's gain was indirect. I once had the same idea that many of my associates have. Manufactures and diversity of pursuits created a home market. Out of that grew an advance in land, and the marketing of what at that time was largely a quantity of perishable products. Then Canada's wheat land slumbered in the unbroken solitudes of her mighty wilderness. Then Argentina was still wrapped in the apathy inherited from centuries of Spanish misrule. Anybody who has ever traveled south knows what that means. Both of those sleepers, North and South, have awakened. The dormant fertility of their boundless fields has burst into an endless stream of grain that reaches the duty-free markets of every port in the world. Where once the North Star guided the trapper and the explorer, and where the listless native went his careless way under the Southern Cross, to-day rival farmers see every harvest covering an increasing acreage.

Grain elevators and railways are tapping the resources of that country, and those competing granaries are pouring their

ceaseless flood through all the ports of the world.

We used to read in our school days when we studied mythology about Ceres. I never knew who she was; I had no personal acquaintance. I found out since what it means. It is merely an idea. Mythology is said to be built upon the great moments of men who lived in the midst of antiquity and died before recorded history began. So the shining moments of those great men finally crystallized in mythology and tradition in their dominant characteristics and the fabled goddess of grain and tillage became Ceres. She no longer appeals to my imagination. Mythology and fiction both lag on the swiftly moving heel of fact when we contemplate the stupendous and complex mechanism of the modern grain market that supplies breadstuffs to civilized man.

The message of the Western Hemisphere to the farmer of the United States is a direct protective schedule to keep the markets of this country for him who gives to it his service in time of war and to which he pays taxes in both peace and war.

The ringing appeal of the Senators from the Northwest not long since touched the heart of every man who knows the farm and farm life. The farm, the orchard, and the garden are the basis of domestic food supply, and they are still the best, the safest homes of our race.

Who would not welcome in 1920 a return movement of our population to the farms of this country, not only in New England, but elsewhere? To cause it I will vote for any reasonable support for good roads. I will help to extend by whatever my vote is worth the rural free delivery. I will help develop and Wheat is now dutiable at 25 cents a bushel. In 1912 we imported about two and a quarter million dollars' worth of wheat and \$700,000 worth of flour. In the same year we exported extend the parcel post. Like the Senator from Idaho [Mr.

BORAH], I would rather vote a bounty on the farmer's produce than to free list it.

I believe in the cane sugar and the wool grower's share in

the protective system as well.

The man who works the soil and tends the herd or flock is disowned and abandoned in this bill. Ruthless as are the cuts in manufacturers' rates, a semblance of incidental protection The farmer, the flockowner, and sugar survives to them. grower are cast adrift on the open sea of world-wide competi-They are told it is a benefit to them, and they are asked to kiss the hand that smites them. If they want to do it, I have no objection. I am waiting to see whether they will

GIVING AWAY OUR HOME MARKET.

It is admitted that this bill will increase importations. What becomes of them? Are they to be kept as curios to be put in museums or are they for our markets? Why is it done? To lower prices and so reduce the high cost of living. That is admitted. It is in the Congressional Record for future refer-

The resulting cheapness can only be had by displacing a volume of home production equal to the importation. Even more, the real displacement value is the invoice price abroad, with the transportation charges and the profit added in this country. Our domestic consumption can not equal our present home production and importations combined. Something must yield in this increase of importations. If imports increase, we consume fewer of our own products. If they do not increase, the bill provides no adequate revenue; we gain nothing, and take all the risk for our pains.

Why do some delude themselves by thinking it possible to lower the cost of everything they buy without lowering the

price of anything they sell?

This country's industrial body is an entirety. It grows as a whole. An injury to a part is at last an injury to all of it. Any attack on any vital organ threatens its life. I therefore am just as ready to vote to defend sugar in Louisiana and California as I am iron and steel in Pennsylvania and Illinois. wheat and dairy products of the great Northwest are entitled to the same protection as the cotton mills of New England and North Carolina.

Protection is national; it is not local. It may begin like the tribal instincts in the early days. The first nation was a tribe. But the development of the tribal feeling with the broadening of the horizon led to the nation. It might be local interest at first, but it soon becomes national, and we learn that the entire fabric of the economic body politic is a whole. It is a national question and not a local one.

The horizon of those who believe in this widens and advances with the jurisdiction of the Government. It ends only at the invasion of our market by the work of other hands in other countries. We believe the highest American statesmanship is to make our own production at least equal to our own consumption in every article we can make in this country.

PAY-ROLL DOLLAR THE BEST DOLLAR,

The American pay-roll dollar may be, in the language of a distinguished Chautauqua lecturer, a man-made dollar, but it is the best dollar in the civilized world. It is the gold-standard dollar yet, notwithstanding the efforts of some of our distinguished friends. When it goes out of circulation what currency laws can restore it?

The farmer is methodically turned out to compete with the world in this bill. With the rapid cheapening of freights on land and sea the last barrier for his protection is broken down in this bill. A few more months will witness a worldwide commerce in water transit at the Isthmian Canal. The ships of Europe and Asla will reach every port of entry on The first ship that sails west from sea to sea without rounding Cape Horn will be the most momentous event in the world's commerce since Columbus planted the cross on the shores of San Salvador.

Facing this, the farmer must be a protectionist. It is only lately that he has begun to reap something of our growth and of the fields he has plowed in the summer sun and watched in winter snow. Now he faces again the tariff reformer with only promises against his bitter experience and prophecy in

answer to his doubts and fears.

I was against Canadian reciprocity. I am against it now in whatever form it may appear. It was a political blunder. It was a grave economic error. It was an error against the farmers of the great producing areas of the country. The instinct of the farmers of the great West and Northwest is still wiser than the philosophy of the professors and the treaties of all the diplomats of any administration. There was in it, though, some feeble effort for a small compensation.

In this bill there is absolutely none. Not to Canada, not to Europe, but to the world it gives the domestic markets of nearly 100,000,000 people with the highest standard of living known to civilized man without one solitary reciprocal advantage to the farmer. To the farmer there is a lame and impotent stagger toward protection; 1 t before it becomes operative it must be submitted to Congress, not to this Senate, which has the constitutional power of consenting to and ratifying treaties, but to Congress, requiring the assent of both branches of the National Legislature.

HOW TO BUY ONE'S SELF RICH.

The farmer is told that he buys in a free-list market under this bill. Say that what he buys is lower. He gains, it is said, more than he loses by the joint reduction of what he buys as well as by what he sells. That sounds plausible. Small wonder, though, that the farmer who is in the habit of looking back of things for the substance of them as well as other business men fails to see the ineffable blessings of this generous scheme when he waits for his team to cool at the end of the furrow.

He knows just as well as we know that to beat the schedules of this bill he has to buy more than he sells. You must repeal the law of the multiplication table and the laws of nature before you can get away from that. If he sells more of his product at a lower price than he buys of somebody else's products at a lower or equally low price, the balance of trade is against him. The only way to enrich himself under this bill is to buy more than he sells so as to enjoy the benefits of the low cost of living. This is practical. It is not political; it is not govern-That rule existed when Euclid framed his first geometric problem, when mathematics first became known to man as an exact science.

This bill is drawn under the hallucination of certain political economists that everybody buys more than he sells. The basis of that notion is that overworked ideal individual known as the ultimate consumer. He is supposed to be continually eating, wearing out, drinking voraciously, or appropriating to his individual use all the luxuries and the necessities of life ad

libitum.

For practical purposes he is a myth. I shall assume that everybody produces in some form of commodity or service more than he himself uses. If he has no surplus to dispose of he must at last be a bankrupt. There are no persons but the idle rich and the vagrant idle poor who are not producers of more either of commodities or service than they consume. The price of all one sells must exceed in price what he buys if he save anything from year to year. If a wage earner be substituted for the farmer the same conditions appear and the same rule applies.

LOW PRICES.

The low-price phrase is a surface argument. We have heard it in many campaigns. It usually comes about 20 years apart, after a new generation has arrived. We forget what it means, some of us older ones. We naturally think first of what we pay out. It is the second thought that reminds us of what we take If we had some of New England's thrift in our somewhat wasteful ways out in the West and the Middle West, we would think of it maybe a little guicker.

We naturally think of what we pay out, what we buy of somebody else, when we think the price is high. It takes a second thought to remind us that what we have left of what we take in is the surplus at the end of our year. On this depends the thrift or thriftlessness of ourselves and others. It is the farmer's continuous market at the market price for his product that makes his balance right at the end of the year. It is the payroll dollar that spells the difference between the workmen here and abroad.

The ability to buy at a higher price is infinitely better than the inability to buy at any price.

This is our country. That seems to be forgotten sometimes, Its work, its wages, and its markets belong to our people.

IMPLEMENTS AND BANANAS.

The reasoning of this bill describes a vicious circle in legislation. As it stands we know what that means. It is arguing around to the starting point and begging the question.

Agricultural implements are free listed to give the farmer cheap agricultural implements and to punish the trust, the International Harvester Co. All right. Bananas are made dutiable at 10 cents a hundred pounds to punish the United Fruit Co. We produce \$150,000,000 worth of farm implements and use 75 per cent of them at home and export the other 25 per

How many bananas do we raise? I ask the question of some of the learned gentlemen who are interested in this phase of the question, who investigated it. I do not think any appreciable number of bunches of bananas in the market are raised in this country. We will import in the next fiscal year \$15,000,000 worth of bananas. We will collect from that an estimated \$2,250,000, without a single competitive bunch grown in this country.

SUGAR AND SHEEP.

Sugar is free listed, and rice is given protection under the thinly veiled pretense of needed revenue. Sugar produced \$50,000,000 and has been dutiable since 1789. Rice, in the handbook accompanying our labors, is estimated to produce \$250,000 in the next fiscal year.

I should like to have some of the authors of this bill who feel we need the revenue feel it in the neighborhood where there is

some reasonable prospect of having it satisfied.

The sheep has always been the shibboleth of the free trader. The farther he can go from home to buy a sheep or its wool, the happier he is. If he can get a sheep or its wool in South America, it is a good day's work. If he can buy one in Australia instead of Wyoming or Ohio, he forthwith proclaims his unappeasable happiness by writing a book on political economy, with special reference to the wealth of nations.

Poker chips are protected in this bill by a 50 per cent duty, and free salt at last appears as the ineffable boon upon the

American breakfast table.

#### COTTON GAMBLING LICENSED.

Cotton gambling is licensed at 50 cents a bale, with no serviceable distinction between the intention to deliver the cotton or not in the future.

Mr. OLIVER. Mr. President-

The PRESIDING OFFICER (Mr. Lewis in the chair). Does the Senator from Illinois yield to the Senator from Pennsyl-

Mr. OLIVER. I think that what the Senator says is worthy of a better audience, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The Chair informs the Senator from Illinois that the Senator from Pennsylvania suggests the absence of a quorum. Does the Senator yield?

Mr. SHERMAN. I have no complaint to make, because, as the present occupant of the chair knows, we are used to a stockyard district, where anything goes.

Mr. GALLINGER. Nothing can be done but to call the roll

under the rule.

The PRESIDING OFFICER. The roll will be called. The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	Norris	Smith, Ariz.
Bacon	Hollis	O'Gorman	Smith, Ga.
Bankhead	Hughes	Oliver	Smith, S. C.
Bradley	James	Overman	Smoot
Brady	Johnson	Owen	Sterling
Brandegee	Jones	Page	Stone
Bristow	Kenyon	Penrose	Sutherland
Bryan	Kern	Perkins	Swanson
Catron	La Follette	Poindexter	Thomas
Chamberlain	Lane	Pomerene	Thompson
Chilton	Lea	Reed	Tillman
Clapp	Lewis	Robinson	Townsend
Clark, Wyo.	Lippitt	Root	Vardaman
Colt	Lodge	Saulsbury	Walsh
Crawford	McCumber	Shafroth	Warren
Cummins	McLean	Sheppard	Weeks
Fall	Martin, Va.	Sherman	Williams
Fletcher	Martine, N. J.	Shively	Works
Gallinger	Nelson	Simmons	WOLKS
Gaminger	retson	Simmons	

Mr. SHEPPARD. My colleague, the senior Senator from Texas [Mr. Culberson], is unavoidably absent. He is paired with the Senator from Delaware [Mr. Du Pont]. I ask that this announcement stand for the day.

Mr. McCUMBER. I desire to announce that my colleague [Mr. Gronna] is necessarily absent from the Senate, and is paired with the Senator from Illinois [Mr. Lewis].

Mr. O'GORMAN. I wish to announce that the senior Senator from Louisiana [Mr. Thornton] is unavoidably absent from the Chamber

The PRESIDING OFFICER. Seventy-five Senators have re-

sponded to the roll call. A quorum of the Senate is present.
Mr. SHERMAN. Mr. President, there is a drawback feature drawback features or rebates does not lead to the conclusion that the burden will be removed even from the legitimate transactions in cotton. There is a legitimate sale not only of cotton but of every commodity for future delivery. Whatever may have been the history of exchanges and boards of trade in the past, all of the legitimate exchanges now, without regard to the commodity, are adopting or have adopted stringent rules prohibiting an adjustment of differences merely, with no intent to deliver upon the arrival of the future time; in other words, they have gone to a strictly lawful basis in the great exchanges of the country.

There will be a burden, under this section of the bill, imposed upon legitimate transactions, because of the difficulty usually experienced in administering rebate provisions. Who pays the burden? Either the cotton grower or the final consumer of cotton. It is simply another toll station put on the road between the man who produces a domestic article and the one who uses Those accumulating charges are already intolerable; they are now amongst the most responsible causes of the high cost of living complained of. Is it not better to take those burdens off our domestic commerce rather than to put others on?

I am opposed to this section of the bill as well as to the others. If sales of cotton are in good faith, for actual delivery, they are lawful alike, without restriction under the laws of the State where the exchanges are located and in the interstate commerce of the country as well. If there be any evil in any of the transactions, real or apparent, the method of reaching

it effectively is to declare it gambling by an act of Congress.

Gambling in futures is criminal; such transactions are civilly void, and the State and Federal courts are closed to those who would invoke their remedies in every jurisdiction in this country-almost without exception in State jurisdictions and universally so in the Federal courts. Declare them gambling between the citizens of the different States and a misdemeanor by act of Congress; do not license them even in form, or the Government becomes a partner in an offense against sound morals and the rules of legitimate trade. If these tariff schedules for revenue only so exhaust the Treasury that we must compound even with apparent gambling to replenish it, then better raise the rates than to divide the gamblers' spoil.

The majority of the Senate Committee on Finance reports that a large volume of transactions for future delivery of cotton is in its last analysis gambling. It is further stated that the imposition of a proper tax is not only to eliminate a parasite, but to collect a considerable sum of revenue. From whom? What would be thought of the municipality that offered to divide even some of the plunder of such transactions as are stigmatized here as, in the last analysis, gambling? Who will justify eliminating even a parasite by licensing him to continue to infest the country that he inhabits for the sake of the money he pays to the Government? This is one kind of tainted money that I can segregate and condemn at its source.

### THE INCOME TAX.

The income-tax section is a fearsome document, if you will allow me to drop into Scotch vernacular. I am for an income tax properly laid. I am against it in toto as proposed to be applied by this bill. The Senate committee exemption of \$3,000 is too low. The House exemption is nearer the just classification, if classes are to be introduced into legislation.

The former sound doctrine was that all taxes be levied on a basis of assessed equality. I would prefer that all pay proportionately and that no class be introduced. That, however, I regard as governmentally impossible under present conditions. Some class distinctions, I believe, are inevitable in future legislation on this subject.

The income-tax amendment is now a part of the organic law of this country. We must legislate to execute its provisions. It becomes impossible, in my judgment, so to legislate unless we do recognize and introduce some form of classification. That necessarily brings us to classes, below which some are exempt from the tax and above which others are liable, either at a uniform rate or on a graduated scale.

There is a wide difference of opinion on the relative merits of what ought to be done. By force of necessity, seeing no other solution of the problem, I have accepted the classification stated, and I have further accepted the graduated scale, an ascending scale with the increase of income, as the only practical and just way in which legislation can be had on this subject.

After we have introduced classes, if any distinction is to exist between married and unmarried men, add \$1,000 for the wife and not less than \$500 for every child, and take off the limit as to children. Why do you want to limit the exemption to two children? That is the fashionable number.

If there is any race suicide, where does it begin? It is among the people who ought to raise children and send them out into the world, because they are able so to nurture and train them as to make them good citizens and better fathers and mothers of future generations. Do not leave all the babies in the country to be raised by those who have not the means so to nurture and raise them as well as have some whom I have in mind. would put a tax on dogs and a bounty on babies, if I were a benevolent despot in this country.

After a certain limit is reached on fixed investments we all know what happens. If the investments are in stable property, the tendency is for offspring to be few and far between. This is the race-suicide line, and this bill promotes race suicide in spite of its professed love for population, for the family, and for the low cost of living. The bill places a premium upon two children only. If there are a dozen, the other ten, I suppose, are economically undesirable and ought to penalize the wage-earning head of the family. Above this race-suicide line the income tax ought to be high enough to compensate for the loss by raising the exemption limit to \$4,000, with the addition for wife and children.

There is an unjust discrimination in the classification made. Do you think that nobody but a married man has any burdens? What about relatives within the degree of consanguinity? Aside from the legal obligation, what about the moral obligation that is stronger than any of the laws made by the puny flat of legislation? There may be a sacred burden to be borne second only to wife and children.

AN HONOR ROLL.

Call the roll now of men who earn \$4,000 or less. Who are they? It is admitted that above the \$4,000 line there are a very limited number of men in this country subject to the proposed income tax.

The men who are earning less than \$4,000 a year comprise a very large number. Who are they? They are the men who toil with hand or brain, or both. There are 12,000,000 of them working on the farm every time the sun rises on our domain; there are 7,000,000 more of them in manufacturing pursuits, who pour out of the shops and mills at the close of every working day. Five millions are in trade and transportation; they are the agencies of collection and distribution throughout the country. Six millions are engaged in personal service, and more than one and a half millions are engaged in the learned professions.

This is an industrial army of more than 30,000.000 people. They are the hand, the mind, the eye, the ear, the heart, and the conscience of our race. Without them production and distribution would cease; the field would lie fallow; the shops rust away in idleness; the engine be cold and pulseless; the ship rot at the pier, and even the dead would go unshriven to their tombs. They are 30,000,000 laborers, and of them we are a part.

I have a broad definition of labor—not the limited one that so often springs unbidden to the mind. The countless things of use or beauty, of convenience, or of comfort, the service for wages, for charity, or for love; all that gives food, clothing, shelter, literature, music, or the arts; necessities or luxuries; all that shields, maintains, adorns, diversifies, or develops human life is labor.

A sculptor's genius shapes from soulless marble a form surviving centuries after the last ring of his chisel has died away. A day laborer wheels rubbish or dumps slag from the mill. Both of them are laborers, as I see it, each in his own way, in the great vineyard of human affairs. The engineer in his cab, the priest in his surplice, the lawyer with his brief, the miner with his pick, all must recognize each other as fellow members of a union, and brothers in this mighty army of toil.

This Senate must recognize this enduring truth in laying an income tax. Taxes primarily ought to be on property. This, I realize, is largely theoretical at this time; nevertheless it is a conviction I have that keeps struggling ever in my mind, so I will give it place here. Taxes ought primarily to rest on property. The primary purpose of government is the protection of the person, not, as is sometimes thought in this latter day, the protection of property. Property is a means to an end. Property is a means for the promotion of the care and the welfare of the persons of men. That is the primary object of government, and property becomes secondary.

# THE IDEAL TAXATION.

I believe the burden of taxation in its ideal form, when levied, would be upon property rather than upon effort or ability, industry, skill of hand or brain. If a plumber made \$5.000 a year I should be willing to vote to exempt him from tax. If a lawyer made the same income I should be willing to exempt him. All that a farmer makes com land he owns, by skill and industry, beyond a fixed percentage on the reasonable value of his land ought to be exempted on the same ground until it exceeds a given limit obviously beyond the means of support. Ability dies with its possessor. Why tax it, at least until it rises clearly beyond the bread-line limit?

Income from fixed investments or property stands on another and more enduring basis. Death does not destroy it. The source of such income is intact. The principal is imperishable if handled with the same prudence as that of the man who accumulated it.

The modern trust company furnishes this prudent management. The trust company is one of the great factors of mod-

ern life. We sometimes fail to understand what it means in the economic problem of to-day. It is used as an instrument, coupled with the statutes of wills and with few or no children, to build and maintain the huge bulk of certain fortunes, conveniently and habitually used by Socialists as horrible object lessons in their attack on the institution of private property.

There is a good deal more socialism abroad in this country than we think. A studied creed, with deliberate purpose, with a system and a propaganda well understood to-day, is waging war on the Anglo-Saxon idea of regulated individualism in government and the private ownership of property. The anti-dote is not shricking radicalism from the curbstone and barrel head, but sane, practical legislation, bringing the laws of the land down to the practicable requirements of the present day.

A graduated income tax and an increasing birth rate are an adequate remedy. If nature were let alone, her laws, not only of ability but of the inherent difference between man and man when grown to adult years, would break every undue accumulation of property possible in the span of a single life. No devisee or heir at law could keep the property of an ancestor unless of the kind that husbands inherited resources. That no law, no government, can destroy, because it is one of the enduring things that lies at the basis of Anglo-Saxon civilization.

#### TAXING LIFE INSURANCE.

The crudest and the most indefensible part of this bill is that which taxes the income of life insurance companies. I would take every limit off of life insurance—fraternal, social, industrial, mutual, or stock companies doing business on the stockholders' investment or on the mutual plan in the department that many stock companies have. I would take the last dollar of taxation in the form of an income tax from them all.

All life insurance is essentially the same. Fraternal, mutual, or stock associations answer the same purpose and attain the same ends. Fraternal insurance was exempted by the original House bill. This is right. The Senate has added mutual companies to the exemption so far as it might apply to any part of premium deposits actually returned to the policyholders.

Two extraordinary reasons for taxing stock companies are given—some who are owners of stock in share-holding companies have grown wealthy and must be reached; certain policyholders carry very large lines of insurance, and they, too, must be charged with more of the revenue burdens of the country.

Why not reach the owner of the excessive fortune by an income tax and classify policyholders, as long as classes are to be introduced, so as to exempt the insurance intended to shield the family from want in the day when the head of that family can no longer toil for those dependent on him? After an insurance policy rises above the line of protection and becomes or partakes of the nature of an investment it is time enough then to load the premium with this additional tax.

The other reason given is that certain life insurance companies have violated their trust. They have given to campaign funds and have made investments in which the commissions or other features were subject to criticism. Let us admit it. Who ever before tried to correct and remedy a breach of trust by a trustee by inflicting fresh injuries upon the helpless victim? This bill penalizes the beneficiaries of the trust instead of those who violated their duties to the beneficiaries. Why penalize 7,000,000 policyholders in this country for either of these reasons?

"Oh, well," it is said, "but the company will pay it, not the one who buys the insurance." I respectfully beg to differ and say that the company will not pay it. The cost of life insurance depends upon mortality tables. The mortality tables do not depend upon legislation. They are based on a law that comes from the Omnipotent Hand that gives to us our lives. The other large factor in the problem is the rate of interest on fixed investments.

Examine the report of any great life insurance company. The average interest or income will not exceed 5 per cent on fixed investments.

The other item of charge in writing life insurance, outside of the mortality tables and the rate of interest upon fixed investments, is the cost of conducting the business for the policyholders. If the rate of interest were to fall permanently from some cause, the premium measuring insurance cost would rise by an inflexible law. If the average period of human life were shortened from some universal and permanent cause, the cost would rise in obedience to the same inexorable law. If interest rates were permanently to rise above the present figures, or longevity were to increase, the premium, following the same law, would fall to a lower and permanent cost level. To illustrate still further, if a minimum wage scale could be imagined that would abitrarily double the compensation of every person

employed by the life insurance companies doing business for these 7,000,000 policyholders, it would at once be charged to the premium cost. It would be loaded on the annual payment of premium, and the policyholder in every instance would pay it.

PRESIDENT'S ADDRESS-AFFAIRS IN MEXICO (H. DOC. NO. 205).

The VICE PRESIDENT (at 12 o'clock and 55 minutes p. m.). The hour has arrived when, in accordance with the concurrent resolution of the two Houses, the Senate will proceed to the Hall of the House of Representatives to listen to a communication from the President of the United States.

Thereupon the Senate, headed by the Sergeant at Arms and the Assistant Doorkeeper, and preceded by the Vice President and the Secretary of the Senate, proceeded to the Hall of the House of Representatives.

The Senate returned to its Chamber at 1 o'clock and 25 min-

utes p. m., and the Vice President resumed the chair.

The address of the President of the United States, this day

delivered to both Houses of Congress, is as follows:

Gentlemen of the Congress, it is clearly my duty to lay before you, very fully and without reservation, the facts concerning our present relations with the Republic of Mexico. The deplorable posture of affairs in Mexico I need not describe, but I deem it my duty to speak very frankly of what this Government has done and should seek to do in fulfillment of its obligation to Mexico herself, as a friend and neighbor, and to American citizens whose lives and vital interests are daily affected by the distressing conditions which now obtain beyond our southern border.

Those conditions touch us very nearly. Not merely because they lie at our very doors. That of course makes us more vividly and more constantly conscious of them, and every instinct of neighborly interest and sympathy is aroused and quickened by them; but that is only one element in the determination of our duty. We are glad to call ourselves the friends of Mexico, and we shall, I hope, have many an occasion, in happier times as well as in these days of trouble and confusion, to show that our friendship is genuine and disinterested, capable of sacrifice and every generous manifestation. The peace, prosperity, and contentment of Mexico mean more, much more, to us than merely an enlarged field for our commerce and enterprise. They mean an enlargement of the field of selfgovernment and the realization of the hopes and rights of a nation with whose best aspirations, so long suppressed and disappointed, we deeply sympathize. We shall yet prove to the Mexican people that we know how to serve them without first thinking how we shall serve ourselves.

But we are not the only friends of Mexico. The whole world desires her peace and progress; and the whole world is interested as never before. Mexico lies at last where all the world looks on. Central America is about to be touched by the great routes of the world's trade and intercourse running free from ocean to ocean at the Isthmus. The future has much in store for Mexico, as for all the States of Central America; but the best gifts can come to her only if she be ready and free to receive them and to enjoy them honorably. America in particular-America north and south and upon both continentswaits upon the development of Mexico; and that development can be sound and lasting only if it be the product of a genuine freedom, a just and ordered government founded upon law. Only so can it be peaceful or fruitful of the benefits of peace. Mexico has a great and enviable future before her, if only she choose and attain the paths of honest constitutional government.

The present circumstances of the Republic, I deeply regret to say, do not seem to promise even the foundations of such a peace. We have waited many months, months full of peril and anxiety, for the conditions there to improve, and they have not improved. They have grown worse, rather. The territory in some sort controlled by the provisional authorities at Mexico City has grown smaller, not larger. The prospect of the pacification of the country, even by arms, has seemed to grow more and more remote; and its pacification by the authorities at the capital is evidently impossible by any other Difficulties more and more entangle those means than force. who claim to constitute the legitimate government of the Republic. They have not made good their claim in fact. successes in the field have proved only temporary. War and disorder, devastation and confusion, seem to threaten to become the settled fortune of the distracted country. As friends we could wait no longer for a solution which every week seemed further away. It was our duty at least to volunteer our good offices—to offer to assist, if we might, in effecting some arrangement which would bring relief and peace and set up a universally acknowledged political authority there.

Accordingly, I took the liberty of sending the Hon. John Lind, formerly governor of Minnesota, as my personal spokesman and representative, to the City of Mexico, with the following instructions:

man and representative, to the City of Mexico, with the following instructions:

Press very earnestly upon the attention of those who are now exercising authority or wielding influence in Mexico the following considerations and advice:

The Government of the United States does not feel at liberty any longer to stand inactively by while it becomes daily more and more evident that no real progress is being made toward the establishment of a government at the City of Mexico which the country will obey and respect.

The Government of the United States does not stand in the same case with the other great Governments of the world in respect of what is happening or what is likely to happen in Mexico. We offer our good effices, not only because of our genuine desire to play the part of a friend, but also because we are expected by the powers of the world to act as Mexico's nearest friend.

We wish to act in these circumstances in the spirit of the most earnest and disinterested friendship. It is our purpose in whatever we do or propose in this perplexing and distressing situation not only to pay the most scrupulous regard to the sovereignty and independence of Mexico—that we take as a matter of course to which we are bound by every obligation of right and honor—but also to give every possible evidence that we act in the interest of Mexico alone, and not in the interest of any person or body of persons who may have personal or property claims in Mexico which they may feel that they have the right to press. We are seeking to counsel Mexico for her own good and in the interest of ber own peace, and not for any other purpose whatever. The Government of the United States would deem itself discredited if it had any selfish or ulterior purpose in transactions where the peace, happiness, and prosperity of a whole people are involved. It is acting as its friendship for Mexico, not as any selfish interest, dictates.

credited if it had any selish or ulterior purpose in transactions where the peace, happiness, and prosperity of a whole people are involved. It is acting as its friendship for Mexico, not as any selish interest, dictates.

The present situation in Mexico is incompatible with the fulfillment of international obligations on the part of Mexico, with the civilized development of Mexico herself, and with the maintenance of tolcrable political and economic conditions in Central America. It is upon no common occasion, therefore, that the United States offers her counsel and assistance. All America cries out for a settlement.

A satisfactory settlement seems to us to be conditioned on—

(a) An immediate cessation of fighting throughout Mexico, a definite armistice solemnly entered into and scrupulously observed.

(b) Security given for an early and free election in which all will agree to take part.

(c) The consent of Gen. Huerta to bind himself not to be a candidate for election as President of the Republic at this election.

(d) the agreement of all parties to abide by the results of the election and cooperate in the most loyal way in organizing and supporting the new administration.

The Government of the United States will be glad to play any part in this settlement or in its carrying out which it can play honorably and consistently with international right. It pledges itself to recognize and in every way possible and proper to assist the administration chosen and set up in Mexico in the way and on the conditions suggested.

Taking all the existing conditions into consideration, the Government of the United States can conceive of no reasons sufficient to justify those who are now attempting to shape the policy or exercise the authority of Mexico in declining the offices of friendship thus offered. Can Mexico give the civilized world a satisfactory reason for rejecting our good offices? If Mexico can suggest any better way in which to show our friendship, serve the people of Mexico, and meet our international oblig

Mr. Lind executed his delicate and difficult mission with singular tact, firmness, and good judgment, and made clear to the authorities at the City of Mexico not only the purpose of his visit but also the spirit in which it had been undertaken. But the proposals he submitted were rejected, in a note the full text of which I take the liberty of laying before you.

I am led to believe that they were rejected partly because the authorities at Mexico City had been grossly misinformed and misled upon two points. They did not realize the spirit of the American people in this matter, their earnest friendliness and yet sober determination that some just solution be found for the Mexican difficulties; and they did not believe that the present administration spoke, through Mr. Lind, for the people of the United States. The effect of this unfortunate misunderstanding on their part is to leave them singularly isolated and without friends who can effectually aid them. So long as the misunder-standing continues we can only await the time of their awaken-ing to a realization of the actual facts. We can not thrust our good offices upon them. The situation must be given a little more time to work itself out in the new circumstances; and I believe that only a little while will be necessary. For the circumstances are new. The rejection of our friendship makes them new and will inevitably bring its own alterations in the whole aspect of affairs. The actual situation of the authorities at Mexico City will presently be revealed.

Meanwhile, what is it our duty to do? Clearly, everything that we do must be rooted in patience and done with calm and disinterested deliberation. Impatience on our part would be child-ish, and would be fraught with every risk of wrong and folly. We can afford to exercise the self-restraint of a really great nation which realizes its own strength and scorns to misuse it. It was our duty to offer our active assistance. It is now our duty to show what true neutrality will do to enable the people of Mexico to set their affairs in order again and wait for a further opportunity to offer our friendly counsels. The door is not closed against the resumption, either upon the initiative of Mexico or upon our own, of the effort to bring order out of the confusion by friendly cooperative action, should fortunate occa-

While we wait the contest of the rival forces will undoubtedly for a little while be sharper than ever, just because it will be plain that an end must be made of the existing situation, and that very promptly; and with the increased activity of the contending factions will come, it is to be feared, increased danger to the noncombatants in Mexico as well as to those actually in the field of battle. The position of outsiders is always particularly trying and full of hazard where there is civil strife and a whole country is upset. We should earnestly urge all Americans to leave Mexico at once, and should assist them to get away in every way possible—not because we would mean to slacken in the least our efforts to safeguard their lives and their interests, but because it is imperative that they should take no unnecessary risks when it is physically possible for them to leave the country. We should let everyone who assumes to leave the country. We should let everyone who assumes to exercise authority in any part of Mexico know in the most unequivocal way that we shall vigilantly watch the fortunes of those Americans who can not get away, and shall hold those responsible for their sufferings and losses to a definite reckoning. That can be and will be made plain beyond the possibility of a misunderstanding.

For the rest, I deem it my duty to exercise the authority conferred upon me by the law of March 14, 1912, to see to it that neither side to the struggle now going on in Mexico receive any assistance from this side the border. I shall follow the best practice of nations in the matter of neutrality by forbidding the exportation of arms or munitions of war of any kind from the United States to any part of the Republic of Mexico—a policy suggested by several interesting precedents and certainly *dictated by many manifest considerations of practical expedi-We can not in the circumstances be the partisans of either party to the contest that now distracts Mexico or con-

stitute ourselves the virtual umpire between them.

I am happy to say that several of the great Governments of the world have given this Government their generous moral support in urging upon the provisional authorities at the City of Mexico the acceptance of our proffered good offices in the spirit in which they were made. We have not acted in this matter under the ordinary principles of international obligation. the world expects us in such circumstances to act as Mexico's nearest friend and intimate adviser. This is our immemorial relation toward her. There is nowhere any serious question that we have the moral right in the case or that we are acting in the interest of a fair settlement and of good government, not for the promotion of some selfish interest of our own. If fur-ther motive were necessary than our own good will toward a sister Republic and our own deep concern to see peace and order prevail in Central America, this consent of mankind to what we are attempting, this attitude of the great nations of the world toward what we may attempt in dealing with this distressed people at our doors, should make us feel the more solemnly bound to go to the utmost length of patience and forbearance in this painful and anxious business. The steady pressure of moral force will before many days break the barriers of pride and prejudice down, and we shall triumph as Mexico's friends sooner than we could triumph as her enemies-and how much more handsomely, with how much higher and finer satisfactions of conscience and of honor!

## THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. SHERMAN. Mr. President, taxes operate in the same way in life insurance. They are loaded on the premium and must be carried by the insured as certainly as any other cost of carrying a risk. The actuary must compute it as a part of the sum to be charged as the price of solvency to the company and of safety to the insured. The companies now pay a property tax as any other owner does. They now pay, too, over \$12,000,000 annually to the various States of the Union for local charges in fees, licenses, costs of supervision, and the right of Orean Land the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean Land the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean Land the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean charges in fees, licenses, costs of supervision, and the right of Orean charges in fees, licenses, costs of supervision, and the right of t

In the sixteenth and seventeenth years of the reign of Queen Victoria Great Britain, by an act of Parliament, allowed her citizens to deduct life insurance premiums from the annual gains and profits of their business subject to income tax to an amount equal to one-sixth of their incomes. This has been the law of Great Britain for over half a century. By an act of Parliament of August 7, 1912, approved and registered, in-surance companies, under the insurance act of 1911, are exempted from the income tax levied by that Government. Hol-

land, Russia, and Japan pursue a similar course, I am informed, although I have not had access here to the laws translated so as to examine them personally.

Life insurance is encouraged in the United Kingdom; onesixth of a taxpayer's gain from his business may be deducted in computing his net income to be subject to tax. The payment of life insurance premium is treated as a voluntary tax and deducted accordingly.

#### LIFE INSURANCE A PUBLIC BENEFIT.

Life insurance is a protection. It is not bought for pecuniary gain. It ought to be cheapened and made easier. Instead of laying burdens on it the Government ought to exempt it and the companies writing it from taxation. As a shelter for the help-less it has no equal and few substitutes. The uncertainty of life and the certainty of death are problems which face every man. Most men begin life poor. They marry; their wives are dependent upon them; children come into the world, and between the family and want there is only the earning power of the man. The creation of a family at once increases the liability of general society, because if the man fails to support them the risk of becoming public charges arises. Through no fault of the man death often causes him to default on his obligations:

Life insurance is a device by which such defaults may be avoided, a process by which society may be relieved of what ultimately may be a public burden. It capitalizes the future earning power of the head of the family. That it is not an investment in the ordinary meaning of that word is conclusively shown by the fact that men almost never voluntarily seek it. They know that, measured by the standards of business, it means not profit but sacrifice. Life insurance is not an investment; it is a tax, a voluntary tax, by which society is protected and social defaults prevented.

Sound life insurance leaves nothing to chance. There is not so certain a business obligation in the civilized world as the modern life insurance policy. It never trifles with its obligations; it does not guess at how it will pay its obligations. Life insurance takes unorganized life and organizes it: it takes unrelated money, that would otherwise be scattered and lost, assembles it and turns it from all quarters of the civilized world into great financial reservoirs through cooperation, from which States, cities, industrial, and private obligations may draw for their upbuilding and for the support of social obligations.

The average man can understand that large value devoted to certain remedial purposes, such as hospitals, should not be taxed; he can understand why some billions of dollars in this country of value belonging to the various church organizations, devoted both to a remedial and a preventive purpose, ought not to be taxed. The difficulty is to appreciate the fact that in life insurance there is another great accumulation of securities, so wise in its obligation to society, so beneficent in its influence upon the family, so powerful in its assistance to the State, so destructive in its opposition to want, to ignorance, to crime, that its appeal for exemption from further taxation is as much entitled to consideration in this Chamber as any that can come before a legislative body. Instead of being further taxed, it ought to be relieved even of some of the enormous burdens now charged upon the premium paid by the policyholder.

Recently we have heard very much of social justice. It is not a mere phrase to be shouted from the curbstone and shrieked by agitators. Some of them have but cast reproach upon it. Mr. Frank Tucker, at the National Conference of Charities and Correction, held at Seattle in June, 1913, defined social justice as a "demand for each individual and each family fit to be a part of the community for certain benefits without which no one should be expected to exist." Living wages, education, housing, food, clothes, health, recreation, insurance, transportation, heat, light, and government are essential to it.

Every life insurance policy of every kind is a step toward social justice. Each new account at a savings bank helps; every building and loan association that builds above the family their own roof forges a new link in the chain of self-support; every new park, every mile of good roads, every sanitation of plague spots, or destruction of slums and sweatshops, prevention of occupational disease, every provision for light, air, safety, and safety appliances, reasonable hours of labor at reasonable wages, and reasonable service for the wage paid are elements in social justice.

The modern industrial worker has the right to ask that he be not killed or disabled or his working years shortened, and that the highest degree of human vigilance be used to that end. The common-law defenses belong to the code of an age that has

When the earning power of the workman no longer shields his family from want society instantly becomes concerned. The taxpayer becomes interested in the solution of the problem, because ultimately there is where the risk may rest, where the We are at last their keepers. Liability laws liability may be. are good; compensation laws are, in some cases, better; industrial insurance is the most effective of all.

Great Britain several years ago started upon an experiment in her industrial insurance. In some States, within the jurisdiction of those sovereignties in local affairs, they, too, are beginning the experiment that will ultimately lead to better social justice. No one would have the hardihood to tax any of these instrumentalities. Below the support and bread line all taxation on any form of income is a gross error.

PROTECT OUR OWN WORKMEN.

Superior to all else in this great industrial army of 30,000,000 people is work here for willing hands. I believe in a Government of regulated individualism; I believe in the responsibility of the individual himself; I believe, further, that he is entitled to our work, our wages, and our own markets, both for his commodities and for his services.

What does it profit us to rear splendid systems of self-help, to sanitate, to safeguard, to insure against disability and death, when the mills are silent and idleness reigns supreme, holding in his hand the sceptered emblem of cheapness? It is vain to talk of social justice unless that mighty army of 30,000,000 American laborers in all the departments of human activity be employed, and that our whole country be at once their market, their workshop, and their home.

#### BREAKING DOWN CIVIL SERVICE.

Paragraph O of the income-tax section appropriates \$1,200,-000 for additional employees to carry it into effect, and exempts them all from the civil-service laws. Why is this necessary? Is the list of eligibles under the civil service exhausted, or, perchance, are they unfit? Is the work so difficult as to be impossible of performance unless touched and sanctified as spoils? It is neither. I know what it means, and so do you. It is an assault on the civil service. It is a legislative precedent. this succeeds, covert paragraphs will soon ornament departmental appropriations every time a supply bill makes its appearance in this Chamber. It is the first break in the dam. If not repaired, the flood behind will force itself through. Government is now making a valuation of all our railways and the employees to be engaged in this work are under civil-service Why is the income-tax employee exempted? Is any particular ability required other than in other departments?

There are limitations upon the civil service. I do not think that every employee ought to be under its provisions. of a highly confidential character, those that handle money or property and immediately represent a superior officer or the head of a department, those who sustain such immediate pecuniary responsibility or that degree of confidence, I think properly ought to be exempted. It is not a universal rule to be applied to every appointive officer in the country, but with sane limitations, as every person understands. There is no such proper limitation in this provision of the bill; it passes away beyond it, and, it seems to me, shows a deliberate intention to violate the spirit of the general act.

DUTY ON FOREIGN BOOKS.

Books printed in foreign languages are made dutiable at 15 per cent. The estimate gives from this source \$150,000 revenue Many provisions of this bill are to be regretted. None other, however, does more than attempt to apply, what its critics believe, an economic error in government. The duty on books in foreign tongues beggars legitimate criticism; it is pitiable. If the free trader in his exalted moments rise to the impossible heights of a world-wide altruism, he is theoretically sublime, though impossible. When he taxes foreign literature, he is practically ridiculous. We are inviting the derision and contempt of the great thinkers in the empire of intellect throughout the world.

A powerful strain in our blood is the German. The German is a law-abiding, an industrious, a thrifty, and a most desirable citizen. He brings with him and continues to use his native The great literature of his race is not printed here in German; but little type to be used for this purpose is found here. Many of our people learn the German language. French is a cosmopolitan tongue. Many who are native to that lan-guage retain it, and many of us acquire it. Italians have come to us. They are industrious, hard working, and saving. The Scandinavian Peninsula has given us generously of her hardy sons. On many a wide field they sow for the coming harvest and serve in many ways the whole industrial life of their

fully every demand of American citizenship. I have neighbored with all those nationalities named, and with more.

The particular tariff on books printed in a foreign tongue is No like competitive books are printed to any appreciable degree in this country. I will not vote to burden the immortal tragedies of Dante or of Faust, the poetry of Schiller, the fiction of Balzac, or the drama of Moliere by making them more expensive for those who are able to read them in their mother tongue.

Let us not forget that modern science spoke through Pasteur and Erlich and all that splendid host who have worked in study and in laboratory that science might gain and humanity might have a better world for our "little lives that are rounded with a sleep." So many of them have written the story of their toil and triumph in the foreign tongue they learned from their mother's lips. Knowledge is world-wide. There is no good thought alien to us wherever the brain was born or in whatever accent it falls from the tongue that speaks it. It comes from the "eternal spirit of the chainless mind."

ART SHOULD BE FREE.

The artist's brush and the sculptor's chisel are degraded by the customs duties levied in this bill. All of earth's minted gold can not produce a genius. No sordid hope of pecuniary gain has created the world's great masterpieces. I am opposed to that paragraph of the present law and of this bill. Such productions ought to be forever duty free. We should attract art from In public or in private it adds to our daily life the intellectual, the beautiful, the spiritual that are part of man's priceless heritage that survives the grave.

The PRESIDING OFFICER (Mr. Lea in the chair). The

question is on agreeing to the amendment reported by the com-

Mr. BRISTOW. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Hitchcock Hollis Hughes James Johnson Myers Nelson Norris O'Gorman Oliver Bacon Smith, Ariz. Smith, Ga. Borah Bradley Brady Brandegee Smith, Md. Smith, S. C. Smoot Owen Page Perkins Pittman Bristow Jones Stone Stone Sutherland Swanson Thomas Thompson Townsend Vardaman Warren Williams Works Bristow Bryan Catron Chamberlain Chilton Clark, Wyo. Clarke, Ark. Kenyon Kern La Follette Lane Lane
Lea
Lewis
Lippitt
Lodge
McCumber
McLean
Martin, Va.
Martine, N. J. Pomerene Ransdell Robinson Saulsbury Shafroth Colt Sheppard Sherman Shively Simmons Works 'ummins Fall etcher

Mr. RANSDELL. My colleague, the senior Senator from Louisiana [Mr. Thornton], is unavoidably absent. I ask that this announcement stand for the day.

The PRESIDING OFFICER. Sixty-eight Senators have answered to their names. A quorum of the Senate is present.

Mr. BRISTOW. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The Secretary will read the

The Secretary. On page 165, line 19, it is proposed to strike out "\$20,000" and insert in lieu thereof "\$10,000"; in line 20 out \$20,000 and insert in flet thereof \$10,000; in fine 20 strike out "\$50,000" and insert in lieu thereof "\$20,000"; on page 166, in line 1, strike out "\$50,000" and insert in lieu thereof "\$20,000," and strike out "\$100,000" and insert in lieu thereof "\$30,000"; in line 3 strike out "\$100,000" and the period and insert in lieu thereof "\$30,000 and does not exceed \$40,000, and 4 per cent per annum upon the amount by which the total net income exceeds \$40,000 and does not exceed \$50,000, and 5 per cent per annum upon the amount by which the total net income exceeds \$50,000 and does not exceed \$60,000, and 6 per cent per annum upon the amount by which the total net income exceeds \$60,000 and does not exceed \$70,000, and 7 per cent per annum upon the amount by which the total net income exceeds \$70,000 and does not exceed \$80,000, and 8 per cent per annum upon the amount by which the total net income exceeds \$80,000 and does not exceed \$90,000, and 9 per cent per annum upon the amount by which the total net income exceeds \$90,000 and does not exceed \$100,000, and 10 per cent per annum upon the amount by which the total net income exceeds \$100,000."

The PRESIDING OFFICER. The question is on agreeing to

the amendment proposed by the Senator from Kansas,

Mr. BRISTOW. Mr. President, the proposed amendment proadopted country; they and many other nationalities all meet vides for an income tax of 1 per cent on incomes between \$3,000 and \$10,000. That is the same rate as provided in the pending bill up to \$10,000. The proposed amendment makes no change whatever in the tax on incomes of \$10,000 and less. amendment the tax on an income of \$10,000 on a bachelor-that is, the maximum tax that could be imposed on anyone-would be \$70, the same as in the bill reported by the committee. Under the exemption, if a man had a family of a wife and two children, the tax would be \$50 instead of \$70.

On incomes between \$10,000 per annum and \$20,000 per annum I add an additional per cent over that provided in the bill, making the total tax on the second \$10,000, 2 per cent; so that the tax on an income of \$20,000 per annum under the amendment would be \$270 per annum, while under the committee bill it would be \$170; that is, I add an additional 1 per

cent on the additional \$10,000.

On incomes between \$20,000 and \$30,000 I add another 1 per cent, making the additional tax 2 per cent. The amount of the tax on an income of \$30,000 under the proposed amendment would be \$570 a year, while under the committee bill it would be \$370 a year.

On incomes of \$40,000, adding 1 per cent more for each additional \$10,000, the tax would be \$970 per annum under the amendment, while under the committee bill it would be \$570.

On incomes of \$50,000 under the proposed amendment the tax would be \$1,470 per annum, while under the committee bill

it would be \$770 per annum.
On incomes of \$60,000 the tax under the amendment would be \$2,070 per annum, while under the committee bill it would be \$1,070 per annum.

On incomes of \$70,000 or more the tax under the amendment would be \$2,770 per annum, while under the committee bill it

would be \$1,370 per annum.
On incomes of \$80,000 the tax under the amendment would be \$3,570 per annum, while under the committee bill it would be \$1,670 per annum.

On incomes of \$90,000 per annum the tax under the proposed amendment would be \$4,470 per year, while under the com-

mittee bill it would be \$1,970.

On incomes of \$100,000 the tax under the amendment would be \$5,470, while under the committee bill it would be \$2,270. It is a graduated income tax, starting with the same percentage that the committee fixes on all incomes less than \$10,000; and, then, for each \$10,000 that is added to the income there is levied an additional tax of 1 per cent.

There has been some apprehension on the part of those who are opposed to an income tax that this proposition of mine, which I made yesterday, would be extremely radical. The papers this morning said that "Senator Bristow had offered a radical amendment to the income-tax provision of the bill." I submit this question to the Senate: Does the Senate believe that when a man has an income of \$100,000 per annum a tax of \$5,470 for the maintenance of his Government is an excessive tax for him to pay?

There is not a property owner in a city in the United States who does not pay far in excess of that on any business he may have, when you take into consideration his property and license taxes

The difference between this tax and taxing property as it is taxed in our States, counties, and municipalities is that the man whose property is taxed pays a certain percentage upou his principal. If you have \$20,000 invested in a mercantile business, you are assessed on the \$20,000, and you pay on the \$20,000 whether your business is profitable or not. Even if during a year you have lost money in the conduct of your business instead of making money, you have to pay the tax just the same while a system of taxation such as this instead. the same, while a system of taxation such as this imposes it only upon the men who have the money to pay it. It is not levied on the property investment, but on the actual net income.

The Senator from Mississippi is apprehensive that we shall

get too much money. As was stated yesterday by the Senator from Idaho [Mr. Borahl], I do not think it is possible to form any reliable estimate as to how much money this income tax will bring. I have here the estimate submitted in the House

report, but the more you study it the less satisfied you are with any estimate that you may undertake to work out.

It is estimated here that there are 100 men in the United States who have incomes of more than a million dollars each per annum, and that those 100 men would pay \$5,826,000 as their income tax under the House provision. That is a mere guess, upon the most superficial information. That must be guess, upon the most superficial information. conceded by all. It is estimated here that there are 178,000 people in the United States who have incomes ranging from \$5,000 to \$10,000 per annum. I think that is the merest guess. We can not tell anything about it. My judgment is—and it is

not raise anything like \$70,000,000. I may be mistaken in that, My judgment is not worth any more than that of anybody else, but I do not believe we shall get anything like \$70,000,000 from this tax

My principal objection to the provision of the bill is that it does not sufficiently assess the men of enormous incomes. The Senator from Mississippi stated yesterday that we ought to start with a simple provision, so as not to have it complicated. This amendment is not any more complicated than the provision in the bill. It simply carries it out in a little more detail and places a heavier burden on those who are more able to bear it,

I trust the Senator from Mississippi will not resist this adjustment of the income tax. It seems to me it is not radical; it is not a dangerous levying of tuxes upon the rich; it does not come from an enemy of property. It simply seeks to levy a tax for the maintenance of the Government upon those who are best able to pay it, and it seems to me that no more just system of taxation can be devised.

I submit herewith a table showing the amount of tax under the amendment and the bill:

Tax on incomes to \$100,000.

Incomes and full tax on incomes.	Revenue collected on maxi- mum in- come in each divi- sion.1	Revenue collected on maxi- mum in- come in each divi- sion. ²
Up to \$10,000 at 1 per cent. From \$10,000 to \$20,000 at 1 (income tax)+1 (additional tax)=	\$70	\$70
2 per cent	270	170
From \$20,000 to \$30,000 at 1 (income tax)+2 (additional tax)= 3 per cent	570	370
From \$30,000 to \$40,000 at 1 (income tax)+3 (additional tax)= 4 per cent	970	570
From \$40,000 to \$50,000 at 1 (income tax)+4 (additional tax)= 5 per cent.	1,470	770
From \$50,000 to \$60,000 at 1 (income tax)+5 (additional tax)= 6 per cent.	2,070	1,070
From \$60,000 to \$70,000 at 1 (income tax)+6 (additional tax)= $7 \text{ per cent}$	2,770	1,370
From \$70,000 to \$80,000 at 1 (income tax)+7 (additional tax)= 8 per cent	3,570	1,670
From \$80,000 to \$90,000 at 1 (income tax)+8 (additional tax)=	4, 470	1,970
From \$90,000 to \$100,600 at 1 (income tax) +9 (additional tax)=	5, 470	2,270

1 Proposed amendment.

² Committee bill.

Mr. WILLIAMS. Mr. President, I have my doubts as to whether or not I ought to take up the time of the Senate, even for a few minutes, at this juncture, but perhaps it will be well to do so.

In connection with everything in this world there is a beginning and an end. The beginning of most things is the motive behind them. The end is the effect which follows. The motive behind the amendment offered by the Senator from Kansas is not revenue. It is a punitive, vindictive motive. It is to punish and take from those who have large incomes, not because the Government needs the money, but because the Government has the power to do it.

The Senator says we can not make a close estimate of how much money we are going to get by the income tax. Admit it; nor could we make any very close calculation as to how much was to come in from the corporation license tax, but we arrived at it pretty closely all the same, and I think we will arrive at this.

The effect of this amendment, if adopted, would be to pile up in the Treasury a lot of money which we would not need. That would be the ultimate effect; and it would encourage extravagance upon the part of the lawmakers and the bureaus of the Government. But the immediate effect would be still another thing. We would have to go back over this entire bill and reduce proportionately the taxes upon consumption which are contained in the bill. We have neither the time nor the ability, to do that in so hurried a manner.

The Senator's amendment has a defect that is even greater than that. He forgets that the very beauty, the chief raison d'être, of an income tax consists in its elasticity. During normal times of peace you have a slight tax upon incomes, graduated not with a view of punishing those who have large incomes, but with a view of equalizing the taxes, because of the greater opportunities that people of large incomes have to escape taxation than people of small incomes have. In other words, it is equalized in proportion to ability to pay. Then, when the piping \$5,000 to \$10,000 per annum. I think that is the merest guess. We can not tell anything about it. My judgment is—and it is a matter of judgment—that the tax as provided in the bill will tax law which affects domestic business directly, purposely, or incidentally-one of the three-you merely meet in Congress and raise the income tax one-tenth or one-twentieth or one-fourth or whatever you choose, as to the entire scale or as to some parts

of the scale, leaving the balance untouched.

One of the virtues of an income tax is that it taxes approximately in accordance with the ability to pay. That is its virtue as far as the payer of the tax is concerned. Its virtue as far as the Government, the payee, is concerned lies in the elasticity of the tax, the ability to raise and lower revenue without disturbing commercial and industrial enterprise.

I do not see any particular sense in adopting the amendment offered by the Senator from Kansas, and I hope it will be voted

down.

Mr. BRISTOW. The Senator designates the motive Behind the offering of this amendment as a vindictive one that seeks to penalize men of wealth. I deny the statement. I think I have an equitable motive.

Mr. WILLIAMS. It may be necessary for me to say that I did not mean by that to impute any personal purpose to the Senator; but the Senator has a large sympathy with the sort of feeling to which I was referring, and that is that the people

who have too much money ought not to have so much.

Mr. BRISTOW. The Senator may know better about what my purposes and feelings are than I do, but I am not willing to admit it. I do think some men have more than their share of this world's power that goes with great wealth; but the purpose of this amendment is to try to distribute with some equality and some equity the burdens of government.

I believe the man who has an income of \$100,000 a year can pay \$5,000 a year tax to the maintenance of his Government without being burdened to any extent or without incurring any great personal inconvenience. He has a vast interest in the enjoyment of which the Government protects him, and I do not believe the Government is imposing upon him any unjust or inequitable burden when it asks him to contribute that amount to sustain the Government,

Mr. WILLIAMS. If the Senator will pardon me, if he wants to carry his last observation to its logical conclusion, he can carry it very much further. He might say that if a man with \$5,000 income pays \$500 tax per annum, leaving him \$4,500, a man with \$100,000 income ought to pay about \$95,500, leaving him \$4,500 per annum. The object of taxation is not to leave men with equal incomes after you have taxed them.

This bill, if the Senator will pardon me a moment, levies a tax of 1 per cent upon people who have incomes or less than \$20,000. It doubles that tax for the next grade. It adds 33\frac{1}{3} per cent to the doubling for the next grade following. So this is a graded income tax, and it does attempt to equalize things with a view to correcting what the Senator from Idaho [Mr. BORAH] referred to yesterday, and which is absolutely true—the greater opportunity of men of greater income, whose incomes are generally drawn from bonds, stocks, bills receivable, and various things of that sort, to hide their incomes, as compared with the ordinary man, whose property is in a visible shape and form, and whose income is known to all his neighbors.

I think that is not fair. I do not mean by that, again, that the Senator means to be unfair. I am talking about the Senator's argument and his proposition, and not about him. do not think it is fair to leave upon the country the impression that we have not made a graduation of the tax in proportion to the increase of the income. I think we have made sufficient graduation. But the main thing is this: If you go ahead, upon your theory, and tax incomes all they can bear in normal times

of peace, what are you going to do when war comes?

One of the misfortunes about a tariff tax in war times is that when you meet and raise your tax you decrease your revenue, because war times decrease importations; and, in addition to that, increasing the tax decreases importations, also. emergency tax, the import-duty system is unworkable, and the most workable system in the world is the income tax. start at a level low enough down to get the revenue which the Government needs, and not any more. Suppose we find out that we have made a mistake, and can not collect quite as much under this tax as we thought we could: We can at the next session levy a tax as quickly as the snap of a finger, in a statute with 10 lines in it, affecting nothing but the income tax, in order to make up the deficit, and to restore the proper relationship between expenditures and receipts.

Mr. BRISTOW. I agree that the bill as formulated provides for a graduated income tax. My amendment carries out exactly the same principle that the bill itself carries out. It provides for a graduated income tax; but I seek to adjust the rates of taxation according to my views in a way that is more suitable to the ability of the taxpayers to meet.

While the bill would impose a tax of \$2,270 upon a man who has an income of \$100,000 per annum, my amendment would impose a tax of \$5,470 upon him. I do not think that is an excessive tax for the man who has an income of \$100,000, as I have said before. I started with exactly the same amount as the bill upon all incomes less than \$10,000; 1 per cent on all above the exemption of \$3,000, or \$70 on the bachelor for the first \$10,000 of income, which is exactly what the committee Instead of going up as slowly as the committee does, and having such large amounts in the graduated steps, I take \$10,000 steps and add 1 per cent for each step, which is very simple. Then, when you reach the maximum, I think it is a very moderate tax.

Mr. BORAH. Mr. President, I understand the Senator from Mississippi to feel that the tax proposed by the amendment of the Senator from Kansas is in its nature a punitive tax, and not based upon the principle of equity; in other words, that it goes too far, and therefore becomes a punitive tax in its nature rather than one constructed with a desire to equalize burdens and secure sufficient revenue. I do not believe there is anything inequitable in it. I am not in favor of trying to equalize the fortunes of this country through taxation. I am not in favor of punishing people who, through one method or another, have acquired fortunes which it is almost beyond man's mental conception to measure. There are other ways to deal with that. But it is a known rule of taxation, and one which we profess to follow, that men ought to pay taxes in accordance with their ability to pay, or pay them on the principle of causing them the least possible inconvenience when they part with their money

The report on this bill which came from the House contained

this statement:

For the fiscal year ending June 30, 1912, the Government derived \$311,000,000 from tariff taxation and \$293,000,000 from internal revenue proper. These taxes rest solely on consumption. The amount each citizen contributes is governed not by his ability to pay tax but by his consumption of the articles taxed. It requires as-many yards of cloth to clothe, and as many ounces of food to sustain, the day laborer as the largest holder of invested wealth; yet each pays into the Federal Treasury a like amount of taxes upon the food he eats, while the former at present pays a larger rate of tax upon his cheap suit of woolen clothing than the latter upon his costly suit. The result is that the poorer classes bear the chief burden of our customhouse taxation.

The tax upon incomes is levied according to ability to pay, and it would be difficult to devise a tax fairer or cheaper of collection.

I have here somewhere the estimate of receipts under the present bill, made by the House committee, which gives the customs revenue as \$267,000,000 and the internal revenue as \$322,000,000, making a total of \$589,000,000, while it is estimated that we shall collect \$70,000,000 from incomes. Taking the rule announced by the report, that the consumption tax is paid, I will not say almost entirely, but disproportionately, by the poor people of the country, is it to be said that we are unfair or punitive in our disposition when we undertake to raise the amount from \$70,000,000 when we are already collecting on consumption \$589,000,000?

A short time ago there was an estate probated in this country for \$87,000,000. The man who possessed that estate, in my judgment, did not pay as much tax to the support of the National Government as one of his employees who took care of his building. The employee undoubtedly paid all the way from 5 to 10 or 15 per cent of his annual income into the Treasury of the United States, while the man with the \$87,000,000 estate at that time did not pay nearly so much in proportion to his income, and under this amendment the percentage he would pay would not be in excess of that paid by the laborer who was in his employ.

When we take into consideration the fact that we are collecting \$600,000,000 upon consumption and only \$70,000,000 or \$100,000,000 upon property, can it be said that those who would increase the property tax are seeking to do so solely by reason

of a desire to punish some one?

Mr. WILLIAMS. The very men who are now seeking to increase the amount of revenue from the income tax have been seeking throughout this entire discussion to prevent us from decreasing the taxes upon consumption; that is, the tariff taxes upon the necessaries of life.

Mr. GALLINGER. And they did not succeed.

Mr. BORAH. The very men who are advocating an income

tax have done nothing of the kind.

Mr. WILLIAMS. I say, the very Senators in this Chamber who are now making these speeches, including the Senator from Idaho, who are now asking us to add to the revenues of the Government by increasing the income tax, have been criticizing Senators on this side of the Chamber for decreasing the taxes on consumption, to wit, for decreasing the import duties to a point which, in their opinion, was too low.

Mr. BORAH. Mr. President, one answer which I might make to that is that if it be true, nevertheless it is within the power of the Senator and his majority to decrease the tax upon consumption. You have the votes and it is no excuse that criticism may or may not have been lodged against you.

Mr. WILLIAMS. We have already done so.

Mr. BORAH. Notwithstanding our criticism, it is perfectly within your power to take the tax off clothing, all kinds of clothing, remit it in its entirety, and put them upon the free list. If you are correct in your position that that is the way to serve the people and you want to protect the labor of the country, or the men of limited means, you have the power now to take off that tax and to collect an equivalent amount by adding a percentage to the tax upon these large incomes. Why should you hesitate to do what you claim is justice?

Mr. WILLIAMS. Mr. President, the Senator from Idaho knows that although we have that power, it would be iniquitous, it would be foolish, it would be governmentally absurd, to attempt now to exercise the power to its limit. The Senator knows as well as I know that when you step into a condition where a false and artificial fiscal system exists, upon which industries have been built, you can not all at once remove all

taxes upon consumption.

As far as I am individually concerned, I should like to see all revenue raised by the Federal Government by an income tax and by internal-revenue taxes upon things which are either unnecessary or lead to vice. But when the Senator stands in his place and challenges Senators on this side to reduce still further the taxes upon manufactured products in this country, and then later on, or previously to that time, votes against us because in his opinion we have already reduced them too much, I leave him to cure the inconsistency of his own position.

Mr. BORAH. What particular schedule does the Senator have reference to when he says the Senator from Idaho voted against the reduction of the duty upon manufactured goods?

What vote? What duty?

Mr. WILLIAMS. Did the Senator from Idaho vote for any of the Democratic bills that were presented here at the last Congress which embodied substantially these schedules?

Mr. BORAH. The Senator made his charge as to this bill.

What schedule does he refer to?

Mr. WILLIAMS. The Senator just at this moment is criticizing nothing except the income tax, but here we had during the last Congress Democratic bills that were sent over here from the House, and the Senator, as far as my memory serves me, was in opposition to them by insisting that substitute bills offered by the Senator from Wisconsin [Mr. LA FOLLETTE] and by the Senator from Kansas [Mr. Bristow], which raised the duties, should take the place of the Democratic bills which the House had sent here, and the schedules in all those bills were substantially the schedules in this bill.

Mr. BORAH. Mr. President, we will confine ourselves for the present to this bill. What rate on a manufactured article has the Senator from Idaho criticized because it reduced the duty too low? The only criticism which the Senator from Idaho has made in the Senate this year upon this bill is because you did not treat the producer the same as you did the manu-

Mr. WILLIAMS. Did not the Senator during the last Con-

Mr. BORAH. The Senator asserted that the same Senators who were urging this income tax were the men who were criticizing that side of the Chamber because in this bill you reduced the duties too much. I ask the Senator the schedule the Senator from Idaho voted against where you proposed to reduce the rate on manufactured goods.

Mr. WILLIAMS. Schedule K came from the House of Representatives in the last Congress and in the opinion of the Senator from Idaho it cut the duties too low and the Senator from Idaho voted for the bill offered either by the Senator from Wisconsin [Mr. La Follette] or the Senator from Iowa [Mr.

CUMMINS], I have forgotten which.

Mr. SUTHERLAND. The Senator from Wisconsin.
Mr. WILLIAMS. He voted for the bill offered by the Senator from Wisconsin reducing the duty on the sugar schedule 333 per cent. The Senator voted for the bill offered by the Senator from Kansas [Mr. Bristow], which reduced it, I believe, about 29 per cent or 27 per cent, something less at any rate. The same situation confronted the Senator in connection with the other House bills sent here, and, so far as I remember, in every case he took a like course.

Mr. BORAH. Mr. President, the Senator has shifted away from the present bill and the charge he really made and desires to discuss what took place in a former Congress. It is true that I voted for the La Follette amendment. In my judgment, the La Follette amendment did not increase the burden to the consumer. But that is a difference of opinion. In my judgment it was more proportionate; it dealt more fairly as producer and the manufacturer. I repeat that the Senator from Idaho has never to his recollection in this bill complained of any reduction which the other side has made upon manufactured articles. It may be that where I voted for an entire schedule that would not be true, but where it was lifted into existence by itself I have not complained of that fact. I urge that the RECORD will bear me out.

Now, Mr. President, I said in my remarks two weeks ago that I knew it to be a most difficult thing to formulate an income tax, and I have not indulged in any criticism. The amendments which we have offered have been offered in good faith to perfect the income tax, assuming, Mr. President, that if we offered an amendment which really had the effect of equalizing the burdens as we believe they ought to be equalized the majority side would accept it in good grace and in good feeling, and not charge us with merely an attempt to play politics. As I look at it, there ought not to be very much politics in an income tax. If I were playing politics I would want something upon which I could unite the party of which I am a member. offered my amendment yesterday I found that I had about as many opposed to me on this side as on the other side, and I think if the caucus rule had been released I would have had fully as many with me on the other side as I had on this side.

There is one other feature of the bill which ought to be considered when we are considering the question of graduation, and that is the corporation tax. It is assumed, and it is argued, that the corporation tax is one of the taxes which is paid by property, by wealth, and does not rest upon the consumer; but we know from experience that that is not true-that a very large proportion of that tax is passed over to the consumer in an additional price upon the articles which he must buy. So when you take into consideration that you are collecting about \$600,000,000 through indirect taxation and a corporation tax, and add those together, we will see that we are collecting a very small portion of this tax from the property of the country. I do not think it is unfair; I do not think it is inequitable; I think it is just and that it ought to be adopted.

Mr. BRISTOW. Mr. President, the Senator from Mississippi [Mr. WILLIAMS] spoke of the opposition which those of us who are advocating an increase in the rate on the large incomes have offered to the reduction of certain duties in this bill. In my opinion, we could go through the bill, and if the Senator thinks this amendment of mine would bring more revenue than the Government needs, cut out duties that are levied upon noncompeting articles. Take the tax on bananas.

Mr. WILLIAMS. In other words, the Senator wants to cut

out those dutes where all the tax goes into the Treasury and

none of it goes into the pocket of private individuals.

Mr. BRISTOW. The Senator and I could speak probably all the remainder of the afternoon on the question of protection and free trade. I believe that a protective tariff is a good thing for the country. I do not believe it is a tax for the benefit of special interests or private individuals. I think it is a tax levied for the public welfare, for the purpose of developing our latent resources, and also for the purpose of providing and maintaining good wages for those employed in the production of the various commodities. The Senator seems to think that a vicious system of taxation. We disagree as to that.

But far from criticizing us for undertaking to increase the revenue exorbitantly, I was suggesting to the Senator how I would reduce the revenues on consumption and do it without interfering with the principle that he has laid down frequently in the Chamber; that is, not reducing duties that have been imposed for the purpose of protection more than they ought to be without demoralizing the industries that have grown up under such a stimulus. That can be done very easily by taking the duties off of noncompeting articles.

Mr. JONES. Mr. President, I merely want to suggest that frequently as we have proceeded with this bill the only reason given for retaining certain duties was for the purpose of raising No suggestion was made that we would disturb busi-

ness, but that we would have to have the revenue.

Mr. BRISTOW. Yes; the statement has been made time and again. I wish there was some way by which we could get a fair expression of the Senate on this amendment. I am going to ask for a roll call because I want to have it voted upon. believe it is right. I think it ought to go into this law. roll call will show that there are fewer Senators who believe in it than the facts would justify, but I do not know any way to induce men to vote for this amendment when they believe it is right, because they seem to be bound by a caucus agreement, which they think it is dishonorable to violate. If in levying

an income tax we are not justified in taxing the man whose income is \$100,000 a year as much as \$5,000 on that enormous income, then the theory of a graduated income tax, which is a theory upon which this bill is framed, is not worthy of consideration.

Mr. NORRIS. Mr. President, if I really thought the Senator from Mississippi [Mr. Williams] was serious in what is really a veiled charge that those who favor this amendment are not acting in good faith, I would feel considerably grieved. As far as I am concerned, there has been nothing so far proposed in the consideration of the bill that so completely appeals to my sense of justice and right as the amendment proposed by the Senator from Kansas. I have no disposition to legislate against or to criticize the man who is getting a large income. I have no prejudice against a man who is getting a large income. I have no fault to find with him. I do not see any reason why it should be said that because some of us believe that on very large incomes a larger rate of income tax should be charged than the bill proposes it should be said that we are not acting in good faith or that we are not moved by the highest and purest of motives.

Mr. President, every tax is burdensome; we all dislike to pay taxes; but it does seem to me that if we are going to levy an income tax-one that is not connected with the theory or principle of tariff-you may be a free trader or a protectionist, but your idea of an income tax is not affected one way or the other whether you believe or disbelieve in any particular theory of tariff. Though you may disagree on that side from us and favor a tariff for revenue or a free-trade tariff, the reasons that divide us on that proposition do not exist and can not exist when we come to the consideration of an income tax.

It is perhaps one of the fairest and best taxes in theory. is one that is very difficult to properly administer, but having decided to have an income tax it seems to me that we ought to go into it in good faith, with the idea of getting an income tax that is the fairest and the best we can possibly get, each man acting according to what he believes to be right in the premises.

I regret, therefore, that many men on the other side of the Chamber are bound by a caucus rule which on this question will prevent them from voting their true sentiments and voting for a principle in which they believe. If there was any justifica-tion to bind each other together on account of the theory of a tariff bill as to whether it should be a protectionist measure of a tariff for revenue that can not exist when we come to the consideration of an income tax.

The amendment of the Senator from Kansas appeals to me, because the heaviest levy of taxation is made upon the incomes that will feel it the least. The man with an income of \$100,000 can pay a tax of \$10,000 without feeling it nearly as much as the man who has an income of \$3,000 if he is compelled to pay The Senator from Kansas could have gone much further in levying the tax so that it would fall with least burdensome effect upon those who have to pay it.

Mr. WEEKS. Mr. President-

I yield to the Senator from Massachusetts. Mr. NORRIS.

Mr. WEEKS. During my service in the House at a time when an income tax was being considered a prominent Member of the House was discussing the question of a minimum amount to be taxed. At that time it was proposed to make the minimum \$5,000, and he said he would make the minimum higher than When interrogated as to where he would place the limit, he finally said that if he had his way when a man had \$100,000 income he would take a quarter of it; "yes," he said, " I would take half of it"; and added that the citizen would have enough left even if that were done.

Now, I would like to ask the Senator from Nebraska where we are likely to stop in the unequal taxation which is proposed in this income-tax provision, and I think the country would like to know where the limit is to be placed. to adopt the suggestion of the gentleman to whom I refer that eventually if a man has \$100,000 income we will take half of it, on the theory that he will have enough left, or are we to approach this subject in moderation and determine where we can get the most income with the least danger of unduly sacrificing reasonable equality in our system of taxation? Now, where is the limit at which we are to stop?

Mr. NORRIS. In answer to the Senator from Massachusetts I will say that the limit is very easy to determine under the amendment which is offered by the Senator from Kansas. It says that upon the excess of that part of an income above \$100,000 the tax shall be 10 per cent.

Mr. WEEKS. Suppose that next year we need additional

revenue, as we shall, are we going to double the limit?

Mr. NORRIS. "Sufficient unto the day is the evil thereof." When we reach that proposition, when we reach the time that |

we need a larger assessment, and if I have a vote on it, and if I thought under all the circumstances a larger tax ought to be levied, I would not hesitate to levy it either on the man who has a \$100,000 income or the man who has a smaller income.

Mr. BORAH. Mr. President-

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Idaho?

Mr. NORRIS. I yield.

Mr. BORAH. The Senator from Massachusetts asks if next year we need more money shall we increase the rate of taxation upon incomes. I desire to ask the Senator from Massachusetts if next year we need more money, and we are already collecting \$600,000,000 from consumption and from \$75,000.000 to \$100,000,000 from the property of the country, would the Senator from Massachusetts increase the tax upon consumption rather than take something from the large estates of the country, which would pay it without ever knowing that they had parted with their money?

Mr. WEEKS. Mr. President, that would lead to a very broad discussion of the principles of taxation, whether it is wise to get more by imposing additional internal-revenue taxes, whether we can impose to better advantage a stamp tax, or some other form of taxation. I should want to take all those questions into consideration in making my reply. But I do think the country wants to know where there is to be a limit to this form of taxation that is to be imposed on incomes, and whether in future we are to assume that when additional reve-

nue is required it shall be raised in this way.

Mr. BORAH. Mr. President, just a word. Undoubtedly the country is interested in knowing how much more taxes we are going to take either one way or the other, but it can not be possible that the country is more concerned about taking an additional tax from the incomes of the country than in not levying a larger tax upon consumption. It can not be said that the country understands that we are inequitable in starting out with the kind of an income tax proposed by the Senator from Kansas when we are already taxing the small incomes of the country, the labor of the country, from 8 to 10 per cent in many instances upon their incomes as the law now stands.

Mr. NORRIS. Mr. President, the question of the Senator from Massachusetts [Mr. Weeks] could be asked every day upon a proposition to tax anything to raise revenue anywhere. You could ask, Where is the limit going to be? Every man must know that there is no limit, and that when Congress, to meet an emergency, is compelled to raise additional money by taxation, it will find some way to fairly and honestly meet the

emergency.

Mr. LODGE. Mr. President-

Mr. NORRIS. In just a moment, if the Senator please. I want to go a little further on that line. I can say the same thing to the Senator. When we come to levy a tax on sugar or cotton manufactured goods or anything else in the schedule, the country wants to know what the limit is going to be.

The country wants to know where you are going to stop. far as this bill is concerned we are stopping with the amendment of the Senator from Kansas. If that amendment is unjust, if it is unfair, if the rate of taxation for the income of \$100,000 and over is too high, we ought to be honest enough, wise enough, and square enough to cut it down, but if we believe the rate that he has fixed in it is not unfair, that it is just and equitable, then we ought to support it. I support it because I believe that there is not any injustice in it, because I believe it is fair, because I believe it will not be a hardship upon the income of \$100,000 to pay the rate prescribed in the amendment. Now I yield to the Senator from Massachusetts.

Mr. LODGE. I want to ask the Senator if it is not true that there are a great many subjects of taxation on which there is a limit, and that is the limit of probable collection. For instance, take the internal-revenue tax on whisky and beer. There is a point at which if you make the tax sufficiently high our revenue falls off.

Mr. NORRIS. That is true. It is well illustrated in the case of diamonds. If you tax them too high you get no revenue,

Mr. LODGE. It is the same way with an import duty. You can make it prohibitory, as we did in the case of State bank circulation, when by the tax we extinguished the State banks. In a great many cases there is a natural limit on taxation. course, in this case there is no natural limit, because unless you have absolute confiscation you can hardly conceive of reaching a point where collection is not possible. The evasion of the tax, of course, can be increased.

Mr. NORRIS. I believe the suggestion the Senator from Massachusetts has just made does not really apply to an income tax because, as he very well says, the same condition does not apply that would apply, for instance, to the levying of an internal-revenue tax on beer or whisky or diamonds. But every time we are brought face to face with a proposition of levying such a tax it is for us to decide it, and it is our duty to decide it according to the best light and the best judgment that we have. It is no objection to any particular tax to say that at some other day, in some other year, in some other Congress, somebody may want to levy a higher rate. It may be that some other day and in some other Congress some one will want to levy a lower rate of taxation.

Neither in my judgment is it any objection to this amendment that it will raise too much revenue. The Senator from Mississippi [Mr. Williams] makes an objection on that point. He says they framed this bill along certain lines for so much revenue coming from every available source, and if we increase this income tax they will get more money than they need. If that is true, then it is a vindication of the caucus—that is, that after a chosen few have framed the bill and fixed it up to suit themselves no amendment should be offered, because of necessity it would either raise or lower the amount of revenue the bill would produce.

Mr. WILLIAMS. Mr. President, if the Senator will pardon me, I do not know that we ought to be insulted at being called

Mr. NORRIS. I did not offer it as an insult, I assure the

Mr. WILLIAMS. We may be few and we may be chosen, but we were at least chosen.

Mr. NORRIS. I think both those statements are true.

Mr. WILLIAMS. We were at least chosen by the American people.

I admit it.

Mr. WILLIAMS. And we have our responsibilities and we are going to carry them out.

Mr. NORRIS. I have no doubt that you will carry them out, no matter what may happen.

Mr. WILLIAMS. The chosen few happen to be the majority in this Chamber elected by the American people.

Mr. NORRIS. The chosen few who framed the bill are not a majority of the majority, but a very small minority of the

Mr. WILLIAMS. I beg the Senator's pardon. This is the first tariff bill in the history of this country where the bill was submitted to a full and free and fair discussion of every one of the dominant party in a free and fair caucus, where every man could be heard and where they merely obeyed the will of

Mr. NORRIS. It was the first bill, as the Senator says, in the history of the country where the bill was submitted to a secret caucus of the majority members of the House and then to the majority members of the Senate. There never was a Republican bill framed in a caucus and brought out with a

claim that therefore it should be adopted without the dotting of an "i" or the crossing of a "t."

Mr. WILLIAMS. There the Senator is mistaken. There never was a Republican bill which was framed by all the

Republicans in either House. Mr. NORRIS. That is true That is true.

Mr. WILLIAMS. However, that is true of this bill.
Mr. NORRIS. I have not contended to the contrary, but there never was a Republican bill that was framed in a secret caucus of the membership, particularly of this body. There were methods used that I condemned as much as the Senator does, and I condemned them when my party was in power. The Senator, however, condemns those measures when his party is in the minority and he defends them when his party is in the That is the only difference.

Mr. WILLIAMS. The Senator never knew a Republican bill framed by what he is pleased to call a secret caucus. I doubt if he ever knew of a Republican bill that was not framed outside of Congress

Mr. NORRIS. I doubt whether this bill was framed outside of the White House.

Now, if the Senator really means that, of course he knows, and he does not want to go to his constituents as asserting otherwise, that the President has taken no part in framing this bill except in connection with two items.

Mr. NORRIS. Yes; some of the principal items. I do not mean to say that the President went into every detail, or anything of that kind; but on the very important parts upon which there was a very great division of opinion and which were the crux really of the bill, the President, I presume, had more to do with the framing of this bill than any other person, and the caucus simply obeyed his will.

Mr. SMOOT. Mr. President—
Mr. NORRIS. I yield to the Senator from Utah.
Mr. SMOOT. I simply wanted to call the attention of the
Senator from Mississippi to the fact that the bill was framed
exactly the same as all the other bills have been framed, as far as the Senate is concerned. There have been importers and there have been manufacturers visiting here and visiting the subcommittees and making suggestions, and many of those suggestions have been acted upon and many of them have been rejected. That is the way all tariff bills have been framed.

Mr. NORRIS. Mr. President, I do not want to be diverted by going into the ways various tariff bills have been framed in the past. Since this matter has been brought up, however, I want to say, in passing, that, in my judgment, there never has been a tariff bill framed either by the Republican Party or by the Democratic Party that was framed along scientific lines.

There never has been a method adopted of framing a tariff bill by either party when it was in power that I believe was right. The method pursued in framing this bill is much the same as that pursued in framing all its predecessors. evidence was taken was taken from men who have a direct interest in the result of the legislation. There has not been either in this instance or heretofore the careful consideration along scientific lines that ought to be given to the making and the framing of a tariff bill.

In my judgment, it only illustrates what has always been illustrated by every tariff bill which has been presented to the Congress for consideration, namely, the necessity, before we can get a scientific tariff bill, of having a nonpartisan, permanent tariff commission to procure and furnish the absolute scientific facts and data upon which a just tariff bill can be built.

But, Mr. President, as I said a moment ago, that has nothing to do with the question now before the Senate. In my judgment, the man with an income of \$100,000 can afford to pay and will pay with less hardship upon himself the amount of the tax provided for in the amendment of the Senator from Kansas than can the man who pays the smallest tax and who has the smallest income. I believe that in fixing the income tax we ought to take into consideration the ability of the men to pay it, and let the burdens-and there are and always will be burdens in taxation-fall upon the shoulders of those who can best afford to bear them and upon those who will feel the effect the least.

Later on in this bill, if the Senator is afraid we are going to raise too much revenue, we will have an opportunity to cut down the revenues somewhat. For instance, we can well extend the exemptions provided in the income-tax section. I notice in this bill that while there is an exemption made in the income of a man who has a wife and two children, there is no greater exemption made for a man who has three or four or five children. We can well eliminate the clause that limits the exemption to families consisting of a man and wife and two children, and let the exemption be unlimited, let the burden fall where it will do the least harm, and where it will require the least exertion to

Mr. TOWNSEND. Mr. President, some things which the Senator from Nebraska [Mr. Norris] has said as reciting what the Senator from Mississippi [Mr. WILLIAMS] has stated makes it perhaps unnecessary for me to say anything, because the Senator from Mississippi has stated, according to the reference of the Senator from Nebraska, one of the reasons why I have felt that we are not prepared, or at least why I am not prepared, to vote for a change in the provisions of this bill so far as incomes are concerned.

I have believed that taxes should be levied only for the necessities of the Government, properly administered. Where the Democratic Party has made an estimate of the expenses that would probably be incurred during the next year and has made provision for raising the revenue to meet those expenses, it would seem that it would be most unwise for the Congress to vote to change the rates imposed in the income-tax section of the bill.

I recognize, of course, that the people of this country have adopted as an amendment to their Constitution, a provision which permits the taxation of incomes. I have no doubt that it is as equitable a method as can be employed for raising revenue; in many respects the most equitable. It is not, however, entirely without some danger. I think the most equitable way to impose a tax, if we are to eliminate the revenue derived from customs, would be to impose a tax upon all the people of the United States in proportion to their ability to pay it.

I myself think, Mr. President, that it may result in some danger to the Republic to provide that all the taxes of the Government shall be paid by a few, because the majority would not be subject to that tax, and yet they would administer the Government and appropriate the money; they would impose

the taxes and incur the expenses of Government.

Extravagance is one of the greatest evils that can come to any nation. I believe that history will disclose that it has been the cause of the destruction of more nations than any other cause. The temptation to extravagance on the part of people who do not meet the expenses of the Government, it seems to me, would be great.

Furthermore, Mr. President, I desire to say briefly, in answer to the statement made by the Senator from Mississippi, that, if he had his way about it, all the expenses of the Government

would be raised by a tax upon incomes.

Mr. President, if I may interrupt the Mr. WILLIAMS. Senator to keep him from misquoting me, I said by an income tax and internal-revenue taxes upon those things which are either unnecessary or lead to vice.

Mr. TOWNSEND. I stand corrected. I recall that that is

what the Senator said.

Mr. WILLIAMS. And in that connection, if the Senator will pardon me, I will say that the Senator from Idaho [Mr. Borah], in quoting the amount of consumption taxes at \$600,000,000, neglected to make the statement that about half of the taxes upon consumption were levied upon tobacco, whisky, and wineinternal-revenue taxes.

Mr. TOWNSEND. Mr. President, I have been in favor of a protective tariff because it made incomes possible. I have believed that there would be no incomes of any considerable amount in this country if we were to destroy the protective policy. Provided I and other Republicans are right about that, by its destruction we are going to interfere materially with

the business of the country.

I have not felt, Mr. President, that the tariff duties in all cases, or in a majority of cases, so far as that is concerned, taking all things into consideration, impose an additional bur-den upon the people. If by diversifying the industries in this country; if by increasing the business in all communities, we enlarge the opportunities for men to work and to acquire; if we make it possible for them to secure incomes, we, of course, make it possible for them to pay taxes, which all ought to pay

according to their ability to pay.

I submit that no man can be the best kind of a citizen unless he pays his share, no more no less, of the expenses of running We all feel small if we get into company the Government. where the other fellow pays all the bills; and those of us who are of moderate means hesitate about accepting favors from those who are better able to entertain, because we feel that we can not do the fair thing in return. So it is in reference to government itself. The man who helps to support the Government feels more interest in that Government and is a better citizen because he contributes to its support.

I understand, of course, that the income tax is a tax levied upon those who are best able to pay it. It has been adopted by the people, and I am in favor of it, but I submit, Mr. President, that, even so far as an income tax is concerned, I do not care to levy a tax in excess of the needs of government.

I do not know whether or not the rates contained in this bill are proper rates. I do not know that the committee understands how much revenue will be derived, but its estimate is that for the first 10 months under this bill they expect to receive \$58,000,000, which, I take it, will be something like \$70,000,000 during the 12 months.

Mr. SHIVELY. That will be in addition to the present excise

Mr. TOWNSEND. I understand that amount is to be raised from the income tax as provided in the bill. If we increase the rate on incomes without any regard to the amount of tax we are to receive, and the amount shall be in excess of the needs of government, will it not be a temptation to extravagance on the part of the Government? Is it the legitimate province of Congress to levy unnecessary taxes? It is not because I have any objection to the income-tax provision that I question this amendment. I would like to have it more generally distributed; I would like to have it apply to smaller incomes; I would like to know that even the man whose net income is \$3,000 a year pays something toward the expenses of this Government under this tax if all taxes are to be raised from incomes. Increase the rate if you wish on the larger incomes, but make the class of men who pay the tax as large as you can; distribute it equitably over as great a mass of the people as should equitably bear its burden, but be sure that you need the money before you levy it. Mr. BORAH.

Mr. President-The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Idaho?

Mr. TOWNSEND. I do.

Mr. BORAH. Does not the Senator from Michigan feel that a man who has an income of a thousand dollars a year pays his due proportion of taxes under the present indirect tax system without being taxed additionally?

Mr. TOWNSEND. With the suggestion the Senator has made I do not agree—that there are schedules in the pending bill where the duties on manufactured products are too high. I will say now that if I believed that a protective tariff simply taxed people on consumption, without compensating benefits accruing to the country directly and to him indirectly from it, other things being considered, I would be a free trader; but I do not believe in that doctrine; I do not believe that all tariff duties are necessarily burdens upon the American people.

Mr. BORAH. Mr. President, we have to deal with a situation as we find it. It has been stated repeatedly in this debate that the reason why our Democratic friends have not reduced indirect taxes is because they had to have revenue. That has been repeatedly stated. The majority undoubtedly feel that way, because, believing in a tariff for revenue only, they would reduce duties more if it were not for the fact that they thought that they had to have more revenue. Now, we have offered here a means by which they can reduce them more and test the principle upon which they were elected and put to the country the theory upon which they came into power without any excuse or apology whatever. We offer a means to get revenue. What excuse, therefore, can they have on the ground of revenue for not reducing duties, as they say they would, were it not a question of revenue?

Mr. TOWNSEND. I can understand how that might be a good argument to present to a Democrat, but it is not a good argument to present to me, because I do not believe, as a general rule, that the majority have kept duties too high. I am not in favor of reducing duties so low as to deny proper protection to legitimate American industries.

Mr. BORAH. Mr. President, if the Senator from Michigan had the power to shape this bill, I would feel that I ought to address my argument to him, instead of to the Democratic side; but they are making the bill, and I assumed, when they said that they could not reduce the duties because of the fact that they had to have the revenue, that they would accept in good faith a suggestion as to how to get the revenue. We have presented it, and now they say it will produce too much revenue.

Mr. TOWNSEND. But does the Senator from Idaho have any idea that even if we were to adopt the amendment offered by the Senator from Kansas the Senators on the other side would reduce the duties they have submitted to the Senate? We would have the same duties as are contained in the bill now, whether we increase the income rates or not, and I do not think we ought to unnecessarily increase the revenues. I do not know that anybody has any estimate of how much money would be obtained by the proposed amendment; I do not imagine that anybody knows how much would be raised by it, but certainly it would raise an amount in excess of what the Senators in charge of the bill say is required to meet the expenses of the Government during the ensuing year. Therefore, it seems to me unwise to increase the rates at this time. If there was a proposition now before the Senate to fix rates on incomes without any regard to other revenues which we are proposing to raise in this bill, it would be another proposition, and I would gladly support any properly prepared measure.

Mr. NORRIS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Nebraska?

Mr. TOWNSEND. I do.

Mr. NORRIS. I should like to ask the Senator, if it is true that he can not vote for this amendment because it would raise too much money, whether the same reasoning would not prevent him, for instance, from voting for a duty on sugar, which the majority has put on the free list?

Mr. TOWNSEND. No.

Mr. NORRIS. Would not that raise more revenue than the Government would need?

Mr. TOWNSEND. But there is a question involved in the sugar proposition that is not involved in this matter. Nobody is pretending-

Mr. NORRIS. I can see, I will state to the Senator, that there is a different theory involved; but, so far as the revenue of the Government is concerned, it seems to me it is the same. am not arguing that there is not a different principle behind it; I do not want the Senator to understand me as saying that. The theory, however, of protection or free trade is not involved in the particular motion made by the Senator from Kansas, as I understand.

Mr. TOWNSEND. There is where I differ from the Senator. If I thought it was not involved, I should like to consider the proposition; but it seems to me it is inseparably involved with

the tariff question before the Senate.

Mr. GALLINGER. Mr. President—
The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from New Hampshire?

Mr. TOWNSEND. I do. Mr. GALLINGER. The Senator will recall the fact that the Senator from Mississippi openly declared that if he could have his way he would entirely abolish import duties and raise revenue by an income tax and other similar sources.

Mr. BORAH. Well, Mr. President, may I ask the Senator

from New Hampshire a question?

Mr. GALLINGER. Certainly, if the Senator from Michigan will permit.

Mr. BORAH. I know the Senator from New Hampshire is

opposed to an income tax

Mr. GALLINGER. The Senator has no right to make that

statement. I expect to vote for the income tax.

Mr. BORAH. Then, I apologize to the Senator; I am very

glad to hear that.

Mr. TOWNSEND. I am in favor of an income tax, but I can not say that I am in favor of the amendment as here presented in connection with this tariff bill. I think the exemption is too high; I think we ought to begin lower down, with a very insignificant rate, if you please. You might reduce the rate to one-fourth of 1 per cent; but I should like to increase the number of people who are to be affected by this tax, knowing that they would thereby feel a greater interest in the Government; and especially do I want to do this in view of the statement of the majority that they are expecting the time will come, or may come, when from income and internal revenue taxes they may meet all the expenses of the Government. When, however, that time comes in this country the question of incomes will have solved itself, because when we reach the point that our markets are thrown open absolutely on equal terms to the whole world we will not have the incomes to tax.

Mr. WORKS. Mr. President, I am very much in favor of the amendment offered by the Senator from Kansas [Mr. Brisrow]. I favor it because I think it tends to equalize the burdens of taxation. A man with a large income can pay the larger amount imposed upon him as a tax with a great deal less burden than the man who receives a smaller income. If I believed it were intended or would have the effect to penalize the man who receives the highest income, I should be opposed to it, of

It is not a crime in this country to be rich; it is not an offense to receive a large income; but we should impose upon the man who receives a large income a greater responsibility and the requirement that he should pay a larger sum to maintain the Government.

I am not at all alarmed by the suggestion of the Senator from Michigan [Mr. Townsend] that we are going to get too much money to run the Government. If there is any danger of that result following, then I should like to see the taxes taken off of noncompeting goods, as proposed in this bill, which is in effect a direct tax upon the consumer. There are ample ways by which we can reduce the amount otherwise to be realized from this bill without injury to anyone and for the benefit of the consumer, and thereby equalize the amount that should be realized from the bill. So I am not very much impressed by that argument.

I am satisfied that it is only a matter of simple justice that the man who receives a large, sometimes a disproportionate, income should be compelled to bear a larger proportion of the burdens of government. There are a great many men in this country, Mr. President

Mr. WILLIAMS. Mr. President-

Mr. WORKS. Just one moment. There are a great many men in this country at present, and the number is increasing, whose income and the amount of money they have accumulated are a positive burden to them rather than a benefit. If we can take some of that away in such an instance and apply it to the maintenance of the Government, we shall be doing them a favor

rather than an injury.

Now I yield to the Senator from Mississippi.

Mr. WILLIAMS. Mr. President, I should infer from what the Senator from California has said that he thinks this bill does not already impose an increased tax on those with the larger incomes. Not only is it true that a uniform ad valorem rate would be a larger tax, measured in dollars and cents, upon the man with the larger income, but it is also true that in the provisions of this bill the rate is doubled and trebled as the income rises. It is doubled at one point of demarcation and trebled at another.

Mr. WORKS. Well, Mr. President, I agree with the Senator from Mississippi that the bill is drawn upon right principles, in my judgment, but I think the proportionate difference between the man who receives a small income and the one who receives a large income is not great enough under the bill as it is now framed. I think the amendment offered by the Senator from Kansas [Mr. Bristow] is very moderate in that respect, so far as it applies to those who receive an income of a hundred thousand dollars or more.

Mr. CLAPP. Mr. President, I listened with a great deal of interest to the Senator from Michigan [Mr. Townsend], and I feel, while I shall cordially support this amendment, and I think the amendment should be adopted, that the Senator from Michigan is entitled to support upon one point, which men rarely get in this day and age. I want to commend him for his courage in advocating the necessity of extending this tax further down the line.

I would not only make the tax heavy against the larger fortunes, because the larger fortunes can bear it, and I would put it on the precise ground that just as in case of war a man who is able to bear arms should go forth and bear arms, so in peace as in war the man who is able to maintain the Government and the burdens of government should bear those burdens.

I quite agree with the Senator from Michigan that there is danger if we leave the minimum amount of taxation too high. Of course, we should leave a certain exemption, as in almost every State, I think, there is an exemption allowed, not as a gratuity, not as an act of kindness or charity, but upon the theory that it is unwise for the public to exhaust the resources of those of limited means, and among other reasons, lest in the exhaustion of their limited resources they become a public bur-That is one of the grounds upon which the exemption rests, not only against taxation but against levies upon execution and If this minimum amount were raised and the burden upon the large fortunes increased, we would then begin, I think, see in this country a different view with reference to the Public Treasury.

The trouble in this country is that too many people seem to think that the Government is an identity, a person, possessed of income and revenue, out of which an endless and ever-swelling stream can pour, and yet come from no source whatsoever. If I had it in my power, I would reduce the tax at the customhouse to the point where it was only necessary as a matter of keeping alive those industries which require it. of the tax to run this Government I would take directly by a direct tax from the taxpayers, so that the taxpayers would come to more fully realize that every dollar wrung from the Public Treasury for the many propositions that we are to-day be-sieged to make appropriations for first came from their own If this were done, it would have the effect in this country to discourge the constant demand upon Congress for appropriations for those things which ought to be done directly by the people themselves, by whom it could be better done than through the function of government. For that reason I would retain the proposition of the Senator from Kansas [Mr. Brisrow] as to the man with the big fortune. I want to say that my observation teaches me that it is the men of independent means in this country more than the men of small means who are constantly insisting that great enterprises be taken over by the Government. Those people would then realize that every dollar appropriated by Congress came out of some man's pocket, and they would realize that it came out of their pockets. At the same time I would extend the limit further down, so that a greater proportion of men of moderate means, too, would realize that every dollar that came out of the Public Treasury first came out of their pockets.

Then, commending the courage of the Senator from Michigan, in proportion as you extend this tax down in the minimum amount collected, you would lessen the danger-and no man can shut his eyes to the danger in this country-of unwise expenditure if once we get the theory that only a few are to bear the burdens of taxation.

While I shall most cheerfully support the amendment proposed by the Senator from Kansas, I feel it was due to commend the courage of the Senator from Michigan upon one phase of his remarks.

Mr. GALLINGER. Mr. President, in response to a suggestion of the Senator from Idaho [Mr. Borah], I said that I should vote for an income tax. I had no hesitancy in saying that; but I shall vote for what I conceive to be a proper income tax, a moderate income tax, and I think that the proposition contained in the bill meets that view.

I am very much disturbed over the declaration made by the Senator from Mississippi [Mr. Williams], and doubtless shared in by other Senators, that, if he could have his way, he would entirely dispense with import duties and raise all the revenues of the Government from internal taxes, incomes, and other means of that kind. In my judgment, if the time shall ever come when that is an accomplished fact, I can see the wreck of the industrial world, so far as this country is concerned; and I shall never give my consent or cast a vote to bring about a condition such as I imagine would result.

This leads me to the further suggestion that, holding to that view, I am opposed to the amendment submitted by the Senator from Kansas [Mr. Bristow], because, in my judgment, it looks to the collection of too large a proportion of our revenues from direct taxation. I appreciate the arguments that have been made that we ought to commence moderately; and if the condition of the country, from war or other calamities or necessities, should require it, we can readily increase the rates of direct taxation.

That is all I care to say about the matter. I never have brought myself to believe that an income tax is an unjust tax, and to-day I cordially give my assent to the proposition that, supplemental to the duties that are imposed in the bill under consideration, an income tax is a very proper mode of raising additional revenue.

I will add that I have thought, along the line suggested by the Senator from Michigan, that we might well commence at a lower point than this bill commences. I believe it will make better citizens of all our people if they contribute something to the support of the Government. But I apprehend that that can not be done under existing conditions. That being the fact, I think the limit set by the committee is as fair as we could reasonably expect.

I wish to add that in saying that I shall vote for an incometax provision, I mean that I shall vote for it if it is presented to the Senate as a separate proposition. If it is presented to the Senate as a part of the bill under consideration, I shall feel constrained to vote against the entire bill.

Mr. BORAH. Mr. President, the Senator from Michigan [Mr. Townsend] and the Senator from Minnesota [Mr. Clapp] seem to proceed upon the theory that the man of limited means, the man with an income under two or three thousand dollars, does not at this time pay a sufficient tax to interest him in the question of economy. I differ with them. I think that man feels his tax now and would be quick to support real economy

Mr. CLAPP. Mr. President, will the Senator pardon an interruption?

Mr. BORAH. Certainly.

Mr. CLAPP. The difficulty with the tax that he now pays, whether he be rich or poor, is that it is an indirect tax which he does not feel and he does not realize that he is paying it, and hence is not watchful as to its expenditure. In proportion as the direct tax is increased in the form of an income tax, it will naturally follow, or it should follow, that the amount of indirect tax that he pays will be decreased.

Mr. TOWNSEND. Mr. President, if the Senator from Idaho will pardon me, my discussion was on the proposition laid down by the Senator from Mississippi [Mr. Williams], and reiterated by others, that this is the beginning of a plan to abolish all by others, that this is the beginning of a pair to about an indirect taxes, except, perhaps, internal-revenue taxes, which would not fall upon all of the people, and that we are starting here to-day upon a scheme which probably will endure for years, probably as long as we have taxation. I should like to have it start right. I think the Senator will agree that if there were no other method of taxation than the income tax, that tax should be equitably spread over as many of the people as pos-

Mr. BORAH. I agree with the proposition that if we were collecting all our taxes by direct methods we should begin I agree fully with the proposition with a very low exemption. that every man should contribute something to the support of the government under which he lives. I do not, however, agree with the proposition which seems to be thrown out by the argument of the Senator from Michigan, and so well indorsed by the Senator from Minnesota, that the people who belong to the class which would be exempt are not already bearing a sufficient burden to interest them in the question of econ-I know that there may not be as much pain administered to them as otherwise there might be by reason of the fact that it is an indirect tax; but I think we can administer the pain in some other way than that of putting more taxes upon them

I desire to quote a statement made by John Sherman, who was not noted as a radical in his day and who was a very

strong advocate of the protective-tariff system. It was made in the last days of his life. I think the declaration which I quote is from a speech, but he reiterates it, practically, in his autobiography.

He says:

The public mind is not yet prepared to apply the code of a genuine revenue reform, but years of further experience will convince the whole body of our people that a system of national taxes which rests the whole burden of taxation on consumption and not one cent on property or incomes is intrinsically unjust. While the expenses of National Government are largely caused by the protection of property, it is but right to require property to contribute to their payment. It will not do to say that each person consumes in proportion to his means. This is not true. Everyone can see that the consumption of the rich does not bear the same relation to the consumption of the poor that the income of the one does to the wages of the other. * * As wealth accumulates this injustice in the fundamental basis of our system will be felt and forced upon the attention of Congress.

I know that it has been said many times since the income-tax matter came under discussion in the last four of five years that those who are advocating a large exemption are doing so because they are playing to a popular vote. They refuse to answer the proposition that at the present time the same class whom we would exempt are paying in other forms of taxation a larger percentage of their incomes than anyone contemplates levying as a tax upon income. I agree in a measure with the doctrine announced by the Senator from Michigan with reference to protection; but the Senator from Michigan will not contend that there are not many instances in which the burden of the tax does reach the consumer. When you take the duties together with the excise taxes quite enough reaches the con-

Mr. TOWNSEND. Mr. President—
The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Michigan?

Mr. BORAH. I do. Mr. TOWNSEND. If my attention can be called to any item in the tariff bill where the burdens upon the consumer are not more than offset by the benefits which come from protection of the industry for which the duty is levied, I will vote to put it on the free list. No such item has been called to my attention. If it is called to my attention, as I say, I will vote to put it on the free list.

I have voted for these protective duties on the theory that the maintenance of the industries helped the consumer in this country and every other person in this country by making it possible for him to obtain higher wages and better prices for his products, and thus maintained a better condition of living. If that is not true, if there is a single item that the Senator can bring to my attention as to which it is not true, I desire to vote to put it on the free list.

Mr. BORAH. The Senator says that the tax which does reach the consumer is offset by the general prosperity which it gives to the country. I think that is a correct principle, from the protective standpoint. But it then becomes a matter of speculation as to how much the consumer is benefited by the general prosperity of the country, in which the people who have these large incomes also share. So that which benefits him, the indirect method by which he is aided, is also building up and is beneficial to those whose incomes we now propose to tax. But the amount the laborer, for instance, consumes and uses, in proportion to his income, is wholly disproportionate to the income which we would tax, although the man with the large income gets the benefit of the general prosperity the same as the man with the small income.

Mr. TOWNSEND. If the Senator will permit, I quite agree with that proposition. I do not know of anything that I have said that disputes it. The only difference between the Senator and myself on this proposition is that he would fix, for instance, higher than the committee has fixed, which has recognized the difference between the small income and the large income. The committee has proposed a rate of 1 per cent, for instance, with a maximum of 3, if I remember correctly, or possibly 4. The pending amendment makes that difference greater, and fixes it between 1 and 10.

Mr. WILLIAMS. I just want to correct the Senator for a moment, and incidentally to correct a statement which I made inadvertently awhile ago. The Senator must remember that the normal tax runs clear through, from the lowest to the highest taxable person. Then the additional tax begins at 1, which doubles the normal, and then adds 2 per cent, and finally it gets in 3 additional per cent, which is quadrupling instead of tripling the original tax.

Mr. TOWNSEND. I understood it so.
Mr. WILLIAMS. I made that mistake, and I want to cor-

Mr. TOWNSEND. I desire to say to the Senator, to make myself clear, that I am not opposing, nor have I said one word that could be construed as opposing, the proposition to make the tax on the larger incomes greater than on the small incomes. The thing I was discussing, obiter dictum—because it is not in the bill, and it will not be considered here—was the question of reducing the exemption, making it still smaller, and the other question as to whether the proposition submitted by the Senator from Kansas to increase the tax to 10 per cent would bring about more justice and subserve the best interests of legislation at this time, all other things considered. Those are the only questions I have been discussing.

Mr. BORAH. As I understand the Senator from Michigan, he desires to reduce the amount of exemption, which of course is not a practical proposition at this time, because he desires to reach a class of people who ought to be reached in order that they may know that they are contributing something to the support of the Government. I agree with the Senator that if we were collecting all our taxes by direct methods, that is a perfectly just and fair proposition. But the point which I make is that the man whom the Senator wishes to reach has already been reached. He is paying more than his proportion now, and one of the very objects of income tax is to equalize burdens, equalize taxes.

Mr. TOWNSEND. Is the Senator, then, agreeing that we have started out on that proposition now, and that we ought to start right by passing this bill? We have adopted a proposition which will eventually lead, according to the Senator from Mississippi-and I believe it is the opinion of Senators generally that if this is a success it will finally lead-to an abolition of all direct taxes, unless possibly it be the internalrevenue tax; and ought we not to begin right? I thought \$3,000 would be none too low an exemption.

Mr. BORAH. But so long as we are collecting \$600,000.000 a year in the other way we have not really begun to collect our taxes by the direct method. We are collecting about one-eighth of them by the direct method and the rest by the indirect When we arrive at the time that we are collecting seven-eighths by the direct method and one-eighth by the indirect method, undoubtedly we should reduce the amount of exemption to a very low figure. But so long as we are not doing that, it can not be justly said that those who are in favor of raising the exemption are doing it through a desire to exempt some people from taxation. We do it upon the theory that we believe it can be demonstrated beyond all question that those people are already paying their proportion of the taxes; yes, far more than their proportion.

One individual in this country is represented to receive an income of \$12,000,000 a year. He lives most of the time abroad. In my judgment, he does not pay as much toward the support of the National Government under the present laws as one of his employees. When this bill shall have passed, even with the amendment of the Senator from Kansas, he will not pay as much out of his income, proportionately, as the man who is working for him.

It is upon that theory that we are in favor of the exemption and not for the purpose of relieving anybody from the burdens which everyone ought to bear in reference to taxation. If I thought that it was untrue that men of limited means are paying more than their proportion I would look at this question exemption and graduation in an entirely different light.

Mr. SUTHERLAND. Mr. President, when the Senator from Idaho [Mr. Borah] was discussing this subject a few days ago I took the liberty of suggesting to him substantially the same thing suggested by the Senator from Michigan [Mr. Townsend] this afternoon and concurred in by the Senator from Minnesota [Mr. Clapp]. I have felt that it was a wise thing to provide in an income tax for an exemption very much lower than that which is provided by this bill. I should not tax the very lowest income that a man earns. I should not begin at \$600, or per-haps at a thousand dollars; but I think it would be very well if the exemption were to begin at \$1,200 or \$1,500—\$1,500 at the outside. The danger of this income tax, as I see it—and I entirely agree with what Senators have said as to the justice of it-is that you will collect your tax from a limited few in number; not in ability to pay, but a limited few in number; and therefore the vast majority of the people of the country, so far as that tax is concerned, will have little direct interest in its expenditure. I think it is a very good thing that a large number of the people of the country should feel an interest in the expenditure of the revenues of the Government, in order that their influence may operate as a check upon extravagant expenditures.

The Senator from Idaho has said that we are already imposing all, or substantially all, our taxes upon consumption, and that it is not a wise thing to do; that we ought to begin to

impose direct taxes. I think the Senator overlooks or ignores the fact that in this country we have a dual system of government. At the same time that the Federal Government is collecting taxes the State governments are collecting taxes. That is a condition which does not exist in many of the countries which have income taxes. Notably, of course, it does not exist in England, and it does not exist in France.

Under the dual system which prevails the bulk of the taxes imposed in the States are of the direct character. They are upon property; they are in some instances upon incomes; they are in more instances upon the estates of decedents, and in various ways they are of the direct form. It is true that the Federal Government, generally speaking, imposes its taxes in an indirect form. But when we come to consider the whole field of taxation, as divided between the two classes of government, I undertake to say that a very much larger sum is raised from the direct form of taxation than from the indirect form.

The proposition made by the Senator from Kansas [Mr. Bais-Tow] strikes me as being a great deal more scientific in its classification than that proposed by the bill. It has seemed to me all the way through that there was rather too large a gap between the several amounts upon which the tax is graduated. We jump from \$20,000 to \$50,000, and from \$50,000 to \$100,000. So, as I have said, I think the scale proposed by the Senator from Kansas is more scientific in its character, and I should support it if it were not for one consideration. That is that I do not know, and I do not think anybody knows, how much more the scheme proposed by the Senator from Kansas would put into the Treasury. I should like to know whether it would put into the Treasury an additional fifty million or seventy million or one hundred million dollars, or what it would do, before I give it the assent of my vote. It is estimated by the committee that the tax proposed by it will put into the Treasury about \$70,000,000.

Mr. WILLIAMS. That is the estimate for this year, but it covers only eight months of this year.

Mr. SUTHERLAND. Then it would be more for the full

Mr. WILLIAMS. It is estimated that it will be \$100,000,000 n year.

Mr. SUTHERLAND. Yes. If that be true, I should not want to add materially to it. We are not imposing an income tax for the purpose of punishing anybody. We are not imposing it for the mere sake of making it a burden upon anybody. We have no right to impose a tax upon anybody, rich or poor, unless the Government needs the tax; and I am not persuaded that the Government needs any revenue in addition to that which is proposed by this bill.

Another consideration is that in the past this form of taxation has not been indulged in to any great extent by the various States. It has been used to some extent. I do not recall just how many States in the Union impose income taxes, but they are comparatively few in number. Perhaps there are four or five or six or eight of them. I think that has been generally because of the difficulty of collecting such taxes. There has been a sort of feeling that a tax of this kind would be evaded, that it would lead to perjury. There has been a great deal of talk of that sort, and many States have been dissuaded from imposing the tax for those or other reasons. But if the Government of the United States shall impose an income tax which shall prove successful in collection I have no doubt that the various States of the Union, which are continually reaching out for new subjects of taxation and which are continually needing new subjects of taxation, will in a very large measure adopt the income tax as a part of their fiscal system.

Mr. GALLINGER. Mr. President—
The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from New Hampshire?

Mr. SUTHERLAND. I yield to the Senator.
Mr. GALLINGER. The Senator is correct in saying that a
very small number of the States have imposed income taxes, and I think he is equally correct in saying that for some reason or other they are not made operative. For instance, the State of Massachusetts has had an income tax for a long time, but I think it is safe to say that no money is collected in that State under the terms of that law. I want to add that I hope the Federal income-tax law will be enforced more rigorously than the State income-tax laws seem to be enforced at the present time.

It seems to me the Senator must be misinformed when he says that the tax rate in Massachusetts is imposed upon only 15 or 20 per cent of the personal property. That strikes me as being extraordinary.

Mr. BORAH. If I am mistaken, it is due to a report made by the tax commissioner of Massachusetts.

Mr. GALLINGER. It simply can not be so.

Mr. SUTHERLAND. However that may be-and I do not know what the situation is in Massachusetts-for some reason or other the various States have not favored income taxes in the When it is demonstrated, as I believe it will be, that a tax of this character can be collected, and when the disclosures are made that will be made as the result of putting such a law into operation, I have no doubt most of the States of the Union will follow the same form of taxation; and if that be done, nobody can foresee to what extent incomes are going to be taxed. I think it is the part of prudence to proceed with some caution in beginning to formulate this scheme of taxation. As a general feature of revenue taxation it is new in this coun-We imposed it at one time as a war measure and at a later time as a part of a general scheme of taxation, but that was soon declared to be unconstitutional, so that it did not become effective. But, so far as its enforcement and operation are concerned, it is substantially a new departure for the Government, and I think it is the part of wisdom to proceed with some degree of conservatism until we shall demonstrate whether we need the additional tax and until we see how far we ought to go in imposing this class of taxation. But, as I say, while I think the general scheme presented by the Senator from Kansas, if the rates had been reduced, would have been preferable to that proposed by the bill, for the reason stated I shall feel constrained to vote against his proposed amendment.

Mr. CRAWFORD. Mr. President, in considering an amendment to a general statute like the income tax it is a little difficult to exclude a general survey of the bill beyond the more narrow question relating to the specific amendment. It may be that if we were to adopt the amendment proposed by the Senator from Kansas [Mr. Bristow] and were to make no corresponding reductions in other parts of the income-tax provision, we would get more revenue than we need. But it seems to me that we ought to adopt the amendment offered by the Senator from Kansas, and we ought to make some corresponding changes that would remove the probability that it would produce an unnecessary surplus. I am not in sympathy with the entire elimination of all distinctions between the character of incomes with which you are dealing. I think it is fundamentally wrong to place the salary which is earned by a professional man, a college educator, a genius who is contributing his service, giving his brain and his ability to serve his fellow men, on the same basis that you put the income that is enjoyed by a favored child of fortune whose parent has left him great property and who is a drone and an idler, doing nothing for his

I do not believe we should put as much of a burden upon the income of the first class named as we do upon the income of the other. England does not do it. I was just reading from the work of Prof. Seligman on the Income Tax, where he quotes from Chancellor of the Exchequer Asquith in a budget speech he made in 1907 where he distinguishes between what he calls the earned income—that is, the income that is actually earned by the man following a vocation or practicing a profession-and what he calls the unearned income, which is simply the receipt which some man enjoys from the rental of property inherited by him; and there is a wide distinction made between the two. If this amendment should carry, I shall offer an amendment

which I will ask the Secretary to read. It is hard to discuss one of these amendments alone without its relation to the other

The VICE PRESIDENT. The Secretary will read as re-

The Secretary. On page 172, after line 16, add the following

Provided further, That in computing net income under subdivision 1 of paragraph A of this section there shall also be deducted the amount, if any, which is claimed and proved by any individual to have been immediately and directly derived from the personal exercise by him of a profession, trade, or vocation.

Mr. CRAWFORD. That is taken from subdivision 3 of section 19, paragraph 7, of the English income-tax law, where they except from the other classification of incomes the income immediately derived by the individual from carrying on or the exercise of a profession, trade, vocation, and so forth.

Just imagine the number of people in the United States who when they leave this earth will practically leave to their families nothing except some life insurance and perhaps a little home, who while they are alive are actively, unselfishly engaged in the practice of a profession-in medicine, surgery, law, Here and there men earn an income that would be taxable under the first subdivision of the bill, and they are put in exactly the same class with the good-for-nothing idler who is not even an ornament, and who lives to dissipate and waste himself and be an injury to others. The English draw the line there, and I think we ought to draw it there, and if you do thing toward the Government. But I tell you he does, and it is

that you will materially reduce the receipts in another direc-

Mr. CUMMINS. Mr. President-

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Iowa?

Mr. CRAWFORD. I'do.

Mr. CUMMINS. Simply for information. I supposed that England made a difference between the earned incomes and unearned incomes, but my information has been that the earned incomes were not entirely exempt.

Mr. CRAWFORD. Oh, no; that is true.
Mr. CUMMINS. The Senator from South Dakota would Mr. CUMMINS. The Senator f exempt the earned incomes entirely.

Mr. CRAWFORD. Not from the second subdivision. They

run up until they come within this additional income provision.
They are taxed. I think the Senator will find it so.
Mr. CUMMINS. I did not so gather from the reading of the

proposed amendment. Possibly I am wrong about it. Then I understand the Senator from South Dakota simply means to except the earned incomes from the surtax or the additional tax? Mr. CRAWFORD. Practically all incomes that are earned

from the following of professions and vocations and personal efforts I would exempt until they reach the point of the additional tax.

Mr. CUMMINS. You propose that they shall all pay, above \$3,000 up to \$20,000, 1 per cent? Mr. CRAWFORD. No; I do not.

Mr. CUMMINS. I do not exactly understand what the Sen-

ator's amendment proposes.

Mr. CRAWFORD. The purpose of the amendment is to practically exempt these incomes personally earned until they come within the class where you have the graduated tax.

Mr. CUMMINS. That begins at \$20,000. Let me ask if the Senator from South Dakota proposes to make these earned incomes after they reach \$20,000 taxable?

Mr. CRAWFORD. I propose to subject them to this additional tax.

Mr. CUMMINS. But incomes are to be exempt from 1 per

cent until they do reach \$20,000? Mr. CRAWFORD. Yes; the additional tax. Mr. CUMMINS. It means, then, that all below \$20,000 are to

be exempt? Mr. CRAWFORD. Exactly; where earned in personal serv-

ice, trade, and vocations where no property income is involved. Mr. CUMMINS. Does the Senator have any idea about what part of the proposed revenue would be taken away by the amendment?

Mr. CRAWFORD. I only know, as the rest of us, by a general estimate of it. I think it would be considerable, and I think we could well afford to make it up by putting the tax upon the large property incomes and even by securing an additional revenue through an inheritance tax.

Mr. CUMMINS. I am entirely in sympathy with the proposition made by the Senator from South Dakota that there ought to be a difference in the rate of taxing the earned incomes as distinguished from the unearned incomes. I would have to reflect a little before I would be willing to exempt them to the extent suggested by the Senator from South Dakota.

Mr. CRAWFORD. I wanted to get this question before the Senate, and I offered the amendment in connection with the other for the purpose of getting it before the Senate. Mr. President, take a surgeon over at Johns Hopkins or in Chicago, or go out to the hospital where the Mayo brothers operate in Minnesota; take this class of men and see what they are doing for their fellow men, and see what they are contributing every day of their lives to human happiness. These men have large in-comes, but many of them spend it like princes and die poor. They give it to charity and benevolence, and contribute of their genius to their fellow men and die poor. You could go into nearly every field where men of that type are serving humanity, and whatever field it may be in which their gifts enable them to serve they enjoy large incomes, but they think little of what they may save and tie up in trusts and leave to their children to spend and waste and dissipate to the fifth generation that may follow them. The men who have this power and who are earning five, ten, fifteen, and twenty thousand dollars a year are a class of men who should be encouraged to go on doing the kind of work they are doing. I think if we must raise the money, if it is necessary, it ought to be raised by imposing an additional tax upon the receipts from dead property.

I am absolutely in sympathy with what has been said about every man carrying his share of the burden. I believe that a man who has only a roof over his family and who is earning not fair to him to intimate in any manner, shape, or form that he does not. At least, so far as I am acquainted with him he does. He may pay only a poll tax or a road tax or a school tax, or he may work it out on the streets. But I tell you when you come to measure what it means to him in loss of time and in whatever way he does it, you need not worry about his not doing his share. If he lives in the country, he is paying a civil township tax and he is paying a road tax and he is paying a school tax in the little township in which he lives. If he is living in a village or a municipality, he is contributing to that and he is contributing to the State. He is not drawing a fine distinction when he is making these payments as to whether it is going into the township fund or into the county fund or into the school fund or into the State fund or into the Federal Treasury. As a simple, honest soul who is serving his generation in his way he is contributing to the extent he ought to be asked to contribute to the orderly support of government, and he does not divide it with nice distinctions,

I am not worried about such a man being benumbed and indifferent and reckless and anxious to waste the public money because he thinks somebody else is paying the bill. I have no fear of that whatever. I think I know that man too well in this country to have much fear that there is danger from him.

I am in favor of this amendment, and I am in favor of placing in this statute a distinction such as there is in the English statute. I believe we ought to do it. It is not with the idea that we should make some attack upon great estates and great incomes for the purpose of having a redistribution of wealth here, but we must all know and understand that there is a feeling, and a sincere feeling and a well-founded feeling, in the country that they do not bear as large a proportion of this burden as they ought. I do not think they do. I do not believe that we are imposing any unfair and unjust burden upon them by an amendment of the kind and character of the one I of-If the committee thinks it ought to be examined carefully for the purpose of having it weighed in its relations to other provisions of the bill and put into the framework so that it harmonizes with its purposes, I think myself it ought to go to the committee for that purpose. I do not believe it is a matter so hedged about with difficulty and impossibility that the committee can not take it and put it into the bill. Change the rate if you think it is wrong, but put it into the bill and say in this legislation that we distinguish the difference between the earning power of an active force for service in society and the income from dead property.

Mr. BRANDEGEE. I should like to have the Secretary read the amendment offered by the Senator from South Dakota [Mr. CRAWFORD] once more so that I can note it accurately.

The VICE PRESIDENT. The amendment will be read. The Secretary. On page 172, after line 16, add the following

Provided further, That in computing net income under subdivision 1 of paragraph A of this section there shall also be deducted the amount, if any, which is claimed and proved by any individual to have been immediately and directly derived from the personal exercise by him of a profession, trade, or vocation.

Mr. TOWNSEND. I should like to ask the Senator from Kansas [Mr. Bristow] if he has made any estimate as to how much revenue his amendment will produce?

Mr. BRISTOW. I have said that I do not know. No one can tell. My judgment is that the estimate of the committee in the report that the proposed law will bring \$70,000,000 in revenue is extravagant. I do not think it will bring anything like \$70,000,000. My guess would be that this amendment of mine would bring from \$70,000,000 to \$100,000,000, somewhere near that amount; but, of course, the committee that prepared this estimate would disagree with me.

There is no data upon which you can base an estimate with any accuracy. To illustrate, it is estimated here that there are people in the United States with an income of over \$1,000,000 per annum. As to how much more than \$1,000,000 per annum or whether there are 100 or less is an estimate that must be based upon very inaccurate information, because there is no reliable information that is available.

Mr. BORAH. Not only that, but so far as this surtax is concerned it must all be collected upon the showing of the man who is going to pay the tax. It is not collected from the source; it must be collected upon his showing that he has an income of that kind. In estimating this revenue upon the income which he has you fall far short when you come to get the money from the income which he will turn in.

Mr. TOWNSEND. My object in asking the question of the Senator from Kansas was to find out whether he had taken any steps to determine what change his amendment would make in the revenue proposed by the bill. It would seem to me that

that is quite an important matter. It is a decisive matter with me, and I should like to have some information on the subject. I thought possibly the Senator might be able to make at least a fairly accurate estimate of the amount.

Mr. BRISTOW. It is absolutely impossible for any man living to make an accurate estimate. Experience is the only thing that will determine it, because, just as the Senator from Idaho [Mr. Borah] has stated, and it is in harmony with our experience when we collected the income tax during the war, it is a tax which men seek to evade. It is a difficult tax to collect. There is no doubt but that it is the most difficult tax to collect that we levy

Mr. TOWNSEND. Suppose the bill with the Senator's amendment should produce \$200,000,000 instead of \$70,000,000 or \$100,-000,000, as estimated by the committee, would the Senator still insist that the amendment ought to be adopted?

Mr. BRISTOW. I think that is an absolutely ridiculous presumption. There is nobody who has studied the question for an hour who would believe that it would produce any such amount.

Mr. ROOT. Mr. President, I think the Senator from Kansas [Mr. Barstow] is unduly pessimistic about the collection of the income tax. I think the experience of the countries that have had an income-tax system for a considerable period is that gradually, year by year, it becomes easier and easier to collect. I do not think it is going to be such a difficult tax to collect. With the provisions for payment and with the gradual placement of the comparatively small number of persons who are to pay a surtax, I think that we may reasonably expect that within a short period the income tax will be readily and easily collected with but little injustice and but little injury or inconvenience to the people who have to pay it.

I quite dissent from the idea that the income tax must be permanently and continuously a vexatious and inquisitive and perjury-breeding measure.

Mr. BRISTOW. The Senator from New York has assumed that I said that the collection of the tax would be a permanent difficulty. I did not go that far; but the Senator from New York knows that when we were collecting the income tax during the Civil War it was a very difficult tax to collect. I agree with the Senator that in countries where it has been a continuous system of taxation year by year they have greatly improved the methods of taxation until they have developed by experience a system that has become satisfactory.

May I say one other thing? I do not take so much interest in these questions about just how the gradation shall be established, because I think we are entering upon a new field for us and we have got to get experience; we have got to find out how this provision and that provision and this rate and that rate will work and what the result will be. I do not know but the arrangement which the committee has reported is just as good an arrangement to begin on as any One thing we can be sure of is that after a few years we shall know a great deal more than we do now, and we shall probably have to perfect, modify, and improve a great many of the provisions of the law. I do not really feel as if it were particularly useful to try to get a finality in what we are now We can get that only as the result of experience.

Mr. CUMMINS. Mr. President-The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Iowa?

Mr. BRISTOW. I yield. Mr. CUMMINS. The Senator from Kansas very properly refuses to be led into an estimate that he is willing to authenticate; but, assuming that the bill before us will produce \$70,-000,000 a year or \$100,000,000 a year, it is easy to see that the amendment suggested by the Senator from Kansas will not lead us into any wild accumulation of money. For instance, the tax on incomes up to \$10,000 remains the same. Our ob servation teaches us that very much the larger aggregate of incomes in this country is made up of incomes of \$10,000 or Therefore, we begin the estimate, I think fairly, with the assumption that more than half, I would say-it is purely an estimate, of course—but I would say three-fourths of all the taxes upon incomes remain the same under the amendment of the Senator from Kansas as in the bill reported by the committee. Then the increase runs in this way: From \$10,000 to \$20,000 the tax would be \$270 under the amendment and \$170 under the bill, and so on. If, therefore, it can be assumed that the bill will raise \$70,000,000 or \$100,000,000, it can justly be assumed that the amendment will not increase the entire collection beyond a fair contribution to the Treasury of the country.

Moreover, Mr. President, if the Senator from Kansas will yield to me a moment further, the important thing here is to fix the ratio of tax correctly in the beginning; that is far more important than to fix the amount of the collection correctly in the beginning. If the distribution of the burden under the amendment proposed by the Senator from Kansas is fairer and better than is the distribution as proposed by the committee, we ought to adopt it, for if it be found by experience that it raises more money than we need it is the easiest thing in the world, in the light of that experience, to reduce the percentage of taxation upon each of these classifications; but if we begin with the adoption of an unwise proportion we shall find it much harder in future to change that proportion. Therefore it seems to me that every consideration leads to the adoption of the amendment, provided we believe that the distribution is better in the amendment than it is in the bill. I believe it is better.

If I had my way about it, I would make the disparity still greater than in the amendment; that is to say, I would make the lower tax lower and the higher tax higher than here. The Senator from Utah [Mr. SUTHERLAND] suggested an important fact, and it was emphasized by the Senator from South Dakota [Mr. CRAWFORD]. The tax levied by the Government of the United States here is a pittance as compared with the taxes which the people of this country must pay. In my own municipality-and I have vast pride in it; I think it is as well governed, as well regulated a community as can be found in the country-the tax last year was something like 2 per cent on the value of all the property. That was made necessary because we are a progressive community and we expend a large amount of money in order to bring to the people those advantages and benefits which come from great development. Here when it is proposed to levy a tax of 10 per cent, not upon the value of property, but upon the income of property of those who enjoy incomes of more than a hundred thousand dollars, it is characterized as radical and as indicating a feeling of enmity toward those who possess such incomes. That charge is unjust and unfair. It is a very moderate, conservative suggestion, as I look at the whole subject.

And, again, may I remind the Senator from Michigan and

the Senator from Minnesota

Mr. SUTHERLAND. Mr. President, I caught rather imperfectly what the Senator from Iowa said. I do not know whether he was referring to something I had said or not.

Mr. CUMMINS. I was referring with great commendation to something the Senator from Utah had said, namely, that under our dual system of government the taxes paid for the support of the Federal Government constitute but a small part

of the general burden of taxation.

Mr. SUTHERLAND. To that part of it, of course, I have no objection. I am always glad to have the commendation of the Senator from Iowa, but it was a subsequent remark to which I referred

Mr. CUMMINS. I did not attribute that to the Senator from Utah.

Mr. SUTHERLAND. I misunderstood the Senator from Iowa. Of course I did not say, and I did not mean to say, that this amendment had been proposed in any spirit of enmity. I

know better than that.

Mr. CUMMINS. I did not impute that to the Senator from I was not impressed with the suggestion of the Senator from Michigan [Mr. Townsend], which was commended so highly by the Senator from Minnesota [Mr. CLAPP]. There is a higher duty that rests upon every citizen than the duty to pay taxes or contribute to the expenses of his Government. If our Government is to continue and our institutions endure, there is one duty which every citizen ought to perform, and perform well, that, in my judgment, stands high above the duty of contributing to organized society in the way of taxes. duty is to be a good citizen; it is to be moral and upright and fairly prosperous. That duty is, if he be the head of a family, to provide for that family, to clothe the family, to educate the family, and to train it and prepare it to take a useful place in a country like ours. My limit upon taxation is fixed by that consideration. I do not believe that an income tax should be levied upon any incomes fairly necessary to enable the citizen to discharge the duties of citizenship, to clothe himself and feed himself-to clothe himself well and feed himself bountifully to give to all those who are dependent upon him every fair and reasonable opportunity so to equip themselves that they can as they come into maturity discharge their duties with fidelity and intelligence. Our country absolutely depends upon the performance of this duty on the part of the citizen.

It is unnecessary for me to say here just where the taxable limit is. I am satisfied with the limit of this bill. I do not think it ought to be much less in the beginning, at any rate; but, whatever it is, my standard would be the amount that would enable a man properly to care for himself and for his family and fit all those who depend upon him to discharge the

duties of citizens of this country as those duties ought to be discharged.

Mr. BRISTOW. Mr. President, responding to the inquiry of the Senator from Michigan [Mr. Townsend], I will say that I took up the figures which have been given us by the committee and undertook to make an estimate; but I soon came to the conclusion that the estimate was purely a guess. However, in order to compare the influence of this amendment on those estimates I will make a brief explanation.

It is estimated in the report of the Finance Committee that there are 425,000 persons in the country who will be subject to the income tax. Of these 425,000 persons the committee estimates that 304,000 have incomes of less than \$10,000 per annum. Upon the income of those 304,000 there is no increase in the tax in the amendment I have proposed; it is just the same. It is also estimated that there are 77,000 who have incomes between \$10,000 and \$20,000 per annum.

Mr. TOWNSEND. In the Senator's amendment does he have

a tax on incomes less than \$10,000 a year? Mr. BRISTOW. Oh, yes.

Mr. TOWNSEND. What is the minimum? Mr. BRISTOW. Three thousand dollars a year is the mini-

Mr. TOWNSEND. The Senator begins at \$3,000? Mr. BRISTOW. Yes. The bill proposes a tax of 1 per cent on all whose incomes are less than \$20,000 and above \$3,000. In my amendment I leave that the same as is provided in the bill up to \$10,000. The amount of the tax is 1 per cent on all incomes under \$10,000 and above \$3,000; that is, on those who are not married. Where they are married it is \$4,000; and where they have a family of two children or more the exemption is \$5,000 a year. I leave that just as it is in the bill.

As I was saying, the committee estimates that there are 77,000 persons whose income is between ten and twenty thousand dollars a year. In that bracket I add \$100 additional to the committee bill. The committee bill imposes a tax on those whose income is \$20,000 a year of 1 per cent on all over \$3,000, or \$170 per annum, while my amendment would impose a tax of 1 per cent on all under \$10,000 and above \$3,000 and 2 per cent on all between \$10,000 and \$20,000, making \$270 per annum. If you add \$100 per annum, which is the increase that I make, to the 77,000 you would have \$7,700,000 additional; but, of course, there would not be anything like that much added, because the income of all would not be the maximum of \$20,000. If the income is only \$11,000 per year, there would be but \$10 additional added to the income tax collected from that individual over that provided by the committee bill; and if it is \$15,000, there would be 1 per cent of \$5,000, or \$50 more added. So that there would not be anything like \$7,000,000 more collected in that bracket.

The highest rate imposed is the tax on incomes of \$100,000 and over per annum. Under the bill as it comes from the committee the tax on incomes of \$100,000 is only \$2,270. it \$5,470. The committee estimates that there are 100 persons with an income of more than a million dollars. Under the bill if a person has an income of a million dollars, he would pay \$38,270 per annum tax, while under my amendment he would pay \$52,235 per annum tax, or \$13,965 more. So running through hurriedly it appears that the amendment would increase the estimated revenue, as nearly as can be ascertained, about \$30,000,000 or \$35,000,000 more than the amount estimated by the committee. Believing that the estimate here is too great, my judgment is that, with my amendment adopted, the collection would be somewhere between \$70,000,000 and \$100,000,000. So that the apprehension that we are likely to have much more money than we can use is entirely groundless. I might also add that if in the judgment of the committee we are getting more revenue than we need, why not take the duty, off some of the noncompeting articles?

In going through this bill there has been article after article, commodity after commodity, taken off of the free list and put on the dutiable list in order to get revenue. Articles that have been on the free list for years are transferred to the dutiable list for the purpose of collecting additional revenue. Let us put those back on the free list, where they were, and get the addi-

tional revenue in this way. It is certainly more equitable.

The Senator from Michigan [Mr. Townsend], the Senator from New Hampshire [Mr. GALLINGER], and others seem to be apprehensive that this is a menace to the protective system. Indeed, I might say-and I believe I am justified in sayingthat the protected interests of this country, or a large number of them, have fought an income tax because they believed it would be a menace to the protective system. I believe I am as firmly convinced that the protective principle is a wise and just policy as is the Senator from Michigan or the Senator

from New Hampshire. But it must be administered in a just and equitable way or it is not a wise and a beneficent and a just policy. When you undertake to perpetuate an injustice because it has been injected into our laws under the protective policy which we support and indorse you do an injustice to the protective policy and you weaken it and discredit it with the American people.

Every Senator who has spoken here this afternoon has declared that he is in favor of an income tax. The only objection that has been made to this amendment is that there is danger of imposing too great a burden upon the rich men of the country. Yet no one will contend that this amendment imposes an unjust burden upon the rich men of the country. not much patience with the argument that we ought not to impose a proper tax because in the future some one may impose an improper one. If there is anyone who believes that a man with a net income of \$100,000 a year will be unjustly burdened because the Government believes he ought to contribute \$5,000 a year to maintain his Government, I should like to have the Senator get up and make an argument from that point of view. That is what is proposed here, and nothing more.

The junior Senator from Massachusetts [Mr. Weeks] says the country wants to know where we are going to stop. I am not worrying about where we are going to stop. I believe in a republican form of government. I believe the American people are capable of self-government. I believe their purpose is to do what is right to every citizen. The American people as a whole would not do an injustice to a rich man any quicker than they would to a poor man. Some men may think that is an opti-mistic view to take, but I believe it is a correct one. I would rather trust the honesty of the American people as a whole in dealing with a rich man than to trust a good many of the rich men in their dealings with the American people.

If there is any prejudice in this country against the rich, it is because the rich have not been just in their dealings with the There is no fundamental prejudice in the Anglo-Saxon race against property or the rights of property. It is the very basis upon which every Saxon nation has been builded in the history of our civilization. Yet here in this, the most enlightened Nation of all, in my opinion, we are afraid to enter upon a system of taxation which England has been following for years, because, forsooth, the American people may confiscate the property of their well-to-do citizens. Such a suggestion is abhorrent to me.

Do they do injustice to the rich in our system of taxation in the States or the municipalities? An income tax such as is proposed in this amendment is the most equitable tax that can be imposed. We tax the property in our towns for the benefit of the community to make public improvements, and the man who owns property pays the tax. The man who is running a dry goods store pays his tax. Even if he loses money during the year he has been in business, he has to pay the tax just the same. He contributes that much to the welfare of the com-But in my experience I have not known a State or a community, county or municipal, where the people have undertaken to confiscate property or impose unjustly upon the well-todo men of the community. The fact is that the rich men pay less, in proportion to their ability to pay, in almost every community in this country of ours than do the men of moderate The burden of maintaining the municipal and State governments rests very largely upon the men who would not come within the provisions of this amendment. The great majority of the taxable property in the community of every Senator here belongs to men whose incomes do not reach \$5,000 a year; and these men bear the burden of their local taxation.

In endeavoring to work out this amendment I have tried to be conservative and just, so that no man could say it was a radical measure, and no man has declared here that it was an The only objection to it has been from those who were afraid that in the future somebody else might do an injustice.

Mr. WILLIAMS. Mr. President, I should like to have a vote

now, if Senators are through discussing the amendment.

The VICE PRESIDENT. The question is upon the amendment proposed by the Senator from Kansas [Mr. Bristow].
Mr. Bristow. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jack-

son]. In his absence, I withhold my vote.

Mr. McCUMBER (when Mr. Gronna's name was called).

My colleague is necessarily absent from the Senate. He is paired with the junior Senator from Illinois [Mr. Lewis].

Mr. LEWIS (when his name was called). I beg to state that am paired with the junior Senator from North Dakota [Mr. RONNA], and therefore withhold my vote.

Mr. McCUMBER (when his name was called). eral pair with the senior Senator from Nevada [Mr. Newlands]. As he is absent, I will withhold my vote. Were I at liberty to

vote, I should vote "yea."

Mr. MARTIN of Virginia (when the name of Mr. SMITH of Maryland was called). The senior Senator from Maryland [Mr. SMITH] is unavoidably absent. He is paired with the senior Senator from Vermont [Mr. DILLINGHAM].

Mr. STONE (when his name was called). My colleague [Mr. Reed] is absent on business of the Senate. He is paired with the senior Senator from Michigan [Mr. SMITH]. Has the senior Senator from Wyoming [Mr. CLARK] voted?

The VICE PRESIDENT. He has not.

Mr. STONE. In accordance with my general pair with that Senator, I will withhold my vote. If permitted to vote, I should vote "nay."

Mr. SUTHERLAND (when his name was called). I inquire whether the senior Senator from Arkansas [Mr. Clarke] has

The VICE PRESIDENT. He has not.

Mr. SUTHERLAND. I have a pair with that Senator, and therefore withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from Ohio [Mr. Burton]. I there-

fore withhold my vote.

Mr. TILLMAN (when his name was called). I have a pair with the junior Senator from Wisconsin [Mr. Stephenson], and therefore withhold my vote.

Mr. TOWNSEND (when his name was called). announce that the senior Senator from Michigan [Mr. SMITH] is absent from the Senate on important business. He is paired with the junior Senator from Missouri [Mr. Reed]. I desire this announcement to stand for the day.

The roll call was concluded.

Mr. CHILTON. I transfer my pair with the junior Senator from Maryland [Mr. Jackson] to the junior Senator from Arizona [Mr. SMITH] and will vote. I vote "nay.

Mr. BANKHEAD. I transfer my pair with the junior Senator from West Virginia [Mr. Goff] to the senior Senator from

Louisiana [Mr. Thornton] and will vote. I vote "nay."
Mr. GALLINGER. I inquire whether the junior Senator
from New York [Mr. O'GORMAN] has voted?

The VICE PRESIDENT. He has not.

Mr. GALLINGER. I have a general pair with that Senator. I transfer it to the junior Senator from Maine [Mr. Burleigh]

and will vote. I vote "nay."

Mr. THOMAS. I transfer my pair with the senior Senator from Ohio [Mr. Burton] to the junior Senator from Nevada

[Mr. PITTMAN] and will vote. I vote "nay."
Mr. FLETCHER (after having voted in the negative). I am paired with the junior Senator from Wyoming [Mr. WARREN]. I transfer that pair to the junior Senator from Tennessee [Mr.

SHIELDS], and will allow my vote to stand. Mr. GALLINGER. I have been requested to announce that the senior Senator from Delaware [Mr. Du Pont] is paired with the senior Senator from Texas [Mr. Culberson]; that the junior Senator from North Dakota [Mr. Gronna] is paired with the junior Senator from Illinois [Mr. Lewis]; and that the junior Senator from Maryland [Mr. Jackson] is paired with

the senior Senator from West Virginia [Mr. CHILTON] Mr. BACON. I inquire whether the senior Senator from Minnesota [Mr. Nelson] has voted?

The VICE PRESIDENT. He has not.

Mr. BACON. I have a general pair with that Senator, and therefore withhold my vote.

The result was announced—yeas 16, nays 46, as follows:

	YE	AS-16.	
Borah Brady Bristow Clapp	Crawford Cummins Jones Kenyon	La Follette Norris l'age Perkins	Poindexter Sherman Sterling Works

So Mr. Bristow's amendment was rejected.

Mr. LA. FOLLETTE. Mr. President, I offer the following amendment.

Mr. BRISTOW. Will the Senator from Wisconsin yield to me for just a moment?

Mr. LA FOLLETTE. For what purpose?

Mr. BRISTOW. I wish to get permission to insert a table in the RECORD.

Mr. LA FOLLETTE. Certainly.

It is a table which I prepared showing the Mr. BRISTOW. amount of tax collected by the amendment as compared with the bill. I should like to have it inserted in connection with

The VICE PRESIDENT. Without objection, permission is

granted.

Mr. BRISTOW. If the Senator from Wisconsin will bear with me, I will say that I have another amendment along the same line, except it is reduced in amount, that I should like to offer now, unless it will interfere with the amendment which the Senator has. It is in substance the same except that it starts with one-half of 1 per cent and goes up one-half per cent each additional \$10,000 instead of 1 per cent. It is drawn to meet the objection made by the Senator from Mississippi that we would be collecting an additional revenue.

Mr. LA FOLLETTE. As it varies somewhat from the per-centage which I have fixed in the amendment which I offer, I do not think there will be any conflict, and it can be offered

just as well after this amendment is voted upon.

Mr. BRISTOW. Very well. The VICE PRESIDENT. The Senator from Wisconsin offers

an amendment, which will be read.

The Secretary, Strike out all after the words "the total net income exceeds," in line 19, page 165, lines 20 and 21, etc., down to and including "\$100,000," in line 3, on page 166, and insert in lieu thereof the following: "\$10,000 and does not exceed \$20,000; and 11 per cent per annum upon the amount by which the total net income exceeds \$20,000 and does not \$30,000; and 2 per cent per annum upon the amount by which total net income exceeds \$30,000 and does not exceed \$40,000; and 2½ per cent per annum upon the amount by which total net income exceeds \$40,000 and does not exceed \$50,000; and 3 per cent per annum upon the amount by which total net income exceeds \$50,000 and does not exceed \$60,000; and 4 per cent per annum upon the amount by which the total net income exceeds \$60,000 but does not \$70,000; and 5 per cent per annum upon the amount by which total net income exceeds \$70,000 but does not exceed \$80,000; and 6 per cent per annum upon the amount by which the total net income exceeds \$80,000, but does not exceed \$90,000; and 7 per cent per annum upon the amount by which the total net income exceeds \$90,000 but does not exceed \$100,000; and 10 per cent per annum upon the amount by which the total net income exceeds \$100,000."

Mr. LA FOLLETTE. Mr. President, it will be observed by

Senators that my amendment does not make any change in the provisions of the bill affecting incomes below \$10,000. amendment is a variation, in some respects, from the amendment presented by the Senator from Kansas. The rates provided for each of the subdivisions until an income of \$100,000 is reached are somewhat lower than the rates of his amendment.

I have followed this discussion with a good deal of interest, Mr. President, and I quite agree with the observations made by the Senator from New York [Mr. Root] that we are just entering upon a plan of Federal taxation that will move forward very rapidly and without obstruction to reasonably perfect execution.

There are a number of States that have income-tax laws. These have been constructed upon the old plan, and their execution has been committed largely to local officers. This has led almost invariably to a defeat of their purpose and to a failure of any considerable return from them. In the year 1911 the State of Virginia collected the largest return from an income tax ever collected by any State in this Union up to that time, and that amounted to \$129,427.

In Wisconsin we have put into force an income-tax law. We

of its operation we recovered more from the income tax of Wisconsin than all the income taxes of all the States combined. We collected about 33 per cent more than was collected for all of the country under the Federal income tax in 1863. The thing can be done. It has been done in Wisconsin. Last year we collected \$3,300,000 under our income-tax law. We purpose to have it take the place of the personal-property tax. The total tax levied upon personal property in Wisconsin last year would amount to something over \$4,000,000. The first year that tax was in operation in Wisconsin we found and assessed almost enough incomes to take the place of this personalproperty tax. It will ultimately completely do so.

Mr. LEWIS. Will the Senator allow me an inquiry?

Mr. LA FOLLETTE. Certainly.

Mr. LEWIS. The Senator is now upon a subject that has given me a great deal of concern. It may not be unfamiliar to him as traditional history that I unsuccessfully made the attempt in the State of Illinois to prescribe an income tax. What is the Senator's opinion, if we adopt the Federal income tax and there still shall prevail a State income tax, as to how far that could be urged as operating under the Constitution as a double tax, as was the ruling of the Supreme Court in the Allen case on the matter of the national bankruptcy act superseding State

insolvency laws?

Mr. LA FOLLETTE. I think that point would have no merit at all as against an income tax such as we have enacted and are enforcing in Wisconsin. It would be most remarkable, Mr. President, if the enactment and enforcement of a Federal income tax should deprive the States of the power to tax the personal property of that State. Realizing that we in Wisconsin were reaching, as they are in all the States of the Union. but a moiety of the personal property by the ordinary personalproperty assessment and that the great bulk of this class of property was escaping taxation, we have established a system to take the place of the ineffective and inequitable personalproperty tax. Surely the Federal Government can not come in and say that we may not establish in our State some system of taxation to supplant the imperfect system of assessing and collecting taxes upon personal property.

Mr. President, I noted the comment of the Senator from New Hampshire [Mr. Gallinger] upon the statement of the Senator from Idaho [Mr. Borah] regarding the collection of taxes on personal property in Massachusetts. It brought back to my mind an investigation of this subject that I made many years ago in Wisconsin. At that time I very carefully looked into the personal-property tax of the whole country. I recall distinctly that by the report of the comptroller less personal property was paying taxes in New York in 1897 than had paid taxes in that State 14 years before. That is startling. Yet, as to all the great financial centers of this country that statement can

be duplicated in a measure.

Now, just let me tell you what the operation of the income tax law in Wisconsin disclosed. In one case that I recall a very eminent citizen of the State made a sworn statement that the amount of his personal property was \$5,000. Over and over again he filed such statements. Under the income-tax law his personal property assessable under the law during all the years these statements were filed was found to be over \$1,000,000. Every one of you have cases of that kind in your own States.

Mr. GALLINGER, Mr. President—

The VICE PRESIDENT. Does the Senator from Wisconsin

yield to the Senator from New Hampshire?

Mr. LA FOLLETTE. Certainly. Mr. GALLINGER. Will the Senator permit me to ask as to whether in the State of Wisconsin all tax returns are made under oath?

Mr. LA FOLLETTE. Yes; they are. Mr. GALLINGER. If the Senator will permit me, in my own little State, under the operations of a tax commission somewhat recently formed, I am very sure that our personal property is being assessed at a very high rate, perhaps not the full value of it, and we return under oath our tax lists.

Mr. LA FOLLETTE. The rate is high, and just in propor-

tion as you make the rate upon personal property high, under the system of assessment and collection of taxes prevailing in nearly all the States, you increase the difficulty of discovering it and listing it for taxation.

Mr. SMOOT. You have a personal-property tax in Wis-

consin?

Mr. LA FOLLETTE. But we are substituting the income tax for the personal-property tax. We offset the personal-property tax against the income tax. The theory upon which we are proceeding is to make an entire and complete substitumade our assessment and collection last year. In the first year | tion of the income tax for the personal-property tax.

Mr. LIPPITT. I am quite interested in what the Senator is saying. I merely wish to ask him if the returns for the income tax made a distinction between the amount of the income that

came from real property and personal property?

Mr. LA FOLLETTE. Oh, yes; the sources of income are specified in the return, and the law has distinct provisions for

the taxation of individuals, partnerships, and corporations.

Mr. GALLINGER. Mr. President, will the Senator kindly state, if he carries it in his mind, at how low a point is the in-

come tax?

Mr. LA FOLLETTE. The Wisconsin law taxes all incomes above \$800 per annum received by an unmarried person, above \$1,200 per annum for man and wife, and allows \$200 additional exemption for each child under 18 years of age. The tax rate in Wisconsin is based on units of a thousand dollars. The owner of an income amounting to a thousand dollars above the exemptions is taxed 1 per cent upon that thousand; upon the second thousand, if he has \$2,000 of taxable income, he is taxed 14 per cent; upon the third thousand, 1½ per cent; upon the fourth thousand, 1¾ per cent; upon the fifth thousand, 2 per cent; upon the sixth thousand, 2½ per cent; upon the seventh thousand, 3 per cent; upon the eighth thousand, 34 per cent; upon the ninth thousand, 4 per cent; upon the tenth thousand, 41 per cent; upon the eleventh thousand, 5 per cent; upon the twelfth thousand, 51 per cent; and on any sum in excess of \$12,000 he pays an income tax of 6 per cent.

In the administration of the law many cases came to light of the heaviest taxpayers under the income tax who were among those who had paid the very lightest amount of taxes on personal property. There seemed to be a sort of understanding among the very wealthy men of the State that they should swear off their personal property down to \$5,000. In the case of a very distinguished citizen of the State now deceased I recall distinctly that the settlement of the estate disclosed that the taxable personal property that had been sworn to the year before

as \$5,000 aggregated considerably over \$1,000,000.

In another case one of the most eminent and one of the most respectable members of the bar of Dane County, where I live, a man for whom I had the very highest esteem, returned \$5,000 personal property for assessment. The inventory of his taxable personal estate ran up over \$300,000, I think to \$375,000.

In another case, that of a retired farmer who on oath had returned \$5,000 of personal property subject to taxation, it was found on his death that his administrator had turned in for assessment notes and mortgages to the amount of \$317,000.

Mr. President, personal property is reached for taxation under the Wisconsin plan.

Mr. BORAH. Mr. President-

The VICE PRESIDENT. Does the Senator from Wisconsin

yield to the Senator from Idaho?

Mr. LA FOLLETTE. In just a moment. We do not leave the execution of this law to local officers, and I think in that fact alone lies to a considerable extent the success we are meeting with in the levying of this tax in our State. I yield to the Senator from Idaho.

Mr. BORAH. That is in line with the suggestion I made a while ago that in order to reach proportionately the large incomes it is absolutely necessary that an almost exaggerated rate be put upon them because they do escape taxation. For instance, without mentioning the State, as that would not throw any light on the subject, there were seven estates probated in one State of the Union a few years ago for \$215,000,000. Those seven estates had paid taxes for the previous year on \$3,000,000. which is much less than the percentage which I gave a while ago. So there is no possible danger of taxing too heavily when by any ingenuity which the human mind can conceive of on the part of those who have that class of property it so easily escapes taxation.

Mr. LA FOLLETTE. It is just that thought, Mr. President, which relieves me of any anxiety because of the argument made here this afternoon that the adoption of an amendment similar to that offered by the Senator from Kansas would work such an unequal distribution of burden that a considerable portion of citizens of this country would not realize their obligations to the Government. They have been bearing double, triple, fourfold of the burdens of the Government through many decades.

The taxation upon living which they have been carrying while untold millions have escaped altogether should, I think, relieve us of any apprehension that we may overtax this great wealth by the adoption of an amendment such as that offered by the Senator from Kansas [Mr. Bristow] or that which I have just presented to the Senate.

Mr. President, it is not necessary to impose double taxation on the poor to teach them patriotism. There never has been an hour when this Government was in peril that the humblest of linheritance tax that shall prevent the dead hand from exerting

our citizens have not been willing to offer their lives for the perpetuity of our institutions. There is nothing to be found in our history to warrant us in imposing additional taxation on them by the direct method in order to make them responsive to the call of the country whenever there is a demand for them to serve it. No, Mr. President.

I do not want to speak critically or harshly, but most of those who have argued against the amendments presented this afternoon to increase the income tax upon great wealth are those who have always been opposed to an income tax of any When the opportunity offers to equalize these burdens, I regret, Mr. President, that there should come a line of division on the Republican side, emphasizing differences which I had hoped to see disappear. A new day is coming in this country. If the Republican Party will not see it, then, Mr. President, its place will be taken by some party that will see it.

Mr. GALLINGER. Mr. President—

Mr. LA FOLLETTE. I yield to the Senator from New Hampshire.

Mr. GALLINGER. I was about to suggest, Mr. President, that this is not the only vote upon which there was a line of division on this side of the Chamber and as to which no fault has been found.

Mr. LA FOLLETTE. No, Mr. President; and some of those votes will be analyzed before we have finished here. I am going to take occasion to say to this side of the Chamber that a new accounting must be made in the application of the

principles to which we are devoted.

Mr. GALLINGER. Mr. President, the Senator from Wisconsin has made the same assertion, sometimes in the nature of a threat, heretofore. It is not going to alarm those of us who do

not agree with the Senator in his economic views.

Mr. LA FOLLETTE. Oh, I do not expect to alarm anybody, Mr. President. I said to certain associates of the Senator from New Hampshire six or seven years ago, when I appealed in vain to them to pass a law to ascertain the value of the railroad property of this country, that their refusal to heed the demand for a correction of grave abuses would result in permanently vacating many seats on the Republican side of this Chamber. My warning was scorned, and a goodly percentage of those gentlemen have disappeared from their places upon this side and many of their seats are occupied by men who realize that legislation must adjust itself to the new industrial conditions of this country.

Mr. GALLINGER. If the Senator will permit me further-

Mr. LA FOLLETTE. I will.
Mr. GALLINGER. It is true that some Senators have disappeared from this side of the Chamber and some have disappeared from the other side; and it is equally true that the Republican Party has been put out of power by some men who sympathized with the Senator from Wisconsin in his extreme views.

Mr. LA FOLLETTE. Mr. President, since the Senator from New Hampshire refers to it, I will say that the Republican Party has been put out of power by the people of this country who are in accord with the views which I am now expressing, and they will retire more men from the Senate of the type of the Senator from New Hampshire before we finally dispose of these issues.

Mr. GALLINGER. Mr. President, the Senator from New Hampshire is not a bit alarmed. The Senator from New Hampshire may go out voluntarily, as some other men to whom the Senator alludes went out voluntarily; but if the people of New Hampshire choose to elect another man than myself the Senator from Wisconsin need not grieve over it, for I certainly shall not.

Mr. LA FOLLETTE. Well, I did not say to the Senator from New Hampshire that I should grieve over it, if he is seek-

ing that sort of a response from me.

Mr. GALLINGER. If the Senator wishes to make this a personal issue, I will suggest to him that I shall not grieve any more than he will, whatever happens.

Mr. LA FOLLETTE. No. Well, now, that we have adjusted these personal matters, I may return to the amendment under

consideration.

Mr. President, I want to say to Senators upon the other side that this is a matter, it seems to me, of supreme importance. You are about to establish an income-tax system for the Federal Government. The course of politics has thrown that great op-portunity into your hands. Establish it upon principles that will appeal to the sense of justice of the people of this country. I well understand that there are many Senators on both sides of the Chamber who think that these mighty fortunes, accumulated largely in violation of law, can be better dealt with under an

a controlling influence upon the life of the generation that is to follow; but I say to you, Mr. President, that it is a mistake not to tax these great fortunes and make them bear their share according to the full measure of their ability so to do. The income tax offers an opportunity to do it. It should be supplemented by an inheritance tax. Together they will help us to attain that end which our fathers thought they were guaranteeing to us when they provided forever against the law of primogeniture and entail.

Mr. President, I can not hope, in view of the experiences which we have had here, that the amendment which I have offered will be adopted. I understand that those in the majority have started upon quite another course and that they will go through with it to the end; but I do hope that they may consider it worth while to take this provision of the bill and the amendment which I have offered back to their committee room and give it consideration, to the end that these enormous incomes may be compelled at last to pay the tax they have here-tofore evaded. I hope this provision of the bill will be taken

back to the committee for reconstruction.

Mr. WILLIAMS. Mr. President, I do not care to prolong the debate, but the remarks made by the Senator from Wisconsin [Mr. LA FOLLETTE] are not altogether complimentary to this side of the Chamber. He seems to labor under the delusion that we have not given any consideration to this subject matter. We think we have; we think the Senate Committee on Finance did; we think that the Committee on Ways and Means of the House did; we think the caucus in the House did; and we think the caucus in the Senate did. We may not have arrived at a conclusion which meets with the entire approbation of the Senator from Wisconsin, but it at least met with our approbation. I decline to admit that we have acted without consideration merely because we did not consider it in the same way.

I decline also to let the question as to what shall be the points of demarcation in the graduation of the income tax be dignified into a great and important national issue. That the principle of an income tax itself is a great and important national issue nobody would undertake to deny; and, in devotion to that principle, I think I may claim some degree of precedence as a public man. I voted for the income tax in 1894, and I introduced in every succeeding Congress so long as I was a Member of the House of Representatives a joint resolution providing an amendment to the Constitution of the United States to make possible an income tax for the Federal Government. So I have not been without considering the question of an income tax for very many years—that is, many years for a man who is as young, as boyish, and as alert as I am, although not so many years from the standpoint of history, of course.

We are doing the best we know how; we are not neglectful of our duty, nor are we neglecting to spare time and nerve power and intensity in the public service to accomplish a common purpose which we all have in view. I am of the opinion that this bill as it stands as a first bill to be presented to the American people containing an income-tax provision is better without the amendment of the Senator from Kansas [Mr. Bristow] and without the amendment of the Senator from Wisconsin [Mr. LA FOLLETTE], the latter being substantially the same as the former.

We are not acting over here, however gentlemen upon the other side may think, without some degree of common sense, some degree of information, and some small degree of knowledge attained by the best methods that could be employed. All of us are fallible and some of us do not take ourselves very seriously—it is notorious that at least one of us does not take himself very seriously [laughter]—but to the best of our poor ability, with sincerity, with honesty, and with the idea of serving the country, we have presented this bill with this provision in it; and I am still, speaking individually, unconvinced that either of the amendments offered betters the bill in any respect. They simply complicate it; they simply undertake to go upon a theory that you are to levy a tax without regard to the needs of the Government for revenue. That is the defect in all the arguments on the other side, whether made by standpatters or whether made by progressives. They are always considering something in a tax besides the tax; something in a tax besides the revenue.

I do not know to what extent inequalities of fortune are a menace to the Republic. I do know that they are a menace to a large extent; I do know that our ancestors acted very wisely when they abolished primogeniture and entail; and I think I know that the time will come some day when there must be a limitation put upon the amount that may be inherited or left by bequest or devise to any one person or purpose, so as to destroy the power of attack in great fortunes transmitted from generation to generation. But however that may be-and I am

not going afield now upon that subject—this is not the instrumentality to play upon in order to give the country that tune.

Mr. LA FOLLETTE. Mr. President, will the Senator yield to me there just for a moment?

The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Wisconsin? Mr. WILLIAMS. Yes.

Mr. LA FOLLETTE. The Senator realizes the danger that may follow from the passing of an enormous fortune from the deceased promoter of that fortune to somebody else. Does he not also realize the danger of the use of that fortune in the hands of the man who accumulated it?

Mr. President, just a word more. When a fortune has passed from the hands of the dead to his successor, perhaps to his son, perhaps to one who has inherited no attribute of the man who accumulated and used that fortune for 30 or 40 years to oppress his fellow men, or even though the person inheriting had all of the attributes and all of the genius of the one from whom he inherited it, he would require years of training and experience to make it as great a menace as it was in the hands of the man who accumulated it. Then, instead of awaiting the opportunity to reach after death that great accumulation of wealth which the Senator has admitted is a menace, why not diminish it by a system of taxation that is constitutional, legitimate, and proper?

Mr. WILLIAMS. Mr. President, all through that vale I, too, have passed with such measure of thought as I was capable of. I not only recognize that a vast fortune may do harm in the hands of its accumulator, but I recognize that it may do harm in a still greater way after he is dead by being kept together by his direction; and I especially fear a sort of habit that has grown up among a few of the great rich families of America of not permitting their fortunes to be divided equally between their children, but leaving them to the best moneygrubber in the family, so that the deceased may feel assured in some other life somewhere that his philosophy of life is being carried out by somebody who is nearest to him in his own family. I realize all that, But I realize another thing: No honest man can make war upon great fortunes per se. The Democratic Party never has done it; and when the Democratic Party begins to do it, it will cease to be the Democratic Party and become the socialistic party of the United States; or, better expressed, the communistic party, or quasi communistic party, of the United States. I have a suspicion that a man can not make one of these immense, great, big fortunes honestly in one lifetime. Perhaps that suspicion grows out of the fact that I myself am not a money-maker, and never have seen any way whereby I could honestly do it. Perhaps I am mistaken about that,

Mr. President, will the Senator yield to me? Mr. WILLIAMS. Not right now. The war that an honest man or an honest party makes upon accumulated wealth must be a war upon the manner in which the wealth was accumulated. It comes with bad grace from Senators on the other side of the Chamber, whose party has furnished a rough-and-ready system whereby great fortunes could be accumulated by the prop of the taxing law, to ask us to tax out of existence the inequalities which they have created.

I hope to see the day, some time, when no man will have help or hindrance from the law, in a fair competition with his fellows; when no law will prop him up in his business and no law will weigh him down in his business; when the Government will say to all men: "Here is a free field and a fair opportunity, and that is all the Government has to do with you in so far as your business is concerned." Of course it has a heap more to do with him when it comes to his behavior, and some other things.

There will be no great fortunes accumulated in one man's lifetime if all men have equal opportunities and no man has law-conferred special privilege. Let us start at the evil in the right way for doctoring it. Let us start at it by doing away with everything upon the statute books which does confer special privilege.

There are no great differences between the intellects of men. A man who makes money, as a rule, makes it not because he is smarter than the man who does not make it, but because he loves money more. The man who loves learning will grow learned; the man who loves plety will grow plous; the man who loves money will grow rich. He may be naturally 50 per cent less able and with less information than the man who piles up his millions. That which your heart yearneth for that you are pretty apt to attain in this world, because the ruling passion will subordinate everything else to its end.

I am not going to attempt to make this tariff bill a great panacea for all the inequalities of fortune existing in this country; nor would it do any good if we did, because we would be doctoring the symptoms and not the cause of the disease. No

wise physician ever fools with mere symptoms. He goes to the

The Senator said a moment ago that a new day was dawning upon this country. The Senator is mistaken. A new day has dawned upon this country. The sun is almost above the horizon. It is not yet the morning twilight, but the sky is showing the colors. The great progressive party of America, the Demo-cratic Party, has been sent here to do its work, and it is going to do it. It is going to do it wisely, cautiously, carefully; and while it is doing it it is not going to disrupt everything in present conditions.

So much for that. I started out by saying that I was not going to prolong the debate, and I find myself, like everybody clse, making a promise to the ear of the Senate and breaking it to its patience

Mr. BRISTOW. I desire to submit this amendment in order that it may be printed and lie on the table for the purpose of offering it as soon as the amendment of the Senator from Wisconsin is voted upon.

The VICE PRESIDENT. The amendment will lie on the

table and be printed.

#### EXECUTIVE SESSION.

Mr. KERN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 1 hour and 15 minutes spent in executive session the doors were reopened, and (at 7 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Thursday, August 28, 1913, at 11 o'clock a. m.

### NOMINATIONS.

Executive nominations received by the Senate August 27, 1913.

MEMBER OF THE EXCISE BOARD OF THE DISTRICT OF COLUMBIA.

Henry S. Baker, of the District of Columbia, to be a member of the Excise Board of the District of Columbia for a term of three years from July 1, 1913.

### APPOINTMENTS, BY TRANSFER, IN THE ARMY.

Second Lieut. David B. Falk, jr., Twelfth Cavalry, to be second lieutenant of Infantry with rank from June 12, 1913.

Second Lieut. Carlyle H. Wash, Fourteenth Infantry, to be second lieutenant of Cavalry with rank from June 12, 1913.

# APPOINTMENTS IN THE ARMY.

#### MEDICAL RESERVE CORPS.

To be first lieutenants with rank from August 25, 1913. To be first licutenaits with rank from August 25, 1915.

Alexander Watson Williams, of the District of Columbia.

Walter Paul Davenport, of Minnesota.

Ralph Michael Le Comte, of Pennsylvania.

Louis Hopewell Bauer, of Massachusetts.

Lauphear Wesley Webb, jr., of Pennsylvania.

Austin James Canning, of Pennsylvania.

Harold Henry Fox, of New York.

Frederick Henry Dieterich, of New York.

William Guy Guthrie, of Kansas.

#### CONFIRMATIONS.

Executive nominations confirmed by the Senate August 27, 1913. REGISTER OF THE LAND OFFICE. .

A F. Browns to be register of the land office at Sterling, Colo. POSTMASTERS.

James C. Burns, Bay Minette. H. W. Crook, Bessemer. Albert M. Espey, Albertville.

CALIFORNIA.

Isidore J. Proulx, Willow. Eliza Stitt, Vacaville. Alice E. Tate, Lone Pine. Georgia A. Wiard, Chula Vista. Frank Zimmerman, Monrovia.

FLORIDA.

J. B. Potter, Mulberry. George D. Rhode, Punta Gorda.

GEORGIA.

D. F. Davenport, Americus. Mary L. Carswell, Jeffersonville. Bolling H. Jones, Atlanta. A. L. McArthur, Cordele. ILLINOIS.

A. A. Dobson, Elburn. J. C. Dorfier, Area (late Rockefeller). John H. Henson, Xenia. John E. Rethorn, Chandlerville. Wilbur A. Woods, Pawpaw.

INDIANA.

William B. Latshaw, Oaktown. Earl Talbott, Linton.

NEVADA

George A. Myles, Austin.

NEW JERSEY.

Harry T. Allen, Vincentown.

NEW YORK.

John J. Costello, Manlius. John J. Kesel, Syracuse. Edward S. Moore, Norwich. James A. Traphagen, Waterloo.

William J. Prince, sr., Piqua.

J. C. Lamkin, Hillsboro.

SOUTH DAKOTA.

George L. Baker, Britton. J. A. Churchill, Hurley.
James Gaynor, Springfield.
A. D. Griffee, Faulkton.
Peter Schnitt, Waubay.
E. B. Wilbur, Oacoma.

TEXAS.

Cora Lee Baker, Buffalo. John Dunlop, Houston Heights. Lee D. Ford, Brookshire. T. W. House, Houston. Annie Watson, Sugar Land.

VIRGINIA.

C. Moncure Campbell, Amherst. H. G. Shackelford, Orange.

# HOUSE OF REPRESENTATIVES.

Wednesday, August 27, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

O Thou great Father Soul, who art leaving the impress of Thy wisdom, power, and goodness upon everything, guiding the stars to their appointed courses, swaying the minds and hearts of Thy children to nobler purposes and higher destinies, rule Thou in the hearts of our chosen rulers and sway the minds of these Thy servants in their deliberations, that as a Nation we may go forward to all that is purest, noblest, best until all the world shall recognize the purity of our motives, and Thine shall be the praise through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and

approved.

ADJOURNMENT UNTIL FRIDAY NEXT.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on Friday next.

The SPEAKER. The gentleman from Alabama asks unanimous consent that when the House adjourns to-day it adjourn to meet on Friday next. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

LEAVE OF ABSENCE.

By unanimous consent, Mr. HILL was granted leave of absence, for 10 days, on account of important business.

JOINT SESSION OF THE SENATE AND HOUSE.

The SPEAKER. Of course Members understand that when the Senate comes over that these three front rows are to be vacated for them by agreement. The special order is the Hetch Hetchy bill.

Mr. RAKER. Mr. Speaker, in regard to the bill H. R. 7207, I ask that it be passed for the present, retaining its place on the calendar

Mr. MANN. It is a continuing order and it can not lose its place.

The SPEAKER. It will be passed without prejudice. Doorkeeper informs the Chair that it will take a vacation of the three front rows clear around on both sides. The Chair desires to admonish people in the galleries that they are here by courtesy of the House, and they must refrain from conversation. A very little talk on the part of each member of a large congregation makes a noise that disturbs the proceedings.

#### MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed the following resolution, in which the concurrence of the House of Representatives was requested:

"Senate concurrent resolution 8.

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be directed to submit to Congress a supplementary report on the project for the improvement of the mouth of the Columbia River, Oreg.-Wash., setting forth, according to latest estimates, the amount that will be required to complete the north jetty; said report also to contain the opinion of the Chief of Engineers and River and Harbor Board as to the advisability of a lump appropriation for said work, with a view to hastening its completion.

#### SENATE CONCURRENT RESOLUTION REFERRED.

Under clause 2, Rule XXIV, the following resolution was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

Senate concurrent resolution 8.

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be directed to submit to Congress a supplementary report on the project for the improvement of the mouth of the Columbia River, Oreg.-Wash, setting forth, according to latest estimates, the amount that will be required to complete the north jetty; said report also to contain the opinion of the Chief of Engineers and River and Harbor Board as to the advisability of a lump appropriation for said work, with a view to lastening its completion—

to the Committee on Rivers and Harbors.

#### JUDGE EMORY SPEER.

Mr. CLAYTON. Mr. Speaker, on yesterday I presented to the House a resolution empowering the Committee on the Judiciary to investigate certain charges which have been made against Judge Speer, judge of the United States Court of the Southern District of Georgia, and I asked unanimous consent for its consideration at that time. Objection was interposed, and the matter went over until to-day. Now, Mr. Speaker, I renew that request for unanimous consent for the present consideration of the resolution which was reported from the Clerk's desk on yesterday touching these charges against Judge Speer. (H. Res. 234.)

Mr. LLOYD. Mr. Speaker, the resolution ought to have an amendment in it with reference to the expenditures. gentleman from Alabama simply provides that they shall be paid out of the contingent fund. The form that has been used in connection with all these special committees and special authority is something like this:

On vouchers ordered by the Committee on the Judiciary and signed by the chairman thereof and approved by the Committee on Accounts and evidenced by the signature of the chairman thereof.

Mr. CLAYTON. That is the practice of the House, and under the language of this resolution that would be the practice pursued in this case.

Mr. LLOYD. I beg the gentleman's pardon. It is the practice of the House because it has been placed in the resolution, but it has not been placed in the resolution for the last two

years Mr. CLAYTON. The gentleman is wholly at fault in his recollection. I have taken this language bodily from the resolution covering a similar matter in the Hanford case, in the Archbald case, in the Swayne case, and all other impeachment cases that I now recall. The resolution in the case of Judge Hanford was adopted June 13, 1913, and is in the following language:

Resolved, That the Committee on the Judiciary be directed to inquire and report whether the action of this House is requisite concerning the official misconduct of Cornelius H. Hanford, United States judge for the western district of the State of Washington, and say whether said judge has been in a drunken condition while presiding in court; whether said judge has been guilty of corrupt conduct in office; whether the administration of said judge has resulted in injury and wrong to litigants in his court and others affected by his decisions; and whether said judge has been guilty of any misbehavior for which he should be impeached.

And in reference to this investigation the said committee is hereby

should be impeached.

And in reference to this investigation the said committee is hereby authorized to send for persons and papers, administer oaths, take testimony, employ a clerk and stenographer, if necessary, and to appoint and send a subcommittee whenever and wherever it may be necessary to take testimony for the use of said committee. The said subcommittee while so employed shall have the same powers in respect to obtaining testimony as are herein given to said Committee on the Judiclary, with a sergeant at arms, by himself or deputy, who shall serve the process of said committee and the process and orders of said subcommittee and shall attend the sittings of the same as ordered and as directed thereby, and that the expense of such investigation shall be paid out of the contingent fund of the House.

Mr. LLOYD. That is true as to the Hanford case and the Swayne case, but-

Mr. CLAYTON. And as to the Archbald case.

Mr. LLOYD. But this method was brought about in the last Congress. It is a very necessary resolution, and I am It is a very necessary resolution, and I am sure it is to the gentleman's interest to put it in.

Mr. CLAYTON. This resolution is in the precise terms, as nearly as practicable, of the resolution adopted in Judge Hanford's case at the last session of Congress. And it not only follows precedents but is ample for every purpose.

Mr. MANN. I do not see how the gentleman can have any objection. Of late it has been customary to put that provi-

sion in.

Mr. CLAYTON. That is not true in regard to resolutions like this, to investigate the conduct of judges. My only regret is that the gentleman from Missouri [Mr. Lloyd] did not call my attention to this matter before I brought the resolution up, so that we could have agreed upon an amendment and put it through as a matter of course. I want to meet the views of any Member of the House and will do so if in doing so the efficacy of the resolution itself is not subtracted from.

Mr. LLOYD. Here is the amendment.

Mr. CLAYTON. Very well, Mr. Speaker. Then, I will call up the resolution and move to amend-

The SPEAKER. The gentleman has reached a place where he can amend it.

Mr. CLAYTON. I understand that, but the gentleman from Wisconsin [Mr. Nelson], my associate on the committee, de-

sires to say a few words to the House.

Mr. MANN. When unanimous consent is given, the gentleman will yield time?

Mr. CLAYTON. Very well.

The SPEAKER. Is there objection to the present consideration of this resolution? [After a pause.] The Chair hears none. The gentleman from Alabama [Mr. CLAYTON] is recognone. nized.

Mr. NELSON.

Mr. NELSON. Mr. Speaker——
The SPEAKER. The Chair would like to inquire of the gentleman from Alabama [Mr. Clayton] what has become of the original resolution.

Mr. CLAYTON. The gentleman from Alabama left it with the Clerk yesterday and has not seen it since that time. I now yield to the gentleman from Wisconsin [Mr. Nelson]

15 minutes

Mr. NELSON. I will yield back whatever time I do not

The SPEAKER. The gentleman from Wisconsin [Mr. Nel-

son] is recognized for 15 minutes.

Mr. NELSON. Mr. Speaker, judging from observations in committee, reports in the newspapers, remarks in this House, and discussions in another body, it may be well for some of us who represent the minority on the Judiciary Committee to briefly supplement what was said by our distinguished chairman to the House on yesterday with reference to this pending

There are gentlemen, able, learned, upright, who have serious misgivings as to the proposed method of ascertaining the facts with reference to the official conduct of members of the They raise the issue of the source of the information, In plain terms, they question the propriety or the right of the Attorney General of the United States to order investigation by examiners of the good behavior of any of the judges of the country. Now, I am going to spend but a moment or two on that issue. I regard it as a side issue, and it may as well be settled at some other time as now—indeed, rather so.

On this subject much may be said pro and con. It may be easy to imagine that some time some Attorney General, actuated by intense partisanship, or personal malice, or moved by outside evil influences, may build up a system of esplonage upon the judges of the country whereby he might be enabled to intimidate a timid judge or bias the opinions of a weak judge. But it is inconceivable, at least for me, how any judge will be biased in his judicial action by any examination such as this, if he is honorable, if he is honest, if he is incorruptible. These virtues of common honesty and honor and incorruptibility are as transplendent in the judicial office as elsewhere, when subjected to the bright light of the living day. We can imagine cases, I say, conjure up cases, but this is a real case which is before us, and as a member of the committee, acting in a common-sense, practical way, I have not seen any earmarks of malice or partisanship or any other evil influence in this case any more than was seen in the Archbald case, and if we are to criticize the present Attorney General or the preceding Attorney General, we must do so by blaming them for erring on the side of justice, of seeking to maintain judicial integrity, and to

perpetuate this branch of the Government in the confidence of

the American people.

Now, there are other gentlemen who insist upon the technique of parliamentary procedure, and rightly so. It is important that these proceedings should be begun in an orderly way, and it is the usual thing for some Member of the House to rise in his seat and impeach a judge, and offer a resolution preferring charges, which are referred to the Judiciary Committee, and then reported back to the House. But in this case, and in the Archbald case, we have had the assistance of the Department of Justice in ascertaining the facts, and having investigated the Archbald case I find them identical, except that Judge Norris introduced a resolution calling for certain facts. There was no speech made by him and no charges preferred. Now, this House There was no is as safe, it seems to me, in following the suggestions of the Judiciary Committee, the action of 23 attorneys, representing all three parties, as it would be in following the initiative of any individual Member who might arise upon the floor of the House and make an impeachment charge. It is well to be regular, but it is not always necessary to follow in the rut of regularity.

Now, the facts are these: We have these charges before the committee, and the committee has investigated them in a general way, and finds them sufficiently serious, sufficiently grave, to warrant something being done. In general, I may say that they go to the mental capacity of the judge, charging that he is unfit to execute his office because he is addicted to the use of They go to his official conduct, charging that he is unfair, arbitrary, and oppressive; that in fact a fair trial in his court is almost impossible. In a measure, they go to his official integrity, alleging that he uses funds deposited with officials in his court, and that it is difficult to get them back at times; that he uses the servants of the court in his private domestic service, and that he permits a son-in-law, a practitioner before his court, to be appointed and reappointed receiver, and so forth, and that this son-in-law and others eat up receivers funds through excessive fees.

In general terms the charges are of this nature. Now, what shall we do with them? They are before us. Shall we accept them? Obviously not, because this judge has written to the committee a long letter, insisting that he is innocent of these charges and asking to be heard, saying that during his twenty or more years of service on the bench he has discharged his duties fairly and justly as a judge. But are we to reject them or to suppress them? Obviously not, because these litigants and the members of the bar in that judicial circuit have rights that we

can not ignore.

But above our duty to the judge, above our duty to these litti-gants and members of the bar, we owe a duty to the bench of the United States, which ought not to be demoralized by the misconduct of any one judge when attention is called to his conduct, and no judge should be permitted to besmirch the ermine of the bench under any such conditions as are alleged here. But before our duty to the bench, even, is our duty to the people of this country. Now that the demand for the recall of judges is being heard with increasing insistence, now that a political party has made the recall of judicial decisions one of its platform planks, we ought to the fullest possible extent make use of the machinery which the Constitution has placed in our hands to enforce judicial integrity, however complicated and cumbersome it may seem to many. If it is important that we of the legislative branch should be honest, honorable, upright men in the making of the laws or else forfeit our seats; if it is important that the members of the Cabinet in the executive branch should be honorable, upright, and honest men in administering the law or be removed, surely it is still more important that the members of the judiciary, who are free from the temptations and the turmoil and the strife of party elections and party politics, set apart as they are by the Constitution in a peculiarly dignified place, should, like Cæsar's wife, not only be virtuous, but free from the very suspicion of venality or corruption.

The Constitution has pointed the way for us. We have the sole power of impeachment, but our duties and our powers are cir-cumscribed and limited. We have not the right to try, but we have the right to exercise the functions of a grand jury. The Senate tries. We are not to convict this judge, but we ought to be sure that we have a prima facie case and we can not then take this report alone, however well it may be backed up with affidavits or other exhibits. We ought to see the witnesses. We ought to look into their faces. We ought to make inquiries as to all matters of doubt, and then report to the House. We as

a committee

Mr. HARDY. Mr. Speaker, will the gentleman yield for one

question?

The SPEAKER. Does the gentleman from Wisconsin yield to the gentleman from Texas?

Mr. NELSON. In just a minute. We as a committee have these charges before us. We have looked them over. We find them sufficiently grave to report the facts as they are before us to the House and to ask for your instructions; and if you desire us to continue to investigate and report upon them to the House, we ask for authority to enable us to do so.

Now I will yield to the gentleman from Texas.

Mr. HARDY. I will ask the gentleman to state how this matter got before his committee. If it was not by a motion of the House or resolution of the House, how did it get before the committee?

Mr. NELSON. The Attorney General of the United States on his own motion transmitted a report of a special examiner, he having designated that examiner to look into certain charges of misconduct that had come to him as the Attorney General with reference to this judge, and submitted the report of that

examiner to the committee to do with as it pleased.

Mr. HARDY. If that report of the Attorney General had been transmitted to the Speaker of the House for such action as the House might see proper, would it not then have been necessary to have some motion to refer it to that committee? In other words, I desire to know how it leaped through the House to the committee. A little attention to that detail would have brought this matter properly before the committee for full investigation

Mr. NELSON. Answering the gentleman, I will say that the Attorney General undoubtedly followed the procedure in the Archbald case-

Mr. MANN. Oh, no.

Mr. NELSON. Let me qualify that. He followed that procedure, except that there a Member, Judge Norms, introduced a resolution calling for certain facts, or asking if those facts had been found with reference to a judge, naming him, I think. That resolution went to the Judiciary Committee. No speech was made and no charges were made. On Judge Norms's statement to the Judiciary Committee that committee found that the resolution ought to go to the Attorney General, and the House agreed with the Judiciary Committee.

In response to that inquiry the President of the United States transmitted a letter to the Speaker, but I believe he sent the proofs to the Judiciary Committee, and he said, in substance, that he sent the documents to the Judiciary Committee because it was not advisable that the charges should all be made public; that some of them might be of an inconsequential nature, and that they ought not to be made public until the Judiciary Committee had sifted them and ascertained whether

they were worthy of attention or not.

Mr. HARDY. Do I understand the attitude of the Judiciary Committee is, in effect, the same as offering a resolution submitting this matter to them for investigation?

Mr. NELSON. We initiate this procedure in this way, asking

an instruction from the House.

Mr. HARDY. What would be the difference between your doing that and some individual Member introducing a resolution to the same purport?

Mr. NELSON. It seems to me this is a better way. Mr. MANN. Will the gentleman yield?

Mr. NELSON. Yes.

Mr. MANN. As I understand, this communication was sent by the Attorney General directly to the Judiciary Committee or its chairman.

Mr. NELSON. To the chairman of the Judiciary Committee. Mr. MANN. Evidently the Attorney General does not feel that he is required to be conversant with the rules of the House, and he plainly is not, because Rule XLI of the House provides that all communications from the executive departments intended for the consideration of any committee of the House shall be addressed to the Speaker and referred as provided by the rules.

Mr. NELSON. That may be so.
The SPEAKER. The time of the gentleman from Wisconsin

[Mr. Nelson] has expired.

Mr. CLAYTON. Mr. Speaker, in view of the publicity given to this matter through the medium of the press, and the desire of the judge and his friends to know what these charges are, I deem it important to give a summary of them to the House at this time. They charge the judge with having violated section 67 of the Judicial Code in allowing his son-in-law, Mr. A. H. Hayward, to be appointed to and employed in offices and duties in his court; with the violation of the bankruptcy act, in allowing compensation in excess of the provisions of that act to a trustee who was his personal friend; a violation of the laws in drawing juries; a violation of a mandate of the Supreme Court of the United States; oppressive and corrupt use of his official position in deciding cases unjustly in favor of his son-in-law;

unlawful and corrupt conduct in proceedings in cases wherein his son-in-law had a contingent fee; corrupt and unwarranted abuse of his official authority in using court officials who were paid by the Government as private servants without rendering any service to the Government; oppressive and corrupt conduct in allowing the dissipation of assets of bankruptcy estates by the employment of unnecessary officials and the payment of excessive fees; oppressive and corrupt abuse in granting orders appointing receivers for property without notice to the owners and without cause, resulting in great loss to the parties; oppressive and corrupt abuse of authority in refusing to allow the dismissal of litigation for the purpose of permitting relatives and favorites to profit by the receipt of large fees; improper if not corrupt abuse of authority in taking or causing to be taken money from the court fund for his private use; oppressive conduct in entertaining matters beyond his jurisdiction, fining parties, and the like; unlawful and oppressive conduct in defying the mandate of the circuit court of appeals; oppressive conduct in allowing money to remain on deposit without interest in banks in which relatives or friends were And there is also some evidence adduced before the committee of the judge having allowed excessive fees to receivers for improper purposes, and also corrupt conduct in raising the amount of fees allowed to others in order that his son-in-law might profit thereby; attempted bribery of officials appointed to act as custodians; oppressive conduct in unlawfully seizing and selling property; the use of drugs; general and unlawful oppressive conduct for his own private ends.

Mr. Speaker, accompanying this report to which I referred in my remarks of yesterday there are a number of affidavits and other documents, including photostat copies of documents. The report, with accompanying exhibits, I have in my hand, and it is now in the possession of the House. As I suggested on yesterday, it being in the possession of the House fol-lowing the precedent set in the Archbald case, I think, and the committee thinks, that no further details should be given in this matter until the committee, under the authority of the

House, has made further investigation.

But the committee deems it proper, in view of what occurred yesterday and what has appeared in the press, that I should make this statement, which is merely supplemental to the excellent statement which my associate on the committee, Mr. Nelson, made this morning. Therefore, Mr. Speaker, I ask that the amendment to the resolution which I have sent to the desk be agreed to.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 2, by inserting after the word "House," in line 19 and before the semicolon, the following: "On vouchers ordered by the Committee on the Judiciary, signed by the chairman thereof and approved by the committee on Accounts and evidenced by the signature of the chairman thereof."

The SPEAKER. The question is on agreeing to the amend-

The amendment was agreed to.

Mr. CLAYTON. Mr. Speaker, I now ask that the resolu-tion as amended be agreed to by the House.

The question was taken, and the resolution as amended was agreed to.

On motion of Mr. CLAYTON, a motion to reconsider the vote whereby the resolution was agreed to was laid on the table.

JOINT SESSION OF SENATE AND HOUSE.

At 12 o'clock and 50 minutes p. m. the Doorkeeper announced the Vice President of the United States and the Members of the United States Senate.

The Members of the House rose.

The Members of the House lose.

The Senate, preceded by the Vice President and by its Secretary and Sergeant at Arms, entered the Chamber.

The VICE PRESIDENT took the chair at the right of the Speaker, and the Members of the Senate took the seats reserved for them.

The SPEAKER. The Chair announces as a committee on the part of the House to wait upon the President, Representatives UNDERWOOD, FITZGERALD, and MANN. The Vice President will announce the committee on the part of the Senate.

The VICE PRESIDENT announced as the committee on the part of the Senate, Senators BACON, WILLIAMS, and ROOT.

ADDRESS OF PRESIDENT WILSON.

At 12 o'clock and 57 minutes p. m. the President of the United States, attended by members of his Cabinet and escorted by the joint committee of the Senators and Representatives, entered the Hall of the House, standing at the Clerk's desk, amid applause on the floor and in the galleries.

The PRESIDENT. Gentlemen of the Congress, it is clearly my duty to lay before you, very fully and without reservation,

the facts concerning our present relations with the Republic of The deplorable posture of affairs in Mexico I need not Mexico. describe, but I deem it my duty to speak very frankly of what this Government has done and should seek to do in fulfillment of its obligation to Mexico herself, as a friend and neighbor, and to American citizens whose lives and vital interests are daily affected by the distressing conditions which now obtain beyond our southern border.

Those conditions touch us very nearly. Not merely because they lie at our very doors. That of course makes us more vividly and more constantly conscious of them, and every instinct of neighborly interest and sympathy is aroused and quickened by them; but that is only one element in the determination of our duty. We are glad to call ourselves the friends of Mexico, and we shall, I hope, have many an occasion, in happier times as well as in these days of trouble and confusion, to show that our friendship is genuine and disinterested, capable of sacrifics and every generous manifestation. The peace, prosperity, and contentment of Mexico mean more, much more, to us than merely an enlarged field for our commerce and enterprise. They mean an enlargement of the field of self-government and the realization of the hopes and rights of a nation with whose best aspirations, so long suppressed and disappointed, we deeply sympathize. We shall yet prove to the Mexican people that we know how to serve them without first thinking how we shall serve ourselves.

But we are not the only friends of Mexico. The whole world desires her peace and progress; and the whole world is interested as never before. Mexico lies at last where all the world looks on. Central America is about to be touched by the great routes of the world's trade and intercourse running free from ocean to ocean at the Isthmus. The future has much in store for Mexico, as for all the States of Central America; but the best gifts can come to her only if she be ready and free to receive them and to enjoy them honorably. America is particular—America north and south and upon both continents waits upon the development of Mexico; and that development can be sound and lasting only if it be the product of a genuine freedom, a just and ordered government founded upon law. Only so can it be peaceful or fruitful of the benefits of peace. Mexico has a great and enviable future before her, if only she choose and attain the paths of honest constitutional government.

The present circumstances of the Republic, I deeply regret to say, do not seem to promise even the foundations of such a peace. We have waited many months, months full of peril and anxiety, for the conditions there to improve, and they have not improved. They have grown worse, rather. The territory in some sort controlled by the provisional authorities at Mexico City has grown smaller, not larger. The prospect of the pacification of the country, even by arms, has seemed to grow more and more remote; and its pacification by the authorities at the capital is evidently impossible by any other means than force. Difficulties more and more entangle those who claim to constitute the legitimate government of the Republic. They have not made good their claim in fact. Their successes in the field have proved only temporary. War and disorder, devastation and confusion, seem to threaten to become the settled fortune of the distracted country. As friends we could wait no longer for a solution which every week seemed further away. It was our duty at least to volunteer our good offices-to offer to assist, if we might, in effecting some arrangement which would bring relief and peace and set up a universally acknowledged political authority there.

Accordingly, I took the liberty of sending the Hon. John Lind, formerly governor of Minnesota, as my personal spokesman and representative, to the City of Mexico, with the following instructions:

Press very earnestly upon the attention of those who are now exercising authority or wielding influence in Mexico the following considerations and advice:

The Government of the United States does not feel at liberty any lenger to stand inactively by while it becomes daily more and more evident that no real progress is being made toward the establishment of a government at the City of Mexico which the country will obey and respect.

of a government at the City of Mexico which the country will obey and respect.

The Government of the United States does not stand in the same case with the other great Governments of the world in respect of what is happening or what is likely to happen in Mexico. We offer our good offices, not only because of our genuine desire to play the part of a friend, but also because we are expected by the powers of the world to act as Mexico's nearest friend.

We wish to act in these circumstances in the spirit of the most earnest and disinterested friendship. It is our purpose in whatever we do or propose in this perplexing and distressing situation not only to pay the most scrupulous regard to the sovereignty and independence of Mexico—that we take as a matter of course to which we are bound by every obligation of right and honor—but also to give every possible evidence that we act in the interest of Mexico alone, and not in the interest of any person or body of persons who may have personal or property claims in Mexico which they may feel that they have the

right to press. We are seeking to counsel Mexico for her own good and in the interest of her own peace, and not for any other purpose whatever. The Government of the United States would deem itself discredited if it had any selfish or ulterlor purpose in transactions where the peace, happiness, and prosperity of a whole people are involved. It is acting as its friendship for Mexico, not as any selfish interest, dictates.

The present situation in Mexico is incompatible with the fulfillment of international obligations on the part of Mexico, with the civilized development of Mexico herself, and with the maintenance of tolerable political and economic conditions in Central America. It is upon no common occasion, therefore, that the United States offers her counsel and assistance. All America cries out for a settlement.

A satisfactory settlement seems to us to be conditioned on—

(a) An immediate cessation of fighting throughout Mexico, a definite armistice solemnly entered into and scrupulously observed;

(b) Security given for an early and free election in which all will agree to take part;

(c) The consent of Gen. Huerta to bind himself not to be a candidate for election as President of the Republic at this election; and

(d) The agreement of all parties to abide by the results of the election and cooperate in the most loyal way in organizing and supporting the new administration.

The Government of the United States will be glad to play any part in this settlement or in its carrying out which it can play honorably and consistently with international right. It pledges itself to recognize and in every way possible and proper to assist the administration chosen and set up in Mexico in the way and on the conditions suggested.

Taking all the existing conditions into consideration, the Government of the United States can conceive of no reasons sufficient to justify those who are now attempting to shape the policy or exercise the authority of Mexico in declining the offices of friendship thus offered. Can Mexico gi

Mr. Lind executed his delicate and difficult mission with singular tact, firmness, and good judgment, and made clear to the authorities at the City of Mexico not only the purpose of his visit but also the spirit in which it had been undertaken. But the proposals he submitted were rejected in a note, the full text

of which I take the liberty of laying before you.

I am led to believe that they were rejected partly because the authorities at Mexico City had been grossly misinformed and misled upon two points. They did not realize the spirit of the American people in this matter, their earnest friendliness and yet sober determination that some just solution be found for the Mexican difficulties; and they did not believe that the present administration spoke, through Mr. Lind, for the people of the United States. The effect of this unfortunate misunderstanding on their part is to leave them singularly isolated and without friends who can effectually aid them. So long as the misunderstanding continues we can only await the time of their awakening to a realization of the actual facts. We can not thrust our good offices upon them. The situation must be given a little more time to work itself out in the new circumstances; and I believe that only a little while will be necessary. For the circumstances are new. The rejection of our friendship makes them new and will inevitably bring its own alterations in the whole aspect of affairs. The actual situation of the authorities at Mexico City will presently be revealed.

Meanwhile, what is it our duty to do? Clearly everything that we do must be rooted in patience and done with calm and disinterested deliberation. Impatience on our part would be childish, and would be fraught with every risk of wrong and We can afford to exercise the self-restraint of a really great nation which realizes its own strength and scorns to misuse it. It was our duty to offer our active assistance. It is now our duty to show what true neutrality will do to enable the people of Mexico to set their affairs in order again and wait for a further opportunity to offer our friendly counsels. The door is not closed against the resumption, either upon the initiative of Mexico or upon our own, of the effort to bring order out of the confusion by friendly cooperative action, should fortunate

occasion offer.

While we wait the contest of the rival forces will undoubtedly for a little while be sharper than ever, just because it will be plain that an end must be made of the existing situation, and that very promptly; and with the increasing activity of the contending factions will come, it is to be feared, increased danger to the noncombatants in Mexico as well as to those actually in the field of battle. The position of outsiders is always par-ticularly trying and full of hazard where there is civil strife and a whole country is upset. We should earnestly urge all Americans to leave Mexico at once, and should assist them to get away in every way possible—not because we would mean to slacken in the least our efforts to safeguard their lives and their interests, but because it is imperative that they should take no unnecessary risks when it is physically possible for them to leave the country. We should let every one who assumes to exercise authority in any part of Mexico know in the most unequivocal way that we shall vigilantly watch the fortunes of those Americans who can not get away, and shall

hold those responsible for their sufferings and losses to a definite reckoning. That can be and will be made plain beyond the possibility of a misunderstanding.

For the rest, I deem it my duty to exercise the authority conferred upon me by the law of March 14, 1912, to see to it that neither side to the struggle now going on in Mexico receive any assistance from this side the border. I shall follow the best practice of nations in the matter of neutrality by for-bidding the exportation of arms or munitions of war of any kind from the United States to any part of the Republic of Mexico—a policy suggested by several interesting precedents and certainly dictated by many manifest considerations of practical expediency. We can not in the circumstances be the partisans of either party to the contest that now distracts Mexico, or constitute ourselves the virtual umpire between

I am happy to say that several of the great Governments of the world have given this Government their generous moral support in urging upon the provisional authorities at the City of Mexico the acceptance of our proffered good offices in the spirit in which they were made. We have not acted in this matter under the ordinary principles of international obligation. the world expects us in such circumstances to act as Mexico's nearest friend and intimate adviser. This is our immemorial relation toward her. There is nowhere any serious question that we have the moral right in the case or that we are acting in the interest of a fair settlement and of good government, not for the promotion of some selfish interest of our own. If further motive were necessary than our own good will toward a sister Republic and our own deep concern to see peace and order prevail in Central America, this consent of mankind to what we are attempting, this attitude of the great nations of the world toward what we may attempt in dealing with this distressed people at our doors, should make us feel the more solemnly bound to go to the utmost length of patience and forbearance in this painful and anxious business. The steady pressure of moral force will before many days break the barriers of pride and prejudice down, and we shall triumph as Mexico's friends sooner than we could triumph as her enemies-and how much more handsomely, with how much higher and finer satisfactions of conscience and of honor!

I thank you, gentlemen. [Applause on the floor and in the galleries.

At 1 o'clock and 23 minutes p. m. the President and his Cabinet retired from the Hall of the House.

The SPEAKER. The joint convention is dissolved.

Thereupon the Vice President and the Members of the Senate

returned to their Chamber.

The SPEAKER. The President's address will be printed, together with the accompanying documents, and referred to the Committee on Foreign Affairs. (H. Doc. No. 205.)

### ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do' now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 27 minutes p. m.) the House, under its order previously agreed to, adjourned to meet on Friday, August 29, 1913, at 12 o'clock

#### EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination and survey of Fairport Harbor, Ohio, with a view to enlarging and improving the outer harbor area (H. Doc. No. 206); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

2. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of Rockhall Harbor, Md., with a view to extending navigation beyond its present head (H. Doc. No. 207); to the Committee on Rivers and Harbors and ordered to be printed with illus-

tration.

3. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of canal from St. Johns River, Fla., to Lake Beresford, with a view to making a cut-off from the river to Lake Beresford near Da Land River Landing (H. Doc. No. 208); to the Committee on Rivers and Harbors and ordered to be printed with illus-

4. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on prelimi-

nary examination and survey "from deep water to Oyster, Va. (H. Doc. No. 209); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

5. A letter from the Commissioner of Patents, transmitting the report of the business of the Patent Office for the year ended December 31, 1912 (S. Doc. No. 946); to the Committee on Patents and ordered to be printed.

#### CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 941) granting a pension to Sarah E. Dillon; Committee on Invalid Pensions discharged, and referred to the

Committee on Pensions. A bill (H. R. 4998) granting a pension to Thomas M. Carew Birmingham; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

### PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memo-

rials were introduced and severally referred as follows:

By Mr. RAKER: A bill (H. R. 7825) reappropriating and making available for the fiscal year ending June 30, 1914, the unexpended balance of the appropriation of \$15,000 for improvements at Fort Bidwell School, in California, under the act of August 24, 1912; to the Committee on Appropriations.

By Mr. KEATING: A bill (H. R. 7826) to provide for the closing of barber shops in the District of Columbia on Sunday;

to the Committee on the District of Columbia.

By Mr. JOHNSON of Washington: Joint resolution (H. J. Res. 124) requesting the Secretary of War to submit to Congress a supplementary report on the project for the improve-ment of the mouth of the Columbia River; to the Committee on Rivers and Harbors.

By Mr. DYER: Resolution (H. Res. 236) to print an original article read in the general session of the Missouri State Medical

Association, at the fifty-sixth annual meeting, held at St. Louis, May 13 to 15, 1913; to the Committee on Printing. By Mr. ESCH: Memorial of the Legislature of Wisconsin memorializing Congress to amend section 5219 of the Revised Statutes of the United States, relating to the taxation by the several States of shares of stock in national banking associations; to the Committee on Ways and Means.

Also, memorial of the Legislature of Wisconsin memorializing Congress to adopt Senate joint resolution 131 and H. R. 16808, introduced during the second session of the Sixty-second

Congress; to the Committee on the Judiciary.

### PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOWDLE: A bill (H. R. 7827) granting an increase

of pension to Theodore Elchlepp; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7828) granting an increase of pension to Anna Mary Huenemann; to the Committee on Invalid Pensions. Also, a bill (H. R. 7829) granting a pension to Mary Craig;

to the Committee on Invalid Pensions.

Also, a bill (H. R. 7830) granting a pension to Emma Fox; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7831) granting a pension to Sarah A. Shinkle; to the Committee on Pensions.

By Mr. DUPRÉ: A bill (H. R. 7832) granting an increase of pension to Emily Waters; to the Committee on Invalid Pensions. By Mr. KIESS of Pennsylvania: A bill (H. R. 7833) granting an increase of pension to Sarah Jane Burroughs; to the Committee on Invalid Pensions.

#### PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid

on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of Local Union No. 3; United Brotherhood of Carpenters and Joiners of America, at Wheeling, W. Va., favoring a change in the present form of government; to the Committee on the Judiciary.

By Mr. ESCH: Petition of the Brotherhood of Locomotive

Firemen and Enginemen, at Peoria, Ill., favoring adoption of electric headlights and safety appliances on road engines; to the Committee on Interstate and Foreign Commerce.

By Mr. PETERS (by request): Petition of Central Committee of the Socialist Party, of Boston, Mass., and the Boston Socialist Club with regard to Patrick Quinlan; to the Committee on the Judiciary.

By Mr. RAKER: Papers to accompany bill (H. R. 1514) for

the relief of Bert Harris; to the Committee on Claims.

Also, petition of the voters of Pike, Cal., favoring Senate

joint resolution No. 1, extending the right of suffrage to women; to the Committee on the Judiciary.

#### SENATE.

# THURSDAY, August 28, 1913.

The Senate met at 11 o'clock a. m. Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D.

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Borah Brady Smith, Ariz. Smith, Ga. Smith, S. C. Smoot Hitchcock Oliver James Johnson Jones Overman Owen Page Penrose Brady Brandegee Bristow Bryan Catron Chilton Clapp Colt Kenvon Sterling Sterling
Stone
Sutherland
Thomas
Thompson

Vardaman
Weeks
Williams
Works Perkins Poindexter Pomerene Kern La Follette Lea Lippitt Lodge McCumber McLean Martin, Va. Martine, N. J. Reed Robinsen Root Shafroth Crawford Cummins Dillingham Sheppard Sherman Shively Simmons Works Myers Norris Gallinger

Mr. McCUMBER. My colleague [Mr. Gronna] is necessarily

absent.

Mr. SHEPPARD. My colleague, the senior Senator from Texas [Mr. Culeerson], is unavoidably absent. He is paired with the Senator from Delaware [Mr. DU PONT]. nouncement may stand for the day.

Mr. SMOOT. I desire to announce that the senior Senator from Delaware [Mr. Du Pont] and the junior Senator from Wisconsin [Mr. Stephenson] are detained from the Senate on

account of illness.

Mr. GALLINGER. I make a similar announcement concern-

ing the junior Senator from Maine [Mr. Burleigh].

The VICE PRESIDENT. Sixty-two Senators have answered to the roll call. There is a quorum present. The Secretary will read the Journal of the proceedings of the preceding day.

#### THE JOURNAL.

The Journal of yesterday's proceedings was read and approved.

# MEMORIALS.

Mr. OLIVER presented a memorial of the directors and officers of the First National Bank of Swissvale, Pa., remonstrating against the enactment of legislation to provide for the establishment of Federal reserve banks, for furnishing elastic currency, affording means of rediscounting commercial paper, and to establish a more effective supervision of banking in the United States, and for other purposes, which was referred to the Committee on Banking and Currency.

Mr. ROOT presented a memorial of the De Laval Separator Co., of Poughkeepsie, N. Y., and of the Iowa Dairy Separator Co., of Waterloo, Iowa, remonstrating against the placing of centrifugal cream separators on the free list, which was

ordered to lie on the table.

### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McLEAN:

A bill (S. 3056) granting an increase of pension to Annie M. Johnson (with accompanying papers); to the Committee on Pensions.

By Mr. LEA (by request):

A bill (S. 3057) for the adjudication and determination of the claims arising under joint resolution of July 14, 1870, authorizing the Postmaster General to continue in use in the postal service Marcus P. Norton's combined postmarking and stamp-canceling hand-stamp patents or otherwise; to the Committee on Claims.

### AMENDMENT TO THE TARIFF BILL.

Mr. HITCHCOCK. I desire to ask for a reprint as cor-Mr. HITCHCOCK. I desire to ask for a reprint as corrected of the amendment which I offered on yesterday providing for the taxation of trusts, by striking out, on page 2, line 21, the words "a year." The reprint is rendered necessary on account of the typographical error.

The VICE PRESIDENT. The amendment will lie on the table and will be reprinted as corrected at the request of the

Senator from Nebraska.

NATIONAL CONSERVATION EXPOSITION, KNOXVILLE, TENN.

Mr. LEA submitted the following resolution (S. Res. 175) which was referred to the Committee on Industrial Expositions: Whereas the National Conservation Exposition is to be held at Knox-ville, Tenn., from September 1, 1913, to October 31, 1913, inclusive;

Whereas this exposition has for its purpose the emphasizing of the necessity for conservation of all natural resources of the country and the study of the best methods of forwarding this movement; and Whereas the officers of the said National Conservation Exposition have requested the honor of the presence of Members of the Senate of the United States at some time during said exposition, to be designated by the Senate: Therefore be it *Resolved*, That the President of the Senate be empowered to appoint a committee of seven Members which will accept this invitation on the part of the Senate and visit said exposition at some time to be agreed upon between the members of said committee and the president of the exposition.

#### SUBJECT INDEX TO CONGRESSIONAL RECORD.

Mr. LEA submitted the following resolution (S. Res. 176) which was referred to the Committee on the Library:

which was referred to the Committee on the Library:

Resolved, That the Committee on the Library be empowered and directed to cause to be made a subject index of the contents of the Congressional Record, in the nature of a digest reference of the speeches, debates, and subjects introduced into the Record, to be supplementary to the present form of index, to begin with the Sixty-second Congress and go back Congress by Congress to the beginning of the publication of the Record, to be printed for use as each Congress is completed. The index shall be by subjects, with the names of the Senators or Representatives who are the authors attached to each reference.

That they shall also cause to be made and maintained a current subject index to begin with the Sixty-third Congress and go forward, to be in addition to the present form of index.

That the committee shall employ for constructing such subject index a capable man with expert knowledge of public affairs and intelligent conception of the subject matter of legislation and discussion in Congress, who shall, when so selected, become an official employee of the Senate and go upon its rolls and be paid \$3,600 per year for his services. That the subject index be paid \$3,600 per year for his services. That the subject index be paid \$3,600 per year for his services. That the subject index be paid \$3,000 per year for his services. That the subject index of credit of \$200 per year in the stationery room of the Senate for office stationery and supplies.

#### PERSONAL EXPLANATION.

Mr. POINDEXTER. Mr. President, I rise to a question of personal privilege. I send to the Secretary's Gesk and ask to have read a publication which recently appeared in a newspaper published in the city of Scattle, in the State of Wash-

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

POINDEXTER CLAN CLUTTERS PUBLIC OFFICE PAY ROLL—ALLEGED FRIEND OF THE PEOPLE GRABS ALL PATRONAGE FOR RELATIVES—TAKES CARE OF VIRGINIA—FAMILY ALSO GETS FAT PRICE FROM GOVERNMENT FOR ESTATE IN SOUTH—WASHINGTON SENATOR SOON AFFER BUYS IMPOSING HOME IN CAPITAL—GETTING VEFY GOOD FOR THE POINDEXTERS.

The Progressive Senator from Washington, Miles Toindexter, a supporter of conservation, unloads Virginia mountain land owned by his family on the Forest Service for \$30,000.

He buys an imposing home in Washington following this sale.
Poindexter has no appointments for party supporters in his own State, but has put three brothers, one son, six cousins, and the wife of a seventh cousin on the Federal pay roll since he entered Congress.
These relatives are:
Ernest Poindexter,
William Poindexter,
William Poindexter,
Gale Poindexter.
Eugene Poindexter.
Carlton D. Poindexter.
Maj. Jefferson D. Poindexter.
Maj. Jefferson D. Poindexter.
Mrs. Anna L. Poindexter.
Mrs. Anna L. Poindexter.
Samuel J. Graham.

Samuel J. Graham.

The unnamed Poindexter is on the navy-yard pay roll at Washington, D. C., and the son, Gale Poindexter, is a midshipman at Annapolis. The first three named are brothers of the Progressive Senator, the fourth is his son, and the seven last are cousins.

Mr. POINDEXTER. Mr. President, this is the first time in more than four years' service in Congress that I have risen to a question of personal privilege. In general, it is not a good practice to speak of one's private and personal affairs in public, for two reasons. First, it is an imposition on the public which has to listen, and, second, it is an embarrassment to the individual whose private affairs are exposed to the public gaze. I would not have done so in this case, but for the fact that this libelous publication has been printed and reprinted throughout the Nation, and on account of its specific and circumstantial statements seems to receive

more credence than such publications usually meet with. Furthermore, it involves a number of other people besides myself, who are outraged by the false statements made concerning them and who are entitled to have the matter corrected. There is also another reason, the more important one, perhaps, namely, that the honor of this great tribunal is itself concerned in the conduct of every Member of it. If the matter has been called to your attention you are entitled to know all the facts concerning it. I have too great a respect for the Senate of the United States even to pretend that I am indifferent to an attack upon the integrity or even the propriety of my conduct here.

I have not asked that the entire article be read, as it is somewhat lengthy, but what has been read covers the essential points. The publication states that I have secured Government positions for 11 relatives, whose names are given, as follows: Ernest Poindexter, William Poindexter, Fielding L. Poindexter, Gale Poindexter, Eugene Poindexter, Carlton D. Poindexter, Robert H. Poindexter, Maj. Jefferson D. Poindexter, Mrs. Anna L. Poindexter, Poindexter, Samuel J. Graham.

The truth is that I do not know Eugene Poindexter, Robert H. Poindexter, Maj. Jefferson D. Poindexter, Mrs. Anna L. Poindexter, or Poindexter. I have never had any correspondence with them or with anyone on their behalf, and never heard of them until my attention was called to the publication referred to. I do not know whether they are holding Government positions or not. If they are holding such positions I had nothing whatever, directly or indirectly, to do with the same.

Of the others named-Ernest Poindexter, Fielding L. Poindexter, and Samuel J. Graham-Ernest Poindexter does not hold any Government position, and, as far as I am aware, never has held any, except that in 1900 he assisted in taking the Federal census at Walla Walla, Wash., which employment lasted

for a few weeks.

Fielding L. Poindexter is a first lieutenant, retired, in the United States Army. He was appointed second lieutenant after serving as a private in the Oregon Volunteers in the war in the Philippine Islands. He was highly commended for voluntarily exposing himself under fire in a special duty. After returning to this country and many years before I was a Member of Congress, and on account of the strong recommendations of his superior officers, he was commissioned a recond lieutenant, and was later promoted first lieutenant and retired. Since then he has at various times been employed in active service as military instructor in certain schools and as recruiting officer at different points, and acted in both of these capacities long before I became a Member of Congress.

Samuel J. Graham is a distant cousin of mine, but does not owe his appointment to me in any sense whatever. His home is in Pittsburgh, Pa. He was the leader of the Wilson forces in the primary campaign in western Pennsylvania, and later was one of the Wilson managers on the floor of the Baltimore convention. He is a gentleman of excellent character and a lawyer of ability. He owes his position to his own standing and to the support of influential Members of Congress from Pennsylvania

and many other States.

Carlton D. Poindexter I have had some correspondence with, and received a call from him on one occasion in this city. He lives in West Virginia, and is not a relative of mine unless it be that some centuries back we may have had a common ancestor. He had a clerkship under the Isthmian Canal Commission, which, I believe, was in the classified service and was given to him under the rules of that service after an examination. My impression is that he gave up the position some years ago,

although I am not sure as to that,

Gale Poindexter is my son. I notice the charge is made that when appointed to Annapolis he was accredited to the State of Washington. In view of the fact that he was born in the State of Washington and has lived there all his life, he being now 20 years of age, I know of no reason why he should not be ac-credited to that State. His mother was born and has lived all of her life in the State of Washington; his grandfather, Thomas Page, lived in Walla Walla and did his full share as a leader in peace and war to hold and develop that great valley; his great-grandfather, Joseph Gale, was a member of the first executive committee which governed the Oregon colony. Joseph Gale built the first ship that was constructed on the Pacific coast and navigated it from the Columbia River to San Francisco, where he exchanged it for cattle, which he brought back to the Willamette Valley. He was one of the great free spirits whose genius and courage put the Oregon colony on a substantial footing and laid the foundations for four Commonwealths of the Union. He was one of the noted "mountain men" who, always pressing forward, carried civilization inland from the Willa-mette Valley. Nevertheless the publication referred to inti-mates that his great-grandson, Gale, is an alien to that land.

I think the editor of the publication has been in the State two years and, of course, may have some superior claims upon the State. This vicious libeler has lived two years in the State of Washington and thinks he has now been there long enough to be the arbiter as to who should and who should not be accredited to the State. A short time ago this editor conducted a Democratic paper in this city, whence he went direct to conduct a standpat Republican paper in Seattle. He was a complete failure, for a reason indicated by his name—Bone—more Bone than otherwise, too much Bone. A failure else here, he will be a failure in Seattle. We have come upon degenerate times and customs in some respects, but we have not yet become so wholly corrupt that a man without regard for truth or justice can make a permanent success in the newspaper business.

It seems to be claimed that my son should not have been appointed to Annapolis at all. I was not aware that young men in this country were barred absolutely the opportunity of service in the Army or Navy because their fathers were in Congress. Perhaps, however, that is the case according to the very high standards of the newspaper referred to. My understanding has always been in regard to this and other similar matters, that the proper rule is that all should be treated alike; that there should be no favor or discrimination one way or the other. I think myself that discrimination one way would

be as bad as the other way.

I did not appoint my son to Annapolis. He was appointed by Representative William L. La Follette, however, at my and my son's suggestion and request. I suppose, however, that Representative LA Folletts would not have appointed him except that in his judgment the appointment was proper and At any rate, it was passed upon and acted upon not by myself but by Representative La Follette, and it was for the very reason that I desired it to be so that I did not make the appointment myself. It is also true that at the same time, at Representative La Follette's request, I appointed Earl Chambers, of Spokane, to the West Point Military Academy. In this I also acted upon my own judgment as to the propriety of the appointment. In fact, as the record will show, I had previously appointed Earl Chambers to Annapolis, and he had failed in the entrance examinations, and could not be appointed to Annapolis by Representative La Follette, because he had passed the age limit for admission to that academy. I was so impressed, however, with his perseverance and excellent character and disposition that I was glad, not only on Representative LA Follette's request but on my own account, to give him the appointment to West Point.

I believe the only other person mentioned in the list of 11 "nepotes" by the paper referred to is my brother, William Poindexter, and out of the 11 persons named this is the only one in regard to whom the allegation is true. I did appoint him to a position in the folding room of the Senate, and he filled the position for some time and did the work required, although recently he has been compelled by ill health to be absent, and is

now in a hospital.

The malice of the paper referred to is indicated by its repetition of the false statement after it had been informed of its utter falsity. In fact, the original publication shows on its face that the editor knew it to be false at the time it was published. For instance, it lists Maj. Jefferson D. Poindexter as one of the horde of relatives for whom it alleges I have obtained appointments, yet in the same article is the admission that the said Maj. Jefferson D. Poindexter—whom I do not know—"entered the Government service without aid from the Progressive Senator."

If there is any Senator in this body who can say that I have ever requested his support for a relative of mine for office, I would ask him to state it now or hereafter, so that it may be printed in the Record, where Mr. Bone can read it. I do not

recall any such request.

In the same article there is an insinuation that I had some corrupt connection with the sale to the Government of lands in Virginia in which I was interested. This is as utterly false as the statements referred to above. Of course, with the vindictiveness of this paper, if there is any record or proof to support their allegation that I "unloaded Virginia mountain land on the Forest Service," they will produce it. They have not produced it, because no such fact exists. The sale referred to was of a portion of the estate of my grandfather, Judge Francis T. Anderson, in Rockbridge County, Va. It was negotiated with the Forest Service by the executor of the estate, my uncle, Hon. William A. Anderson, of Lexington, Va. I did not suggest it to him, and had absolutely no connection with the matter from beginning to end. I had originally a slight interest in the land sold, but long before the sale had assigned that interest.

In the search of this editor for misconduct I am charged also with the crime of buying a house. It is true that I have bought a small house at a modest price. Not a dollar of the money from the sale of the Anderson land in Virginia was invested in this house, for the very good reason, as stated above, that my interest in it was long before assigned to persons in the State of Washington, the details of which can easily be produced, if necessary.

I will state, in addition, that I have never spoken or written a word to any Government official in regard to that sale. I only had a very slight interest in it—I think a forty-second interest.

If this editor had broadened the scope of his investigation, he would have found that in my disreputable career this is not the only offense of this kind I have committed, but that at other times and places, in the last quarter of a century, in different States, both before and since I became a Member of Congress, I have been guilty of buying houses and paying on those in the State of Washington my share of the exorbitant taxes which the political ring, of which this newspaper is the principal exponent,

has imposed upon the people of my State.

The article which the Clerk has read is a criminal libel. Its malice is demonstrated by its repetition in the same paper, and by enlargements upon it in the most offensive form of which petty vindictiveness is capable. It is of the same class of weapons in common use by the criminal interests by which this interest-serving paper is controlled and in which it is a common partner. It is in the same class as murder by the robber syndicate of Alaska, kidnaping and assassination with dynamite and pistol by the franchise grabbers of San Francisco, and the bribery of judges and packing of juries in the State of Washington by the same railroad company which supplied the money for the purchase of this paper from its former owners. ring and the interests they represent seem to want to make this a war of extermination. I often wonder if they imagine that in such a war they will be the ones who will survive. There can be only one kind of liberty in this country, and that is liberty subject to and regulated by law. It is singular that the proprietors of these property interests can not see that when they leave that safe highway there is no other way by which they may be saved. When they pack juries and corrupt elections, as they have done so often, they are striking at the foundations of their own castle. When they institute a war of fraud and slander and take up the torch and stiletto of the Mafia and Camorra they can not complain when the evil day comes.

It is said that incendiary speeches, denouncing the flag and the law, were made recently in Seattle by orators of the so-called I. W. W.'s. Forthwith, in order to cure the I. W. W.'s of incendiarism and teach them to respect the law and honor the flag, a mob broke into the I. W. W.'s rooms and made a bondire of their property. The mob was led by United States sailors and incited by the same type of paper of which I am speaking. It was a fine example of obedience to law and respect for the flag. Of course it will have the same beneficent effect that all such object lessons have. However, if I were leading or inciting the game of torches I should want to be sure that I lived myself in an asbestos house. "They who live by the sword shall die

by the sword."

It is our good fortune, however, to have our habitation in a land where public opinion is sovereign and just. We are members of a people who have decreed in their hearts that the law shall be supreme; that there shall be no discrimination as to persons, whether the disturber of the peace be a thieving corporation, an I. W. W. wind jammer, an incendiary mob, or a libelous newspaper. The ignorant and poverty-stricken alien who talks lawlessness should be punished, but for every year of his incarceration the bandits of big business and their literary prostitutes, like this man Bone, who act lawlessness, should serve 10 years in prison. A hired criminal libeaer is in the same class as a hired murderer. Nothing would do this country more good to-day than that they and those who hire them should have a chance to learn what the flag really represents as it waves over a penitentiary in which they are confined at hard labor. Their present course illustrates that perfectly familiar but yet quaintly curious wise saying, "Whom the Gods would destroy they first make mad."

#### THE TARIFF.

Mr. SIMMONS. I ask unanimous consent that the Senate proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

and for other purposes.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Wisconsin [Mr. La Follette].

Mr. LA FOLLETTE. On that I ask for the yeas and nays, Mr. President.

The yeas and nays were ordered.

Mr. ASHURST. Mr. President, I ask that the pending question may be stated.

The VICE PRESIDENT. The Secretary will state the amendment proposed by the Senator from Wisconsin, which is

the pending question.

The Secretary. The amendment is to strike out all after the word "exceeds" in line 19, page 165, all of lines 20 and 21, page 165, down to and including "\$100,000," in line 3, page 166, and insert in lieu thereof the following: "\$10,000 and does not exceed \$20,000, and 11 per cent per annum upon the amount by which the total net income exceeds \$20,000 and does not exceed \$30,000, and 2 per cent per annum upon the amount by which the total net income exceeds \$30,000 and does not exceed \$40,000, and 2½ per cent per annum upon the amount by which the total net income exceeds \$40,000 and does not exceed \$50,000, and 3 per cent per annum upon the amount by which the total net income exceeds \$50,000 and does not exceed \$60,000, and 4 per cent per annum upon the amount by which the total net income exceeds \$60,000 but does not exceed \$70,000, and 5 per cent per annum upon the amount by which the total net income exceeds \$70,000 but does not exceed \$80,000, and 6 per cent per annum upon the amount by which the total net income exceeds \$80,000 but does not exceed \$90,000, and 7 per cent per annum upon the amount by which the total net income exceeds \$90,000 but does not exceed \$100,000, and 10 per cent per annum upon the amount by which the total net income exceeds \$100,000."

Mr. SIMMONS. I suggest the absence of a quorum, Mr.

President.

The VICE PRESIDENT. The absence of a quorum being

suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators

answered to their names:

Gallinger Hollis Ashurst Bacon Borah Bradley Norris Shively Norris Oliver Overman Page Penrose Perkins Poindexter Simmons Smith, Ariz, Smith, Ga. Hughes James Johnson Brady .* Brandegee Smoot Sterling Kenyon Kern La Follette Sutherland Thomas Thompson Bristow Pomerene Ransdell Bryan Catron Chilton Clapp Colt Lea Lippitt Reed Robinson Townsend Vardaman Lodge McCumber McLean Martin, Va. Myers Nelson Root Saulsbury Shafroth Walsh Weeks Williams. Crawford Cummins Dillingham Fall Sheppard Sherman

Mr. RANSDELL. I wish to announce that my colleague, the senior Senator from Louisiana [Mr. Thornton], is unavoidably absent on important business. I ask that this announcement

stand for the day.

The VICE PRESIDENT. Sixty-two Senators have answered the roll call. There is a quorum present. The question is on the amendment proposed by the Senator from Wisconsin [Mr. LA FOLLETTE], on which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. ASHURST (when his name was called). Mr. President, I have been assured by leading members of the Finance Committee that the necessary alteration will 'e made in the present condition of the bill, so that incomes over \$100,000 a year will be taxed properly. I vote "nay."
Mr. WILLIAMS. Mr. President, I do not know that I under-

stood the Senator.

Mr. LA FOLLETTE. The roll call is proceeding, as I understand.

The VICE PRESIDENT. The roll call is proceeding.
Mr. WILLIAMS. If the Senator from Arizona was in order,

Mr. PENROSE and other Senators. Regular order!

Mr. WILLIAMS. I simply desire to say that nobody had a right to give such assurance.

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jackson], which I transfer to the junior Senator from Tennessee [Mr. Shields] and will vote. I vote "nay."

Mr. DILLINGHAM (when his name was called). I have a

general pair with the senior Senator from Maryland [Mr. SMITH]. As he is absent this morning, I withhold my vote.

Mr. McCUMBER (when Mr. Gronna's name was called). My colleague is necessarily absent. He has a pair with the junior Senator from Illinois [Mr. Lewis]. I will allow this announcement to stand for all votes during the day.

Mr. McCUMBER (when his name was called). I have a general pair with the senior Senator from Nevada [Mr. New-LANDS]. As he is absent, I will withhold my vote,

Mr. OLIVER (when his name was called). I have a general pair with the senior Senator from Oregon [Mr. CHAMBERLAIN]. As he is absent, and not knowing how he would vote if present, I withhold my vote.

Mr. REED (when his name was called). I have a pair with the senior Senator from Michigan [Mr. SMITH], which I transfer to the junior Senator from Oklahoma [Mr. GORE] and will vote. I wish to be permitted to say that I am voting under the impression and belief, which is very firm with me, that this matter will be further considered and will come up again, Under those circumstances I vote "nay."

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). The senior Senator from Michigan is absent from the Senate on important business. He is paired with the junior Senator from Missouri [Mr. REED]. I desire to have this

announcement stand for the day.

Mr. SUTHERLAND (when his name was called). I understand the senior Senator from Arkansas [Mr. CLARKE] is not present. I have a pair with that Senator and therefore withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from Ohio [Mr. BURTON], which I transfer to the senior Senator from Louisiana [Mr. THORNTON] and will vote. I vote "nay."

Mr. THOMPSON (when his name was called). With the

assurance that I have received-

Mr. GALLINGER. Mr. President, debate is not in order.

SEVERAL SENATORS. Regular order! Mr. THOMPSON. I vote "nay."

Mr. PERKINS (when the name of Mr. Works was called). My colleague [Mr. Works] is temporarily absent on official business. If he were present, he would vote "yea."

The roll call was concluded, Mr. SAULSBURY. I am requested to announce that both Senators from Oregon [Mr. Chamberlain and Mr. Lane] are absent on official business.

Mr. STONE. I transfer the general pair I have with the senior Senator from Wyoming [Mr. Clark] to the senior Senator from Nebraska [Mr. HITCHCOCK] and will vote. I vote nay."

Mr. SMOOT, I am requested to announce that the senior Senator from Washington [Mr. Jones] has been called from the Chamber on account of public business. If he were pres-

the Chamber on account of public business. If he were present, he would vote "yea."

Mr. FLETCHER. I am paired with the junior Senator from Wyoming [Mr. Warren]. I transfer that pair to the junior Senator from Oregon [Mr. Lane] and will vote. I vote "nay."

Mr. GALLINGER (after having voted in the negative). I inquire if the junior Senator from New York [Mr. O'Gorman]

has voted?

The VICE PRESIDENT. He has not.

Mr. GALLINGER. I have a general pair with that Senator. I transfer that pair to the junior Senator from Maine [Mr. BURLEIGH] and will allow my vote to stand.

I have been requested to announce pairs between the senior Senator from Delaware [Mr. DU PONT] and the senior Senator from Texas [Mr. Culberson], the junior Senator from West Virginia [Mr. Goff] and the Senator from Alabama [Mr. BANKHEAD], and the junior Senator from Wisconsin STEPHENSON] and the senior Senator from South Carolina [Mr.

The result was announced-yeas 17, navs 43, as follows:

So Mr. LA FOLLETTE's amendment was rejected.

Mr. BRISTOW. Mr. President, I offer an amendment, which I send to the desk

The VICE PRESIDENT. The amendment will be stated. The Secretary. The Senator from Kansas [Mr. Bristow]

offers the following amendment:

offers the following amendment:

On page 165, in line 6, before the figure "1," insert "½ of," and in line 18, before the figure "1," insert "½ of"; in line 19 strike out "\$20,000" and insert in lieu thereof "\$10,000"; in line 20 strike out "\$50,000" and insert in lieu thereof "\$20,000," and strike out the figure "2" and insert in lieu thereof the figure "1."

On page 166, in line 1, strike out "\$50,000" and Insert in lieu thereof "\$20,000," and strike out the figure "2" and insert in lieu thereof "\$30,000 and strike out "\$100,000" and insert in lieu thereof "\$30,000," and strike out "\$100,000" and insert in lieu thereof "\$30,000, and a strike out "\$100,000" and the period and insert lieu thereof "\$30,000 and does not exceed \$40,000, and 2 per cent per annum upon the amount by which the total net income exceed \$50,000, and 2 per cent per annum upon the amount by which the total net income exceed \$50,000 and does not exceed \$50,000 and does

Mr. BRISTOW. Mr. President, on yesterday I offered an amendment providing for a graduated scale, adding 1 per cent additional tax for each additional \$10,000 of income, making the total tax 10 per cent on an income of \$100,000. Objection was made to that by the Senator from Mississippi [Mr. WILLIAMS], in charge of this part of the bill, upon the ground that it would provide too much revenue, thereby giving us more money than is needed. To meet that objection, I have prepared an amendment which starts with one-half of 1 per cent on less than \$10,000, and then adds, as an additional rate, one-half of 1 per cent for each additional \$10,000 of income until \$100,000 is reached, when the tax becomes 5 per cent, and all over \$100,000 is taxed at 5 per cent.

This would bring in approximately the same revenue as the provision in the bill. It is not as much money as I think we ought to raise from incomes. The tax is not as high as I think it ought to be, but it is higher on the large incomes than the

present bill provides.

Mr. GALLINGER. Mr. President-The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from New Hampshire?

Mr. BRISTOW. I do.

Mr. GALLINGER. Do I understand the Senator to say that the aggregate amount collected under the provisions of this amendment would be approximately the same as that collected under the bill itself?

Mr. BRISTOW.

Mr. GALLINGER. The only difference being that there is a larger percentage assessed on the large incomes?

Mr. BRISTOW. And a smaller percentage on the small

Mr. LODGE. It is better proportioned.

Mr. BRISTOW. Yes; it is better proportioned.
To illustrate: On an income of \$10,000 the tax under this amendment will be \$35, while under the bill it will be \$70; on an income of \$20,000, under my amendment it will be \$135, while under the bill it will be \$170; on \$30,000, under my amendment it will be \$285 and under the bill \$370; on \$40,000, under my amendment it will be \$485 and under the bill \$570; on \$50,000, under my amendment it will be \$735 and under the bill \$770; on \$60,000, under my amendment it will be \$1,035 and under the bill \$1,070; on \$70,000, under my amendment it will be \$1,385 and under the bill \$1,370; on \$80,000, under my amendment it will be \$1,785 and under the bill \$1,670; on \$90,000, under my amendment it will be \$2,235, while under the bill it will be \$1,970; on \$100,000, under my amendment it will be \$2,735, while under the bill it will be \$2,270. Under my amendment it will be 5 per cent on all incomes over \$100,000. while under the bill it will be 4 per cent on all incomes over \$100,000. As nearly as can be estimated, I think that the gross collection under this amendment will be about the same as under the bill.

Mr. SUTHERLAND. Mr. President-Mr. BRISTOW. I yield to the Senator.

Mr. SUTHERLAND. I call the attention of the Senator from Kansas to the fact, which he very well understands, that the number of incomes of \$10,000 and less will be very much greater than those above that amount. I wish to ask the Sena-tor whether he has taken that into consideration in making his estimate?

Mr. BRISTOW. I have.

Mr. SUTHERLAND. If the Senator will permit, it seemed to me, as I listened to the figures the Senator gave, that the amount of the assessment under his proposed amendment is not

as much as the amount proposed by the pending bill until we reach the income of something over \$40,000-

Mr. BRISTOW. Yes; \$60,000.
Mr. SUTHERLAND. Sixty thousand dollars, which would cause me to think that probably his amendment would not produce as much revenue as the proposed amendment of the committee.

Mr. BRISTOW. Of course, it is impossible to tell, but the committee estimates that the large collection under the committee bill will be on the incomes ranging from \$50,000 up. Under the estimate of the committee the incomes from \$100,000 to \$250,000 will bring \$11,650,000, and the largest collection that will be made will be on incomes of more than \$100,000.

Mr. SUTHERLAND and Mr. BORAH addressed the Chair. The VICE PRESIDENT. Does the Senator from Kansas

yield, and to whom?

Mr. BRISTOW. I yield first to the Senator from Utah. Mr. SUTHERLAND. I was going to make one other suggestion.

Mr. BRISTOW. There will be just as much money collected under this amendment as under the law as proposed if any reliance whatever can be made upon the committee estimate as to the size of the income which will pay the greater amount of the tax.

Mr. SUTHERLAND. As I understand this amendment, if it will raise as much revenue as that proposed by the committee I intend to support it, because I think it is a very much better arrangement than that proposed by the committee. As I said yesterday in speaking about the former amendment proposed by the Senator from Kansas, I think the proposition of the committee is altogether unscientific; the gap between \$50,000 and \$100,000 is too large a gap to make in arranging the graduated scale.

I was going to suggest to the Senator from Kansas whether it would not be better if he would begin his assessment at half of 1 per cent on incomes between \$1,500 and \$5,000, 1 per cent

between \$5,000 and \$10,000, and then on up.

Mr. BRISTOW. I did not want to inject that element of discussion into this amendment. It is a separate proposition as to whether we are assessing a tax on low enough incomes. That is a different proposition from the graduation of the tax that is assessed, and there is a wide difference of opinion among those who favor an income tax as to the amount of exemptions. I did not want to involve that question in this amendment.

Mr. SUTHERLAND. Then I make this suggestion to the Senator, in order that it may be certain that there will be as much revenue raised by this proposed amendment as under the bill: Would the Senator object to making the initial figure 1 per cent instead of half of 1 per cent, and then going up by steps of half a cent each time until we reach the \$100,000 income, which would be taxed at the rate of 51 per cent?

Mr. BRISTOW. I could not favor that because that taxes the man with less than \$10,000 at a higher rate than the man with more than \$10,000. I do not think that we ought to put a larger percent of tax on the man with the lower income.

Mr. SUTHERLAND. It puts a higher tax all the way up the

Mr. BRISTOW. But I have all that worked out. If I do that I will meet with the same objection that I met with yesterday in the first amendment, because that will raise a good deal more money than the present bill will raise. If you take that, then the assessment on \$100,000 would be \$32,020, which would be all right, and it would be \$70 on the \$10,000 man, and it would raise a good deal more money than the bill as it is presented to us.

To satisfy Senators that this amendment will raise as much revenue as the bill as proposed I want to call attention to the estimate given in the report. It is estimated that on incomes above \$50,000 there will be \$45,000,000 collected out of the \$70,000,000. The estimate of the committee is that there will be \$25,000,000 collected on incomes less than \$50,000 under the committee rates and \$45,000,000 will be collected on incomes above \$50,000. On every income of less than \$50,000 I have reduced the rate. On most of the incomes above \$50,000 I have increased the rate. The committee estimate here that \$35,-000,000, or half of the revenue from this income tax, will be collected from parties whose income is more than \$100,000 per If half of it is collected on incomes of more than annum. \$100,000 per annum on all those incomes, I add one additional per cent, making it 5 per cent instead of 4 per cent.

Mr. BRISTOW subsequently said: I ask permission to have incorporated in my remarks a table showing the amount that would be paid on each one of the divisions suggested in the

amendment I offered.

The PRESIDING OFFICER (Mr. SMITH of Georgia in the chair). Is there any objection? The Chair hears none, and it will be so ordered.

The table referred to is as follows:

Tan on incomes to \$100 000

Incomes.	Revenue collected on maxi- mum amount each division.1	on maxi- mum amount each
Up to \$10,000 at \( \frac{1}{2} \) per cent.  From \$10,000 to \$20,000 at \( \frac{1}{2} \) +\( \frac{1}{2} \) per cent=1 per cent.  From \$20,000 to \$30,000 at \( \frac{1}{2} \) +\( 1 \) per cent=1\( 1 \) per cent.  From \$30,000 to \$40,000 at \( \frac{1}{2} \) +\( 1 \) per cent=2\( \frac{1}{2} \) per cent.  From \$30,000 to \$50,000 at \( \frac{1}{2} \) +\( 2 \) per cent=2\( \frac{1}{2} \) per cent.  From \$50,000 to \$50,000 at \( \frac{1}{2} \) +\( 2 \) per cent=3\( \frac{1}{2} \) per cent.  From \$70,000 to \$50,000 at \( \frac{1}{2} \) +\( 2 \) per cent=4\( \frac{1}{2} \) per cent.  From \$80,000 to \$90,000 at \( \frac{1}{2} \) +\( 4 \) per cent=4\( \frac{1}{2} \) per cent.  From \$80,000 to \$100,000 at \( \frac{1}{2} \) +\( 4 \) per cent=4\( \frac{1}{2} \) per cent.	\$35 135 285 485 735 1,035 1,385 1,785 2,235 2,735	\$70 170 370 579 770 1,070 1,370 1,670 1,970 2,270

1 Proposed amendment.

2 Committee bill.

Mr. BORAH. Mr. President-

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Idaho?

Mr. BRISTOW. I do. Mr. BORAH. I am not going to suggest to the Senator to amend his amendment and I am going to vote for it, but I want it understood that in doing so I do it as a concession to a situation. I am thoroughly of the opinion that when a man has an income of \$20,000 there ought to be a different rate established from that which the amendment provides for. must remember that in computing an income for the purpose of a normal tax there should be allowed as deductions, according to the amendment of the committee-

First, the necessary expenses actually paid in carrying on any business, not including personal, living, or family expenses; second, all interest paid within the year by a taxable person on indebtedness; third, all national, State, county, school, and municipal taxes paid within the year, not including those assessed against local benefits; fourth, losses actually sustained during the year, incurred in trade or arising from fires, storms, or slipwreck, and not compensated for by insurance or otherwise; fifth, debts due to the taxpayer actually ascertained to be worthless and charged off within the year; sixth, a reasonable allowance for the exhaustion, wear, and tear of property arising out of its use or employment in the business, not to exceed, in the case of mines, 5 per cent of the gross value at the mine of the output for the year for which the computation is made.

Mr. President, when you get a net income of \$20,000 with those exemptions and exceptions you have a vast estate behind

Mr. CUMMINS. Mr. President-

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Iowa?

Mr. BRISTOW. I do.

I will say in regard to what has just been Mr. CUMMINS. mentioned by the Senator from Idaho I suppose we must assume that these deductions will finally receive the approval of a majority of the Senate. But I desire to say now that in so far as I am concerned I shall insist that some of them ought not to be made, and when we reach that part of the bill I intend to offer amendments which will change the bill in that There are some of these deductions which obviously ought not to be made in ascertaining net incomes.

Mr. BORAH. Mr. President, the deductions will likely have the same place in the bill after we get through as what we

find at present in the bill with reference to the rates

Mr. CUMMINS. I am afraid that is true, but I did not want it to be assumed so far as I am concerned that I believe the committee reached the right conclusion with regard to these deductions

Mr. BRISTOW. Mr. President, referring to the statement of the Senator from Idaho [Mr. BORAH], I agree with him. I do not think this tax is high enough. We tried yesterday to get an amendment that levied a higher tax than this. The amendment I offered yesterday imposed a tax of \$270 on a man with an income of \$20,000-I think a reasonable tax, certainly not excessive-and the amendment went up by steps until a man who has an income of more than \$100,000 was assessed a little over \$5,000 a year. I think that amendment should have been adopted, but it was defeated by the Senate by a very

The Senator from Wisconsin [Mr. LA FOLLETTE] offered an amendment here this morning that has been voted upon and which has been defeated. That rate was slightly less on the smaller incomes than that which I offered yesterday, and it has been defeated.

The argument made yesterday, and the only argument practically against my amendment, was that it would raise too much money. I do not think it would, but I meet that argument by offering an amendment which graduates it and makes the amount on an income of more than \$100,000 pay a larger per cent of the tax in proportion than the bill at present provides on these incomes. Where we collect, according to this estimate, approximately half on incomes of over \$100,000 this amendment of mine would levy a tax of 5 per cent, 1 per cent more than the committee proposes. On the smaller incomes it levies a less tax. It graduates it, I think, in a better way. A man whose income is a million dollars will pay a good deal more tax under this amendment than under the provision of the Senate committee, and I think he ought to pay more. It does not jump from \$50,000 to \$100,000, but it goes up \$10.000 at a step and adds one-half per cent for each step until we reach \$100,000.

Mr. GALLINGER. Will the Senator permit me?

Mr. BRISTOW. I yield to the Senator from New Hampshire, Mr. GALLINGER. Mr. President, I voted against the amendment that the Senator from Kansas offered, as well as against the amendment the Senator from Wisconsin offered, for reasons entirely satisfactory to myself. It seems to me that the amendment now offered by the Senator from Kansas is a very wise one, provided he is satisfied it will raise as much revenue as the provision in the bill.

If I had my way about it, I would increase the rate for the lower salaries to three-fourths of 1 per cent in place of onehalf of 1 per cent, making it quite certain that we would get more money from the large class of taxpayers who will pay on smaller amounts. But, however that may be, I am so impressed with the idea myself that the enormously rich men can well afford to pay a larger amount than is provided in the bill under consideration I have brought myself to the view that I can properly and safely vote for the amendment the Senator has proposed

Mr. BRISTOW. Replying to the Senator from New Hampshire, I will say that the estimate of the committee is that on the small incomes of less than \$10,000 the collections will be only about \$6,000,000. Under the 1 per cent on incomes less than \$10,000 the committee estimates that at that rate the revenue will aggregate only about \$6,000,000-

Mr. GALLINGER. I had not looked at the report, and I am quite surprised to note that that is the estimate, because I had

supposed it was very much larger.

Mr. BRISTOW. While the committee estimates that on the incomes from \$50,000 to \$100,000 there will be collected \$11,-560,000, and between \$100,000 and \$250,000 they estimate \$11,-650,000. So on the incomes from which we are to receive the large returns this amendment of mine increases the rate. think it will really collect more money than the proposed law If any reliability whatever can be placed on these estimates. Mr. LODGE. Mr. President, it has seemed to me in regard

to the provisions in the bill, whether the House or Senate committee provision, the proportion is bad. If we are to have a graduated income tax it ought to be the first condition that it shall be properly proportioned. It seems to me, not only in the amendment but in the proposition of the House, it is ill proportioned, owing to the great gaps that are made and that it falls unduly hard upon the smaller or the more moderate incomes. I am speaking only of incomes subject to taxation. It seems to me also, as well as I can judge, that the amendment now offered by the Senator from Kansas will unquestionably raise more money than the one offered by the committee.

Mr. BRISTOW. I think it will,

Mr. LODGE. If we are to have a graduated income tax, this is much better proportioned and much better arranged than the others, and I propose to vote for it.

Mr. TOWNSEND. Mr. President, my belief is that whatever amendment we propose should be offered on the supposition that it ought to be enacted into law. I have not knowingly voted for anything that I did not believe would make the measure better.

I realize, of course, that amendments offered by the minority, whatever their merits, will be defeated.

Yesterday I opposed what seemed to me to be an effort to increase the revenues above what it was clearly understood would be required for meeting the expenses of the Government. The Senator from Wisconsin [Mr. La Follette] offered an amendment to-day which proposed to reduce the revenues to a considerable extent, as I understand the figures, below those which would have been raised by the amendment offered by the Senator from Kansas [Mr. Bristow] yesterday, and I could vote for it. The present proposition reduces it still more, and brings the amount of the revenue to be derived practically to the same relative amount as that proposed to be raised by the bill. Therefore I shall vote for it.

The thing that I would do if I had the authority just now is this: I would take the duties off from certain noncompetitive articles that are shipped into the United States, because I know that in every such instance the tax levied is paid by the consumer without producing any good or benefit to anybody in the United States. I would take off those duties and so reduce the revenues provided in the bill, and I would make up the deficit this would create in the estimate made by the committee by increasing the taxes which are to be imposed upon incomes

I have no objection to increasing the rates provided they are equitably distributed. As I said yesterday, I should like to begin lower with a very small rate and increase it as the incomes increase. This plan of increasing the revenues from incomes while reducing it. like amount the duties on noncompeting articles would maintain the equilibrium of the bill and at the same time present a proposition for which all who are in favor of proper income rates could vote without any question as to whether they are doing right or wrong. With me, income taxes are imposed for no other purpose than that of raising money to meet the expenses of government economically administered.

I have had some talk with Senators this morning, and, as I understand, before this bill is disposed of a proposition will be presented to the Senate whereby we as Republicans can vote to remove what we regard as the unnecessary rates of duty and at the same time supply the amount of revenue thereby done

away with by increasing the taxes on incomes.

Mr. BORAH. Mr. President, I did not understand the statement of the Senator from Michigan as to what proposition it

was that was going to be submitted to the Senate.

Mr. TOWNSEND. A proposition to remove certain duties now imposed on noncompeting articles to be shipped into the United States and increasing the tax on incomes, so as to produce enough revenue from that source to offset the revenue that would be destroyed by taking off such duties from noncompeting articles.

Mr. BORAH. Do I understand that we are to have a voice in taking those duties off and a voice in fixing the rates or

graduating rates on incomes?

Mr. TOWNSEND. There is no reason why it should not be

Mr. BORAH. There is no reason why it should not be done,

except the question of votes. Mr. TOWNSEND. But we will have as many votes for such a proposition as we will have for the amendment now pending.

We will have more votes for it.

Mr. SMOOT. Mr. President, as nearly as I can figure, the amendment offered by the Senator from Kansas [Mr. Bristow] this morning will bring more revenue than the pending bill provides. I think also that the amount that has been estimated by the committee on incomes under \$20,000 will be greater than the estimate shows. The estimate of the committee is based upon the amount collected during war times, when the last in-come tax was in force in this country, and the committee has taken the volume of business of that day and compared it with the volume of business to-day.

Mr. WILLIAMS. That income tax was not repealed for

some time after the war.

Mr. SMOOT. I repeat, the committee has taken the volume of business at the time the income tax was collected and compared it with the volume of business of to-day, and compared the amount that was collected at the time that we formerly had an income tax with the amount that we shall collect under this bill.

Mr. GALLINGER. Mr. President, can the Senator from Utah state or can the Senator from Mississippi state the exact date when that tax was repealed? I know it was some time after

the war.

Mr. WILLIAMS. I am just trying to refresh my memory. It was quite a while after the war; I think about 1871.

Mr. GALLINGER. About 1871.

About 1870 or 1871, as I remember.

WILLIAMS. I thought it was about 1871. So the standard taken was not altogether a war standard. It was after the war as well as during the war.

Mr. SMOOT. That is true, but the income tax was collected until the time when the law imposing it was repealed. estimate was made from the time that the income tax was first imposed until the time it was repealed.

I believe, Mr. President, that the amount of income in this country to-day is in greater proportion to the business that is done to-day than the amount of the income during the sixties was to the amount of business that was done at that time.

Mr. WILLIAMS. That tax was levied in 1862 and went into

operation in 1863, I think,

Mr. SMOOT. So, Mr. President, there is no question in my mind but what the amount will be collected that is estimated in the handbook furnished us by the committee. It is my opinion that it will be a great deal more than that amount.

Mr. President, I should like to ask the Sena-Mr. KENYON. tor from Kansas [Mr. Bristow] a question, to make the matter clear before voting. I understand under the amendment proposed by the Senator from Kansas incomes from \$20,000 to \$50,000 will bear a less tax than under the pending bill.

Mr. BRISTOW. Yes. Mr. KENYON. What about those above that amount?

Mr BRISTOW. Above \$60,000 they will bear a heavier tax. Mr. KENYON. From \$40,000 to \$60,000 is the rate practically the same as in the pending bill?

Mr. BRISTOW. It is slightly less.

Is it substantially less for incomes from Mr. KENYON. \$20,000 to \$40,000?

Mr. BRISTOW. Under the amendment it is \$35 on less than \$10,000, and under the bill it is \$70; on \$20,000 it is \$135, while under the bill it is \$170. It then gradually goes up until it passes \$60,000; then, when it gets up to \$100,000, it is 25 per cent more than in the pending bill.

Mr. ROOT. Mr. President, has the Senator from Kansas noted the probable returns from each class as he has figured it out? He mentioned some I noticed a little while ago.

Mr. BRISTOW. I have undertaken to make a comparison with the estimates made by the committee. My own judgment is that those estimates are not of very great value, because I think experience is the only thing that can inform us.

The committee estimates that on incomes less than \$10,000

there will be collected approximately \$6,000,000; on incomes between \$10,000 and \$20,000 the committee estimates there will be collected approximately \$7,500,000. That is under the bill as reported by the committee. On incomes from \$20,000 to \$50,000 the committee estimates that there will be collected \$11,500,000, approximately; from \$50,000 to \$100,000 there will be collected \$11,560,000; from \$100,000 to \$250,000 there will be collected \$11,650,000; from \$250,000 to \$500,000 there will be collected \$6,743,000; from \$750,000 to \$1,000,000 there will be collected \$9,190,000; on over \$1,000,000 there will be collected \$5,826,000. Those are the committee estimates.

Now, I propose to increase the tax on the incomes that would make up about \$45,000,000 of the \$70,000,000. I decrease the tax on incomes that would make up \$25,000,000 of the \$70,000,000. On the larger incomes, as I have stated, the increase is 25 per cent over the pending bill and on the smaller incomes it is less than the rate in the pending bill.

Mr. SUTHERLAND. The estimate made by the committee, which has just been read by the Senator from Kansas, is that there will only be \$6,000,000 realized from the tax upon incomes under \$10,000, which would be considerably less than one-teuth of the entire amount realized. To me that is a manifest absurdity.

Outside of a few of the large cities of the country, such as New York, Boston, Chicago, and Philadelphia, I venture to say that there will be more than a fourth or a third of the amount derived under the income-tax provision of the bill from incomes under \$10,000. In my own State, for example, I do not suppose there is a man in the whole State who receives year after year an income of \$50,000, certainly not more than one or two; in fact, I doubt very much whether there are many who are receiving an income of more than \$30,000 a year.

The vast proportion of the people are receiving an income of less than \$10,000; so that in a State like Utah and the adjoining States of Wyoming, Idaho, Kansas, and Nebraska, great agricultural States, I would imagine that anywhere from a half to three-fourths of the revenue derived in those States would result from the tax upon incomes of less than \$10,000. To say, taking the country at large, that less than 10 per cent of the entire amount to be realized from the income tax will be derived from incomes of less than \$10,000 is absurd.

I think the amendment proposed by the Senator from Kansas will produce less, rather than more, income, and, while I intend to vote for it, I would much prefer that the Senator had begun at 1 per cent on incomes under \$10,000, and risen by successive steps until he finally reached the amount of 5½ per cent, instead of 5 per cent, on the larger incomes.

Mr. SMOOT. Mr. President, my opinion is that it will clearly raise more, for the reason that during the years 1862 to 1870 or 1871, when the income tax was in force, there were very few individuals, institutions, or corporations in this country that had an income of \$20,000 per annum, or even \$10,000 per annum, while to-day there are thousands of them. It is that particular bracket of the income-tax provision which, in my opinion, is going to increase greatly the revenue received.

Mr. SUTHERLAND. But this is not a tax on the income of corporations; the tax is on the stockholders of corporations.

Mr. SMOOT. Yes; but the income of a corporation goes to the stockholders, so, of course, will amount to exactly the same thing in the end. I am only calling attention to the matter. The money made by these institutions goes to the stockholders, and there is no doubt that in this country to-day there are hundreds of thousands of well-to-do men, whereas in 1865, 1866, and during the years immediately following the Civil War there were but few of them. I believe that the committee's estimate on the first bracket is unreasonably low, and I shall be greatly surprised if instead of \$6,000,000 under that bracket the amount collected will not be twenty or twentyfive million dollars.

The PRESIDING OFFICER. The question is on agreeing to

the amendment offered by the Senator from Kansas.

Mr. BRISTOW. I should like the yeas and nays on the amendment.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BANKHEAD (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. Goff] to the senior Senator from Louisiana [Mr. Thornton], and will vote. I vote "nay."

Mr. DILLINGHAM (when his name was called). pair upon this question with the Senator from Maryland [Mr. SMITH]. If he were present I should vote "yea."

absence I withhold my vote.

Mr. GALLINGER (when his name was called). I transfer my pair with the junior Senator from New York [Mr. O'Gor-MAN] to the Senator from Maine [Mr. Burleigh] and vote "yea.

Mr. TOWNSEND (when the name of Mr. Jones was called). The senior Senator from Washington [Mr. Jones] has been called from the Chamber on official business. If he were here,

I am instructed to say that he would vote "yea."

Mr. KERN (when his name was called). I transfer my pair with the Senator from Kentucky [Mr. Bradley] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "nay.

Mr. LEWIS (when his name was called). I am paired with

the Senator from North Dakota [Mr. Gronna]

Mr. McCUMBER (when his name was called). I have a general pair with the senior Senator from Nevada [Mr. New-LANDS]. I will transfer that pair to the senior Senator from Washington [Mr. Jones] and vote "yea."

Mr. REED (when his name was called). I transfer my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Oklahoma [Mr. Gore] and vote "nay."

Mr. THOMAS (when his name was called). I transfer my pair with the Senator from Ohio [Mr. Burton] to the junior Senator from Oregon [Mr. LANE] and vote "nay."

Mr. TILLMAN (when his name was called). I have a general pair with the Senator from Wisconsin [Mr. Stephenson] and therefore withhold my vote.

The roll call was concluded.

Mr. SUTHERLAND (after having voted in the affirmative). I have a pair with the Senator from Arkansas [Mr. Clarke]. I voted without reflection. Observing that pair, I withdraw my

Mr. STONE. I have a general pair with the Senator from Wyoming [Mr. CLARK]. I transfer that pair on this vote to the Senator from Oklahoma [Mr. Owen] and vote "nay.

Mr. FLETCHER. I have a pair with the Senator from Wyoming [Mr. Warren]. I transfer that pair to the junior Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. CHILTON. I have a general pair with the Senator from Maryland [Mr. Jackson] and therefore withhold my vote. If permitted to vote, I should vote "nay."

The result was announced-yeas 29, nays 36, as follows:

		NS-29.	, 40 201101121

So Mr. Bristow's amendment was rejected.

Mr. McCUMBER. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated. The Secretary. On page 165, line 6, after the word "tax," it is proposed to strike out all the words down to the word "All," in line 3, page 166, and to insert in lieu thereof the following:

in line 3, page 166, and to insert in lieu thereof the following:

Where such income amounts to \$1,000 and less than \$5,000 the rate of taxation shall be one-tenth of 1 per cent; where such income amounts to \$5,000 and less than \$10,000 the rate of taxation shall be two-tenths of 1 per cent; where such income amounts to \$10,000 and less than \$20,000 the rate of taxation shall be three-tenths of 1 per cent; where such income amounts to \$20,000 and less than \$30,000 the rate of taxation shall be five-tenths of 1 per cent; where such income amounts to \$30,000 and less than \$50,000 the rate of taxation shall be seven and one-half tenths of 1 per cent; where such income amounts to \$50,000 and less than \$10,000 the rate of taxation shall be 1 per cent; where such income amounts to \$50,000 and less than \$1,00,000 the rate of taxation shall be 2 per cent; where such income amounts to \$50,000 and less than \$1,000,000 the rate of taxation shall be 3½ per cent; where such income amounts to \$10,000,000 and less than \$10,000,000 the rate of taxation shall be 3½ per cent; where such income amounts to \$10,000,000 and less than \$10,000,000 the rate of taxation shall be 3½ per cent; where such income amounts to \$10,000,000 and less than \$10,000,000 the rate of taxation shall be 3½ per cent; where such income amounts to \$10,000,000 and less than \$10,000,000 the rate of taxation shall be 3½ per cent; where such income amounts to \$10,000,000 and less than \$10,000,000 the rate of taxation shall be 3½ per cent; where such income amounts to \$10,000,000 and less than \$10,000,000 the rate of taxation shall be 3½ per cent; where such income amounts to \$10,000,000 and less than \$10,000,000 the rate of taxation shall be 3½ per cent; where such income amounts to \$10,000,000 and less than \$10,000,000 the rate of taxation shall be 3½ per cent; where such income amounts to \$10,000,000 and less than \$10,000,000 and

Mr. McCUMBER. Mr. President, it is quite evident that no two Senators will agree upon the number of steps in the sliding scale in this bill, and it is equally true that no two of them will agree upon the ratio of rate for each particular step.

I have an abiding conviction, based upon my idea of the rights and obligations of citizenship, which is entirely out of harmony with the provisions of the bill. I regard it as at least a species of tyranny when any one person or number of persons have authority to impose a tax upon others in the payment of which tax they are to take no part. I believe every American citizen, according to his means, should pay his proper proportion of the taxes necessary to run the Government.

I appreciate the fact that if we made the steps too low the cost of collection in some instances would be considerably greater than the amount we would receive from the tax. Therefore I recognize the necessity of several steps in an ascending scale. But if I have an income of \$2,900 a year and the Senator at my right has an income of \$20,000 a year, I can hardly see that I have an inherent right to vote a certain rate of tax upon him while I will not be called upon for one cent. I think I ought to pay my proportion of it according to my ability.

Therefore in formulating this amendment I have taken a much lower sum for the beginning, namely, \$1,000, the same amount of income that is adopted as the first rung in the ladder in the legislation of the State of Wisconsin.

I seek by this amendment to accomplish another thing, which I think very proper to be done. In the first instance, I make the rates very much lower upon the small incomes and very much higher upon what we might call the excessively great incomes. I obtained my table from a source entirely independent of the report of the committee. The table which I purpose to introduce as a part of my remarks I obtained from the depart-

Let me make a statement to show just what the result of this amendment would be.

There are about 5,000,000 persons in the United States who have incomes of from \$1,000 to \$5,000 per annum. I make the rate of taxation for those persons only 1 mill, which would produce \$15,000,000.

There are 200,000 persons in the United States who have annual incomes of from \$5,000 to \$10,000. I make the rate of taxation upon those incomes in this amendment only 2 mills, which would bring a revenue of about \$3,000,000.

There are 100,000 persons who have incomes of from \$10,000 to \$20,000. I make the rate in that case 3 mills, which would give us a revenue of \$4,500,000.

There are about 75,000 persons who have incomes ranging from \$20,000 to \$30,000. I make the rate 5 mills on that class of incomes, which would realize \$9,375,000.

There are about 21,000 persons who have incomes of from \$30,000 to \$50,000. I make the rate  $7\frac{1}{2}$  mills upon those incomes, which would realize \$6,320,000.

There are about 10,000 persons who have incomes of from \$50,000 to \$100,000. I make the rate 1 per cent upon those incomes, which would produce \$7,500,000.

There are about 2,000 persons who have incomes of from \$100,000 to \$500,000. With a rate of 2 per cent we would realize upon those incomes revenue amounting to \$12,000,000.

There are about 500 persons in the United States who have incomes ranging from \$500,000 to \$1,000,000. With a 31 per cent rate upon those incomes we would realize \$13,125,000.

There are about 100 persons in the United States who have incomes ranging from \$1,000,000 to \$10,000,000 a year. With a 5 per cent tax upon those incomes we would realize \$2,500,000. Finally, there are about 20 persons in the United States who

have incomes of \$10,000,000 and over. With a 7½ per cent tax

on those incomes we would realize \$1,500,000.

This would give us, in the aggregate, \$74,820,000. It would realize something more than would be realized under the bill as it is proposed, and the burden would be very much lighter, indeed, upon those with the smaller incomes and very much heavier upon those with the very large incomes.

Mr. WILLIAMS. Mr. President-

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Mississippi?

Mr. McCUMBER. I do.

Mr. WILLIAMS. The Senator has said that his amendment would produce a revenue of \$74,000,000, which he states would be larger than the revenue which it is estimated the provision of the bill will produce. He is mistaken as to that. He is making an estimate per annum, and he is comparing it with an estimate for 10 months in the case of the provision of the bill.

Mr. McCUMBER. It is estimated that this amendment would produce about \$75,000,000; so upon a 10 months' basis it produce about the amount which would be produced by

the bill.

I realize the fact that no amendment to the bill can possibly be adopted, and I do not want to take up the time of the Senate in a call of the roll upon my amendment; but I will submit it, and will ask that the table which I send to the desk may be made part of my remarks.

The PRESIDING OFFICER. In the absence of objection, it

will be so ordered.

The matter referred to is as follows:

Amount of income.	Number of taxable persons.	Rate of tax.	Amount to be realized.
\$1,000 to \$5,000. \$5,000 to \$10,000. \$10,000 to \$20,000. \$20,000 to \$30,000. \$30,000 to \$50,000. \$30,000 to \$50,000. \$100,000 to \$100,000. \$100,000 to \$1,000,000. \$10,000,000 to \$10,000,000.	5,000,000 200,000 100,000 75,000 21,000 10,000 2,000 500 100 20	Per ct. 0.001 .002 .003 .005 .007 .01 .02 .03 .05 .07 .05	\$15,000,000 3,000,000 4,500,000 9,375,000 6,320,000 7,500,000 12,000,000 2,500,000 1,500,000
Total			74, 820, 000

Mr. BORAH. Mr. President, I understand that the Senator who offers the amendment does not propose to have a roll call upon it; therefore I wish to say just a word on the subject.

As I understand the amendment, it reduces the exemption in

the bill from \$3,000 down to \$1,000. I desire to go on record as being opposed to the amendment. As I have discussed the matter heretofore, I shall not state at length why I am opposed to it. Suffice it to say that in this country, in my opinion, a man who has an income of no more than \$1,000 has paid his proportion of taxes until you reach a sum considerably above

I know that we contend upon this side of the Chamber that protective tariff does not visit the consumer with the tax. That is not always or wholly true. In addition to that, however, we have our internal taxes or excise taxes; in addition to that the tax which is now levied upon corporations, and which is largely passed over to the consumer; and in addition to that taxes are covered by rents and prices and passed over

to the consumer. Suppose a man with a family of three or four children, upon whom devolves the obligation of educating and clothing them, finds at the end of the year that he has \$1,000 out of which to send two or three of his girls or two or three of his boys to college. In what position is he to meet the situation—to train them for citizenship and to prepare them for the duties of life? So far as I am concerned, after men of that class have paid the tax which they must pay in this country by our indirect method, I am in favor of relieving them from any further pay-

ment until they can fully discharge their duties to their families and meet the obligations of citizenship.

I might extend these remarks, but I wish to go on record against the amendment. There is an inevitable and unconquerable disposition in our taxing system to hunt the low man, and it always gets him at last.

Mr. McCUMBER. I think it is worth the one dollar that a man with a net income of a thousand dollars would have to pay, to become and remain in every respect a full citizen of United States, shouldering his responsibilities with his duties. I think the man who has an income of \$5,000 a year can well afford to pay \$5 of that and become a part of the taxable resources of the country. I do not think it is going to injure him in any way. But I do believe there ought not to be one class of citizens that is taxed and another class that is free from taxation.

Mr. BORAH. Mr. President, there is not one class of citizens whom we tax and another class whom we relieve from taxation. So long as we have the mixed system of taxation which we have in this country that can not possibly be true. There is no man in this country outside of an insane asylum or a poorhouse or prison who does not pay taxes. I do not care what his vocation may be or how humble he may be, he pays a tax, and in a large number of instances he pays 10, 15, or 20 per cent of his income as a tax. So long as we have the mixed system of indirect taxation and the direct tax, the excise tax, there is no possibility of any man escaping the responsibility of taxation in this country. Especially is there no possibility of the man of limited means escaping. Not only does he pay taxes on consumption, but if he has a little property it is all in sight and never escapes.

Mr. McCUMBER. There is not any question about one thing, that he has a voice in fixing a tax which he pays no part of, and I do not think that that is in conformity with our general

ideas of the rights and obligations of citizenship.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from North Dakota [Mr. Mo-CUMBER].

The amendment was rejected.

Mr. POINDEXTER. I offer an amendment which I ask may be read.

The PRESIDING OFFICER. The amendment will be read. The Secretary. On page 166, line 3, after "\$100,000," insert: "and 10 per cent per annum upon the amount by which the total net income exceeds \$500,000 and does not exceed \$1,000,000, and 20 per cent per annum upon the amount by which the total net income exceeds \$1,000,000."

Mr. POINDEXTER. Mr. President, it seems to me that the principal vice of the bill, as far as this phase which we are now discussing is concerned, is that the principle of graduation upon which the income tax is based stops before it reaches the excessive fortunes. In other words, an income of \$500,000 or of \$1,000,000 would be required to pay the same income tax as that of \$100,000.

The objection which I have to the amendment just introduced by the Senator from North Dakota [Mr. McCumber], and which caused me to vote against it, was not only that which was stated by the Senator from Idaho [Mr. Borah], that it reduced the exemption to a lower amount than in my judgment it should be reduced to, but also because it lowered the rate of taxation upon incomes-which the Senator from North Dakota seemed to refer to as small incomes, but which I regard as large ones-ranging from \$100,000 to \$500,000 a year.

Mr. President, the incomes in this country over \$500,000 per annum and over \$1,000,000 per annum are not the result of the accumulations of steady industry on the part of their possessors. In almost every case the incomes are upon fortunes which have been acquired by special privilege of one kind or another. Of these special privileges one of the most far-reaching, in my judgment, in bringing about such accumulations has been a discrimination and special favor in transportation rates, by which the public utility of transportation has been used to benefit certain industries and certain individuals in preference to the general public, with the result that in many instances private monopolies have resulted.

I will mention one other special privilege—it might be called such-which has been one of the most potent causes in making possible the excessive incomes I refer to. In passing I will say that I have not so much objection myself to the existence in this country of such incomes as to the manner in which they have been acquired. I do think, however, that a just system of taxation should proceed with its graduation scale to a point where there is a difference made between an income ranging around \$100,000 and one ranging around \$1,000,000 a year,

- As I started to say, another one of the opportunities which have enabled their possessors to obtain such incomes has been the acquirement, through special favors, of the natural resources of the country-gifts of lands; sometimes the acquirement of vast areas of public land or of valuable elements in the public land by illegitimate means; sometimes by what might be justly denominated as fraudulent means; sometimes through a careless policy of legislation in former years, when resources were more abundant in comparison to the demands upon them. Some of these incomes were acquired in a perfectly legitimate way, but without effort and without labor by the owners' good fortune in coming into the possession of great mines of precious

It seems to me that a fortune acquired in such a way, not only on account of its size but on account of the easy and some-times the illegitimate manner in which it has been acquired, can very justiv be called upon to pay a much larger proportion of the burdens of government than other fortunes,

Mr. President, the objection which was made by the Senator from Mississippi [Mr. Williams] to all these propositions to increase the tax on the largest incomes I do not think offers any obstacle to the adoption of this or similar amendments. His objection is that no calculation has been made as to the amount of revenue which would be received, and that we ought not to levy this tax until we know the amount of revenue and whether or not we need the revenue.

It is impossible, in the first place, Mr. President, to know from the information which we have—and I doubt whether it could be obtained—the amount of revenue which would be received by the Government from an increased income tax upon the excess of incomes over \$1,000,000. I do not think it is material. Whatever amount of revenue may be derived from that source will be based upon a just principle of taxationand it is always within the power of the Government to remit from its revenues by legislation, which can be enacted at any time, if we are receiving a surplus, revenues which are paid upon the necessities of life, revenues which are a burden upon people who have a harder struggle for existence than those who are receiving an income of \$1,000,000.

We could remit some of those taxes-which are nothing at all but taxes, especially according to the theory of the Senator from Mississippi, but which are called revenue duties—upon the necessities of life. There is always an opportunity to do that. As some one has already said this morning, we can not know to what extent we ought to do it to offset the effect of these amendments until the amendments have been put into operation and we have learned by experience.

This amendment ought to be adopted, because there is no danger that the Government will be injured by any revenue, whatever it may i.e, that will be received from it, and because whatever revenue is received is received upon a just principle of taxation and from property which can most easily afford to pay it, and which, upon the other hand, requires and receives more of the care and the expense of government than other portions of the national wealth.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Washington [Mr. POINDEXTER].

Mr. CRAWFORD. I ask for a reading of the amendment.
The PRESIDING OFFICER. The amendment will be again

The Secretary. On page 166, line 3, after "\$100,000," insert the following:

And 10 per cent per annum upon the amount by which the total net income exceeds \$500,000, and does not exceed \$1,000,000, and 20 per cent per annum upon the amount by which the total net income exceeds \$1,000,000.

Mr. POINDEXTER. Mr. President, I make the point of no

The PRESIDING OFFICER. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Smith, Ga.
Smith, S. C. Smoot Sterling Stone Sutherland Swanson Thomas Thompson Townsend Vardaman Walsh Weeks Williams
-

Mr. TOWNSEND. The senior Senator from Washington [Mr. Jones] has been called from the Senate on official busi-

The PRESIDING OFFICER. Sixty-two Senators have answered to their names. A quorum is present.

Mr. POINDEXTER. I ask for the yeas and nays on agree-

ing to the amendment.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I make the same announcement as to my pair that I made on the former

Mr. GALLINGER (when his name was called). my pair with the junior Senator from New York [Mr. O'Gor-MAN] to the junior Senator from Maine [Mr. Burleigh] and vote "nay."

Mr. KERN (when his name was called). On account of my pair with the Senator from Kentucky [Mr. Bradley] I withhold my vote.

Mr. LEA (when his name was called). I am paired with the senior Senator from Rhode Island [Mr. Lippitt]. If I were at liberty to vote, I would vote "nay" liberty to vote, I would vote "nay."

Mr. LEWIS (when his name was called). I again announce my pair with the senior Senator from North Dakota [Mr. MCCUMBER]

Mr. REED (when his name was called). I wish to announce my pair with the Senator from Michigan [Mr. SMITH]. I

therefore withhold my vote.

Mr. SAULSBURY (when his name was called). I have a general pair with the junior Senator from Rhode Island [Mr. COLT]. I therefore withhold my vote. If I were at liberty to vote, I would vote "nay."

Mr. THOMAS (when his name was called). I transfer my pair with the senior Senator from Ohio [Mr. BURTON] to the junior Senator from Oregon [Mr. LANE] and vote "nay.

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Wisconsin [Mr. Stephenson], and withhold my vote.

The roll call was concluded.

Mr. CHAMBERLAIN (after having voted in the negative). I have a pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I withdraw my vote.

Mr. BANKHEAD. I transfer my pair with the Senator from West Virginia [Mr. Goff] to the Senator from Louisiana [Mr. Thornton] and vote "nay." I desire the announcement of this transfer to stand for all votes to-day.

Mr. BACON (after having voted in the negative). I inquire whether the senior Senator from Minnesota [Mr. Nelson] has

The PRESIDING OFFICER. He has not.

Mr. BACON. Then I withdraw my vote, as I have a general pair with that Senator.

Mr. SAULSBURY. I transfer my pair with the junior Senator from Rhode Island [Mr. Colt] to the Senator from Oklahoma [Mr. Owen] and vote. I vote "nay."

Mr. FLETCHER. I transfer my pair with the senior Senator from Wyoming [Mr. WARREN] to the junior Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. CLARKE of Arkansas (after having voted in the negative). I observe that the junior Senator from Utah [Mr. SUTH-ERLAND] has not voted. If therefore withdraw my vote.

So Mr. Poindexter's amendment was rejected.

Mr. BRANDEGEE. Mr. President, I have made no remarks upon these various amendments to change the provisions of the income tax as found in the bill. I desire to state very briefly the reason why I have voted against most of the amendments. and I shall probably continue to do so. This is a bill entitled "An act to reduce tariff duties and to provide revenue for the Government." These amendments have had no such proper consideration, in my opinion, as would justify me in voting for any one of them. It may be that one or another of them would provide a more equitable or more satisfactory system of taxing the incomes of both corporations and individuals, but I do not think in the passage of a tariff bill we should attempt to utilize it as a vehicle to float through any propositions to tax corporations out of existence or to penalize the rich or to reduce swollen fortunes or to accomplish any other collateral purpose, no matter how desirable.

I am perfectly satisfied that if it shall be the settled conviction of the majority of the people of the country that the tax as provided by the committee should be changed, there is sufficient time in the future to overhaul entirely the proposed income tax in the light of the way the present provisions may operate and with much better satisfaction both to us and to the

The amendment just offered, which proposed to tax incomes over a million dollars 20 per cent, I could not possibly vote for I have heard of collecting tithes, but I have never heard of collecting fifths of the incomes of people. Without going into or criticizing the details of the various amendments I simply think it is better to try the plan as proposed by the committee in its general features, and then having established the principle of an income tax, go about amending it as the necessity of the occasion in the future may warrant.

Mr. CRAWFORD. Mr. President, yesterday evening before the Senate adjourned I offered an amendment the purpose of

which was to distinguish between what in England are called earned incomes and unearned incomes. That amendment was I am not going to press it at this time, but in not acted upon. connection with it I want to call attention to the report made in the English Parliament in 1907 after a very thorough investi-

gation of the whole subject.

England has had an income tax, as I understand it, for three-quarters of a century, and from time to time, as the sys-tem has been evolved, they have improved it, enlarged it, and extended it. Within the last two or three years, under the ministry in which Lloyd George has been so active, they have thoroughly overhauled it and extended its provisions in many ways. In this report in 1907, which was an exhaustive one, after a thorough investigation, they find that this distinction should be made:

Differentiation between earned and unearned income.

They find that it is practicable to observe that differentiation in the income-tax system. I want to put into the Record what Mr. Asquith said in commenting upon it, because it is so well said and is so brief and simple, and it relates to a matter of the utmost importance here. In discussing it he gives this example. He says:

example. He says:

Comparing two individuals, one "who derives, we will say, £1,000 a year from a perfectly safe investment in the funds perhaps accumulated and left to him by his father, and, on the other hand, a man making the same nominal sum by personal labor in the pursuit of some arduous and perhaps precarious profession, or some form of business," to say that those two people are, from the point of view of the state, to be taxed in the same way is, to my mind, flying in the face of justice and common sense."

I believe that that simple statement finds a response in the judgment of every man. Why not in this bill and in establishing this system here start right upon that question? Here is the question of making property, capital, and investment contribute its share of taxes; on the other hand, here is the question of how far shall we go in putting a tax upon energy, industry, and service given to society by men who are engaged in practicing professions or in following other useful vocations in life. We are putting them all together, and making one levy, one rate, upon them all; in other words, we are putting a tax one rate, upon them and, in other words, included the family, and upon personal service rendered to the home, the family, and the community and which earns an annual income. The income may be precarious and vary from one year to another and end when the life of the person ends who is earning it. We are putting that class of incomes in the same class with rents from great structures, inherited, perhaps, by some child of fortune, that are a lifeless species of property. England differentiates between these classes of income. Why should not we?

Mr. GALLINGER. Mr. President—

The PRESIDING OFFICER (Mr. Lea in the chair). Does the Senetar from South Deleter sidely to the Senetar from New York.

the Senator from South Dakota yield to the Senator from New Hampshire?

Mr. CRAWFORD. I do.

Mr. GALLINGER. This is an interesting phase of the discussion, Mr. President, and I desire to ask the Senator from South Dakota how it would work. Supposing a man were in receipt of \$3,000 from investments which his father had made possible and he likewise was in receipt of \$3,000 from the pracdice of his profession, would there be a differentiation in that?
Mr. CRAWFORD. Oh, certainly. The distinction is made

between the earnings from a man's professional services and the earnings from his investments. They have all that worked out

in England.

Mr. GALLINGER. Would he be exempt on the \$3,000 which he earns from professional services under those circumstances? Mr. CRAWFORD. I am not saying that. I think the fault in the amendment which I offered yesterday was that it went too far in making exemptions. In England they are not ex-empt above a certain rate, but they discriminate in their favor. So, if the Senator will permit me, I shall offer a resolution which I ask to have read and ask to have it considered in connection with my amendment, which I admit is faulty in that respect. I should like to have the Senate consider both the amendment and the resolution together and take such action as

it may think best.

The PRESIDING OFFICER. The Secretary will read the resolution proposed by the Senator from South Dakota.

The resolution (S. Res. 177) was read, as follows:

Resolved, That the Committee on Finance be directed to investigate and ascertain the difference in character between income immediately and directly derived by an individual from the carrying on owe exercise by him of his profession, trade, and vocation, and income derived from property or investment of capital, and to report an amendment which will make a just discrimination in the rate of levy in favor of incomes immediately and directly derived from the exercise of a profession, trade, or calling, as compared with income derived from property and capital investment.

Mr. CRAWFORD. Mr. President, of course I am not dog-matic enough to undertake here to say what this difference should be and what this rate should be; but I am offering this resolution so that it may come before the Senate for the purpose of having this question, which I think has fundamental justice at the bottom of it, receive the consideration that I think it should receive here and have the investigation to which I think it is entitled. Therefore I submit the resolution.

The PRESIDING OFFICER. The resolution will be printed

and lie on the table.

Mr. WILLIAMS. Mr. President, do I understand that the

resolution is to lie on the table?

The PRESIDING OFFICER. The Chair understood that that was the request of the Senator from South Dakota.

Mr. CRAWFORD. No; I did not ask to have the resolution lie on the table; I asked to have it take the usual course. presume, if objection is made to it, it will have to be printed and go over.

The PRESIDING OFFICER. Does the Senator from South Dakota make a request for unanimous consent for the present consideration of the resolution?

Mr. CRAWFORD, Yes; I ask unanimous consent for the

present consideration of the resolution.

The PRESIDING OFFICER. The Senator from South Dakota asks unanimous consent for the present consideration.

of the resolution which has just been read. Is there objection?

Mr. WILLIAMS. Yes; I object, Mr. President.

The PRESIDING OFFICER. The Senator from Mississippi objects, and the resolution will be printed and go over.

Mr. WILLIAMS. Mr. President, I want to say a few words in this connection, so as to explain why I have objected. In the first place, I do not see any pagestive of any investigation to first place, I do not see any necessity of any investigation to determine an abstract question, which every man can determine for himself, as to whether this distinction ought or ought not to be made. So far as I am personally concerned, I am opposed to it. Of course, it would be a very nice thing for the Members of the two Houses of Congress to make that distinction, as about nine-tenths of them are lawyers and get their incomes from their profession, but I do not see why a man who is in a profession should have his income exempt any more than a man who is carrying on a farm or a factory.

The other day some one said something about some surgeons who made an immense amount of money each year by their great skill and genius, who lived like princes and saved nothing.

Mr. CRAWFORD. Mr. President, will the Senator permit me

to interrupt him?

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from South Dakota?

Mr. WILLIAMS. Yes, Mr. CRAWFORD. The Senator is assuming that the amendment makes a difference between professional men and men following a trade or men cultivating farms. It makes none whatever. It includes professions, trades, and vocations—all three.

Mr. WILLIAMS. Then, whom would you leave to be taxed? Mr. CRAWFORD. Property, capital, investments; and not human exertion and human energy and human service. I do not say they should be exempt. I have said that my amendment went too far in that respect, and I say that there should be a differentiation in favor of energy and service of the man who is doing something and where the earning depends entirely upon his personal exertions—that there should be a differentiation in favor of that source of income as against the income derived

from capital and property.

Mr. WILLIAMS. The Senator the other day referred, as an illustration, to some brilliant surgeon or some one who made an immense income every year, but lived like a prince and had nothing left. There might be another surgeon who made the same amount of income who would have better sense and instead of living like a prince might invest some of the income in land or in city property or in bonds or in stocks. So the effect of it would be to tax a man who was thrifty, industrious, frugal, and saving and exempt the fellow who spent all his income and never invested anything. I do not see for the life of me why any man who earns \$50,000 a year or \$20,000 or \$10,000 as a great surgeon or as a great lawyer should not thank God for the possession of that much and be willing to contribute of that a small amount for the support of the Government. You are taxing men in proportion to their ability to pay, not in proportion to their ability to save or to invest.

Mr. CRAWFORD. Mr. President, that is simply wiping out the discrimination-and it is one of the subjects of actual, active, growing interest in this country-between the burden that should be imposed upon property, upon capital, and that which should be imposed upon the character of service that is so closely linked with humanity that you can not separate it. You can not judge a thing by stating an extreme case. After three-fourths of a century and at a time when the most popular ministry that was ever in control of the Government of England, the one which has reached out and reached into the hearts of the masses to a greater extent than ever before, led by Lloyd George, makes this discrimination; the Senator from Mississippi thinks it is wrong in principle. I believe it is right.

Mr. WILLIAMS. Money is as much property as is anything else, and when a man earns \$20,000 in money during a year he has got that much property.

Mr. BRANDEGEE. Mr. President, I realize that, as the Senator from South Dakota [Mr. Crawford] has stated, the amendment which the Senator submitted yesterday is not strictly the pending amendment, I assume, for action at the present time.

Mr. CRAWFORD. No. My statement was that I had offered a resolution. I do not know whether the Senator was here at the time, but the resolution has been read and laid over.

Mr. BRANDEGEE. I was here. Mr. CRAWFORD. The two are simply related to this subject, and so I thought it would not be improper for the Senate to say whether they should not direct the Committee on Finance to consider the questions there suggested and report to the Senate whether such a discrimination in favor of vocational income as against property income should not be observed in this bill.

I realize that the amendment which I hastily drew yesterday, where the exemption was made broader than it ought to be, is imperfect; I was conscious of the fact that it was imperfect at the time, but it was introduced to get the subject before the Senate. Now, as it is made a little more appropriate for general consideration by the resolution which I have introduced, I prefer to have the two considered together.

Mr. BRANDEGEE. I do not at all, as I think, misunderstand the situation. I understand it exactly as the Senator from South Dakota has stated it. In conversation with the from South Dakota has stated it. Senator yesterday afternoon I stated that I thought the amendment was not as carefully drawn as the Senator himself would like to have it, and he said that it was hastily prepared and simply designed to bring the general subject matter to the attention of the Senate, which has been accomplished.

Now, I will read the amendment in order that there may be in the Record, in connection with the remarks upon this subject, the text of the matter we are discussing. The Senator's amendment reads:

Provided further. That in computing net income under subdivision 1 of paragraph A of this section there shall also be deducted the amount, if any, which is claimed and proved by any individual to have been immediately and directly derived from the personal exercise by him of a profession, trade, or vocation.

I think there is a good deal to be said in favor of the contention of the Senator-which is also sustained by the works of

a great income or any income derived entirely from the efforts of those who have gone before—which cost the present beneficiary no effort or labor of any kind-should bear a larger proportion of the burden of taxation than the income derived from the personal effort of the beneficiary in possession of the income.

The amendment of the Senator, of course, as I think he will recognize, and as I am firmly convinced, would, if passed as drawn, exempt absolutely all income derived from the effort of anybody. I mean to put it just that broad, because the amendment provides that there shall be deducted from the amount anything which is proved by the individual "to have been immediately and directly derived from the personal exercise by him of a profession, trade, or vocation."

Mr. WILLIAMS. Mr. President, will the Senator pardon a

question?

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from Mississippi?

Mr. BRANDEGEE. Certainly.

Mr. WILLIAMS. A thought occurs to me which makes me ask the question. Take my salary as a Senator, or the salary of the Senator from Connecticut. Would or would not that fail within this description? Would that be derived from a profession, or trade, or vocation, or would it be connected with what the Senator calls "dead property," or where would it

Mr. BRANDEGEE. I think there is a twilight zone about such a question. It would depend, perhaps, upon whether the Senator would consider himself to be a professional politician

or a statesman; I do not know.

Mr. WILLIAMS. Really, I consider myself a statesman; but that is an income derived in the manner described in the amendment of the Senator from South Dakota, and it would be exempt under that very amendment.

Mr. CRAWFORD. Mr. President, will the Senator permit

Mr. BRANDEGEE. Certainly. Mr. CRAWFORD. That language is identically the same as the language in the income-tax law of Great Britain, except that, based upon it, they levy a lower rate on such incomes instead of exempting them. The amendment which I drew, instead of differentiating in favor of a lower rate, I admit went too far in exempting them; but the language "claimed and proved by any individual to have been immediately and directly derived from the personal exercise by him of a profession, trade, or vocation" is literally copied from the clause in the English statute as it appears in Prof. Seligman's book.

Mr. WILLIAMS. That does not help it, so far as this ques-

tion is concerned.

Mr. CRAWFORD. It helps it in this way, that it is being successfully operated in England, and Prof. Seligman says in his conclusion that after years of evolution the British system is the most perfect income-tax system in the world, and that while in Gladstone's time, a generation ago, it created hostility and bitterness, now it is accepted everywhere and will remain for all time.

Mr. WILLIAMS. Whether it is the English law and whether or not the English law is a good law is not relevant to this question. The question is whether we want to start a system of taxation in this country that will exempt the incomes of lawyers, doctors, politicians, and others—all incomes that come directly from personal services, whether for the Government or for somebody else.

Mr. CRAWFORD. I should like to ask the Senator if he seriously asserts that politicians have an income?

Mr. WILLIAMS. Well, after they get through with the year

they have not much left. [Laughter.]
Mr. BRANDEGEE. No net income.
Mr. WILLIAMS. But they have at least had a salary and

an opportunity to have an income.

Mr. BRANDEGEE. Mr. President, as usual, I seem to have managed by skillful interference to have projected myself in between two fires or between the upper and the nether millstones and to occupy the floor simply in the capacity of a yielder.

I do not disagree with the Senator from South Dakota at all,

and, if I had been allowed to continue consecutively, I would have stated long since, I think, everything that he has stated. I understand perfectly well that the language which he uses in his amendment exempts incomes made by the exertion of personal effort, whereas the equivalent law in Great Britain simply imposes a lower rate of tax upon them.

I started to say that I had, so to speak, considerable offhand sympathy, without having had a chance to give it any mature consideration, with the idea that the two incomes were so essentially different in character, especially in consideration of British origin upon the subject to which he has referred—that the sympathy we have with people who have to strive and work in order to live, as differentiated from those who, so to speak, are born with a gold spoon in their mouths and are simply living on the efforts of their ancestors—that I have considerable sympathy with the idea that there ought to be a difference at least in the rate of taxation. I am simply calling attention to the fact that the amendment of the Senator from South Dakota will exempt entirely from taxation every income derived from personal effort, because the expression "profession, trade, or vocation" includes every possible line of human effort. The amendment would exempt everything that was made by a stock gambler or a gambler in the wheat pit. It would exempt—

Mr. WILLIAMS. If the Senator will pardon me, there would be one thing, and one alone, that would not be exempt under it, and that would be an inheritance or a legacy. The idea of taxing inheritances and legacies has much soundness in it, as distinguished from income which one acquires by his own labor; but that is to be reached by an inheritance and legacy tax and is reached in nearly all countries in that way. That would be about all that would be exempt under that amendment, and inheritances and legacies are already quite generally

taxed.

Mr. BRANDEGEE. Mr. President, what I said was that the amendment exempts absolutely everything that a man makes for himself. Of course, it would not exempt a legacy which somebody else made for him and gave to him. If a man's occupation or vocation—for vocation means nothing but a calling—if his calling or occupation were that of a financier it would exempt everything he made by underwriting and by financial operations in the course of a year that would be the product of his effort. Nothing can be imagined that a man can busy himself about with a view of profit which the amendment as drawn would not utterly exempt. I know it is the intention of the Senator from South Dakota not to seek to do that, but simply to impose a different rate of taxation.

In addition to what I have already said, it occurs to me that it is not, and probably would not be, the perfectly simple question that at first blush it may appear to be, to wit, to arrive at a proper differentiation of the various merits of the different kinds of professions, trades, and vocations, in order to ascertain at what rate they should be taxed. The country doctor works hard and makes very little compared with his efforts, and the efforts of the clergyman are more or less of a philanthropic character and he generally gets low pay. Many people would want to tax them at a lower rate than they would tax the income of the great corporation lawyer or of the financier.

So that even the products of the individual efforts of various men among themselves might, in the opinion of a legislative committee and of Congress, require various shadings of taxa-tion. Whether there could be an agreement ultimately about a matter of that intricate character I do not know; but I am quite willing, although I do not suppose the committee would care to enter upon the investigation now-I am quite willing at the proper time to vote for the resolution requesting the committee to consider the question, and I will do so without any intention of being offensive to the committee or of asking them to consider anything out of their jurisdiction or that ought not to be considered at this time. I assume, however, that the committee would not have either the time or the inclination, perhaps, to take it up now, but simply to show the interest that I take in the subject and as an evidence of some degree of faith at least in the idea of trying to see if anything possibly could be evolved out of it, I should be happy to vote for the resolution introduced by the Senator from South

Mr. LODGE. Mr. President, the income tax as a mode of taxation is well recognized by all economists as open to two very serious objections. One is the failure to differentiate between unearned and earned incomes. The other is the ease of evasion. It is one of the easiest taxes in the world to evade. It falls with absolute certainty very largely on trustees, who have to make returns, who in a majority of cases represent women and children, and who can not evade such a tax. The evasions of the income tax in England to-day are very large. The tax also falls with full force upon the people who are the most honest in the community, while the shifty and dishonest escape. In a word, it has all the objections that arise to any tax which in its nature is easy of evasion.

The other objection about earned and unearned incomes can be partially met, if not wholly overcome. At least it is so thought in England, and I am not sure that we may not be able to learn something from considering the systems of taxation of other countries, although my friend the Senator from Mississippi does not seem to think so. Speaking broadly, I believe it may be said that all economists recognize that a tax imposed

upon the earning capacity of a community is not theoretically the best tax. It is inferior, for example, to the inheritance tax, which does not place a burden upon earning capacity and is certain of collection, owing to the fact that an inheritance has to pass through probate offices and requires the assent of the Government before it can be distributed.

A burden on the earning capacity of a community is a very serious thing. The earning capacity of a community, which is the motive power of prosperity, is something which it is desirable under every civilized government to encourage. It is not wise to throw too heavy a proportion of the burden upon the earning capacity of any community. The men who draw the load should not be overweighted or disheartened. England has finally met this difficulty in a degree at least by differentiating between the tax derived from earned income and the tax derived from unearned income; and I think this point will have to be considered by us if we have adopted the income tax, as I believe we have, for a permanent source of national revenue. I think we must try to make the burden fall more heavily upon the income which is not earned than upon that which is earned, and the income, so called, which is not earned is very large, so large that there need be no fear of an insufficient return.

Mr. WILLIAMS. Does not the Senator momentarily lose sight of the fact that property is taxed in all the States?

Mr. LODGE. I understand that.

Mr. WILLIAMS. There is another consideration, too. The very people who will evade an income tax are for the most part not those who derive an income from rents or from other property, such as bonds or stocks. Everybody knows what a dividend is, and everybody knows what a rent is; but lawyers, doctors, and other people have uncertain incomes known only to themselves, so that there is naturally in the very working of the law when men are not fairly honest—the fairly honest man is going to act the same way in both capacities—already a discrimination against the man who has the property. He has to pay State and county taxes upon his property, so that the man whose property consists in dollars which he earns in a year is the least taxed of all men.

Mr. LODGE. The Senator, of course, understands that I am not advocating the exemption of earned incomes, but only that a heavier burden should rest on the unearned than on the

earned income.

Mr. President, there is another question raised by the income tax, as provided for in the bill, which is to my mind far graver than that of differentiating between the earned and the unearned income, and that is, making the exemption limit so high.

I think a high exemption is vicious in principle if it is made for any reason except that at the exemption point you go beyond the possibility of profitable collection. In theory, at least, everybody should pay his share of taxes, especially in a popular government. I know well the great objection to making a lower exemption than that established by this bill. The fatal objection is that to do so is unpopular. But I believe in the long run it will be seen that it has the best and only enduring grounds of popularity, which is justice.

Of course the men of small earnings and small incomes pay taxes to the Government of the United States in the indirect form, and one great objection to indirect taxes, so excellent economically, is that people do not realize fully that they are paying them. The tax which the man pays over the counter is the one he realizes. When he walks up to the taxgatherer_in his town and finds that his rate has been raised he takes an interest in the administration of the business of the town. But as to the indirect tax, the tax that the man pays on alcoholic liquors, if he chooses to drink, or the tax that he pays on tobacco, are not only indirect but voluntary taxes, and he does not know, as a matter of fact, whether he pays them or not. The difference, He pays them, but he does not feel them. moreover, between what one man consumes and what another consumes in the way of food and drink and tobacco and raiment is not very great, for the power of consumption of the individual can not vary very largely, and he who lives and chooses most expensively pays most in taxation. But this tax which we are now imposing for the first time is a direct tax; and this country has hardly known direct taxes except in times

A man who has \$1,000 income per annum and pays, as proposed by the Senator from North Dakota, \$1 a year as income tax to the United States Government is not, I think, bearing too heavy a burden, but he is realizing what his Government is doing, which is of enormous value and makes him thereby a better citizen. He realizes that he is responsible for the Government as never before. There has been no greater misfortune to this country than what we have seen in every great city, and that is that the men who pay no taxes spend the

revenues. The result is inevitably extravagance and corruption. Men are always ready to spend some one else's money.

Look at the history of our municipal governments. They are not a subject of pride to any American. But if every man in those communities had paid his tax, if it was only 5 cents, and if he knew that if the money was extravagantly spent it might be 10 cents, he would have had more care about spending the public money, about the men he elected, and about the administration of his local government. One great reason for the extravagance we have had in our National Government, in my judgment, arises from the fact that almost all our revenues have been raised by indirect taxation.

enues have been raised by indirect taxation.

I want the man with \$1,000 to pay his dollar or his 50 cents or his 25 cents, if you wish—I do not care how small you make it—so that he may keep his eye on the National Government in Washington. If you make the man contribute out of his pocket to the maintenance of the Government and know that he is doing so, he will take the interest he ought to take. He will watch his Representatives and Senators; he will look at the national appropriations. In my judgment it tends to good government, to greater economy in expenditures, to less waste of money, to the expenditure of money in such a way as to secure the best return. I believe, moreover, that it is in accordance with every sound historic traditional American doctrine that I have ever learned in the history of the country, and I think it is as sound a doctrine now as it ever has been, that every man should pay his share for the support of the Government which he helps to create.

I am not oblivious to the fact that many of those who can best afford to pay have escaped and are escaping their share of taxation. We know that this evil exists everywhere, from our towns to our Nation. But that does not alter the principle that every man, no matter how trifling his contribution, should pay his share of the expense of carrying on the Government

that supports and protects him.

This brings me to the other important point in the consideration of the imposition of an income tax. The Senator from Mississippi [Mr. Williams] said yesterday—and I was extremely glad to hear him say it, because I think it touches a very vital question—that when taxes were imposed simply to take money from a man because he was rich, and for no other reason, the party that would do it would cease to be the Democratic Party and would become a party of communism, and perhaps something worse. It will be an evil day for us when we enter on confiscation of property under the guise of taxation. What we want to do is to raise money for the support of the Government in such a way that we shall make those pay most who can best afford to pay. I know that we are far short of that standard now. But I remember that among the many wise things Mr. Lincoln said was this: That you could find fault with any tax as to its incidence, as to those who escaped it, as to its unfairness, as to its burdensomeness, but that if we stayed talking about it until we got a perfect tax we never should raise any revenue at all.

No tax can be perfect; but it should be the effort of the Government and of the taxing power to impose the tax, if it be an income tax, so as to raise the revenue in the largest proportion from those who can bear it best. But let us beware how we enter upon taxing on the ground that we want to punish somebody because he has money. If he has earned his money improperly and unlawfully, by oppression and extortion, he is a subject for punishment under other laws. That is a question of the method of accumulation, as the Senator from Mississippi said yesterday. But to have the Government undertake, for vindictive reasons, to punish a man simply because he has succeeded and has accumulated property by thrift and intelligence and character, or has inherited it honestly under the law, is entering upon a dangerous path. It would convert this tax from the imposition of a tax to the pillage of a class. That I

think is a very dangerous ground to enter upon.

Very rich men, large properties, are no new thing in the world. You have but to turn to the history of Rome at the time when it passed through the form of a republic to the form of an empire and see the enormous properties which were then held by single individuals. You can read of it in Cicero's familiar letters to Atticus, who was one of that class. There were enormous fortunes then; there have been enormous fortunes under every commercial civilization from that day to this. What distinguishes our time is the colossal size of the fortunes which have been accumulated in this country, because we have had the greatest opportunities, larger than exist anywhere else. But huge fortunes—huge beyond anything the world has ever dreamed of hitherto—have in these days been amassed everywhere. Undoubtedly they constitute, in some ways, a menace to free, orderly, constitutional government. They are often

grossly abused. They arouse evil passions. Undoubtedly they are a danger. But the danger is one that is not going to be successfully met by allowing a spirit of vindictiveness to enter in, and to say broadly that a man, whether innocent or guilty, must be punished through the taxing power of the Government for merely possessing property. Make him bear his fair burden, by all means. I would put the burden especially heavily on the income that is unearned; but I would not set a class apart and say they are to be pillaged, their property is to be confiscated, in order to gain, perhaps, for myself or my party a brief and fleeting popularity. We shall thereby come too near to that which proved the downfall of the Roman Republic, when the one cry for the man who chose to raise himself above his fellows and to gain great power was to promise, "Panem et circenses." The man who would give the bread and the games was the man who attained power, and it is easy to drive men to this if they have to choose between that and ruin.

I do not want to see that class built up in this country. I do not want to see its members forced into that position by being hunted like wild beasts. I want, just so far as intelligence and ingenuity can do it, to impose this direct tax so that it will fall most heavily on those best able to bear the burden; but I want it done in order to raise revenue for the Government of the United States and for no other purpose. I do not want it done in a spirit of hatred to a man merely because he happens

to have money.

I know the present tone is that any man who has money is prima facie a criminal and that any man who has been successful in any way falls under suspicion. But there has been in this country for many years, and there is to-day, in my judgment, a great deal of honest success honestly won. There have been great fortunes honestly made and wisely and benevolently distributed. I do not believe Americans of that class are all gone. I think this country is full of honest men making large incomes in business or at the bar or elsewhere, and making them honestly and fairly. I think they are entitled to the fruits of their success, and they as a rule bear the burden of their duty to the community generously and well. It will be an ill day for this country when we raise the cry that success honestly won is to be punished; that money honestly gained is the badge of criminality; and that we are to go to the people of the United States in the search for popularity, and say to them: "Follow us. We will plunder the people who have got the money. You shall spend it, and it will not cost you anything." That is a dangerous cry to raise in any country, for when you unchain that force you can not tell where it will stop, and in your eagerness to destroy property and rob men of hope and ambition you may bring your boasted civilization down in rulns about you.

This Government was founded in justice and in belief in the individual man. Of that Thomas Jefferson was the great apostle. I believe we are trenching on very dangerous ground when we assume that if a man has succeeded, if a man has accumulated wealth honestly and fairly, therefore he ought to be brought to the block and punished for the mere fact that his brains and his character and his work and his self-control have

enabled him to rise.

Success used to be held out as the prize for every American boy. Now we are holding out to him the suggestion that he can not reach success without pursuing devious ways, and that if he does attain success, if he does amass a fortune, he is to be an object of suspicion to all his fellow men.

Let us impose our tax in the best and justest way we can. Let us do it in such a way as to make those pay most who can best pay. Let us do it to raise revenue. Do not let us do it in order to gratify hatred and malice and all uncharitableness.

Mr. BORAH. Mr. President, in my judgment if anyone should undertake to organize a movement in this country for the purpose of attacking a man simply because he was successful, or discriminating against a man or men because they were successful or because they were the possessors of wealth, he would find himself in a very short time the most unpopular man in America.

I do not know, from my limited reading, of a country in the world where there is so little feeling against a man simply because he possesses wealth as in this country. I do not know of any country where the people are so tolerant of success, and are always so willing and anxious to congratulate a neighbor or a friend upon his success, as here in this country.

I do not believe it is popular in this country to take the opposite view, and to assail wealth because of its existence, or to assail a man because he has been successful in gathering wealth. I think the Senator from Massachusetts has pictured a condition which does not exist in this country at all. He has painted in lurid and fretful outlines a scene wholly un-

known to American life. I do not believe there is any feeling upon the part of the people which would encourage men to gather about one who is following the course he has indicated men might be following now for the purpose of securing popularity. But every time there is an effort upon the part of anyone to bring the men of means and of grent wealth within the rule that obtains with reference to all other men, the cry of the demagogue is raised, and the men who undertake to do it are immediately assailed as appealing to popular prejudice. It is an old cry. Unable to meet the arguments of Justice, unable to confute the logic of equity, they draw their phylacteries about them and proudly withdraw from the demagogue and the shouting populace.

The effort to bring into subjection and under the rule and control of the law those who have obtained such power and such influence as, in many instances, to enable them to Ignore it, immediately leads many people to suppose that it is being done solely for the purpose of popularity rather than for the purpose of enforcing the law as to all men, rich or poor, great or small. I do not know of anyone who has ever advocated an income tax or an exemption upon the theory of punishment, or upon the theory that some should pay taxes and others should not. The men who have given their lives to the study of this question, who do not deal with populare prejudice, who ask no favors at their hands, who seek no votes from them, will be found to sustain the position of those who advocate a reasonable exemption in an income-tax law.

I challenge the Senator from Massachusetts and those who view the matter as he does to point me to a single great publicist or writer upon this question who does not bear out the statement I have made.

The income tax had its impetus not with men seeking popular favor but in a thorough, conscientious, persistent investigation upon the part of those who have gone to the sources of information and have studied the statistics which are available from almost all the countries of the world. I could quote many, but I am going to quote a short paragraph from one who occupies a most eminent position in one of the great universities of this country, and who, I presume, cares as little about popular favor as any man who could possibly be called into this discussion.

He says:

Under existing conditions in the United States the burdens of taxation, taking them all in all, are becoming unequally distributed, and the wealthier classes are bearing a gradually smaller share of the public burden. Semething is needed to restore the equilibrium; and that something can scarcely take any form except that of an income tax.

In the State which the Senator who has just spoken has the honor to so ably represent it was discovered a few years ago that the assessed valuation of all the real estate amounted to \$2,000,000,000, while the valuation of all the personal property in the State, according to the assessment, amounted to only \$500,000,000. In other words, as I stated yesterday, this class of property escapes taxation in spite of all the ingenuity of man to bring it within the law, and an honest effort to make it bear its proportion of the burden is not to be whistled down the wind by the assertion that those who advocate it are appealing to popular prejudice. I seek to punish no man because of his wealth. I honor the man whose genius, coupled with honesty, gathers well of this world's goods. But I would count myself recreant to the public service if I did not seek to so shape the laws of my country as to mete out to him the same obligations as rest upon the unsuccessful or the penniless. It is not demagoguery; it is the fundamental but forgotten principle upon which this Government was established.

Two or three very large estates have been probated within the last three months in a single city of the United States, one of which was probated for \$\$7,000.000 and the other two for \$100.000.000 each. What percentage of their income or what rate of tax did they pay to the National Government? Every man should pay a tax to his government. Of course he should. To state that is to state a rule as fundamental as the Ten Commandments. But does not every man in this country pay a tax? Does anyhody escape it?

a tax? Does anybody escape it?

The only logic of the Senator's argument is finally to accept direct taxation, exclusively and alone, as a means of raising taxes. When we shall adopt a system of direct taxation, exclusively and alone, I will join the Senator from Massachusetts in putting the exemptions down to a very low figure. But I insist now, as I have insisted before, that so long as we raise seven-eighths of our revenue by another method and only one-eighth by direct taxation, it can not be said that any man is escaping taxation. Neither can it be said that in giving a reasonable exemption we are exempting a class, for that class supposed to be exempted have already paid more than their proportion.

The Senator cited the case of city governments as extravagant. Do they have a system of indirect taxes to any extent? Who operates and runs, and who is responsible for, these extravagant city governments? Take the city government of New York. Notwithstanding its great extravagance, as exhibited by the figures which I read in the New York Sun a few days ago, does anybody suppose that the men who are really managing the business affairs of New York are the poor people upon the streets, to whom the Senator refers as the authors of extravagance? Certainly not. The men who are operating and managing the business affairs of the city of New York are, in a large measure, of the same class of men for whose protection the Senator pathetically pleads.

There is sufficient incentive to economy upon the part of the man of ordinary means in this country by reason of the taxes he already pays. Where does the demand for increased expenditures come from? Has any Senator undertaken to satisfy himself from whence arise these demands for increased expenditures? Do they come from the man upon the street or upon the farm or in the shop or the man of limited means? When there is a cry to raise salaries or to build embassies or to increase expenditures in one way or another, from whence comes the support? The great support comes, nine times out of ten, from those whose properties are paying practically no tax at all to the National Government. There is little disposition to extrava-gance upon the part of the masses. They are not asking for such expenditures, nor have they shown any disposition to increase expenditures and put the burden of the increase upon the wealth of the country. I have seen no disposition of men of small means to vote taxes. I have always noticed that in matters of local expenditure, in matters of new taxes, in matters of creating new offices, that the general voter is very slow. Extravagant demands have come from those who feel that however great the burden they will pay no more out of their abundance than their neighbor pays out of his less fortunate allow-

It is not necessary, Mr. President, to add something mere to the burden of the man in the field or shop in order to interest him in the question of economy. The effort of those who have been here advocating the proposition of a weasonable exemption and a reasonable graduation is based not upon the design to punish, but is based upon the principle which is the foundation of all just taxation, that men shall pay in proportion to their ability to pay.

Will the Senator from Massachusetts or anyone else undertake to demonstrate to me that the wealth of this country is paying as much tax to the support of the National Government in proportion to its property and its income as the one who it is said we are appealing to for popular favor? Will they take the statistics of the past which may be gathered and undertake to show that he is not now meeting more than his proportion of heavy burden? Until they do that their mouths are closed and they are estopped from challenging the good faith of those who advocate a reasonable exemption in this kind of taxation. After a man pays the tax which he must pay on consumption, then give him a chance to clothe and educate his family and meet the obligations of citizenship and preparation of those dependent upon him for citizenship before you add any additional tax. That is the basis of this exemption, and it is fair and just to all and toward all.

Mr. WILLIAMS. Mr. President, I want to express the hope that we may now go on with the bill. This is a purely academical discussion which has been taking place between the Senator from Massachusetts and the Senator from Idaho, and is especially academical at this time. There may be great merit in the argument of the Senator from Massachusetts some of these days, but not now. The reason why there is not great merit in it now is because while it taxes these people with indirect taxes of various sorts these things should be left for some day, when the good day comes—the golden day—when there will be no taxes upon consumption at all except upon whisky and tobacco and wine and beer and things that are considered harmful, and no import duties at all except countervailing duties to offset them, and when everybody will pay in proportion to his income. It might then be well to reduce the exemption or to do away with it, so that a man with \$5,000 would pay his \$50, or whatever it was, and the man with \$500 would pay his \$5, and the man with \$50 would pay his 1 cents, and call it the people's pence, like Peter's pence, and let everybody pay his share.

But it is absolutely academical at this moment. It is not doing any good to carrying on the legislation of the Senate, and it can not be even intelligently discussed until we get into an entirely changed condition of things. So I ask that we may go on with the bill,

Mr. WARREN. Mr. President, I wish to ask a question, not of an academical nature at all. And if the Senator is not tromuch in haste I want to say, before I ask the question, that I am one of those who voted for a constitutional amendment to enable the Government, without fear of former constitutional limitations, to provide for an income tax. I was one of those who then believed and I am one of those who now believe that an income tax should be altogether, or, if not altogether, pretty much retained as a reserve resource. I am one of those who believe that customs duties and the internal-revenue taxes ought to support the ordinary expenses of the Government. I think they should be so levied as to harm nobody and to protect and encourage industrial pursuits, in order to enrich and not impoverish the people; and the matter of an income tax could be lying back in reserve, with the necessary macLinery ready, if you please, so that in time of war or great stress we could immediately, as the Senator from Mississippi has said, enlarge and provide the necessary additional revenue.

But there are some questions which arise in my mind; it may be because I have not yet sufficient grasp of the bill. I recall with regret that one of the matters which has been before this body and before the other body ever since I can remember, and then some, is the election of Senators by the people. Finally after years and years of struggle and debate and profound consideration, we legislated, and almost within the twinkling of an eye we are in the midst of trouble in the matter of knowing how to apply that measure to existing circumstances or knowing exactly what the law means. There is an eminent man rapping at the door here for a seat in the Senate; he is worthy in every way; and the live question is, Under what circumstances and under what interpretation of the law can we permit him to take his seat? With that election-of-Senators law which we have just enacted with so much care and which caused us to listen hours and hours to constitutional speeches upon the matter, we are hung up in the air by a seeming!y simple matter following a happening that may occur again at any moment in the death of a Senator and the filling of a vacancy.

Now, we may meet some very awkward situations in doing real business under this proposed income-tax tariff law unless we most carefully perfect the measure before its passage. The other day I happened to be doing some business with the president of a trust company. My connection with that company had been where they had acted as trustee for bondholders of certain small corporations which others, with me, had bonded, and while it did not come up in the nature of a complaint the president nonchalantly asserted that unless the pending bill is changed in some manner he feared it would be very awkward in its application to trust companies and to those who have the distribution of money collected for the coupons on bonds, and so forth. For instance, as he said, his company collected or paid a great many coupons on bonded companies.

WILLIAMS. Bonds payable to bearer? Mr. WARREN. Sometimes they are registered and sometimes they are payable to bearer. They are issued or indorsed both ways, as the Senator knows. A man up in Washington or Oregon sends down the coupons here, and, as we understand the law, we shall be compelled to enter upon our books collections as an account, with names of all collections and payments, and if we do that it means 30 or 40 or more extra clerks; we must then notify the parties in interest that the money is there. Then we shall have to have proof from him that it is duly accounted for in the way of an income tax, or else we shall have to subtract and pay here and enter up accordingly on our books.

Have the Senator and those who work with him thoroughly canvassed that situation? They did very much for it. I do not say they have not, but I want to know whether they have.

Mr. WILLIAMS. I think we have.

Mr. WARREN. I want to say to the Senator that it seems to me the way to correctly figure out a bill is just along a proposition of that kind of how it will apply absolutely in actual business. All of us remember the old farmer saying that "the proof of the pudding is in chewing the string."

The Senator can see what an awkward situation there might be if somebody sends down a little package of coupons to be collected and intended to be applied to paying an obligation of his own, and he had to be hung up until he could go before some United States officer and make proper affidavit and have proper papers executed and sent down here at an expense perhaps that would eat up a large portion of that income.

Mr. GALLINGER. I will ask the Senator if coupons of that

nature are not usually sent through the banks?

Mr. WARREN. They are often, but in that case I can hardly see how it makes any difference. Somebody must be responsible to the Government. It may be the trust company in New York, it may be in Chicago, or it may be nearer home.

am only raising this inquiry for the purpose of ascertaining whether that side of the equation has been fully considered.

If not, I hope it may be.

WILLIAMS. In answer I will say to the Senator it gave us a great deal of trouble and it gave those in the House a great deal of trouble. We were faced with the question of being certain that they got the revenue, and we were also faced with the question of deducting at the source, which is the cause of all the trouble, of course. We adopted that system because we discovered that in Great Britain and elsewhere without raising the rate it increased the revenue very much, and also there were less evasions under it. We adopted generally the principle

of deducting at the source.

Mr. WARREN. The Senator will see that if it should be necessary for the banks and the trust companies to carry a line of accounts open, purposely for this, and employ more help for doing this business, it would be a larger thing than a great inconvenience to the owners of such securities, because the collecting agents would seek compensation for extra services.

Mr. WILLIAMS. That is very true; it will increase the amount of bookkeeping by paying at the source. It is unfor-

tunate, but it can not be avoided.

Mr. WARREN. Can the Senator avoid all the delay?

Mr. WILLIAMS. The tax is paid at the source. the taxpayer is not subject to the tax he makes a statement to that effect before the tax is actually paid if he chooses, or the company could make it for him, or if it is paid before any statement is made, then he becomes entitled to a refund of it upon a proper showing in another clause of the bill. Of course, you can not have an income-tax law upon the principle of deduction at the source without throwing some extra burdens upon the people who pay the tax and have the people make a statement to the other people as to what they have done. To that extent the complaint is just, but it is unavoidable.

Mr. WARREN. I think I see in this explanation of the Sena-

tor a good deal of delay and a good deal of expense. Is the Senator quite sure that the subcommittee has exhausted all its resources in reducing that to a plainer mode of handling?

Mr. WILLIAMS. Yes.

Mr. WARREN, Because if everyone must wait until the proper proof is presented and all these records are to be made, I can see that on a 4 per cent bond or a 3½ or 5 per cent bond a very large percentage is going to come out of the income, and it goes not into the Government's hands, but into expenses.

Mr. WILLIAMS. I was trying to find the provision here. I can not lay my hand upon it right now, but when we do get to it I will explain it fully to the Senator. I should like to read it

now

Mr. WARREN. I hope the Senator may, before the bill

passes, give it further consideration.

Mr. WILLIAMS. That matter has had our full consideration. We had hearings upon it which lasted quite awhile. It gave me personally a good deal of trouble and embarrassment, and it did to the committee.

Mr. SHERMAN. Mr. President, I appreciate the difficulty in which the Senator from Mississippi finds himself in framing what would be entirely satisfactory to those interested in the trustees, and I think he is entirely correct in saying that in many of these things a workable or more perfected form of the law will not be had until we have tried it a while. I am not disposed to be at all critical in the matter.

Mr. WILLIAMS. Just one word. The Senator from Wyoming will find what I was referring to is in paragraph D of

this section.

Mr. WARREN. I understand. Mr. WILLIAMS. It begins on page 172, at line 17. if the Senator will read that entire paragraph he will find the matter about as well taken care of as is possible with the limited ability of anybody to entirely avoid the absolute impossibility of throwing some extra labor upon those who must make the statements in order to pa, at the source.

Mr. WARREN. I notice with pleasure this change from the

original bill, but I hope the Senator will again still further

elucidate it.

Mr. SHERMAN. Mr. President, the discussion originally began on the amendment offered by the Senator from South Dakota [Mr. Crawford], as I remember. I wish to recur to that for a brief moment. The criticism in the application of the principle embodied in that amendment is that it taxes the thrifty and exempts the prodiga!. The same criticism I am aware, and I know it is one of the difficulties, would apply to the savings of any active person. If the savings be out of property income there would be at the end of the year a surplus derived from that income, and that in turn invested would become principal; the principal would produce in turn income, and so on, indefinitely. The earnings of any person from any occupation or

profession would, if not spent in like manner, become principal. If by professional effort any person should earn a given sum annually and he spends half of it, he saves the other half. The half so saved in turn becomes principal. That principal is property. The savings from the income by professional effort or by any form of skilled labor or unskilled by hand becomes At the end of any given period that saving is a principal, and any income derived from it is an income from property, not an income from the earning capacity or the personal ability of the taxpayer in question. So, in every instance it comes finally to the same result. I can see no criticism in the application of the principle embodied in this amendment because of that reason.

I believe in the classification that we have to make it is a just classification to distinguish between those who have incomes from fixed investments of property and those who have incomes from earning capacity. That is the point involved in the amendment offered by the Senator from South Dakota. That distinguishing difference consists in the source of the income. The one is a stable, fixed investment in the form of property, either in the form of credits or in the form of tangible property, either merchandise or realty, or any of the different forms that personalty assumes. Those investments that produce an income from a property source I think are properly to be distinguished from those arising from the earning capacity of the individual. A public officer, an employee, one who earns by professional ability, an architect, a musician, a lawyer, a doctor of divinity, a doctor of medicine, all are earning because of their personal ability.

I think the distinguishing line is as indicated in the amendment. When there is a perfect Government tax rate it will be very low or reduced to a point where none of us will complain. Every taxpayer is an involuntary victim of the necessities of government. That will continue until the time when govern-ment has become so perfected that a large portion of our expenses will be rendered unnecessary. That is a good way off. We will have to perfect human nature, and that is so far away

that it is purely an academic question.

Here are the percentages on the estimates made by the report of the Senate Committee on Finance. If postal receipts be excluded, it is some \$716,000,000 at present on the estimate and on the actual collection of revenue. The greater part of the Government income is from internal revenue and is in the nature of a direct tax, because it operates directly to increase the cost of the commodity. The internal revenue on this estimate will be 41 per cent of the total income for the fiscal year ending the 30th day of June, 1914. Our customs duties will be 37 per cent, our income-tax revenue will be not quite 10 per cent. The corporation tax will be 5 per cent. Our income from the sales of public lands and from miscellaneous sources of all kinds constitute the other 7 per cent, making a total of 100 per cent, aggregating about \$716,000,000. The rest of the \$996,810,000 of the governmental income of the next fiscal year consists of \$280,000,000 estimated postal receipts.

So under this proposed plan of taxation there are now on the estimate barely 10 per cent to be raised by an income tax. That is a very small part. I think you might justly increase within certain limits of the classification the taxes to be levied, and you might decrease appropriately the income derived entirely from the earning capacity or, in other words, the personal efforts of the ability and industry of those who earn the

Mr. WILLIAMS. Now, Mr. President, let us go on with the

The PRESIDING OFFICER. The reading will proceed. The Secretary. The bill has been read down to the middle of line 13, on page 167, where the committee proposes the following amendment. On page 167, line 13, before the word "bequest," to insert the word "gift," so as to read:

"bequest," to insert the word "gift," so as to read:

B. That, subject only to such exemptions and deductions as are hereinafter allowed, the net income of a taxable person shall include gains, profits, and income derived from salaries, wages, or compensation for personal service of whatever kind and in whatever form paid, or from professions, vocations, businesses, trade, commerce, or sales or dealings in property, whether real or personal, growing out of the ownership or use of or interest in real or personal property, also from interest, rent, dividends, securities, or the transaction of any lawful business carried on for gain or profit, or gains or profits and income derived from any source whatever, including the income from but not the value of property acquired by gift, bequest, devise, or descent.

The amendment was agreed to.

The next amendment was, on page 167, line 18, after the word "contract," to insert "or upon surrender of the contract,"

word contract, to insert or upon surrender of the contract, so as to make the proviso read:

Provided, That the proceeds of life insurance policies paid upon the death of the person insured or payments made by or credited to the insured, on life insurance, endowment, or annuity contracts, upon the return thereof to the insured at the maturity of the term mentioned in the contract, or upon surrender of the contract, shall not be included as income.

Mr. CUMMINS. Mr. President, before we go further with the bill I want to make a suggestion to the Senator from Mississippi [Mr. WILLIAMS]. I make it through the medium of an amendment, which I now propose.

I move that all that part of paragraph marked "B," under subdivision 2, on page 167, down to and including the word "descent," in line 13, be stricken out.

I want the Senator from Mississippi, the committee, and, indeed, all the Senators on the other side of the Chamber to understand that I offer this amendment in a friendly spirit. I am quite as much in favor of the income tax as any of them can possibly be.

It ought not to be forgotten, however-and I am now speaking to the lawyers on the other side; I want to make a lawyer's argument and not to raise at this moment any question of policy-that the authority of the Congress of the United States with regard to this subject is not unlimited. Our power is not like the power which Great Britain exercises over the subject. It is not like the power which the several States exercise over the subject. It is a power granted in article 16 of the Constitution, and I will read it:

Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

Our authority is to levy a tax upon incomes. I take it that every lawyer will agree with me in the conclusion that we can not levy under this amendment a tax upon anything but an income. I assume that every lawyer will agree with me that we can not legislatively interpret the meaning of the word "income." That is purely a judicial matter. We can not enlarge the meaning of the word "income." We need not levy our tax upon the entire income. We may levy it upon part of an income, but we can not levy it upon anything but an income; and what is an income must be determined by the courts of the country when the question is submitted to them.

I think there can be no controversy with regard to those propositions. I am very anxious that when this bill shall have passed it may be effective, that its operation may not be sus-

pended or delayed through a resort to legal tribunals.

pended or delayed through a resort to legal
Mr. FLETCHER. Mr. President—
The PRESIDING OFFICER. Does the Senator from Iowa
yield to the Senator from Florida?

Mr. CUMMINS. I yield to the Senator. Mr. FLETCHER. I should like to inquire whether the Senator means to state that Congress can not by statute define what shall be regarded as an income tax?

Mr. CUMMINS. I do not think so, Mr. President. The word "income" had a well-defined meaning before the amendment of the Constitution was adopted. It has been defined in all the courts of this country. When the people of the country granted to Congress the right to levy a tax on incomes, that right was granted with reference to the legal meaning and interpretation of the word "income" as it was then or as it might thereafter be defined or understood in legal procedure. If we could call anything income that we pleased, we could obliterate all the distinction between income and principal. Whenever this law comes to be tested in the courts of the country, it will be found that the courts will undertake to declare whether the thing upon which we levy the tax is income or whether it is something else, and therefore we ought to be in the highest degree careful in endeavoring to interpret the Constitution through a statutory enactment.

Now, let us see. Subdivision 1 says:

That there shall be levied, assessed, collected, and paid annually upon the entire net income-

And so forth.

That is a declaration which is fair, which is constitutional, which is complete. If we wanted to do it, we could levy a tax upon the gross income. The bill chooses to levy the tax upon the net income; and that is entirely within our power, because, as I said before, we can diminish the operation of the Constitution; that is to say, we need not levy the tax upon the entire income; but we can not enlarge the operation of the Constitution and levy a tax upon anything but income. Therefore, it seems to me that the bill ought to continue throughout its length in the language with which it begins, namely, that we levy a tax upon the entire net income of the citizens of the United States who fall within the provisions of the bill.

With these observations in view, I want to read that part of the bill which my amendment seeks to eliminate, on page 167.

It is as follows:

B. That, subject only to such exemptions and deductions as are hereinafter allowed, the net income of a taxable person shall include gains, profits, and income derived from salaries, wages, or compensation for personal service of whatever kind and in whatever form paid, or from professions, vocations, businesses, trade, commerce, or sales or dealings in property, whether real or personal, growing out of the ownership or use of or interest in real or personal property, also from

interest, rent, dividends, securities, or the transaction of any lawful business carried on for gain or profit, or gains or profits and income derived from any source whatever, including the income from but not the value of property acquired by gift, bequest, devise, or descent.

Mr. WILLIAMS. Mr. President, I want to offer an amendment at that point to cure a defect. After the word "sales," in line 6, there ought to be a comma.

Mr. CUMMINS. I do not, of course, found my amendment upon any omission of that kind.

Mr. WILLIAMS. I merely want first to perfect the language, if there is no objection.

Mr. BRANDEGEE. Right at that point-if the Senator from

Iowa will pardon me—if the Senator from Mississippi inserts a comma after the word "sales," he does not intend——Mr. WILLIAMS. It reads, "businesses, trade, commerce, or

Mr. BRANDEGEE. It reads "sales or dealings in property." Mr. WILLIAMS. It refers to profits derived from any sort of sales—profits derived from "sales or dealings in property."
Mr. BRANDEGEE. Why have the words "in property" after "dealings" and not after "sales"?
Mr. CUMMINS. Mr. President, I hope the amendment sug-

gested by the Senator from Mississippi will be allowed without any controversy, because my amendment is not involved nor does it concern that correction.

The VICE PRESIDENT. By unanimous consent, then, the amendment proposed by the Senator from Mississippi will be

Mr. CUMMINS. It will be observed that here is an attempt, Mr. President, to define the meaning of the word "income," to describe its scope, to determine its effect. I reiterate that the attempt will be ineffective and may be exceedingly dangerous.

Great Britain might employ such words as these in modification or explanation or enlargement of the word "income," because Great Britain has no constitutional restriction upon her Parliament. A State might use these words with perfect propriety, because a State has a right to include whatever she likes within the meaning of the word "income"; but the Congress has no right to employ them, because the Congress can not affect the meaning of the word "income" by any legislation whatsoever. The people have granted us the power to levy a tax on incomes, and it will always be a judicial question as to whether a particular thing is income or whether it is principal.

Mr. LEWIS. Mr. President, knowing the Senator from Iowa to be an excellent lawyer, will he give me his views on this point: Does the Senator contend that the word "income," therefore, as stated in the Constitution, must be construed to mean what it meant and was understood to mean at the date of its adoption as part of the Constitution?

Mr. CUMMINS. I do not so say. What I have said is, how-ever, that it is not for Congress to interpret what it means; it is for the courts of the country to say, either at this time or at any other time, what it means. If it were within the power of Congress to enlarge the meaning of the word "income," it could, as I suggested a moment ago, obliterate all difference between income and principal, and obviously the people of this country did not intend to give to Congress the power to levy a direct tax upon all the property of this country without apportionment.

Mr. LEWIS. Then, assuming that the matter would have to

be determined finally by the court, which concession we all must make, would the Senator's legal mind revert to the theory that the court, then, would have a right to define the word "income" to mean whatever was understood judicially by "income" at the

date of the adoption of this act?

Mr. CUMMINS. I do not accept that at all, because it is entirely beyond the domain of Congress. In 1789, I believe, the people of this country gave Congress the power to regulate commerce among the States. It is not within the power of Congress to say what commerce is. "Commerce" may mean a very different thing now as compared with what it meant in 1789; it has broadened with the times; the instrumentalities have changed with the course of years; but Congress can not make a thing commerce. The court must declare whether a particular regulation is a regulation of commerce, and in so declaring it defines for the time being what commerce is.

Why, Mr. President, should Congress attempt to do more than is declared in the first section of the proposed bill? It is right; it is comprehensible; it embraces everything—no, I will withdraw that; it does not embrace the full power of Congress, because Congress can levy a tax upon gross incomes if it likes; it may diminish the extent of its taxing power or not exercise it all; it may exclude certain things from the taxing power that it might include; but it can not change the character of the taxation; and when it is declared in the first lines of this bill that a tax is levied upon the entire net income of all the citizens of this country, we have exercised all the power we have. If we upon.

desire to limit ourselves to net income, we can not define "net income"; we can not say what shall be included in income and what shall not be included in income. We are only preparing ourselves for delay, for disappointment, and possible defeat if we endeavor to interpret the meaning of the word "income."

Mr. SHIVELY. Mr. President-

The PRESIDING OFFICER (Mr. CHILTON in the chair). Does the Senator from Iowa yield to the Senator from Indiana? Mr. CUMMINS. I do.

Mr. SHIVELY. I can readily agree with the Senator that the courts will finally give a definition of "income"; but that does not prevent Congress from limiting the application of the word in legislation.

Mr. CUMMINS. Not at all. I have so said. Mr. SHIVELY. If the Senator will observe the words "except as hereinafter provided" in the first subdivision of this

Mr. CUMMINS. I have not sought to strike out any part of the limitations save the gift, devise, bequest, or descent, and I do not think there is any man in America, were it not for what precedes those words, who would contend or could contend that a gift or devise or bequest of property or property coming to one by descent is income. I never heard of it being so construed, and it is not possible that it could be so construed. It would not have been put in there were it not for the attempted enlargement of the word "income" contained in the previous part of the paragraph.

Mr. WILLIAMS. How does the Senator think that is an attempt to enlarge it? Tell us specifically to what words the

Senator refers.

Mr. CUMMINS. Mr. President, if it has not that effect, or attempted effect, it can have none. It is certainly not an attempt to limit or to restrict the meaning of the word "income"; and if it has not the effect or if it is not thought or if it was not in the mind of the person who drew it to enlarge the meaning of the word "income," then the draftsman of the bill has offended against the first principles of legislation by incorporating language that is absolutely meaningless

WILLIAMS. Now, if the Senator will pardon me a

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Mississippi?

Mr. CUMMINS. I do.
Mr. WILLIAMS. It was not the intent there to enlarge or to stretch the meaning of the words "net income," which is the income referred to here, and not gross income at all.

Mr. CUMMINS. I have not said it was gross income. Mr. WILLIAMS. The Congress in undertaking to specify what it proposes to tax does undertake neither to enlarge nor to restrict the meaning of the words "net income," but to define their meaning for the purposes of this bill, for the purposes of this taxation. It may be that a court might come to the conclusion that Congress had wrongfully defined the term. If so, the court will correct the definition, and if the court corrects the definition, then this bill will be to that extent altered or changed; but the contention is that this is a correct definition of the articles which, under a bill seeking to tax net incomes, will be taxed. The question I asked the Senator was in what respect he thinks that this definition enlarges the meaning of the words "net income" or restricts them, either?

Mr. CUMMINS. Mr. President, as I remarked before, if these words qualifying, modifying, and explanatory are not intended either to enlarge or to restrict, they are entirely useless.

think, however, with deference—
Mr. WILLIAMS. Does the Senator think it is useless in a tax bill to try to define the thing you propose to tax?

Mr. CUMMINS. Mr. President, I do think in this instauce that it is worse than useless; I think it is dangerous, and I will

proceed to show why.
Mr. SIMMONS. Mr. President-

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from North Carolina?

Mr. CUMMINS. I do. Mr. SIMMONS. I readily agree with the Senator in his contention that we have no authority to tax anything except income, and I readily agree with him that, in the last analysis, the court must decide what is income and what is not income; but before the court can get jurisdiction of that question, there must be a levy; there must be an assessment; there must be an attempt to collect. I can see no other way in which the court could possibly acquire jurisdiction. So that before the matter can ever reach the court there must be some one who will decide the question of what is "income."

Mr. WILLIAMS. And describe the property to be levied

Mr. SIMMONS. And, as the Senator from Mississippl very properly says, describe the property to be levied upon. The Senator from Iowa says, as I understand him, that it is not competent for the Congress to define what is income and what is not Then, the only conclusion from the Senator's argument is that we ought simply to levy a tax against incomes and stop. Suppose we should do that, who then can decide the question of what is income and what is not income, seeing that that question must be decided before the court can acquire the jurisdiction to determine the question of whether or not the thing taxed is income?

Are we to leave it to the officers of the taxing branch of the Government to determine what is income? Are we ourselves to hold that we have not the authority to define the word, but that the officer of the law has the authority to define and determine it? It seems to me that is what the Senator's argument would lead to. I may be mistaken about that; he may have some way in his mind by which we could reach a determination of what is income otherwise than through the definition of Congress or through the decision of the officer of the law, but I can not myself see how we would select the things upon which this tax is to operate except through a definition of the word "income" by Congress, or a definition of the meaning of that word by some subordinate officer of the law.

Mr. CUMMINS. Mr. President, the difficulty with the Senator from North Carolina is that he does not distinguish between a requirement in the law for a return to an administrative officer of the various matters included within this paragraph and a declaration that the income shall include these

things.

Mr. SIMMONS. Yes; I do. The Senator is mistaken. Mr. CUMMINS. Mr. President, there is a very great difference. I agree with the Senator from North Carolina that it is quite within the province of Congress to require the citizen to make a return, including his gains and profits and income from his sales and dealings of all kinds. That is entirely within our power; but it is not within our power to declare that these things shall be included in the income.

Mr. SIMMONS. The Senator is mistaken when he says I have not considered that. I have considered that as the third If Congress has not the power to decide, if the alternative. officers of the law charged with the enforcement of the law have not the power to determine, then the only other person who could have the power is the man who is to pay the tax. Would not the Senator's position, therefore, force him into the attitude of maintaining that the proper person, in the first instance, to determine what is income and what is not income

is the man who pays the tax, and, next, the court?

Mr. CUMMINS. I do not think so, Mr. President, nor do I

think my suggestion leads to that result. I have no doubt about the power of Congress in requiring those who are to make return to include their gains and profits and their dealings of all kinds, and from that return I have no doubt that it is within our power to give to the taxing officer the right to discover the amount of the net income, and, if his judgment be wrong, the taxpayer can question it, and finally the court must determine it. That is not what is sought to be done in this paragraph. We are attempting to define what "net income" is graph. We are attempting to define what "net income" is and of what it is composed, and what we may lawfully tax. But I want to read now what this means

Mr. SIMMONS. Before the Senator leaves that point, does not the Senator think that it would be a great deal better for us, in the first instance, to indicate as best we can what the legislative judgment is as to what constitutes "income" and require the taxpayer to account for his income upon all of those particular things? If we make a mistake and include in our designation of what is "income" something which is not income, but is property, then, of course, the court would come in and settle that controversy. Does not the Senator think that is better than to leave it to the taxpayer to determine in the first instance what is "income," and then leave it to the officer to correct him if he should make an error, and bring it into court in that way

Mr. CUMMINS. Mr. President, I do not think it is better. There is just this difference between the two courses: The course suggested by the Senator from North Carolina will end, if Congress makes a mistake, in the declaration that the law is

unconstitutional and of no effect.

Mr. SIMMONS. Why, Mr. President—
Mr. CUMMINS. Just a moment. The other course will end in a correction of the report of the individual taxpayer, and the law will continue to be enforced according to the Consti-

Mr. STERLING. Mr. President-

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from North Dakota?

Mr. CUMMINS. I do.

Mr. STERLING. I should like to ask the Senator from Iowa if the courts, in construing the word "income," would not take into consideration the usual and ordinary signification of that

Mr. CUMMINS. I have no doubt of that, Mr. President. Mr. STERLING. And the court would have recourse to a standard dictionary, would it not, in construing that word?

Mr. CUMMINS. Unquestionably; and not only so, but to the common acceptation of the word and to the judicial opinions, of which there have been very many, in which the word has been considered.

Mr. STERLING. If in the definition of the word "income" as given in a standard dictionary the words "gains and profits" are also given as synomymous with the term "income there be anything wrong in the use of those words in the section to which the Senator refers?

Mr. CUMMINS. I do not think there would be, although they would be wholly unnecessary. But, of course, the point I make has no reference to the use of the words "gains and

profits."

Mr. CHILTON. Mr. President, will the Senator allow me? The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from West Virginia?

Mr. CUMMINS. I do.
Mr. CHILTON. I agree with the Senator that the Congress can not add to nor take from the word "income"; but it seems to me the Senator has done injustice to the very language of the

Mr. CUMMINS. I have not pointed out my objection to the clause I am seeking to strike out, for I have not been permitted

to advance that far.

Mr. CHILTON. Well, so far as the Senator has gone. Let me offer this suggestion: On page 167, beginning in line 3, it is provided that the "income derived from salaries, wages," and so forth, shall be included. It has to be income before it can be taxed, no matter how it is derived. We could say that only income from salaries or income from property or income from interest should be taxed. We have simply mentioned certain things; but they must be income before they can be taxed. We

use the very language of the Constitution.

Mr. CUMMINS. Of course, if that be true, Mr. President, then it is simply saying in another way that these words are entirely meaningless and useless; and I have never favored the introduction of words that can have no other effect than to confuse, even though they have no material bearing. The Senator from West Virginia [Mr. Chilton], however, is not, as I view it, quite accurate when he says that "income" as used in this paragraph necessarily means such income as gains and profits, in view of what is subsequently found in the paragraph.

Now, allow me to read a little further:

Or from professions, vocations, businesses, trade, commerce, or sales or dealings in property, whether real or personal, growing out of the ownership or use of or interest in real or personal property.

I was led to offer this amendment largely on account of a colloquy I had with the Senator from Mississippi [Mr. WILLIAMS] the other day, who seems to have become indifferent and who does not regard the matter as worthy of his attention or presence. I recall, however, the Senate to the colloquy that I mentioned a moment ago. I asked this question:

tioned a moment ago. I asked this question:

The Senator from Mississippi must certainly understand what I am trying to say. If applied to a general business, in which purchases and sales take place and gains and profits are reckoned, I can very well understand that the Senator from Mississippi is right, under the language of this bill. But suppose 10 years ago I had bought a horse for \$900, and this year I had sold him for \$1,000, what would I do in the way of making a return?

Mr. WILLIAMS. I will tell the Senator precisely what he would do.

Mr. CUMMINS. I mean, what would other men do?

Mr. WILLIAMS. I will tell the Senator precisely what the Senator would do, or precisely what I mean is precisely what the Senator would do, or precisely what I mean is precisely what he ore 10 years ago and sold him this year for a thousand dollars. That thousand dollars is a part of the Senator's receipts for this year, and being a part of his receipts, that much will go in as part of his receipts, and from it would be deducted his disbursements and his exemptions and various other things.

Mr. CUMMINS. Would the price I paid for the horse originally be deducted?

ducted?

Mr. WILLIAMS. No; because it was not a part of the transactions in that year; but if the Senator turned around and bought another horse that year, it would be deducted.

Mr. CUMMINS. Mr. President, the answer of the Senator from Mississippi has disclosed very clearly the weakness that I have been attemptive to report out.

ing to point out.

I am not sure, Mr. President, and I do not assert, that these modifying, qualifying, and explaining phrases will render the effort of Congress unavailing. I do not assert that they must necessarily be construed as unconstitutional. I do assert, however, that we are putting the law in a jeopardy which may easily be avoided. If the answer made by the Senator from Mississippi to the question I propounded day before yesterday is correct, then the law is unconstitutional.

Then there is an effort here to convert what is obviously principal into income, and it was because the distinguished Senator from Mississippi held that view of the paragraph that I intro-

duced the amendment that is now pending. I do not intend to continue the argument further. I will only say that I believe the words that are used here can perform no useful function. I believe that in describing what is to be taxed the words "net income" are as comprehensive and as complete as any words that can be found in the English language, and therefore that we ought not to imperil or hazard the bill by attempting to emphasize them or to explain them or to enlarge them.

If the Senate will return to the paragraph immediately before this-and it is typical of two other provisions in the bill, I think-it will be seen that there is an effort to declare that undivided profits in a corporation shall be recomed as income of the shareholders. In my opinion that can not be accomplished in any such way. The undivided profits are not the property of the shareholder, from a legal standpoint. Although he may be in part the equitable owner of all the property of the corporation, he is no more the equitable owner of the undivided profits than he is the equitable owner of a share in all the property of the corporation. I agree that there ought to be some way of reaching these undivided profits; but just so surely as you attempt here to broaden the meaning of the word "income" so as to make it include property that belongs to a corporation which it might distribute to its shareholders, but which it has not distributed, you will imperil the bill and meet disaster when you come to enforce it.

I pass now from the legal question to another subject that is closely associated with it, and I reach a question of policy. I come to the part of the committee amendment on page 169. I grant that here we are within the field of complete authority, so far as Congress is concerned. Congress can deduct from an income, in order to reach a taxable part of the income, anything it pleases. It can deduct a quarter of it, or it can deduct a half of it, or it can deduct all of it. This, therefore, does not relate to the constitutional authority of Congress.

I read from the committee amendment:

That in computing net income for the purpose of the normal tax there shall be allowed as deductions: First, the necessary expenses actually paid in carrying on any business, not including personal, living, or family expenses.

I have no objection to that, although I think there will be vast difference of opinion in regard to the construction or meaning of the word "personal."

Second, all interest paid within the year by a taxable person on in-

I have objection to that. This whole paragraph is framed upon the idea that the capital of the individual must be protected intact, must be preserved; that he can use any part of the income he likes for the repair of the capital with which he entered the year and have it deducted from the income. principle is wrong. It ought not to be in any income-tax law. It is not a part of the purpose of an income-tax law to guarantee that the capital shall be maintained. If the capital is lost, there will be a diminished income the following year upon which to levy the tax; but the taxable income should not be depleted by withdrawing from it a sum sufficient to maintain the capital, unless the income arose out of a business in which the capital was employed.

Third, all national, State, county, school, and municipal taxes paid within the year, not including those assessed against local benefits.

There can be no objection at all to that deduction.

Fourth, losses actually sustained during the year, incurred in trade or arising from fires, storms, or shipwreck, and not compensated for by insurance or otherwise.

This deduction is partly right and partly wrong—partly so wrong that it is utterly indefensible.

Suppose I earned \$20,000 a year in the practice of my profession, and during the same year I speculated upon the Board of Trade in Chicago and lost \$20,000, I would not taxable at all under this provision.

Mr. WILLIAMS. How does the Senator arrive at that conclusion?

Mr. CUMMINS. Simply because I have lost \$20,000 in trade, and it would not be compensated for by insurance.

WILLIAMS. Does the Senator call speculation in futures trade?

Mr. CUMMINS. Certainly it is trade. Why, the very organization through which it is carried on is called a board of It is trade in the most literal sense of the word.

Mr. WILLIAMS. It is no more trade than betting on a horse race.

Mr. CUMMINS. I say it is trade. The Senator from Mississippi says it is not. But suppose I had bought 10,000 bushels of eats from a farmer and had lost \$5,000 on it. That would be trade, would it not? I was not including the speculating or the gambling idea in the suggestion I made a moment ago. But it is trade as pure and simple as any other form of business; and yet because I had lost a part of my capital in doing a business that was entirely disconnected with the profession out of which I earned my income, I could use a part of my income to repair my capital and deduct it in my return.

There is no equity in it. There is no reason in it. There is no principle in it. As it seems to me, we ought to confine losses in business or in trade to the losses in the business or the trade out of which the profit or the income is made; and we ought not to permit an income derived from one source to be used for the purpose of paying either debts or losses incurred some entirely distinct business or trade.

Mr. BRANDEGEE. Mr. President—
The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Connecticut?

Mr. CUMMINS. I do.

Mr. BRANDEGEE. I wish to ask the Senator whether, in his opinion, the profits of speculation would be a part of the income which should be taxed?

Mr. CUMMINS. Undoubtedly; unquestionably.

Mr. BRANDEGEE. Then why should not the losses incurred be deducted?

Mr. CUMMINS. There is no more doubt about it than that two and two make four. I assume that the Senator from Mississippi was not serious in the comment he made.

Mr. BRANDEGEE. My inquiry is, If the profits made from the speculation which the Senator from Mississippi thinks would not be trade would be a legitimate object of taxation as income, why would not the losses incurred in the same speculation be a legitimate deduction from income?

Mr. CUMMINS. They should be if the business, being reckoned up at the end of the year, shows a profit. Then it becomes a part of the income and should be taxed. If it shows a loss, there would be no income arising from it, and it should not be taxed. But it is proposed here that if one is engaged in that sporadic business in which so many Americans are engaged, and in which so large a part of our incomes are dissipated, he can take the profit or the income he has from some other vocation or profession or trade and use that profit or income to make good his losses in the speculation or trade to which we have

Mr. GALLINGER. Mr. President, if the Senator will permit me, departing from the argument as to the purchase of stocks in the market, how would it be if a man legitimately bought, say, railroad stocks? As an illustration, not long ago the stock of the Boston & Maine Railroad Co. was selling at over 200 a share. To-day it is selling at 63. Suppose a man bought a thousand shares of it at the former price, would the loss he sustained be a proper deduction?

Mr. CUMMINS. Undoubtedly, if it could be called "in trade." The general purpose of this paragraph is to insure the capital of the person, so that at the end of the year the capital will be as great as it was at the beginning of the year. There are exceptions to that here; but that is the general idea of the paragraph, and it is a false idea in the preparation of an income-tax law.

Mr. SHIVELY. If his losses were actually greater than his gains, there would be no net income.

Mr. CUMMINS. Yes; that is true. That is, if a man had \$100,000 of property at the beginning of the year and it was destroyed in some fashion or other, or if he embarked it in a venture of any kind and lost that property, even though he had an income of \$100,000 from some other source, he could take the income from the other source and repair his losses of capital and have no income. That is the purpose of the para-If you think that is right, you have expressed it very well.

Mr. SHIVELY. Let us take the illustration the Senator has just used. Suppose he has \$100,000, half of which is embarked in buying and selling grain and the other half in buying and selling live stock. Suppose in the grain business he loses \$5,000 during the year and in the live-stock business he gains \$5,000 during the year. Would the Senator say there was any net Would the Senator say there was any net income?

Mr. CUMMINS. I think there would not be.
Mr. SHIVELY. Then I do not understand the objection of
the Senator to this particular clause of the bill.
Mr. CUMMINS. The objection is this: In the case just put

by the Senator from Indiana, here is a business in which a man is engaged. At the end of the year it is to be ascertained whether there is any net profit growing out of the business. Of course all the losses are considered, all the gains are considered, and the result determines whether there is any income from the But I put the case again: Suppose I am not in business at all, but I have \$100,000 a year coming to me from the rent of property. I take \$100,000 and invest it in a mine in rent of property. Utah, and during the year I reach the conclusion that the mine is not worth anything. I deduct that \$100,000 from the \$100,000 of rent I have received, and the result is that I am a man without an income. If that is the real purpose of the framers of the bill it is exceedingly well phrased.

Mr. SHIVELY. You would be without a net income for that

year, of course

Mr. CUMMINS. I did not suppose it was intended to do anything of the kind. In the case I have just put I did not suppose it was intended to guarantee a man's capital and to repair all the losses he might sustain in any venture into which he might enter. I do not believe that is a fair foundation for

an income-tax law.

Mr. SHIVELY. But, Mr. President—

Mr. CUMMINS. If the Senator will permit me to proceed just a little bit further, he will see the full scope of my views.

Mr. SHIVELY. Very well. Mr. CUMMINS. We then come to debts:

Fifth, debts due to the taxpayer actually ascertained to be worthless and charged off within the year.

Suppose 10 years ago a man had given me his note for \$100,000. I had thought it to be good. I had carried it as a part of my principal, a part of my property. This year I have an income of \$100,000 arising from the practice of the law or from rents or anything else. I discover this year that the man who made that note, who has had nothing to do with my income, who has not contributed in any way toward it, who is not in any way interested in the business out of which my income arises, has become bankrupt and that he never will pay the note. I am permitted by this bill to deduct \$100,000 from my income, and again I am a man without an income, although I had just as much income as though the man had remained solvent. I have simply lost a part of my capital or property, and it is proposed here to repair that loss by deducting its amount from my income. I do not mean now, of course, that it is repaired in the sense of being made good, but it is repaired to the extent of not making me pay a tax upon the income.

Mr. WILLIAMS. Will the Senator permit me to make a

suggestion?

Mr. CUMMINS.

WILLIAMS. A port A part of the Senator's confusion of thought grows out of the fact that he forgets that in all bookkeeping there is a debit side and a credit side. A man would have counted among his credits this note that he thought was good, and that would go in as a part of his gross income. Now, mind you, I say "gross income." Then he ascertains that it is worthless, and this provision permits him to charge it off and deduct it; that is all.

It is just like the Senator's horse illustration the other day, which proceeded upon the idea that a man did not keep any books, and that, when he got a thousand dollars for a horse, in rendering his return for the receipts of \$1,000 he did not also debit himself with the fact that he had lost the horse. It was the profit involved in the horse trade that was taxable, not the

total receipts for the horse.

Here you are making a serious argument that we should not permit a man to strike off a worthless note after he has made return of all his bills payable as a part of his income, or the things that constitute a part of his income. You are really altogether losing sight of the fact that there is another side to the ledger

Mr. CUMMINS. No, Mr. President; I am not. I am not in

the least confused about bookkeeping.

Mr. WILLIAMS. Any man would have a right to strike off that note if he had put it on the other side of the ledger.

Mr. CUMMINS. Of course profits do not consist in the difference between the amount of assets and the amount of liabilities. A man might have \$100,000 of assets and but \$10,000 of liabilities, and not have any income at all. The Senator from Mississippi apparently forgets the way in which people arrive at their profits or their losses.

Mr. GALLINGER. Mr. President, I had supposed, from a casual reading of the bill, that the loss had to be sustained during the year; but I infer from what the Senator says that it

Oh, it may date back indefinitely.

Mr. GALLINGER. As an illustration, a man abandons his profession, as I abandoned mine, and turned over my books to a collector, and he reports to me during the next year that he | the amount paid in the way of the income tax.

finds \$6,000 uncollectible. Would that enable me to come here and say that I had sustained that loss under the terms of the

Certainly.

Mr. GALLINGER. I think that is extraordinary. Mr. CUMMINS. The difficulty is, if I may again remind the Senator from Mississippi about bookkeeping, that this provision has in view men who are carrying on a business such as merchandising or banking or manufacturing. Those are the conditions which are really covered, and accurately covered. have not a word of objection to the bill as it relates to such enterprises. But when you come to apply the bill to nine men out of ten who will be called upon to pay a tax under it, it is not accurately adjusted to their affairs, nor is it expressed so as to do justice to their affairs. When you come to profits and losses and incomes, you can not group all the individuals of this country under one rule. You must make some allowance for the differences which exist in the way in which they earn their incomes and in the way in which they expend their incomes.

I proceed one step further:

Sixth. A reasonable allowance for the exhaustion, wear, and tear of property arising out of its use or employment in the business.

That is another effort, of course, to maintain the capital intact; but see what endless difficulty you will confront in its administration. A farmer in my own State, we will say, has an income of more than \$3,000. In making up his account he must determine, if he can, to what degree the soil which he is cultivating has been exhausted, and somebody will have to make him an allowance for the depreciation caused by the exhaustion of the soil. That is true with regard to every kind of property. While there is a certain justice in doing that and it will be done among concerns which do keep an account of depreciation, and which do charge up every year a fair percentage of depreciation, and in that way reach the amount of their profits, so that they will have no difficulty about it, the ordinary man will find it impossible to apply this clause to his affairs. There ought to be a better considered provision to take care of the great multitude of the people, nine-tenths of the people who must pay and will pay the tax under this bill when it becomes a law.

Of course, as to mines a maximum of depreciation has been fixed. I have no objection at all to that. But I could stand here and mention a hundred instances of depreciation which it will be utterly impossible to ascertain or apply under this pro-

I say this without the least feeling against the provision. I would vote for it just as it is if I had to, and it were separated from the rest of the bill, so strongly am I in favor of levying duties upon incomes. But when we are beginning this system it seems to me we ought to begin it in the best possible way

I shall have something more to say at a later time with regard to the latter part of this paragraph when we come to consider the payment of the tax at its source. I am in favor of that principle; but there are a great many things here that it seems to me will make the bill utterly unworkable, and instead of simplifying the collection of the tax they will compli-

cate it, and possibly entirely defeat it.

There is one thing in regard to this provision that I might as well say while I am on my feet, and it constitutes the real fundamental defect in the bill, so far as principle is concerned. I will point it out now, and at a later time I will point it out again. The bill provides, substantially, that those who have incomes of less than \$3,000 shall not pay a tax. I am satisfied at the present time with that limit, and I would not vote to reduce it at this time. But there is incorporated her a provision for taxing the earnings of corporations. no objection to that, but the men and women in this courtry who have an income of less than \$3,000 a year and who derive all of it or a part of it from the dividends of corporations which are taxed are compelled to pay the income tax exactly as though they had an income of more than \$3,000 a year. It is unjust, it is unequal, and it ought in some way to be We have assumed here that a man might well take his first \$3,000 and use it for the general purposes of life, for the training and education both of himself and family; but with respect to every one of them who derive a part of their income or all of it from the dividends of corporations they are compelled to pay this tax, are they not?

Mr. WILLIAMS. How are they compelled to pay it?
Mr. CUMMINS. They are compelled to pay it because the

corporation pays the tax on the entire income of the corporation, and that reduces the dividends paid to these people by just

Mr. WILLIAMS. Mr. President, the Senator's answer to my question has disclosed what I wanted to bring out. In other words, instead of meaning that the bill taxes those people, he means that the corporations are able to shift their tax.

Mr. CUMMINS. So they are. Mr. WILLIAMS. I should like to know if there is a tax in

the world, except a poll tax, that can not be shifted.

Mr. CUMMINS. The Senator from Mississippi has misunderstood me. Of course, the corporation very often passes on its That unfortunately is true. I do not know of any way in which to prevent it. I am not complaining at this moment of the tax that is passed on. I am complaining of this. As an illustration, suppose I stand with an income of less than \$3,000. It is the policy of this bill that my income shall not be diminished by a tax levied by the General Government. have that income as an employee of the corporation, it goes free. It is not affected by any tax levied upon the property of the corporation. I get my pay and I am permitted to spend it in the way that seems to me wise. Now, suppose that I have an income of \$2,900 from the same corporation, derived as dividends on stocks that I hold in the corporation, the 1 per cent is taken from that dividend and I receive just 1 per cent less than I would have received if the tax had not been levied.

Mr. WILLIAMS. It is taken from the dividends by whom? It is taken from the dividends necessarily Mr. CUMMINS. by the corporation. It is first taken from the corporation by the Here is \$100,000-

Mr. WILLIAMS. That is just what I said a moment ago.

The corporation shifts the tax.

Mr. CUMMINS. No; here is \$100,000 which the corporation has earned and is applicable to the payment of dividends. We will suppose that it is the entire net income of the corpora-It is to be distributed among its stockholders, but before it is distributed 1 per cent is deducted and paid to the Government of the United States, and therefore 1 per cent less than would have been paid to me is paid to me. It is all that I am entitled to.

Now, I make no objection to the payment on the part of the corporation, but I do say we ought to provide some way in which the man who has an income of less than \$3,000 should

not bear that tax.

Mr. WILLIAMS. How can you do that?

There are two or three ways in which it Mr. CUMMINS. can be done. It can be done either through segregation by the corporation under proper provisions, or it can be done by adding to the bill a paragraph that, in the case of every man whose income is derived in whole or in part from the dividends of a taxed corporation and is less than \$3,000, upon application to the Government the Government will reimburse him for the deduction that has been made from his part of the earnings of the corporation. It can be done in either of those ways, and will be if justice prevails.

But I had not intended to enter upon that subject. I have it very much at heart, and when we reach that part of the bill I intend, if I can, to offer an amendment that will set

forth my views with regard to that particular matter.

Mr. SUTHERLAND. Before the Senator leaves the matter of a corporation tax, I wish to say that I think perhaps most of the States in the Union in one form or another impose a tax upon corporations as such. It is not always measured by the Sometimes it is measured by the amount of the capital income. Sometimes it is measured by the amount of the stock. It is measured in various ways; but it is a special tax stock. It is measured in various ways; but it is a special tax upon the corporation, because it is recognized that the right to do business in corporate form is a very valuable right and that it is more beneficial to the stockholder in the great majority of cases to have an investment in corporate form than it is to have it in some individual form.

Now, I ask the Senator whether or not a tax of this kind, although it is imposed by the General Government, can not be justified upon the same theory that it is a tax upon the franchise of the corporation, upon the right of the stockholders to do business in a corporate form, which is a valuable right.

Mr. CUMMINS. I am not complaining of the tax upon the corporation; I have always thought there was a better way of reaching that result; but I am not concerning myself about it now. I want to remind the Senator from Utah that we establish a policy here that the men who get less than \$3,000 ought not to pay any part of this income tax either nominally or actually. That proceeds upon the theory that they can make better use of their incomes than to pay the expenses of the Gov-ernment of the United States. Now, it does not make any difference whether the incomes are derived from the stocks of corporations or whether they are derived from salaries from corporations, the men who get the money need the money just the same.

Mr. SUTHERLAND. Mr. President, there is this difference: The man who derives an income from an investment in a corporation gets it with less effort than he does if he has to work for it. He has the advantage of having his money in a corporation which has certainly very valuable rights. For example, he has one of the most valuable rights, namely, that he can not be sued beyond the extent of his investment in the corporation. He can not be held responsible for the debts of the corporation as he could be if it were a partnership or in some other form of association.

Mr. CUMMINS. I think that consideration does not enter the question I am discussing at all. Suppose one man gets \$2,850, we will say, as dividends from a corporation. Another man gets \$2,900 as rents from real estate. Out of the former there has been taken 1 per cent. Out of the latter there is taken nothing. I assume that the labor of receiving it is not much greater in one case than in the other. It matters not that the corporation may have a valuable franchise; however valuable it was, its dividends did not result in giving this particular man more than \$3,000, and therefore he ought to be able to hold his place among the untaxed.

I have consumed much more time than I intended, Mr. President, and I apologize for it. I rose simply to suggest the desirability of removing from this paragraph some dangers which I think are in it and the removal of which would not

weaken it in the slightest degree, but rather fortify it against assaults that may hereafter be made upon it.

Mr. SUTHERLAND. Before the Senator takes his seat, he referred to another paragraph, and if I understand it I entirely agree with the Senator's position. It is the clause on page 169: Second, all interest paid within the year by a taxable person on in-

If I understand that, it would result in this sort of a situa-tion: Here is one man, for example, who has purchased a home. He has given a mortgage upon it for its price or a large part of it, and is paying, let us say, \$1,000 in interest. Under this bill that would be deducted from his net income. But if his neighbor has rented a house, and instead of virtually paying what the first-named man does in the form of interest he pays directly \$1,000 rent. He gets no deduction whatever, and yet the situation of the two is to all intents and purposes precisely the same. One has made a purchase and is paying interest which virtually amounts to rent. The other has not made a purchase, but pays the rent direct. One gets the exemption and the other does not.

Mr. CUMMINS. I think the conclusion of the Senator from Utah is correct. It is simply another illustration of the fact that the bill was composed to meet the conditions of organized business, such as merchants and manufacturers, and is not well fitted to meet the situation as it actually exists.

I do not intend to call for the yeas and nays upon my amendment. I know how futile it would be, and I have no desire to inconvenience the Senate. I offered it because I wanted to make my own position in the matter entirely clear.

Mr. WILLIAMS. Mr. President, I will ask for a vote.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Iowa [Mr. Cum-MINS].

The amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee, on page 167, lines 18 and 19, inserting the words "or upon surrender of the contract."

The amendment was agreed to.

The next amendment of the committee was, on page 167, after line 19, to strike out the following:

after line 19, to strike out the following:

That in computing net income for the purpose of the normal tax there shall be allowed as deductions the necessary expenses actually incurred in carrying on any business, not including personal, living, or family expenses; all interest accrued and payable within the year by a taxable person on indebtedness; all National, State, county, school, and municipal taxes accrued within the year, not including those assessed against local benefits; losses actually sustained during the year, incurred in trade or arising from fires, storms, or shipwreck, and not compensated for by insurance or otherwise; debts actually ascertained to be worthless and charged off during the year; also a reasonable allowance for the exhaustion, wear and tear of property arising out of its use or employment in the business, but no deduction shall be made for any amount of expense of restoring property or making good the exhaustion thereof for which an allowance is or has been made; no deduction shall be allowed for any amount paid out for new buildings, permanent improvements, or betterments, made to increase the value of any property or estate; the amount of income received or payable from any source at which the tax upon such income, which is or will become due, under the provisions of this section, has been withheld for payment at the source in the manner hereinafter provided, shall be deducted; but in all cases where the tax upon the annual gains, profits, and incomes of a person is required to be withheld and paid at the source as hereinafter provided, if such annual income, except that derived from interest on corporate or United States indebtedness, does not exceed the rate of \$4,000 per annum, or if the same is uncertain, indefinite, or irregular in the amount or time

during which it shall have accrued, and is not fixed or determinable, the same shall be included in estimating net annual income to be embraced in a personal return; also the amount received as dividends upon the stock, or from the net earnings of any corporation, joint-stock company, association, or insurance company which is taxable upon its net income as hereinafter provided shall be deducted.

And in lieu thereof to insert:

And in lieu thereof to insert:

That in computing net income for the purpose of the normal tax there shall be allowed as deductions: First, the necessary expenses actually paid in carrying on any business, not including personal, living, or family expenses; second, all interest paid within the year by a taxable person on indebtedness; third, all national, State, county, school, and municipal taxes paid within the year, not including those assessed against local benefits; fourth, losses actually sustained during the year, incurred in trade or arising from fires, storms, or ship-wreck, and not compensated for by insurance or otherwise; fifth, debts due to the taxpayer actually ascertained to be worthless and charged off within the year; sixth, a reasonable allowance for the exhaustion, wear, and tear of property arising out of its use or employment in the business, not to exceed, in the case of mines, 5 per cent of the gross value at the mine of the output for the year for which the computation is made: Provided, That no deduction shall be allowed for any amount paid out for new buildings, permanent improvements, or betterments made to increase the value of any property or estate; seventh, the amount received as dividends upon the stock or from the net earnings of any corporation, joint-stock company, association, or insurance company which is taxable upon its net income as hereinafter provided; eighth, the amount of income, the tax upon which has been paid or withheld from payment at the source, under the provisions of this section: Provided, That whenever the tax upon the income of a person is required to be withheld and paid at the source as hereinafter required, if such annual income does not exceed the sum of \$3,000 or is not fixed or certain or is indefinite or irregular as to amount or time of accrual, the same shall not be deducted in the personal return of such person. of such person.

Mr. STERLING. Mr. President, I do not rise to propose any amendment, but simply to make a suggestion called out by a statement made by the Senator from Iowa [Mr. Cummins]. It is in regard to the exemptions on account of losses incurred in trade, and so forth. The question was raised as to whether it would include losses in speculation on a board of trade. I am inclined to think that under the definition of "trade" it would include losses thus sustained, and the question is whether we want to exempt losses thus incurred.

I call the attention of the Senator from Mississippi simply to the definition of the word "trade," so that he will see how the

proposition stands:

Trade comprehends every species of exchange or dealing, either in the produce of land, in manufactures, in bills, or in money; but it is chiefly used to denote the barter or purchase and sale of goods, wares, and merchandise, either by wholesale or retail.

And so forth.

It seems to me that under this very broad and comprehensive definition it might include trade on a board of trade and the exemption would pertain to a loss sustained on a board of trade.

If the language could be qualified by some such expression as "losses incurred in legitimate and ordinary trade pursued by the party," or equivalent words, it seems to me that it would be better than the broad expression used.

Mr. WILLIAMS. Mr. President, all net income comes from a comparison of receipts and losses. There can be no other way of arriving at a net income except by comparing gains and losses. If a man lost a certain amount of money during the year, no matter how he lost it, he ought not to be compelled to put it in as a part of what he still has. If two men bet upon a horse race, so far as that is concerned, during the year and one of them lost \$100 and the other gained \$100, the man who has the hundred dollars would have to take heed of it in computing his net income, and the man who lost it would take heed of the loss in computing his net income. So far as I can see, you can not arrive at net income except by taking what comes in and what goes out.

Mr. STERLING. But, if the Senator will permit me-Mr. WILLIAMS. Allow me to add just this: I think this language would have been more easily understood if, instead of using the word "deductions" here, we had used what it really means, namely, that in computing net income for the purpose of the normal taxpayer he shall be allowed to return such and such things. I think that is where the confusion comes in, if I understand at what the Senator is aiming.

Mr. STERLING. This is the way in which it occurred to me:

Here is a man who, under the protection of the Government, has an enormous income for which he would be taxable under this proposed law, but he squanders all that income or more in speculation, in illegitimate trade on the board of trade. The question in my mind is whether he ought to have the privilege of deducting from his income the losses thus sustained.

Mr. WILLIAMS. Mr. President, a squandered income is no income. If it was squandered during the year of the computa-tion, it does not make any difference how the man lost it. Take this sort of a case, for example: The Senator from South Dakota and the senior Senator from Iowa seem to be worried a good deal about the losses of a man in something else. The

Senator from South Dakota seems to have the idea in his mind that if a man was both a farmer and a lawyer he ought to keep two separate income accounts, and that what he lost as a farmer ought not to be charged up against what he gained as a lawyer, or vice versa, as well as I could understand him; and he seems to be very much worried about a part of a man's capital, if it were lost, being permitted to be charged off.

Now, take this sort of a case: I am practicing law, let us say, and I get \$10,000 during the year from that practice, and during the same year I lose \$5,000 in my agricultural pursuits. My net income, therefore, so far as that is concerned, is \$5,000. Suppose that my house, which is worth \$5,000, burned down; suppose the house burned by no fault of mine; that I had no insurance upon it; and I take my \$5,000 and pay it out during that identical year to build a new house. If all three of these things happen in the same year, I have no net income at all; nor ought I to be charged with any.

Mr. STERLING. Mr. President, I grant that in the case sup-

posed by the Senator from Mississippi he should not be charged with any net income, because his losses were sustained in a legitimate business-in a commendable business. But in the other case the loss has not been sustained in that kind of business at all; but, whether a man having earned \$10,000 as a lawyer or as a physician, should be allowed to offset against or deduct from that income of \$10,000 that which he has lost in

speculation on a board of trade, is the question.

Mr. WILLIAMS. Mr. President, the object of this bill is to tax a man's net income; that is to say, what he has at the end of the year after deducting from his receipts his expenditures or losses. It is not to reform men's moral characters; that is not the object of the bill at all. The tax is not levied for the purpose of restraining people from betting on horse races or upon "futures," but the tax is framed for the purpose of making a man pay upon his net income, his actual profit during the year. The law does not care where he got it from, so far as the tax is concerned, although the law may very properly

care in another way.

Mr. STERLING. If the Senator will permit me, suppose a man has made \$10,000 legitimately in a legitimate business or profession; the inspector or collector knows that; and a tax is levied because of that income, or it is attempted to be levied, and the man says, "I lost \$10,000 in a poker game," what then?

Mr. WILLIAMS. Suppose, in other words, that at the time

the computation of his tax takes place he has not a red cent of profit or income during that year, no matter how it occurred?

Mr. SMOOT. Some one must have won what the other man

lost in the poker game.

Mr. WILLIAMS. By the way, it is suggested to me that one man has gained what the other has lost, and that the winner might be taxed on his winnings, so the Government would not lose anything.

Mr. WEEKS. Mr. President, I should like to ask the Senator from Mississippi to give me his opinion on a case which I will put to him. Suppose a man has a hundred thousand dollars in stocks, which are worth par; that they are selling at that price; and a dividend of 5 per cent is paid on them; in other words, he gets \$5,000 income from his investment, he earns \$5,000 from his personal efforts during the year, and his income is \$10,000 for that year; then suppose his stocks depreciate in value

\$10,000, has he any net income for that year?

Mr. WILLIAMS. I never thought about that, but I do not think that cuts any figure because the depreciation in the value of the stock is not like a depreciation by reason of the wear and tear arising out of the use of property. A man's income would still remain an income regardless of the value of his property. My plantation this year might yield me, say, \$3,000, and next year the same plantation might yield me \$4,000 or \$2,000; my income would be measured by what the plantation yielded me and not by the value of the plantation. Meanwhile the property might go up in value or it might go down in That would have nothing to do with the income, nor would the value of your stock in the market have anything to do with the dividends which you receive upon your stock.

While I am talking upon that subject, there is another point that occurs to me, and that is what the Senator from Iowa [Mr. CUMMINS] went over a few moments ago. If the Senator from Iowa can invent any way under the sun of preventing the shifting of taxation, he is the wisest man who has lived since Solon died. The Senator seems to think that you ought to give a bounty to people who have less than \$3,000, provided their income comes in the shape of dividends in corporations, because when the corporation was taxed the corporation reduced the dividends. It may be that the corporation did, and it may be that it did not, but I am going to suppose first that it did. Suppose it did shift the tax in that way, do you imagine that the man who works for a salary for that corporation will not have a part of it shifted on him, too, in the way of not raising his wages as. much as they otherwise would have been raised? pose that the merchant or the lawyer who pays the income tax is not going to make it up somehow in the price of his goods or in the price of his services, if he can do it, if the demand and supply of the market for the goods or for his peculiar sort of ability enable him to do it? And absolutely it is proposed to give the man with less than \$3,000 a bounty because a corporation has shifted its tax to him.

Mr. WEEKS. Now, I want to submit an additional inquiry to the Senator from Mississippi, relating to the case which I have already submitted to him, and that is: Suppose at the time those stocks were selling at 10 per cent below what they were selling for the previous year, I sold them for \$10,000 less than they were priced at the year before, is that to be deducted from

my income?

Mr. WILLIAMS. I think not. That is a mere change of capital and principal from stocks into money.

Mr. WEEKS. It seems to me that it would be deducted. Mr. WILLIAMS. Do you mean that in casting up your accounts and arriving at your gross income, you do not count that? Of course, you would count it as you would count any money that you got from any source, but you would charge against it also what was regarded as the value of the stock.

Mr. WEEKS. It seems to me, Mr. President, that it would be a shrinkage of my principal; and, under the reading of this bill, I am not sure but what that loss of principal could be deducted against my income, so that there would be no taxes.

Mr. WILLIAMS. Under what clause of the bill? What

provision of it do you mean? Does the Senator refer to the depreciation clause?

Mr. WEEKS. Yes.

Mr. WILLIAMS. Oh, no. It says:

Sixth, a reasonable allowance for the exhaustion, wear and tear of property arising out of its use or employment in the business.

That could not possibly refer to stocks.

Mr. CUMMINS. Mr. President, in response to the suggestion just made by the Senator from Mississippi, let us see how we stand. He says that a man at the end of the year sits down to make up an account to see whether or not he has any net income. If he is a merchant, he takes an inventory of his goods; if they are worth less than they were the year before, they are marked down, and the market value of that property is entered upon the books in order to show whether or not he has made a profit during the year. According to the Senator from Mississippi, the same thing would happen with a lawyer. He sits down at the end of the year and puts on one side of the account all he has taken in, all his profits, and he puts on the other side all his losses. If his losses are to be reckoned in the same way that the merchant's losses are reckoned, then, of course, the depreciation of all the property that he may own, if there be a depreciation, must also be entered upon the books.

That shows, Mr. President, that, while the Senator from Mississippi is right with regard to ascertaining the profits and net income of business, he is not right, and the bill does not adjust itself to the ascertainment of net income of individuals who are not in what is ordinarily known as business.

Mr. WILLIAMS. What is the Senator complaining of-that they can not charge off anything to depreciation account, while

the merchant can?

Mr. CUMMINS. I do not think they ought to be permitted

to charge off depreciation of their property.

WILLIAMS. Well, that is a different proposition. supposed that probably the Senator thought the lawyer also ought to be allowed to do it, and that we also should be allowed to charge the depreciation in our mental faculties, which would be pretty hard to estimate. [Laughter.]
Mr. CUMMINS. I am not. I am speaking against the prin-

Mr. WILLIAMS. I do not know but that the Senator is right about the general idea that no depreciation oughf to be allowed to be deducted. There may be something in that suggestion, but it has been almost the uniform policy of all incometax laws to permit it.

Mr. CUMMINS. I simply want to record my protest against that principle.

Mr. STERLING. I offer the amendment which I send to

The VICE PRESIDENT. The amendment will be stated.
The Secretary. On page 169, line 15, it is proposed to strike out the words "in trade" and insert "by the taxpayer in the pursuit of any ordinary and legitimate trade or business."

Mr. STERLING. If the amendment were adopted, the provision would read:

Losses incurred by the taxpayer in the pursuit of any ordinary and legitimate trade or business.

Mr. WILLIAMS. In other words, you are going to count the man as having money which he has not got, because he has lost it in a way that you do not approve of.

Mr. STERLING. And I think rightly so.

Mr. SMOOT. Mr. President, I should like to ask the Senator what becomes of the man who is a broker and whose whole business is dealing upon the stock exchange? Does the Senator think that he ought to be taxed upon his income; and, if so, should not that man be allowed to deduct whatever loss he may incur in that particular line of business

Mr. STERLING. I think so, because I think the business of the broker, as a general proposition, is a legitimate business; but the amendment would exclude losses sustained in stock and

grain gambling; that is the idea.

The Senator differentiates, then, between the Mr. SMOOT. broker who does nothing else but follow that business and the man who does it "on the side"?

Mr. STERLING. Oh, no. A man may occasionally engage in the brokerage business, and, taking a particular deal, it may be perfectly honest and legitimate; or he may be a regular broker engaged continuously in a business which is legitimate. My only object in suggesting this amendment is to prevent, if it can be done, what might be termed the setting off of a loss in a strictly gambling operation.

Mr. McCUMBER. Let me ask the Senator a question right there. If the successful party in the gambling operation—and I always supposed that what one man loses the other man gains in a straight gambling contract—makes \$10,000, would not the

Senator charge it up to him as taxable income?

Mr. STERLING. I do not know but that I would; and I do not think there would be any injustice or wrong in doing so.

Mr. McCUMBER. Very well. Then, if the Senator taxes him once upon that, why should he seek to tax that same \$10,000 twice, both to the man who lost it and to the man who gained it?

Mr. STERLING. The same supposition might be made in other cases, so far as that is concerned. You do not always avoid double taxation.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from South Dakota [Mr.

The amendment was rejected. The VICE PRESIDENT. The question recurs on the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in section 2, page 170, at the beginning of line 22, to strike out the letter "C."; in line 25, after the word "possessions," to strike out "the principal and interest of which are now exempt by law from Federal taxation," so as to read:

That in computing net income under this section there shall be excluded the interest upon the obligations of a State or any political subdivision thereof, and upon the obligations of the United States or its possessions; also the compensation of the present President of the United States during the term for which he has been elected, and of the judges of the supreme and inferior courts of the United States now in office, and the compensation of all officers and employees of a State or any political subdivision thereof.

The amendment was agreed to.

The next amendment was, in section 2, page 171, after line 6. to strike out:

D. That there shall be deducted from the amount of the net income of each of such persons, ascertained as provided herein, the sum of \$4,000 : Provided, That only one deduction of \$4,000 shall be made from the aggregate income of all the members of any family composed of one or both parents and one or more minor children, or husband and wife, but if the wife is living permanently apart from her husband she may be taxed independently; but guardians shall be allowed to make deduction in favor of each and every ward, except that in case where two or more wards are comprised in one family and have joint property interests the aggregate deduction in their favor shall not exceed \$4,000; and

And insert:

And insert:

C. That there shall be deducted from the amount of the net income of each of said persons, ascertained as provided herein, the sum of \$3,000, plus \$1,000 additional if the person making the return be a married man with a wife, living with him and being herself not taxable under the income-tax law, or plus the sum of \$1,000 additional if the person making the return be a married woman with a husband living with her and being himself not taxable under the income-tax law; but in no event shall this additional exemption of \$1,000 be deducted by both a husband and a wife. If the person making the return shall be a married man or a married woman there shall be an additional exemption of \$500 for each minor child living with and dependent upon the taxable parent, but the total exemption on account of children shall not exceed \$1,000: Provided, That the additional exemption or exemptions for children shall operate only in the case of

one parent in the same family, and that the total exemption on account of children shall apply to a widow or a widower with a minor or dependent child or children: Provided further, That where both parents are taxable under this act because of having more than \$3,000 of net income each the exemption on account of the children hereinbefore provided for shall not apply to either.

Mr. BRISTOW. I call attention to the words beginning in line 25, on page 171, reading:

Plus the sum of \$1,000 additional if the person making the return be a married woman with a husband living with her and being himself not taxable under the income-tax law.

Does that presume that a married woman with an income has a husband whom she has to support and therefore there ought

to be an exemption because of that burden upon her?

Mr. WILLIAMS. It presumes that where she has the money she ought to pay the tax. The object of it, Mr. President—not to follow up the form of the Senator's question, which would lead me into digressions-was simply this: The House framed its bill upon the theory that \$4,000 was a reasonable amount, in its opinion, for an American family to live upon, with a proper standard of living, and that a sum below that ought not to be taxed. When it came to us in that shape we concluded that that was true if you were going to take the family as a basis. The House bill provided that the husband and wife should be taxed as one. We provide that the man and woman shall be taxed just as if they were two men or two women. Then we give this \$1,000 additional to make the family exemption \$4,000; but if both husband and wife are taxable, each has an exemption of \$3,000 already, and therefore we do not give two taxable persons, being man and wife, in one household the \$1,000 additional exemption. They have \$6,000, to wit, \$3,000 That is the reason that was put there.

Mr. BRISTOW. I do not think the Senator fully understood

just what my objection was.

Mr. WILLIAMS. Possibly not.

Mr. BRISTOW. I believe that if the man has a wife to support the exemption on the married man should be a thousand dollars more than on the unmarried man, but I do not believe the woman ought to have an exemption of a thousand dollars more because she happens to have a husband. I think the husband ought to be able to take care of himself.

Mr. WILLIAMS. I think she needs it a lot more than he

Mr. BRISTOW. It seems to me the Senator is encouraging indigent husbands

Mr. WILLIAMS. No; no more than I am encouraging indigent wives

Mr. BRISTOW. I do not agree with the proposition an-

nounced by the Senator.

Mr. WILLIAMS. My object is to give the family \$4,000 in any event where a man and wife are living together as man and wife, but I did not want to give them \$7,000. If both of them are taxable persons and each one had a right to an exemption of \$3,000, if I had given the additional \$1,000 that family would have gotten \$7,000 of exemption. In other words, in addition to \$3,000 to each as a person, they would have received \$1,000 as a family.

Mr. BRISTOW. My view of the matter, I take it, is different from the Senator's view. Where the husband has an income of \$4,000 I think no attention should be paid to the income of the wife, I do not care what it is; and if her income is \$3,000 I do not believe she ought to have an additional \$1,000 exempted because she happens to have a husband. I am opposed to permitting the wife to deduct the extra thousand dollars because of the presumption that she has to support her

husband.

Mr. WILLIAMS. We did not put it upon the ground that the presumption was that she had to support her husband, nor did we put the additional exemption of a thousand dollars in the husband's case on the ground that he had to support his wife. We put it upon the ground that a family in any event, if either of them is taxable, ought to have an exemption a thousand dollars greater than a single person not in a family. In other words, we have tried to make the family the basis of the tax

Mr. BRISTOW. Mr. President, in order to express my views In over to strike out of the amendment on page 171 all of line 25 after the word "law" and the comma, down to and including the word "wife," in line 4, page 172. That will strike out the part of the amendment which permits the wife to deduct from her net income a thousand dollars because she happens to have a husband

The VICE PRESIDENT. The question is upon agreeing to the amendment proposed by the Senator from Kansas to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. NORRIS. Mr. President, I move to strike out, on page 172, the last two words of line 7 and all of line 8, being the following words:

But the total exemption on account of children shall not exceed \$1,000.

I should like to inquire of the Senator from Mississippi why, in the opinion of the committee, the exemption of \$500 for each minor child supported by the head of the family, who has the income, should be limited to two? What is the theory of the committee-that the man with two children should be entitled to \$500 exemption for each one of them, and the man with three children should not be entitled to any more of an exemption?

Mr. WILLIAMS. Of course when you take an arbitrary line to stop or start with, in the case of anything, it is utterly impossible to give a logical reason for it, except that we wanted to limit somewhere the amount of exemptions to which the family would have a right; and it was thought that a thousand dollars was enough, in addition to the \$4,000, to constitute the exemption on account of children. In other words, if a man had \$3,000 a year that was exempt, and then had another thousand dollars on account of the fact that he was married, making \$4,000, and then had another thousand on account of the fact that he had children, that would be \$5,000, which was as much as we cared to have exempted from taxation to any one family.

It is possible under this bill that a family might have \$6,000 exempt; but, if so, it would be because the husband was a taxable person with an income of over \$3,000, and the wife

was a taxable person with an income of over \$3,000.

I will say to the Senator in all frankness that as far as I am personally concerned I should not object if the exemption from taxation were \$500 for each child, with a limitation larger than this, but there must be a limitation somewhere. Surely, if a man happened to have 10 children, you would not want to give him an exemption from taxation of \$5,000 on account of the children; because the Senator knows, as I do, that the expense of taking care of a family does not grow in arithmetical proportion with the increase in the number of children. It is not much more expensive to take care of three or four children in a family than to take care of two, because the maintenance of the husband and the wife and the household expenses and a great many other charges are in common in both cases. But we thought we ought to fix a limit somewhere; and the committee, as well as the Democratic Party in conference assembled, con-cluded that a thousand dollars was a sufficient amount to allow for exemptions on account of children.

Of course I could not give any logical reason why you should stop at two any more than at three, or at three any more than at four; but the business reason which we had in mind was

about what I have stated.

Mr. NORRIS. Mr. President, I am very much obliged to the Senator from Mississippi for his very candid explanation. I believe the Senate committee has improved upon the House bill in this particular respect, at least. It appeals to me that the man who is married and has a wife ought to have a greater exemption than the unmarried man. It appeals to me that the man who is raising children ought to have more of an exemption than the married man who is not raising children. this particular part of the bill the theory upon which the committee acted has always appealed to me, with the one exception of this limitation.

The Senator knows, and it is common knowledge, that the ordinary family of the ordinary person has, and ought to have, more than two children. There ought to be encouragement given for larger families than two children, at least. If \$4,000 is a sufficient exemption for an entire family, the Senator could meet the difficulty by making the amount of exemption for each child a less amount than \$500.

It seems to me there ought to be no limitation, however. It is not very much of a concession if you concede that much to the men and the women who are raising families and perpetuating the race and continuing the stability of the country. If there is to be an exemption, it seems to me that the man who is raising four or five children is more entitled to it than the

man who is raising only two.

I do not believe the Senator's argument is well founded as far as this particular limitation is concerned. As far as I am concerned, I should like to take off the limitation entirely. But if you do not feel like taking it off entirely, as my amendment would, at least extend it to the ordinary-sized family that we would like to see and do see exist in the ordinary run

of life.

Mr. OLIVER. Mr. President—
The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Pennsylvania?

Mr. NORRIS. I yield to the Senator.
Mr. OLIVER. I will add to what the Senator says that this concession amounts to only \$5 a year for each child, and I do not think \$5 is too much bounty or premium to offer for each additional child. In fact, I think it would be good policy for the Government to offer more than that to encourage the propagation of liberal-sized families throughout the land.

Mr. NORRIS. I believe that is right.

Mr. WILLIAMS. In other words, stop race suicide; but let us do it in a separate bill.

Mr. NORRIS. The Senator knows that particularly on that subject it would be difficult to get a bill this far along in the parliamentary situation. Mr. WILLIAMS. Yes.

Mr. NORRIS. The opportunity is here, now. If it is right to do it, let us do it. Here is the place, and this is the time.

Mr. WILLIAMS. Seriously, Mr. President, and laying

Mr. NORRIS. I want to say to the Senator that in offering

this amendment I am serious.

Mr. WILLIAMS. Oh, I know the Senator is; but I meant

"being serious." Mr. NORRIS. I am serious, and I think the Senator ought

to be.

Mr. WILLIAMS. When I say "seriously," I mean that I intend to be serious, not that the Senator does. He is always serious. But, seriously, this exemption was not put here for the purpose of encouraging families to have children. It was put here because we thought a man with two children to take care of ought not to be taxed at the same rate as a man without children.

Mr. NORRIS. Then why tax the man with three children

the same rate as the man with two?

Mr. WILLIAMS. We were trying to adapt the tax to the ability of the taxpayer, and not using it as a means to encourage large families, nor do I think this would be precisely the right bill in which to include any provision for that purpose. It may be that the Senator is right, and that the exemption ought to extend to three children or to four. Certain it is that families with only two children can not increase the population of any country, nor add strength to the State of which they are citizens. But we have it this way, and we have stopped at \$1,000; and I think everybody will admit that whether a man has two children or three or four this exemption helps him by keeping him to this extent from being taxed under the bill.

Mr. NORRIS. Mr. President, I look at the matter on this theory: I am not advocating giving a premium for families of any particular size. I do not want to apply any other rule of that kind. I simply think the man with three children can not afford to pay the tax as well as the man with two. You have made an exemption for children because it is harder for a man with a family of children to support to pay the tax than it is for the other man. Every time you tax him, and curtail his ability to support his family, he does just that much less, and must do just that much less, for the family. In the case of the family of more than two children, you are depriving them of some of the luxuries and some of the necessaries of life which you are not taking away from the others.

I congratulate you on extending liberal exemptions to the family of two children; but for the same reason that you did that you ought to make the same exemption for the man who has three or four children. Certainly there is no justice, it

seems to me, in stopping where the committee did. Mr. WILLIAMS. We man who has 17 children. We had to stop somewhere. I know one

Mr. NORRIS. I think we ought to let nature take its course, and not make an arbitrary stop. I ask for the yeas and nays on my amendment.

The yeas and nays were ordered, and the Secretary pro-

ceeded to call the roll.

Mr. CHILTON (when his name was called). I announce my

pair as on the former votes, and withhold my vote.

Mr. BRYAN (when Mr. Fletcher's name was called). My colleague [Mr. Fletcher] is absent on public business. He is paired with the junior Senator from Wyoming [Mr. WARREN].

Mr. LEWIS (when his name was called). I am paired with the junior Senator from North Dakota [Mr. Gronna], and

therefore withhold my vote.

Mr. REED (when his name was called). I am paired with the Senator from Michigan [Mr. SMITH]. I transfer that pair to the Senator from Oklahoma [Mr. Gore] and vote "nay.

Mr. THOMAS (when his name was called). I transfer my pair with the senior Senator from Ohio [Mr. Burron] to the funior Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. WARREN (when his name was called). I am paired with the senior Senator from Florida [Mr. Fletcher]. I therefore withhold my vote.

The roll call was concluded.

Mr. LEA. I am paired with the Senator from Rhode Island [Mr. Lippitt]. I transfer that pair to the junior Senator from Mississippi [Mr. Vardaman] and vote. I vote "nay."

Mr. KERN. I am paired with the Senator from Kentucky

[Mr. Bradley] and withhold my vote.

Mr. CLARKE of Arkansas. I ask if the junior Senator from Utah [Mr. SUTHERLAND] has voted?

The VICE PRESIDENT. He has not.

Mr. CLARKE of Arkansas. I withhold my vote.

Mr. STONE. I have a pair with the Senator from Wyoming [Mr. CLARK], and will have to withhold my vote.

Mr. CHILTON. I transfer my pair to the junior Senator from Tennessee [Mr. Shields] and vote "nay."

Mr. GALLINGER. I have a general pair with the junior Senator from New York [Mr. O'GORMAN], which I transfer to the junior Senator from Maine [Mr. BURLEIGH]. I vote "yea."

Mr. WARREN. I announced a pair with the senior Senator from Florida [Mr. Fletcher]. I transfer that pair to the senior Senator from Connecticut [Mr. Brandegee], so that the senior Senator from Florida will stand paired with the senior Senator from Connecticut. I vote "yea."

Mr. DILLINGHAM. I am paired with the Senator from Maryland [Mr. SMITH] on this and all other questions which

arise on the bill. I make this announcement for the day. For that reason I withhold my vote.

Mr. I.A FOLLETTE. I wish to announce that the junior Senator from Minnesota [Mr. CLAPP] is unavoidably absent from the Chamber this afternoon. If he were present, he would vote "yea."

The result was announced-yeas 27, navs 34, as follows:

	YE	AS—27.	a, as lonows.
Borah Brady Bristow Catron Colt Crawford Cummins	Fall Gallinger Jones Kenyon La Follette Lodge McLean	Nelson Norris Oliver Page Penrose Perkins Poindexter	Sherman Smoot Sterling Townsend Warren Weeks
	NA	YS-34.

	NOT V	OTING-34.	
Bradley Brandegee Burleigh Burton Clapp Clark, Wyo. Clarke, Ark. Culberson Dillingham	du Pont Fletcher Goff Gore Gronna Hitchcock Jackson Kern Lewis	Lippitt McCumber Newlands O'Gorman Pittman Root Shields Smith, Md. Smith, Mich.	Stephenson Stone Sutherland Thornton Tillman Vardaman Works.

So Mr. Norris's amendment to the amendment of the committee was rejected.

Mr. LODGE. I suggest, in line 6, on page 172, to strike out the word "minor." I think it is a hasty conclusion to infer I think it is a hasty conclusion to infer that a minor child is a greater burden or expense upon the parents than a child that is not a minor. I think that is an erroneous deduction.

Mr. WILLIAMS. It is based upon the theory that the law compels the parent to take care of the minor child, and I think the law in taxing the parent ought to have some regard to that obligation.

Mr. LODGE. But, in line 7, it reads "living with and dependent upon." If the child is living with and dependent

Mr. WILLIAMS. There was an amendment to be made. I Mr. WILLIAMS. There was an amendment to be made. I think that is a misprint. It ought to read "each minor child of the taxable parent." The language "living with and dependent upon" was, I think, stricken out, but we will examine into it and we can take it up again. If I am right about it, I think that the language "living with and dependent upon" was stricken out, and it was left to read "each minor child of the taxable parent."

Mr. LODGE. The language is "child living with and dependent upon," and even if it were not a minor child of course the child is a charge upon the parent.

Mr. WILLIAMS. I will tell the Senator how it happened. It was at one time proposed to say "each child under 18," and then it was suggested there might be daughters over 18 still dependent upon the family. So that language was put in. They were called minor children, and necessarily under 21 years. The legal obligation stops at 21 and of course the exemption ought to stop at that age.

Mr. GALLINGER. In lines 12 and 13 the words "living with and dependent upon" are dropped out.
Mr. WILLIAMS. I will take the matter up, and if I find

out that I am wrong about it I will bring it up again.

Mr. LODGE. If I may make a suggestion to the Senator, I think the words "living with and dependent upon" are a better definition than the word "minor," because we know in many cases there are children of delicate health or perhaps crippled who are dependent upon the parents and live with them long after they are 21.

Mr. WILLIAMS. Yes; that is true; but the legal obligation

to support them ceases at 21

Mr. LODGE. The legal obligation ceases.

Mr. WILLIAMS. And of course the principle lying under exemption ceases. The language "living with" ought to be stricken out, anyhow. It might happen, for example, that a child, for many reasons conceivable, might be living with a grandparent or living with an uncle or somebody else. My impression is that we struck out the words "living with and dependent upon" and just left it to read "minor child."

Mr. OLIVER. Mr. President, I notice in lines 12 and 13 it reads "that the total exemption on account of children shall

apply to a widow or a widower with a minor or dependent child or children." Therefore, it seems from the language employed that if a married couple have children they must be minors, but in the case of a widow or widower the limitation of

age is entirely stricken off.

Mr. WILLIAMS. The Senator's suggestion would be per fectly just if it were not the fault of the printer. Instead of "or" it ought to read "and." I was expecting when we got to it to make that change, so as to read "with a minor and dependent child or children."

Mr. OLIVER. It is fortunate that there is a printer.

Mr. WILLIAMS. I will make it now. In line 12 the word or" ought to be "and." I move that amendment to the amendment.

The VICE PRESIDENT. The question is on agreeing to the

amendment to the amendment of the committee.

Mr. JONES. I understood the Senator to say that the question was to be considered whether it should be limited to minor children of a certain age, under 18 or 16.

Mr. WILLIAMS. There was a proposition at one time to limit it to 18, upon the ground that a boy of 18 ought to be out making his living. Then it was suggested it might not be a boy; it might be a girl. So, finally, it was put that way.

Mr. JONES. It occurred to me that some limitation of that kind ought to be made. There are many families where there kind ought to be made. There are many arms of age who make may be a couple of boys 18, 19, or 20 years of age who make a living for themselves, and I suppose generally they do. Yet have the parents get an exemption on that account. Then, Yet here the parents get an exemption on that account. on the other hand, there is a family of four or five children under 7 or 8 years of age, who make nothing for their support, and the parents get no greater exemption for those than the family does for the grown-up boys who are barely under 21.

Mr. WILLIAMS. Anybody seeking faults with a tax bill

can always find them.

Mr. JONES. It seemed to me that it would be a much more equitable arrangement to specify minor children under a certain age. In the pension laws we recognize a limitation on minor children.

Mr. GALLINGER. Mr. President, I rose to suggest to the Senator that we probably have passed hundreds, certainly scores, of private pension bills giving a pension to deformed children and children sick from birth, regardless of their age.

Mr. JONES. Yes; that is true, but-

Mr. GALLINGER. We have passed hundreds of them, and it seems to me that if this was made to read "dependent children, without any reference to age, it would be better.

Mr. JONES. I merely make that suggestion. I do not think

I shall offer any amendment, but it seems to me that that change should be made.

Mr. WILLIAMS. I thought if it read "dependent children" a great many children might be crowded in, and we had to fix some way to meet the conditions.

Mr. JONES. Why not provide that there shall be so much exemption for each child under 16 years of age, like we allow a widow in a pension case?

That would not be just to the girls in the Mr. WILLIAMS. family. Frequently there are unmarried girls who can not support themselves. The exemption ought to apply to them until they are 21. In other words, it ought to apply until the legal

obligation of the parent to support ceases. If the Senator wants to find a logical point, the logical point is that the exemption shall cease where the legal obligation to support ceases

Mr. JONES. Of course the exemption covers children who are capable to care for themselves; it becomes more than a matter of relief to the parent; it becomes a matter of favor.

Mr. WILLIAMS. It is a relief for the parents because of the

legal obligation.

The VICE PRESIDENT. The Chair understands that the amendment proposed by the Senator from Mississippi is to change the final word "or," in line 12, to the word "and," so as to read: Shall apply to a widow or a widower with a minor and dependent child or children.

Mr. WILLIAMS. Yes.

The amendment to the amendment was agreed to.

Mr. GALLINGER. Does the Senator propose to strike out the words "living with and," at the beginning of line 7?
Mr. WILLIAMS. No; I ask to take that back and see what we have done. My impression is that it was stricken out.
Mr. GALLINGER. Very well.

Mr. SIMMONS. The committee will examine it.
Mr. WILLIAMS. I do not mean to recommit it, but I wanted

merely to assure the Senate that I would look into that matter.

Mr. JONES. I wish to ask the Senator another question.

The amendment now reads "with a minor and dependent child or children." Does that mean that there may be an exemption on account of one child as a minor and another child over age but dependent?

Mr. WILLIAMS. No; it is minor or dependent child or minor and dependent children.

Mr. JONES. What is the significance of the word "dependent" there? I understood the Senator to say a moment ago that if the child was a minor of course the parent had a legal obligation to support it.

Mr. WILLIAMS. If the Senator will notice above, in line 7, he will see the language "living with and dependent upon." If the Senator had done me the honor to have listened to me, he would have heard me say that I thought in caucus or in committee, one or the other, we had stricken out that language. If it was stricken out in the one place, it was stricken out in both. My recollection is that it was stricken out, but if it is to be left in one place of course it is to be left in the other.

Mr. JONES. I heard the Senator make that remark, but do I

understand now it is to be left in, or is the Senator-

Mr. WILLIAMS. I will examine it and find out whether it is to be left in and what we did with it.

Mr. JONES. Is it not the Senator's idea that the word "dependent" was left out?

Mr. WILLIAMS. That is my recollection.

Mr. JONES. Then the Senator will bring the matter to the attention of the Senate again?

Mr. WILLIAMS. I will, provided it was left out.

Mr. JONES. But if it is to be left in, the Senator will let it go without any suggestion.

Mr. WILLIAMS. Yes.

Mr. JONES. I should like to have the Senator bring it to the attention of the Senate if he concludes that it is properly left in, because I think it ought to be left out or else we ought to understand whether the word "dependent" means something more than mere minority.

Mr. WILLIAMS. The Senator a moment ago was talking about the wrong of the exemption on account of 16 or 17 or 18

year old children who are not dependent.

Mr. JONES. Certainly. Mr. WILLIAMS. And now, if I understand him, he is ob-

jecting to keeping the word "dependent" in the bill.

Mr. JONES. No; I want to know whether it means something or not when it is left in the bill, and I want to know if we leave it in whether it means that if the parents have one minor child and then another child who is not a minor, but is dependent on them, they get an exemption for both.

Mr. WILLIAMS. Undoubtedly it means that in order to have the exemption the child must be a minor and dependent. It

is left in the bill and it says so.

Mr. JONES. I do not think that is what it means. I do not agree with that construction. I think if the Senator leaves the words "minor" and "dependent" in, it would be construed to mean one minor child and one child that was dependent because he was

Mr. WILLIAMS. It could not possibly be so construed, be-

cause that is not the language.

Does the Senator mean that the minor child Mr. JONES. must be disabled in order to enable the parent to secure an ex-

Mr. WILLIAMS. No; I do not.

Mr. JONES. Then, what does the word "dependent" mean? Mr. WILLIAMS. It means dependent for support upon the taxpayer.

Mr. JONES. Does that mean actually dependent?

Mr. WILLIAMS. In other words, where the child or children are not making their own living.

Mr. JONES. But suppose a 20-year-old boy is making his living but is living with his parents?

Mr. WILLIAMS. Then, if this language means anything at

all, there will be no exemptions on his account.

Mr. JONES. That is what I want to get at. In other words, the word "minority" does not procure the exemption, and the parent, in order to get the exemption for a minor child, must show that that child is actually dependent on him and is not making a living for himself? If that is what it means, that is what I wanted to understand.

Mr. WILLIAMS. That is what it says. It says minor and

dependent child.

Mr. JONES. Yes. I had understood, however, that it was the Senator's contention that the fact of minority was the basis for the exemption. If the other contention is the understanding

of the Senator, that is what I wanted to know.

Mr. SHIVELY. The Senator from Washington can easily conceive of a case where there may be a minor child with an absolutely independent fortune, in which event the parent would not have the benefit of the exemption.

Mr. JONES. What I wanted to understand clearly was whether or not that was the intention of the language here.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee, beginning in line 20, on page 171.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 172, line 17, before the word "said," to insert "D. The"; in line 18, after the words "income of," to strike out "such" and insert "each"; in the same line, after the word "person," to strike out "for the year ending December 31, 1913, and for each calendar year thereafter; and on," and in lieu thereof to insert "subject thereto, accruing during each preceding calendar year ending December 31; Provided, however. That for the year ending December 31. Provided, however, That for the year ending December 31, 1913, said tax shall be computed on the net income accruing from March 1 to December 31, 1913, both dates inclusive, after deducting five-sixths only of the specific exempclusive, after deducting live-sixths only of the specific exemptions and deductions herein provided for. On"; on page 173, line 9, after the word "having," to strike out "a net" and insert "an"; and in the same line, after the words "income of," to strike out "\$3,500" and insert "\$3,000"; on page 174, line 2, after the word "individuals," to insert "Provided, That a return made by one of two or more joint guardians, trustees, executors, agents, receivers, and consequents agents. administrators, agents, receivers, and conservators, or other persons acting in a fiduciary capacity, filed in the district where such person resides, or in the district where the will or other instrument under which he acts is recorded, under such regulations as the Secretary of the Treasury may prescribe, shall be a sufficient compliance with the requirements of this paragraph"; in line 15, after the word "annual," to insert "or periodical"; and in line 17, after the word "person," to insert "deduct and withhold from the payment an amount equivalent to the normal income tax upon the same and," so as to read:

to the normal income tax upon the same and," so as to read:

D. The said tax shall be computed upon the remainder of said net income of each person subject thereto, accruing during each preceding calendar year ending December 31: Provided, however, That for the year ending December 31: 1913, said tax shall be computed on the net income accruing from March 1 to December 31, 1913, both dates inclusive, after deducting five-sixths only of the specific exemptions and deductions herein provided for. On or before the 1st day of March, 1914, and the 1st day of March in each year thereafter, a true and accurate return, under oath or affirmation, shall be made by each person of lawful age, except as hereinafter provided, subject to the tax imposed by this section, and having an income of \$3,000 or over for the taxable year, to the collector of internal revenue for the district in which such person resides or has his principal place of business, or, in the case of a person residing in a foreign country, in the place where his principal business is carried on within the United States, in such form as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe, setting forth specifically the gross amount of income from all separate sources and from the total thereof, deducting the aggregate items or expenses and allowance herein authorized; guardians, trustees, executors, administrators, agents, receivers, conservators, and all persons, corporations, or associations acting in any fiduciary capacity, shall make and render a return of the net income of the person for whom they act, subject to this tax, coming into their custody or control and management, and be subject to all the provisions of this section which apply to individuals: Provided, That a return made by one of two or more joint guardians, trustees, executors, administrators, agents, receivers, and conservators, or other persons acting in a fiduciary capacity, filed in the district where such person resides, or in the

sufficient compliance with the requirements of this paragraph; and also all persons, firms, companies, copartnerships, corporations, joint-stock companies or associations, and insurance companies, except as herein-after provided, in whatever capacity acting, having the control, receipt, disposal, or payment of fixed or determinable annual or periodical gains, profits, and income of another person, subject to tax, shall in behalf of such person deduct and withhold from the payment an amount equivalent to the normal income tax upon the same and make and render a return, as aforesaid, but separate and distinct, of the portion of the income of each person from which the normal tax has been thus withheld, and containing also the name and address of such person or stating that the name and address or the address, as the case may be, are unknown.

The amendment was agreed to.

Mr. WILLIAMS. Mr. President, I want to offer an amendment at this point to cure an oversight in the bill. After the colon following the word "unknown," on page 174, line 24, I move to insert the following language:

Provided. That the provision requiring the normal tax of individuals to be withheld at the source of the income shall not be construed to require any of such tax to be withheld prior to the date of the passage of this act.

Then, Mr. President, following that amendment, the proviso in line 24 should read "Provided further."

Mr. BORAH. Mr. President, as I understand, the Senator

from Mississippi a day or two ago asked that a provision of the bill back on page 166 should be recommitted to the committee for further consideration.

Mr. WILLIAMS. Yes. Mr. BORAH. I should like to have that portion of the bill which deals with the subject of relieving corporations from withholding the money due upon bonds to go with that provision, because they will both have to be considered together in a large measure, as I understand.

Mr. WILLIAMS. I do not see why they should both go together. Does the Senator mean the amendment which I have

just offered?

Mr. BORAH. No; not this particular matter; but you have a provision in the bill relieving the payment at the source with

reference to bonds, have you not?

Mr. WILLIAMS. Is the Senator referring to the provision

in lines 6 and 7 on page 170?

Mr. BORAH. No; I am not referring to that. I will call the Senator's attention to the express provision when we reach it.

Mr. WILLIAM3. Very well; that will probably be better, if

we have not reached it.

Mr. BORAH. I expected to leave the Chamber, but I will remain here until it is reached.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Mississippi [Mr. Whiliams].

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance, was, in section 2, paragraph D, page 174, line 25, after the word "exceeding," to strike out "\$3,500" and insert "\$3,000"; on page 175, line 1, after the word "required," to insert "Provided further, That any persons carrying on business in partnership shall be liable for income tax only in their individual capacity, and the share of the profits of a partnership to which any taxable partner would be entitled if the same were divided, whether divided or otherwise, shall be returned for taxation and the tax paid, under the provisions of this section, and any such firm, when requested by the Commissioner of Internal Revenue, or when requested by the Commissioner of Internal Revenue, or any district collector, shall forward to him a correct statement of such profits and the names of the individuals who would be entitled to the same, if distributed"; in line 12, after the word "persons," to strike out "liable only" and insert "liable"; in line 13, after the word "tax," to insert "only"; in line 18, after the word "provided," to strike out the semicolon and the words "and the" and insert a period; in the same line, after the word "provided," to insert "Any person for whom return has been made and the tax paid, or to be paid as aforesaid, shall not be required to make a return unless such person has shall not be required to make a return unless such person has other net income, but only one deduction of \$3,000 shall be made in the case of any such person. The"; after the word "it." at the end of line 24, to strike out "and may increase the amount of any list or return if he has reason to believe that the same is understated: Provided, That no such increase shall be made except after due notice to such party and upon proof of the amount understated; or if the list or return of any person shall have been increased by the collector, such person may be permitted to prove the amount liable to be assessed; but such proof shall not be considered as conclusive of the facts, and no deductions claimed in such cases shall be made or allowed until approved by the collector" and insert "If the collector or deputy collector have reason to believe that the amount of any income returned is understated, he shall give due notice to the person making the return to show cause why the amount of the

return should not be increased, and upon proof of the amount understated may increase the same accordingly," so as to read:

return should not be increased, and upon proof of the amount understated may increase the same accordingly," so as to read:

Provided, That in either case above mentioned no return of income not exceeding \$3,000 shall be required: Provided further, That any persons carrying on business in partnership shall be liable for income tax only in their individual capacity, and the share of the profits of a partnership to which any taxable partner would be entitled if the same were divided, whether divided or otherwise, shall be returned for taxation and the tax paid, under the provisions of this section, and any such firm, when requested by the Commissioner of Internal Revenue, or any district collector, shall forward to him a correct statement of such profits and the names of the individuals who would be entitled to the same, if distributed: Provided further, That persons liable for the normal income tax only, on their own account or in behalf of another, shall not be required to make return of the income derived from dividends on the capital stock or from the net earnings of corporations, joint-stock companies or associations, and insurance companies taxable upon their net income as hereinafter provided. Any person for whom return has been made and the tax paid, or to be paid as aforesaid, shall not be required to make a return unless such person has other net income, but only one deduction of \$3,000 shall be made in the case of any such person. The collector or deputy collector shall require every list to be verified by the oath or affirmation of the party rendering it. If the collector or deputy collector have reason to believe that the amount of any income returned is understated, he shall give due notice to the person making the return to show cause why the amount of the return should not be increased, and upon proof of the amount understated may increase the same accordingly. If dissatisfied with the decision of the collector, such person may submit the case, with all the papers, nich expert every list to be a c

The amendment was agreed to.

The next amendment was, in section 2, paragraph E, page 176, line 20, after the word "made," to insert "by the Commissioner of Internal Revenue"; on page 177, line 5, before the word "provided," to strike out "above"; in the same line, after the word "for," to insert "in this section or by existing law," so as to read:

law," so as to read:

E. That all assessments shall be made by the Commissioner of Internal Revenue and all persons shall be notified of the amount for which they are respectively liable on or before the 1st day of June of each successive year, and said assessments shall be paid on or before the 30th day of June, except in cases of refusal or neglect to make such return and in cases of false or fraudulent returns, in which cases the Commissioner of Internal Revenue shall, upon the discovery thereof, at any time within three years after said return is due, make a return upon information obtained as provided for in this section or by existing law, and the assessment made by the Commissioner of Internal Revenue thereon shall be paid by such person or persons immediately upon notification of the amount of such assessment; and to any sum or sums due and unpaid after the 30th day of June in any year, and for 10 days after notice and demand thereof by the collector, there shall be added the sum of 5 per cent on the amount of tax unpaid, and interest at the rate of 1 per cent per month upon said tax from the time the same became due, except from the estates of insane, deceased, or insolvent persons. or insolvent persons.

The amendment was agreed to.

The next amendment was agreed to.

The next amendment was, in section 2, paragraph E, page 177, line 19, after the word "including," to strike out "lessees or"; and on page 178, line 2, after the word "exceeding," to strike out "\$4.000" and insert "\$3,000," so as to read:

out "\$4.000" and insert "\$3,000," so as to read:

All persons, firms, copartnerships, companies, corporations, jointstock companies or associations, and insurance companies, in whatever capacity acting, including mortgagors of real or personal property,
trustees acting in any trust capacity, executors, administrators, agents,
receivers, conservators, employers, and all officers and employees of the
United States having the control, receipt, custody, disposal, or payment
of interest, rent, salaries, wages, premiums, annuities, compensation,
remuneration, emoluments, or other fixed or determinable annual gains,
profits, and income of another person, exceeding \$3,000 for any taxable
year, other than dividends on capital stock, or from the net earnings
of corporations and joint-stock companies or associations subject to like
tax, who are required to make and render a return in behalf of another,
as provided herein, to the collector of his, her, or its district, are hereby
authorized and required to deduct and withhold from such annual
gains, profits, and income such sum as will be sufficient to pay the
normal tax imposed thereon by this section, and shall pay to the officer
of the United States Government authorized to receive the same; and
they are each hereby made personally liable for such tax.

The amendment was agreed to.

The amendment was agreed to.

The next amendment was, in section 2, paragraph E, page 178, line 13, after the word "tax," to strike out:

178, line 13, after the word "tax," to strike out:

In all cases where the income tax of a person is withheld and deducted and paid or to be paid at the source, as aforesaid, such person shall not receive the benefit of the exemption of \$4,000 allowed herein except by an application for refund of the tax unless he shall, not less than 30 days prior to the day on which the return of his income is due, file with the person who is required to withhold and pay tax for him, an affidavit claiming the benefit of such exemption; nor shall any person under the foregoing conditions be allowed the benefit of any deduction provided for in subsection B of this section unless he shall, not less than 30 days prior to the day on which the return of his income is due, file either with the person who is required to withhold and pay tax for him a true and correct return of his annual gains, profits, and income from all other sources, and also the deductions asked for, and the showing thus made shall then become a part of the return to be made in his behalf by the person required to withhold and pay the tax, or such person may likewise make application for deductions to the collector of the district in which return is made or to be made for him.

And insert:

And insert:

Provided, That landlords are to make their own returns and tenants are exempt from the provisions of the foregoing requirement except when, in the case of individuals, trustees, and other noncorporate owners, the terms of the lease require the tenant to pay State and municipal taxes and assessments against the property, the cost of

maintenance, repairs, and insurance, in which case tenants are authorized and required to deduct the tax out of the gross rental in the manner above prescribed. Where the owner is a corporation the tenant shall not be required in any case to deduct the tax upon the gross rental, the corporation itself being required to make the return and the statement of the deduction.

If the person receiving such payment of more than \$3,000 per annum is also entitled to deductions under the second paragraph of subsection B which reduce his aggregate income so as to entitle him to exemption from the normal income tax, or reduction of the amount subject to the tax, he may receive the benefit of such exemption, or reduction, either by filing with the person required to withhold the tax and pay it to the Government, not less than 30 days prior to the day on which the return of his income is due, an affidavit claiming the benefit of such exemption, and a true and correct statement of his annual income from all other sources, and of the deductions claimed, which affidavit and statement shall become a part of the return to be made in his behalf by the person required to withhold and pay the tax, or by making the application for the exemption to the collector of the district in which return is made or to be made for him, and proving to the satisfaction of the collector that he is entitled to the same.

The amendment was agreed to.

Mr. BORAH. Mr. President, the next paragraph is the one to which I referred, which I should like to have passed over until the committee reports upon the paragraph on page 166.

Mr. WILLIAMS. Let the Secretary read it.

The Secretary read as follows:

Where under the terms of a contract entered into before this act takes effect the payment to which the taxable person is entitled is required to be made without any deduction by reason of any tax imposed, the obligor shall not be compelled to make such deduction or withhold the income tax, but shall give notice to the collector of the payment made, or to be made, as part of the return which he is required to make, and the said sum shall in that case, for the purposes of this act, be computed as a part of the income of the taxable person. If the obligor fails to give such notice he shall be personally liable for the income tax if the same is not paid by the taxable person. No such contract entered into after this act takes effect shall be valid in regard to any Federal income tax imposed upon a person liable to such payment: Provided further, That if such person is a minor or an insane person, or is absent from the United States, or is unable owing to serious illness to make the return and application above provided for, the return and application may be made for him or her by the person required to withhold and pay the tax, he making oath under the penalties of this act that he has sufficient knowledge of the affairs and property of his beneficiary to enable him to make a full and complete return for him or her, and that the return and application made by him are full and complete.

Mr. WILLIAMS. I should like to hear what it is that the

Mr. WILLIAMS. I should like to hear what it is that the Senator has in mind.

Mr. BORAH. What I said was that I should like to have that part passed over until the committee reports upon the provision upon page 166.

Mr. WILLIAMS. Why should this go with that?

Mr. BORAH. Of course, the latter part of this has nothing to do with that; but there is one view of the matter on page 166 which I think might have a good deal to do with it. I do not know what the report of the committee will be upon it.

Mr. WILLIAMS. I do not see that one of these things is connected with the other. The clause to which the Senator refers is one intended to meet the case of contracts where the corporation undertakes to pay the tax, like the Steel Trust, for example, the Carnegie stock, and all that. This substantially leaves the question to be determinable at law. It exempts the corporation from being compelled to make the deduction, but makes it give notice to the collector of the tax. In that case the collector will compute the interest as a part of the income of the taxable person. But it is followed by this:

If the obligor fails to give such notice, he shall be personally liable for the income tax if the same is not paid by the taxable person.

If a corporation having that sort of a contract wants to keep its contract, all it has to do is to fail to give the notice and go ahead and pay the tax; and if there is going to be a lawsuit about it, the United States Government wants the taxable person-in the illustration I have given, Mr. Carnegie-to pay his tax.

The VICE PRESIDENT. The question is on agreeing to the

amendment of the committee.

Mr. WILLIAMS. I will say that I do not think the two things are indissolubly tied to one another. If the Senator desires it to go over for some reason, of course I am perfectly willing that it shall go over; but I am not willing that it shall be recommitted.

Mr. BORAH. I am not asking that it shall be recommitted. Mr. WILLIAMS. Very well; then the Senator simply wants it to go over. In that event it will be passed over; certainly. I owe an apology to the Senator. I misunderstood what he wanted.

The VICE PRESIDENT. Let the Chair understand the matter. Does the amendment go over before it is agreed to, or after?

Mr. BORAH. Before it is agreed to. Mr. WILLIAMS. Yes; before it is agreed to.

Mr. SIMMONS. Why may not the amendment be agreed to now, with the understanding that it may be called up again if the Senator desires?

Mr. BORAH. I have no objection to that. I simply made the suggestion which is usually made here. I have no objection if it is to be reconsidered if we desire to reconsider it. Then let it be adopted.

The amendment was agreed to.
The VICE PRESIDENT. The Secretary will make a note that the amendment may be reconsidered if desirable.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 181, line 16, after the word "bonds," to strike out the comma and insert the word "and"; in the same line, after the word "mortgages," to insert "or deeds of trust"; in line 17, after the word "other," to strike out "indebtedness" and insert "obligations," so as to read:

Provided further, That the amount of the normal tax hereinbefore imposed shall be deducted and withheld from fixed and determinable annual gains, profits, and income derived from interest upon bonds and mortgages, or deeds of trust, or other obligations of corporations.

Mr. GALLINGER. I will call the Senator's attention to the fact that after the word "associations," in line 18, page 181, the word "and" should be inserted. It becomes necessary from the fact that the language on the next line has been stricken out.

Mr. WILLIAMS. The Senator is right about that. That was brought about by striking out the subsequent language.

The VICE PRESIDENT. The amendment will be stated. The Secretary. On line 18, page 181, before the words "insurance companies," it is proposed to insert the word "and."

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 181, line 19, after the words "insurance companies," to strike out "and also of the United States Government not now exempt from taxation"; in line 22, before the word "subject," to strike out "\$4.000" and insert "\$3.000"; in line 24, after the word "income," to insert "and paid to the Government"; and on page 182, line 13, after the word "exceed," to strike out "\$4,000" and insert "\$3,000," so as to read:

Joint-stock companies or associations and insurance companies, whether payable annually or at shorter or longer periods, although such interest does not amount to \$3,000, subject to the provisions of this section requiring the tax to be withheld at the source and deducted from annual income and paid to the Government; and likewise the amount of such tax shall be deducted and withheld from coupons, checks, or bills of exchange for or in payment of interest upon bonds of foreign countries and upon foreign mortgages or like obligations (not payable in the United States), and also from coupons, checks, or bills of exchange for or in payment of any dividends upon the stock or interest upon the obligations of foreign corporations, associations, and insurance compenies engaged in business in foreign countries; and the tax in each case shall be withheld and deducted for and in behalf of any person subject to the tax hereinbefore imposed, although such interest, dividends, or other compensation does not exceed \$3,000.

The amendment was agreed to.

The next amendment was, at the top of page 183, to insert:

All persons, firms, or corporations undertaking as a matter of business or for profit the collection of foreign payments by means of compons, checks, or bills of exchange shall obtain a license from the Commissioner of Internal Revenue, and shall be subject to such regulations enabling the Government to ascertain and verify the due withholding and payment of the income tax required to be withheld and paid as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe; and any person who shall undertake to collect such payments as aforesaid without having obtained a license therefor, or without complying with such regulations, shall be deemed guilty of a misdemeanor and for each offense be fined in a sum not exceeding \$5.000, or imprisoned for a term not exceeding one year, or both, in the discretion of the court.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 183, line 21, after the word "return," to strike out "any person for whom return has been made and the tax paid, or to be paid as aforesaid, shall not be required to make a return unless such person has other net income, but only one deduction of \$4,000 shall be made in the case of any such person" and insert "under rules and regulations prescribed by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury.

Mr. WILLIAMS. Mr. President, that ought to be "to be prescribed." I move to amend the amendment by inserting the

words "to be."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. On page 183, line 25, before the word "prescribed," it is proposed to insert "to be.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 184, after line 3, to insert: The provisions of this section relating to the deduction and payment of the tax at the source of income shall only apply to the normal tax hereinbefore imposed upon individuals.

The amendment was agreed to.

The amendment was agreed to.

The next amendment was, in paragraph F, page 184, line 12, after the word "penalty," to strike out "not exceeding \$500" and insert "of not less than \$20 nor more than \$1,000"; in line 13, after the word "person," to insert "or any officer of any corporation"; and in line 18, after the word "exceeding," to strike out "\$1,000" and insert "\$2,000," so as to make the paragraph read:

F. That if any person, corporation, joint-stock company, association, or insurance company liable to make the return or pay the tax afore-said shall refuse or neglect to make a return at the time or times here-inhefore specified in each year, such person shall be liable to a penalty of not less than \$20 nor more than \$1,000. Any person or any officer of any corporation required by law to make, render, sign, or verify any return who makes any false or fraudulent return or statement with intent to defeat or evade the assessment required by this section to be made shall be guilty of a misdemeanor, and shall be fined not exceeding \$2,000 or be imprisoned not exceeding one year, or both, at the discretion of the court, with the costs of prosecution.

The amendment was agreed to.

The next amendment was agreed to.

The next amendment was in paragraph G, page 185, line 2, after the word "organized," to strike out "but"; in line 4, before the word "upon," to insert "then"; in line 4, after the word "income," to strike out "arising or"; and in line 5, after the word "accruing," to strike out "by it," so as to read:

the word "accruling," to strike out "by it," so as to read:

G. (a) That the normal tax hereinbefore imposed upon individuals likewise shall be levied, assessed, and paid annually upon the entire net income arising or accruing from all sources during the preceding calendar year to every corporation, joint-stock company or association, and every insurance company, organized in the United States, no matter how created or organized, not including partnerships; but if organized, authorized, or existing under the laws of any foreign country, then upon the amount of net income accruing from business transacted and capital invested within the United States during such year.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read to line 11, page 185, as follows:

Provided, however, That nothing in this section shall apply to labor, agricultural, or horticultural organizations, or to mutual savings banks not having a capital stock represented by shares, or to fraternal beneficiary societies, orders, or associations operating under the lodge system.

Mr. WILLIAMS. Mr. President, on line 11, page 185, after the word "system," there ought to be an amendment made to carry out the purpose of the bill. It says:

Fraternal beneficiary societies, orders, or associations operating under

It appears from some information I have recently received that the insurance branch of the Masonic fraternity does not operate under the lodge system, although, of course, the fraternity itself does. I ask that this part of the proviso may be held open for the purpose of an amendment. I have not yet had a chance to consult the committee about it.

The VICE PRESIDENT. The proviso, beginning on line 7,

page 185, and going down to line 11, will be passed over.

The reading of the bill was resumed. The next amendment was, on page 185, line 19, after the word "charitable," to insert "scientific"; and in line 21, after the word "individual," to insert "nor to business leagues, nor to chambers of commerce or boards of trade, not organized for profit or no part of the net income of which inures to the benefit of the private stockholder or individual; nor to any civic league or organization not organized for profit, but operated exclusively for the promotion of social welfare," so as to read:

And providing for the payment of life, sick, accident, and other benefits to the members of such societies, orders, or associations and dependents of such members, nor to domestic building and loan associations, nor to cemetery companies, organized and operated exclusively for the mutual benefit of their members, nor to any corporation or association organized and operated exclusively for religious, charitable, scientific, or educational purposes, no part of the net income of which inures to the benefit of any private stockholder or individual, nor to business leagues, nor to chambers of commerce or boards of trade, not organized for profit or no part of the net income of which inures to the benefit of the private stockholder or individual; nor to any civic league or organization not organized for profit, but operated exclusively for the promotion of social welfare.

The amendment was agreed to.

The amendment was agreed to.

Mr. HITCHCOCK. Mr. President, I have an amendment which I should like to offer and have read at this point.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. After the first paragraph in section G, page 186, it is proposed to insert the following proviso, to come in after the word "welfare" in line 2:

Provided, That whenever a corporation, joint-stock company, or association shall produce or sell annually one-quarter or more of the entire amount of any line of production in the United States open to general manufacture or production the rate of tax to be levied, assessed,

and paid per annum upon the entire net income of such corporation, joint-stock company, or association arising or accruing from all sources shall be as follows:

A. If its production or sale be one-quarter and less than one-third of the total amount of any line of production, its annual tax shall be five times the normal tax hereinbefore imposed, to wit, 5 per cent.

B. If its production or sale be one-third and less than one-half of the total amount of any line of production, its annual tax shall be ten times the normal tax hereinbefore imposed, to wit, 10 per cent.

C. If its production or sale be one-half or more of the total amount of any line of production for the whole country, its annual tax shall be twenty times the normal tax hereinbefore imposed, to wit, 20 per cent on its entire net income accruing from all sources. The words "line of production" above used shall be construed to mean any particular article or any particular commodity, or to mean any class of articles or commodities ordinarily manufactured in conjunction with each other from the same or similar materials; but no line of production shall subject a corporation to any additional tax imposed by this paragraph unless said line of production amounts to at least \$10,000,000 a year, nor shall this additional tax provided for in this paragraph apply to corporations, joint-stock companies, or associations employing less than \$50,000,000 capital represented by stock or bonds, or both. In the levying and collection of the tax authorized in this paragraph the findings of the Secretary of Commerce as to the annual production and sale by corporations, joint-stock companies, or associations shall be taken as prima facle evidence; and whenever those findings show that a corporation, joint-stock companies, or associations controls one or more other carporations, joint-stock companies, or associations one or more other carporations, joint-stock companies, or associations have stockholders in common to the extent of 50 per cent in either, each shall pay

Mr. WILLIAMS. If the Senator from Nebraska wants to be heard upon this amendment, as I apprehend is the case-

Mr. HITCHCOCK. Yes, sir; it is. Mr. WILLIAMS. It is 6 o'clock now, and I will yield for a motion to go into executive session.

## EXECUTIVE SESSION.

Mr. HITCHCOCK. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 8 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 10 minutes p. m.) the Senate adjourned until to-morrow, Friday, August 29, 1913, at 11 o'clock a. m.

# NOMINATIONS.

Executive nominations received by the Senate August 28, 1913.

AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY.

Henry Morgenthau, of New York, to be ambassador extraordinary and plenipotentiary of the United States of America to Turkey, vice William Woodville Rockhill, resigned.

## COLLECTORS OF CUSTOMS.

Zach L. Cobb, of Texas, to be collector of customs for the district of El Paso, in the State of Texas, in place of Alfred L. Sharpe, resigned.

Frank Rabb, of Texas, to be collector of customs for the district of Laredo, in the State of Texas, in place of James J.

Haynes, resigned.

## AGENT AND CONSUL GENERAL.

Olney Arnold, of Rhode Island, to be agent and consul general of the United States of America at Cairo, Egypt, vice Peter

## MINISTER RESIDENT AND CONSUL GENERAL.

George W. Buckner, of Indiana, to be minister resident and consul general of the United States of America to Liberia, vice Fred R. Moore, resigned.

# CONFIRMATIONS.

Executive nominations confirmed by the Senate August 28, 1913.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Lieut. George B. Landenberger to be a lieutenant commander. Lieut. (Junior Grade) Herndon B. Kelly to be a lieutenant. Theodore W. Johnson to be a professor of mathematics.

Walter C. Espach to be an assistant surgeon in the Medical Reserve Corp.

John F. X. Jones to be an assistant surgeon in the Medical Reserve Corps.

POSTMASTERS.

IOWA.

E. R. Ashley, Laporte City. Henry F. Eppers, Montrose. Anton Huebsch, McGregor. Ben Jensen, Onawa.

NORTH DAKOTA.

Frank Lish, Dickinson. V. F. Nelson, Cooperstown.

OHIO.

E. E. France, Kent. James P. Stewart, Niles.

TEXAS.

Lon Davis, Sealy. W. T. Hall, La Porte.

WEST VIRGINIA.

J. L. Butcher, Holden.

# SENATE.

# FRIDAY, August 29, 1913.

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. SIMMONS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

GOODS IN BOND.

The VICE PRESIDENT. The Chair lays before the Senate a communication, which will be read.

The Secretary read as follows:

TREASURY DEPARTMENT, Washington, August 27, 1913.

The PRESIDENT OF THE UNITED STATES SENATE.

The President of the United States Senate.

Sir: I have the honor to acknowledge receipt of a copy of a Senate resolution under date of the 21st instant, requesting, for the use of the Senate, certain information relative to goods held without the payment of duty in warehouse now and at the same time in the year 1912. In reply I have to advise you that similar information with respect to goods in warehouse August 1, 1912, and August 1, 1913. was forwarded to you under date of August 21, 1913, in compliance with a resolution of the Senate of August 1, 1913.

The figures, if compiled on goods in warehouse August 21, would probably differ but little from those furnished you computed on goods in warehouse under date of August 1, and it would take some time to compile them. In view of the matter, I have to request to be informed whether data similar to that given in my letter of August 21, as of August 1, is desired brought down to August 21.

Respectfully,

W. J. McAddoo, Secretary.

W. J. McAdoo, Secretary.

The VICE PRESIDENT. The communication will lie on the

# ENROLLED BILL SIGNED.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the Speaker of the House had signed the enrolled bill (S. 1620) to provide for representation of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes, and it was thereupon signed by the Vice President.

# CALLING OF THE ROLL.

Mr. KERN. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Bankhead Borah Bradley Norris Oliver Page Penrose Perkins Fletcher Smith, Md. Smith, S. C. Smoot Gallinger Hitchcock Hollis Hughes James Johnson Smoot Sterling Stone Sutherland Swanson Thomas Thompson Townsend Vardaman Walsh Warren Weeks Brady Brandegee Bristow Pittman Pomerene Robinson Johnson
Jones
Kenyon
Kern
La Follette
Lane
Lea
Lodge
McCumber Root Saulsbury Shafroth Sheppard Sherman Bryan Chamberlain Chilton Clapp Clark, Wyo. Colt Shields Crawford Cummins Dillingham McCumber McLean Martin, Va. Martine, N. J. Shively Simmons Smith, Ariz. Smith, Ga. Williams Works

Mr. McCUMBER. I again announce the necessary absence of my colleague [Mr. Gronna].

Mr. TOWNSEND. The senior Senator from Michigan [Mr.

SMITH] is absent from the city on important business. He is

paired with the junior Senator from Missouri [Mr. Reed]. desire this announcement to stand for all roll calls to-day.

Mr. SMOOT. I desire to announce that the junior Senator from Wisconsin [Mr. Stephenson] and the senior Senator from Delaware [Mr. DU PONT] are detained from the Senate on account of illness. I will allow this notice to stand for the day.

The VICE PRESIDENT. Seventy Senators have answered

to the roll call. There is a quorum present.

### ESTATE OF THOMAS BRITTON, DECEASED.

Mr. BRANDEGEE. On June 26 I introduced a bill (S. 2642) for the relief of the estate of Thomas Britton, deceased, and it was referred to the Committee on Military Affairs. I move that that committee be discharged from the further consideration of the bill and that it be referred to the Committee on Claims.

The motion was agreed to.

#### ASSISTANT IN SENATE DOCUMENT ROOM.

Mr. SHAFROTH. From the Committee to Audit and Control the Contingent Expenses of the Senate I report back favorably with amendments Senate resolution 174, submitted by the Senator from Minnesota [Mr. Clarp] on the 27th instant. I ask for the immediate consideration of the resolution.

The Senate, by unanimous consent, proceeded to consider the resolution.

The amendments were, in line 3, to strike out the words "\$1,440 per annum" and insert "\$120 per month until October 31, 1913," and, in lines 4 and 5, to strike out the words "until otherwise provided by law," so as to make the resolution read:

Resolved, That the Secretary be authorized to employ one additional assistant in the Senate document room at a compensation of \$120 per month until October 31, 1913, to be paid out of the contingent fund of

The amendments were agreed to.

The resolution as amended was agreed to.

### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CHAMBERLAIN:

A bill (S. 3058) authorizing the President of the United States to appoint Col. James Jackson to the rank of brigadier general on the retired list; to the Committee on Military Affairs.

By Mr. THOMAS:

A bill (S. 3059) to amend an act entitled "An act making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1903, and for other purposes"; to the Committee on Indian Affairs.

A bill (S. 3060) granting an increase of pension to Mary C.

Jackson; to the Committee on Pensions.

By Mr. PENROSE:

A bill (S. 3061) granting an increase of pension to Winfield S. Brooks; to the Committee on Pensions.

By Mr. CATRON:

A bill (S. 3062) to provide for a mausoleum in Arlington National Cemetery for the interment of Army and Navy officers; to the Committee on Military Affairs.

# MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed with amendments the joint resolution (S. J. Res. 52) to authorize the appointment of Thomas Green Peyton as a cadet in the United States Military Academy, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a joint resolution (H. J. Res. 111) to authorize the reinstatement of Adolph Unger as a cadet in the United States Military Academy, in which it requested the concurrence of the Senate.

## THOMAS GREEN PEYTON.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the joint resolution (S. J. Res. 52) to authorize the appointment of Thomas Green Peyton as a cadet in the United States Military Academy, which were, in line 3, to strike out "Secretary of War" and insert "President," and in line 5, after "Academy," to insert "Provided, That this shall not operate to increase the Corps of Cadets at said academy as now authorized by law." at said academy as now authorized by law.

Mr. CHAMBERLAIN. I move that the Senate concur in the

amendments of the House.

The motion was agreed to.

#### PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had approved and signed the following acts:

On August 28, 1913:

S. 1353. An act to authorize the board of county commissioners of Okanogan County, Wash., to construct, maintain, and operate a bridge across the Okanogan River at or near the town of Malott.

On August 29, 1913:

S. 1620. An act to provide for representation of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes.

### HOUSE JOINT RESOLUTION REFERBED.

H. J. Res. 111. Joint resolution to authorize the reinstatement of Adolph Unger as a cadet in the United States Military Academy was read twice by its title and referred to the Committee on Military Affairs.

#### INCOME TAX.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from the previous day, which will be

The Secretary read Senate resolution 177, submitted yesterday by Mr. Crawford, as follows:

Resolved, That the Committee on Finance be directed to investigate and ascertain the difference in character between income immediately and directly derived by an individual from the carrying on or exercise by him of his profession, trade, and vocation, and income derived from property or investment of capital, and to report an amendment which will make a just discrimination in the rate of levy in favor of incomes immediately and directly derived from the exercise of a profession, trade, or calling, as compared with income derived from property and capital investment.

Mr. CRAWFORD. Mr. President, I do not wish to have this resolution in any way delay the Senate or embarrass the com-I wanted the subject brought before the Senate, and I am willing that the resolution and the amendment which I offered be referred to the Committee on Finance. It is late in the session, and it is a new feature of the income tax. I realize that it may not be quite fair to ask to have it receive full consideration. At any rate, I am willing that it shall go to the committee.

The VICE PRESIDENT. Without objection, the resolution will be referred, with the amendment submitted by the Senator from South Dakota, to the Committee on Finance.

## THE TARIFF.

The VICE PRESIDENT. The morning business is closed.

Mr. SIMMONS. I ask unanimous consent that the Senate proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government,

and for other purposes.

The VICE PRESIDENT. The pending amendment is on page 186, where, after line 2, the Senator from Nebraska [Mr. HITCHCOCK] proposes to insert a proviso, which has been read.

Mr. HITCHCOCK. Mr. President, this is the first amendment to the tariff bill which has been proposed from the Democratic side, and in view of that fact it seems to me proper that I should make an explanation of the causes which have led me to differ from the conclusions of the Democratic caucus and which still inspire me to urge this amendment upon the attention of the Senate.

Mr. President, I am not quite as extreme as some who decry the caucus. In spite of all the evils which have grown out of caucus legislation and caucus domination, I believe there are occasions when the caucus may be necessary to harmonize party action upon a party bill. If any bill is entitled to be termed a party bill it is a tariff bill, because tariff has become the great issue between the two leading parties of the country representing two distinct schools of political thought.

Thus, when the pending bill came to the Senate with its three

or four thousand separate items, I felt that I could properly go into that caucus and surrender a measure of my own independence for the sake of securing a harmonious party result.

But the pending bill, Mr. President, is something more than a

tariff bill. It presents other means of raising revenue. It levies other taxes than tariff taxes and contains a number of provisions for the regulation of business.

To my mind it was, to say the least, a mistake to endeavor in a Democratic caucus to bind the individual to the details, for instance, of the pending section providing an income tax. The income tax is a comparatively new idea in revenue legislation in this country. It involves great questions. It has its

advocates on the other side of the Chamber as well as on this side of the Chamber. The collection of an income tax has become a matter of distinct constitutional right by Congress, and Republicans as well as Democrats voted for and assisted in securing the amendment to the Constitution to that effect.

When the income-tax question comes into this Chamber, involving as it does not only the degree to which taxation shall be levied upon the incomes of the country, but involving also great social changes which may follow, it seems to me that the individual Democrat, like the individual Republican, ought to be permitted by his party to stand here and vote for his con-

After all, Senators here were elected to the Senate not to a caucus, and it is in the interest of the public welfare that great questions of this sort be debated in public and decided in public, particularly when we are engaged in formative, fundamental

legislation of this sort.

So, Mr. President, it seemed to me a mistake when my party undertook to decide the details of the income-tax bill in the caucus. Still, I did not leave the caucus on that account. left the caucus when I asked the privilege of being permitted in the open Senate to introduce a legitimate amendment for the taxation of trusts, and that privilege was denied me. I asked it not only for myself but I asked it for other Democrats on this side of the Chamber who believe in the principle and want to see it engrafted upon the pending bill. Those men, if compelled to vote against my amendment, which I am here to-day to urge, will have difficulty in explaining to their constituents why they have done so. It is not right for the party to put them in that position when no great party issue is involved.

It has been an unpleasant sight to me, as it has been to many Democrats during the last few days in this Chamber, when Senators on the Republican side of the Chamber have proposed amendments to the income-tax provision that appeal to the sense of justice and appeal to the judgment of Senators on this side, but who, because of caucus rule, were compelled to vote against such amendments. I do not think that is a worthy sight in the Senate of the United States. I do not believe it is right to bind individual Senators and compel them to vote against their conscience and their judgment upon such amend-

ments when no party policy is involved.

Mr. President, in order to justify myself for the position I am taking, I shall go a little further, and perhaps verge upon the improper in reference to the Democratic caucus of which I was a part. Like all caucuses, I believe the fact to be that our Democratic caucus degenerated into a political machine, and I do not believe that upon the vote upon my tobacco amendment the real sense of the caucus was evoked. I did not offer my tobacco amendment; I merely asked the caucus to leave me free to offer it in the Senate of the United States as an amendment

and an addition to the revenue bill.

Mr. President, it might be said that I have the privilege of offering a separate bill for this purpose. That is not so. Constitution of the United States, as is well known, requires that all revenue bills shall originate in the House of Representatives, and there is no chance for a Senator of the United States to offer a provision for the taxation of trusts except as an amendment to a bill which comes here from the other House. This was the only opportunity I would have, or that any other Senator would have, to offer such an amendment at this session or probably at the next session. I did not, however, ask the caucus to approve my amendment; I asked to be left free to offer it here in the Senate, and I asked that other Democratic Senators be left free to vote for it according to their consciences and their judgment. I was refused. The Senator from Arizona [Mr. Ashurst], however, offered my amendment, and after a heated controversy it came to a vote in that caucus. The votes have been published, so I am revealing none of the secrets of that caucus when I say that 18 members of the Senate voted for my amendment and 23 appeared to vote against it. I say "appeared" because it is a fact, which I shall take the liberty appeared" of stating, that the nine Democratic members of the Committee on Finance voted as a unit, regardless of their convictions. So we have a wheel within a wheel, a machine within a machine, The inner machine controlled the caucus. The vote cast was not the correct expression even of the caucus.

Mr. President, under these circumstances I felt that I was justified and that I could still maintain my Democracy in leaving the caucus and coming here and offering my amendment, as

I do to-day, to this bill.

What is this amendment? The pending section of the bill provides a tax of 1 per cent upon the net earnings of the corporations of the United States. My amendment develops the idea a little further and provides that when a corporation has obtained control of one-quarter of the business in any single line

in this country, instead of paying 1 per cent tax it shall pay 5 per cent; when it has progressed further and secured a third of the business of the country in any one line, it shall pay 10 per cent; and when it has still further approached a monopoly and obtained 50 per cent of the business of the country in any one line, it shall pay 20 per cent of its net earnings to the Government of the United States. That is equitable; it is in line with the other provisions in the bill, which make the rate of taxation upon the income of the rich man higher than the rate of taxation upon the income of the poor man. It is equitable because, as everyone knows, a corporation which approaches monopoly proportions has reduced its cost of production to a minimum and magnified its profits to a maximum. Such a corporation can much easier afford to pay 5 per cent of its net income than the John Smith Grocery Co. can afford to pay 1 per cent upon its net income, because the John Smith Grocery Co. is engaged in a competitive struggle with the other business men in that line, while the great trusts, to which this applies, are freed from competition and are practically exercising monopoly powers in this country to-day. So I say the amendment is equitable, and it is in line with the other provisions of this bill. There is no doubt as to its validity. I challenge any Senator here, lawyer or not, to question the validity of a tax of this sort that Congress levies. The Supreme Court has time and time again said that there is no limit upon the power of Congress, except that the tax levied shall be uniform and for the public welfare. I remember a case in which the court acted and upheld a tax upon the gross receipts of sugar and tobacco companies in excess of \$250,000, evidently an effort to levy taxes upon trusts then forming.

So, I say, Mr. President, there is no doubt as to the validity of this amendment. Of what other proposed antitrust amendment or law can it be said that there is no question as to its validity? For 25 years Congress has been legislating against the trusts, and for as many years we have been embroiled in litigation in the courts of the land.

Now let me consider some of the objections that might be urged. I hear one say that this a tax on efficiency. Of what value or merit is efficiency in a great trust, organized to the highest degree, if consumers receive no benefit and the men who labor in that industry receive no benefit? Of what use is that efficiency to the country when it only goes to magnify the profits of those who are exercising monopoly power? Of what use is that efficiency to the country when it has served to create the multimillionaires of the country, to centralize wealth, and to really work an injury upon the business world by intensify-ing the struggle for existence among those compelled to compete?

Yes, and I hear another objection, that it proposes to limit Well, do Senators think of what limitation has been placed on enterprise by the great trusts which have grown up in the land? Do they think how those trusts have crushed small competitors; how they have ruined independents; how they have driven men out of business and reduced them from the position of independent citizens to wage earners and salaried The limitation of enterprise in this country has been worked by the great trusts themselves in the destruction of innumerable companies that were endeavoring, under the

laws of competition, to do the business of the country.

Mr. President, there may not be many precedents for just this style of legislation, but I recall one at the present time which seems to me very similar and which is highly thought of. A few years ago, under the leadership of Gov. Hughes, of New York, now a justice of the Supreme Court of the United States. New York enacted a law prohibiting the giant insurance companies of New York from writing more than a certain per cent of new business each year. That law has been proved beneficent; it has saved money to the holders of policies; it has tended to restrict and reduce the growth of the Money Trust in this country; and it has given an opportunity for the lesser and legitimate insurance companies to increase their business. So that the limitation of the growth of the great concerns is not altogether without legitimate and healthy precedent.

Mr. President, I have said that for 25 years Congress has been legislating and courts have been struggling to enforce legislation against the trusts, but our progress has been almost This has been the very era of the growth of trusts; it has been the very era of the centralization of wealth. In that time a great imperialism has grown up in our business To-day, after the decisions of the Supreme Court in the rd Oil and Tobacco cases, we are practically con-Standard Oil fronted with the fact that we have failed-failed in legislation, failed in our courts, and that we have been checked in our effort to do away with the development of these great giants in the business world. Shall we give up? Shall we abandon

the fight and give over the country to the exploitation of these

Almost every man here has pledged his constituents at one time or another to do what he can against the trusts. They are an acknowledged evil. Every platform has denounced them. I believe I was not only standing upon the ground of public interest, but that I was standing on good Democratic ground when I left the caucus because I was denied even the privilege, if I remained in it, of presenting to the Senate this amendment proposing to tax the trusts in proportion to their size.

No plank in the last Democratic platform was stronger or more unqualified or definite in binding the Democrats in office than that plank which reads:

We * * * demand the enactment of such additional legislation as may be necessary to make it impossible for a private monopoly to exist in the United States.

This, Mr. President, is the Democratic doctrine, and I believe I have the right to call upon the Democratic managers in the Senate of the United States to give the Democratic Senators here an opportunity to vote for it.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Nebraska [Mr. HITCHCOCK].

Mr. NORRIS. Mr. President, I should like to make an inquiry of my colleague, if he will give me his attention. On page 2 of the amendment, beginning in line 18, among other exceptions it is provided:

Nor shall this additional tax provided for in this paragraph apply to corporations, joint-stock companies, or associations employing less than \$50,000,000 capital, represented by stock or bonds, or both.

The question I want to ask is with regard to the modifying clause "represented by stock or bonds, or both." It struck me at first glance that those words weakened the proposition. Would it not be possible for some joint-stock company or association to have a capital of \$50,000,000 and have neither bonds nor stock; and if that were true, would they not escape the provisions of this amendment?

Mr. HITCHCOCK. I think there may be some point in the criticism which my colleague makes; but I will state that I used that phrase for the reason that if I confined the language to capital stock it might be possible for a company to organize with \$25,000,000 capital stock and have \$25,000,000 of bonds, and thus escape. I am willing to accept any modification that may be suggested.

Mr. NORRIS. In that case it would all be capital. I should think there would be no question about that. It seems to me that the ground is covered if you stop at the word "capital." It would not make any difference then how it was represented, whether it was by shares of stock or bonds or any other method that might be devised; but if you leave in the words which I have mentioned and any scheme were devised to have the capital composed not of stock or bonds, then they would be excepted, and I take it, of course, that my colleague does not mean to have that occur.

Mr. HITCHCOCK. It is possible that it would be well to change the language so as to read "employing less than \$50,000,000 capital represented by stocks, bonds, or otherwise."

Mr. NORRIS. Why should we say anything further? Why not stop at "capital"? Would not that include it all?

Mr. HITCHCOCK. I doubt it. If a concern in that case had

Mr. HITCHCOCK. I doubt it. If a concern in that case had only \$25,000,000 capital and borrowed \$25,000,000 more, I think it would not come within the provision.

Mr. NORRIS. I think the suggestion the Senator has made, to add the words "or otherwise," would at least remove the difficulty.

Mr. HITCHCOCK. I ask leave, then, to modify the amendment in that particular by inserting the words "or otherwise," so as to read:

Employing less than \$50,000,000 capital, represented by stocks, bonds, or otherwise.

Mr. BRISTOW. Mr. President, I am interested in the limitation of \$50,000,000. Does not the Senator have in mind any corporations or stock companies that might have a less capital and still hold a monopoly of the business? Does he think \$50,000,000 is low enough? I should like his views as to why he made it fifty millions instead of say twenty-five millions.

he made it fifty millions instead of, say, twenty-five millions.

Mr. HITCHCOCK. I will say to the Senator from Kansas that I presume it was because of my extremely conservative nature. I do not like to go too far. I thought possibly there might be danger that a concern of less capital, manufacturing some comparatively insignificant article, might be involved. I am not at all wedded, however, to the \$50,000,000 limit. If any reason can be shown why it should be made \$25,000,000, I shall be glad to accept the suggestion.

Mr. BRISTOW. I feel that I should say that my idea as to the control of the trusts has been along different lines from

those proposed in this amendment. I have felt that we ought to have an industrial commission, given powers to inquire into the operations of all of these concerns, and with authority to correct any monopoly that might exist. I have pending now before the Committee on Interstate Commerce a bill to that effect; but this amendment seems to me to be very desirable. I can not see how any harm could come from it. Certainly it would not interfere with any business that was conducted along legitimate lines and did not maintain itself by virtue of the power it might have as a result of a monopoly.

I shall certainly most heartily support the amendment.

Mr. BORAH. Mr. President, I wish to ask the Senator from Kansas and the Senator from Nebraska if this extraordinary tax is placed upon these monopolistic combinations, what means have we to prevent the combinations from transferring practically all of the tax to the consumer? Take the case of the American Tobacco Co., the corporation which gave rise to this amendment.

Mr. BRISTOW. I will say to the Senator that this tax is on the net income. It is not on the gross business. It is levied after the commodities have been sold and distributed and consumed, upon the profits that accrue from the business.

Mr. NORRIS. If the Senator will permit me, even though we might admit that the tax could be passed on, I presume the theory of the amendment is that if it were passed on it would enable those who are independent and who do not have to pay this high tax to get on the market with a cheaper article and thus bring about real competition.

Mr. BORAH. That would be true if there were no monopoly. Mr. NORRIS. This applies where they control from one-quarter up of the product. Unless some concern controlled the entire product they would not be able to pass on this tax, even if otherwise they could do so, providing somebody else was manufacturing it at a lower price and was able to put it on the market.

Mr. BRISTOW. The Senator from Idaho will observe, on page 2, in subdivision C, that the amendment provides that "if its production or sale be one-half or more of the total amount of any line of production for the whole country, its annual tax shall be twenty times the normal tax hereinbefore imposed." When you impose a tax that heavy, it seems to me, it gives the smaller concern an opportunity to compete in the market. It puts a handicap upon the monopolization of the American market by a giant concern and relieves the smaller producers from that burden.

The idea plainly is to give the small man a chance in his competition with the powerful concern. If there is anything needed in American commercial or industrial life to-day it is just such legislation as this. It is all very well for us to go on the stump throughout the country and advocate the control of monopolies and denounce them violently, and then, when an opportunity comes in the United States Senate, to refuse to vote for a measure that would, to some extent at least, put a handicap on them in their efforts to monopolize the American market.

I think we owe a debt of gratitude to the Senator from Nebraska for presenting an amendment like this, which enables us at least to express our views as far as that principle goes. Mr. THOMAS. Mr. President, some time before the Demo-

Mr. THOMAS. Mr. President, some time before the Democratic caucus assembled the Senator from Nebraska introduced an amendment which was aimed at and intended to affect the American Tobacco Co. I should like to ask him if it was not that amendment which was discussed and which received the vote to which he referred a few moments ago?

Mr. HITCHCOCK. If the Senator will permit me to reply, I not only introduced my tobacco amendment, which was referred to the Committee on Finance, but I also introduced an amendment very similar to this now pending providing for a graduated tax upon the incomes of trusts. That amendment also was referred to the Committee on Finance of which the Senator from Colorado is a member. That committee ignored it.

If a committee is to control the caucus, and the caucus is to control the party, and the party is to fix legislation, I think the committee at least ought to give hearings, and ought to give an opportunity for the consideration of the legislation upon which it passes.

Mr. THOMAS. I am very sorry that my question seems to have offended the Senator. I asked the question in perfect good faith. I am of course aware of the fact that this amendment and the other amendment were introduced and referred as the Senator says; but I am here to assert from my recollection that it was the tobacco amendment which was there discussed, and which there received the vote to which the Senator refers. I may be mistaken; my memory may be infirm, but that is my recollection, because I know that my chief objection to the amendment was that it was aimed at a particular concern, and was not general in its terms and purposes.

Mr. HITCHCOCK. The Senator states the matter correctly so far as he goes; and I certainly regret it if in the heat of my remarks I have seemed to reflect overseverely upon the Committee on Finance. I realize that the committee has done a great work, and that it has been burdened with details; but I think a matter which was serious enough to command the attention of the Democratic caucus for two days should have been given 15 minutes consideration by the Committee on

I introduced not only my tobacco amendment but this amendment. They were both referred to the Finance Committee, and both rejected by the Finance Committee, as I was informally

informed some time thereafter.

I stated in my remarks here to-day that I did not ask the caucus to adopt either one of my amendments and bind all the Democrats to vote for them. All I asked was that the caucus should leave me free and leave its members free to present and vote upon those amendments here in the Senate. That is all I asked.

Mr. THOMAS. I think the Senator is aware of the fact that a vote was asked and taken upon his amendment.

Mr. HITCHCOCK. It was, but it was not asked by me. said I did not ask it.

Mr. THOMAS. That is true; but it was nevertheless asked and recorded, and the matter was discussed by the Senator

from Nebraska as well as by some others.

Mr. HITCHCOCK. That is true, but if the caucus had given me the privilege of presenting it upon the floor of the Senate I should have been entirely satisfied. It was the Senator from Arizona [Mr. Ashurst] who presented the amendment, because it seemed to be less offensive to members of the committee than to give me the freedom of offering the amendment here before

Mr. HITCHCOCK subsequently said: Mr. President, I find upon examining the official report of the colloquy that occurred to-day between the Senator from Colorado [Mr. Thomas] and myself that I placed an erroneous construction upon a question which he put to me. Under the erroneous impression that my statement was being questioned by the Senator from Colorado, I replied harshly and unjustly to him; and I desire to tender my apologies.

Mr. GALLINGER. Mr. President, some of the secrets of the Democratic caucus are now being revealed. I should like to ask those in charge of the bill if we may not have a transcript of the entire proceedings of that celebrated gathering? might enable us to legislate more intelligently than we can other-

wise, being in the dark as we are at the present time.

Mr. WILLIAMS. Mr. President, there is one very serious objection to furnishing the Senator from New Hampshire with a transcript of the proceedings of the Democratic caucus. If one came back from the dead with Democratic doctrine of any description, it would not appeal to the Senator from New Hampshire. It would not do him the slightest good if he had before him to-day every word of wisdom that was uttered in that conference.

One word more, Mr. President. I had not intended to get on my feet at all. In the most good-natured way possible I wish to announce that the Democratic Party in its own good time, and in the fullness of its wisdom, will deal with the trust problem. It will also deal with the banking and currency problem. It will deal with a great many other things. But it is not going to make this bill the vehicle of all sorts of reformations, and it is not going to deal with a great problem like the trust problem in any hairbrained manner. It is going to deal with it after full consideration and full hearings.

There are several bills dealing with the trust question pending now, introduced by several gentlemen. Perhaps when the Democratic Party comes to deal with that question it may avail itself of some of the propositions or some of the suggestions contained in this amendment. I do not know as to that. It will if it thinks it is wise. It will not if it thinks it is unwise. But it is not going to make this bill the vehicle for every manner of alleged reformation in some field or other.

Mr. GALLINGER. I can not refrain from expressing regret that we can not get this information that is lodged in the tomb of the Democratic caucus; but if it has been ordained otherwise, of course we must get along as best we can, without having information that we would very much like to possess.

I observe that the Senator has marked out a great program for the Democratic Party, which he says it is going to carry out in the fullness of its wisdom. I regret to say that in view of the past performances of that party, I am afraid the fullness of its wisdom will come short of the performance which the Senator from Mississippi suggests.

Mr. WILLIAMS. That may be, Mr. President, but if the Senator frem New Hampshire approved of us in any way, we

might not suspect our wisdom just for that reason, but we

would suspect our Democracy.

Mr. GALLINGER. There is no question about the Senator's Democracy, and there is no question about the Democracy of this bill, because it is along the lines of ante bellum days, when Democracy was in its glory. It has been rehabilitated for a little while, but it will not last long.

Mr. CUMMINS. Mr. President, I have nothing to say with

respect to the controversy between Senators on the other side of the Chamber as to the caucus. I have expressed my opinion heretofore with regard to that way of legislating, and I have

not in the least degree changed it.

I do desire, however, for a very brief time to express my views upon the merits of the amendment proposed by the Senator from Nebraska. I am not content with the answer made by the Senator from Mississippi [Mr. WILLIAMS], who says that in the fullness of time and in the wisdom of the Democratic Party we will deal comprehensively with the trust problem. I suppose he means that when a majority of the Members on the other side of the Chamber come to the conclusion that we ought

to legislate upon that subject we may be able to approach it.

I assume that the proposal of the Senator from Nebraska will be characterized as another assault upon wealth so graphically described by my friend from Massachusetts [Mr. Lodge] yesterday. I think that the Senator from Massachusetts did the country a great injustice, or the people of the country a great injustice, when he declared that there was a prejudice among the men and women of America against wealth as such. There is no such prejudice and there is no such feeling. I have never heard in any campaign, however heated, one word uttered against the man of wealth, the man of success. Success is as highly esteemed now as it ever was in the history of the world, but the last 25 years, and especially the last decade, have witnessed the accumulation of so much dishonest wealth, or, to speak more accurately, so much wealth has been dishonestly accumulated, that the criticisms against the methods which have been employed are sometimes regarded as criticisms against success or the expression of envy upon the part of those who have not been so successful.

When it is remembered that a great proportion of the immense fortunes of the country have been accumulated in ways that have fallen under the condemnation of every right-thinking man, it is not to be wondered at that in the effort to analyze the causes and in the effort to find some remedy for the evils which exist the superficial observer should think there was a campaign in progress against all success, against all wealth. It is not so. But when the country thinks of the \$700,000,000 and more unfairly created in the organization of the United States Steel Corporation, which made fortunes beyond description for those, or some of those, who were engaged in the enterprise; when it is remembered that the Chicago & Alton Railway Co, rose overnight from a corporation of about \$30,000,000 of capital to one of \$130,000,000 of capital, absorbed by the unscrupulous but capable men who were engaged in the enterprise; when it is recalled that Mr. Carnegle, an estimable man, sold a plant to the United States Steel Corporation that was not worth by any fair standard of value more than \$100,000,000 for \$500,000,000, simply because there passed with it a certain monopolistic power, we can not be surprised if we find the people of the country alert and determined to thwart in some way these avaricious' desires and to restrict these monopolistic powers

This, fellow Senators, is the real thought at the bottom of all this agitation, and the sooner we recognize not only the right but the duty of reaching out for these dishonest fortunes and endeavoring in some way to prevent their increase or to prevent others from imitating what has heretofore been done, the sooner we will inculcate a real respect and a real regard for honest

success and legitimate wealth.

If I had my way about it I would prefer to reach this subject through some other power of Congress. Primarily I would not adopt the taxing power in order to accomplish the purposes that every good citizen, I think, wants to accomplish. But there are times when we must take whatever power is at hand. There are times when our duty requires us not to wait for the future and for legislation of another character, although it reaches the same end, but to do what we can now, because in so doing we at least will have made one step in the long journey toward the abolition of great monopolies.

I do not agree with the sentiment that has been so frequently expressed here that we must not employ the taxing power for anything else than raising a revenue. I know that that must be the legal intent uppermost in our minds; but, incidentally, if we can while raising a revenue at the same time restrict modopolies and trusts we ought to do it.

You will all remember that when it was thought necessary to retire the circulation of State banks it was done through the taxing power without any real purpose of raising a revenue. When it was thought best to protect the farmers of this country against frauds and deceptions in one of their products we protected them through the taxing power. I think no man will now criticize the efforts that were then made and the results that were then accomplished.

Only last year my friend from Massachusetts [Mr. Lodge], who deplores apparently the use of the taxing power for any other purpose than raising a revenue, introduced, and through his influence secured the passage of, a law taxing a certain kind of matches, not for the purpose of putting money in the Treasury of the United States, but for the purpose of protecting the lives and the health of the people. He is justly entitled to the gratitude of all the people of the country for the destruction of the business which thus menaced life and health, but the tax which was imposed in that bill was a prohibitive tax and could have no other effect than the destruction of the business which it concerned.

Therefore when we observe this great menace of monopolistic control in the industries of our country and see how slowly and ineffectively we have hitherto dealt with the subject, and see here an opportunity at least to discourage the increase of business of one corporation beyond a reasonable proportion, I think we ought to embrace the opportunity. We ought to pass the amendment. It will have the effect of discouraging any corporation from desiring to do more than 25 per cent of the business of the particular kind that the corporation carries on.

I am willing to go much further. I do not believe that any person or any corporation ought to be permitted to do more than 25 per cent of the whole business. If I had my way, and if there was any effective method by which it could be accomplished, no corporation should be permitted to grow to a magnitude that would enable it to take to itself more than 25 per cent of all of one kind of business of this great country. We are large enough always to maintain more than four corporations or four persons engaged in the same business.

Take the United States Steel Corporation, inasmuch as I have mentioned it, as an illustration. It does practically 50 per cent of the business in which it is engaged. I have no criticism upon the methods that it employs in the business itself, but it would be very much better for the people of the United States if instead of having one corporation doing 50 per cent of that business it was distributed among five corporations doing the same extent of business. If our object is to preserve the competition we have and to restore the competition we have lost, let us put every obstacle that we can in the way of any corporation going to the point at which it can exercise this monopolistic power.

Therefore it matters not to me whether this raises a revenue or not. I suppose it will raise some revenue, because I assume some of these corporations will be able to pay this added tax and still meet their competitors upon fair and even terms. But, however that may be, this will be some obstacle in the way of growth beyond 25 per cent of the business. There ought not, as it occurs to me, to be two minds about erecting whatever obstacle we can to prevent the onward march of monopoly and trust.

Mr. LODGE. Mr. President, I notice that the Senator from Idaho [Mr. Borah] yesterday said that in the State of Massachusetts a few years ago the assessed valuation of all the real estate amounted to \$2,000,000,000, while the valuation of all the personal property in the State, according to the assessment, amounted to only \$500,000,000. I do not know to just what date the Senator referred, but I have gone back a few years. I have taken the report for 1910, three years ago. The total value of the real estate was \$2,977,000,000 and the total valuation of personal estate was \$2,050,000,000, a difference between them of only \$900,000,000 instead of a billion and a half or two billion, showing that the valuation of the personal estate is very close to the valuation of the real estate. Fifty-one million

Mr. NORRIS. Will the Senator yield right there? Mr. LODGE. I should like to put in the figures consecutively. Fifty-one million was raised by the tax on real estate-I do not give the detailed figures-and \$34,000,000 was raised by the tax on personal estates. I am reading from the tax commissioners' report covering the year 1910.

Mr. NORRIS. Now, Mr. President, if the Senator will yield,

for the sake of information I should like to know if he has any estimate as to what proportion in value of personal property this particular assessment covers? How much, on a percentage basis, of the value of personal property was really listed for taxation?

Mr. LODGE. I do not know. That is undertaking to make them state the property that escapes taxation. Undoubtedly some property does escape it. That is the case everywhere.

Mr. NORRIS. I understand; but the Senator was reading from some statistics, and I supposed that perhaps the officer making that report had given those figures.

Mr. LODGE. They give no estimate of the amount that escapes taxation, because if they could they would get it.

Mr. NORRIS. Not necessarily.
Mr. LODGE. They would come pretty near getting it.
Mr. BORAH. I think that is a mistake, because it has been estimated very closely and very accurately, apparently, by a great many tax commissions that they get for taxation only about 20 or 25 per cent of the personal property. I did not cite Massachusetts, because Massachusetts was an exception: but there are other States in which when estates come to be probated it is shown that they have paid taxes upon about onetwentieth of what they were worth.

Mr. LODGE. Unquestionably some personal property more or less escapes everywhere. It is very difficult to determine how much has escaped because the very fact that it escapes shows that it is concealed, and any estimate must necessarily be guesswork. I am far from defending it. I know when estates go to probate they often exhibit a much larger amount than they are taxed, but under our system which in the main has been in existence for centuries, the man is not required to make a sworn return. In the towns and cities he is doomed, as it is called, so much personal property. If it is more than he thinks he ought to pay on, it is upon him to make a return. Of course, under the dooming a certain amount necessarily escapes, but there is no such gap as the Senator suggested; just as undoubtedly a certain amount of real estate is undervalued where dealing with 300 or 400 towns and cities. I know towns where they put what they consider the full valuation on real estate, and then tax all the real estate in the town one-half its valuation.

Mr. GALLINGER. Mr. President-Mr. LODGE. I yield to the Senator.

Mr. GALLINGER. I will ask the Senator from Massachusetts if it is not the custom in New England largely, if not entirely, where property is doomed, where a return has not been made, to increase the rate two or three times so as to punish them in that way? That is the case in New Hampshire,

Mr. LODGE. In cities and towns where taxes are high and money is greatly needed dooming is very severe and comes right up to the edge. In other towns and cities where there is no debt, perhaps, or they do not require such large taxes they do not push the dooming to the limit.

Mr. NORRIS. I wish the Senator would explain, as a matter of information, just what method is employed that he has

termed "dooming."

Mr. LODGE. It is done by the assessors of a city or a town, as the case may be. The theory is that all personal property, including income of every kind, is to be taxed. Nothing is exempted practically, except double taxation of mortgages; that is, mortgaged property is taxed once and they do not tax a mortgage in the hands of the mortgagee. With that exception, everything is supposed to be taxed. The assessors value the real estate and make another such valuation as they think proper for taxation. They then value the man's personal property and make their estimate on it and put it at anything they please.

Mr. NORRIS. Upon what basis? Do they not consult the taxpayer in any way? Does he not have to make some return

of his personal property?

Mr. LODGE. He has to make some return if he is dissatisfied with the dooming.

Mr. NORRIS. Then dooming, as a matter of fact, would be mostly guesswork, would it not?

Mr. LODGE. It may be mostly guesswork, but if you lived in one of the cities or towns of Maine or Massachusetts you

would think they doomed you for about all you had. It is a very common practice in many of the cities to go on increasing dooming and to make it just as high as they can. Men avoid making returns, of course, because they do not want the value of their property publicly known. That is the case in Massachusetts, and the same plan, I believe, prevails in the District. as the Senator from Utah [Mr. SUTHERLAND] suggests to me. Undoubtedly some personal property escapes under any system the wit of man can devise, but in the valuation of personal property there is no such gap—at least there has not been of late years, and I am not aware that there ever has been such a gapas the Senator from Idaho [Mr. Borah] has described.

Mr. BORAH. Mr. President, the figures which I used yester-day were taken from some remarks which I made in the Senate on the 3d day of May, 1909, at the time when the Senator from Massachusetts took part in the debate. At that time when the figures were challenged, I had the report to which I referred upon my desk, and I read from it. I am not able to give the Senator this morning the report from which I read, but I know that I can secure it. I had it on my desk then. The debate on this particular subject came up unexpectedly yesterday.

Mr. LODGE. Of course, I do not question that the Senator took his figures from some authentic source; but certainly they

do not correspond with the present figures.

Mr. BORAH. And I think the Senator from Massachusetts will agree with me that practically all the writers upon taxation have agreed that an assessment of personal property is a failure, and that it is agreed generally among them that the assessors do not get over 20 per cent of the property.

Mr. LODGE. I think it is agreed among those writers that to assess personal property is a clumsy system; but I do not remember what percentage they say can be got, though certainly a great deal more than 20 per cent is got in the State of

Massachusetts. I am sure of that. Mr. BORAH. Well, I have given Well, I have given some attention to the mat-

ter, and I have never

Mr. LODGE. I will say that since the debt of the State has increased taxation has risen, and the State authorities undoubtedly have been of late years appraising the valuation of property at much more than they did before. You can see how the valuation has risen.

Mr. STONE. Mr. President, it is impossible for us on this side of the Chamber to hear what the Senator is saying.

Mr. BORAH. Was the Senator from Missouri making a remark? I did not catch it.

Mr. LODGE. I do not want to detain the Senate-

I said I could not hear what was said on the Mr. STONE. other side of the Chamber, and I have not heard what the Sen-

ator from Idaho has just said.

Mr. LODGE. I will say, very frankly, that the Senator from Idaho and I were not debating the measure under consideration, but we were discussing some figures which the Senator from Idaho gave yesterday, which have no bearing on this debate. I am sorry to have delayed the Senate from its business even for so long a time as I have.

Mr. WEEKS. Mr. President, I should like to suggest, in addition to what my colleague [Mr. Lodge] has said, that there is a large amount of personal property in Massachusetts which is exempt under our laws. For instance, mortgages on real estate in Massachusetts are not taxable. For that reason there are hundreds of millions of dollars of that character of personal property known to exist which are not included in the lists of personal property held by residents of the State.

Mr. LODGE. Of course, those mortgages are all known, if my colleague will permit me, because they are all matters of

They ought not to be taxed. record.

Mr. BORAH. I did not refer to Massachusetts as an exception.

Mr. LODGE. I understand that. Mr. BORAH. But it is an important matter as to how much of the personal property of the country is reached. That has been pretty thoroughly investigated by tax commissions and by the National Tax Association. The figures which I have quoted came from sources of that kind.

Mr. STONE. If the Senator will pardon me, I should like to inquire whether we have before us at this time an amend-

ment to some law in the State of Massachusetts?

Mr. LODGE. I am sorry to disappoint the Senator, but I

do not think we have.

The VICE PRESIDENT. The pending amendment is one to the tariff bill which is now under consideration.

Mr. WORKS. Mr. President-

Mr. WILLIAMS. Let us have a vote on the amendment.

Mr. WORKS. Mr. President, I am sincerely glad, I am rejoiced, that at least one Democratic Senator has had the moral courage, the independence, and the patriotism to protest against the despotic power of the secret caucus. I think this country owes the Senator from Nebraska [Mr. HITCHCOCK] a debt of gratitude for the independence he has shown in the stand he has taken. If this sentiment is the beginning of a movement that will absolutely destroy the secret caucus, it will be worth more to this country, in my judgment, than any tariff bill that can be passed during this session of Congress.

I am in entire sympathy with the object and purpose of the amendment offered by the Senator from Nebraska, but I could not let this opportunity pass without expressing my appreciation of the stand the Senator has taken upon this important

Mr. BRISTOW. Mr. President, I was interested in the statement of the Senator from Mississippi [Mr. WILLIAMS] that the Democratic Party in its own time and at its own convenience would provide a proper regulation for the trusts. I can see the same spirit prevailing on the part of the Senators in control of this bill now which prevailed on the part of the Senators in control of the tariff bill four years ago-a dependence bers of the Democratic Party will do as some members of the

upon the power of a majority vote independent of the merits of the proposition submitted.

Under the rule that is controlling the proceedings of this Chamber now, 26 Senators compose a quorum of the caucus of the dominant party, and a majority of 26, or 14, can determine what shall be the action of the Senate, and any Senator who refuses to obey the orders or the mandates that may be issued from that caucus is branded as a bolter from his party.

I appreciate the position which the Senator from Nebraska [Mr. HITCHCOCK] has taken here this morning, and I think can understand something of the spirit that animates him. I myself, in connection with some other Senators, have stood up and advocated amendments that we believed ought to be made to a tariff bill, and thereby incurred the displeasure of those then in control of our party's management. To my mind the caucus method is a dangerous method, and it will not, in my judgment, receive the approval of the American people. The quicker it can be exposed in all its hideousness the better it will be for the country, and the quicker the dominant party disclaims such a system of legislation the better it will be for that party.

So far as using the taxing power to regulate trusts, as the Senator from Nebraska and the Senator from Iowa have both said, it is not new. It is employed to-day; it has been employed for many years, as the Senator from Iowa has illustrated; it can be employed now by adopting this amendment, and the results from such legislation will be desirable. Instead of waiting for some future time, with its uncertainties and its accidents, why should we not employ the opportunity that is here now to accomplish something along this desirable line?

Mr. STONE. Mr. President, having heard this luminous and all-pervading speech of the Senator from Kansas several times,

I think we might now have a vote.

Mr. NORRIS. Mr. President, I had not intended to say anything on this question at this time, but it seems to me that I ought not to let this occasion pass without expressing my gratification and my congratulations to my colleague in the Senate [Mr. HITCHCOCK] for the stand he has taken before the Senate and before the country on this particular proposition.

I have not agreed, and do not agree, with my colleague as to a great many measures that have been presented, and perhaps as to many which will be presented in the future, involving some of the basic principles of government; but, to my mind, a man has taken the greatest step for the good of his country and the good of any party when he declares his independence and refuses to permit any caucus to control his

official action in an official body.

If I refer in uncomplimentary language to the caucus, I do so without having any reference to any individual or any inten-tion to charge any individual with any lack of patriotism or lack of honesty or lack of ability. I know it is one method of government; but, to my mind, my colleague has taken the right step, and although, as I have said, we disagree greatly on a great many questions, I think it due to him that I should say, and say publicly, that I shall be glad to make the statement either here or elsewhere at any other time.

Since he has taken this step, I sincerely trust and hope that he will take the next one. He has not yet gone the full length. He has, as a rule, I think perhaps without exception, voted as the caucus decreed on all matters except this one; and he has said, and said truly, that, particularly on yesterday, amendments were proposed here on this side which appealed to many Members on the other side, as I know they did to him. He will feel better and he will be able to accomplish more good for his country and his fellow men when he takes the next step and refuses to permit a caucus to control his official action or his official vote at any time or on any occasion and on any ques-tion where he has reached conscientious convictions as to his

It seems to me that here in this body, where official record is kept, where the public are able to see and to hear what is said and what is done, in the last analysis, every man, whenever he has an official vote to cast or an official act to perform, ought to be guided only and entirely by the dictates of his own conscience as to what is right and as to what is wrong on that

particular question.

I know that there are matters of policy and matters of detail where men, whether they are here or elsewhere, if they are reasonable and fair, will be willing to give way to their fellows, but it should always in the end come home to the individual for him to decide for himself whether on a particular occasion or on a particular question he should give way, or whether he should follow his own idea as to what is just and what is

I believe, Mr. President, that the time is coming when mem-

Republican Party have done heretofore-break the caucus shackles—and, in my judgment, when that is done, any act that is passed through this body and the House of Representatives, where the same rules shall eventually prevail, will mean the honest and the sober judgment of a majority of the Members of the Congress of the United States; and in that way alone will a majority of the people be able to put on the statute books their sentiment and their will.

Mr. LANE. Mr. President, in truth, I am getting a little tired of these lectures, and I wish to express my disapproval of them. In relation to the amendment presented at the Democratic conference, of which I was a member, by the Senator from Nebraska, I wish to say that it related to a single trust, namely, the Tobacco Trust, which produces a luxury and not a necessity of life. I voted upon and against it as a free man, unbound by any dictation from the caucus, and declared to the caucus that I would not be bound by it. I was not asked to be bound there, nor am I bound here. I voted against that proposed amendment for the reason that I considered it an absolutely unfair proposition. It dealt with but one trust. If the Senator from Nebraska wants to go into that question, let him take it up in a fair manner and treat all trusts alike, and I will travel down the road with him.

I was very much better pleased with the conduct, the explanations, and the actions of my other associates than I was with the conduct of the Senator from Nebraska on that occasion. He was impatient and strictly interested in a measure of his own. It was not a measure that would have been given consideration in the Senate by either side. I merely wish to say this much in justice to Senators on this side of the Chamber.

It is being assumed here that the amendment of the Senator from Nebraska, which was submitted in the conference, covered all trusts. It did not do so. I do not know how far it goes at this time; but at any rate it seemed to me then that it was a proposition which should be acted upon separately and not be tacked onto a measure, which, even by the greatest good luck, can not fail to have errors and mistakes enough in it under the present circumstances.

I have not been in entire accord with the members of my party, and am not now, in relation to the income-tax amendment, and I take the liberty of saying that I expect that they will look into that matter and satisfy me before I finally vote upon it. Incidentally and accidentally the other day, after being hurriedly called upon to vote, on subsequently looking over the roll call I found myself in a position which has rather embarrassed me and upset my digestion. I am beginning to have doubts about the wisdom of one of my votes on that subject, and I am going to ask to have a chance to change it later on. I found myself, to my surprise, in company with which I am unused to travel.

Mr. SUTHERLAND. Mr. President, I desire to ask the Senator from Nebraska a question relative to his proposed amendment. In the first place the provision is-

That whenever a corporation, joint-stock company, or association shall produce or sell annually one-quarter or more of the entire amount of any line of production in the United States—

It shall be taxed as thereafter provided. Does the Senator mean by that that if a corporation produces in the United States more than one-quarter of a given commodity, it would be liable to a tax although it should sell the greater part of it abroad?

Mr. HITCHCOCK. That might raise a very interesting question, but I think it would be subject to the tax.

Mr. SUTHERLAND. I merely want to understand whether the Senator intends to include that kind of a case.

Mr. HITCHCOCK. I think that if it produces more than onequarter of the American production, it would be considered as approaching a monopoly to that extent, and subject to taxation

wherever it sold its product. Mr. SUTHERLAND. Suppose it produced, we will say, one fourth of the entire amount of a given commodity in the United States and sold in the United States only one-tenth? I simply

desire to get the Senator's view of the meaning of the provision. The other question I wish to sumbit is this: On page 2, beginning on line 16, the language of the amendment is:

But no line of production shall subject a corporation to any additional tax imposed by this paragraph unless said line of production amounts to at least \$10,000,000 a year.

Does the Senator mean by that that the entire production of a given article in the United States shall amount to \$10,000,000 per year, or does he mean that the production of the corporation or association which is sought to be made liable to the tax shall amount to \$10,000,000 per year?

Mr. HITCHCOCK. I undoubtedly intended to express the idea that this tax was not to apply where the total line of production was less than \$10,000,000 a year; that is, it would not

apply where it was some specialty that was not sufficiently important for a control of the production to be a hardship.

Mr. SUTHERLAND. The Senator intends to apply this tax only to articles which are produced in such enormous quantities as would be indicated by the \$10,000,000?

Mr. HITCHCOCK. Yes.
Mr. SUTHERLAND. And not to require that such quantity

shall be produced by the given corporation?

Mr. HITCHCOCK. That is correct. It was intended simply to reach the great, notorious concerns that employ \$50,000,000 capital or more and produce a certain percentage of the total production.

Mr. SUTHERLAND. So far as I am concerned, I entirely approve of this method of dealing with these great combinations. I think probably some such use of the taxing power will be the most effective way by which we can reach the evils which we all recognize exist.

I think it is a very unfortunate thing in any country when any individual or any combination of individuals, whether in the form of a corporation or otherwise, produce and sell an abnormally large proportion of a given commodity. effect of that is to stifle competition; and I think competition is a very necessary thing and ought to be preserved.

While I think there are a number of crudities in the amendment that ought to be worked out before it could become effective as a law, I am so much in favor of the general principle involved that I intend to vote for it.

Mr. BORAH. Mr. President, before the Senator takes his

seat I should like to ask him a question.

The Senator has stated that he intends to vote for this amendment. That encourages me very much to vote for it, because I have great respect for the Senator's legal knowledge and his judgment generally. But what I should like to ask the Senator is, how are you going to protect the consumer from having this tax transferred to him? If I thought it could not be transferred I would likely support it, and may do so, anyway, but rather as a declaration in favor of a principle than the belief that it will work out successfully.

Mr. SUTHERLAND. I do not know that he can be entirely protected, but I have always had this particular notion about these combinations—that even though the enforcement of un-limited competition should result in an increase of prices, it would still be a desirable thing.

The difficulty with a great combination which controls the output of a commodity is that it drives every aspiring man from the field. If it could be imagined that half a dozen great combinations, for example, should control the output of the staple commodities of the country, although they might cheapen the article to the consumer, and undoubtedly they would be able to cheapen the article to the consumer, I think we would pay too big a price for the cheapness in the discouragement which such a situation would give to everybody who might desire to embark in the particular lines of business represented by these great combinations and in the final breaking down to a greater or less extent of the opportunity for individual initiative and the stifling of individual development which would gradually but inevitably result.

I think in the production and sale of commodities, particularly those whose price can not be regulated by law, as is the case with reference to railroad transportation, it is of vital necessity that thoroughgoing competition should be preserved; and I think a provision of this kind will have a tendency in that direction. I think perhaps it may be true that to some extent the increased tax will be shifted to the consumer, although to a certain extent that will be offset by the fact that it will give opportunity for the smaller independent producers to compete upon more equal terms with those who control a

large part of the commodity. Mr. SMOOT. Mr. President, the question asked by the Sena-tor from Idaho was a very pertinent question. Taking into consideration all the evidence that has been given before every committee of the Senate and the House I have no doubt that this tax will be transferred to the ultimate consumer. Whatever tax may be added will be figured in by the great corporations in the same way that they figure their local taxation, in the same way that they figure the interest upon their bonds, and every other expense attached to maintaining their business, and it will be added as a part of the cost of producing whatever they

may manufacture.
Mr. NORRIS. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield

to the Senator from Nebraska?

Mr. SMOOT. I yield.

Mr. NORRIS. I desire to ask the Senator if he does not think the general proposition that the tax can be passed on would not apply here, because the competitor who is not able

to control any part of the market will not pay this tax? This is a fax that is paid only by the so-called monopolist.

Mr. SMOOT. I am coming to that very subject now.

the Senator will listen to what I have to say, for I will tell him in a very few words what I have noticed during my service in the Senate and in the discussion of this same question.

There never has been a time during the last 10 years when every independent manufacturer of steel goods in this country has not followed the price fixed by the trust, up or down. There never has been a time that I know of when the independent tobacco manufacturers of this country have not followed the price of the Tobacco Trust, up or down. The testimony before every committee of both the House and the Senate has shown that to

If this tax is levied upon the Tobacco Trust, for instance, it will be added as a part of the cost of producing tobacco just the same as the interest upon their bonds is added, just the same as their local taxation is added, just the same as wages paid are added. When the cost is established they will add their profit upon that cost, and at whatever price they sell to the American consumer the independent manufacturers of the country will follow them.

Mr. NORRIS There is not any doubt but that the Senator states a proposition, I think, that is always followed wherever it can be followed. But the illustrations he gives are in every instance cases where no such law as this was in operation. am not denying what the Senator says, but I think he ought to take into consideration the fact that his illustrations have that infirmity. If this amendment were on the statute books, the one who was operating the monopoly part of the business would have a tax to pay that the other one would not pay. So unless there should be a great deal of difference in the cost of production as between the independent manufacturer and the monopolist, the latter could not pass on the tax to the consumer and he would be driven out of business by competition.

Mr. SMOOT. It is my opinion that there is a great deal of difference in the cost of production. I believe the Tobacco Trust of this country manufactures tobacco cheaper than any independent concern in this country can do it. I believe the Steel Trust manufactures its products cheaper than any independent concern in this country can.

Mr. NORRIS. Does the Senator think they can do it 20 per cent cheaper?

Mr. SMOOT. In some cases; yes. Mr. NORRIS. That is the limit in this amendment.

Mr. SMOOT. In some cases I think they can. Mr. BORAH. Mr. President—

The PRESIDING OFFICER (Mr. POMERENE in the chair). Does the Senator from Utah yield to the Senator from Idaho?

Mr. SMOOT. I yield.

Mr. BORAH. I desire to say that the questions which I have asked are asked by one who is very friendly to the purposes which this amendment seeks to attain-that is, the general purpose to control these combinations-and I can not say too much of the earnestness and courage of the author of it. But in 1898 we passed a tax which was designed to tax the output of the American Tobacco Co. and the American Sugar Refining Co., and it is now known beyond peradventure that those two companies pass on that tax to the consumer. In addition to that we passed a corporation tax some two or three years ago. I think the Senator from Utah supported that tax. I know some of us opposed it on the very ground that the corporations would pass the tax over to the consumer.

I could favor this proposition if I could be clear that it is so

drawn as to prevent that being done in this case,

Some Senators here believe that the amendment is so drawn that it will prevent it. If so, I shall likely vote for it. But unless there is some means by which to prevent the tax being passed over to the consumer I am afraid it will not result in regulation. I say again that should I, after discussion, conclude to vote for it the vote will represent my conviction that some-thing ought to be done rather than any faith in the efficacy of this particular remedy.

Mr. HITCHCOCK. Mr. President, will the Senator permit

an interruption at that point?
The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Nebraska?

Mr. SMOOT. I do.

Mr. HITCHCOCK. In reply to the several instances that have been given—say, for instance, the Steel Trust—I think the Senator from Utah will admit that the Steel Trust fixes prices, not upon the cost of production, but upon the fluctuating supply and demand; and such fluctuation as has occurred in the steel market has been due to the increasing or diminishing demand for steel goods.

Mr. SMOOT. And that, by the way, will continue in the future, no matter whether this tax is imposed or not.

Mr. HITCHCOCK. That is an influence which applies to large and small concerns alike. Here in this tax we have an influence which applies only to the large concerns. Take the instance of sugar, to which the Senator from Idaho refers. There, again, it is the supply and demand of sugar, the fluctuating supply, if not the fluctuating demand, which causes the change in the price of sugar from time to time. When the beet sugar comes upon the market the price of sugar has been invariably reduced. But here in this proposed tax we have a proposition which will not apply to the large and the small alike, but will apply only to the large. It gives an opportunity to the small to compete. It gives them an opportunity to enlarge their market against the large concern, that may be required to restrict its market on account of the tax.

Mr. SMOOT. The trouble with the Senator's argument is that past experience and history prove that no matter whether the advance has been 5 per cent, 10 per cent, or 20 per cent, the independents have followed it. They have not sold their goods upon the basis of cost. They have sold their goods upon the same basis upon which the trusts have sold their goods.

Mr. CUMMINS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Iowa?

Mr. SMOOT. I yield.

Mr. CUMMINS. Of course, the argument of the Senator from Utah proceeds upon the theory that we can not have competition in this country at all. I grant that it will require all the skill and wisdom we have to maintain it. But suppose this amendment required the payment of 75 per cent of the income of the corporation into the Treasury of the United States. Does the Senator from Utah think the United States Steel Corporation could raise its prices so as to repair its treasury after the payment of that amount, and that the others would follow?

I do not, Mr. President. Mr. SMOOT.

Mr. CUMMINS. Certainly not.

I will come to that question in my argument. Mr. SMOOT. If it were possible to do so, I would support and will support any kind of a measure that will control trusts in this country. I hardly think this will do it, however. I think the proper way to do it will be to create an industrial commission along the lines of the Interstate Commerce Commission and give that commission the power to regulate the trusts and prices as the railroad rates are regulated in this country by the Interstate Commerce Commission.

Mr. CUMMINS. I am in favor of an industrial commission; but, looking into the future, it seems to me that a commission of that kind is more distant now than it ever was before

Mr. GALLINGER. Why, Mr. President, an industrial commission has just been appointed.

Mr. CUMMINS. Not an industrial commission of the kind I have in mind.

This will not completely cure the trust evil, of course; but it will help, in my opinion. It can not be asserted as a positive fact that the independents or the smaller concerns will in every case follow the prices fixed by the larger concerns. They want to live, and each wants to get ahead; and there will be some competition excited by this amendment that otherwise would not exist.

Mr. SMOOT. It is a matter of opinion between the Senator and every other Senator. My opinion is that the amendment itself will not bring actual competition, because of the fact that the rates prescribed, in my opinion, are not sufficient to prevent the independents from following the prices fixed by the trust.

Mr. BRISTOW. Mr. President—
The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Kansas?

Mr. SMOOT. Certainly. Mr. BRISTOW. If the Senator's inferences prove to be true, can we not increase it, then, the next time and make it enough to control? I do not think that the steel company, with this handicap, will monopolize the business of the country so much as it does now. If 20 per cent is not enough, if that proves to be insufficient, let us make it 50 the next time.

Mr. SMOOT. It seems to me that there may be a way to do that, as I said, by the creation of an industrial commission and give them power to control the trusts and regulate the prices in

this country

Mr. BRISTOW. I desire to say that I have a bill pending before the Committee on Interstate Commerce now to create an industrial commission and give it, I think, drastic powers. But it has been there for a year and more, and when will it come out? I want to have an opportunity to do something. Still, the purpose seems to be to refuse to do something that we can, because, in the future, in our own good time, as the Senator from Mississippi says, we propose to do something in our own This will not interfere with an industrial commission.

Mr. SMOOT. No; but an industrial commission ought to be created, and if it can regulate the trusts, well and good. If such a commission can not regulate the trusts, then I think there ought to be a provision of this kind, with penalties even greater than those here proposed. That is the position I take in relation to the matter.

Mr. BORAH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Idaho?

Mr. SMOOT. Yes; I yield.

Mr. BORAH. I am glad the Senator from Utah has joined the third party upon the question of the regulation of the trusts. I am not going to enter upon a discussion of the regulation of trusts, although the regulation implies the proposition that we have conceded they must exist and that there is no way to get rid of them. But I rose to ask the Senator from Nebraska, who I know has given a great deal of time to this matter, does he feel that this amendment with its terms and conditions will prevent its operation from being oppressive to the consumer?

Mr. HITCHCOCK. Most assuredly, Mr. President. I have enough faith in the American people to believe that competition, if given half a chance, will assert itself. I believe that if a concern occupies the field now and has 25 per cent of the business of the country, it has such a great preponderance of business that it is able to crush its competitor. I believe that by a tax you can handicap that concern so as to give competition a

chance, and giving competition a chance it will live.

Mr. SMOOT. In answer to the Senator from Idaho in relation to joining the third party, I wish to say to the Senator that I do not have to join any party other than the Republican Party to vote my true convictions upon any question I am called to vote upon. I am fully convinced in my mind that there must be a regulation of trusts in this country. The first bill that comes before the Senate of the United States with that directly in view, I am going to support and vote for; and I do not propose to leave the Republican Party to do so.

Mr. TOWNSEND. I should like to ask the Senator from Nebraska how many trusts and corporations the amendment

would affect, if he has looked into that question?

Mr. HITCHCOCK. I have recently made up a little computation here, for the accuracy of which I will not vouch entirely. As I figure it, the United States Steel Co. has a capital of \$1,500,000,000, and its profits are \$54,000,000. It would be subject, I think, under this amendment to a tax of 20 per cent, which would be \$10,000,000.

The American Tobacco Co. has a capital of \$98,000,000 and an annual profit of \$15,000,000. I think its production alone would probably subject it to the tax applying to a concern having 25 per cent of the consumption of the country, to wit, 5 per cent; but if it should develop that the American Tobacco Co., Liggett & Myers, and the Lorillard Co. are owned to the extent of 50 per cent of the stock by the same stockholders, and they should be considered as one and as controlling 70 per cent of the tobacco business of the United States, they would be subject to a tax of 20 per cent upon their aggregate output.

the International Harvester Co., think \$15,000,000 in the last report, would be subject to the higher The Standard Oil Co. unquestionably would be subject to the higher tax. There may be some others, but those occurred to me yesterday afternoon, and I had them looked up for this

purpose.

Mr. TOWNSEND. The amount of earnings has nothing to do with it? It is the amount of capital and the amount of production that decides whether they are to be under this provision?

Mr. HITCHCOCK. No one is subject to this tax unless he is

employing \$50,000,000 capital.

Mr. WILLIAMS. Mr. President, the Senator from Utah having joined the Democratic Party by a profession of undying allegiance to the ultimate consumer, and having been invited into the third party by the Senator from Idaho, who has full authority for advice; and nearly all the presidential candidates in the third party having spoken to-day; and the junior Senator from Nebraska having mistaken the order of the day, evidently thinking his colleague here was dead and his eulogies were up, and he was to pronounce a eulogy upon him, can we not now have a vote upon the pending amendment?

Mr. HITCHCOCK. I ask for the yeas and nays on agreeing

to the amendment.

The yeas and nays were ordered, and the Secretary proceeded

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jackson] and withhold my vote. If I were permitted to vote, I would vote "nay.

Mr. GALLINGER (when his name was called). I have a general pair with the junior Senator from New York [Mr. O'GORMAN], which I transfer to the junior Senator from Maine [Mr. Burleigh] and vote "yea."

Mr. LEWIS (when Mr. LEA's name was called). quested by the senior Senator from Tennessee [Mr. Lea] to announce that he is called from the Capitol on official business and that he is paired with the Senator from Rhode Island [Mr.

Mr. LEWIS (when his name was called). Speaking for myself, I am paired with the junior Senator from North

Dakota [Mr. GRONNA]

Mr. McCUMBER (when his name was called). I have a general pair with the senior Senator from Nevada [Mr. NEWLANDS], and he being absent I withhold my vote.

Mr. POMERENE (when his name was called). I am paired with the senior Senator from Connecticut [Mr. Brandegee] and

therefore withhold my vote.

Mr. REED (when his rame was called). I am paired with the Senator from Michigan [Mr. Smith]. I have not been able to arrange a transfer, therefore can not vote. If I could vote, I would vote, with my party, "nay."

Mr. THOMAS (when his name was called). I have a general

pair with the senior Senator from Ohio [Mr. Burron] and with-

hold my vote.

Mr. TILLMAN (when his name was called). I again announce my pair with the junior Senator from Wisconsin [Mr. STEPHENSON ]

The roll call was concluded.

Mr. BANKHEAD. I transfer my pair with the Senator from West Virginia [Mr. Goff] to the senior Senator from Louisiana [Mr. Thornton] and vote "nay." I make this announcement for the day. I desire to state that the senior Senator from Louisiana is unavoidably absent.

Mr. GALLINGER. I desire to announce a pair between the Senator from Delaware [Mr. DU PONT] and the Senator from

Texas [Mr. Culberson].

Mr. LA FOLLETTE. I simply wish to say that the junior Senator from Minnesota [Mr. Clapp] is unavoidably absent from the Senate Chamber for the balance of the day, and I am directed by him to say that if he were present he would vote for this amendment.

The result was announced-yeas 30, nays 41, as follows:

YEAS-30.

Nelson Norris Oliver Page Penrose Perkins Poindexter Root Dillingham Sterling Sutherland Townsend Warren Borah Bradley Brady Bristow Fall Gallinger Hitchcock Jones Catron Clark, Wyo. Crawford Cummins Kenyon La Follette Lodge Works NAYS-41.

Thompson Vardaman Walsh Williams

Clapp Culberson So Mr. HITCHCOCK's amendment was rejected.

Mr. CUMMINS. I desire to present an amendment to be inserted at this point, although I do not want to take it up at this time. I ask that it be read and passed over, with the consent of the chairman of the committee.

Mr. SIMMONS. Let it be read.

Brandegee Burleigh Burton Chilton

The PRESIDING OFFICER (Mr. Walsh in the chair). The amendment will be read

The Secretary. On page 186, after line 2, insert:

The SECRETARY. On page 100, after time 2, insertibuted in dividends to stockholders whose entire annual net income from all sources, including such dividends, is less than the amount of individual net income exempt from tax under this act shall be reimbursed to such stockholders. The procedure and rules for reimbursement to be established by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury.

Mr. WILLIAMS. Mr. President, the Senator from Iowa had this identical matter before the Senate yesterday and addressed himself at considerable length to the question.

Mr. CUMMINS. I do not want it to be voted upon at this

Mr. WILLIAMS. I do not see why we can not vote on it, and if the Senator wants to discuss it further why he can not do it

Mr. CUMMINS. I make the request that it be passed over until to-morrow. If the requst is denied, then I must, of

Mr. WHALIAMS. No; I will not deny it, but I do think it is rather an abuse, when there is no particular reason for it, when Senators are here in person, to pass things over after they have been once discussed. But I shall not object, Mr. President.

Mr. CUMMINS. I have not discussed it: I have referred to it. The reason why I ask that it be passed over is that I am collecting some information with regard to stockholders of various corporations whose probable incomes are less than the taxable amount. I wanted to present that information to the

Senate.

Mr. WILLIAMS. Why could not the Senator have brought it here this morning?

Mr. CUMMINS. Of course the Senator from Mississippi can take whatever action he pleases.

Mr. WILLIAMS. I do not object. Let the amendment be passed over.

The Secretary continued the reading of the bill.

The next amendment of the Committee on Finance was, on page 186, after line 2, to insert:

There shall not be taxed under this section any income from whatever source derived accruing to any State, Territory, or the District of Columbia, or any political subdivision of a State, Territory, or the District of Columbia, nor any income accruing to the government of the Philippine Islands or Porto Rico, or of any political subdivision of the Philippine Islands or Porto Rico.

The amendment was agreed to.

The next amendment was, on page 186, line 10, before the letter "(b)," to strike out "Second"; in line 15, after the word "year," to strike out "out of income"; in line 22, after "mines," to strike out "an" and insert "a reasonable"; in line 23, after "deposits," to strike out "on the basis of their actual original cost in cash or the equivalent of cash" and to insert "not to exceed 5 per cent of the gross value at the mine of the output for the year for which the computation is made," so as to read:

(b) Such net income shall be ascertained by deducting from the grees amount of the income of such corporation, joint-stock company or association, or insurance company, received within the year from all sources, (first) all the ordinary and necessary expenses paid within the year in the maintenance and operation of its business and properties, including rentals or other payments required to be made as a condition to the continued use or possession of property; (second) all losses actually sustained within the year and not compensated by insurance or otherwise, including a reasonable allowance for depreciation by use, wear and tear of property, if any; and in the case of mines a reasonable allowance for depletion of eres and all other natural deposits not to exceed 5 per cent of the gross value at the mine of the output for the year for which the computation is made; and in case of insurance companies the net addition, if any, required by law to be made within the year to reserve funds and the sums other than dividends paid within the year on policy and annuity contracts.

The amendment was agreed to.

The next amendment was, on page 187, line 5, after the word "contracts," to insert the following proviso:

Provided, That mutual life insurance companies shall not be required to return as a part of their income any portion of premium deposits actually returned to their policyholders within the year for which the income-tax return is made, nor any portion actually credited to the policyholders by being applied as a deduction from the amount of the premium otherwise due to the company within the year for which the income tax is returned.

Mr. WILLIAMS. I ask in behalf of the committee that the proviso be recommitted.

The PRESIDING OFFICER. If there is no objection, that order will be made. The Chair hears none, and the paragraph stands recommitted.

The reading of the bill was continued.

The next amendment of the committee was, on page 187, line 21, after the word "reserves," to insert the following provise:

Provided further, That mutual marine insurance companies shall in-Provided parking, that initial marine insurance companies shall include in their return of gross income gross premiums collected and received by them less amounts paid for reinsurance, but shall be entitled to include in deductions from gross income amounts repaid to policyholders on account of premiums previously paid by them and interest paid upon such amounts between the ascertainment thereof and the payment thereof.

Mr. WILLIAMS. I ask that this proviso be recommitted. The PRESIDING OFFICER. If there is no objection, that order will be made. The Chair hears none, and the paragraph stands recommitted.

The next amendment of the committee was, on page 188, line 5, after the word "exceeding," to insert "one-half of the sum of its bonded indebtedness and," so as to read:

Third. Interest accrued and paid within the year on its indebtedness to an amount of such indebtedness not exceeding one-half of the sum of its bonded indebtedness, and its paid-up capital stock outstanding at the close of the year, or if no capital stock, the capital employed in the business at the close of the year.

The amendment was agreed to.

The next amendment was, on page 188, in line 9, after the word "year," to insert the following proviso:

Provided, That in case of indebtedness wholly secured by collateral the subject of sale in ordinary business of such corporation, joint-stock company, or association, the total interest secured and paid by such company, corporation, or association within the year on any such indebtedness may be deducted as a part of its expense of doing business.

The amendment was agreed to.

The next amendment was, on page 188, line 20, after the word "association," to insert "loan"; in line 21, after "deposits," to insert "or on moneys received for investment and secured by interest-bearing certificates of indebtedness issued by such bank, interest-bearing certificates of indebtedness issued by such bank, banking association, loan or trust company"; on page 189, line 1, before the word "or." to insert "thereof"; in the same line, after "or," to insert "imposed by the"; in the same line, after "country," to strike out "as a condition to carry on business therein"; in line 6, after "income," to strike out "received" and to insert "accrued"; in line 18, after the word "mines," to strike out "an" and to insert "a reasonable"; in line 19, after "deposits," to strike out "on the basis of their actual original cost in cash or the equivalent of cash" and to insert "not to exceed 5 per cent of the gross value at the mine of the output for the year for which the computation is made," so as output for the year for which the computation is made," so as to read:

to read:

Provided further, That in the case of bonds or other indebtedness which have been issued with a guaranty that the interest payable thereon shall be free from taxtion no deduction for the payment of the tax herein imposed shall be allowed; and in the case of a bank, banking association, loan or trust company interest paid within the year on deposits or on moneys received for investment and secured by interest-bearing certificates of indebtedness issued by such bank, banking association, loan or trust company; (fourth) all sums paid by it within the year for taxes imposed under the authority of the United States or of any State or Territory thereof, or imposed by the Government of any foreign country: Provided, That in the case of a corporation, joint-stock company or association, or insurance company organized, authorized, or existing under the laws of any foreign country such net income shall be ascertained by deducting from the gross amount of its income accrued within the year from business transacted and capital invested within the United States, (first) all the ordinary and necessary expenses actually paid within the year out of earnings in the maintenance and operation of its business and property within the United States, including rentals or other payments required to be made as a condition to the continued use or possession of preperty; (second) all losses actually sustained within the year in business conducted by it within the United States and not compensated by insurance or otherwise, including a reasonable allowance for depreciation by use, wear and tear of property, if any, and in the case of mines a reasonable allowance for depetion of ores and all other natural deposits not to exceed 5 per cent of the gross value at the mine of the output for the year for which the computation is made: and in case of mines a reasonable allowance for depletion of ores and all other natural deposits not to exceed 5 per cent of the gross value at the mine of the output for the year for which the computati

The amendment was agreed to.

The next amendment was, on page 190, line 1, after the word contracts," to insert the following additional proviso:

Provided further, That mutual life insurance companies shall not be required to return as a part of their income any portion of 'premium deposits actually returned to their policyhoiders within the year for which the income tax is made, nor any portion actually credited to the policyhoiders by being applied as a deduction from the amount of the premium otherwise due to the company within the year for which the income tax is returned.

Mr. WILLIAMS. The proviso beginning in line 1, on page 190, and ending with the word "returned," in line 8, is identical with the one previously recommitted, and I desire that this also shall be recommitted.

The PRESIDING OFFICER. There being no objection to that course, it will be so ordered.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 190, in line 16, after the word "reserves," to insert:

Provided further, That mutual marine insurance companies shall include in their return of gross income gross premiums collected and received by them less amounts paid for reinsurance, but shall be entitled to include in deductions from gross income amounts repaid to policyholders on account of premiums previously paid by them, and interest paid upon such amounts between the ascertainment thereof and the payment thereof.

Mr. WILLIAMS. This is a repetition of the proviso previously recommitted, and I wish it also to be recommitted.

The PRESIDING OFFICER. Accordingly, that provise will likewise be recommitted to the Committee on Finance, in the absence of objection.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 191, line 1, after the words "portion of," to insert "onehalf of the sum of its bonded indebtedness and"; in line 15, after the word "thereof," to strike out "as a condition to carry on business therein" and to insert "or the District of Columbia"; and in line 17, after the word "companies," to insert "whether domestic or foreign," so as to read:

Third. Interest accrued and paid within the year on its indebtedness to an amount of such indebtedness not exceeding the proportion of one-half of the sum of its bonded indebtedness and its paid-up capital stock outstanding at the close of the year, or if no capital stock, the capital employed in the business at the close of the year which the gross amount of its income for the year from business transacted and capital invested within the United States bears to the gross amount of its income derived from all sources within and without the United States: Provided, That in the case of bonds or other indebtedness which have been issued with a guaranty that the interest payable thereon shall be free from taxation, no deduction for the payment of the tax herein imposed shall be allowed; (fourth) all sums paid by it within the year for taxes imposed under the authority of the United States or of any State or Territory thereof or the District of Columbia. In the case of assessment insurance companies, whether domestic or foreign, the actual deposit of sums with State or territorial officers, pursuant to law, as additions to guarantee or reserve funds shall be treated as being payments required by law to reserve funds.

The amendment was agreed to.

The amendment was agreed to.

The next amendment was, on page 191, after line 20, to strike

Third. The tax herein imposed shall be computed upon its entire net income for the year ending December 31, 1913, and for each calendar year thereafter.

And in lieu thereof to insert:

(c) The tax herein imposed shall be computed upon its entire net income accruing during each preceding calendar year ending December 31: Provided, however, That for the year ending December 31, 1913, said tax shall be imposed upon its entire net income accruing during that portion of said year from March 1 to December 31, both dates inclusive, to be ascertained by taking five-sixths of its entire net income for said calendar year.

Mr. BRANDEGEE. Mr. President, I notice in several in-stances in provisions similar to this the words "accruing during each preceding calendar year" are used. I wonder whether that better describes what is intended than would the word "accrued." It seems to contemplate a perfected thing that has happened during the preceding year, and I do not know but that the past participle of the word would more properly describe what is referred to. The word "accruing" would seem to me to contemplate a continuous process not yet completed, though I am aware it is sometimes used in a secondary way in another sense.

Mr. WILLIAMS. The Senator from Connecticut is right.

The word ought to be "accrued" instead of "accruing."

Mr. BRANDEGEE. I call the Senator's attention to the fact that the same language occurs in several previous instances in the bill.

Mr. WILLIAMS. I think the Senator is right. I move to strike out the words "accruing during" and to substitute for

them the words "accrued within."

The PRESIDING OFFICER. The amendment proposed by the Senator from Mississippi to the amendment of the committee will be stated.

Mr. WILLIAMS. The words first occur in line 25, on page 191, and I move the same amendment there.

The Secretary. On page 191, line 25, after the word "income," it is proposed to strike out "accruing during" and in lieu thereof to insert "accrued within."

The amendment to the amendment was agreed to.

Mr. WILLIAMS. I move the same amendment to the amendment of the committee, in line 4, on page 192.

The PRESIDING OFFICER. The amendment to the amend-

ment of the committee proposed by the Senator from Mississippi will be stated.

The Secretary. On page 192, line 4, after the word "income," it is proposed to strike out "accruing during" and in lieu thereof to insert "accrued within."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 192, line 7, after the word "Provided," to strike out "however," and to insert "further."

The amendment was agreed to.

Mr. McLEAN. Mr. President, I should like to call the attention of the committee to the fact that there are manufacturing concerns that would be affected by the next proviso of the bill, which are neither corporations nor joint stock companies nor associations, and it has been suggested to me by those who own a very large concern in New England, which has several branches abroad, that they should have the same leeway as to the date of the filing of their returns, their estimates, and their

tax as has a corporation. I suggest an amendment describing them as "any business or manufacturing concern," which would meet the situation suggested.

Mr. WILLIAMS. To what line does the Senator refer?

Mr. McLEAN. The phrase occurs in several places. I would suggest an amendment in line 9, on page 192, to insert between the word "company" and the word "subject" the words "or any business or manufacturing concern." We have many such concerns where brothers or other members of a family run the

Mr. WILLIAMS. If the Senator will draw up the amendments in the several places in which they should come, we will

Mr. McLEAN. I will call attention to it later.

Mr. WILLIAMS. Very well. The Senator may hand the amendments to the Senator from Indiana [Mr. Shively] or to

The PRESIDING OFFICER. It is understood that these amendments may be offered later?

Mr. WILLIAMS. Yes; the Senator from Connecticut will hand the amendments to us and we will consider them. If we approve of them, we shall bring them in as committee amendments.

Mr. McLEAN. That is satisfactory.

The reading of the bill was resumed and continued to the word "reserves," on page 194, line 25.

Mr. WILLIAMS. Mr. President, I wish to have recommitted the proviso beginning with the words "Provided further," in line 25, on page 194, and going down to and including the word "thereof," in line 14, page 195.

The PRESIDING OFFICER. There being no objection, the

part of the text referred to by the Senator from Mississippi

will be recommitted.

The reading of the bill was resumed, and continued to the

word "reserves," on page 196, line 8.

Mr. WILLIAMS. I ask that the proviso beginning on page 196, line 8, with the words "Provided further," down to and including the word "thereof," in line 23, be recommitted to the committee. It is identical with the other.

The PRESIDING OFFICER. There being no objection, the proviso referred to will be recommitted to the committee.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 196, line 25, after the word "exceeding," to insert "one-half of the sum of its bonded indebtedness and," and on page 197, line 23, after the word "country," to strike out "as a condition to carrying on business therein," so as to read:

condition to carrying on business therein," so as to read:

Sixth. The amount of interest accrued and paid within the year on its bonded or other indebtedness not exceeding one-half of the sum of its bonded indebtedness and its paid-up capital stock, outstanding at the close of the year, or if no capital stock, the amount of interest paid within the year on an amount of indebtedness not exceeding the amount of capital employed in the business at the close of the year, and in the case of a bank, banking association, or trust company, stating separately all interest paid by it within the year on deposits; or in case of a corporation, joint-stock company or association, or insurance company, organized under the laws of a foreign country, interest so paid on its bonded or other indebtedness to an amount of such bonded or other indebtedness to an amount of such bonded or other indebtedness to an amount of such bonded or other indebtedness of the year, or if no capital stock, the amount of capital employed in the business at the close of the year, which the gross amount of its income for the year from business transacted and capital invested within the United States bears to the gross amount of its income derived from all sources within and without the United States. Seventh. The amount paid by it within the year for taxes imposed under the authority of the United States and separately the amount so paid by it for taxes imposed by the Government of any foreign country. foreign country.

The amendment was agreed to.

The next amendment was, on page 198, line 22, after the word "as," to strike out "above," and in the same line, after the word "for," to insert "in this section or by existing law," so

as to read:

All assessments shall be made and the several corporations, joint-stock companies or associations, and insurance companies shall be notified of the amount for which they are respectively liable on or before the 1st day of June of each successive year, and said assessment shall be paid on or before the 30th day of June: Provided, That every corporation, joint-stock company or association, and insurance company, computing taxes upon the income of the fiscal year which it may designate in the manner hereinbefore provided, shall pay the taxes due under its assessment within 120 days after the date upon which it is required to file its list or return of income for assessment; except in cases of refusal or neglect to make such return, and in cases of false or fraudulent returns, in which cases the Commissioner of Internal Revenue shall, upon the discovery thereof, at any time within three years after said return is due, make a return upon information obtained as provided for in this section or by existing law, and the assessment made by the Commissioner of Internal Revenue thereon shall be paid by such corporation, joint-stock company or association, or insurance company immediately upon notification of the amount of such assessment; and to any sum or sums due and unpaid after the 30th day of June in any year, or after 120 days from the date on which the return of income is required to be made by the collector, there shall be

added the sum of 5 per cent on the amount of tax unpaid and interest at the rate of 1 per cent per month upon said tax from the time the same becomes due.

The amendment was agreed to.

The next amendment was, on page 199, at the beginning of line 11, to strike out "Fourth" and insert "(d)," so as to read:

(d) When the assessment shall be made, as provided in this section, the returns, together with any corrections thereof which may have been made by the commissioner, shall be filed in the office of the Commissioner of Internal Revenue and shall constitute public records and be open to inspection as such: Provided, That any and all such returns shall be open to inspection only upon the order of the President, under rules and regulations to be prescribed by the Secretary of the Treasury and approved by the President.

The amendment was agreed to.

Mr. LA FOLLETTE. Mr. President, if I can have the attention of the Senator in charge of this section, I wish to propose an amendment to be inserted after the word "President," in line 19, on page 199, and to read as follows:

Provided further, That the proper officers of any State imposing a general income tax may, upon the request of the governor thereof, have access to said returns or to an abstract thereof, showing the name and income of each such corporation, joint-stock company, association, or insurance company, at such times and in such manner as the Secretary of the Treasury may prescribe.

Mr. WILLIAMS. Mr. President, that amendment seems so absolutely unobjectionable that I imagine there will be no protest against it, and I shall take the liberty of accepting it.

Mr. LA FOLLETTE. I will say to the Senator that the suggestion of this amendment comes to me from the tax commission of Wisconsin.

Mr. WILLIAMS. I understand. It is merely to enable the State authorities to get information upon which they may base the administration of their State laws of like character.

Mr. LA FOLLETTE. I would like to say, further, Mr. President, that the same suggestion is made as to the returns of in-dividuals, provision in regard to which occurs earlier in the section. Concerning that, however, I will talk to the Senator at his convenience.

Mr. WILLIAMS. I am afraid that that would involve too much expense. The amendment which the Senator has proposed would not.

The PRESIDING OFFICER (Mr. THOMPSON in the chair). The amendment proposed by the Senator from Wisconsin will be

The Secretary. After the word "President," at the end of line 19, page 199, it is proposed to insert the following:

Provided further, That the proper officers of any State imposing a general income tax may, upon the request of the governor thereof, have access to said returns or to an abstract thereof, showing the name and income of each such corporation, joint-stock company, association, or insurance company, at such times and in such manner as the Secretary of the Treasury may prescribe.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Wisconsin [Mr. LA FOLLETTE].

The amendment was agreed to.

Mr. BRANDEGEE. Mr. President, in the hasty reading of the bill I was not quite able to follow, and I do not yet see, though there may be a reason for it, what is the meaning of the word "for," in line 6, on page 199. Let me read the part to which I refer, commencing in line 2:

And to any sum or sums due and unpaid after the 30th day of June in any year, or after 120 days from the date on which the return of income is required to be made by the taxpayer, and for 10 days after notice and demand thereof by the collector, there shall be added the sum of 5 per cent on the amount of tax unpaid and interest at the rate of 1 per cent per month upon said tax from the time the same becomes

Does that mean that only for 10 days 5 per cent additional shall be added?

Mr. WILLIAMS. I will ask the Senator to repeat his sugges-

Mr. BRANDEGEE. Does it mean that the 5 per cent shall only be added for the period of 10 days?

Mr. CHILITON. Commencing 10 days after that. Mr. BRANDEGEE. Then, I should think, if I get the idea of what is intended, it should read "and after 10 days after notice and demand thereof by the collector there shall be added the sum of 5 per cent," and so forth. I may be obtuse about it, but, as I have said, in the hurry of reading I did not understand it.

Mr. WILLIAMS. I think the Senator is right. I make the motion, or the Senator can make it, to strike out—

Mr. BRANDEGEE. Let the Senator make it.
Mr. WILLIAMS. I move to amend by striking out the word
"for," in line 6, on page 199, and inserting the word "after" in lieu thereof.

The PRESIDING OFFICER. The amendment will be stated.

The Secretary. On page 199, line 6, before the word "ten," it is proposed to strike out the word "for" and insert the word after.'

The amendment was agreed to.
The reading of the bill was resumed.
The next amendment of the Committee on Finance was, on page 200, after line 7, to insert:

In addition to the normal tax of 1 per cent as herein provided there shall be levied and collected an additional tax of 4 per cent per annum on the net income of railway corporations doing business in Alaska upon business done in Alaska, which shall be in lieu of the license tax of \$100 per mile per annum now imposed by law.

The amendment was agreed to.

The next amendment was, in paragraph N, page 207, line 15, after the words "governments of," to insert "the District of Columbia," so as to make the proviso read:

And provided further, That nothing in this section shall be held to exclude from the computation of the net income the compensation paid any official by the governments of the District of Columbia, Porto Rico, and the Philippine Islands or the political subdivisions thereof.

The amendment was agreed to.

Mr. BORAH and Mr. JONES addressed the Chair.
The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. BORAH. I yield to the Senator from Washington.
Mr. JONES. Mr. President, I move to amend the paragraph
by inserting, after the words "Porto Rico," in line 6, a comma and the word "Alaska."

I desire to ask the Senator from Mississippi whether the committee gave any consideration to the proposition of giving to Alaska the same right you have given to Porto Rico and the Philippine Islands in regard to any income tax that may be collected in those jurisdictions?

Mr. WILLIAMS. Alaska is a regular Territory of the United States and is provided for under that language. Porto Rico is not a Territory, as the Senator knows; the District of Columbia is not a Territory, and the Philippine Islands are not. All the balance of our possessions are Territories, and Alaska falls under the general appellation of "Territories."

Mr. JONES. The point I make is that you allow all the revenue collected in Porto Rico and the Philippine Islands to go to those jurisdictions. While they may not be Territories in exactly the same sense that Alaska is, yet they have organized governments, much more so than Alaska. They have property titles far more than Alaska. The conditions in both those jurisk dictions are far more favorable toward the collection of the tax and its use, even outside of those jurisdictions, than in Alaska.

Only last year we provided for a Territorial form of government in Alaska. The powers of the legislature there are very limited. They are not nearly so great as in the case of the legislative bodies of Porto Rico and the Philippines. No titles to real property have passed. They own practically nothing upon which taxes can be levied.

As a matter of fact, there is but very little income there except what is actually dug out of the ground. It seems to me we ought to help these people, if we possibly can, in starting their government. Their legislature first met in the spring of this year. They have no property that they can tax, because no titles can pass. About all the taxation they can raise is direct taxation.

It does seem to me that the conditions in Alaska should appeal much more strongly to those who favor a provision like this than the conditions in Porto Rico or the Philippines, and if the committee have not considered the proposition I wish they would do so.

Alaska must look to Congress for help. While we have given it a Territorial form of government, it is one of very limited powers. We have tied up all her resources, and while I hope we will open them soon, we have not yet done so. This is a small thing to do and we ought to do it gladly.

Mr. WILLIAMS. Mr. President, ever since this Government embarked upon the high seas of imperialism we have had one way of managing things in continental America and another way in the Philippines and Porto Rico. That never has met with the approval of my judgment, speaking individually. It has seemed to me that every foot of territory under the flag of the United States ought to be treated like every other foot of territory under the flag, and that there was no more reason why the Philippine Islands should be given the proceeds and benefits of Federal taxes than why Mississippi should be given them, much less Alaska. I never have seen any sense at all in it, as far as that goes. But we can not undo the whole system in this tariff bill, and we have recognized it as a thing that is existing. Hence this provision has been put in the bill. We do not care, however, to extend it still further to Alaska.

The truth is that all Federal taxes ought to go into the Federal Treasury, and taxes ought to be uniform everywhere. The truth is that this bill ought to apply to the Philippines as much as to the United States, as long as the Philippines are under our flag at all. But if we had undertaken to do it in this bill it would have brought on every sort of embarrassment. We would have had to amend all the laws that have been passed since we started upon this course.

I will say frankly to the Senator that I do not see any more reason why Alaska should not have the revenue collected from incomes in Alaska than why Porto Rico should have it; but I differ with him about wanting to give it to Alaska, because if I had my way I never would have given it to the others.

Mr. JONES. But, Mr. President, as a matter of fact, the committee have given it to Porto Rico and they have given it to the Philippines. I do not exactly appreciate the reason why it was given there. I do not think it should have been given. But it has been done, and I ask the same treatment for Alaska.

Mr. WILLIAMS. I think Porto Rico ought to be declared a Territory of the United States, the same as all our other Territories have been treated, and that we ought to get rid of the Philippines as soon as we can.

Mr. JONES. Porto Rico has a Commissioner on the floor of the House, who for all practical purposes has just as much authority as the Delegate from Alaska. The only difference is the difference between the names. They have an organized government in Porto Rico, much more comprehensive than that in Alaska. So if there are any reasons that appeal to us for allowing the people in Porto Rico and the Philippines to have this money, it seems to me that they should appeal to us all the more strongly in Alaska, where we are just starting a government and where, as I suggested a moment ago, they have no titles to land, as they have in Porto Rico and the Philippines.

Mr. WILLIAMS. This does not appeal to me any more strongly for Alaska than it does for Arizona or New Mexico,

although they are States.

Mr. JONES. They are in the Union now, as States, and Alaska is the only Territory we have. It is separated from the main body of the country by several hundred miles. As

the Senator has already said, there is certainly no more reason why these revenues should go to Porto Rico or the Philippines than why they should go to Alaska. In my judgment, there are far greater reasons why they should go to Alaska than to these other outlying possessions.

I had very much hoped the Senators in charge of the bill would be willing to allow Alaska to be treated the same as Porto Rico and the Philippines, and I hope the Senate will vote in that way.

Mr. WILLIAMS. I am sorry I can not accommodate my friend, but I can not think that way. It seems to me that that sort of thing has gone far enough and that we ought to retrace our steps rather than to advance further in that direction.

Mr. JONES. Of course Alaska is the only Territory we have left, besides Porto Rico and the Philippines; so that the proposition could not go any further.

Mr. WILLIAMS. I do not know; it may not be the only one we may have before we get through.

Mr. JONES. I hope it will be.
Mr. WILLIAMS. We have been left several times with very

few Territories, but later on we had others.

Mr. JONES. I do not think we ought to be controlled in our action on this bill by the remote possibility of getting some other territory in the future. This bill is to deal with the present condition of things as they are.

Mr. GALLINGER. Mr. President, I am impressed with the suggestion of the Senator from Washington that Alaska might well be included in this list, but I wish to inquire why Guam is not included? Why is Porto Rico included and not the island of Guam? It has a governor.

Mr. WILLIAMS. I do not know. Mr. LODGE. Or Tutuila?

Mr. GALLINGER. I think probably we ought not to take in Tutuila.

Mr. WILLIAMS. I think Guam is mentioned in the bill somewhere.

Mr. GALLINGER. I do not discover it.
Mr. WILLIAMS. You will find a general definition here, saying that wherever the word "States" is mentioned it shall include political subdivisions not mentioned elsewhere.

Mr. LODGE. Guam and Tutuila are excepted in the first

section.

Mr. WILLIAMS. In the first section; that is what I thought. Mr. LODGE. But they ought to be mentioned here, because I

they are there mentioned with the Philippine Islands. They ought to be mentioned here.

Mr. BRANDEGEE. They are mentioned in the first section only for purposes of tariff duties.

Mr. GALLINGER. That is all.

Mr. BRANDEGEE. This is the income tax.

Mr. LODGE. I think they ought to be included with the Philippine Islands. They are classed with them in the first section.

Mr. WILLIAMS. That may be.

Mr. GALLINGER. That was my view, and that is the reason rose to suggest Guam. I see no reason why Porto Rico and the Philippine Islands should be dealt with more generously than our other possessions. I hope it will be consented on the other side that at least Guam may be included, and I assume that Tutuila is in the same attitude.

Mr. LODGE. Mr. President, I will suggest to the Senator from Mississippi, or to the Senator from North Carolina, that putting in Guam and Tutuila will make this section correspond to the first section. They ought to be enumerated. Where the Philippine Islands are spoken of as excepted, Guam and Tutuila ought to be excepted, too, for the sake of completeness, to conform to the first section.

Mr. WILLIAMS. I suspect the Senator is right. I am willing

to accept that suggestion.

Mr. JONES. Mr. President, do I understand that the Senator from Mississippi is willing expressly to provide here that the income tax from these other Territories shall be left to them?

Mr. WILLIAMS. I did not understand that that was the suggestion of the Senator from New Hampshire.

Mr. BRANDEGEE. That would be the effect of inserting the names of those two islands.

Mr. JONES. Certainly.
Mr. WILLIAMS. Where would that amendment come in?

Mr. BRANDEGEE. On line 6, page 207.
Mr. WILLIAMS. The Senator from Washington is referring to one part of the bill, and this is a suggestion that is made to apply to the following part of it.

Mr. JONES. I understood it was made in connection with the part of the bill to which I have offered my amendment.

Mr. WILLIAMS. This part of the bill says:

That nothing in this section shall be held to exclude from the computation of the net income the compensation paid any official by the Governments of the District of Columbia, Porto Rico, and the Philippine Islands or the political subdivisions thereof.

Mr. GALLINGER. I will say to the Senator from Mississippi, if he pleases, that what I had in view was to add to the proviso which reads:

Provided, That the administration of the law and the collection of the taxes imposed in Porto Rico and the Philippine Islands shall be by the appropriate internal-revenue officers of those Governments, and all revenues collected in Porto Rico and the Philippine Islands thereunder shall accrue intact to the general governments thereof, respectively.

My suggestion was that I could see no reason why the island of Guam, which has a governor, should not also be included there. That was my purpose.

Mr. WILLIAMS. If that is what the Senator is talking about, I differ with him there. Guam is administered as what might be called a sort of a crown colony.

Mr. GALLINGER. It has a governor, has it not?
Mr. WILLIAMS. If I understand correctly—I may be mistaken-I think all the expenses in Guam are paid by the Federal Government, just as they are paid at a military station or reser-

Mr. LODGE. I think that is true.

Mr. WILLIAMS. Then, of course, we do not want to have any income tax going to the treasury of Guam.

Mr. GALLINGER. I will say to the Senator that I was not aware of that fact, and I think it ought to be looked into.

had an entirely different impression.

Mr. JONES. Mr. President, I wish to say that this is a matter of very considerable importance, especially to the people of Alaska; and while I do not like to delay the consideration of the bill. I feel that I shall have to ask for a vote on the amendment I have proposed.

Mr. BRANDEGEE. If the Senator will allow me, before he asks for a vote, lines 7 and 8, on page 207, provide that this revenue "shall accrue intact to the general governments thereof." What would the Senator say was the general government of Alaska?

Mr. JONES. We have a legislature there; we have a treasurer and a governor—a Territorial government.

Mr. BRANDEGEE. Does it mean to pay it into the treasury.

of the Territory of Alaska? Mr. JONES. Yes; certainly.

Mr. SIMMONS. Mr. President, would it not be just as proper to provide that this income should be paid into the treasury of State? Alaska is certainly a Territory of the United States. These others here—for instance, Porto Rico—are not Territories of the United States. They are simply possessions of the United States. We have permitted them to use their own revenues for the purpose of paying the expenses of their own governments. But when you come to an organized Territory, so far as its relations to the Federal Government are concerned in the levying of Federal taxes, it stands upon a parity with a State.

Mr. SMITH of Arizona. If the Senator will permit me, the usual custom was to take everything from the Territories instead of giving them anything. That is my experience with

national legislation in that particular.

Mr. SIMMONS. It may be that the Territories have not had quite a fair deal in the past. I do not know how that is. But I can see no reason why an income tax levied for the support of the Federal Government, if the taxpayer happens to reside in a Territory, should go into the treasury of that Territory any more than an income tax imposed upon an individual residing in a State should go into the treasury of that State.

Mr. JONES. But the Senator from Mississippi concedes that there is no more reason why the revenue coming from this tax in Alaska should go to the Federal Government than there was why it should go to it in Porto Rico or the Philippine

Islands-

Mr. WILLIAMS. The Senator from Mississippi conceded that but asserted at the same time that it ought not to go into the local treasury in either event.

Mr. JONES. Certainly; but it does go into it in these other

cases.

Mr. WILLIAMS. And the only excuse for it is that we

could not disrupt existing conditions in this bill.

Mr. JONES. It certainly will not disrupt anything to bring this revenue into the Treasury of the United States; and it certainly would not disrupt anything to take this revenue and let it stay in Alaska, occupied by our own people, part of our territory, technically a Territory but without any lands or property upon which they can assess taxes to raise any revenue, most of its revenue coming from direct taxes, from licenses, and all that sort of thing. I can not see where there would be any

Mr. WILLIAMS. I meant by that statement that one rule has been established for continental America and another rule for the appurtenances or appendages of continental America, as the Supreme Court has called them. The Philippine Islands get all of their revenues. They get the import duties that are

collected there.

Mr. JONES. Alaska does not.

Mr. WILLIAMS. In the Philippine Islands there is a good reason for it. We want to get rid of them in the course of time, and it is pretty well for them to have all their revenues kept

Mr. SMITH of Arizona. If the Senator will permit me to interrupt him, the Senator has no more sympathy for Alaska in its difficulties than I have.

Mr. JONES. I think that is true.

Mr. SMITH of Arizona. I presume I have had about as much experience with territorial existence and its relations to the Congress of the United States as any man who has ever lived in the whole world. I know what Territories suffer from. I see no reason, however, in this particular case for permitting the revenues under this bill to remain in Alaska any more than they should have remained in the other Territories which have now become States, except that in those days we had a greater freedom.

Alaska, by the course of conduct which has been followed toward her, has been absolutely robbed of the resources that she should necessarily have to support her government. I would suggest, rather, that the Senator from Washington and others join me in an effort to take the oppressive hand of the Govern-ment off of the property in the Territory of Alaska to which

her people are entitled.

There never has been a Territory in the last 50 years that could not have easily taken care of itself if properly treated, and Alaska as easily as any of them, or easier, provided you will permit the brave and vigorous and strong spirits who have gone there to develop that country to have some sort of a right to develop it by getting possession of the resources of the Territory and using them, not only for their own benefit but in a way that will result in the greatest possible benefit to the common country. We ought to take the hand of the Government off of Alaska, or at least soften the grip, and give her a chance rather than to continue present conditions. This little income they shall have covered into the treasury of the Territory the

from taxes will amount to nothing and can do no good to Alaska, but may be held up against her when we try to give real aid.

Mr. JONES. I agree with all the Senator has so well said as to the treatment of the Territories and what Alaska might do if properly treated. He has said it much better than I could. The fact that we have treated the Territories unjustly in the. past, however, should not be held as an excuse for continuing that injustice toward Alaska. While this will not do very much, it will certainly show a disposition on the part of Congress to deal at least fairly with the people in that far-away Territory, who are suffering under possibly far greater hardships than the people of any other Territory of the United States. I can not believe that Congress would take this for an excuse to treat Alaska unjustly in the future. That would be even worse treatment than we have accorded it heretofore, and that has been very bad.

Mr. SMOOT. Mr. President-

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Utah?

Mr. JONES. Certainly.

I wish to say that Alaska is treated with a Mr. SMOOT. great many more hardships than any other Territory that I know of, for the simple reason that all of her lands have been withdrawn. Nobody can get a foot of land in Alaska. Not a dollar of taxation is raised from the imposition of taxes upon lands there. She is off of the great highway of trade. There are a very few people in that vast territory struggling for exist-I recognize the truth of what the Senator from North Carolina says, that technically there would be no difference between taking this income and giving it to the treasury of a State on the one hand and giving it to the treasury of the Territory of Alaska on the other. The conditions in the two cases are entirely different, however. From a moral standpoint it does seem to me that we could at least do that much for Alaska for the reasons that have been so well stated.

Mr. JONES. Mr. President, I ask for the yeas and nays on

my amendment.

Mr. KENYON. Let the amendment be stated.

The Secretary. On page 207, line 6, after the words "Porto Rico," the Senator from Washington proposes to insert a comma

and the words "and Alaska."

Mr. BRANDEGEE. Mr. President, I do not see any reason for turning over the proceeds of this Federal income tax to the treasury of Alaska. Her people do not own the lands there. They lease them. They lease rights, and they make money, and they have incomes, and they are calling upon the Federal Government for a great many improvements. If they do not prosper there as other people do in their States, they are not compelled to stay there. If they want to raise money from their incomes for local purposes independently of the Federal income tax, they can impose one of their own, as other States do.

While I have nothing whatever against Alaska, I do not see any reason for making a special exception of that Territory and paying back to them for their own uses the moneys that the Federal Government raises for its uses.

Therefore I shall be compelled to vote against this amendment.

Mr. BORAH. Mr. President, I rose to offer the amendment which the Senator from Washington has offered. Having had considerable information from the Territory of Alaska as to the situation there with reference to taxable property, and the means by which they can raise taxes, I think they are entitled to this tax. They have not the property to tax, and under present conditions of governmental control they can not very well get it. If the country were open to exploitation or occu-pation as in other places there might be considerable logic in the argument of the Senator from Connecticut, but under present conditions it seems to me it is not well founded.

I do not desire to continue the debate, but I concur fully in what the Senator from Washington has said. The people of Alaska are building up that Territory under very adverse circumstances and conditions; and in my judgment they would build it up much more rapidly and efficiently if they were given an opportunity to do so. But certainly in building up their schools and their communities they need something in the way of taxes, and they ought to have that which is collected from

them in this way.

Mr. SMITH of Arizona. Mr. President, reiterating my expression of sympathy for the people of Alaska, I think their condition is such that it will require much more for their relief than anything that could occur to them under this bill. For myself rather than put in a tariff bill a mere provision that

taxes from the few people there who are able to pay them I should much prefer, if we still insist on keeping our hand on the throats of those struggling people, that we treat them as we have treated other dependencies of the United States, and provide for them out of the Treasury itself, provide for their government by paying the money to carry it on, or else give them an opportunity to run their government on the resources which they can easily run it on if they are given any sort of freedom.

I shall vote against this amendment; but fearing that that vote might reflect a want of sympathy for the people of Alaska, I felt it necessary to give this expression to my views on the

Mr. CHAMBERLAIN. Mr. President, I am in cordial sympathy with the Senators who have expressed themselves in favor of opening up at least a part of the resources of Alaska to the people of this country, and I am usually in sympathy with the arguments of the Senator from Washington along this line. But I can not agree with him in reference to this particular amendment, for the reason that the Government of the United States appropriates quite largely for the support and maintenance of the government of Alaska. It makes contributions to its support which it does not make to any of the other States or Territories generally, and the money that might come to the Treasury through the imposition of this income tax would practically go back to Alaska again. So there is no particular reason why this amendment should be favored at this time.

I wanted to state this much, because I am not voting against the amendment because I am not in sympathy with the people of that country. Besides that I doubt very much if there are men in Alaska who have incomes generally that would be taxable under this provision. Those who have the largest interest in Alaska, those who have reaped the harvest from the resources of Alaska, are men who live principally in the United States proper, and many of them in the State of New York.

So I do not think there is any reason for the adoption of the

amendment.

The PRESIDING OFFICER. The Senator from Washington demands the yeas and nays on agreeing to the amendment offered by him.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I announce my pair the same as on the previous roll call, and withhold my vote. If I were at liberty to vote, I would vote "nay."

Mr. GALLINGER (when his name was called). I have a general pair with the junior Senator from New York [Mr. O'GORMAN], which I transfer to the junior Senator from Maine

[Mr. Burleigh], and vote "yea."

Mr. McCUMBER (when Mr. Gronna's name was called). My colleague [Mr. Gronna] is necessarily absent. He is paired with the junior Senator from Illinois [Mr. Lewis]. I will allow

this announcement to stand for the day.

Mr. McCUMBER (when his name was called). I have a general pair with the senior Senator from Nevada [Mr. NEWLANDS].

He being absent I will withhold my vote.

Mr. REED (when his name was called). I am paired with the senior Senator from Michigan [Mr. SMITH]. If permitted to vote, I would vote "nay."

Mr. THOMAS (when his name was called). I transfer my

general pair with the senior Senator from Ohio [Mr. Buston] to the Senator from Oklahoma [Mr. Gore] and vote "nay."

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Wisconsin [Mr. Steph-ENSON]. This announcement will stand for the day.

Mr. WARREN (when his name was called). I am paired

with the senior Senator from Florida [Mr. Fletcher]. I therefore withhold my vote.

The roll call was concluded.

Mr. BRYAN. I wish to announce that my colleague [Mr. FLETCHER] is necessarily absent on public business.

Mr. MYERS. Has the Senator from Connecticut [Mr. Mc-LEAN] voted?

The VICE PRESIDENT. He has not.

Mr. MYERS. I am paired with that Senator and withhold my

Mr. REED. I transfer my pair to the Senator from Oklahoma [Mr. OWEN] and vote "nay."

Mr. LA FOLLETTE. I was requested to announce that the junior Senator from Minnesota [Mr. CLAPT] is unavoidably detained from the Senate. If present, he would vote "yea" on

Mr. WILLIAMS (after having voted in the negative). just learned of the absence from the Chamber of the Senator from Pennsylvania [Mr. Penrose], with whom I have a pair. I voted a moment ago. I want now to transfer my pair with

the Senator from Pennsylvania to the Senator from Nebraska [Mr. HITCHCOCK], and let my vote stand.

The result was announced—yeas 28, nays 3%, as follows: YEAS-28.

Borah Bradley Brady Bristow Catron Clark, Wyo. Colt	Crawford Cummins Dillingham Fall Gallinger Jones Kenyon	La Follette Lodge Nelson Norris Oliver Page Poindexter YS—38.	Root Sherman Smoot Sterling Sutherland Townsend Weeks

So Mr. Jones's amendment was rejected. Mr. WILLIAMS. In behalf of the committee and in behalf of the Senator from Arkansas [Mr. CLARKE], I as: that the provision which I understand the Secretary is about to read, from line 18, on page 207, be passed over until Monday next, as the Senator from Aikansas wishes to speak upon it.

Mr. SIMMONS. If the Senator from Mississippi will pardon me, the Senator from Arkansas wishes section 3, on page 210,

Mr. WILLIAMS. 'All right. We have not reached that.

Mr. CLARKE of Arkansas. In connection with the statement of the chairman of the committee, I will say that on Monday next I will submit some observations in support of that propo-

The next amendment of the committee was, on page 207, after line 17, to insert:

line 17, to insert:

O. That for the purpose of carrying into effect the provisions of Section II of this act, and to pay the expenses of assessing and collecting the income tax therein imposed, there is hereby appropriated, out of any money in the Treasury not otherwise appropriated for the fiscal year ending June 30, 1914, the sum of \$1,200,000, and the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is authorized to appoint and pay from this appropriation all necessary officers, agents, inspectors, deputy collectors, clerks, messengers, and janitors, and to rent such quarters, purchase such supplies, equipment, mechanical devices, and other articles as may be necessary for employment or use in the District of Columbia or any collection district in the United States, or any of the Territories thereof: Provided, That no agent paid from this appropriation will receive compensation at a rate higher than that now received by traveling agents on accounts in the Internal-Revenue Service, and no inspector shall receive a compensation higher than \$5 a day and \$3 additional in lieu of subsistence, and no deputy collector, clerk, messenger, or other employee shall be paid at a rate of compensation higher than the rate now being paid for the same or similar work in the Internal-Revenue Service.

Mr. WILLIAMS. I move to strike out the word "will," after

Mr. WILLIAMS. I move to strike out the word "will," after the word "appropriation," in line 8, on page 208, and substitute the word "shall."

The amendment to the amendment was agreed to.

Mr. BORAH. In line 15, on page 208, after the word "Service," I submit the following amendment.

The VICE PRESIDENT. The amendment will be read.

The SECRETARY. On page 208, at the end of line 15, after the word "Service," insert:

word "Service," insert:

It shall be the duty of the Commissioner of Internal Revenue to report annually to Congress full statistics as to the results of the income tax, which statistics shall show:

(a) The amounts collected in each taxing district.

(b) The number of persons contributing to the tax.

(c) The amounts allowed for exemptions.

(d) A classification of the income-tax payers in each district according to occupation.

(e) A classification of the taxpayers in each district and in the country at large according to the amount of income assessed to each.

(f) A classification of sources of income so far as shown by the returns.

country at large according to the amount of income as shown by the (f) A classification of sources of income so far as shown by the returns.

(g) A detailed statement of amounts and kinds of income collected at the source.

(h) A classification of the amounts claimed and allowed as deductions, and such other information as he may deem pertinent and necessary.

Such report shall be made and filed on or before the third Monday of November of each year, beginning with the year 1914.

Mr. BORAH. Mr. President, I do not desire to take up the time of the Senate in discussing this amendment, but it is apparent upon the face of the amendment what is the object to be attained. It is to gather data for our intelligent action with reference to formulating an income-tax law. It will enable us also, if we desire, to take up the subject in the future of differentiating as to carned and unearned incomes, and so forth. At any rate it will give us that which we have not now and which the English people acquired only after a long investigation.

I submit the amendment for the consideration of the Senate. Mr. WILLIAMS. Mr. President, the committee had this identical provision before it. It was suggested by somebody down in the department and we went through with it. seemed to us that it was not necessary to provide for all this annual expense in the shape of a report that perhaps would not be read. The information will be there; it can be obtained at any time by a resolution of either House upon the request of a Senator or Representative if he wants any particular part of the information. These rolls are made public rolls for certain purposes.

After a full consideration of it we concluded that it was better to leave that out of the bill at this time. Of course the object of it is purely statistical. We have all sorts of statistical bureaus all around everywhere, and we did not see any use of establishing another one. The main result of it would be to establish a new bureau with a new man at the head of it— I started to say earning-receiving probably \$5,000 a year.

Mr. BORAH. I do not ask for any appropriation nor the creation of any bureau nor the appointment of persons for any extra services, but there is enjoined upon the collector of internal revenue the duty of classification, which he can do if he is required to do it by a very little additional expenditure.

Mr. WILLIAMS. I understand that; but the Senator must

understand that this great report, with all its classifications and complications, must be made every year upon a new com-putation of incomes, and there would have to be a bureau and

a lot of clerks provided.

If there is any particular information concerning the income tax, as to how many people there are paying incomes, for example, between \$20,000 and \$50,000 or between \$50,000 and \$100,000, or how many people there are paying incomes accruing purely and altogether from personal service, or anything of that sort, it could be obtained without keeping this bureau in constant operation and all this immense expense and creating a new bureau.

Mr. SMITH of Arizona. The record will necessarily show the

Mr. WILLIAMS. The record will necessarily show the fact, and anybody having access to the record can ascertain the fact. Mr. BORAH. The record will not show the fact at all.

Mr. WILLIAMS. Wait a minute. This morning, even, a couple of amendments were put upon the bill which gives access now for statistical purposes to the officers of the United States Government, giving the officers of the States upon the request of the governor access so that they could prepare statistical returns from the material in the office of the Commissioner of Internal Revenue attained in the process of administering this law.

Mr. BORAH. Mr. President, I will not urge any information

upon the majority side that they do not desire.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Idaho [Mr. BORAH].

The amendment was rejected.

Mr. BORAH. Now, I want a yea-and-nay vote on the amendment following.

Mr. SMOOT. That is a part of the committee amendment, but it has not yet been read.

The VICE PRESIDENT. It is a part of the original amendment.

Mr. BORAH. I refer to that portion of the amendment beginning on line 16 on page 208 and ending with the word "appointment," in line \$2 on page 209.

The Secretary read the remainder of the amendment of the

committee, as follows:

committee, as follows:

For the administration, in the Internal Revenue Bureau at Washington, D. C., of this act in the collection of the tax aforesald there shall be appointed one additional deputy commissioner, at a salary of \$4,000 per annum; two heads of divisions, whose compensation shall not exceed \$2,500 per annum; and such other clerks, messengers, and employees, and to rent such quarters and to purchase such supplies as may be necessary: Provided, That for a period of two years from and after the passage of this act the force of agents, deputy collectors, and inspectors authorized by this section of this act shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, and without compliance with the conditions prescribed by the act entitled "An act to regulate and improve the civil service," approved January 16, 1883, and amendments thereto, and with such compensation as the Commissioner of Internal Revenue may fix, with the approval of the Secretary of the Treasury, within the limitations herein prescribed: Provided further, That no person now in the classified service who shall be appointed an agent, deputy collector, or inspector shall lose his civil-service status because of such appointment.

Mr. LODGE. I move to strike out from the amendment just read the first proviso. That proviso, of course, is a perfectly unvarnished attempt to take all these offices out of the classified service and make them the subject of political appointment and personal favoritism. The registers of the civil service contain an ample number of persons competent to fill the places mentioned here. They are people, both men and women, who have taken the examinations in good faith, believing that when the services of clerks were needed they would have their opportunity. It is a much quicker and better way, and you get a better class of clerks.

Mr. ROOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Smith, Ga. Smith, Md. Smith, S. C. Smoot Sterling Sutherland Swanson Thompson Tillman Townsend Hitchcock Hollis Hughes James Johnson Jones Ashurst Oliver Onver Owen Page Perkins Pittman Poindexter Bacon Bankhead Borah Brady Brandegeo Jones Kenyon La Follette Lane Lodge McCumber McLean Martin, Va. Martine, N. J. Myers Norris Bristow Bryan Catron Chamberlain Chilton Clark, Wyo. Poindexter Pomerene Ransdell Robinson Root Saulsbury Tillman Townsend Vardaman Warren Weeks Williams Works Shafroth Sheppard Sherman Shively Simmons Colt Crawford Cummins Dillingham Gallinger Smith, Ariz.

The VICE PRESIDENT. Sixty-seven Senators have an-

swered the roll call. There is a quorum present.

Mr. LODGE. Mr. President, I will repeat what I said. This proviso which I move to strike out arranges for the giving of these additional offices, made necessary by the addition to the work of the Internal-Revenue Bureau, over to political and personal favoritism, and sets aside the act of 1883 under which the civil service was first classified.

Mr. SIMMONS. Mr. President-

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from North Carolina?

Mr. LODGE. Certainly.

Mr. SIMMONS. I think the Senator from Massachusetts made his statement a little too broad when he said that the proviso provides that all the officers authorized to be appointed for the enforcement of this section of the bill shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. If the Senator will examine the language he will see that applies only to agents, deputy collectors, and inspectors.

Mr. LODGE. I am aware of that. I should have said the

more important offices.

Mr. SIMMONS. His statement was very broad.
Mr. LODGE. Many of them are agents, inspectors, and deputy collectors. I suppose under the wording of the section that only those mentioned in the proviso are thrown out of the service.

Mr. SIMMONS. I think that is true.

Mr. LODGE. I do not question that. Mr. SIMMONS. I want to state to the Senator-

Mr. LODGE. If I said all the officers, without exception, of course my statement was too broad.

Mr. SIMMONS. I want to state to the Senator that I think he will find in that respect this provision is an exact copy, or very nearly an exact copy, of the provision for the appointment of officers under the denatured-alcohol act, which was passed by the minority party only a few years ago when they were in the majority. As in that act so in this act, the authority of the Secretary of the Treasury to appoint is limited to two years.

Mr. LODGE. Mr. President, that may be the case; but I do not think that two wrongs make a right. These positions can all be filled perfectly well from the civil-service registers.

Mr. SMITH of Georgia. I should like to ask the Senator from Massachusetts if it is not true that there is a special examination required for each State, and is it not further true that in many of the States the registers are not now filled and that the new collectors do not find men upon them eligible for

appointment as deputies?

Mr. LODGE. Mr. President, there are plenty of names on the registers to fill such places as these-an abundance of them.

Mr. SMITH of Georgia. I will state to the Senator that in my own State the collector had to get authority to appoint temporary deputies because there were only six on the list of eligibles in the State, and four of them had other positions and did not want the small salary of about \$1,200 that a deputy

They can be sent from here perfectly well. .There is no difficulty in filling the places; none whatever.

Mr. SIMMONS. I think, as a matter of fact, if the Senator will pardon me, that not only in the State of Georgia but in a great many other States, if not in all of the States, they are now holding examinations for applicants for positions in the Internal-Revenue Service. I know they have held examinations during this month and also in July in my State.

Mr. BRISTOW. Mr. President, I want to call the attention of the Senator from Massachusetts [Mr. Lodge] to the wording of the provision here; doubtless he has noticed it, but I

want to read it. It is as follows:

That for a period of two years from and after the passage of this act the force of agents, deputy collectors, and inspectors authorized by this section of this act shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, and without compliance with the conditions prescribed by the act entitled "An act to regulate and improve the civil service," approved January 16, 1883, and amendments thereto.

It is not left discretionary with the President or with the Secretary of the Treasury as to whether they may take these employees from the civil-service rolls, but it forbids them

Mr. LODGE. I was about to call attention to that point, but I am very glad the Senator from Kansas has done so. This makes it impossible for two years to put anyone into the service

from any eligible list now or hereafter to be made.

Mr. President, at the time of the Spanish-American War, on the ground of immediate emergency, a large additional force of clerks was authorized without requiring a civil-service examination. It took longer to fill the places in that way than it would have done if the heads of departments had gone to the register; but emergency was made the ground of the change. As a result they got, as was the testimony of all the departments, an inferior class of clerks.

Of course, Mr. President, the object is simply to make political a certain number of positions commanding a fair salary. There is no other purpose in it. I think it a bad thing to break down the civil-service act in that way; but I do not want to take the time to argue here what has been argued again and again—the general question of the civil service. I think, however, this is a thoroughly bad provision. I move to strike it out; and on that motion I ask for the yeas and nays.

I also ask leave, Mr. President, to insert in the RECORD some brief letters from chambers of commerce in Massachusetts and in Ohio and from the civil-service reform associations—the National association and State associations—of Massachusetts, All only association and state associations of massacraticates. Illinois, and other States. All the statements are brief, and I should like to have them printed with my remarks.

The VICE PRESIDENT. Without objection, permission to

do so is granted.

The papers referred to are as follows:

Hon, HENRY CABOT LODGE, United States Senate, Washington, D. C.

United States Senate, Washington, D. C.

Dear Sir: At the last meeting of the executive committee of the Worcester Chamber of Commerce it was voted that the Worcester Chamber of Commerce it was voted that provision of the Simmons-Underwood tariff bill as reported by the Senate Committee on Finance, which provides for the employment of agents, inspectors, deputy collectors, etc., required to enforce the income-tax law without requiring said officials to comply with the provision of the civil-service law.

The Worcester Chamber of Commerce is of the opinion that all the officials used by the Federal Government in the enforcement of this law should be certified by the Civil Service Commission exactly the same as all other officials are, this organization being informed that said Civil Service Commission has upon its registers a full complement of eligibles from whom selection can be made for these positions.

Any attempt to discriminate in favor of these employees is directly contrary to the spirit of the civil-service laws and is calculated to pave the way to further inroads upon a system which is now in general and satisfactory operation in this country. There appears to this organization to be no reason for making exception in this instance and in behalf of the Worcester Chamber of Commerce we desire to respectfully protest against any such exceptions being made.

For the Worcester Chamber of Commerce we desire to respectfully protest against any such exceptions being made.

For the Worcester Chamber of Commerce we desire to Commerce,

FALL RIVER CHAMBER OF COMMERCE, Fall River, Mass., August 9, 1913.

Hon. Henry Cabot Lodge, United States Senate, Washington, D. C.

Dear Sir: I am inclosing herewith a copy of a protest sent by vote of the Fall River Chamber of Commerce to the Hon. Furnifold McL. Simmons, chairman of the Senate Committee on Finance, and relating to the provision of the Simmons-Underwood bill, by which a large force of agents, inspectors, and deputy collectors are to be employed without complying with the provisions of the civil-service law.

May we ask your efforts in preventing the passage of this provision?

Very truly, yours,

William A. Hart. Secretary.

WILLIAM A. HART, Secretary.

FALL RIVER, MASS., August 9, 1913.

Hen. Furnifold McL. Simmons, Chairman Senate Committee on Finance, Washington, D. C.

Chairman Senate Committee on Finance, Washington, D. C.

Dear Sir: The Fall River Chamber of Commerce, by vote of its directors, desires to enter its protest against the provisions in amendment O of the Simmons-Underwood tariff bill, H. R. 3321, allowing for the employment of a period of two years of agents, inspectors, deputy collectors, etc., without complying with the provisions of the civil-service law. We believe that this arrangement is a serious step backward from the merit system now satisfactorily established in this country, and at the same time contrary to the protestations of the platforms of all three of the great parties in the recent national election. It is our belief that all appointments provided for in the bill should be made under the civil-service law, and we trust that this provision will not prevail. prevail, Very truly, yours,

THE FALL RIVER CHAMBER OF COMMERCE, WILLIAM A. HART, Secretary.

CLEVELAND CHAMBER OF COMMERCE, Cleveland, August 18, 1913.

Hon. Henry Cabot Lodge, Committee on Finance, United States Senate, Washington, D. C.

Washington, D. C.

Dear Sir: On behalf of the Cleveland Chamber of Commerce I urge upon your attention the undesirability of those portions of amendment O (pp. 207-209) of the Simmons-Underwood tariff bill, as reported by the Senate Committee on Finance, providing for the employment for a period of two years of a considerable number of agents, deputy collectors, and other employees without compliance with the provisions of the civil-service law.

As we understand this provision, it is a step backward in the efficient operation of the Government service, in addition to the immediate effect of placing the actual duties to be performed, duties of the greatest significance and importance, in the hands of political employees. We agree with the National Civil Service Reform League in believing that inefficiency and friction in the administration of law would be the inevitable result.

If we are correctly informed, the Civil Service Commission has upon its register a full complement of eligibles from whom selection could be made for these positions. It seems to us that the regulation is in violation of the spirit of the Democratic, Progressive, and Republican Party platforms.

Very respectfully, yours,

W. S. Hayden, President.

THE WOMEN'S AUXILIARY OF THE MASSACHUSETTS CIVIL SERVICE REFORM ASSOCIATION, Boston, August 1, 1913.

Hon. Henry Cabot Lodge,
United States Senate, Washington, D. C.

Dear Senator Lodge: On behalf of the 1,100 members of the Women's Auxiliary of the Massachusetts Civil Service Reform Association I desire to express our earnest hope that you will use your utmost influence to secure the striking out of the clause under amendment O in the Simmons-Underwood tariff bill which permits the appointment of a large force of agents, inspectors, collectors, etc., outside the civil-service law.

To exempt these positions from the supervision of the Civil Service Commission will make possible appointments for political or personal motives instead of on the basis of merit, and thus will seriously handicap the work of enforcing the income-tax act. Such a backward step is especially to be deplored at a time when public sentiment so strongly favors economy and efficiency for the Nation.

Yours, respectfully,

Marian C. Nichols, Secretary.

MARIAN C. NICHOLS, Secretary.

SPOILS RAID IN THE TARIFF BILL.

SPOILS RAID IN THE PARTY BILL.

[Memorandum of the National Civil Service Reform League in opposition to paragraph O of section 2 of the tariff bill (H. R. 3321).]

NATIONAL CIVIL SERVICE REFORM LEAGUE,

New York, July 24, 1913.

To the Members of the Senate and the House of Representatives:

New York, July 24, 1213.

To the Members of the Senate and the House of Representatives:

The tariff bill (H. R. 3321) as introduced in the Senate provides for the employment for the period of two years of a large force of agents, inspectors, deputy collectors, etc., without complying with the provisions of the civil-service law. This provision is found in amendment 0 (pp. 207-209) appropriating \$1,200,000 for salaries and supplies required to enforce the income-tax law. The provision referred to in full is as follows:

"Provided, That for a period of two years from and after the passage of this act the force of agents, deputy collectors, and inspectors authorized by this section of this act shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, and without compliance with the conditions prescribed by the act entitled 'An act to regulate and improve the civil service,' approved January 16, 1883, and amendments thereto, and with su@n compensation as the Commissioner of Internal Revenue may fix, with the approval of the Secretary of the Treasury, within the limitations herein prescribed: Provided further, That no person now in the classified service who shall be appointed an agent, deputy collector, or inspector shall lose his civil-service status because of such appointment."

We can find nowhere in the report of the Committee on Finance, as printed in the Congensional Recond, any reasons stated why this large force should be recruited outside the civil-service law. The only excuse for such a provision would be inability on the part of the Civil Service Commission to supply an adequate force within a reasonable time, but we are informed by the commission that it has upon its registers a full complement of eligibles from whom selection could be made for these positions. In view of the lack of any necessity for going outside the eligible lists to make these appointments this provision in the bill is a gross injustice to those who have taken the examinations

and ill-advised provision in the sundry civil appropriation bill of last year allowing temporary appointments in the Pension Office for a period of one year. At the time of the Spanish War emergency and in the face of full lists of eligibles a large force was appointed without regard to the civil-service rules. Before the lapse of any considerable time it was shown that this force was distinctly inferior in capacity to the regular civil-service employees, yet by subsequent legislation they were covered into the classified service.

This proposed legislation is an attempt to secure patronage at the expense of the merit system and is contrary to the civil-service planks in the platforms of the three great parties. The plank in the Democratic platform favored the enforcement of the civil-service law to the end that "merit and ability should be the standard of appointment and promotion rather than service rendered to a political party." The Progressive Party went on record as in favor of "the enforcement of the civil-service law in letter and spirit," while the Republican Party "stands committed to the maintenance, extension, and enforcement of the civil-service law."

We therefore ask your assistance in preventing any such spoils raid as is proposed in the tariff bill and in upholding by your vote the principles of your party that the subordinate civil service should be absolutely withdrawn from politics. We sincerely hope that you will refuse to record your vote in favor of this particular provision of the tariff bill.

Very respectfully, yours,

ROBERT D. JENKS,
Chairman of the Council,
George T. Keyes.

ROBERT D. JENKS, Chairman of the Council. GEORGE T. KEYES, Assistant Secretary.

NATIONAL CIVIL SERVICE REFORM LEAGUE, New York, July 26, 1913.

NATIONAL CIVIL SERVICE REFORM LEAGUE,

New York, July 26, 1915.

Hon. Henry Capot Lodge,
United States Senate, Washington, D. C.

My Dear Sir: Permit me to acknowledge receipt of your letter of the 25th instant addressed to Mr. Jerks as chairman of the council. We are very glad to learn that you are opposed to the provision in the tariff bill excepting from competition the large force of inspectors, deputy collectors, etc., required to enforce the income-tax act. In case you feel willing to speak against this proposal on the floor of the Senate, I take the liberty of presenting further arguments on this matter. As stated in our circular of recent date, the registers of the Civil Service Commission contain sufficient eligibles who can be immediately certified for appointment. The experience of the Civil Service Commission shows that little inconvenience is occasioned to the departments in supplying large numbers of employees. It is a misconception that it requires red tape and delay to set the machinery of the commission in motion. Hundreds of appointments can be made from the registers in a few hours, and it only remains to send printed letters of appointment to the persons chosen. For example, when the Record and Pension Office was created 140 persons were appointed in one day.

The civil-service rules also make ample provision for the transfer of trained employees from other parts of the service. In the organization of the Department of commerce and Labor exceptions were found to be unnecessary, as that department was able to secure employees with the necessary qualifications by transfer.

The rules further allow unusual latitude in the organization of a new department. Legislation is unnecessary, as the President may make such exception from examination as he may deem wise. The proposal to exempt positions by law is opposed to the declared policy of the Senate Committee on Civil Service Retrenchment. In a report of March 9, 1898, this committee agreed that the "Executive has the power to make such modificati

Assistant Secretary.

CIVIL SERVICE REFORM ASSOCIATION OF CHICAGO, Chicago, July 25, 1913.

Hon. Hener Cabot Lodge, Member of Finance Committee, United States Senate, Washington, D. C.

DEAR SIR: We beg to direct your attention to the inclosed protest against amendment 0 to the tariff bill (H. R. 3321).

We urge you to use every proper influence to defeat this attack on civil-service principles.

Respectfully, yours,

R. E. BLACKWOOD,

Recretary

R. E. BLACKWOOD, Secretary.

CIVIL SERVICE REFORM ASSOCIATION OF CHICAGO, Chicago, July 25, 1913.

To the Hon. F. McL. SIMMONS, Chairman, and the members of the Finance Committee of the United States Senate:

The Illinois and Chicago Civil Service Reform Associations in joint session vigorously protest against provisions in amendment O to the tariff bill (H. R. 3321, pp. 207-209) for the employment for a period of two years of a large force of agents, inspectors, deputy collectors, etc., without complying with the provisions of the civil-service law, because.

because—
It is in direct violation of the spirit of the civil-service law.
Hundreds of persons would be employed upon a spoils basis.
The Civil Service Commission stands ready to certify persons to be employed in enforcing the income-tax law.
To fill the positions by other than persons whose names appear on the eligible lists would be an injustice to those who have qualified by tests for such work.
Experience has shown that employees obtained in this manner are inferior in efficiency to those obtained through the operation of civil service.

We protest against spoils and urge that this amendment be defeated the interests of merit and efficiency.

Respectfully,

WILLIAM B. HALE.

WILLIAM B. HALE. Chairman of Joint Meeting. R. E. BLACKWOOD, Secretary.

GENERAL FEDERATION OF WOMEN'S CLUBS, July 26, 1913.

Hon. Henry Carot Lodge,

United States Senate, Washington, D. C.

Dear Sir: The civil service reform committee of the General Federation of Women's Clubs, an organization representing a million women, respectfully urges that you use your vote and influence to defeat that provision of amendment O of the Simmons-Underwood tariff bill which would permit the appointment of agents, inspectors, deputy collectors, etc.. without civil-service examinations.

The General Federation of Women's Clubs believes that efficiency and economy in government can be obtained only through the enforcement of the civil-service law.

Yours, respectfully,

Imogen B. Oakley,

Chairman.

WATERTOWN, MASS., July 29, 1913.

WATERTOWN, MASS., July 29, 1913.

To the Hon. Henry Cabot Lodge,
Senate Chamber, Washington, D. C.

Sir: The Massachusetts State Federation of Women's Clubs takes this opportunity to appeal to you to use your influence against the passage of amendment O of the Simmons-Underwood tariff bill (H. R. 3321). The proposed legislation is not only contrary to the interests of the public service but is diametrically opposed to the civil-service planks in the platforms of the three great political parties.

May we depend upon you to do all in your power to prevent the passage of this measure?

Yours, truly,

Mabel Rogers Tabor,
Chairman Civil Service Reform Department.

Mabel Rogers Tabor, Chairman Civil Service Reform Department.

NEWTON, MASS., August 4, 1913.

Hon. HENRY CABOT LODGE, Senate, Washington, D. C.

Senate, Washington, D. C.

Dear Sir: The Simmons-Underwood tariff bill (H. R. 3321), as reported to the Senate, provides for the employment for a period of two years of a large force of agents, inspectors, deputy collectors, etc., who are to be appointed without civil-service examinations. This provision is under amendment O, appropriating \$1,200,000 for salaries and supplies required to enforce the income-tax act.

On behalf of the Newton Branch of the Women's Auxiliary of the Civil Service Association, I take the liberty of writing you to urge you to use your influence against, and if necessary to vote against, this measure so diametrically opposed to the spirit of civil service reform.

reform.

I thank you for the interest I am sure you will take in a matter so vital to the improvement of the public service, and remain, dear sir,

Very respectfully, yours,

Marion A. (Mrs. Charles H.) Buck,

Chairman of the Newton Branch.

MANCHESTER, MASS., July 30, 1913.

Manchester, Mass., July 30, 1913.

Hon. Henry Carot Lodge,
United States Senate, Washington, D. C.

Dear Senator Lodge: May I call your attention to the provision in the House of Representatives bill 3321 (the Simmons-Underwood tariff bill) for the employment for a period of two years of a large force of agents, inspectors, deputy collectors, etc., without complying with the provisions of the civil-service law?

Of course, I know you would not approve of this in general, but may I bring to your notice the fact that during the War with Spain the War Department was given the power to make appointments outside the civil-service law, under the piea of emergency, and that, as a matter of fact, it took longer to make these appointments than it would have taken under the civil-service rules, as the commission had then, as it also has now, a large number of eligibles fitted for these positions? Furthermore, it was later found out and reported by the War Department itself that the appointees made in this way were inferior on the average to those that had been sent in by the Civil Service Commission, and that a large proportion of these patronage appointments proved so undesirable that fully 50 per cent had to be changed.

With kind regards, believe me,

Sincerely, yours,

RICHARD HENRY DANA.

Mr. ROOT. Mr. President, I do not think the question raised

Mr. ROOT. Mr. President, I do not think the question raised by the amendment the Senator from Massachusetts [Mr. Longe] proposes can be disposed of by any reference to so trifling a matter as providing for the statute regarding denatured alcohol. We are now entering upon a new system of Government finance, a new system of raising the revenues for the support of the Government of the United States. It is a vast undertaking; it will involve the cooperation of an enormous number of Government employees; and the question raised is whether in this new departure, in the adoption of this new system of Government finance, we are to repudiate the existing civil-service system. Are the revenues of the Government of the United States hereafter to be raised and administered without reference to the hitherto established policy of the United States in regard to civil-service appointments? No reason has been given or can be given for inaugurating this new system with a return to the old method of-making appointments without reference to merit, without selection upon examination, which will not continue to apply to the continuance of the system.

Mr. President, we have had here an exhibition not equaled in recent years of legislation through the method of party government. It is not my purpose to criticize the method adopted by the Democratic Party in securing the full force of its party membership in the Senate by means of caucus action; but, sir, the exercise of the power of party government involves party responsibility, and I beg my friends upon the other side of the Chamber to realize that their action upon the method of constituting this new force for collecting the revenues of our Government will be the test-they can not avoid its being made the test-of the sincerity of the Democratic Party in its professions of adherence to the principles of civil-service reform. If they reject this amendment and insist upon the method they propose here of constituting this new force, they must be held to be insincere in the professions they have made and to have abandoned the merit system in American politics.

Mr. STERLING. Mr. President, assuming that the effect of striking out the committee provision would leave these appointments to be made under the civil-service law and rules, I take occasion now to submit a few remarks, although I had myself prepared and introduced an affirmative amendment requiring the appointments to be made in accordance with the civil-service

It was my privilege, Mr. President, a few weeks ago to present to the Senate and to have printed in the RECORD the protest of the National Civil Service Reform League against the last paragraph of section O of the committee amendment to the income-tax portion of the bill. The Civil-Service Reform League in its protest states what must be obvious to every Senator here, namely, that nowhere in the report of the Committee on Finance is any reason stated why this large force of deputy collectors, inspectors, and agents should be recruited outside the civil-service law; that the only excuse for disregard of the civil-service law would be the inability on the part of the Civil Service Commission to supply an adequate force within a reasonable time; that instead of this being the situation it is the contention of the league that the Civil Service Commission has now on its registers a full complement of eligibles from

whom selection could be made for these positions.

Mr. SMITH of Georgia. I ask the Senator from South Dakota what authority he has for that statement? Are the Civil Service Commission not limited in the appointments?

Mr. STERLING. If the Senator from Georgia will indulge

me, I will produce

Mr. SMITH of Georgia. Are they not limited in the appointments to the States in which the examination is taken and to the districts in which the examination was had?

Mr. LODGE and others. No. Mr. STERLING. I think not. Mr. SMITH of Georgia. They are.

Mr. LODGE. They can be sent from Washington.

Mr. SMITH of Georgia. On the contrary, I was advised by the Civil Service Commission that they are limited to men from the States and to the registers from the States.

Mr. LODGE. I think if they will open the examinations in the State of Georgia there will be plenty of excellent young men and women who will take those examinations and fill any vacancies before this bill goes into operation.

Mr. SMITH of Georgia. I do not think that a young man just out of high school is fit for one of these places.

Mr. LODGE. That is the old argument.

Mr. SMITH of Georgia. I will later impress it a little

Mr. STERLING. It is further shown, in view of the fact that we have the services of this commission, that it will be a gross injustice to go outside the eligible lists and appoint persons to these places who have never taken any examination or qualified themselves for the positions in accordance with law and custom; that the number of clerks whose appointments are thus thrown open to political influences will run into the hundreds; that Congress could continue their appointment by further legislation at the end of the two-year period; and that Congress would be importuned at the end of that period to grant an extension of employment or to cover all the appointments made thereunder into the classified service. I think we have already some examples of that. It is further contended that the proposed legislation is an attempt to secure patronage at the expense of the merit system, and that it is contrary to the civil-service planks of the platforms of the three great parties, and, I might say, notably of the Democratic Party during the last several campaigns

The communication from the league is otherwise vigorous in its protest against this disregard of the law and the evident will of the people, as that will has been truly expressed, I

think, in the several party platforms.

Some of the most distinguished citizens of our country are Their numbered among the officials of this great reform league. names appear on the face of the communication which I presented on July 25. They are the names of men distinguished for their great services in the cause of education, in the cause of literature, in the cause of jurisprudence, and in the cause of good government.

I am now, and have always been, in full sympathy with the purpose sought to be accomplished by the Civil Service Reform League and with the protest against this, as it appears to me, Dakota? The Chair hears none.

flagrant and needless violation of the principles of civil-service reform. So it was that on the day after presenting this communication I submitted the amendment to which I have referred, and which I think is rendered needless perhaps by the amendment offered by the Senator from Massachusetts [Mr. Lodge].

First, as to the necessity of the amendment proposed by the committee. My remarks, Mr. President, are largely for the purpose of submitting a record on which this vote may be taken.

The evidence at hand shows there is absolutely no necessity for this proposed method-this return to the spoils system. It will not be even a matter of convenience, let alone necessity, for the appointment of these hundreds of employees to be made in the manner proposed by the committee instead of according to civil-service rules. The "convenience," as I shall show conclusively, is all in favor of recourse to the law instead of the proposed provision here, which, for the purpose of these appoint-

ments, abrogates the law.

Here is our Civil Service Commission; the examinations have been had under it; men have answered to the test of ability and merit required; their names are now on the list of eligibles for the performance of these duties in the investigation of incomes and the collection of the income tax. If in the face of these facts the majority of this Senate are in favor of sustaining this committee amendment, it will be obvious that the purpose is purely political and partisan. The majority might well take warning, too, that the country will take note that such is the purpose.

But, adverting to the proofs, I send to the desk to be read by the Secretary a letter received from Hon. John A. McIlhenny, president of the Civil Service Commission, of date August 5. showing what the commission will be able to do in supplying

these various positions.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

UNITED STATES CIVIL SERVICE COMMISSION, Washington, D. C., August 5, 1913.

Hon, THOMAS STERLING, United States Senate.

United States Senate.

Senator: At the request of Mr. George T. Keyes, assistant secretary of the National Civil Service Reform League, the commission has the honor to advise you that there are ordinarily a sufficient number of eligibles at all times on first-grade registers of the commission available for certification for filling classified positions in the Internal-Revenue Service, such as deputy collectors, clerks, etc. Mr. Keyes calls attention to the provision in the tariff bill for the employment, for a period of two years, of a large force of deputy beliectors, agents, and clerks to administer the income tax without complying with the provisions of the civil-service law, and to the amendment introduced by you eliminating this provision and providing that this large force of men shall be appointed in accordance with the provisions of the civil-service law.

Information was recently furnished the Treasury Department, showing the number of eligibles which would result from the annual first-grade examinations held throughout the United States in February, 1913. For many of the internal-revenue districts it was believed by the department that the register contained a sufficient number of eligibles to meet the needs of the service. In certain of the districts, however, the department advised that it was believed that additional examinations would be necessary. For this reason examinations were announced to be held throughout many of the internal-revenue districts of the United States on August 16, 1013 (in the internal-revenue district of Arkansas on Sept. 20, 1913). A list of these places is inclosed herewith, and it is trusted that this information will supply you with the facts desired.

Should the positions referred to in connection with the income-tax law be filled in accordance with the civil-service law, it would be nos-

facts desired.

Should the positions referred to in connection with the income-tax law be filled in accordance with the civil-service law, it would be possible to fill them not only from the registers referred to but also by transfer of competitive classified employees in the Internal-Revenue Service or other branches of the Federal service.

A copy of this letter will be sent to Mr. Keyes for his information. By direction of the commission:

Very respectfully,

John A. McIlhenny, President.

Mr. STERLING. Mr. President, I have here a list of the examinations held in various internal-revenue districts in several States of the country on the 16th of the present month. tion is made of one State where an examination will be held on the 20th of September next. The list is entitled and gives notice as follows:

Places at which the first-grade or clerical examination for the Internal-Revenue and other field services will be held on August 16, 1913.

Prospective applicants may secure application forms and pamphlets of instructions from the local board of civil-service examiners at the place at which examination is to be held.

Date of closing receipt of applications, August 11, 1913.

Without reading further, I ask that the list may be printed in connection with my remarks.

Mr. SMITH of Georgia. Is that a list of questions propounded at the examination itself?

Mr. STERLING. No; a list of places where the examina-

tions are to be held in the several internal-revenue districts of 18 States.

Mr. SMITH of Georgia. Very well.

The VICE PRESIDENT. Is there objection to printing in the RECORD the matter referred to by the Senator frou South The matter referred to is as follows:

The matter referred to is as follows:

The internal-revenue district of Alabama: Birmingham, Ala.; Greenville Miss.; Griport, Miss.; Hattiesburg, Miss.; Jackson, Miss.; Meridian, Miss.; Mobile, Ala.; Montgomery, Ala.; and Vicksburg, Miss.

The internal-revenue district of Arkansas (Sept. 20, 1913): Fort Smith, Harrison, Little Rock, Pine Bluff, and Texarkana.

The internal-revenue district of Connecticut: Bridgeport, Conn.; Hartford, Conn.; New Haven, Conn.; New London, Conn.; Newport, R. I.; Providence, R. I.; Stamford, Conn.; Waterbury, Conn.; and Williamatic, Conn.

The internal-revenue district of Florida: Cedar Keys, Gainesville, Jacksonville, Key West, Miami, Pensacola, Tallahassee, and Tampa.

The internal-revenue district of Georgia: Atlanta, Augusta, Columbus, Macon, and Savannah.

The internal-revenue district of Georgia: Atlanta, Augusta, Columbus, Macon, and Savannah.

Fifth internal-revenue district of Illinois: Galesburg, Peoria, and Rock Island.

Eighth internal-revenue district of Illinois: Bloomington, Danville, Decatur, Quincy, and Springfield.

Thirteenth internal-revenue district of Illinois: Cairo, Carbondale, East St. Louis.

Seventh internal-revenue district of Indiana: Evansville La Fayette, New Albany, Terre Haute, Vincennes.

Third internal-revenue district of Iowa: Ames, Cedar Rapids, Denison, Dubuque, Fort Dodge, Mason City, Sloux City, Spencer, Waterloo.

Fourth internal-revenue district of Iowa: Burlington, Council Bluffs, Creston, Davenport, Des Moines, Iowa City, Ottumwa.

Second internal-revenue district of Kentucky: Bowling Green, Hopkinsville, Owensboro, Paducah.

Sixth internal-revenue district of Kentucky: Covington.

Seventh internal-revenue district of Kentucky: Danville, Middlesboro, Richmond.

The internal-revenue district of Louisiana: Alexandria, New Orleans, Shreveport.

Eighth internal-revenue district of Kentucky: Danville, Middlesboro, Richmond.

The internal-revenue district of Louisiana: Alexandria, New Orleans, Shreveport.
Fourth internal-revenue district of Michigan: Escanaba, Grand Haven, Grand Rapids, Houghton, Kalamazoo, Manistee, Marquette, Muskegon, Sault Ste. Marie, Traverse City.

The internal-revenue district of Montana: Billings, Mont.: Boise, Idaho; Bozeman, Mont.: Butte, Mont.: Coeur d'Alene, Idaho; Great Falls, Mont.; Helena, Mont.: Idaho Falls, Idaho; Kalispell, Mont.; Lewiston, Idaho; Lewistown, Mont.: Livingston, Mont.; Logan, Utah; Miles City, Mont.; Missoula, Mont.; Livingston, Mont.; Logan, Utah; Pocatello, Idaho: Provo, Utah; Salt Lake City, Utah; Sandpoint, Idaho; Wallace, Idaho.

Fifth internal-revenue district of New Jersey: Newark, Perth Amboy. Fourteenth internal-revenue district of New York: Albany, Newburgh, Plattsburg, Troy.

Fourth internal-revenue district of North Carolina: Beaufort, S. C.; Charleston, S. C.; Columbia, S. C.; Durham, N. C.; Elizabeth City, N. C.; Georgetown, S. C.; Greensboro, N. C.; Greenville, S. C.; Newbern, N. C.; Raleigh, N. C.; Wilmington, N. C.

Fifth internal-revenue district of North Carolina: Asheville, Charlotte, Statesville, Winston-Salem.

Tenth internal-revenue district of Virginia: Fredericksburg, Newport News, Norfolk, Petersburg, Richmond.

Sixth internal-revenue district of Virginia: Abingdon, Alexandria, Charlottesville, Danville, Lynchburg, Roanoke, Staunton, Winchester.

The internal-revenue district of Wisconsin: Appleton, Fond du Lac, Green Bay, Kenosha, Milwaukee, Oshkosh, Rachne, Sheboygan.

Second internal-revenue district of Wisconsin: Appleton, Fond du Lac, Green Bay, Kenosha, Milwaukee, Oshkosh, Rachne, Sheboygan.

Second internal-revenue district of Wisconsin: Appleton, Fond du Lac, Green Bay, Kenosha, Milwaukee, Oshkosh, Rachne, Sheboygan.

Mr. GALLINGER. Mr. President, will the Senator yield to me for a moment's

The VICE PRESIDENT. Does the Senator from South Da-

Mr. STERLING. Certainly.

Mr. GALLINGER. Mr. President, what I have most complained of heretofore in connection with the civil service has been that hundreds and thousands of young men and women are summoned from their homes to take civil-service examinations, and, after passing and going on the eligible list, they never receive an appointment. It costs five or ten or fifteen or twenty dollars, perhaps, for each one, and they are flattered with the information that they have passed the examination. They remain on the list for one year without an appointment; then they are dropped from the list, and if they want to get on it

again, they are compelled to take another examination.

It seems possible that, anticipating this legislation, examinations have been held in the collection districts, and doubtless a large number of young men and young women have passed the examinations and are waiting for certification; and now it is calmly proposed to ignore this fact and make these appoint-

ments without reference to the civil-service law.

Mr. President, I think it is a violent thing to do. have not been a great admirer of the civil service as it has been administered in this country, in this particular instance it seems to me that it would be an injustice to the young men and the young women who have taken the examinations, and that it would be unpardonable on our part unless we rebuked it with our votes

Mr. STERLING. Mr. President, I quite agree with the Senator; and in connection with what he has said as to the number of applicants for these places or of persons taking the examination, I will say that on inquiry made of the Civil Service Commission this morning I found that, while they have not obtained returns from the examinations held on the 16th of August, the

estimate was that between 3,000 and 3,500 persons had taken the examinations.

Mr. President, the Civil Service Commission has communicated with the chairman of the Committee on Finance of the Senate in regard to this very situation, and he, the president of the commission, has kindly furnished me with a copy of the letter, without my having requested it. I desire to take the liberty of reading some extracts from that letter. The commission say to the Finance Committee:

mission say to the Finance Committee:

The commission is not informed of the reasons for these exceptions from the requirements of the civil-service act. If it is necessary in the organization of a new service that latitude be allowed in the selection of employees, the President has authority to make exceptions from examination. It has been found wise that this authority be exercised by the President, since he may adapt it to the varying exigencies of the service and avoid extensive and unnecessary exceptions, which in the past have resulted in the appointment of persons of inferior ability, causing the work to be unnecessarily prolonged and its cost increased. The ability of the majority of persons appointed on the basis of political favor is far below the average of persons appointed to like positions by promotion, transfer, or through competitive examinations, and if additional employees for this service may be appointed as needed by the established methods, with such modification as the President may make, better service will be secured and efficiency and economy promoted.

In the case of the Spanish War emergency employees, of 1,242 persons appointed without reference to the provisions of the civil-service law nearly one-half had to be dropped as useless, and not because of failure of appropriation or reduction in force, while those remaining were as a class distinctly inferior to those selected from competitive examination. The exception of the Spanish War emergency employees was made for the ostensible reason that the commission was not prepared to meet such an emergency.

such an emergency.

Just as has been intimated on the other side, the commission may not be prepared to meet an alleged emergency existing on the passage of this bill.

The commission said there was no need to depart from civilservice rules even then, great as that emergency was.

The letter continues:

The commission in its seventeenth report said:

"Never in the history of the commission were there so many names upon the eligible registers for all characters of positions necessary to carry on the increased work incident to the War with Spain as at that time; and, moreover, the commission had demonstrated its ability in times past to meet such emergencies.

Further, they say:

When positions are left to be filled without examination, the appointing officers are rarely left free to choose the best men.

The Internal Revenue Commissioner will be met with just that situation and just that condition, and if there are any subordinates under him who have recommending power or appointing power they will be confronted with that situation.

It has been the constant testimony of appointing officers that they are forced by political considerations to appoint to these excepted places men who are incompetent and who would never be appointed were they left untrammeled in the exercise of their own judgment.

Mr. President, if I was ever led to doubt the efficiency of our Civil Service Commission or to question the practicability of civil-service reform, that doubt has been dissipated by the contents of this letter from the president of the Civil Service Commission to the chairman of the Committee on Finance. I see that the commission is accomplishing great good, that its ideals and purposes are high, that it warns against a disregard of the law, that it anticipates the needs of the service, and does all it can in the way of improving the Government service.

Further, the president of the commission says:

Further, the president of the commission says:

If positions are required to be filled under the civil-service rules, appointing officers are freed from importunate solicitation and coercive influence from outside the service. That the committee which submitted the bill which later became the civil-service act intended to except very few nonpolitical places from its operation will be seen from the following extract from the committee's report:

"But the subordinates in the executive departments, whose duty is the same under every administration, should be selected with sole reference to their character and their capacity for doing the public work. This latter class includes nearly all the vast number of appointed officials who carry into effect the orders of the Executive or heads of departments, whether in Washington or elsewhere."

Not stopping to read all of this letter, I will nerely read the concluding paragraph:

Upon a proposal to exempt certain classes of positions by law the Senate Committee on Civil Service and Retrenchment, in report of March 9, 1898, said: "The Executive has the power to make such modifications as may be found advisable, therefore no legislation is needed."

So, from that standpoint there is absolutely no need for this express legislation incorporated in this bill authorizing appointments to be made outside of the civil-service law and rules.

Now, Mr. President, to complete this record, I desire to call attention to a few declarations of the Democratic Party in its platforms in regard to civil service. I shall not go back prior to 1888 or prior to the civil-service law of 1883, although several declarations in favor of civil-service reform were made by the party prior to that time. But taking the platform of 1888, what does it say?

Honest reform in the civil service has been inaugurated and maintained by President Cleveland, and he has brought the public service to

the highest standard of efficiency, not only by rule and precept, but by the example of his own untiring and unselfish administration of public affairs.

I think that, to a large degree, is a deserved tribute to President Cleveland and his efforts to abide by and enforce the civilservice law according to its spirit.

I take just a short extract from the platform of 1892:

Public office is a public trust. We reaffirm the declaration of the Democratic national convention of 1876 for the reform of the civil service, and we call for the honest enforcement of all laws regulating the same.

These several declarations are not simply declarations in favor of the idea of civil-service reform, but they are declarations in favor of enforcing existing laws in regard to civil service.

Take the platform of 1896:

We are opposed to life tenure in the public service, except as provided in the Constitution. We favor appointments based on merit, fixed terms of office, and such an administration of the civil-service laws as will afford equal opportunities to all citizens of ascertained fitness.

Oh, you must consider the grand principles you have enunciated here, though just now you seem to think they are "more honored in the breach than in the observance.

Take the next platform, that of 1904:

The Democratic Party stands committed to the principles of civil-service reform, and we demand their honest, just, and impartial

The principles have been enacted into law, and it is that law of which you demand the enforcement,

The platform of 1908 said:

The law pertaining to the civil service should be honestly and rigidly enforced to the end that merit and ability shall be the standard of appointment and promotion rather than services rendered to a political party.

Yet here, in face of the fact that the Civil Service Commission certifies to the number on the eligible list, and certifies to the fact that examinations are being held sufficient to cover every possible need under the civil-service law, you are going absolutely to ignore it, and you have the hardihood to say so right here in this bill.

Again, the very last declaration-that of 1912-is:

The law pertaining to the civil service should be honestly and rigidly enforced, to the end that merit and ability shall be the standard of appointment and promotion rather, than service rendered to a political party.

The Civil Service Commission is trying out the question of merit and ability with thousands now for the very purpose of ascertaining whether or not they are competent to perform the duties of inspectors, collectors, and agents under this law. Do you really believe in merit and ability? Then, when there is no need for going outside the law and the rules, why not now put into practice the splendid principles you have so loudly professed and in which, I think, your constituents, nay, the American people, now most heartily believe?

Why, with those many expressions of loyalty to the principle of civil-service reform, if I should be permitted to personify that principle, I think I would be quite justified in exclaiming:

Et tu Brute!

For in the face of such pretensions this is the unkindest cut of all.

Mr. President, we know the old saying, the declaration of the old principle which permeated and poisoned our politics for so long a time and was so detrimental to the interests of good government-

To the victors belong the spoils.

I want to call attention to one or two extracts here, and inquire if the Democratic Party to-day sanctions these expressions on the part of Democrats.

A Member of the present House of Representatives says:

I am opposed to the civil-service law as now administered and could not vote for any provision placing these positions under such civil-service law. In fact, I expect to introduce a bill to repeal the present

In this day and age of the world and at this time in the history of our country talk about repealing the civil-service law and going back to or approaching anywhere near the old and evil doctrine, "To the victors belong the spoils"! It is preposterous!

But here is another. He says:

I do not concur with the reasons you assign for your opposition to this feature of the income-tax provisions of the tariff bill.

And he boldly asserts:

I am one of those who believe that to the victors belong the spoils. I am not in favor of any of the provisions of the "act to regulate and improve the civil service."

I suppose before the election these men stood on the party platform. Have you, too, here in the Senate thrown off all disguises?

There is another saying-I will not say it is the saying of any author in particular, but in contrast, anyhow, to the saying, "To the victors belong the spoils," I here urge this expression, "To the victor belongs magnanimity." Not, Mr. President, a magnanimity which calls for a division of the spoils; nothing of that kind, but "magnanimity" means great-heartedness, greatmindedness; the great-mindedness which, putting aside the thought of mere party advantage, resolves to obey and observe a wholesome and beneficent law in which the people believe. That is the magnanimity we crave, and that is all.

Why, with these professions, how does it seem to say, "To the victors belong the spoils"? To the Democratic Party, civil-service reform again personified, it might say, as said the char-

acter in King Lear:

Despite thy victor sword and fire-new fortune, Thy valor and thy heart, thou art a traitor.

A traitor to the principles you have proclaimed again and again, and which, aside from the spoils that tempt, you in your hearts now believe to be just.

So, Mr. President, without any necessity for it-but on the other hand, with convenience as a reason for making these appointments under the civil-service rules-where is the justification for this act to-day? It is not simply for civil service that I ask this, and that the friends of civil-service reform ask it, but here is a peculiar law, an income-tax law. I want briefly to call attention to some observations made by Judge Cooley in

regard to such a law.

Time out of mind we have heard it said that an income-tax law is the most difficult of enforcement of all tax laws. The system of espionage involved, the inquisitorial methods necessarily employed, have rendered it an unpopular law. I do not believe such prejudice exists now as existed when Mr. Cooley wrote these lines. I believe to some extent it has been overcome. But the thing more than all others that has helped to overcome that prejudice is the fact that in an income tax the people ee a more equitable distribution and some relief from the rapidly increasing burdens of taxation upon their property, State and municipal taxation. But there will still be objections to its enforcement and greatest care will be required to avoid prejudice against the law.

Judge Cooley said:

1. An income tax can not be enforced without minute inquiry into every man's affairs. In this regard the difficulties are found to be much greater in this country than in most others, because in older countries society is more steady and fixed; the people change their locality, their pursuits, and their business relations less frequently; and sources of income and probable returns are more open to public inspection. In most other countries, also, the supervision by the public authorities of private life and private business is more constant, minute, and particular than the ideas of our own people would tolerate—

We all recognize that is true and that that has made one great difficulty in the reconciliation of the people to an incometax law

and the traditions of our people—who remember the general warrants of the last century and who trace their liberties through resistance to inquisitorial inspection of private affairs and domiciliary visits of effi-cials—are all such as to set them instinctively and firmly in opposition to the measures necessary to obtain the information on which the tax must be levied.

And much more to the same purpose. So I want to see the faithful, honest, efficient administration of this income-tax law, in which I believe and in the principle of which I believe. How shall we get it? By looking first to merit and to ability in these subordinate officials who are to inspect, who are to be the agents of the Government, and who are to collect the tax, and who can leave with the public the impression that they, the officials, are in no sense partisans, and that no person on account of party will be visited with their oppression or be the recipient of their favors.

Mr. SMITH of Georgia. Mr. President, I believe it was dur-ing the latter part of the administration of Mr. Cleveland that the civil-service law was extended over deputy collectors of internal revenue. With the reorganization of the service under Mr. McKinley, it was found that the civil-service examinations were unsatisfactory. The order of Mr. Cleveland was set aside, and appointments of deputy collectors were made without reference to the civil-service law.

I do not believe civil-service examinations, certainly not the present ones, are at all suitable to determine the question of merit for deputy collectors of internal revenue. The suggestion of the Senator from New York [Mr. Root], that the object was to get away from the merit system, I do not think is warranted. I regard the present examinations that are given by the Civil

Service Commission as utterly incapable of determining the question of merit for a deputy collector. I have examined a number of them. A bright young man out of the high school might take them, but very few business men 40 years of age could pass them.

Mr. President-Mr. ROOT.

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from New York?

Mr. SMITH of Georgia. I do. Mr. ROOT. May I ask the Senator from Georgia if he thinks the recommendation of a Congressman is a better means of determining merit than the examinations that are now held?

Mr. SMITH of Georgia. I think the recommendation of a Congressman would be better than this examination, but I think a competent collector would pass upon the qualifications of his deputies, and select good men, and select them on account of their merit.

Mr. ROOT. May I ask the Senator from Georgia, then, what there is left of the present merit system, if he would have the recommendation of a Congressman substituted for the examina-

tions as a means of determining merit?

Mr. SMITH of Georgia. I did not state that I would have the recommendation of a Congressman substituted.

Mr. ROOT. Mr. President-

Mr. SMITH of Georgia. One moment; let me answer the Senator's question. I said I thought the recommendation of a Congressman was a better method than this examination. That was what I said.

I now yield to the Senator.

Mr. ROOT. I entirely fail to perceive any distinction between the last statement and the former statement of the Senator from Georgia. He now says he thinks the recommendation of a Congressman would be a better means of determining merit than an examination; and in this bill he proposes to substitute an appointment without examination, which we all know-everyone knows-means merely that the appointments will be made upon the recommendations of Congressmen. I ask, again, what there is left of the civil-service system, based upon merit as determined by examination, if the course proposed by the Senator is to be followed?

Mr. SMITH of Georgia. Mr. President, I propose entirely to distinguish these deputy collectors from the ordinary class of civil-service employees, and to show why they fall under a different head. I will answer the Senator from New York. He did not quote me correctly. I simply said that I believed that the recommendation of any Congressman, certainly from my State, would give a better deputy collector than the examination propounded by the Civil Service Commission in my State and I repeat it. I not only say that is true, but I say that the men who passed their civil-service examinations are not as suited for the service as the men that have been recommended to the collector.

Mr. GALLINGER, Mr. President—
The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. SMITH of Georgia. I do. Mr. GALLINGER. Did I understand the Senator from Georgia to say that during the McKinley administration deputy collectors of internal revenue had been removed from the provisions of the civil-service law?

Mr. SMITH of Georgia. That is my information. I have not

seen the order.

Mr. GALLINGER. I will say to the Senator from Georgia, upon information received within five minutes, that they are now under the civil-service law. I knew that to be the fact in my own State and I made inquiry of the Commissioner of Internal Revenue, and he states that to be a fact.

Mr. SMITH of Georgia. That they are now under the civil-

service law?

Mr. GALLINGER. That they are now under the civil-service

Mr. SMITH of Georgia. I think they were again put under it some six or eight years ago.

Mr. GALLINGER. I think the Senator is probably right

about that.

Mr. SMITH of Georgia. But what I was bringing to the attention of the Senate was the fact that Mr. Cleveland undertook to extend the civil-service law over them and President McKinley found that they were not suited to the civil service and took them out from under it. If I could do so-

Mr. LODGE rose.

Mr. SMITH of Georgia. If the Senator will allow me, I should like to make a few remarks before being interrupted. I should like to see every deputy collector taken out from under the present system of civil service.

Mr. LODGE. If the Senator will allow me at that point, I

will say that I am sure he is going to see it.

Mr. SMITH of Georgia. No; I am afraid I am not. But this is one instance in which we are going to follow, I hope, the advice of our friends upon the other side, and exercise our own judgment, without waiting for advice from the other end of the

Mr. LODGE. Subsequently the deputy collectors were all put

back into the civil service.

Mr. SMITH of Georgia. Why, certainly. After the places were all filled, after the men were all appointed, the civil-

service law was extended over them.

Mr. LODGE. Certainly; they did exactly what Mr. Cleveland did. He filled all the offices with Democrats, and covered them in. In the case of the deputy collectors Mr. McKinley did the same thing.

Mr. SMITH of Georgia. Not at all. Mr. Cleveland did not find them under the civil service. He put them there for the

Mr. LODGE. After filling the positions he put them there. Mr. SMITH of Georgia. He put them under civil service Mr. SMITH of Georgia. He put them under civil service after the appointments had been made, as the Republicans have so often done in other cases.

Mr. LODGE. As both sides have always done.

Mr. SMITH of Georgia. No; you took them out from under the civil service, made appointments, and then put the civil service over your appointees

Mr. LA FOLLETTE. Mr. President-

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Wisconsin?

Mr. SMITH of Georgia. Yes; I yield.
Mr. LA FOLLETTE. I hope the Senator will permit me to enter a dissent right there to his statement, "as the Repub-

licans have always done everywhere."

As governor of the State of Wisconsin I had the opportunity to sign a civil-service law that covered not only all of the appointments ordinarily covered, but all legislative appointments as well. That law required every official in the State to pass the same examination and the same test for holding his office or remaining in his office that he would have had to pass had he been outside of the civil service and applying for appointment. There is one instance, anyway, where they were not covered in under the law.

Mr. SMITH of Georgia. Mr. President, I am not surprised at the course pursued by the governor of Wisconsin, but I am not willing to give the Republican Party credit for everything that is done by the Senator from Wisconsin. There are a great many things he has done, and still does, that the Republican Party generally can not claim credit for. I was referring to national appointments and national action, and I repeat that the Senator from Massachusetts is not justified in saying that the Democrats and the Republicans acted alike.

Mr. Cleveland did not remove from the civil service those he found under it. He extended the civil service over deputy collectors, and Mr. McKinley took them out from under it. I think Mr. McKinley was right about it. Now I wish to say why I

think he was right about it.

Wherever an appointment can be filled by a young man just out of college, or just out of the high school, I believe in these competitive examinations, testing his scholarly acquirements, starting him in at the bottom, keeping the whole of the work under the civil service, and promoting solely upon the ground of merit. I believe in opening up to young men through the civil service just as wide and broad a field as possible for advancement in the Government service under the civil service.

What I am contending for is this: Deputy collectors get only about \$1,200 a year. A young man just out of college is unfit for the work. You might just as well expect a big wholesale house in New York City to select its traveling salesmen from young men just out of the high school, or just out of college, and have efficient work on the road, as to expect a collector of internal revenue to select an efficient force from young men just

There is no field for promotion in this service, and there is no room for any considerable advancement. A man of from 35 to 45 is needed to do the work. A man of some experience in handling men is needed. An ex-collector of taxes of any county would make a good deputy collector. An ex-sheriff would make a good deputy collector. Some man of middle age, who has had experience in doing work something upon the same lines, would do the service splendidly.

It might be that the Civil Service Commission could get up some kind of an examination, coupling with it tests of experience and age, that would be sufficient to decide by a civil-service test how to select men with merit for this work; but I deny

that the examinations they have been given are any tests of merit for this work. It never has been tried heretofore, because you filled them all up outside of the civil service. You have put in some since in that way, to be sure, but you have not undertaken to organize a force from the civil service,

Mr. LODGE. Why, Mr. President, large numbers who have gone in since the positions were covered into the civil service have gone in under the civil-service rules. These places of deputy collectors are not miraculous places. I suppose the Senator's remarks apply also to inspectors and agents as much as to deputy collectors, that their positions are so difficult that they can not be filled by examination.

Mr. SMITH of Georgia. That is not what I said. I said

the examinations given are no test for fitness.

Mr. LODGE. We will discuss that later. Mr. SMITH of Georgia. That is my position. Mr. LODGE. I wanted to know if agents and collectors were in the same category.

Mr. SMITH of Georgia. I have not inquired particularly phont them

Mr. LODGE. They are in this proviso.

Mr. SMITH of Georgia. Then I think they are.

Mr. LODGE. Undoubtedly.

Mr. STERLING. Mr. President, will the Senator permit me?

Mr. SMITH of Georgia. Yes. Mr. STERLING. Is not the presumption in favor of the man who has stood the theoretical test and taken the examination?

Mr. SMITH of Georgia. I do not think it is in this instance, and my observation is against it. The best men for the work who took the examination that I have examined did not pass it. Mr. CUMMINS. Mr. President, will the Senator from Georgia

yield to me?

Mr. SMITH of Georgia. Yes.

Mr. CUMMINS. There is nothing in the law, is there, that would prevent the Civil Service Commission from holding just such an examination and applying just such tests as the commission believes will develop fitness? We now have a Civil Service Commission of which, at least, two members are new and were appointed by the present administration. What reason is there to believe that this commission will not prescribe such an examination as will test, so far as an examination can test, the fitness of men who are proposed to be appointed deputy revenue collectors or inspectors or the like?

It seems to me the argument of the Senator from Georgia is directed toward a command to the commission to hold the kind of examination which he believes ought to be held. I quite agree with him that there could be held an examination for clerks that would be entirely unsuitable to determine the fitness of collectors; but if we have a commission that does its duty, it seems to me we can secure fitness through the examination prescribed rather than through the recommendations of Congress-

Mr. SMITH of Georgia. The Senator asks me what reason there is for believing this commission will not do so. I have seen the examination papers that they sent out in August, and I do not think that examination is any test whatever of the fitness of a man for the position of deputy collector.

Mr. CUMMINS. Then, Mr. President, that simply proves that our commission is not doing its duty and is not applying the tests which ought to be applied in order to secure the most

capable men for the offices.

Mr. SMITH of Georgia. Not necessarily. The commission has under it men who prepare examination papers, and who have been there for a long time. They are supposed to be trained and are supposed to use the best means that can be devised. Their means I consider a failure.

Mr. CUMMINS. I am not making any charge against the commission, for I have the highest regard for them. I am simply applying the charge which the Senator from Georgia has made.

Mr. SMITH of Georgia. I am not making any charge against the commission. I tell you what they have done, and I say I do not consider that examination any test. I feel sure that it is no test, and I apply it, then, to the men who took it, and I know that the least efficient for the particular service stood the examination, while the more proficient did not.

Mr. WEEKS. Mr. President, I want to ask the Senator from

Georgia if there is anything in the argument which he has used in support of this provision which will not apply with

equal force to all other similar civil-service examinations?

Mr. SMITH of Georgia. In answer to that question I will say that if it was exactly similar of course my argument would apply, but a few moments ago I undertook to distinguish a large class that were not similar.

Mr. WEEKS. One more question, Mr. President. Is this an indication of the tendency or the policy of the Senator's party regarding the civil service and its future application?

Mr. SMITH of Georgia. I am not prepared to say that it is, except as to a case like this. If I had my way, I would take every one of the deputy collectors out of the civil service and I would extend the civil service to every place where a young man could properly enter it and have a field for advancement as he grew in years and as he grew in experience.

Mr. WEEKS. One more question, Mr. President. Does not the Senator think that the Civil Service Commissioners could so frame their examinations that they would cover all the

objections which he has made in this case?

Mr. SMITH of Georgia. I am not sure. I think that there would have to be a good many changes in the subordinate force in the civil service for them to have judgment enough to pass upon it.

Mr. McCUMBER. Mr. President—
The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from North Dakota?

Mr. SMITH of Georgia. Yes.

Mr. McCUMBER. Do I understand that the Senator would have no examination whatever for these positions?

Mr. SMITH of Georgia. For what positions? Mr. McCUMBER. For the positions he is speaking of.

Mr. SMITH of Georgia. I would take the deputy collectors out from under the civil service.

Mr. McCUMBER. Would the Senator have any system what-ever of examination to determine their fitness or competency?

Mr. SMITH of Georgia. I do not at all think that is the best way to determine it. I think in the case of the deputies a capable man to be selected—the experience and record of a man would better determine his fitness than any book ex-

Mr. McCUMBER. Does the Senator believe that the Commissioner of Internal Revenue would of his own volition select the men whom he desired or would he be influenced more or less by those who were responsible for his appointment?

Mr. SMITH of Georgia. Perhaps more or less by that; but I think also if he was a capable man he would pass on the men

himself and reject any who were not competent.

Mr. McCUMBER. I think the Senator suggested a short time ago in his remarks that he thought the Civil Service Commission might promulgate some rules of examination that would determine the fitness and competency of men for these positions. Now, I want to ask the Senator this question, because I have already prepared an amendment to conform to the idea. Would he object to an amendment, inserting in line 6, on page 209, the

But upon such examination as to competency and fitness as may be prescribed by the Civil Service Commission.

So that while these appointees would not be under the civil service so far as relates to their right to hold like positions, and so forth, yet some commission would pass upon the competency or fitness of the persons applying for such positions. Could not the Senator conscientiously support an amendment of that kind?

Mr. SMITH of Georgia. I wish the Senator would read his

amendment once more.

Mr. McCUMBER. I will read it as it would read with my amendment, as follows, and then the Senator will understand it:

That for a period of two years from and after the passage of this act the force of agents, deputy collectors, and inspectors authorized by this section of this act shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, and without compliance with the conditions prescribed by the act entitled "An act to regulate and improve the civil service," approved January 16, 1883, and amendments thereto, but upon such examination as to competency and fitness as may be prescribed by the Civil Service Commission.

Mr. SMITH of Georgia. Mr. President, very frankly I would rather let the Secretary of the Treasury prescribe the rules for this particular class of officials than the Civil Service Com-I think there are some men in the Civil Service mission. Commission who prepare examinations, and who could not stand an examination for the positions they have if they were tested by the examination papers that they have sent out. I think as to deputy collectors they have shown no conception of the work, and they have lacked the knowledge they ought to have had with reference to the work in their scheme of testing the fitness of those who are to take the places.

Mr. McCUMBER. Why does the Senator think that we would obviate that by changing the examination from one arm

or department or bureau of the Government to another? Mr. SMITH of Georgia. I have seen one tried and it has We would have a chance in the other direction. I know that the other examinations have failed.

Mr. BRISTOW. Mr. President—
The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Kansas?

Mr. SMITH of Georgia. Yes.

Mr. BRISTOW. I should like to inquire why the Senator favors the language used forbidding the President or the Secretary of the Treasury from taking those from the eligible list of the civil-service rolls if he thought it best? This language forbids him to do it.

Mr. SMITH of Georgia. We agree with you that sometimes

it is just as well for us to act without advice.

Mr. BRISTOW. This is an administrative provision. I agree with the Senator that it is altogether proper for the legislative branch of the Government to legislate, but where it provides a system for the administration of the executive branch of the Government it seems to me some discretion might be left with the Executive as to the character of the subordinates upon whom he must depend to carry out the law. They are not legislative subordinates.

Mr. CHILTON. Mr. President, I wish to say, in response to what the Senator from Kansas stated, that I think he is totally in error in construing this language as he did. If he will look at the last proviso on page 208, he will see that there is really a legislative construction of the former provision. It reads:

Provided further, That no person now in the classified service who shall be appointed as an agent, deputy collector, or inspector shall lose his civil-service status because of such appointment.

Clearly meaning that we do not mean to prohibit an appointment from the classified service now.

Mr. BRISTOW. I suppose that means that those who are now deputy collectors shall not be discharged if they happen to be assigned to this work.

Mr. CHILTON. No; it means if you appoint anyone from the classified service, which in contemplation of law may be done, he shall not lose his place; that is all.

Mr. BRISTOW. Now, then, let me read the first proviso. Mr. SMOOT. Mr. President—

Mr. SMITH of Georgia. I yield to the Senator from Kansas, who was first on the floor, and then I will yield to the Senator from Utah.

Mr. BRISTOW. The first proviso reads:

That for a period of two years from and after the passage of this act the force of agents, deputy collectors, and inspectors authorized by this section of this act shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, and without compliance with the conditions prescribed by the act

Mr. CHILTON. If the Senator will pardon me, that means that you are not required to comply with the act, but you may do so. That is, you may appoint persons either as deputy

Mr. BRISTOW. But the language is, if the Senator will permit me, that they shall be appointed by these officers, "and without compliance with the conditions" of the act of 1883. If that does not mean that they shall not be taken from the eligible list, I can not construe language.

Mr. SMITH of Georgia. I yield to the Senator from Utah. Mr. SMOOT. I was simply going to suggest to the Senator that it seems to me the easiest way to stop the whole of this argument is to say, "We want the offices, and we intend to have them if possible." It seems to me that is the whole situation.

Mr. SMITH of Georgia. Mr. President, I will answer both

the Senators.

In answer to the Senator from Kansas, I call his attention to the fact that the latter part of the clause applicable to appointments allows men to be taken from the classified service. The first clause means that they shall not be subject to the examination that has been held by the Civil Service Commission for deputy collectors. They may be selected from men already in the civil service and not lose the right of returning to the civil service.

Now, with reference to the suggestion of the Senator from Utah, if we had had intelligent examinations in my own State, of a character that would really test the fitness of men, I would vastly prefer they should get places that way than by political designation. So far as Representatives and Senators are concerned, the responsibility about suggesting men for office is

not a political asset, but a liability.

Now, Mr. President, if I may be allowed for five minutes to express my views without interruption, I do not believe that so far the examination by the Civil Service Commission tests the fitness of men for these small-salaried places, which require men of some experience and business capacity. These positions are easily distinguished from the class of positions where there are a large number employed, some at small salaries, some which quite young men without experience can fill, and where there is an inducement to enter the service by the chance of promotion. They are distinguished because these places have no promotions in them and they take a full-grown man to start with. They take, as nearly as you can get him, as

capable a man as a wholesale house or factory would employ to travel through a State and look after business on the road. is that class of men who are needed to do this work efficiently, and a young man just out of school or college has not the training and is not fit for it. It is not a clerical position in an office where you can start a young man and promote him.

Mr. LODGE. That is not the case with most of the offices. Mr. SMITH of Georgia. It is with the agents and deputy collectors and inspectors. We are not freeing the clerical force from the civil service. We have expressly distinguished between the clerical force and the field force. We intended this provision to apply only to that class of men who are sent out on the road, and a class of them doing work, as I said before, like the highest class and best-paid traveling men for big wholesale or manufacturing plants. I should like to know what wholesale house in New York City, being just organized and going into business, would undertake to hold a civil-service exclusively book examination for the selection of its force of traveling men. I wish to know what wholesale house in New York City, if half of its traveling men resigned, would undertake by the examination prescribed by the Civil Service Commission to fill up the vacancies existing in its force. The Senator from New York [Mr. Root] urges a merit system. If a business house followed such examination to select its force, it would not be in business very long.

Mr. BRISTOW rose.

Mr. SMITH of Georgia. I would rather not yield to the Senator now. I have been interrupted so often that I should like to finish

My reason for justifying President McKinley in taking these deputies out of the civil service is that a book examination is a very poor test, beyond reading, writing, and arithmetic, of the fitness of a man for the place. If you test his mental culture by an advanced examination, no man of 45 with any business capacity would wish the place. To illustrate, the questions in geography in the recent examination covered little towns scattered over the United States, with which I do not believe any Senator, except from the State in which the towns are located, would be familiar. I doubt whether half the Senate could take the examination.

I would rather risk the Commissioner of Internal Revenue to select a capable force of men to do this work. I believe he would select them with just as much care as any one of us would select a collector for his State, and I am sure no Senator would select a collector for his State that he was not confident

would fill the place well.

Now, the Senator from Kansas wanted to ask me a question. Mr. BRISTOW. I wanted to suggest to the Senator, by his permission, that there is a wide difference between the running of a wholesale house and the administration of a Government position. The Senator knows well that the man in control of a wholesale house is interested in the development of a business for profit. The man in charge of a political office in Georgia or Kansas or any place else is appointed there, if it is outside of the civil service, nine times out of ten because of political service that he has rendered to members of the party in power. The Commissioner of Internal Revenue is not free to go out and select the men who he thinks will administer the office better as is the man in charge of a business concern; he is bound by political obligations and ties. Now, we may theorize all we please, but that the Senator from Georgia knows to be a fact. I do not claim that Senators are any better than anybody else when it comes to appointments to office. The Senator from Georgia is as honorable and high minded as any Senator on this floor, and when he recommends a man for office in Georgia he recommends nine times out of ten some political friend who has rendered service to him. Of course he thinks he can properly discharge the duties of the office or he would not recom-The result of such an appointment has been such mend him. that the American people thought it best for their Government to establish a civil-service system and through that system to select men independent of political obligations.

Now, the Senator has arraigned the Civil Service Commission for incompetency. If it is incompetent, then it ought to be removed and competent men selected. If there are men in charge of the administration of that bureau who are not properly doing their duty, the commission should change them by reductions or transfers to positions which they can properly fill, or remove them if they are not fit for the service. But when one undertakes to make a comparison between a political and business administration, the comparison does not properly

Mr. SMITH of Georgia. The Senator's reference to appointments in my own State has made the suggestion to me to still further illustrate the distinction I draw between these deputies and a large number of places under the civil service. The Sen-

ate during the present week confirmed the new postmaster at the city where I live, which ranks among the cities having the largest postal receipts in the United States. Here there is a large force of men with varying salaries. I would not take a man in his force out from under the civil service. There is a splendid opportunity in this service to obtain proficiency through the civil service. They enter at from \$600 to \$900. The best men to enter are young men, and they are promoted until their

salaries reach quite competent pay.

The same is true in the Railway Mail Service and in all the postal service. I was distinguishing these lines of appointment, because they were all places of small pay—\$1,200 is about the pay—with no chance for an increase, and not suited to men without some business experience. I was not arraigning the Civil Service Commission. I was stating a fact. I have no doubt they do the best they can, but I do say that they have not found a way properly to test the selection of men of this character, and it is very difficult to find a way to test the capacity and fitness of a man where the position requires some business ability, some maturity, some knowledge of men, and yet is a poorly paid place which does not require any scientific knowledge and which does not offer the opportunity for promotion.

I am in favor of keeping the civil-service law over places that open a field to young men, that will be an inducement to them to enter and make the Government service their life work.

Mr. CUMMINS. Mr. President—
The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Iowa?

Mr. SMITH of Georgia. Yes.

Mr. CUMMINS. The remark just made by the Senator from Georgia emboldens me to ask him his opinion concerning an amendment which I intend to offer to the clause under consideration if it shall be adopted.

Mr. SMITH of Georgia. I hope the Senator will not ask me whether I will vote for the amendment.

Mr. CUMMINS. Oh, no.

Mr. SMITH of Georgia. But I will promise him to consider

anything that comes from him.

Mr. CUMMINS. I ask the Senator his opinion with regard to it, but not as to how he will vote upon it. If this change shall be effected in the civil-service law I shall offer this amendment, which I think is in absolute harmony with the suggestion just made by the Senator from Georgia-

Mr. SMITH of Georgia. I will yield the floor to the Senator from Iowa. I have been on the floor so much longer than I intended to be that my associates on the Finance Committee will

never forgive me if I take up any more time.

Mr. CUMMINS. Mr. President, I want the Senator's opinion about this amendment, because it may lead to a good deal of light. I shall propose this:

Provided further, That the person so appointed without the examina-tion provided by the said act approved January 16, 1883, and acts amendatory thereof, shall not be covered into the regular classified service without competitive examination.

I am not going to argue it now, but I ask the Senator from Georgia whether he is not of the opinion that that is necessary in order to complete the very purpose he has in view?

Mr. SMITH of Georgia. I was interrupted, and did not exactly catch the language of the proposed amendment. Mr. CUMMINS. If this proposed act passes, we are about

to appoint a great many men and women to the service without examination. Of course the Senator from Georgia knows that once they are appointed to the service they can be covered into the classified service by an Executive order. Then they become officeholders for life or during good behavior or during competency, and are capable of being transferred into any other department of the service to which they may be eligible. Therefore I shall propose-I think it is in exact harmony with the suggestion made by the Senator from Georgia-that these special people, if they are not required to take an examination, ought not to be permitted to hold any other places than those to which they are appointed, and they ought not to be protected in their tenure by the civil-service law, but ought to retire at the will of the appointing power. Therefore I shall propose

Provided further, That the person so appointed without the examina-tion provided by the said act approved January 16, 1883, and acts amendatory thereof, shall not be covered into the regular classified service without competitive examination.

Mr. SMITH of Georgia. I will say to the Senator from Iowa that while I am not prepared at this time to vote with him the amendment suggested by the Senator impresses me most favorably.

Mr. LODGE. Mr. President, since I took my seat in the House of Representatives in December, 1887, down to the present time I have tried to fight for the maintenance and the ex-

tension of the civil-service system. I have fought with my own party, I think, quite as often as I have with the party on the other side, and though I may not have effected much I have acquired a considerable familiarity with the arguments which are made when gentlemen want to get offices for political distribution. They have always been the same from the beginning; there has been no change in the arguments, though the illustra-

tions may vary a little.

In the earlier days, when the civil-service system was struggling into life, it was common to hold it up to ridicule and to "You want to examine clerks here in the departments and you examine them in Greek and Latin; it is the Chinese system; you examine them in the higher mathematics." Of course that was never done; and still that kind of argument did very well at the time. As the character of the examinations became generally known the burlesque as to the examinations had to be abandoned, and the opponents of the system came down to the general proposition, when they wanted to get an office for political distribution, that the examination was bad-I am always perfectly certain that that will be said; that it does not test the fitness of the person properly-I am always perfectly certain that that will be said; and also that no Senator and no Member of the House could pass the examination if it was presented to him. I waited with interest to hear the Senator from Georgia [Mr. Smith] say that, and I was not disappointed; he did.

Mr. SMITH of Georgia. And I think it is true.

Mr. LODGE. I have no doubt it is; I have heard it repeated here at intervals within the last 26 years, and I expect to hear it again.

Mr. SMITH of Georgia. I have not heard it since I have been here

Mr. LODGE. Perhaps we have not had a civil-service discussion, though I think we have. While the last Republican administration was in power I think I remember making a fight against any amendment of the law in regard to covering in certain appointments, in which I found the Senator from Georgia, with the traditions of the Cleveland administration strong about him, one of the most ardent civil-service reformers that I have ever met.

Mr. SMITH of Georgia. Mr. President, I will ask the Senator from Massachusetts if the places we then had under consideration were exactly the same class of places as those to

which I have referred to-day?

Mr. LODGE. They were not the same places that are now to be distributed; no.
Mr. SMITH of Georgia. And not the kind?

Mr. LODGE. Not the same kind that are now to be distributed: no. Mr. SMITH of Georgia. I would be with you again in that

same fight.

Mr. LODGE. The case that is under consideration for political distribution is always a little different from all the other cases, and though the illustrations have varied there are certain figures that have always marched with me in civil-service debates during the last 24 years; there is always the high-school boy; there is always the college graduate; generally the schoolteacher—he was omitted to-day, but the high-school graduate and the college graduate have always been with us in these They are open to the charge, the crime, of being young ich is a charge that is always made. Those dark figdebates. men, which is a charge that is always made. ures have passed through these debates, casting their baleful shadow over the pathway of the experienced, valuable business man who can not take an examination. There the high-school boy and the college graduate have been shutting out the invaluable business men who can not take an examination.

I have great respect for all those figures and all those arguments. They are all old, and they deserve the respect which age inspires; but, Mr. President, now, as always, the real purpose is that on one side or the other we want to make political appointments to some office. I do not think there is any moral turpitude in that desire; I think it is a very natural one; we have all had it; but that is the real purpose behind this provision.

There is nothing very wonderful in the duties of a deputy collector or an agent or inspector of internal revenue. The work a deputy collector has to do in many districts is office work similar to the work performed by the collector. In some districts, no doubt where there is illicit whisky distilling, the deputy collector has to lead a more active life, and if the examination in such cases could be extended to test his readiness with a gun I think it would be very well, and perhaps better men would be secured for the place. Such a test might be added for those districts. As a rule, however, there is nothing very complicated about the duties of a deputy collector. Such a position is no more difficult to fill than a clerical position in any other branch

of the service; it is no more difficult to fill than the office of gauger or deputy collector in the customs service, or a thousand and one offices which require honesty, character, intelligence, good common sense of a reasonable sort, and also a reasonable degree of education.

Mr. CHILTON Mr President-

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from West Virginia?

Mr. LODGE. With pleasure.
Mr. CHILTON. The Senator mentioned honesty as one of the requirements of a deputy collector. Does he recall that the law makes the collector liable for any dereliction or default of a The law goes so far as to make him not only liable upon his bond, but it makes him liable in a criminal prosecution for any default of the deputy.

Mr. LODGE. I am aware of that, Mr. President.

Mr. CHILTON, Would the Senator be willing to let an examination be held in Washington of girls and boys and men-I am not after the boys-and appoint people from the District of Columbia, from Ohio, and from Pennsylvania and send them to the State of Massachusetts, where the local officer upon his bond is liable to the Government for any dereliction? the Senator be willing to do that, or would he not want to make the selection himself and determine himself as to the honesty of the appointees? Is not defalcation really the first thing that should be guarded against? Does the Senator not think that makes this provision an exception and quite a different case from that of a clerk who has not the responsibility which makes the danger great?

Mr. LODGE. I know that argument also, Mr. President; it is an old friend; it has been met very largely by bonded officers taking bonds from their subordinates. Of course, if they take bonds from their subordinates, I will admit that you at once introduce an element which is dangerous to the experienced and invaluable business man who can not take an examination, because sometimes he can not furnish a bond. Of course a collector has the right to protect himself, and, as a matter of fact, such officers do protect themselves. Where their subordinates are civil-service appointees the superior officer takes a personal

But, Mr. President, the collectors are not going to fill these We all know that. If it were left to the collector alonethough I think we probably should do better than we do on the average under the civil-service system-if it were left solely to the collector or solely to the Secretary of the Treasury or solely to the Commissioner of Internal Revenue, looking merely at his administration, we should get a pretty good body of men; but the collector does not make the appointment, though he is responsible for the conduct of the service. Senators and Members of the other House make them, although they are not responsible for the conduct of the service, and that is the most vicious thing in the whole system. We may cover it up with all the fine phrases we please, but every one of us who has been in politics and has had experience knows that those places are filled by the heads of departments on the recommendation of Senators and Members of the House, who are not responsible for the administration of the department.

Mr. CHILTON. Mr. President-

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from West Virginia?

Mr. LODGE. With pleasure.

Mr. CHILTON. Since the Senator has had the experience and appreciates what it is, I want to say to him that I have never had that pleasure, and I should be pardoned for wanting

to have the same experience that he has had.

Mr. LODGE. Naturally; and this clause has been put in to gratify that very natural desire on the part of the Democratic That is the honest reason, and there is no need to be ashamed of it. If you choose to argue it, I do not think it is for the best interest of the Government, but an honest reason squarely stated is all right. You may disagree with it, you may try to defeat it, but at least it is straightforward and honest

Now, a word as to private business, which is another familiar argument. Private business is a constant examination. If the traveling man or the agent, or whoever he is, does not do well, he is dismissed. He is acting under an examination of the most effective possible kind, but a man who enters office on a political appointment, with strong influence behind him, and does not do his work well, is not dismissed, because he is held there by political influence. The people who gather and pursue Senators and Representatives of both parties to help them retain their places in the departments, to help them get promotions—the men and the women, too, who seek influence in that way, as a rule, are inefficient clerks. The good clerks, who have nothing to fear, who are getting their promotions on merit, rarely disturb

a Senator or a Representative. That is the distinction between private business and public business.

Mr. President, when I began I did not mean to say as much as I have said; I only meant to say a few words. What I want is simply a vote on this paragraph, and I regret that I have consumed as much time as I have.

Mr. LANE. Mr. President, I should like to say merely a few words in connection with this subject. It is a matter which has always interested me a great deal, for the reason that I served for four years as chairman of a civil-service commission, and while I am now and always have been willing to concede that the civil-service system is superior to the spoils system and relieves the country of a great many evils which followed the spoils system, yet the present civil-service system has certain

weaknesses about it which I think we ought to endeavor to cure if we can.

The scope of an examination does not at any time prove the honesty, the common sense, or the energy of the appointee. characteristics can not be shown by any examination

which has yet been devised.

If an employee is inert or if he is unfriendly to the administration under which he is working, he can impede it, he can block it, he can do great harm, and yet commit no offense for which he can be held subject to dismissal. He can become an embarrassment which is insurmountable, and yet he is irremovable. So in our State we finally decided upon a change in our charter, and we changed it to this effect: We gave the civilservice commission full authority to conduct examinations for all subordinate positions, and we compelled the appointing power, the executive officer, fairly and openly to select his employees from the eligible list. It was a nonpartisan board and a nonpartisan administration. To protect the people from the loss which they sustained from inefficient work on the part of the civil-service employees who had been given their positions, who resented any interference with them, who, if you removed them, obtained a trial and carried the ease clear through to the supreme court, and if you did not have the strongest possible evidence against them, enough to convict a man for murder, you would fail to get rid of them and they would draw their salaries all the time while they were suspended—to protect the people, I say, we put a clause into the charter by which the appointing power, the executive officer under whom the employee worked, had the right to dismiss him at any time for cause, provided he were not removed for causes either of a political or of a religious nature.

We allowed him a free hand in every respect; then he could go back to the list again and pick and choose until he secured men who could loyally work with him for the benefit and the advantage of the people, the taxpayers, who have to pay these

salaries.

We found that the city had lost and had frittered away hundreds of thousands of dollars through inefficient help, and that was the only remedy we could devise without going back to what I consider a worse system—the spoils system.

I give you that for just what it is worth. I thank Senators

for their attention.

Mr. McCUMBER. Mr. President, I never have been a very firm advocate of the portion of the civil-service law which provides for a life tenure. I always have opposed it. I opposed it upon the very grounds that have just been given by the Senator from Oregon [Mr. LANE]; but I always have been in favor of the portion of the law which provides for an examination to determine the fitness of the applicant for the position which he

I can scarcely understand what seems to me to be a sudden change of position on the part of the Senator from Georgia upon this question. Only a year ago the Senator from Georgia seemed to be one of the strongest advocates of the inviolability of the civil-service law. I found him only about a year ago not only the ardent supporter of that law, but found him joining such radicals as the Senator from New York [Mr. Root] and the Senator from Massachusetts [Mr. Longe], and such conservatives as the Senator from Kansas [Mr. Bristow] and the Senator from Iowa [Mr. CUMMINS], in an ardent defense of the Civil Service Commission, and its methods of examination, and everything connected with it.

Mr. SMITH of Georgia. Mr. President, if the Senator will allow me, is it not true that the whole fight we had then was on the effort to limit the length of service? Was not the part I took one of insisting that the classes of places that could be opened to young men ought to be opened as a permanent service? And was there anything inconsistent in the position I took then

as compared with the one I took to-day?

Mr. McCUMBER. That is not the occasion to which I refer. A year ago I myself sought, by an amendment, to cover under

the civil-service law a number of persons that might range all the way from 30 to 100, who had had several years of experience as clerks in the Immigration Commission and who, after that, had had about two years of service in the Census Bureau, and to allow them to be used as clerks in both the Census Bureau and the Bureau of Pensions. If I remember rightly, those clerks who had had experience in the Immigration Commission had been weeded out until there were left only the very best of them. Then those very best were utilized by the Census Bureau, and came before us with the best character of examination in the world-the examination which consisted of a demonstration of their ability to do the work required of them.

I desired to cover them into the civil service. remember rightly, the Senator from Georgia joined these other Senators, and was not in favor of opening the door one inch to allow these persons to get in under the civil-service law, because of the influence it might have in the way of widening the breach and allowing others to get in.

Mr. SMITH of Georgia. No; the Senator is mistaken.
Mr. McCUMBER. Possibly I may be mistaken as to the
Senator joining in that, but I think he was one of those who were opposed to opening the door even to that extent where there had been this best of examinations in the world.

The Senator ought to agree with me at least upon one thing, and I think the Senator from Iowa ought to join him in that before he offers his amendment, and that is to vote in favor of an amendment I propose which will require an examination; that is all. If the Senator has doubts as to the propriety of the Civil Service Commission making this examination, I will agree with him that the Treasury Department may prescribe the rules of the examination for this purpose, but I do believe there should be an examination, so that we may not lay ourselves open to the charge that this is merely an opportunity for us to pay our political debts by the appointment of people who may or who may not be fit to fulfill the duties of their positions.

I think that is a proper amendment, and that it should be made, so that we may have at least competent persons; and I am willing to trust the Treasury Department to promulgate

rules for that examination.

Mr. WILLIAMS. Mr. President, this matter having been fully debated again for about the fortieth time since I have been a Member of Congress, and all the things that have been said before having been said again, I hope we may have a vote upon the amendment.

Mr. BRISTOW. Will the Secretary please state the amend-

ment, so that we may understand just what it is?
The VICE PRESIDENT. The amendment will be stated.

The Secretary. The amendment proposed by the senior Senator from Massachusetts [Mr. Lodge] to the amendment of the committee is, on page 208, line 23, to strike out the follow-

Provided, That for a period of two years from and after the passage of this act the force of agents, deputy collectors, and inspectors authorized by this section of this act shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, and without compliance with the conditions prescribed by the act entitled "An act to regulate and improve the civil service," approved January 16, 1883, and amendments thereto, and with such compensation as the Commissioner of Internal Revenue may fix, with the approval of the Secretary of the Treasury, within the limitations herein prescribed.

Mr. LODGE. On that I ask for the yeas and nays.

Mr. McCUMBER. Before the yeas and nays are taken, is this a motion to strike out this part of the committee amend-

The VICE PRESIDENT. It is a motion to strike out.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I announce my

pair as on the former vote and withhold my vote.

Mr. BRYAN (when Mr. Fletcher's name was called). My colleague [Mr. Fletcher] is necessarily absent on public busi-He is paired with the junior Senator from Wyoming [Mr. WARREN]

Mr. GALLINGER (when his name was called). I transfer my pair with the junior Senator from New York [Mr. O'GOR-MAN] to the junior Senator from Maine [Mr. Burleigh] and

will vote. I vote "yea."

Mr. KERN (when his name was called). On account of my pair with the senior Senator from Kentucky [Mr. Bradley] I

withhold my vote.

Mr. McCUMBER (when his name was called). I again announce my pair with the senior Senator from Nevada [Mr. NEWLANDS | and withhold my vote.

Mr. THOMAS (when his name was called). I again announce the transfer of my pak with the senior Senator from Ohio IMr.

BURTON] to the junior Senator from Oklahoma [Mr. Gore] and will vote. I vote "nay.

Mr. JONES (when Mr. Townsend's name was called). sire to state that the junior Senator from Michigan [Mr. Town-SEND] is necessarily absent from the Chamber. He is paired with the junior Senator from Florida [Mr. Bryan]. If present, he would vote "yea."

Mr. WARREN (when his name was called). I transfer my pair with the senior Senator from Florida [Mr. Fletcher], so

that he may stand paired with the junior Senator from Michigan [Mr. Townsend], and will vote. I vote "yea."

The roll call was concluded.

Mr. REED. I am paired with the senior Senator from Michigan [Mr. SMITH]. I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and will vote. I vote "nav."

Mr. McCUMBER. I transfer my pair with the senior Senator from Nevada [Mr. NEWLANDS] to the senior Senator from New

Mexico [Mr. Fall] and will vote. I vote "yea." Mr. WILLIAMS (after having voted in the negative).

inadvertence and without thought I voted when I ought not to have done so. I have a pair with the senior Senator from Pennsylvania [Mr. Penrose]. As he is absent, I desire to withdraw my vote.

The result was announced-yeas 32, nays 37, as follows: VELS DO

	11.	A5-52.	
Borah Brady Brandegee Bristow Catron Clapp Clark, Wyo. Colt	Crawford Cummins Dillingham Gallinger Jones Kenyon La Follette Lodge	McCumber McLean Nelson Norris Oliver Page Perkins Poindexter	Root Sherman Smoot Sterling Sutherland Warren Weeks Works
	NA	YS-37.

So Mr. Lodge's amendment to the amendment of the committee was rejected.

Mr. GALLINGER. Mr. President, after the negative vote, I now move to strike out the proviso and to insert the matter which I send to the desk.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary In the committee amendment it is proposed to strike out the proviso commencing on line 23, page 208, and ending on line 8, page 209, and to insert the following:

ending on line 8, page 209, and to insert the following:

Provided, That all appointments under the provisions of this section
shall be made in strict compliance with the rules and regulations of
the Civil Service Commission, in accordance with the terms and provisions of the act entitled "An act to regulate and improve the civil
service of the United States," approved January 16, 1883, and amendments thereto: Provided further, That hereafter when examinations are
held for the positions of deputy collectors, agents, and inspectors the
questions shall be so framed as to specifically test the capacity and
fitness of the applicants for the several positions.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from New Hampshire to the amendment of the committee.

Mr. GALLINGER. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). nounce my pair with the junior Senator from Maryland [Mr. JACKSON

Mr. GALLINGER (when his name was called). I will make the same transfer of my pair as heretofore announced and will vote "yea."

Mr. KERN (when his name was called). I transfer my pair with the Senator from Kentucky [Mr. Bradley] to the Senator from Nebraska [Mr. HITCHCOCK]. I vote "nay.

Mr. McCUMBER (when his name was called). I transfer my pair as before and vote "yea."

Mr. THOMAS (when his name was called). I make the same transfer as before and vote "nay."
Mr. JONES (when Mr. Townsend's name was called). I

make the same announcement in reference to the pair of the

Senator from Michigan [Mr. Townsend] that I made on the preceding vote. I will let this announcement stand for the rest of the day

Mr. WARREN (when his name was called). Making the same transfer as before, so that the Senator from Florida [Mr. FLETCHER] stands paired with the Senator from Michigan [Mr. Townsend], I vote "yea."

The roll call was concluded.

Mr. WILLIAMS. I wish to reannounce my pair with the Senator from Pennsylvania [Mr. Penrose].

Mr. REED. I am paired with the Senator from Michigan [Mr. SMITH], and having been unable to get a transfer I with-

The result was announced—yeas 32, nays 37, as follows:

So Mr. Gallinger's amendment to the amendment of the committee was rejected.

Mr. McCUMBER. I offer the following amendment to be inserted after the word "thereto" in line 6, on page 209.

The VICE PRESIDENT. The amendment to the amend-

ment will be stated.

The Secretary. On page 209, line 6, after the word "thereto," insert:

But upon such examination as to competency and fitness as may be prescribed by the Civil Service Commission.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from North Dakota to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. McCUMBER. I now offer the following amendment, which is the same as that just offered and defeated by the other side, except that it provides that upon such examination as to competency and fitness as may be prescribed by the Secretary of the Treasury, and upon it I shall ask for the yeas and nays

The VICE PRESIDENT. The amendment to the amendment

will be stated.

The Secretary. On page 209, line 6, after the word "thereto," But upon such examination as to competency and fitness as may be prescribed by the Secretary of the Treasury.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from North Dakota to the amendment of the committee.

Mr. NORRIS. I should like to inquire of the Senator what is the object in making this exception to the ordinary rule? He proposes that the Secretary of the Treasury shall make the examination?

Mr. McCUMBER. If I could get the ordinary rule applied, I would not have offered this amendment. I have just introduced an amendment, and it was voted down, which provided for examinations as to competency and fitness by the Civil Service Commission.

Mr. NORRIS. I will say to the Senator I voted for that

amendment; I am very much in favor of it.

Mr. McCUMBER. I know; and having failed in that I desire
to get the nearest I can possible to it, and have some kind of an examination, so that these may not be wholly political appointments

Mr. NORRIS. I should think the tendency would be to make it a somewhat political appointment, because the examination would be held by a political officer rather than by the Civil Service Commission. It would make an exception to the ordinary rule of civil-service appointments. I doubt whether it

would be wise to do it. Of course we could do it, but I do not think we should.

Mr. McCUMBER. I think it would be better to have some examination than to have none at all. In the discussion of the Senator from Georgia I think he agreed that an examination

by the Secretary of the Treasury ought to be made.

Mr. NORRIS. If it was the usual rule to have that done there might be something in it, but this would break into the regular rule, making an exception, and the Senator himself concedes that it would not be as good as though it was done by the Civil Service Commission.

Mr. McCUMBER. Does the Senator see the way that the

bill has already broken into the rule?

Mr. NORRIS. I understand that. Mr. McCUMBER. I simply want to make the breach not

quite as wide as it now is. Mr. NORRIS. I agree entirely with the Senator that there' ought to be an examination and it ought to be made by the Civil

Service Commission. I am very much in favor of it.

Mr. McCUMBER. Then would the Senator say if it can not be made by the civil service it ought not to be made by anyone?

Mr. NORRIS. I would not say that.

I am forced to concede as an abstract proposition that if the Senator's amendment should be adopted it would be better than nothing. The danger, however, I fear, would be the establishment of a precedent that would perhaps be followed in the future, and before we got through we might have all kinds of examinations from all sorts of political appointees where we know the examination would be a farce.

Mr. McCUMBER. I do not think, if the Senator pleases, that it is going to establish any new precedent, if I gather the sentiment on the other side from all the votes they have cast.

Mr. NORRIS. I rather think that is true. Mr. CLAPP. Mr. President, the remark of the Senator from North Dakota just made, it seems to me, is a reason why we ought not to be asked to vote for this amendment. Either we vote for it knowing that it is absolutely a waste of time or we vote for something which we do not stand for. I for one do not stand for any modification of the civil-service law with reference to the matter contained in this bill or any other bill. If there was any use in voting for it, if there was a hope of succeeding in the vote, it would certainly put us in a position of taking a step toward modifying the civil-service law. We would not vote for this amendment if we knew that it could be adopted and made an expression of the legislation of this country with reference to the civil-service law and rules. For one, I would not vote for a precedent standing for something that was a modification of those rules.

The other side have taken these particular positions out of the civil service. We have tried earnestly and honestly to put them back. We have voted, first, to strike out the clause which exempts them, and then we have voted to place the appointments permanently within the classified service. For one I must say I do not like to be put in the attitude even by a vote of establishing a precedent here in an attempt, if no more than an attempt, to modify the civil-service law of this country and modify it with reference to this particular matter.

Having voted first to strike out the exemption and then having voted to put these places permanently within the classi-

fied service, I do not think, for one, that I can vote for the initia-tion of an attempt to modify the civil-service law. Mr. McCUMBER. Mr. President, the Senator from Minnesota is fearful lest in voting for this amendment he should vote for taking some steps to modify the civil-service law. By a failure to pass an amendment of this kind he is allowing a provision to stand which absolutely abolishes the civil-service law upon that particular branch of appointments. If I can not obtain all that I would desire, at least I would prevent, if I could, the total abandonment of the civil-service law in these appointments, and I would at least hold on to the part of it declaring that there should be an examination.

I shall not ask for the yeas and nays upon the amendment, because I know how useless it would be, and it would be taking

up time, but I will ask for a vote upon the question.

Mr. SHIVELY. Having witnessed in recent years several hundred thousand Federal officers and employees locked away in the civil service by Executive orders without civil-service examinations of any kind whatsoever, I believe the Senate is ready for a vote on the pending amendment.

Mr. GALLINGER. Mr. President, it will be interesting to learn just what the Senator means by several hundred thousand having been put into the service without examination.

Mr. SHIVELY. Not only put into the service without examination, but kept in without civil-service examination or any

Mr. GALLINGER. The most of those were put in by a Democratic President.

Mr. SHIVELY. Not at all, Mr. President. Quite the reverse. Mr. GALLINGER. Sixty or seventy thousand at one stroke

Mr. SHIVELY. Why, to-day, at least 90 per cent of the men employed in the Federal service throughout the United States are men of the Senator's own party faith.

Mr. GALLINGER. To my knowledge there are 50 per cent

in the hands of Democrats.

Mr. MARTINE of New Jersey. Mr. President, within the last five minutes I was in conversation with a gentleman who is a post-office inspector in the city of New York. He made a statement to me that seemed impossible. I asked him to put it down on paper, which he did. He says there are 390 post-office inspectors, and they are all Republicans but 35. This came under the Republican system of civil service.

Mr. GALLINGER. Will the Senator give the name of that

Mr. MARTINE of New Jersey. I would give the name, but the trouble would be that he himself is in the post-office employ in the city of New York, and I suppose that under the rules which govern it would make him amenable to some of the regulations and perhaps would hold him up. I have the name right

Mr. GALLINGER. Is he afraid of being dismissed by a Demo-

eratic President and a Democratic Postmaster General?

Mr. MARTINE of New Jersey. Whether dismissed by a Democratic or Republican President or not, he would be amenable to the rules.

Mr. GALLINGER. Then, did the Senator from New Jersey permit an official to violate the rules by communicating this to him?

Mr. MARTINE of New Jersey. We have not absolute hold of that thing yet, but we will have it in the near future.

Mr. GALLINGER. The Senator did not understand me. Did

the Senator permit an official to violate the rules of the Post Office Department by bringing this information to him?

Mr. MARTINE of New Jersey. I do not speak understandingly that there is such a rule, but I believe there is a rule. I say advisedly before the Senate of the United States that this gentleman, whom I know, whose name is here, made this state-

ment and placed those figures on this paper. Now, I think that is about in harmony with the general line of the operation of the civil service. I would have the best civil service in the world. I would not appoint a man unless he was fit and competent. Fitness and competency should be the qualification in every instance. I say advisedly that I would not appoint any man to office, however insignificant the office was, simply because of the fact that he was a Democrat; but I would not appoint a man to office unless he was a Democrat

under this system. Mr. GALLINGER. The Senator had-

Mr. MARTINE of New Jersey. I say if this civil-service proposition of examination were carried out here in the Senate I think there would be comparatively a small percentage of us who would be able to pass. I think, in the college phrase, we would "flunk." I believe it is possible for us to have a good and efficient service in the Internal-Revenue Service, in the Post Office Department, and in all the other branches of the Government without being compelled to go through the process of the civil service. I think there is an infinite amount of truth in the thought advanced here that young men or young women from high schools would pass most flippantly and glibly an examination which others who for 40 or 50 years of our lives have been fairly successful in the transaction of business, who have led honest and sober lives, would find it impossible to pass. I do not believe that the public service or the well-being of our country would be enhanced if that system is pressed any further.

Mr. GALLINGER. The Senator from New Jersey has declared his business position. It is that he would not appoint anybody to office but a Democrat; so that if the young men and the young women who pass the civil-service examination chance to be Republicans or Prohibitionists the Senator would not

Mr. MARTINE of New Jersey. I will do that which in my conscience and judgment will best advance the welfare of my country. I am a Democrat. I believe in the teachings and dogmas and principles of my party. I can not make my Gov-ernment a success by installing New Hampshire Republicans. Mr. GALLINGER. But the Senator from New Jersey has a

conscience that does not allow him to go beyond appointing

Democrats to office.

Mr. MARTINE of New Jersey. Well, my conscience is a pretty fair one

Mr. GALLINGER. It is rather elastic.

Mr. MARTINE of New Jersey. By general average throughout the length and breadth of the land, I believe in years gone by the Democratic conscience made good government for this fair land, and I believe that the Democratic conscience can be trusted here to-day to do justice to the people of this land and to advance and glorify the principles of the Democratic Party, which have been ratified and of which Woodrow Wilson to-day is the exponent.

Mr. GALLINGER. That is very beautiful, but it still leaves the Senator from New Jersey in "e attitude of being unwilling to appoint a man to office who is not a Democrat. And yet the Senator wants the best interests of the Government subserved.

Mr. MARTINE of New Jersey. I might take you in a pinch, but I venture to say I will be as liberal as the Senator from New Hampshire.

Mr. GALLINGER. Oh. no.

Mr. MARTINE of New Jersey. Tell me how many Democrats, dyed-in-the-wool, real, genuine Democrats, not make-believe ones, the Senator has been the means of installing.

Mr. GALLINGER. I have recommended the appointment of quite a number to positions to which I thought they were

entitled.

Mr. MARTINE of New Jersey. It would be ungenerous not to take the Senator's word for that. I will have to take his

word for it.

Mr. BRISTOW. Mr. President, the Senator from Indiana [Mr. Shively] undertook to create the impression, as I infer from what he has said, that the covering of Federal employees into the civil service by Executive order has resulted in hundreds of thousands of Republicans being now in the service who would not be there if the civil-service law had been properly administered. The Senator from Indiana ought to know that it has been the custom of the Presidents for a generation, at least since the civil-service law was enacted, to ex-Provision was made in the law for its extension by Executive order.

Mr. GALLINGER. In a separate law.

Mr. BRISTOW. And when it is extended by Executive order it covers all those who are then employed and are affected by the order. Mr. Cleveland, when he was President, extended very largely, and his example has been followed by the Presidents who have succeeded him. In one order issued a few months before Mr. Cleveland retired from the Presidency, he covered into the service thousands of men who had been appointed upon political recommendation without examination. I do not complain of that; that was the method that was established by the Congress for extending the civil service. Presidents who have followed him have extended the law and covered in .nembers of their own political parties. To endeavor to create the impression by remarks here that the civil service had been made partisan is an unjust reflection upon the Executives of the past, as well as upon the administration of the Civil Service Commission.

Mr. JAMES. I should like to ask the Senator from Kansas if he can state the exact date when President Taft covered into the civil service about 30,000 fourth-class postmasters?

Mr. BRISTOW. I do not care to state the date he did it.

Mr. JAMES. Does the Senator approve it? Mr. BRISTOW. Of course, I approve it.

Mr. JAMES. Does he approve the covering in of all the fourth-class postmasters throughout the Southern States who robbed Roosevelt of the Republican nomination for President?

Mr. BRISTOW. That has nothing to do with this question before us now.

Mr. JAMES. That is a fact, nevertheless.

Mr. BRISTOW. I do not care whether it is a fact or not. What has that got to do with the civil-service provision we are discussing?

Mr. JAMES. I know the Senator does not care whether or

not it is a fact. That is the reason I brought it out.

Mr. OVERMAN. Can the Senator from Kansas tell me, when Mr. Cleveland went out of office and his successor came in, how many thousand who had been covered into the civil service by Mr. Cleveland were turned out of office by his successor?

Mr. BRISTOW. Very few. Mr. OVERMAN. Were the

Mr. OVERMAN. Were there any? Mr. BRISTOW. Yes; I think there were some.

Mr. OVERMAN. I am here to tell the Senator that I believe there were hundreds of them.

Mr. BRISTOW. Oh, no; not that many. Mr. OVERMAN. I know of one case of my own knowledge, where I saw an affidavit of the chairman of the Republican national committee, which has been placed on file, setting forth the fact that a certain man in my State was turned out of office after he had been covered into the civil service simply and solely because he was a Democrat. It was done in that case and it

was done in thousands of other cases.

Mr. BRISTOW. Well, "thousands" are too many.

Mr. OVERMAN. Well, hundreds.

Mr. BRISTOW. "Thousands" are too many. I will not say that on the incoming of the McKinley administration men were not removed occasionally for political purposes who should not have been removed; I think a few of them were, but not many. I think also that a number were removed for cause who convinced their political friends that they were removed for political purposes, when in fact they were removed for inefficiency or for malfeasance in office. It is a familiar practice when any Federal employee gets into trouble to attribute that trouble to political reasons instead of to the real reasons. That occurs under all administrations.

So far as the civil service is concerned, I believe that, with few exceptions, during the last 25 years it has been administered honestly and efficiently. I believe that there should be some changes in the law. The extension of the civil service has been brought about by the executive department in the face of hostility on the part of the Congress, because Congress has not been friendly to civil-service reform. Its extension has been in the face of pronounced opposition time after time by Congress. I want to say that I think we have made greater progress by giving the Executive the power to extend it than we would have made if that authority had been reserved to Congress itself, because the Executive realizes the necessity of having men to perform the clerical work of this great Government who are not controlled by political motives, but who are selected because of their competency, irrespective of their political affiliations.

Mr. JAMES. Mr. President——

The VICE PRESIDENT. Does the Senator from Kansas yield

to the Senator from Kentucky?

Mr. BRISTOW. I do.

Mr. JAMES. I should like to ask the Senator from Kansas what he thinks would have been the effect of the issuance of an order by President Taft covering into the civil service 30,000 fourth-class postmasters if that order had been issued before the last Republican national convention was held in Chicago?

Mr. BRISTOW. I do not know what might have been the effect of it. If the Senator from Kentucky has any fault with President Taft because he used the civil service to promote his political fortunes, I am not going to hold a controversy with him in regard to that. I do not believe that the last administration was as careful to obey the spirit of the civil-service law

as it should have been; that is my judgment.

Mr. JAMES. But the Senator from Kansas told me a moment ago, when I inquired as to how many of those post-masters had participated in the wholesale robbery of Theodore Roosevelt in the Chicago convention, that that made no difference. Now, I am pointing out to the Senator from Kansas that President Taft served the people of the United States for a little more than three and a half years as President, and that he never did put those postmasters under civil-service protec-tion until after his fight for the nomination for the Presidency was over and he saw in front of him overwhelming defeat.

Mr. BRISTOW. As to what may have been President Taft's motive I do not propose now to inquire. It may have been as worthy as the motive of the Senator from Kentucky or my own motive in any act that he or I may have performed, and it may not have been; but if President Taft did cover into the civil service the fourth-class postmasters of the country he did a good thing, and I am not at all in sympathy with the subterfuge that has been resorted to by this administration to destroy the

effect of that order.

Mr. JAMES. And the Senator approves that order, notwithstanding the fact that it was issued without having any examination whatever to test the qualifications of the respective

Mr. BRISTOW. Those postmasters had served the United States Government in the capacity of postmasters. If they are not competent, they should be removed by this administration now. It has the authority to remove any man from the service who is incompetent, whether he is in the civil service or not. When those postmasters by their experience, by actual service, have demonstrated that they are qualified to conduct the affairs of their offices in a creditable way, they are entitled to stay there so long as they shall satisfactorily perform the duties of their office. If they are not efficient, if their service is not properly rendered, if their experience demonstrates that fact to the present administration, they should be removed for that cause.

Mr. JAMES. So that, if I understand the Senator from Kansas correctly, the ideal civil-service system is one that does not accord to all the people the right of competition for the place under proper examination, but appoints them as Republicans and solely on account of their politics and then covers them under the protecting wing of the civil service without requiring any examination at all. That was what was done in the case to which I have referred.

Mr. BRISTOW. An examination-Mr. WEEKS. Mr. President—

Mr. BRISTOW. If the Senator from Massachusetts will pardon me for just a moment, an examination is held for the purpose of determining the fitness of the applicant for the office which he seeks. If a man is in office and is performing the duties of the office, then it is easy to determine whether he is competent, because he has a record to show that fact, and an examination is not necessary.

I agree that is the case ordinarily, and, of Mr. JAMES. course, we are going to make a thorough examination into the qualifications of these various officials; but I doubt not that, after we do that and find many of them disqualified, as I have no doubt we will, the Senator from Kansas will be quite vehement in declaring when we remove them that we are doing

it all for partisan purposes.

Mr. BRISTOW. Oh, well, the Senator from Kansas may or may not; it depends upon whether he would be justified in making such a declaration. The Senator says that they are going to determine the qualifications of these men by examination; and yet the very amendment which we have been discussing all the afternoon declares that they shall not be examined to determine as to their qualifications, but shall be

appointed independent of any civil-service law.

Mr. JAMES. Let me ask the Senator another question. Does not the Senator admit, if the spirit of the civil-service law is to be actually carried out in justice to all men, without regard to politics, that instead of covering in a blanket fashion all of these officeholders into the protection of the civil service it would have been better, fairer, and more nonpartisan to have allowed examinations to have been held, so as to ascertain whether or not they might have found some straggling Democrats down in Kentucky who had at least enough wisdom to perform the duties of these offices?

Mr. BRISTOW. Let me ask the Senator if he believes when a man is in office performing the duties of the office it is necessary to hold an examination to find out whether or not he is properly attending to those duties? You may examine the record he has made, with a view of determining whether he is efficient, but if he is in office and performing its duties, to give him an examination to determine whether or not he is competent to fill the office is simply ridiculous.

Mr. JAMES. He did not get that office under civil-service

rules.

Mr. BRISTOW. Of course he did not-

Mr. JAMES. He got it from his party as a reward, doubtless, for party service; and all at once you discovered that it is necessary to extend the protection of the civil service to him on the eve of Democratic success.

Mr. BRISTOW. Does not the Senator from Kentucky know that that has been the method in vogue heretofore? Did not President Cleveland, a Democratic President, do exactly the same thing?

Mr. JAMES. President Cleveland did not do exactly the

same thing, nor anything like it.

Mr. BRISTOW. Did he not extend the civil service system and cover in men who had not taken an examination to deter-

mine their fitness before they were appointed?

Mr. JAMES. No other President of the United States ever did the same thing. President Taft stands to-day lonely, with the absolute distinction of being the only President who ever did, in front of impending defeat and for the purpose of covering under protection his own partisans, extend the civil service system.

Mr. BRISTOW. The Senator is simply not informed; that is all. If he will look up the record of his own party under the administration of President Cleveland, he will see that that President did exactly the same thing. I am not complaining of it. We have got to extend the civil service, and I do not know a better way than the one which has been employed. It has not been a partisan question. The same method which President Cleveland followed was followed by McKinley, Roosevelt, and Taft, and will be followed by President Wilson, if he lives out the term of his office.

Mr. WEEKS. Mr. President, I hardly think the Senator from Kentucky [Mr. James] is justified in the inference he has

drawn about the motive which governed President Taft in extending the civil-service system to fourth-class postmasters; that is, that it would affect his election. I should like to remind the Senator that fourth-class postmasters in the Northern and Eastern States-that is, north of the Ohio and east of the Mississippi River-had been under the civil-service law for several years, and the extension which President Taft made only applied to postmasters of a section of the country where there could be little or no possibility of his receiving an electoral vote.

Furthermore, Mr. President, I want to remin1 the Senator from Kentucky that President Cleveland in the last days of his first administration covered the whole Railway Mail Service into

the civil service without any examination whatever.

Mr. SHIVELY. Mr. President-

The VICE PRESIDENT. The Senator from Indiana.

Mr. SHIVELY. The Senate should be reminded also that President Cleveland's successor revoked the order, dismissed large numbers without cause other than politics, refilled the service with partisans without examinations, and then restored But this was not the purpose for which I rose. Rather have I risen to remind the Senate that the pending legislation is not without precedent that might be regarded as respectable on the other side of the Chamber. I invite attention to page 218 of the United States Statutes at Large for the Fifty-ninth Congress, and to section 3 of the act there set forth and entitled "An act for the withdrawal from bond, tax free, of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials." That act was passed by a Congress Republican in both branches.

Mr. BRISTOW. Mr. President, that has been referred to here this afternoon.

Mr. SHIVELY. Just wait a moment—— Mr. BRISTOW. It has been read here this afternoon, I presume in the Senator's absence.

Mr. SHIVELY. It has been referred to, but not read.
Mr. BRISTOW. I do not care what the language was—
Mr. SHIVELY. But I do, and now the Senator will suspend until I yield to him.

Mr. BRISTOW. I will be very glad to do so.
The VICE PRESIDENT. The Senator from Indiana declines to yield.

Mr. SHIVELY. The act the title of which I have read was approved June 7, 1906. Senators who are shocked by the language of the pending amendment are invited to compare it with the language of that act. The concluding clause of section 3 of that act reads as follows:

For a period of two years from and after the passage of this act the force authorized by this section of this act shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, and without compliance with the conditions prescribed by the act entitled "An act to regulate and improve the civil service," approved January 16, 1883, and amendments thereof, and with such compensation as the Commissioner of Internal Revenue may fix, with the approval of the Secretary of the Treasury.

Mr. SMITH of Arizona. Has the Senator stated who was

President then?

Mr. SHIVELY. I have not. Of course, Theodore Roosevelt was President at the time, and approved the act. He had been training for years with the school of politicians, or statesmen, if preferred, who professed stout allegiance to the cause of civilservice reform. He himself had been a member of the United States Civil Service Commission. I am not appraising the wisdom of that act; it may not have been wise in all respects. But the words of the pending bill on the subject under controversy are precisely the words of that act. I assume there were exceptional reasons then, as there are now. Yet, Senators on the other side of the Chamber profess to see something novel and startling in a provision which after due consideration was deliberately incorporated in the act of 1906.

Mr. JAMES. Mr. President, the Senator from Massachusetts [Mr. Weeks] entirely misunderstood the statement I made in regard to President Taft. I never suggested that President Taft had covered fourth-class postmasters into the civil service upon the idea or with the hope that it would aid him to secure a single electoral vote in the final election. I am very well aware that President Taft knew before the November election that he was defeated. What I did say was that the Southern States, where the postmasters have been appointed without regard to the civil service, was the field of contest between President Taft and ex-President Roosevelt for the Republican nomination. If President Taft had covered the postmasters into the civil service before that contest, then there might have been some suggestion here that it was entirely for the good of the service, but I have my own opinion about why he covered those postmasters under the protection of the civil service after the Chicago convention was

held, and my opinion is that he did it because these men had been his friends and had helped him to secure that nomination. It was charged in Chicago-and they had affidavits to sustain the charge—that the postmasters in the Southern States took charge of the polls at the delegate elections and carried those States for President Taft. The point I make is this: These men, guilty as Roosevelt himself charged them and as many people believed, who had robbed Roosevelt of a nomination and participated in politics to that extent, were covered into the civil service by a blanket order-30,000 of them-without any examination being held or any investigation being made as to their participation in politics. This was done, in my judgment, as a reward for partisan work of the most reprehensible character, and was not for the good of the public service and does not meet the approval of the American people.

Mr. BRISTOW. Mr. President, so far as concerns the law relating to denatured alcohol which the Senator from Indiana read, I do not approve the provision in that law any more than I approve this. I suppose the same motive was behind that exemption that is behind this-that is, to exempt the appointments from the civil service so as to make them matters of

political patronage.

The fact that that was done under President Roosevelt's administration is no reflection upon him. It is true that he might have vetoed the bill. President Wilson might veto this bill. Judging from his declarations in the past, I do not believe that he believes in any such provision as the one that is incorporated here. If the majority in this Chamber believed President Wilson was in favor of the spoils system, they would not make it mandatory in the law that he should not use the Civil Service Commission and the civil-service law in filling these places. They would leave it discretionary with him. He has the power now to exempt these appointments from the civilservice law if he cares to do so. But no; it is not left to his judgment or his discretion; and it would be just as fair to denounce him in the future because he signed the bill containing this provision or this amendment as it would be to denounce President Roosevelt because he approved a bill that had a similar provision in it.

That method of argument is one that has been resorted to a great deal during the consideration of this bill. The fact that something was done a few years ago by a Republican Congress and a Republican administration seems to justify doing the same thing now; and time and again that argument has been brought up as the reason why something has been done that has

met criticism from some Members of this body.

Mr. WILLIAMS. Mr. President, can we not have a vote? Mr. BRISTOW. As to the opinion of the Senator from Kentucky with regard to the motives of President Taft, I have no interest in that matter now. They may have been worthy, and they may have been unworthy. The Senator from Kentucky may be right as to his motives. I am not going to discuss that question with the Senator from Kentucky. But if he extended the civil-service law so as to take out of politics the fourthclass postmasters, the result of that order, if it were permitted to stand, would be good for the administration of our postal affairs.

Mr. POMERENE. Mr. President, in view of the discussion that has taken place on the subject of the civil service, it seems to me it may not be out of place to give a few figures relating to the number of men who were covered into the civil service under the several administrations. An examination of the record shows the growth of the competitive classified service by various Executive orders.

Under President Arthur there were covered into the civil service 15,573 places.

Under President Cleveland's first administration there were placed under the civil service, by Executive order, 11,757 places. Under President Harrison's administration there were placed under the civil service, by Executive order, 15,598 places.

Under President Cleveland's second administration there were placed under the civil service, by Executive order, 38,961 places. Under President McKinley's administration there were placed

under the civil service, by Executive order, 3,261 places.

Under President Roosevelt's administration there were placed under the civil service, by Executive order, 34,766 places.

Under President Taft's administration there were placed un-

der the civil service, by Executive order, 41,559 places.

I have not been in the city of Washington very long, but I have been here long enough to justify the statement that the civil service is a very much more beautiful thing in profession than it has been in practice.

It seems to me-and this remark applies as well to past Democratic administrations as to Republican administrationsthat if these Executive orders had been issued at the beginning

instead of at the end of the different administrations we could have more confidence in the good faith of the orders. It does seem to me that the American public is justified in having some suspicion with regard to the good faith which has actuated the making of these orders when we bear in mind that the places have been filled by the spoils system, and after they had been filled under the operation of the spoils system they have been covered with the cloak of civil service. That is not the kind of civil service in which I believe, and I am a believer in honest civil-service reform.

Mr. NORRIS. Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Nebraska?

Mr. POMERENE. I do.

Mr. NORRIS. While I agree most fully with the Senator, at least in all but the last remark he has made, I wish to suggest to him that these various Presidents, both Republican and Democratic, found these offices already filled with spoilsmen. I would have had more faith in their good faith if they had done as the Senator says, and had covered them in at the beginning of their administrations. But in fairness it seems to me we ought to say as to all of them that the only difference was that they put their spoilsmen in at one time, when if they had done it before they would have put in spoilsmen of a different political faith. They would have been spoilsmen anyway.

Mr. POMERENE. Mr. President, I think an examination of the record will show that most of these orders were made near the ends of the administrations. I am not complaining of one party more than another in this matter. I am simply adverting to the system as it exists and as it has been administered.

I have had occasion to make some inquiry. I think it will be found in many of the departments, at least, that there are about nine Republicans to one Democrat. I think it will be further found that on the eligible lists, from which these places are filled, about nine out of ten of the persons are Republicans, am not willing to admit that the intellectual qualities of the Republicans who apply for examination are so far superior to those of the Democrats who apply for admission to the official service of the country as to justify this disparity.

All this I say as reflecting the difference between the two propositions, namely: Is it right to extend the civil-service system by Executive order and wrong to extend it by legislative act? If we must condemn the one, why not condemn both?

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from North Dakota [Mr. McCumber] to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. CUMMINS. I offer an amendment to follow the word "appointment," in line 12, page 209.

The VICE PRESIDENT. The amendment to the amend-

ment will be stated.

The Secretary. On page 209, line 12, after the word "appointment," it is proposed to insert:

Provided further, That the persons so appointed without the examination required by the said act approved January 16, 1883, and acts amendatory thereof, shall not be covered into the regular classified service without competitive examination.

Mr. CUMMINS. Mr. President, I shall occupy but a moment. During the last hour we have heard a great deal with respect to the wrongdoing in the past. That is water over the dam.

It can not be recovered. But we can care for the future.

The bill, as it has been already approved by the Democratic majority, annihilates the civil service so far as these offices are concerned-offices that are already within the scope of the classified service, and which would be filled from the classified

lists were it not for the bill about to be passed.

I have nothing further to say about that innovation upon the service. But I do propose in this amendment that the persons appointed under the authority here conferred, inasmuch as they are not to bear the burden of a competitive examination, shall not be clothed with the immunities and the privileges which the law confers upon those who have passed a competitive examination. I propose to allow them to stand separate and apart from the other persons in the service, so that no Executive can cover them into the service and give them without examination the protection which the civil-service law

I have much sympathy with the observation made by the Senator from Kentucky [Mr. James]. If he is right respecting that criticism he will vote for this amendment, which will prevent these persons being covered into the service in the future without the competitive examination.

Mr. POINDEXTER. Mr. President, I do not desire to delay a vote upon this amendment except long enough to express my approval of the amendment offered by the Senator from Iowa,

and to say that it seems to me, carrying out the spirit of the proper civil service, that the Executive order covering—I use that word as it is in common use-into the civil service certain offices ought to apply to the offices themselves, and not to the incumbents that are in the offices at the time the order is made.

In what he has said about the abuse of a great principle like the civil service, the Senator from Kentucky [Mr. James] is undoubtedly correct, and he might have said a great deal more. In my judgment, the motive of the President at that time in applying the civil-service rules to all the fourth-class postmasters then in office was so bad that it was disreputable.

There ought to be such a system in practice in putting into the civil service different officers of the Government as would make an act of that kind impossible and prevent its recurrence in the future. It ought to refer to future appointments to offices. Take postmasters, for example. If President Taft had made an order that hereafter all appointments of fourth-class postmasters should be subject to the civil-service rules it would have been fair to the Republican Party and to the Democratic Party and would not have been used under the guise of applying a great principle in the interest of good government to prostitute it to partisan politics of the worst description.

I think the amendment of the Senator from Iowa would tend to bring about that sort of administration.

The VICE PRESIDENT. The question is upon agreeing to the amendment of the Senator from Iowa [Mr. CUMMINS] to the amendment of the committee.

Mr. CUMMINS. On that I ask for the yeas and nays.

The year and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I will transfer my pair with the junior Senator from Maryland [Mr. Jackson] to the Senator from Virginia [Mr. MARTIN] and vote. I vote

Mr. GALLINGER (when his name was called). I transfer my pair with the junior Senator from New York [Mr. O'Gor-MAN] to the junior Senator from Maine [Mr. BURLEIGH] and vote. I vote "yea."

Mr. KERN (when his name was called). Announcing my

pair with the Senator from Kentucky [Mr. Bradley], I with-

hold my vote.

Mr. McCUMBER (when his name was called). my pair with the senior Senator from Nevada [Mr. NEWLANDS] to the Senator from New Mexico [Mr. Fall] and vote "yea."

Mr. THOMAS (when his name was called). I make the same transfer as before and vote "nay."

The roll call was concluded. Mr. REED. I transfer my pair with the Senator from Michigan [Mr. Smith] to the Senator from Nebraska [Mr. Hitch-cock] and vote "nay."

Mr. MYERS. Has the Senator from Connecticut [Mr. Mc-

LEAN] voted?

The VICE PRESIDENT. He has not.

Mr. MYERS. I am paired with that Senator and withhold my vote.

Mr. BRYAN. I am paired with the junior Senator from Michigan [Mr. Townsend]. In his absence, I withhold my vote. Mr. WILLIAMS (after having voted in the negative). got again. I want to withdraw my vote. I am paired with the

Senator from Pennsylvania [Mr. Penrose].

Mr. GALLINGER. I desire to announce that the Senator from Delaware [Mr. DU PONT] is paired with the Senator from Texas [Mr. Culberson]; that the Senator from Rhode Island [Mr. Lippitt] is paired with the Senator from Tennessee [Mr. LEA]; that the Senator from Wisconsin [Mr. STEPHENSON] is paired with the Senator from South Carolina [Mr. Tillman]; and that the Senator from Michigan [Mr. Townsend] is paired with the Senator from Florida [Mr. Bryan].

The result was announced—yeas 27, nays 35, as follows:

### YEAS-27

So Mr. Cummins's amendment to the amendment of the committee was rejected.

The VICE PRESIDENT. The question recurs on agreeing to the amendment of the committee.

The amendment was agreed to.
Mr. SIMMONS. The hour of 6 o'clock having arrived, the bill may now be laid aside.

Mr. NORRIS. If I may have the attention of the Senator, I understand that we have finished the income-tax provision.

Mr. SIMMONS. Yes.

Mr. NORRIS. At this point I have an amendment that I want to offer, because the Senator from Washington [Mr. Jones has an amendment on the same subject and he is not ready to discuss it. I would like to have it go over until the other amendments that have gone over are taken up, if that course is satisfactory.

Mr. SIMMONS. Is it an amendment to the income-tax

section?

Mr. NORRIS. Yes; it is an amendment providing for an

inheritance tax, and it comes in properly at this point.

Mr. SIMMONS. I think it has been understood that we would go back for the purpose of an amendment any Senator desired to offer.

Mr. NORRIS. Several amendments have gone over, and the Senator from Washington, who has also an amendment on the same subject, desires that this may go over, to be taken up when the other amendments that have been put over are taken up.

Mr. SIMMONS. The Senator might offer the amendment at any time, I understand.

Mr. WILLIAMS. If the Senator please, does he want to

offer an amendment to our Federal inheritance tax?

Mr. NORRIS. No; the amendment that I offer will be in the way of an inheritance tax, but it comes right after the incometax provision of the bill. It comes in right now,
Mr. WILLIAMS. Does the Senator desire to repeal the pres-

ent inheritance tax and substitute a new one for it?

Mr. NORRIS. I was not aware that we have an inheritance

Mr. WILLIAMS. Yes; we have an inheritance tax.

Mr. NORRIS. I have gone on the theory that we have not an inheritance tax.

Mr. WILLIAMS. Yes; it depends on how much the inherit-

Mr. SIMMONS. If the Senator from Nebraska does not desire to offer his amendment now, he can probably offer it to-morrow

Mr. NORRIS. I thought, perhaps, it would be well to offer

it now and let it be pending with the other amendments.

Mr. WILLIAMS. I would advise the Senator to consult the present law before offering it. It may be that he will find he has what he wishes on the statute book.

Mr. NORRIS. I am obliged to the Senator for the suggestion. Mr. JONES. I should like to ask the Senator from Missis-

sippi when the inheritance law was passed?

Mr. WILLIAMS. It was passed, I think, in connection with the corporation tax.

Mr. JONES. I think the Senator is mistaken.
Mr. SIMMONS. I think the Senator from Mississippi is mistaken about it. I do not think we have an inheritance tax.

Mr. GALLINGER. Mr. President, the regular order. Mr. NORRIS. If it is agreeable to the Senator from North Carolina, I will offer the amendment now and let it be pending. The VICE PRESIDENT. The Senator from Nebraska has

a perfect right to offer the amendment now or at any other time.

Mr. NORRIS. I presume I have a right to offer it now and have it taken up now, but I do not want to do that.

Mr. JONES. I wish to suggest to the Senator from Nebraska

that it might be well to have the amendment printed in the RECORD

Mr. SIMMONS. The Senator can offer it now if he wants and it can go over, but the Senator can offer it at some later

Mr. NORRIS. I will offer it now and let it go over. I do not think it is necessary to have it read. It is quite long, and I will not ask that it be read.

Mr. SIMMONS. It is not necessary to have it read.

The VICE PRESIDENT. The amendment submitted by the Senator from Nebraska will be printed and lie on the table. The bill will be temporarily laid aside.

#### EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After seven minutes spent in executive session the doors were reopened, and (at 6 o'clock and 15 minutes p. m.) the Senate adjourned until to-morrow. Saturday, August 30, 1913, at 11 o'clock a. m.

#### NOMINATIONS.

Executive nominations received by the Senate August 29, 1913. UNITED STATES MARSHAL.

F. R. Brenneman, of Alaska, to be United States marshal for the District of Alaska, division No. 3, vice Harvey P. Sullivan, whose term has expired.

#### RECEIVER OF PUBLIC MONEYS.

Joseph E. Terrell, of Hobart, Okla., to be receiver of public moneys at Woodward, Okla., vice Charles C. Hoag; term expired May 22, 1913.

### PROMOTIONS IN THE ARMY.

#### COAST ARTILLERY CORPS.

Lieut, Col. Isaac N. Lewis, Coast Artillery Corps, to be colonel

from August 27, 1913, vice Col. John P. Wisser, who accepted an appointment as brigadier general on that date.

Maj. John P. Hains, Coast Artillery Corps, to be lieutenant colonel from August 27, 1913, vice Lieut. Col. Isaac N. Lewis, promoted.

Capt. Robert E. Wyllie, Coast Artillery Corps, to be major from August 27, 1913, vice Maj. John P. Hains, promoted. First Lieut. James B. Dillard, Coast Artillery Corps (detailed

captain in the Ordnance Department), to be captain from August

27, 1913, vice Capt. Robert E. Wyllie, promoted.

First Lieut. James K. Crain, Coast Artillery Corps, to be captain from August 27, 1913, vice Capt. James B. Dillard, whose detail in the Ordnance Department is continued from July 1.

## INFANTRY ARM.

Lieut. Col. Daniel L. Howell, Nineteenth Infantry, to be colonel from August 27, 1913. Under the provisions of an act of Congress approved March 3, 1911, this officer is named for advancement in grade in accordance with the rank he would have been entitled to hold had promotion been lineal throughout his arm since the date of his entry into the arm to which he permanently belongs.

Lieut. Col. Walter K. Wright, Twelfth Infantry, to be colonel from August 27, 1913, vice Col. Thomas F. Davis, Eighteenth Infantry, who accepted an appointment as brigadier general on

that date.

Maj. Abraham P. Buffington, Twenty-first Infantry, to be lieutenant colonel from August 27, 1913, vice Lieut. Col. Walter K. Wright, Twelfth Infantry, promoted.

Capt. Joseph C. Castner, Fourteenth Infantry, to be major from August 27, 1913, vice Maj. Abraham P. Buffington, Twenty-

first Infantry, promoted.

First Lieut. Elverton E. Fuller, Twelfth Infantry, to be captain from August 27, 1913, vice Capt. Joseph C. Castner, Fourteenth Infantry, promoted.

Second Lieut. Alvin G. Gutensohn, Twenty-seventh Infantry, to be first lieutenant from August 27, 1913, vice First Lieut. Elverton E. Fuller, Twelfth Infantry, promoted.

### PROMOTIONS IN THE NAVY.

Midshipman Neil H. Geisenhoff to be an ensign in the Navy from the 7th day of June, 1913.

Midshipman Rawson J. Valentine to be an ensign in the Navy

from the 7th day of June, 1913.

### POSTMASTERS.

### ALABAMA.

J. T. Farmer to be postmaster at Samson, Ala., in place of W. Hawke. Incumbent's commission expired December 16,

Mollie P. Henderson to be postmaster at Enterprise, Ala., in place of James A. Chambliss. Incumbent's commission expired December 16, 1912.

H. O. Sparks to be postmaster at Boaz, Ala., in place of Joe R. McCleskey, removed.

#### CALIFORNIA.

Warren A. Bradley to be postmaster at Gustine, Cal. Office became presidential July 1, 1913.

Byron Q. R. Canon to be postmaster at La Mesa, Cal., in place of Robert K. Haines, resigned.

James F. Monroe to be postmaster at Upland, Cal., in place of George B. Hayden, removed.

#### CONNECTICUT.

J. Edward Elliott to be postmaster at Central Village, Conn. Office became presidential October 1, 1912.

#### FLORIDA.

A. Keathley to be postmaster at Brooksville, Fla., in place of Charles C. Peck. Incumbent's commission expired January 26, 1913.

M. H. Sione to be postmaster at Plant City, Fla., in place of Charles E. Barnes. Incumbent's commission expired December 17, 1912.

### ILLINOIS.

John A. Freeman to be postmaster at Heyworth, Ill., in place of John S. Albin, resigned.

B. L. Greeley to be postmaster at Tremont, Ill., in place of J. H. Sipe, deceased.

Ira W. Metcalf to be postmaster at Momence, Ill., in place of

Henry C, Paradis, removed.

L. T. Neff to be postmaster at Illiopolis, Ill., in place of A. P. Bickenbach, removed.

Fred Le Roy to be postmaster at Streator, Ill., in place of John W. Fornof, resigned.

Joseph F. Traband to be postmaster at Lebanon, Ill., in place

of William L. Jones, removed.

Henry Werth to be postmaster at Breese, Ill., in place of John

Otto Koch, resigned.

#### INDIANA,

John M. Nelson to be postmaster at Crothersville, Ind., in place of William Goecker, resigned.

#### IOWA

Sebastian Dischler to be postmaster at Rock Valley, Iowa, in place of A. W. Hakes. Incumbent's commission expired April 23, 1913.

M. H. Kelly to be postmaster at Waterloo, Iowa, in place of

M. H. Kelly to be postmaster at Waterloo, Iowa, in place of William Robert Law. Incumbent's commission expired May 18, 1913.

J. S. Wildman to be postmaster at Blockton, Iowa, in place of N. O. Hickenlooper, resigned.

### KENTUCKY.

J. B. Cray to be postmaster at Millersburg, Ky., in place of U. S. G. Pepper, resigned.

P. A. McIntire to be postmaster at Uniontown, Ky., in place of James W. Thomason, deceased.

### MASSACHUSETTS.

John Adams to be postmaster at Provincetown, Mass., in place of Joseph A. West, deceased.

Martin B. Crane to be postmaster at Merrimac, Mass., in place of George E. Ricker. Incumbent's commission expired December 14, 1912.

### MICHIGAN.

Frank D. Perkins to be postmaster at Flushing, Mich., in place of M. B. Halliwell, resigned.

William R. Teifer to be postmaster at Trenton, Mich. Office became presidential October 1, 1912.

### MISSOURI.

Ross Alexander to be postmaster at Mercer, Mo., in place of Edward Gloshen, resigned.

L. R. Dougherty to be postmaster at Pacific, Mo., in place of Homer Calkins, resigned.

### MONTANA.

L. H. Adams to be postmaster at Somers, Mont., in place of George Noffsinger, resigned.

W. H. B. Carter to be postmaster at Polson, Mont., in place of H. W. Douglas, resigned.

### NEW JERSEY.

George Deiss, jr., to be postmaster at Bradley Beach, N. J., in place of Charles F. Burney. Incumbent's commission expired December 16, 1912.

Adolphus Landmann to be postmaster at Oradell, N. J., in place of Edmund Maples. Incumbent's commission expired July 23, 1913.

Henry Otto to be postmaster at Egg Harbor City, N. J., in place of Charles Morganweck. Incumbent's commission expired January 26, 1913.

#### NEW YORK.

E. A. Arnold to be postmaster at Katonah, N. Y., in place of David A. Doyle, deceased.

Leo R. Grover to be postmaster at Silver Springs, N. Y., in place of Albert H. Clark. Incumbent's commission expired February 9, 1913.

William Y. McIntosh to be postmaster at Pleasantville (late Pleasantville Station), N. Y., in place of William H. Marshall, to change name of office.

Hiram E. Safford to be postmaster at Cherry Creek, N. Y., in place of Charles J. Shults, removed.

#### NORTH DAKOTA.

John Foran to be postmaster at Mandan, N. Dak., in place of William Simpson. Incumbent's commission expired July 20, 1913.

Lydia Gullickson to be postmaster at Goodrich, N. Dak. Office became presidential July 1, 1913.

#### OHIO.

Wiley K. Miller to be postmaster at Shreve, Ohio, in place of Reno H. Critchfield. Incumbent's commission expired August 5, 1913.

### OKLAHOMA.

J. M. Crutchfield to be postmaster at Tulsa, Okla., in place of Walter I. Reneau, removed.

W. H. Davis to be postmaster at Stilwell, Okla., in place of Sid Smith. Incumbent's commission expired June 12, 1913.

M. C. Falkenbury to be postmaster at Miami, Okla., in place of Harland J. Butler. Incumbent's commission expired January 14, 1913.

14, 1913.
Walter T. Fears to be postmaster at Eufaula, Okla., in place of Bruce McKinley, resigned.

S. R. Hawks, jr., to be postmaster at Clinton, Okla., in place of Frank Gallop. Incumbent's commission expired January 28, 1913.

W. T. Kniseley to be postmaster at Glencoe, Okla., in place of Poe B. Vandament, resigned.

#### OREGON.

Esther Evers to be postmaster at Huntington, Oreg., in place of Herbert H. Mack, removed.

## SOUTH CAROLINA.

Henry P. Tindal to be postmaster at North, S. C. Office became presidential January 1, 1913.

### SOUTH DAKOTA.

Hugh J. McMahon to be postmaster at Philip, S. Dak., in place of A. W. Prewitt. Incumbent's commission expired June 14, 1913.

### TEXAS.

T. J. Lilley to be postmaster at Whitewright, Tex., in place of A. H. Davis. Incumbent's commission expired July 20, 1913.

J. W. Whatley to be postmaster at Miami, Tex., in place of Charles S. Seiber, resigned.

### WASHINGTON.

George P. Wall to be postmaster at Winlock, Wash., in place of John L. Gruber, resigned.

## WEST VIRGINIA.

J. Carl Vance to be postmaster at Clarksburg, W. Va., in place of Sherman C. Denham, removed.

### WISCONSIN.

J. P. Keating to be postmaster at Neenah, Wis., in place of Leonard H. Kimball, deceased.

George F. Mader to be postmaster at Winneconne, Wis., in place of George E. King. Incumbent's commission expired December 14, 1912.

Fred Seifert to be postmaster at Jefferson, Wis., in place of George J. Kispert, removed.

## CONFIRMATIONS.

Executive nominations confirmed by the Senate August 29, 1913.

MEMBERS OF EXCISE BOARD FOR THE DISTRICT OF COLUMBIA. Henry S. Baker to be a member of the Excise Board for the

District of Columbia.

Robert G. Smith to be a member of the Excise Board for the District of Columbia.

Joseph C. Sheehy to be a member of the Excise Board for the District of Columbia.

ASSISTANT SURGEONS IN THE PUBLIC HEALTH SERVICE.

Howard Franklin Smith to be assistant surgeon.

Lon Oliver Weldon to be assistant surgeon.

POSTMASTERS.

MASSACHUSETTS.

Edmund S. Higgins, Lynn.

MINNESOTA.

Emil A. Kurr, Sauk Rapids. George Lien, Granite Falls.

Charles E. Gain, London. Stewart D. Hazlett, Ada. Adam H. Meeker, Greenville.

OKLAHOMA.

J. L. Avery, Lindsay.

# HOUSE OF REPRESENTATIVES.

FRIDAY, August 29, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

Almighty God, our heavenly Father, with whom there is no variableness, neither shadow of turning; the same yesterday, to-day, and forever; help us as we thus pause amid the busy whirl and turmoil of life's activities to fix our thoughts upon the eternal values. "Truth crushed to earth shall rise again." Justice, though long delayed, shall assert itself, and love, the crown of all humanity, shall at last claim its own. May we be the humble instruments in Thy hands to hasten the day; and we will ascribe all praise to Thee, through Jesus Christ our Lord. Amen.

The Journal of the proceedings of Wednesday, August 27, 1913,

was read and approved.

DESIGNATION OF SPEAKER PRO TEMPORE.

The SPEAKER. The Chair designates Mr. HAY to preside to-morrow.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 1620. An act to provide for representation of the United States at the Fourteenth International Congress on Alcoholism, and for other purposes.

BILLS ON THE PRIVATE CALENDAR.

Mr. DENT. Mr. Speaker, I ask unanimous consent that the House, as in Committee of the Whole House, consider the only two bills on the Private Calendar.

The SPEAKER pro tempore (Mr. HAY). The gentleman from Alabama [Mr. DENT] asks unanimous consent that the

House, as in Committee of the Whole House, consider bills on

the Private Calendar. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I understand the gentleman only makes that request about two bills.

Mr. DENT. Two bills. There are only two bills on the Private Calendar.

Mr. MANN. There are some other bills ordered reported. Mr. FINLEY. Mr. Speaker, reserving the right to object, I

would like to know the character of these bills.

Mr. DENT. They are simply to authorize the reappointment of two cadets to the Military Academy. They have been there and have been dismissed and want to be reappointed, and will be reappointed by their respective Congressmen.

Mr. FINLEY. On what grounds were they dismissed? Mr. DENT. One of them had exceeded his demerit record by about nine points. The other failed in only one study by only a small fraction.

Mr. FERRIS. Mr. Speaker, I have no disposition to interfere with the gentleman from Alabama, but the Speaker will remember, and likewise the House, that for several days the San Francisco waterworks bill has been the unfinished business, and I would not want anything to displace it more than these two bills. It is still the unfinished business under the unanimous consent heretofore granted, and with that understanding I have

Mr. LEVER. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Alabama if it is true that at the Military Academy they have a practice of forcing the cadets to testify at the end of the session whether or not they have any knowledge of any hazing having taken place during

the session? Mr. DENT. Mr. Speaker, I am not familiar with the situation and I could not answer the question of the gentleman. I do not know what the practice is there.

Mr. LEVER. The fact was brought to my attention, and I thought perhaps the gentleman might know something about it.
Mr. DENT. It has not been brought to my attention nor to the committee as far as I know.
Mr. LEVER. I have no objection.

The SPEAKER pro tempore. The Chair will state to the gentleman from Oklahoma that this unanimous consent will not interfere with the unanimous consent heretofore adopted. Is there objection? [After a pause.] The Chair hears noue.

#### THOMAS GREEN PEYTON.

The first business on the Private Calendar was Senate joint resolution 52, to authorize the appointment of Thomas Green Peyton as a cadet in the United States Military Academy.

The Clerk read as follows:

Resolved, etc., That the Secretary of War be, and he is hereby, authorized to appoint Thomas Green Peyton a cadet in the United States Military Academy.

The committee amendment was read as follows:

Add after the word "Academy," line 5, page 1, the following: "Provided, That this shall not operate to increase the corps of cadets at said academy as now authorized by law."

Mr. DENT. Mr. Speaker, I ask unanimous consent to amend the resolution by striking out-

The SPEAKER pro tempore. The Chair will state to the gentleman that the vote is first on the committee amendment.

I would like to make an inquiry of the gentleman from Alabama. This bill and the other bill which will be next taken up each proposes the appointment of a certain individual as a cadet at West Point; and the committee has reported an amendment in each case providing that it shall not increase the number of cadets. As I understood from the gentleman in private conversation, based upon a letter from the Secretary of War, the only effect of these bills is, first, to waive the age limit and authorize a reinstatement in one case, but that the

cadet will still have to be named by a Member of Congress?

Mr. DENT. That is absolutely true. That is the situation.

Mr. MANN. And still be a representative of one of the dis-

tricts now authorized to have a cadet?

Mr. DENT. That is absolutely the fact.

The SPEAKER pro tempore. The question is on agreeing to The SPEAKER pro tempore. the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The gentleman from Alabama [Mr. Dent] offers an amendment which the Clerk will report. Mr. DENT. Mr. Speaker, I move to strike out, in line 3, the words "Secretary of War" and insert in lieu thereof the

word "President." The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amend, line 3, by striking out the words "Secretary of War" and inserting in lieu thereof the word "President."

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from Alabama [Mr. DENT1.

The question was taken, and the amendment was agreed to. The joint resolution as amended was passed.

### ADOLPH UNGER,

The SPEAKER pro tempore. The Clerk will report the next resolution.

Mr. GARD. Mr. Speaker, I ask for the consideration of House joint resolution No. 111.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read as follows:

Joint resolution (H. J. Res. 111) to authorize the reinstatement of Adolph Unger as a cadet in the United States Military Academy.

Resolved, etc., That the President be, and he is hereby, authorized to reinstate Adolph Unger as a cadet in the United States Military Academy.

Also the following committee amendment was read:

After the word "Academy," in line 5, insert the following:
"Provided, That nothing in this resolution shall operate to increase
the number of cadets now allowed by law at the United States Military
Academy."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The joint resolution as amended was passed.

On motion of Mr. Dent, a motion to reconsider the vote by which the several resolutions were agreed to was laid on the table.

### HETCH HETCHY.

Mr. FERRIS. Mr. Speaker, under the order of business H. R. 7207 is the regular order, and before moving to go into

the Committee of the Whole I would like to see if we can agree on time for general debate. In order to get the matter before the House I move that the House resolve itself into the Committee of the Whole, and I ask unanimous consent that four hours be allowed for the purpose of general debate, two hours to be controlled by myself and the gentleman from California [Mr. RAKER], who is reporting the bill-I may not be here all the time-and two hours by the gentleman from Wyoming [Mr. Mondell], who announced two weeks ago he had some views on the subject.

Mr. MONDELL. I think the minority leader should have con-

trol of the time on this side.

Mr. MANN. Who is the ranking member?

Mr. FERRIS. The gentleman from Idaho [Mr. French], in the absence of the gentleman from Wisconsin [Mr. Lenroot], is the ranking member, but, of course, the committee is all for the

Mr. MANN. I think it would be better to proceed without limiting the time at present.

Mr. FERRIS. Well, I do not know as I have any objection to I think the gentleman realizes that where we can control debate and get under the five-minute rule it is a little better.

I would be very glad, indeed, if the bill could be disposed of, in order that I may go out into the country on Labor Day, but I expect it will take to-morrow anyway, or it may take three hours' time or it may take four hours' time. will say this, that the gentleman from Iowa [Mr. Towner] had expected to address the House in opposition to this bill for one hour. He has been called out of the city and he asks that he may have permission to insert his remarks in the RECORD, and later I hope the request will be granted.

Mr. FERRIS. Mr. Speaker, to dispose of that, I ask unanimous consent that the gentleman from Iowa [Mr. Towner] be permitted to extend his remarks in the RECORD. He has asked

for time on this bill, but is absent.

The SPEAKER pro tempore. The gentleman from Oklahoma [Mr. Ferris] asks unanimous consent that the gentleman from Iowa [Mr. Towner] have permission to extend his remarks in the RECORD on this bill. Is there objection? [After a pause.] The Chair hears none.

Mr. FERRIS. Relying on the suggestion of the gentleman from Illinois [Mr. Mann] I withdraw my request for consent to fix time now, and move, Mr. Speaker, that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 7207—the Hetch Hetchy bill.

The SPEAKER pro tempore. The gentleman from Oklahoma [Mr. Ferris] moves that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of House bill 7207. The question is on agreeing to

that motion.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of

the bill H. R. 7207, with Mr. Foster in the chair, The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of House bill 7207, which the Clerk will report.

The Clerk read the bill by title, as follows:

A bill (H. R. 7207) granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The gentleman from Oklahoma [Mr. The CHAIRMAN. Ferris] asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

Mr. MONDELL. Mr. Chairman, of course the bill will be read for amendment under the five-minute rule, so that there will be a reading of the bill at length?

The CHAIRMAN. Certainly. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, the gentleman from Pennsylvania [Mr. Kreider], who represents in the House the district formerly represented by Mr. Olmsted, lately deceased, is prepared to make a few remarks upon the life and character of Mr. Olmsted for a short time, and the gentleman from Oklahoma [Mr. Ferris] concedes that he may be given recognition now. I hope the Chair will recognize the gentleman from Pennsylvania [Mr. KREIDER].

The CHAIRMAN. The gentleman from Pennsylvania [Mr.

KREIDER] is recognized for one hour.

Mr. KREIDER. Mr. Chairman, I do not rise to pay either an adequate or a studied eulogy to our late friend, colleague, and associate, the Hon. Marlin E. Olmsted, who for 16 years served with you in this House and so ably represented the eighteenth, the capital, district of Pennsylvania. Any words of praise I might speak here will fall short of being adequate to measure our affection for the one that has passed on or the loss his countrymen feel, for a mighty man has passed away. But I desire to record a living tribute to his services and to his character on the records of this body.

It is fitting that we should say a few words to commemorate the services of those who have bequeathed to us the legacy of a life spent in devotion to high ideals. The good influence of such a life continues as long as public and private virtues are

reverenced among the sons of men.

In every time and in every clime the undying dead have risen and have lived again. Some have lived again in the beaten brass or in the sculptured marble, others in story and But, Mr. Chairman, these fleeting tributes may pass with their authors to the oblivious tomb. The beaten brass or sculptured marble may be buried beneath the accumulated dust of ages; they all pursue the paths that lead but to the grave. The brightest and best monuments, those really worth while, are those that are enshrined in the hearts and memories of their friends, associates, and fellow men with the milk of human kindness, purity, consideration, and devotion.

The pyramids are still standing, but their builders are only remembered for the oppression and misery they Scholars may dispute about the tomb of the Son of Mary, but

will anyone deny the beneficence of His influence?

Mr. Chairman, the capital district of Pennsylvania gives praise to the memory of her honored son, and well it may, for the fame of his brilliant career has brought honor to the district he loved and served so well. When the news of his sudden, untimely, and unexpected taking off was flashed across the wires and became generally known, there was genuine sorrow throughout the district. Coming as I do from his district as his succesor, I am perhaps better qualified than any other person to testify to the respect and esteem in which he was held and the confidence of his constituents, a people noted for chivalry, integrity, loyalty, appreciation, and all that goes to constitute character and good citizenship, and I feel that I express their sentiment when I say that in the death of Marlin E. Olmsted the eighteenth congressional district of Pennsylvania, the State of Pennsylvania, and the Nation (for he had become a national figure) have lost a faithful friend, a great leader; a man wise in counsel, strong in action; a doer of great deeds; constructive statesman.

Marlin Edgar Olmsted was born in Ulysses, Potter County, Pa., on May 21, 1847. He was the son of Henry Jason Olmsted and Evalena Theresa Cushing Olmsted. The Olmsted and Cushing families were among the early settlers of Potter County and always prominent in its affairs. Mr. Olmsted as a boy attended the common schools and later the Coudersport Academy. At the age of 22 years he held his first public office, being elected as auditor of the borough of Coudersport, Pa., in 1869. The same year he was appointed assistant corporation clerk and afterwards corporation clerk in the auditor general's office of Pennsylvania. Later he served in various positions of trust, honor, and responsibility. He studied law, was admitted to the bar, at once rose to a position of prominence, and was soon recognized as one of the most brilliant lawyers in the State and acquired an extensive law practice. He served eight terms—16 years—continuously in Congress, and was active and prominent in most important legislation.

It is, I believe, needless to call attention to his activities in this body nor to the fact that early in his congressional carees he became a recognized leading expert in parliamentary law. The House soon learned something of the worth of the man. He never addressed the House until he had mastered his subject, and then from the abundance of his information he was able to instruct. To such a speaker the House always listens. Olmsted was able to command attention. He might, perhaps, not be called by some a great orator. His style was deliberate, judicial, and convincing; his analysis was clear; his logic unanswerable, and behind the words was the living man—honest, truthful, and sincere. It is to such a speaker that men delight to listen and by whom people are moved by the power of reason.

He was always of the sane and normal type of mind, serene and calm, sure and reliable. He was considerate and courteous, firm in his convictions, and when those convictions found themselves rooted upon principle, unyielding but always openminded.

He was sympathetic to a degree and rejoiced in service. His life was full of good deeds to others. In his quiet way he was ever eager and watchful to be of assistance to others, often without their knowledge. Whenever there were grave cries before this House, when there were questions of high moment for decision and wise counsel was required, there was no man to whom the entire House turned with more respect and more confidence than to Mr. Olmsted. His views of life were sweet and wholesome. He was progressive without being radical. He was an optimist, not a pessimist; hopeful, not despondent. He lived as one who did daily his task and left the consequences with

On October 26, 1899, he was married to Miss Gertrude Howard, daughter of the late Maj. Conway R. Howard, of Virginia, and they were blessed with five children. His home life was ideal; he was a devoted husband, a kind and loving father. He greatly desired to spend his entire time with his family. The

place that was dearest of all to him was his home.

When he retired from this House in March he was broken in health, though he never complained. He was suffering, but gave no sign. He took a trip abroad, hoping to regain his health, but it seemed to fail, and when at last he could hope for no relief except by an operation that was pronounced extremely delicate, he decided to submit. Manly and godly man that he was, preparing for the worst, yet hoping for the best, he arranged his worldly affairs, selected his burial ground, took leave of his dear children and his loving wife, and then, with a living faith in his Saviour and his God and a prayer for his loved ones as his last benediction, he was prepared to leave all to "Him who doeth all things well." It can be truly said of Marlin E. Olmsted that "he was faithful unto death." In our weakness we can not understand why he who seemed so full of life and courage; he whose companionship was so dear to us; he who was so useful to his community; he from whose lips I never heard an unkind expression toward a fellow man, should be called away at this time. Yet some day we shall understand, "for now through a glass darkly, but then face to face; now we know in part, but then we shall know even as we are known."

Our sympathy goes out to her who now mourns the loss of a true and devoted husband. Deprived of his counsel, his support, and his love, she sits among the ruins of a broken family circle, and at her lonely fireside, waiting; yes, waiting "for the touch of a vanished hand, and the sound of a voice that is still." We

say he is dead. "He is not dead, but sleepeth."

The night dew that falls,
Though in silence it weeps,
Shall brighten with verdure
The grave where he sleeps.

And the tear that we shed, Though in secret it rolls, Shall long keep his memory Green in our souls.

[Applause.]

Mr. FERRIS. Mr. Chairman, I shall at this time detain the committee only a few moments. My colleague on the committee, the gentleman from California [Mr. RAKER], has drawn the report on the bill and will make a more exhaustive state-

ment concerning it than I am prepared to do.

This bill, as the committee knows, is known as the San Francisco Hetch Hetchy waterworks bill. The committee has been convinced by conversations had with Secretary Lane, with city officials of San Francisco, and conversations and hearings had with 11 Members of Congress from California, that the city of San Francisco is suffering from a water famine. About onethird of the city is without water connection, and those connected with the system are not permitted to use any considerable proportion of what they actually need. Notices are running in the papers out there to prohibit the watering of lawns, to prohibit the washing of steps, and generally to curtail the use of water. In fact, the city of San Francisco is not using one-half of the water that the people need. The lawns and the shrubbery and the plants are suffering for want of water.

Secretary Lane appeared before the committee. He used to be city attorney of that city. He explained the situation to us. There is a letter printed in this report which explains that situation. I do not say this with any idea of embarrassing San Francisco, because I believe if this bill can be passed the people of that city can handle the situation. On this point I will

insert Secretary Lane's lettter:

LANE URGES ACTION.

[Copy of letter from Hon. Franklin K. Lane, Secretary of the Interior, to Hon. OSCAR W. UNDERWOOD, House of Representatives, which letter was transmitted to Hon. Scott Ferris, chairman Public Lands Committee.]

THE SECRETARY OF Washington, May 29, 1913.

The newspapers and others are keeping it as quiet as possible, but the situation is one of emergency and of actual distress. As you doubtless know there has been pending here for some 10 years or more an application before this department for rights of way which will permit the use of the Hetch Hetchy Valley as a reservoir for San Francisco's water supply.

use of the Hetch Hetchy Valley as a reservoir for San Francisco's water supply.

When I was city attorney for San Francisco I made an argument before Secretary Hitchcock in this matter and have been interested in it ever since. Secretary Fisher just before he went out of office said that the matter was one that should be dealt with by Congress. I was appealed to to revoke this decision, but said that owing to the fact that I had been a constant advocate of such a permit and was one of the attorneys of record in the matter I felt it would be improper for me to act further than to express to Congress my opinion that this was a matter almost vital to San Francisco's growth as well as her present needs.

needs. I am advised to-day that the matter of securing the necessary legislation under which the Tuolumne waters may be used for a municipal water supply can be taken up by Congress as an emergency matter if you will say the word. San Francisco's need is so great that I think such action would be entirely justifiable. There is absolutely no politics in the matter. The president of the Spring Valley Water Co., which now supplies the city, in describing the water supply in that city recently said, "It is doing the city more harm than the earthquake ever did."

did."

I quite realize the pressure that is brought to bear upon you with respect to legislation that Members desire to push at this session. This fact, however, is not to be lost sight of, that a delay as to the Hetch Hetchy water supply now means the postponement for at least a year of securing the relief for San Francisco. There is sufficient data already had for the Land Committee to act upon and there is no question of policy involved affecting anything other than this one proposition.

I hope from these considerations that you will find it practicable to make the exception and permit this proposition to be considered during this session of Congress

Respectfully, yours,

Franklin K. Lane.

This bill grants to them a right of way over a part of the Stanislaus National Forest and part of the Hetch Hetchy Val-ley, which is 20 miles from the Yosemite National Park. The dam site is 142 miles from the city of San Francisco. The dam will, when completed, be about 300 feet high. It will cost San Francisco about \$77,000,000, no part of which is to be paid for by the Federal Government. In return for this grant, or, rather, almost a sale or a condition precedent, the city of San Francisco and San Francisco County agree to construct roads and trails and bridges and improvements which aggregate approximately \$1,000,000.

In addition to that, beginning at the end of a five-year period, which it is assumed will be required to construct the dam, San Francisco agrees to pay \$15,000 a year for the first 10 years, \$20,000 for the second 10 years, and \$30,000 annually thereafter

until Congress sees fit to change it.

Now, much has been said in opposition both in the press and by correspondents concerning this proposition. Many of you have received circular letters from people who actually believe and in good faith think that this will destroy the park. desire with such emphasis as I have to deny that it will destroy the park in any sense. On the contrary, I believe it will improve the park. As the matter now stands only rich and well-to-do people can visit the park at all. It is an expensive proposition to journey there. You have to go on burros, pack trains, and so forth, and there is no railroad or street car line that would enable you to go in any other way except by pack train. San Francisco concurs in this bill, and this bill exacts of the people of San Francisco as a condition precedent to build street car lines and roads and trails and railroads, so that the poor can visit the park. The improvement will really make a park in reality of what is now the roughest country God ever made.

In addition to that they must construct roads surrounding this lake, so that the people can go in there and view the scenery in the higher Sierra of California. I said before and I repeat that San Francisco will have to pipe this water 142

The project has been examined by a board of Army engineers, who say this is the most available supply and the supply that San Francisco ought to have.

The Secretary of the Interior knows the facts and he has recommended the bill both by letter and in person before our

committee in the strongest terms.

The committee has moved slowly and cautiously in this mat-ter, because some good people differed with them about it. We had before us the Secretary of Agriculture and examined him upon it. His view was that the bill was a good one, that it ought to be passed, that this dam site ought to be used, and that San Francisco was entitled to it.

I print his letter herewith:

DEPARTMENT OF AGRICULTURE, OFFICE OF THE SECRETARY, Washington, D. C., August 2, 1913.

Hon. SCOTT FERRIS. . Scott Ferris,
Chairman Committee on the Public Lands,
House of Representatives.

Hon. Oscar W. Underwood, House of Representatives.

My Dear Mr. Underwood: I have been in receipt for some time of communications from San Francisco respecting their water situation.

Dear Mr. Ferris: I have before me a copy of the bill, II. R. 7207, approved unanimously by the Committee on the Public Lands, granting to the city and county of San Francisco certain rights of way through the public lands, national forests, and Yosemie National Park. I have

your request that this dreatment make a report thereon and such suggestions as it may see fit to offer.

This bill, Il. R. 7207, now before me, does not differ in any essential particular, so far as the matters pertaining to the Department of Agriculture are affected, from the bill which was considered by your committee at the time I testified before it and on which I submitted to you a formal report with the approval of this department. So far as the Department of Agriculture is concerned in this bill, I can see no objection to its passage.

Sincerely, yours,

D. F. Houston, Secretary.

We had the Chief Forester, Mr. Graves, before us, who has to do with the handling of the national forests, and inasmuch as a part of this pipe line goes across the national forests, we thought he ought to be brought in and consulted about it. He says that with the regulations contained in this bill no part of the forest will be injured, no trees can be cut or devastated; and that San Francisco is entitled to this legislation and ought to have it.

UNITED STATES DEPARTMENT OF AGRICULTURE, FOREST SERVICE, Washington, June 30, 1913.

Hon. Scott Ferris,
Chairman Committee on the Public Lands,
House of Representatives.

House of Representatives.

MY DEAR MR. FERRIS: I wish to acknowledge receipt of your request for a report upon the bill (H. R. 4319) granting to the city and county of San Francisco certain rights of way through the public lands and reservations of the United States. On June 24 the Secretary of Agriculture addressed a letter to you giving the views of this department. The Forest Service participated in the preparation of the Secretary's report, which was designed to represent the agreed policy of the department, including the Forest Service.

Wery sincerely, yours,

It elegans had to Mr. Pinchet, and seven of the attention was recommended.

I telegraphed to Mr. Pinchot, and some of the other members did likewise, urging him to appear before the committee. Mr. Pinchot is well known to this House and well known to the country. He has given much patriotic attention to conservation questions. Mr. Pinchot came down from Pennsylvania, where he was temporarily, and before our committee in the strongest sort of terms, as the printed hearings show, and as his letter shows, he indorsed this as true conservation. I here present his testimony at the committee hearing:

PINCHOT INDORSES BILL.

[Extracts from statement of Hon. Gifford Pinchot, former Chief Forester, before Public Lands Committee, House of Representatives, June 25, 1913.].

We come now face to face with the perfectly clean question of what is the best use to which this water that flows out of the Sierras can be put. As we all know, there is no use of water that is higher than the domestic use. Then, if there is, as the engineers tell us, no other source of supply that is anything like so reasonably available as this one, if this is the best and within reasonable limits of cost, the only means of supplying San Francisco with water, we come straight to the question of whether the advantage of leaving this valley in a state of nature is greater than the advantage of using it for the benefit of the city of San Francisco.

Now the fundamental principle of the whole conservation policy is

greater than the advantage of using it for the benefit of the city of San Francisco.

Now, the fundamental principle of the whole conservation policy is that of use—to take every part of the land and its resources and put it to that use in which it will best serve the most people—and I think there can be no question at all but that in this case we have an instance in which all weighty considerations demand the passage of the bill.

* * The construction of roads, trails, and telephone systems which will follow the passage of this bill will be a very important help in the park and forest reserves. The national forest telephone system and the roads and trails to which this bill will lead will form an important additional help in fighting fire in the forest reserves. As has already been set forth by the two Secretaries, the presence of these additional means of communication will mean that the national forest and the national park will be visited by very large numbers of people who can not visit them now. I think that the men who assert that it is better to leave a piece of natural scenery in its natural condition have rather the better of the argument, and I believe that if we had nothing else to consider than the delight of the few men and women who would yearly go into the Hetch Hetchy Valley then it should be left in its natural condition. But the considerations on the other side of the question, to my mind, are simply overwhelming, and so much so that I have never been able to see that there was any reasonable argument against the use of this water supply by the city of San Francisco, provided the bill was a reasonable bill. * * * The (sanitary) regulations which are required are substantially what ought to be followed by any well-intentioned camper. * *

Now, some people have had an unusual and extraordinary idea of what conservation is. At times in my life I have had the same feeling about it; but when Mr. Pinchot came on the stand and told the committee that the conservation people believed in the use of our natural resources, I was glad to enlist with him. I have never believed in the form of conservation which purposes to bottle things up, but I do believe in that form of conservation which uses things and puts them to the highest and most beneficial and economic use. I am in favor of making war on graft, monopoly, and waste, but I am in favor of use, progress, and development.

Water in California is almost like gold dust. Every drop of it will have to be used for some purpose sooner or later. I call the attention of the committee to the fact that no higher purpose, no higher use, no higher conservation can ever be practised than furnishing a municipality with clear, pure water to drink and to bathe in. This bill accomplishes this for a heroic people who only ask an opportunity to do for them-

selves at their own expense what many others would not undertake.

Some gentleman may want to know what are the complica-This valley is just a rough craggy gorge between two mountains, which constitutes a good natural dam site. Below the gorge is the San Joaquin Valley. Some one may ask, "Are you going to do justice to the San Joaquin Valley." The answer is "Yes." The irrigationists were present by two able and patriotic attorneys who knew and preserved their every

The city and county of San Francisco are doing justice to the San Joaquin Valley by giving them the entire flow of the river and a part of the flood water with which to irrigate the San Francisco and the San Joaquin Valley people came together honorably as men and have aided the committee

materially.

The fact is that San Francisco purposes to go out and spend \$77,000,000 of her own money to corral the flood water that comes out of the snows and flood waters of the higher Sierra, to impound it in her waterworks system for herself, the irrigationists, and the other cities about her. I contend, and I believe this committee will conclude that there can be no higher form of conservation than to use flood waters for drinking, bathing, and other domestic purposes rather than to let them flow idly, unsubdued, and unattended into the sea.

I do not think there is or will be much opposition to this There is a little up in New England. I think one gentleman from Boston came down and appeared before the committee, and he was of the opinion that it was wrong to construct this dam, because he thought that this gorge ought to be left in its original condition. Well, now, I think that practical, thoughtful men, who really want water put to its highest use, can not agree with him. That gentleman from Boston has visited this park two or three times, at great expense and great inconvenience to himself, and while I do not attack his patriotism or his earnestness, his judgment will not square with any principle of economics known to man. The 11 Members of the California delegation approve this bill, all holding commissions from their people won on the battle field of politics. The Secretary of the Interior approves this bill, and he knows conditions there in California, as he has long been a resident of that State. Gifford Pinchot approves this bill, and he is always careful to safeguard the interests of the Government and those concerned. Mr. Graves, the Chief Forester, approves this bill, and he knows what is safe and unsafe in forestry and park matters. The Army engineers approve this bill, and they are not swayed by politics or partisanship at any time. The irrigation people below the dam approve this bill; they know when their rights are secure. The city of Oakland and the other cities surrounding San Francisco approve this bill, and it will be a blessing and a godsend to them. The only opposition that the committee have been able to find, in two or three months' painstaking investigation, has been that of a few people who believe it is wrong to dam up a gorge and collect the mountain waters that come down from the melting snows and use them for the highest economic purposes. These patriotic, earnest men believe that it is a crime to clip a twig, turn over a rock, or in any way interfere with Nature's task. I should be grieved if I thought practicability should completely drive out of me my love of nature in its crude form, but when it comes to weighing the highest conservation, on one hand, of water for domestic use against the preservation of a rocky, craggy canyon, allowing 200,000,000 gallons of water daily to run idly to the sea, doing no one any good, there is nothing that will appeal to a thoughtful brain of a common-sense, practical

I have never feared the judgment of this House when Members can understand what is going on. I do not speak with any disrespect of these people who think that a rugged, jagged gorge is of more importance than a beautiful lake of fresh bathing and drinking water for the people, but I respectfully differ with them. What is more beautiful than a beautiful lake supplying a great and growing city with water to drink and with water to bathe in, and who is there of us that can long contend that a rugged, jagged gorge between two mountains in the Sierras is of more importance, and that it is a crime to convert it into a beautiful lake?

Why, my friends, we have spent \$60,000,000 out of the Federal Treasury for irrigation purposes in helping the settlers in the West. I am glad that is so. It has done good and has helped to develop the West, but here comes San Francisco, and her Members of Congress are here ready to vouch for what I say, ready to spend \$77,000,000 of their own money, without a penny from the Federal Government in constructing these great improvements, ready to build a million dollars' worth

of roads so that the park may be available not for a few rich but for all the people. In addition to that they are ready to build a dam so that the irrigators can have not only the natural flow but a great deal of the flood waters in addition thereto.

Now, one word further. The Committee on the Public Lands did not move quickly; this bill involves some perplexing questions.

We have brought before us every conceivable authority we could get hold of to justify us in our action. The departments all favor it. They know of its merits and its demerits.

Mr. MANN. Will the gentleman yield?

Mr. FERRIS. Certainly.

Mr. MANN. It has been said by gentlemen opposed to this bill that the report of the Army board of engineers who came to the city of San Francisco was never furnished to the com-

Mr. FERRIS. We investigated that very carefully, and we brought the city engineers of San Francisco before us, the city clerk before us; the city clerk is still in town, and we brought the Army board of engineers before us, and they said that they had access at all times to every report, every document, and every species of proof of investigation of any sort. In addition to that the Public Lands Committee now has the identical book or report which was considered by the committee and referred to by a gentleman by the name of Sullivan, who came on and tried to fight this measure because he had a rival sys tem that he wanted to sell to the city of San Francisco. committee has absolutely exploded that, and there is no truth in it. The hearings disclose that Sullivan was an adventurer in the real estate business, who would like to stir up strife for San Francisco and unload a piece of property of doubtful value on the city when she does not want it and it would not be appropriate or suitable if she did. On this subject I present a letter from Col. John Biddle, of the Army board, who was there and made the investigation.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
Washington, July 31, 1913.

OFFICE OF THE CRIEF OF STAFF,

Washington, July 31, 1913.

My Dear Mr. Kent: Having reference to your communication of July
21, asking for comment from the board of Army engineers on the testimony of Mr. E. J. Sullivan, representing the Sierra Blue Lakes water
project on the Mokelumne River, proof sheets of which testimony were
sent by you, the following is submitted by the whole board:

The two main questions raised by Mr. Sullivan appear to be—first,
whether San Francisco needs water from the Sierras at all, and second,
whether the Mokelumne River is not the best and cheapest source of
such a supply.

According to the estimates made by the board, the amount of water
now used by the communities surrounding San Francisco Bay is 133,000,000 gallons daily. It is estimated that by the year 2000, 540,000,000
gallons daily will be needed. The board believes that about 100,000,000
gallons daily additional can be economically developed from near-by
sources and that for the remainder it will be necessary to go to some outside source, such as the Sierras. The city of San Francisco in its estimates provides for obtaining 400,000,000 gallons daily from the Sierra
sources, partly because of the doubt of the city engineers that the
near-by sources can be developed to the amount above estimated, and
partly because the full amount could be used to advantage. There can
be no question, however, but that from 300,000,000 to 400,000,000 gallons daily additional will be needed by the year 2000, and on account
of the situation in California, where all of the available water will be
eventually used for irrigation or power, it is most desirable for San
Francisco and the other cities to establish now their rights.

NO SUPPRESSION OF DATA.

NO SUPPRESSION OF DATA.

Francisco and the other cities to establish now their rights.

NO SUPPRESSION OF DATA.

As to the Mokelumne River, it is stated in the testimony of Mr. Sullivan that Gen. G. H. Mendell, Corps of Engineers, reported favorably on the Mokelumne River as a source of supply. This report was dated about 1877, and provided for only 25,000,000 gallons daily, so that, of course, it has no bearing on the present investigation. Mr. Sullivan makes as his principal point the fact that a report by Mr. Bartell, assistant city engineer, in April, 1912, was never submitted to the board of Army engineers, and that if this report had been submitted the conclusion of the board would have been very different. This report was not seen by the board. The board, however, attaches no importance to this fact. The assistant engineer in the employ of the board Mr. H. H. Wadsworth, has written that he had several conversations with Mr. Bartell on the subject and was generally familiar with considerable, at least, of the data obtained by him and his deductions therefrom. The main point, however, is that the board itself had such independent examinations and investigations made of the Mokelumne, as well as other streams, as seemed necessary in order for the board to form its opinion on this source of supply. Mr. Bartell's report could not have changed the facts thus ascertained. The report of the chief engineer of the company was in the hands of the board.

In determining the supply of water that can be obtained from any of the Sierra sources there are two main considerations: First, the amount of water that flows down the stream; and, second, the reservoir capacity for storage of water during the flow of any river, such as the Mokelumne, is to measure the flow at such points and at such times as may be practicable and to have the record of the rainfall from which the run-off may be deduced. The records of rainfall and run-off are not very complete or continuous for any length of time on these Sierra rivers. Some have been made by the State o

As to the reservoirs, the assistant engineer of the board made personal examinations and reconnoisances of the three principal reservoir sites—namely, North Fork of Mokelumne, Rallroad Flat, and Forest Creek—and directed special surveys to be made of the two largest ones by the city of San Francisco, which was done. The board itself inspected one of the two main reservoir sites, the Railroad Flat, for the special reason that the use of this reservoir was considered of doubtful value on account of its cost. One of the reservoirs specially mentioned by Mr. Sullivan is the Blue Lakes. This reservoir is, however, of little value, as the catchment area is only 4½ square miles, and therefore but little water will flow into it.

Furthermore, investigations by the Geological Survey in the last few years have indicated that the reservoir capacity on this watershed outside of the few mentioned is very small. The reservoirs on the Mokelumne are very inferior to those on the Tuolumne. For instance, with a dam somewhat over 300 feet in height, the amount of masonry in the dam at Hetch Hetchy is less than 5 cubic yards for each million gallons stored, while for the main reservoir on the Mokelumne, on the North Fork, it is 23 cubic yards, and that it the Railroad Flat Reservoir but little less. The capacity of the Hetch Hetchy Reservoir with a 300-foot dam is about 120,000,000,000 gallons; that at the North Fork of the Mokelumne, about 28,000,000,000 gallons; that at the North Fork of the Mokelumne, about 28,000,000,000 gallons; the Railroad Flat Reservoir, about 21,500,000,000 gallons. It is therefore very evident that the relative cost of the reservoirs on the Mokelumne River is much greater than at Hetch Hetchy Valley.

The amount of land that could well be irrigated from the Mokelumne and the rights for power and irrigation, and it is believed that in time it will be desired to irrigate much more land than at present. The amount assumed for irrigation is 200,000 acres, less than half of what is allowed for irrigation in t

The board therefore believes that the estimate of 128,000,000 gallons daily is about all that could be counted on from the Mokelumne River unless the existing water rights be purchased at great expense and unless the land tributary to this river be perpetually deprived of water from this source for irrigation. Even if all the water from the Mokelumne could be used for San Francisco, it would not be sufficient on account of the relatively small reservoir capacity in this watershed and the impossibility of using reservoirs in other watersheds on account of the prohibited expense. In California the floods last but a short time; dry years occur along with the wet ones and large storage possibilities are imperative.

It does not appear from the testimony of Mr. Sullivan just where the large supply he estimates, 350,000,000 to 500,000,000 gallons daily, is to be obtained. It is thought possible that he may make use of some of the water falling on the foothills and lower. This, however, has not been considered allowable in making estimates on any of the supply from the Sierras, for the reason that these foothills are fast becoming more and more thickly inhabited and it was desired to obtain water from a source which lies above ordinary habitation.

ARMY BOARD GOT ITS OWN DATA.

ARMY BOARD GOT ITS OWN DATA.

To sum up, there is nothing in the testimony of Mr. Sullivan, and it is believed that there can be nothing in the report of Mr. Bartell, which would affect the conclusions of the board, for the reason, as stated above, that the board obtained, as far as was considered desirable, its own data, excepting that which was of a public nature and therefore available to the board. As to the relative cost of the projects, the report indicates that the Tuolumne supply is much the more economical. The distance over which Mokelumne River water would have to be transported is about the same as for the Tuolumne, and difficulties in construction of aqueduct are about the same, while the cost of the reservoirs is relatively very much greater. For the amount of water that is needed by the bay communities there can be no question but that the Tuolumne supply is more economical than any other and that the Mokelumne can be used only in connection with supplies from other sources, as it is not in itself sufficient.

FULL HEARING GIVEN COMPANY.

It might be added that the board gave to the Sierra Blue Lakes Water & Power Co, on July 5, 1911, a hearing, which was stenographically reported. At this hearing were present Messrs. E. J. Sullivan, president; C. M. Burleson, chief engineer; James N. Gillett and W. H. H. Hart, attorneys for the company. Every opportunity was given them to thoroughly present the project, and in addition, a report on this source of supply prepared by the chief engineer, Mr. C. M. Burleson, was submitted to the board.

Very respectfully,

JOHN BIDDLE.

Colonel, General Staff, Chairman Board of Officers of Corps of Engineers, United States Army.

Hon. WILLIAM KENT,

House of Representatives, Washington, D. C.

Mr. MANN. But the gentleman understands that this statement is made by Robert Underwood Johnson, a gentleman of the highest character, a man whom no one would ever accuse of having a personal interest, and also by some other gentlemen, and I think it is due the committee that there be an understanding or explanation if such a report was not presented, and if so, why; and if it was presented, to have the erroneous impression corrected.

Mr. FERRIS. The gentleman is right; Robert Underwood Johnson, in my judgment, is a patriotic and good man. There are three or four rival companies in San Francisco-real estate concerns—trying to sell San Francisco a water supply which San Francisco does not want. There are various ramifi-cations, and they have through their engineers, who are on a contingent fee in event of sale, stirred up interest among patriotic men who really know nothing of the true conditions.

Mr. COOPER. Will the gentleman yield?

Mr. FERRIS. I will.

Mr. COOPER. As I understand it, if this proposed improvement is completed it will not in anywise affect the appearance of the world-famous Yosemite Valley as commonly understood

Mr. FERRIS. That is, in my judgment, fully true. The Hetch Hetchy Valley is 20 miles away from the Yosemite Valley. There are 719,000 acres in the Yosemite National Park, and this only floods about 3,000 acres. It really beautifies and improves the park. It does not mar it in the least.

Mr. COOPER. I asked the question of the gentleman from Oklahoma because of what has been said and written to me at different times. The correspondents evidently think that this would in some way seriously injure the beauties of the

Yosemite Valley.

Mr. FERRIS. The question is an important one, and a good many good men have been misled about it. They have an idea that a section of the park is going to be destroyed because San Francisco wants to erect a dam 300 feet high in this ragged, jagged, rough place and create a storage dam that only floods about one two-hundredths part of the park. It is all a frenzy and a mistake. This is created sentiment amongst people who do not have time to ascertain the facts.

Mr. COOPER. How far from the Yosemite proper would

this proposed lake be?

Mr. FERRIS. Twenty mile Mr. HAYES. Thirty miles. Twenty miles away.

Thirty miles, one of the California Members Mr. FERRIS. says. I think it is 20 by the map and according to the hearings before the committee.

Mr. TALCOTT of New York. How long will it take to get

the water to San Francisco if this bill is passed?

Mr. FERRIS. The engineers estimate four or five years, some longer; and I am glad the gentleman asked that question, because that is important. Some one may say if San Francisco is really in the throes of a water famine, as I have stated and the report states and as Secretary Lane states and the newspapers state, what good will it do to pass this bill. There is an answer, and I think the committee is entitled to it.

In 1910 they voted \$45,000,000 in bonds under a permit they had from the Interior Department to go ahead and construct a dam here and use this water. They can not use that \$45,000,000 of bonds they voted unless it be in laying mains and starting in on the Hetch Hetchy project, so that a part of that money will be used in laying additional mains, will be used in starting in to develop water they can get for temporary use, and in that way it will relieve them from a temporary water famine. I call attention to it, and I do it with no little feeling in my heart about it, to this disaster that San Francisco went through. We all know that they bravely, courageously, and heroically built that city up almost in a day and a night, and now they have voted bonds and are willing to go out with courage in their hearts, with a true conception of patriotism and statesmanship, to spend \$77,000,000, which will be the final sum spent, to develop a waterworks system that will be the glory of the whole Pacific coast. And I want to call attention to the fact that a beautiful, growing, and thriving city like San Francisco ought not to be hampered by an insufficient water supply. They ought not to be crowded and cramped and their progress impeded by an inadequate supply of water.

Mr. MANN. Will the gentleman yield?

Mr. MANN. Will the gentleman yield?

Mr. FERRIS. I do.

Mr. MANN. Is it the gentleman's understanding that it is the expectation to get this water for the coming exposition, or for one 100 years from now, out of this system?

Mr. FERRIS. I take it for granted the gentleman is indulg-

ing in a little sarcasm-

Mr. MANN. The gentleman says this bill ought to pass to furnish a water supply for the exposition. Does the gentle-

man mean the water from the Hetch Hetchy Valley?

Mr. FERRIS. I did not quite state it that way and I think I can answer the gentleman so as to satisfy him. I do not think he heard my statement fully. My statement was this, that the engineers say it will take four, probably seven years, to complete this. That, of course, will carry it beyond the exposition period. I said that in 1910 they voted \$45,000,000 for that purpose and unless Congress passes this act so they can begin the perfection of that system, so a part of the improvements can be laid to be attached to a temporary source, they can not spend any of the money they voted to relieve themselves as they otherwise could.

Mr. KENT. Mr. Chairman, I would like to say that there

comes another emergency question in regard to this San Fran-

cisco water supply which the chairman of the Committee on Public Lands did not mention. That is this: A large proportion of the water that San Francisco uses is pumped from Alameda County across the bay. That has lowered the water table some 30 feet, which constitutes a great damage to agricultural interests over there, and the people of San Francisco believe, and have reason to believe, that unless they have some means in sight for getting another supply sufficient to restore that water table that they will be enjoined and litigated against, which would cut off a large part of their present supply. That is another emergency matter which has been overlooked.

Mr. FERRIS. I thank my colleague on the committee very much. He knows much more about the whole matter and will explain it to you later. I want to add one or two things, which I said a while ago and which I repeat, and that is that every Member of the 11 Members of the California delegation have come before us in a patriotic, painstaking, careful way, and have helped us perfect the bill and protect the rights of the irrigationists and protect the rights of San Francisco and to protect the Federal Government. Some one may perhaps say that San Francisco would not protect the Federal Government. I want to say they have been patriotic, generous, square, and very fair in helping to protect the Government and to protect everybody from any possible wrongdoing in this thing. fornia may well be proud of their delegation. I am proud of the three members of the committee from that State. They have been fair, square, and generous in their endeavors to arrive at a just solution during all our work on this bill.

But to be doubly safe we brought the highest conservation authority in the United States, Mr. Pinchot; we brought all the departmental officers before us, and they all put their O. K. on

this waterworks system for San Francisco.

Now, I want to mention a fact that is a little personal to I was a member of the Committee on the Public Lands five years ago when this bill was considered by the committee. I opposed it then and signed an adverse report, with my good friend from Wyoming [Mr. MONDELL] and others. The gentleman from Wyoming [Mr. Mondell] wrote a very strong report. If the conditions were the same now as then I would oppose it These were the conditions then: They had a local company with whom they were in litigation, and they could not come to terms as to taking over the local supply. That was the principal reason for my position then. Another reason, they were not putting enough in the bill to protect the irrigation people below the dam. However, both of those objections are now overcome. As to the irrigation proposition and as to the local water-company proposition, if the conditions were the same to-day as they were then, I would not support this bill now. However, it is all changed. They have settled with the irrigationists and they are satisfied. I have resolutions here from the chambers of commerce of the San Joaquin Valley, where the irrigation people live. This is a great fertile valley below this dam, and they are pleased with the proposition. They say that they are getting all that they are entitled to under the law. There are extracts in the hearings from the local water-supply company, which say that the San Francisco earthquake itself never did as much damage to San Francisco as this drought and scarcity of water. So if the 11 Members of the California delegation, the board of Army engineers, all the Secretaries and departments that have anything to do with it, the local watercompany people and the irrigation people will be satisfied with this bill, I call your attention to the unanimous report of the Public Lands Committee. I call your attention to some of the people who indorse this bill. I here present them:

people who indorse this bill. I here present them:

The use of the Hetch Hetchy Valley in the Yosemite National Park as a reservoir for storing water for the city of San Francisco and other cities and for irrigation purposes is urged by the following:

Hon. Franklin K. Lane, Secretary of the Interior.

Hon. David F. Houston, Secretary of Agriculture.

Dr. George Otis Smith, Director United States Geological Survey.

Hon. F. H. Newell, chairman United States Reclamation Commission,
Hon. Henry S. Graves, Chief Forester, United States Forest Service,
The Board of Army Engineers: Col. John Biddle, Lieut. Col. Harry
Taylor, and Col. Spencer Cosby.

Hon. Gifford Pinchot, former Chief Forester.

Two Senators and 11 Representatives from the State of California,
The people of Oakland.

The people of Berkeley.

The people of Alameda.

The people of Menlo Park.

The people of Menlo Park.

The people of Richmond.

The Legislature of the State of California.

The conservation commission of the State of California.

The improvement clubs of San Francisco.

The newspapers of San Francisco and cities about San Francisco Bay. The landowners of the Turlock irrigation district.

The landowners of the Modesto irrigation district.

The Commonwealth Club of California.

Many members of the Sicra Club of California.

The Native Sons and Daughters of California.

The Public Lands Committee of the House of Representatives.

I am willing to pin my faith to this bill. I hope and firmly believe that the House will grant to San Francisco the right to expend her own money in securing a water supply that is

needed more than poor words can well depict. [Applause.] Now, Mr. Chairman, my colleague on the committee, the gentleman from New York [Mr. Brown] is going away at 5 o'clock. I want to yield him 10 minutes from my time, or so

much thereof as he may consume, in which to conclude his remarks, so that he can get away. [Applause.]

Mr. BROWN of New York. Mr. Chairman, I am heartily in favor of this bill. At this time I wish to discuss only one feature of it—that provision which grants to San Francisco some acres of land now included in the Yosemite National Park. The fact that San Francisco deeds to the United States an equivalent in acreage does not materially affect the main proposition; that part of a park which belongs to all the people of the United States is given to the use of some of the people of the United States.

Those who are familiar with conditions in our crowded eastern cities are of the opinion, and I heartily agree with them, that no encroachments more solid than an open band stand shall be permitted in their municipal parks; and the reason is that conservation of human life requires reservoirs whence fresh air, sun purified, may bring oxygen to those who live in dark rooms

on narrow courtyards.

The word "park" is used equally to describe the paved triangles surrounded by high tenements and the 1,100 and more square miles in the Yosemite National Park; so the natural tendency of people and newspapers is to judge all parks by those with which they are familiar. They forget that the highest beneficial use to which our parks can be put is often different in one case

from that of another.

Now, as regards the Yosemite Park, I think it is generally conceded that there is no lack of fresh air in the mountains and on the plains that bound it. But the crying need of the semiarid country around the Yosemite National Park, where the sun shines unclouded for 8 months out of the 12, is for water. Without water on the fields there are no crops; without abundance of water for domestic use there is sickness and desoladance of water for domestic use there is sickless and desoia-tion. If the State of California had sufficient water for its future development, I should have nothing to say, but the testi-mony of the record shows that it has not. Therefore, Mr. Speaker, I maintain that the highest conservation requires that the waste waters from the melting snows which each spring rush unrestrained into the sea be impounded at the only available economical place in this whole great catchment area, and be then put to their most beneficial use. I maintain that the few acres needed for this purpose within the park can be made to serve no higher purpose.

Let us see how this grant will affect the people of the United States who now own the Hetch Hetchy Valley. The turning of part of the valley into a lake may make or mar its beauty—that is a question of individual taste—but it is significant to note how few people have ever seen the valley as it is to-day. reason is simple: In the winter it is too cold, in the spring it is flooded, in the early summer the mosquitoes are a fearsome pest, and on account of no transportation facilities it requires of most people on foot or horseback more time than they can afford to go in and out during the brief season while the going is good.

For their deprivation of the use of these few acres of the valley floor the people of the United States receive great bene-The grantee builds and maintains a half a million dollars' worth of roads and trails, and contributes annually after a few years toward the maintenance of the national park such amounts as Congress shall determine. Upon the passage of this bill upward of 400,000,000 gallons daily of flood water will be conserved to the people of the State of California, and the Hetch Hetchy Valley will be made accessible as a recreation ground to thousands to whom it is now only a name. [Applause.]

The CHAIRMAN. The gentleman from Illinois [Mr. MANN]

is recognized.

Mr. MANN. Mr. Chairman, I can not quite agree with the last speaker [Mr. Brown of New York], who really made a delightful speech to the House, that because the Hetch Hetchy Valley or any other part of the parks of the United States may not at present be very accessible that that is any reason at all for destroying them. But that might be a very good reason for providing accessibility to them.

Mr. Chairman, I think it is quite safe to say that Congress, approaching a proposition involving the destruction of one of the greatest pieces of natural scenery in the United States, would approach the solution of the problem with a very strong bias in opposition if it were not that there was involved on the other side of this particular question the furnishing of a proper and sufficient water supply to one of the large cities and populated areas of the United States. In my judgment, it will not be many years until the question of the water supply becomes of pressing importance in all parts of the United States. Recently we provided by law that the Public Health Service should have added to its other functions that one of investigating and reporting upon the water supply, the purity, and so forth, of water in navigable streams,

Now, San Francisco is confronted with a situation where some gentlemen claim that the passage of this bill is necessary, whereas some who are opposed to it claim that it is not necessary. say this in passing, that I fear San Francisco is taking a load upon itself which in the end will bear down very heavily upon With the World's Fair to be financed largely by San Francisco publicly, and more privately; with the issuance of bonds for the production of the great sums of money involved in this bill, stated by the chairman to be \$77,000,000, which can probably be multiplied by two; with the recent vote of the people of that city to build competing and parallel street car lines, and with many other things which they are undertaking, in my judgment they will find that they have bitten off, to use a very homely phrase, more than they can comfortably chew.

I think, Mr. Chairman, it is proper to present to the House. in a way at least, the other side of the question, and I shall therefore ask to have read in my time a public letter, sent out generally throughout the country, by Robert Underwood Johnson, one of the men in the country who are wholly disinterested, of the highest standing, holding a commanding position among those who are in favor of preserving nature's beauties.

The CHAIRMAN. Without objection, the Clerk will read.

The Clerk read as follows:

MATTAPOISETT, MASS.

MATTAPOISETT, MASS.

My Dear Mr. Mann: Here is a challenge as to facts from a reputable source. I have seen a photograph of the suppressed report. Either these charges are untrue, in which case they should be refuted, or they are true, in which case the legislation should be delayed for further investigation as to the other sources available. In this unequal fight I hope you will stand for the whole people.

Sincerely, yours,

R. U. Johnson.

[For publication and comment in the press.]

THE HETCH HETCHY SCHEME—WHY IT SHOULD NOT BE RUSHED THROUGH THE EXTRA SESSION—AN OPEN LETTER TO THE AMERICAN PEOPLE, Fellow owners of the Yosemite National Park:

THE ENTRA SESSION—AN OPEN LETTER TO THE AMERICAN PEOPLE.

Fellow owners of the Yosemite National Park:

For 12 years the city of San Francisco has been trying to obtain from the Government the gift of the wonderful Hetch Hetchy Valley, 18 miles from the Yosemite Valley and one of the chief attractions of the greatest of your national parks. The plea has been that the Hetch Hetchy is the only available source of water supply for the city, this being the only plausible reason for the scheme, which involves the destruction of the valley by flooding if as a reservoir and the exclusion of the public from two of the three chief camping places amid this phenomenally beautiful scenery and from access to 20 miles of the most remarkable cascades in the world. The language of hyperbole is the only appropriate medium to describe the features of your Yosemite National Park. Better that there had never been a Niagara than that the northern half of the park should thus be diverted from the use of the public. The Hetch Hetchy is a veritable temple of the living God, and again the money changers are in the temple!

For these 12 years a few public-spirited men in California and elsewhere, led by John Muir, "California's grand old man," and supported by 8 or 10 national organizations, have succeeded in thwarting this project. Their attitude is not quixotic. They say: "If San Francisco could nowhere else obtain an abundant supply of good water, supremencessity would require that the valley should be placed at its disposal." But they claim that not until the city has demonstrated that the supply can not be obtained from any other source should any concession be made to its demands. And they further claim that the city is under obligations to prove this negative; that the Hetch Hetchy is not merely desirable, but that it is absolutely necessary. The importance of the reasons for dismembering your park must be equal to the importance of the reasons for its creation. And they further claim that the city is under obligations to prove t

turn over to the city 500 square miles—half your national park. The scandal consists in these facts: (1) That the appeal is made on ex parte evidence furnished by the city and not fully verified by the advisory board of Army engineers appointed by Secretary Fisher, and (2) that in presenting data to this board the city actually withheld a report showing that the Mokelumne River region will afford abundant resources

In presenting data to this board the city actually withheld a report showing that the Mokelumne River region will afford abundant resources at a smaller expense.

Before considering this other source of supply let me cite two damaging statements of a general nature. At the hearing before the Public Lands Committee of the Senate, Mr. Nelson, of Minnesota, in the chair, Mr. McCutcheon said to Mr. James D. Phelan, then and now the most conspicuous advecate of the scheme, substantially this:

"You know, Mr. Phelan, that you could go out overnight anywhere along the Sierra and get an abundant supply of pure water for the city."

"Yes," said Mr. Phelan, "by paying for it."

And Mr. Manson (another advocate) echeed, "Yes, by paying for it."

This is matter of record and has never been disputed. It shows that the object of the scheme is to get something for nothing—the simplest sort of a commercial "grab." The Nation is called upon to make sacrifice of its noblest pleasure ground, not to save the lives or the health of San Franciscans but their dollars; and, moreover, to supply water not merely for drinking but for power.

Again, the report of the Army board states the belief of its members that the city's reports on other sources besides the Sacramento and the Tuolumne (Hetchy Hetchy) are not thorough and complete, "due largely, it is thought, to the lack of importance and impracticability, from the point of view of the city authorities, of any source of supply other than the upper Tuolumne." This report was made on the order of the Interior Department that the city should investigate and report on all possible available sources. It has not done so in good faith. This report of the Army board, it is understood, was drawn up by H. H. Wadsworth, assistant engineer and secretary of the board, who on July 1, 1913, said he had not seen the elaborate report favorable to the Mokelumne River region, known as the Bartell report, and added: "I am very confident that no such report was submitted to the board." This is confirmed

to me.

The plain fact is that the Bartell report to the city of April, 1912, though it was made for the city, proved an obstacle to the theories and purposes of the supervisors, and therefore was withheld by them from the Army board, substitution being made of a report after a brief investigation by Engineer Grunsky (July, 1912) placing the resources of the Mokelumne at 60,000,000 instead of 432,000,000 gallons daily. This withhelding constitutes an important suppression of the truth, and was a wrong to the board, to the city's expert (Mr. Freeman), to the Members of both Houses of Congress, and to every other American citizen.

citizen.

If the legislation is not railroaded through Congress, an even fuller report of the Mokelumne resources than that of the Engineer Bartell will be presented, along with an offer of rights and sites by the Sierra Blue Lakes & Water Power Co.

The advantages claimed for this source over that of Hetch Hetchy

(1) It would obviate the invasion of your national park.
(2) It would save 70 miles of tunneling, much of its through selid

(3) It would be a shorter route by 65 miles.

(4) It could be completed in 4 years, as against the 10 needed to make Hetch Hetchy available.

(5) Its owners will offer it to the city at a price to be arbitrated.

(6) Its watershed is virtually in a forest reserve, not a national park, and thus is more fully protected than a scenic resort like Hetch Hetchy.

(5) Its owners will offer it to the city at a price to be arbitrated.
(6) Its watershed is virtually in a forest reserve, not a national park, and thus is more fully protected than a scenic resort like Hetch Hetchy.

The fact is that with the \$45,000,000 at their command the city made a most elaborate investigation of the source desired and very inadequate investigation of all but one of the others. A congressional investigation may be necessary to reveal whether there was any sinister reason for this attitude.

The country ought to know that the grant to the city would do an immeasurable wrong to the residents of California's greatest valley, the San Joaquin. Without water this valley is almost a desert; with water it is a paradise. This central valley of California should have prior claim on the water. I well know the purposes of Congress in creating the Yosemite National Park, for I was the only person who advocated it before the Public Lands Committee of the House in 1890. These were primarily to preserve the great scenery for the use and recreation of the whole Nation, to defend the forests against destruction by herds of sheep—"hoofed locusts," as Mr. Mulr called them—and to conserve the waters of the region for purposes of trigation in the San Joaquin Valley. The residents in that valley are overwhelmingly against this legislation, and although the city seems to have arranged with the Turlock and Modesto Irrigation representatives the people are not satisfied. This is particularly true of the Waterford region and other large regions dependent for prosperity on the Yosemite Park sources. In order to silence the opposition of the irrigation interests the city's agents have agreed to divide with them the waters of the coveted valley. The spectacle of thus parceling out the resources of one of God's most beautiful creations has had no counterpart since the casting of lots for the raiment of Jesus.

In the face of these facts, where is the "emergency" requiring the passage of this piece of inexcusable folly?

resources of the letter lieterly 10 years from now would not meet the emergency.

I have said nothing here of the offer of the local company, the Spring Valley, to sell to the city all its vested interests and options, which it claims would solve the problem for a hundred years, nor of the desirability of establishing a great filtration scheme, such as London is about to do, abandoning the plan of piping from the Welch Mountains. These are pertinent considerations, and they are new to the present Congress, and time should be given to them. This piece of vandalism,

so repugnant to the enlightened opinion of the country, can only be rushed through by the deference of the judgment of Congress to the statements of interested parties. A complete investigation of other sources—which the Army board states that it has had neither time nor facilities to make—should be undertaken by an impartial commission.

Col. Heuer, United States Engineer, said in 1898:
"Engineers who made surveys of Lake Eleanor and Hetch Hetchy inform me that there are other Sierra supplies which can be brought here at much less cost than the Hetch Hetchy. The latter by persistent advocates has been preached, almost forced, into acceptance by the people of San Francisco."

The simple issue is not "Shall San Francisco have a satisfactory water supply?" but "Shall the national park be dismembered and Hetch Hetchy destroyed unnecessarily?" The report of the Army board is quoted in favor of the scheme; but it includes the following significant, if not conclusive paragraph:

"The board is of the opinion that there are several sources of water supply that could be obtained and used by the city of San Francisco and adjacent communities to supplement the nearby supplies as the necessity develops. From any one of these sources the water is sufficient in quantity and is, or can be made, suitable in quality. While the engineering difficulties are not insurmountable, the determining factor is one of cost."

In other words, the American people are asked to subsidize the city's water supply to the extent of the money value of Hetch Hetchy and of 500 square miles of phenomenal scenery. Put up at auction what would this wonderland bring? "What am I bid," the auctioneer might say, "for one superb valley, 20 miles of unique cascades, half a dozen snow peaks, beautiful upland meadows, noble forests, etc., now owned by a gentleman named Uncle Sam, suspected of not being able to administer his own property? Do I hear \$20,000,000 to start the bidding? Remember that these natural features are priceless."

Will the reader of these

ROBERT UNDERWOOD JOHNSON.

Mr. MANN. Now, Mr. Chairman, in order that Congress might be informed of the opinions of those that are opposed to this bill I have had this letter read. This matter has been pending in Congress for a number of years. Committees in some cases, I believe, have failed or refused to report the bill. At one time the bill was reported adversely from the Committee on Public Lands. It now comes before the House with a unanimous report from the Committee on Public Lands and with the unanimous indersement of the Members in the House representing the State of California. It is possible that I have been led astray by the personal opinions of the gentlemen from California-Mr. Kahn and Mr. J. R. Knowland and Mr. Kent-with whom I have frequently consulted in regard to this bill. I am not disposed to present any captious opposition to it. I may offer some amendments to it. Since the Committee on Public Lands is a very fair committee and stands very high in the House, and since they have reported that in their opinion this is the best solution of the problem confronting the city of San Francisco and the surrounding territory-a problem that must be met in some way and solved by some method; the problem of furnishing water to San Francisco-I am disposed to accept the judgment of the distinguished chairman and the members of the Committee on Public Lands and favor in general the bill that is presented.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman has 40 minutes remaining. Mr. GRAHAM of Illinois. Mr. Chairman, as a member of the Committee on the Public Lands I was disposed, when this matter came before the committee, to look upon it with little favor; but as the evidence was produced before the committee, and as we all had an opportunity to see it from every side, to see the necessities of the great and growing city of San Francisco, and to see how fairly and in what a splendid spirit the people of San Francisco were meeting the needs of the various irrigation projects involved, I think I can truthfully say that all opposition in the committee was overcome and pushed aside.

San Francisco is in great need of a better water supply. is the only practicable means it has for getting it. It is true there are other places in the mountains where water could be had, but at a prohibitive cost.

The valleys where the irrigation projects are located were well represented before the committee, both by persons interested in them and by their Representatives in this House, and they were satisfied with the arrangements provided in this bill. Every interest was properly cared for, and I think it is the simple truth that now the only opposition remaining is the opposition of those who have an exceedingly fine artistic taste or temperament, who think that the floor of the valley ought not to be covered with water even for so high and so necessary a purpose as this.

I need hardly say that conservation and what it stands for appeal to me very strongly, and my sympathies would be in that direction; but I can not overlook the fact that the highest form

of conservation is the kind which conserves for human necessities and human rights. Good, pure, clear water could not be put to any higher use than domestic use, and the most earnest advocates of the highest conservation admit that to be true.

Mr. Underwood Johnson attacks the bill for artistic reasons. But even from the purely artistic point of view I deny that this bill would have the effect which Mr. Johnson's circular claims it would have. In passing, let me say that I have information, which I believe to be accurate, that Mr. Underwood Johnson never saw the Hetch Hetchy himself; that he is writing only on

information which he has received from others. Will flooding the floor of the valley decrease the artistic beauty of the locality? I asked a number of persons who gave information to the committee on that point, and they one and all agreed that it would not. For my own part, while my artistic sense is not very highly developed, I have never in my life seen a piece of natural scenery that I thought complete if there were not water mingled with it as a part of it. Flooding the floor of this valley to a depth of 100 or more feet will still leave the great precipitous sides, and will add to the interest by the reflected beauty in the water which will be held there by this

So, Mr. Chairman, there is not a single industrial interest involved here that has not been cared for, and in addition the natural beauty will be enhanced rather than diminished, and San Francisco will have her much-needed water supply, although at a tremendous cost. But the people of that city are willing to pay the bill, the people of the valley below are willing, and therefore I say that the objections or scruples which I had in the beginning have been entirely overcome, and I am now heartily for this bill and I believe it ought to pass. [Applause.]
[By unanimous consent, Mr. Britten was given leave to extend his remarks in the Record.]

Mr. RAKER. Mr. Chairman and gentlemen, I trust the commitee will be patient with me in my effort to present this matter in as short and concrete a form as I am capable of presenting it, as well as to present the natural conditions of the Hetch Hetchy Valley and the general surroundings.

The theory on which this bill is drawn is that the United States, having sole jurisdiction over the national park, has the right to refuse the grant and also has the right in making the

grant to impose certain conditions upon the grantee.

The bill is not drafted nor designed nor intended to usurp the powers of the State of California in the matter of control of the distribution of water. The conditions imposed—which are acquiesced in by the grantee—relate only to the protection of certain rights of the Turlock-Modesto irrigation district by recognizing, without affecting one way or the other prior rights of the said districts to certain waters in the Tuolumne River, the source of this river being the Hetch Hetchy Valley

That is a general statement of the theory of the bill and of the conditions between the irrigationists and the city and

county of San Francisco.

In passing I call the attention of the committee to the fact that this bill (H. R. 7207) has been reported by the committee without amendment. I think it is due to the committee that I should explain this, so that we may thoroughly understand it.

Mr. Chairman, originally H. R. 112 was introduced this Congress, and also H. R. 4319. Another bill, H. R. 6281, was introduced, and a full hearing had by the committee of the House upon that bill. The committee then thoroughly went through that bill, suggesting amendments and appointing a subcommittee to go into the language, so as to cover every phase. Then a subsequent bill, H. R. 6914, was introduced and was gone over by the committee, and after it had been thrashed out in a work of six weeks the committee agreed upon amendments to the original bill. So as to avoid confusion in the House, I introduced the present bill, H. R. 7207. It is the combined work of this committee after full hearings and after six weeks of work.

In the first place, I want to call the attention of the House to the fact that the city and county of San Francisco owns under the laws of the State of California a water right. She has taken all necessary acts to acquire it, appropriate it, and use the water of the Tuolumne River, which has been done in strict compliance with the laws regulating the appropriation and use of waters in the State of California, and now has and holds a valid water right by virtue of its acts performed under the laws

of said State.

The committee heard all the parties who desired to be heard on the bill, and granted full and free opportunity for such hearing, and after hearing all parties the committee were of the unanimous opinion that the legislation provided for in H. R. 7207 is of an urgent character and floud be acted upon at this session of Congress, and by the unanimous consent of said committee said bill is approved, and Congress is asked to pass it.

Now, in addition to the statement made by the chairman of the committee that the Secretary of the Interior was heard before the committee, as well as writing in favor of the bill, the Secretary of Agriculture was present, as well as writing in favor of the bill, and the committee's report is in favor of

In addition to that, Dr. Smith, the Director of the Geological Survey, was before the committee and approved of the bill. F. H. Newell, the Director of the Reclamation Service, was before the committee, and in a full statement by him is in

favor of the bill.

As stated by the chairman, Mr. Graves, Chief Forester, was before the committee, as well as all members of the Board of Engineers who were sent to California to make a special investigation in relation to this project and report to the Sec-

retary of the Interior.

Mr. Gifford Pinchot, chief forester at one time, now head of the National Conservation Association, appeared before the committee favoring the bill, and stated that upon the investigation and reports of the various engineers and officers upon this point, the general principle of conservation, no bill had been presented in Congress which carried out in detail better the question of actual conservation than does this bill. entire population surrounding San Francisco, the large cities of Berkley, Oakland, and Alameda, and others, have favored this bill and request that it be passed. The State of California by its legislature has recommended and unanimously passed a resolution urging this legislation. The governor of the State of California, the conservation commission of the State of California, and, in fact, it is practically the unanimous sentiment of the State of California that this bill ought to be passed; that it is good legislation; that it is a question of conservation in addition to permitting the utilization of the waters of the Hetch Hetchy Valley. San Francisco urgently needs an additional supply of water. The city is confronted by an emergency. Practically one-third of the municipality is without an adequate water supply. The condition is so grave that the water company now supplying the city has advertised in all the papers warning the people not to wash down their steps, sprinkle their lawns, or otherwise waste water.

The reason for this is that there have been two years of light rainfall and the storage reservoirs have not been refilled. San Francisco is situated on a narrow, arid peninsula, where there are no summer rains, and it is necessary to store a water supply during the rainy seasons. On its eastern side it has a coast range of mountains, California running north and south, and along on the western slope is what is called the

coast range

Mr. BALTZ. Mr. Chairman, will the gentleman yield? Mr. RAKER. I do.

Mr. BALTZ. Under whose supervision will these improvements be made?

Mr. RAKER. Why, they will be made under the supervision

of the Secretary of the Interior.

Mr. BALTZ. As I understand it the United States Government will have no expense whatever in connection with these improvements?

Mr. RAKER. Absolutely none. Mr. COOPER. What revenue will the United States Government get out of this?

Mr. RAKER. The revenue the United States Government will get out is, as stated by the gentleman from Oklahoma, first, after 5 years, will be \$15,000 for 10 years-

Mr. COOPER. A year?

Mr. RAKER. A year. The next 10 years \$20,000 a year, and from that on indefinitely \$30,000 a year. In addition to that the city and county of San Francisco maintains at its own expense the question of sanitation. In addition to that the city and county of San Francisco pays and maintains for all of the roads that are to be built in and about this park, and I will come to those features a little later. In addition to that it means a large increase of revenue to the Government by virtue of the roads that will be opened, so that people will be able to go into the Yosemite National Park, thereby paying each year an additional amount for concessions that to-day are absolutely nil.

Mr. ELDER. Is there any danger that San Francisco will come back at some time in the future and ask for an appropriation from the Government, as they did on a celebrated occasion

in relation to an exposition?

Mr. RAKER.

No; for many reasons. Well, I would like to hear them. Mr. ELDER.

Mr. RAKER. The question is, they are getting this right, practically a purchase, upon conditions provided for by this bill—not to be fixed by any Cabinet officer or executive officer,

but fixed in this bill by the Congress itself-so there is every reason, it seems to me, why the city and county of San Francisco can not come back, because this grant, when made, compels the city and county of San Francisco to file with the Secretary of the Interior its regular acceptance of this grant, and therefore it is bound on that account just the same as any other grant by the Government-

Mr. KAHN. I want to call the attention of the gentleman from California to the fact that Congress, under this bill, still retains complete control of the fixing of charges for the privi-

leges granted.

Mr. RAKER. Yes.

Under the terms of this bill Congress does not Mr. KAHN. relinquish its right to fix the charges that will be paid by the city. It is not left to any executive officer, but it is always in the hands of the Congress of the United States.

Mr. RAKER. In the first place, it is fixed definitely by this bill. Some think that it might be worth more in the future, and to avoid any possibility an amendment was put in the bill that Congress in the future, if it desired, might raise or lower this annual rent to be paid, so that San Francisco would be

compelled to pay it to the Government.

Mr. WINGO. If the gentleman will permit a few questions for information?

Mr. RAKER. Certainly. Mr. WINGO. How many acres of the public domain will be

taken under the provisions of this bill?

Mr. RAKER. If my friend will just let me precede that with a little formal matter, I will then come to it, and I would be delighted then to yield to anyone who desires to ask questions on that subject, but now I desire to take it up in consecutive

Mr. HARRISON of Mississippi. I desire to ask the gentleman one question in connection with the reply of his colleague from

California.

Mr. RAKER.

Mr. RAKER. Very well. Mr. HARRISON of Mississippi. I understood the gentleman from California to say that Congress did not relinquish its right to control with respect to electric powers or other matters. Is that true or not?

Mr. RAKER. It is a grant under conditions, and when it is accepted by the city and county of San Francisco it becomes effective for all purposes except that they retain the right to

control the question of charge per year.

Mr. HARRISON of Mississippi. The reason why I ask is that I was under the impression that this bill gave the State of California the absolute right to fix charges and control the matter with respect to who should have or might have that surplus power after the city of San Francisco utilized what they wanted to utilize under the terms of the bill. And in the event there was not any law in the State of California to fix the rate or regulate the matter of rates and say who should have this power, then the Congress of the United States could step in and exert its control?

Mr. RAKER. That covers the situation.

Mr. HARRISON of Mississippi. There seems to be a difference of opinion between the two gentlemen on that point.

Mr. RAKER. I will get to that feature and explain it as I

understand it.

Over the divide on the north is the Sacramento Valley a couple of hundred miles long and which has approximately 3,500,000 acres of arable land. On the south side of the city of San Francisco is what is known as the San Joaquin Valley having approximately about 7,500,000 acres of arable land. And then on the east are what is known as the Sierra Nevada Mountains running practically from the north to the south of the State of California. In these Sierra Nevada Mountains is where the Hetch Hetchy Valley is located, all in the State of California.

The city has a population of about 500,000 people, and its water supply is approximately 40,000,000 gallons per day. Half of the present water supply of San Francisco is brought from the gravel head at the control of the present water supply of San Francisco is brought from the gravel beds beneath agricultural lands in Alameda County. The other half is stored water in peninsular reservoirs. Proof of this emergency is given by William Bourn, president of the Spring Valley Water Co., who testified under oath before the water rates committee of the board of supervisors on May 19, 1913, as follows:

The situation to-day in this city—there is nothing as deplorable—there is nothing in my life that I regret as much as the water situation in San Francisco to-day. It is doing this city more harm than the earthquake ever did it.

And, in passing, the Spring Valley Water Co., which made opposition always heretofore, both before the Secretary of the Interior and the Secretary of Agriculture, and before Congress,

has practically withdrawn its opposition because the matter has been adjusted between the Spring Valley Water Co., the company now supplying water to San Francisco, and the authorities of San Francisco. The matter is now in court and up to the judges to determine the value of the Spring Valley Water Co.'s property, and after it has been determined the city and the county of San Francisco will take it over.

Mr. WINGO. Will the gentleman yield there, right in con-

nection with the water supply of the city?

Mr. RAKER. Let me finish this statement and then I will yield on that. Mr. Bourn states:

The situation to-day in this city—there is nothing as depiorable—there is nothing in my life that I regret as much as the water situation in San Francisco to-day. It is doing this city more harm than the earthquake ever did it.

Now, that is the president of the Spring Valley Water Co., that furnishes the water supply for the city and county of San Francisco to-day. At that same hearing, referring to the Hetch Hetchy project, Mr. Bourn said:

If I had it in my power to give you Hetch Hetchy to-morrow, I would give it to you. If you think the Spring Valley Water Co. is going to make any objection to your application to Congress, you are greatly mistaken.

Now I yield to the gentleman.

Mr. WINGO. Is it the contention that San Francisco's only available water supply is this Hetch Hetchy Valley project?

Mr. RAKER. Not the only available water supply, but the only reasonable available water supply.

Mr. WINGO. What other available supplies have they, and what would be the estimated cost of those supplies?

Mr. RAKER. It is in the report. I have it here. There are a number of them.

Mr. KAHN. If my colleague will permit me, I think it is resolved to four principal sources that could be utilized, including the Hetch Hetchy.

Mr. RAKER. That is about the condition. I have it here very handy. If the gentleman will let me go and finish this, I will get back to that in just a moment.

For 12 years San Francisco has been endeavoring to procure

a water supply from the Hetch Hetchy Valley.

The city's object was opposed until this year by the Spring Water Co., the irrigationists of the Turlock-Modesto irrigation district, the promoter of several water schemes which the city did not want, and by a small group of men who based their objections upon the love of nature and opposed the creation of a lake where a canyon now exists. All this opposition, except that of the nature lovers, is withdrawn.

The city has arranged for amicable condemnation proceedings to acquire the property of the Spring Valley Water Co. The city will spend from \$500,000 to \$1,000,000 more than is required at this time to increase the storage to guarantee water

for irrigation.

The city owns two-thirds of the floor of the Hetch Hetchy

Valley, and also owns a portion of the dam site.

The city has spent \$1,750,000 in the purchase of privately owned rights in the Hetch Hetchy Valley and the Yosemite Park, and now asks Congress for permission to build a dam and for rights of way for conduits, pole lines, and so forth, over the public lands.

In creating this water system, the city agrees to supply water at cost to irrigationists, and will also supply electric energy at

cost to landowners in the Turlock-Modesto district.

The power potentiality of the stream is estimated at 115,000 horsepower in its ultimate development. It is proposed to develop this energy in 10,000 horsepower units, and use the power for public purposes in San Francisco and adjoining cities.

Now, going back to the fact of the city and county of San Francisco owning the Hetch Hetchy Valley, the elevation above the level of the sea is 3,500 feet. The maximum height of the dam will be 325 feet. The acres in the reservoir to be covered when the water is raised to 325 feet will be 1,330 acres, holding 352,000 acre-feet of water.

Lake Eleanor, which is right across the divide, and a little farther north and east, is 5,000 feet in elevation. A dam 245 feet high will cover an area of 1,443 acres, or hold 288,000 acrefeet of water.

The Cherry Valley, just north, is of 5,000 feet elevation, and with a dam of 150 feet it will cover 960 acres, or hold 56,800

acre-feet of water.

The Stanislaus Forest, in which part of this is located—the Cherry Creek and part of the ditches—coyers 1,135,500 acres of land. The Yosemite National Park covers an area of 1,124 square miles, or 719,622 acres.

I want to call the particular attention of the committee to this fact, that the city and county of San Francisco own in the park 1,960.33 acres of the land that is to be covered by the reservoir. They have a patent to the neighborhood of 780 acres in the flower of the Hetch Hetchy Valley. They own land in the reserve to the extent of 1,446.13 acres, together making 3,406.46 acres; and the total area to be covered in the three reservoirs is 3,373 acres—less than the area of the land that is now actually owned by the city and county of San Francisco.

I want particularly to call the attention of gentlemen to the fact that the world-wide famed Yosemite Valley, which is in the Yosemite National Park, lies south in the neighborhood of 20 to 25 miles, on a different divide and in a different watershed from that in which the Hetch Hetchy Valley is located. The Merced River heads in the Yosemite Valley, and the Tuolumne River heads in the Hetch Hetchy. There is not an attempt, there is not an effort, to in any way interfere with or to come within less than 20 miles of the Yosemite Valley.

Take now the Hetch Hetchy, which is owned practically, half of it, by the city and county of San Francisco, the other half being owned by the Government. The city and county of San Francisco, without the consent of the Government to use it as a dam, can not use it unless the Government condemns the city's property, upon which it has expended \$1,750,000 in various ways; about \$700,000 for land alone. The city and county can not use this land that they now have for a reservoir site unless the Government gives its consent, and there we see this natural reservoir site unused, with the waters of the Tuolumne River, that from the beginning of time have been running to waste as flood waters in the Pacific Ocean, causing devastation in the spring, flooding part of the San Joaquin Valley, around Stockton, up to the steps of the depot, as I have seen myself, and from then on to Sacramento, flooded, and even from there on up to Red Bluff, or Tehama Junction in conjunction with the Sacramento River, and now this permission is asked to build this dam in order that these flood waters may be restrained in flood times, and in order that the city and county of San Francisco may use the flood water, not the natural flow of the stream, because in the bill they concede the prior right to the irrigationists below, but for the purpose of supplying the natural wants of the city.

I want, Mr. Chairman, to call the attention of the committee further to this fact that this bill provides for roads to be built by the city and county of San Francisco, from the public built by the city and county of San Flanchy Valley. They say highway into the valley, the Hetch Hetchy Valley. The city and there is a trail around the Hetch Hetchy Valley. The city and county of San Francisco under this grant are to build the road up to the dam, around the lake, and from there north to the Tioga Road, which is a public road leading across the mountains to the State of Nevada. It will also build a trail up to the Tiltill Valley, where the city and county of San Francisco now own 160 acres of land, an ideal place for hotels and camp sites. They will build a road from there through the valley to Smiths Peak, and a trail from the main road around the Hetch Hetchy on to Lake Eleanor and then to Cherry Creek. The city and county of San Francisco will keep up these roads from now until the crack of doom. To-day about 25 to 75 people per year visit the Hetch Hetchy Valley. You must go in on the trail and on burro back to get there. Instead of that, you will have one of the scenic roads of the world built to this valley, and instead of having barren cliffs on either side you will have boulevards around this lake, so that the people may see the wonders of the Hetch Hetchy Valley and also the remainder of this territory that is in the watershed of this valley. They will make it accessible, and make accessible the Tuolumne meadows, which are about 40 miles beyond, where there are about 1,500 acres which will be accessible to campers. That part of the floor of the valley which is now owned by the city and county of San Francisco, about 780 acres in extent, could now be fenced, and the Government could be prevented from using any of that part of the floor of the valley. But instead of that, they say they will build roads where people can go and see this beautiful lake, as well as the rest of the park.

They will turn over the 160 acres of land which they now own at the Tiltill Valley for camping purposes. They will make accessible Lake Eleanor, which is to-day inaccessible, except to a few who go there by trail. They will turn over the Cherry Creek Valley in the same way, all that they do not use for reservoir purposes, and there is a good deal of it. So that instead of destroying the scenery and preventing the people going in there, this valley will be made more beautiful with a road in, through, and about it, with the camping ground made accessible and turned over to the use of the public instead of being, as now, controlled by a municipal corporation. Those who have seen lakes in the mountains can not but believe that Lake Hetch Hetchy will be more beautiful than anything there to-day. Lake Louise, in Canada, which is but a pond of water with a snow-capped mountain in front of it, a rugged mountain on one side

and a rugged mountain covered with trees on the other, is one of the most famous bits of scenery in the world. The very colors of the rainbow are reflected in that lake, and people go from all over the world to behold its beauty. It will be the same with this lake in the Hetch Hetchy Valley, which is to-day inaccessible. As for the rocks, there are grander and larger rocks to be seen in the Yosemite Valley. You can see them almost anywhere; but this bill proposes to make accessible that which to-day is inaccessible. Prof. Grant said in relation to Lake Louise, "I would like to go to heaven. I do not want to go to hell; but if I can not go to heaven, send me to Lake Louise." And it will be the same with Lake Hetch Hetchy when it is

Mr. WILLIS. I have not had an opportunity to read the report or to hear the gentleman's speech, and I am asking this question for information.

Mr. RAKER. Yes.

Mr. WILLIS. Can the gentleman state what are the approximate requirements of the San Francisco water supply in millions of gallons per day at the present time?

Mr. RAKER. They figure it at 40,000,000 gallons per day at

the present time.

Mr. WILLIS. I have before me a statement which alleges that aside from the Hetch Hetchy there is an available water supply of between 600,000,000 and 700,000,000 gallons outside this proposed reservoir. What does the gentleman say about Let me read this statement.

Mr. RAKER. It is an article that was published this morn-

Mr. WILLIS. This is an extract from an article printed in the New York Times.

Mr. RAKER. Yes, I have it in my pocket. Mr. WILLIS. I will read it to the gentleman:

The suppressed report, showing that the Mokelumne River is a better and cheaper source than the Hetch Hetchy, says that between 600,000,000 and 700,000,000 gallons of water outside the park may be delivered daily into San Francisco and the adjacent bay region, supplying their growing needs for perhaps a century to come.

What can the gentleman state about that?

Mr. RAKER. I can answer that by stating this: The committee went into that matter fully. The Army board appointed by the Secretary of the Interior went into it fully, and the Secretary of the Interior went into it fully, and Mr. Pinchot went into it fully, and they claim that these people did not have the water supply that they claimed they did; that it would not be enough to furnish the city and county of San Francisco with the required amount of water. Next, that there is 200,000,000 gallons daily that belongs to the irrigationists already appropriated, but that the main objection is by the president of the company, who appeared before the committee and admitted that his only opposition to this bill was, practically speaking, that he wanted to sell his system to the city and county of San Francisco and if he could beat this bill he would have some hope of doing it.

Mr. WILLIS. The article referred to alleges the suppression

of the report.

Mr. RAKER. Yes. He said he had an engineer by the name of Aston, and it developed that Mr. Aston was to get 10 per cent if he sold the property on a contingent fee. The Bartel report that is supposed to be suppressed lies on the committee table in the House now. That report was in the public files of the proper office of the city and county of San Francisco, open to the public at all times; was used by Mr. Wadsworth, the engineer who made the report; was known of and all its facts and history familiar to the board of engineers, as the record of the testimony appeared before the committee as well as the written letters attached to this report from Col. Biddle show.

The entire report, all of the facts stated in it, all of the conditions, all of the maps were a public record, open to be seen by everybody, were used by Mr. Wadsworth, were used by the Board of Engineers, and, lastly, the testimony of Mr. Sullivan, the president of the Blue Lakes Water Co., admitted before the committee that if Aston was given time the only thing he could do would be to elaborate upon the Bartel report, and that he would be unable to put in the report any single one item of

materiality that was not already in the report. Mr. WILLIS. Now, it is stated in another document here and no doubt the gentleman has seen a copy of it-that this report stated that the resources of this Mokelumne River was

600,000,000 gallons instead of 430,000,000 gallons.

Mr. RAKER. Well, that is a misstatement. I have read it

carefully.

Mr. WILLIS. It says 600,000,000.

Mr. RAKER. • That was written by an sloquent gentleman, a man who understands the English language and knows how to present his statement, but he did not have the facts. You know

you can write a good thing, and it reads well, but if you want to use it to convince men you must have the facts.

Mr. WILLIS. Now, one more question. Is it a fact that this project has been taken up by governmental authority on four

different occasions and unfavorably passed upon?

Mr. RAKER. No. I will answer "no" and then explain.

The Secretary of the Interior, Mr. Hitchcock, refused it. It came back and a rehearing was granted. Then it came back to Mr. Garfield, and he granted a revocable permit under conditions stated in it, which were that the city and county of San Francisco should do certain things, and should recognize certain irrigationists' rights. Now, that report stands for us to-day. Mr. Ballinger when he took office made an order citing the city and county of San Francisco to show cause why the permit should not be vacated. Under that this Army board was appointed, extended hearings of 10 days were had; they took five volumes of testimony before Secretary Fisher, and he said he did not have time to go through it all, but with the doubt he had about granting the right, it being a national park, the city and county of San Francisco should obtain these rights through an act of Congress. Now, that being the case, Secretary Lane, having been attorney for the city and county of San Francisco, put it up to Congress that they should take it up, and he appeared before the committee, making a full and clean statement that he had been counsel for the city and county of San Francisco, and from his knowledge and information he believed that this was one of the important pieces of legislation that ought to be granted. Therefore I say that, as a matter of fact, the city and county of San Francisco rights have never been denied.

Mr. WILLIS. Will the gentleman yield for another question? He has been very patient.

Mr. RAKER. I do.
Mr. WILLIS. It is stated in various communications that have come to me that this is simply a question of money; that there are other available sources for this water supply which the city of San Francisco can get if it is willing to pay for it; but this is simply a proposition of having the Government of the United States give one of its parks for the use of the city of San Francisco simply in order to save money for the people of San Francisco. I have seen that statement. What does the

gentleman say as to that?

Mr. RAKER. Now, in the first place, take up the Hetch Hetchy. The city and county of San Francisco commenced in 1901 under the laws of the State of California, and before this land became part of a public park it literally complied with the statutes of California in filing its water rights, posting its notices and filing them under the law, and it had a reasonable time within which to complete the ditches and other appliances to make it available. It then proceeded with the Government, and after this hearing they suggested they must eliminate any private interests or holdings. They did proceed and bought the ground in the Hetch Hetchy, costing them six hundred and odd thousand dollars, and they bought the land around the Tiltill Valley, to be turned over for camping grounds; they bought the land around Lake Eleanor and Cherry Creek; they expended in getting title to land and procuring water rights, always urged on by the Secretary of the Interior with the idea that it would become their property, approximately \$1,700,000 to get those Now, there is another system, known as the McCloud, in the northern part of the State, that will cost something over \$20,000,000 more than this, without any resulting benefit from the electrical power, and the water rights purchased will be as great as those that are connected with this system. There is another scheme of pumping water from the Sacramento River up about 30 miles at its mouth, and its pipes are to be brought down on each side of the bay down to Dumbarton Point, or even farther, and thus bringing them into San Francisco, but that is objectionable. That will cost something over \$20,000,000 more than this, and it is not giving any returns for any money invested. There is another system, known as the Cisumins.

Mr. WILLIS. How much does the gentleman estimate the

enactment of this law will save the city of San Francisco in

providing her water supply?

Mr. RAKER. Well, I believe it will save them up into \$20,000,000 to \$50,000,000. The report is \$20,000,000. There are many reasons, it appears to me, which will run it more, because the people living in the city and county of San Francisco and around the bay know that they are getting a purer water supply, and it enhances values and conditions there. They would know that they are going to get a good supply that will not be contaminated by the surroundings. The Hetch Hetchy and the country tributary, which is about 1,200 square miles of territory that will be drained, is now uninhabited, only in the summer time, when campers go in there. Now, regula-

tions are provided for in this bill to protect campers, which ought to be, notwithstanding the city and county of San Francisco did not have the right to make the dam; but after these regulations are complied with no further regulation shall ever be imposed upon the Government, and all of those who appeared before the committee-Mr. Pinchot, Secretary Lane, Mr. Houston, Mr. Smith, Mr. Graves, and others-say that the regulations now imposed will not prevent the park from being used to its very utmost, or as much as it ought to be used if the reservoir were not there. Now, in conclusion, if any further sanitation is required the city and county of San Francisco shall filter their water. Now I yield to my colleague from California.

Mr. KAHN. Mr. Chairman, the matter of saving \$20,000,000

by the city of San Francisco is an important matter. I desire to say, replying to the gentleman from Ohio-

Mr. RAKER. I just wanted to yield to a question at this

point.

Mr. KAHN. I just wanted to call the attention of the gentleman from Ohio [Mr. WILLIS] to the fact that that saving is important to the city-

Mr. RAKER. Personally a matter of \$20,000,000 does not amount to much, but, of course, it is a big item to the city in

its completing a water system.

Mr. KAHN. But it amounts to a great deal to the taxpayers of the city and county of San Francisco, a city destroyed by fire in 1906.

.Mr. RAKER. It is a question of conservation and of utilizing every water supply in the State of California to its highest purpose. It is a turning of what is now a barren canyon into a beautiful and exquisite lake. It is opening up the roads of that park to the people of the world, so that after they go to the Yosemite they may go to see the Hetch Hetchy Valley, and in addition to that it provides and supplies the most exquisite taste of the people who live in San Francisco and the surrounding communities in that they may know they are receiving a supply of water that is pure and healthful. And, in addition to that, the expense in the use of water for household purposes to the city and county of San Francisco and neighboring cities will amount to hundreds of thousands of dollars in saving because of the softness of this water as compared with that from other

Mr. KAHN. Will the gentleman yield to a question?

Mr. RAKER. I will.

Mr. KAHN. Does not the gentleman from California think that the saving of \$20,000,000 to the taxpayers of the city who had their streets destroyed, their sewers destroyed, their schoolhouses burned down, their fire houses burned down, their city hall burned down, their hospitals burned down-does not the gentleman think-

Mr. RAKER. I want to say to my colleague that that fire was hell. There is no question about it. It amounts to a great deal, and there are many other reasons why Hetch Hetchy

Valley should be used for this purpose.

Mr. KAHN. Does not the gentleman think the people who have had to tax themselves to reestablish all those utilities ought to be considered in the question of cost?

Mr. RAKER. Certainly. Still, I would go on a higher and broader basis, that out of every other consideration-for health, improvement, and conservation, for building up the rest of the State—this is the proper place for San Francisco to go for water rather than to pump it out of the river.

Mr. WILLIS. Will the gentleman yield further?

Mr. RAKER. I yield.
Mr. WILLIS. I understand the gentleman to state that this will save San Francisco somewhere from between twenty and fifty millions of dollars?

Mr. RAKER. I think so. Mr. WILLIS. And his colleague thinks that is proper on account of the great loss that San Francisco suffered. What I want to know is, if this is going to save the city and county of San Francisco twenty, thirty, forty, or fifty millions of dollars, how much the people of the United States are going to get out of this grant? Is it proposed to give it away?

Mr. RAKER. No, sir. There never has been a bill passed or offered to this Congress that is more fair, more equitable to the American people, not only in California, but every other part of this Government than this one, for the reason that this is a grant under conditions that the city and county of San Francisco do certain things. What are they? They are San Francisco do certain things. What are they? to maintain roads as specified, which would cost this Government in the neighborhood of \$1,000,000.

Mr. WILLIS. For whose benefit are those roads being made? Mr. RAKER. For the benefit of the great, loyal, God-fearing, liberty-loving people of the United States-all of them.

Second, after the first five years it provides a fund of \$15,000 a year for 10 years; the next 10 years it provides a fund of \$20,000 a year to go into the Treasury and build up and maintain the rest of the park. After the period of 25 years the city and county of San Francisco pays the Treasury, into the special fund, the sum of \$30,000 a year from then on, ad infinitum, unless Congress desires to make it \$50,000 a year. That is a provision of the bill. In addition to that, they pay for all the sanitation, which means that all you good people from Ohio and other parts of the United States who go into that section may know you are going to be provided with and drink good water without having any contagious disease fol-

The city and county of San Francisco are to do that. They are to maintain the roads that will be built from there as soon as they use this dam. In addition to that it makes a beauty spot out of what is a barren canyon to-day. That ought to be

worth something.
WILLIS. Will the gentleman yield?

Mr. RAKER. For another question. Mr. WILLIS. I am very much ente Mr. WILLIS. I am very much entertained with the gentle-man's eloquent description. I wish he would put it in figures. He says he will admit this will save San Francisco \$20,000,000.

Mr. RAKER. Among friends a few million dollars do not

make any difference.

Mr. WILLIS. Yes; I know. But I wish the gentleman would reduce the things he has enumerated to their present worth. What I want to know is how the Government is going to get out of this the value of the property which it is proposed to

Mr. RAKER. Let me call the attention of my friend to this fact, which possibly he did not know: Does the gentleman know that 780 acres of this glorious valley belong to the city and county of San Francisco to-day? Does the gentleman know that under a decision of the Supreme Court, which I have here, the city and county of San Francisco could fence it up and prevent anybody from going on it and getting any use out of it? Does not the gentleman know that the Government itself could not go in there and build a dam to-day unless it paid millions of dollars for it? And does not the gentleman know that the city and county of San Francisco, on the other hand, could not go in there and build without the consent of the Government?

Now, are we going to stand as a dog in the manger and prohibit and prevent this natural reservoir from being used, and refuse to hold back these flood waters which, as I have stated, from time immemorial have run to waste on their way to the sea and caused the destruction of hundreds of thousands of dollars worth of property in the San Joaquin and Sacramento Valleys? In addition to that this bill proposes to give the irrigationists in the San Joaquin and Medisto and Turiock districts a solemn guaranty that they will always have water for their 300,000 acres of land. To-day they have to depend upon the stream flow. That will be utilized and put into operation instead of being allowed to go to waste. Under those circumstances what is the Government losing?

Mr. WILLIS. I will ask the gentleman how much is all that worth? I want to know how much the Government is going to

realize out of this.

Mr. RAKER. Of course I can not look into the future and say how long San Francisco is going to last, but I think that city will last at least 500 years and then some.

Mr. WILLIS. Oh, a thousand years. [Applause.]

Mr. RAKER. Yes. The city and county of San Francisco are paying for this. What more do you want? I do not understand what the gentleman wants to effect. I have given the figures in detail.

Mr. WILLIS. I am trying to ascertain the facts. I am not

trying to use up the gentleman's time.

Mr. RAKER. Oh, I know the gentleman would not do that. Mr. WILLIS. The gentleman's colleague, the gentleman

to my left, has explained about the great desirability of helping the city of San Francisco. I agree to that. The gentleman states that this saves San Francisco somewhere between \$20,000,000 and \$50,000,000.

Mr. RAKER. I did say that.

Mr. WILLIS. What I am trying to get at is, so far as it may be estimated, what is the actual cash value of this property which it is proposed to turn over, and how much is the Government going to realize from it?

Mr. RAKER. Why, my dear sir, the actual cash value to-day consists only of cliffs, barren cliffs, from the public land right of way up to the Hetch Hetchy Valley, and the actual money value of the dam site and the property of the Government. There is no man under the sun who can accurately figure the

over \$250,000 or \$300,000, or something like that, to the Government. That land until lately was all open to public settlement, and everybody could have used it.

This is not the only beautiful valley, the only garden spot, in the State of California. It runs for 500 miles to the north. We have the great Calaveras Trees, the greatest and the largest in the world, for the protection of which we have been appealing in vain to this Congress. They are now in private ownership, and we have appealed to Congress in order that they shall not be destroyed. But can we get a peep in? No. We also have the great extinct volcano—the latest in the United States—on Mount Lassen, where we have been trying to establish a public park, so that it may not be looted and destroyed. But can we get action and have our proposition adopted? No. The great snow-topped peak of Mount Shasta we have been trying to have put in a national park. Can we get that done? No. The great redwoods of Humboldt County, that have been there according to the best estimation for over 800 or 900 years, measuring 35 feet in diameter and 380 feet high, are now in private ownership, and when once destroyed can never be replaced. Do you find anyone trying to save them? No. We have old barren rocks there, such as this country is full of, and simply because we desire to put water on that barren area, 200 feet deep, you say we are attempting to deprive this Government of something valuable that belongs to it.

If you will look to the lakes now in the mountains, and particularly in the Yosemite Valley, you will find that when this lake is created there, instead of having cliffs 2,000 feet high on the floor of the valley, looking into the lake you will see the appearance of a cliff 4,000 feet high. That is the dif-

ference that we will have there.

This improvement, like any other, will add to the value of the surrounding property. I believe this will be an absolute benefit to the Government. From the dam down to the first power-plant site there will be no overhead wires, and from there there will be a beautiful road to the Hetch Hetchy Valley.

Mr. SIMS. The Government does not have to pay out any-

thing for the doing of this work does it? Mr. RAKER. Absolutely not one dollar.

Mr. SIMS. It will receive a return without making any investment?

Mr. RAKER. Absolutely. Mr. SIMS. Yet we are building a \$400,000,000 canal and letting privately owned coastwise vessels go through it free. Mr. RAKER. Yes.

Mr. SIMS. And then depriving the people of San Francisco of the water that the Government does not pay a cent to

Mr. RAKER. Yes.

Mr. J. R. KNOWLAND. If the gentleman objects to that, will he have that paragraph stricken from the last Democratic national platform?

Mr. SIMS. It ought to be stricken from it. It is the only

blot on the pages of that platform that I know of.

Mr. HARRISON of Mississippi. I understand that by this bill the city of San Francisco can get 60,000 horsepower within a certain time?

Mr. RAKER. Yes.

Mr. HARRISON of Mississippi. And that in the event they do not use that much power it can be utilized by other persons or corporations?

Mr. RAKER.

Mr. RAKER. Not by corporations. Mr. HARRISON of Mississippi. Other persons?

Mr. RAKER. Yes.

Mr. HARRISON of Mississippi. Under the bill, who has the right to say what persons shall utilize that surplus power, the

Secretary of the Interior or the State of California? Mr. RAKER. The bill is intended to give to the city and

county of San Francisco the right to build a dam. The right to build that dam will cover certain land owned by the Government as well as the right of way to bring out the power and to build roads to transport the material. For the granting of that land the Government will receive the pay stated in the bill. Now, so that there can be no monopoly in regard to the water power that may be generated, the city and county of San Francisco must, as a unit, develop electric power up to 60,000 horsepower of the If they do not do so, the Secretary of the 115,000 horsepower. Interior may offer this right to the highest bidder who will develop it and use it, so that there will be no waste of the property thus created.

Mr. HARRISON of Mississippi. One other question.

Mr. RAKER. Yes.

Mr. HARRISON of Mississippi. Does not the gentleman think actual cash value of it at the present time, but it can not be the State ought to have the primary right to say what persons shall get this water power, subject to the approval of the Secre-

tary of the Interior?

Mr. RAKER. No; I do not believe that is involved. In the first place, there is no attempt by Congress to control the waters which belong to the State or to private individuals. You will notice that a further provision of this bill is that the laws of the State of California shall control absolutely the question of water rights and the interests of those that it may affect, and this bill does not attempt to supersede the laws of the State of California or the rights of those who desire to exercise and perfect their rights to have them adjudicated under the laws of the State of California.

Mr. SUMNERS. Does San Francisco own its own lighting

plant now?

Mr. KAHN. No; it does not.
Mr. RAKER. I understand it does not.
Mr. KAHN. It does not own its own water supply. Its present water supply is furnished by a private company.

Mr. RAKER. The Spring Valley Water System.

Mr. SUMNERS. Is it the purpose of this bill to have San Francisco supply electric power and water to its own people? Mr. RAKER. Yes.

Mr. SUMNERS. Or to supply these corporations, which will

in turn supply the people?

Mr. RAKER. Under this bill it is to supply its own inhabitants first. It is to supply the public utilities, the courthouse, the schoolhouses, the street lights, and such things as that for its own citizens. Next, it is to supply those around the baysome 10 cities that may come under the State law and become beneficiaries of this system and pay their proportion.

BAY CITIES UNITE IN PETITION.

The cities around San Francisco Bay join in asking that San Francisco be given the Hetch Hetchy grant. These cities propose-and the State law permits-to organize a metropolitan water district, and the Hetch Hetchy system, together with the local water, will insure an adequate supply for the future.

No injury can possibly be done to anyone or to any interest by the construction of this system. One the contrary, it will be a development of resources for the beneficial use of millions

The ultimate cost of the project is estimated at \$77,000,000. The initial cost for the first installation necessary to bring 200,000,000 gallons of water to the city is \$37,500,000.

BONDS VOTED IN 1910.

In 1910 the city voted overwhelmingly \$45,000,000 in bonds for the construction of this water system. There were 30,000

votes cast for and 1,200 against this bond issue.

A water famine is impending, and the city desires to get to work at once on its Hetch Hetchy supply. Pending the construction emergency development of water has to be made, and this work ought to begin at once. It is impossible for the city to do the emergency work until the larger question—the source of the mountain supply-is settled, as no part of the bond money available can be used unless it is expended for an integral part of the Hetch Hetchy system.

With the Hetch Hetchy grant assured, additional pipes, which ultimately can be used in the Hetch Hetchy scheme, will be laid, and the stored waters now available can be drawn lower and

wells sunk for neighborhood supplies.

COSTLY WATER.

To-day San Francisco pays higher rates for water than any city of its size in the world. The rates are 15 to 21 cents per 1,000 gallons.

When these water rates are added to a burdensome tax rate caused by a \$500,000,000 loss from earthquake and fire in 1906, no reasonable person should object to the city obtaining an ade-

quate supply at the cheapest cost.

Any alternative supply would cost the city \$20,000,000 more, with no credit for power development. This \$20,000,000 difference in cost does not represent the full amount of difference, as any other source in the State of California which the city might use is now owned by power companies and other corporations.

TO CONVERT CANYON INTO LAKE.

Hetch Hetchy Valley is a gorge in the Yosemite National Park. It is 30 miles from Yosemite Valley proper. The watershed is composed wholly of granite mountains, on which there is a heavy snowfall every winter. It is proposed to convert the valley into a magnificent lake and store the water from the melting snows which now runs off in torrential floods each year, doing good to no one and at times causing great damage.

HISTORY OF SAN FRANCISCO WATER PROBLEM.

In 1900 engineers and thoughtful citizens realized that the existing local supply from the peninsula and across the bay was not sufficient for the progressive growth of the city. In 1901 lor, and Col. Spencer Cosby. The investigation was completed

the city engineer of San Francisco was directed to examine available sources of water supply from the mountains. Mr. C. E. Grunsky, the engineer afterwards selected as commissioner on the Panama Canal and still later engineer of the Reclamation Service, made a comprehensive survey of Sierra sources. In his work he spent \$50,000 and something over a year in time. He and his assistants examined, first, the Spring Valley waterworks, with 12 separate sources as auxiliaries; second, Lake Tahoe; third, the Yuba River; fourth, the Feather River; fifth, the American River; sixth, the Sacramento River; seventh, the Eel River; eighth, Clear Lake; ninth, the San Joaquin River; tenth, the Stanislaus River; eleventh, the Mokelumne River; twelfth, the Tuolumne River; thirteenth, the bay shore gravels in and around San Francisco and Alameda County; and fourteenth. the Bay City Water Co.'s reserve.

As a result of this investigation, the Tuolumne River, its source in the Hetch Hetchy Valley, draining 1,501 square miles of the Sierra Mountains, with an annual rainfall of from 20 to 50 inches and a mean annual run-off of 24 inches, or nearly

2,000,000 acre-feet, was selected.

SCIENCE AND SENSE APPROVE PROJECT.

Every engineering, sanitary, and economic factor favored the Hetch Hetchy as the source. Added to these factors were freedom from complicating water rights and additional power possibilities outside the national reservation.

The distance which the water is to be brought is 142 miles. It is proposed to install 10-foot pressure tunnels, lined with concrete, through the mountains, and 10-foot steel pipes across the valley. 'This system will bring water to San Francisco under sufficient pressure to boost it to the highest levels without pump-The plans originally made by city engineers C. E. Grunsky and Marsden Manson were revised by Mr. John R. Freeman. probably the most noted hydraulic engineer in the world. Mr. Freeman brought to his assistance a group of noted experts, and now the work is in charge of M. M. O'Shaughnessy, city engineer, who has had extended experience in the construction of water systems in California, the Southwest, and Hawaii. Mr. Freeman remains as consulting engineer.

Immediately following Mr. Grunsky's report selecting the Hetch Hetchy Valley, the then mayor of the city, Hon. James D. Phelan set about to perfect water rights. At that time, 1901, the Hetch Hetchy Valley was not in a national park. The city could not as a municipality make filings for water under the laws of California at that time. Therefore Mr. Phelan in his individual capacity made filings, perfected them, and transferred them to the city of San Francisco. By this procedure San Francisco obtained priorities and has, in spite of all obstacles,

kept the city's rights alive.

Subsequently the Hetch Hetchy Valley was included in the national parks at the time the State of California receded the

Yosemite Valley to the United States.

Application was made to Secretary of the Interior Hitchcock for a permit to construct the dam and for rights of way. Mr. Hitchcock refused the permit and directed the city to buy out the Spring Valley Water Co. This was the beginning of trouble. Bitter contention arose over the water rates charged by the company and over a purchase price. No agreement could be reached, and for several years the problem remained unsettled.

GARFIELD GAVE LIMITED PERMIT.

When James R. Garfield became Secretary of the Interior San Francisco renewed her application for a permit. There was bitter opposition. After investigation, Secretary Garfield, on May 11, 1908, authorized the city to use Lake Eleanor and Cherry Creek, sources contiguous to the Hetch Hetchy Valley, and part of the Tuolumne watershed. About this time a group of men adverse to the city's interest secured an option on 720 acres of land which the city had to have and immediately ran up the price. This scheme caused delay. In 1909 the city voted \$600,000 bonds for the purpose of acquiring privately owned lands and water rights, and part of the expenditure of this sum was \$174,311.20 for the 720 acres of land in the Hetch Hetchy Valley. This land was of value to the city, and a number of private interests were trying to acquire it for the purpose of developing power, and as the Government had made the condition that private ownership be bought out, the city had to pay the price asked.

ARMY BOARD INVESTIGATES.

In 1910, at the request of the President of the United States, a board of three Army engineers was appointed to investigate and analyze the data and report on all available sources for a water supply for San Francisco.

This board was composed of Col. John Biddle, Col. Harry Tay-

in December, 1912, and the Army board report was filed in Feb-

ruary, 1913. (H. Doc. 54, 63d Cong., 1st sess.)

Secretary of the Interior Fisher, with the Army board, the engineers of the Geological Survey, the Directors of the Reclamation Service and the Geological Survey, and other Government experts, conducted a 10-day oral hearing on all the reports submitted in November and December, 1912.

UNITED STATES ENGINEERS APPROVE.

As a result of all this, the Army board reported in favor of San Francisco, stating that the Hetch Hetchy was the most economical and available source of water supply for the bay cities

Secretary Fisher did not issue the permit. He received the Army board report a few days before his retirement from office, and passed the question on to his successor and to Congress.

Secretary Lane, having been the city attorney of San Francisco and an attorney of record in the Hetch Hetchy proceedings, while he urges the grant, felt that it were better procedure for the city to obtain its authorization from Congress.

These facts and additional data are more clearly set forth in the transcript of proceedings by Hon. Percy V. Long, city attorney of San Francisco. (See Vol. I of hearings, beginning at p. 94; see also engineering history by M. M. O'Shaughnessy, p. 130, Vol. I.) Mr. O'Shaughnessy says in part:

p. 130, Vol. I.) Mr. O'Shaughnessy says in part:

In California we are often subject to a succession of two and sometimes three dry years. For a municipal supply this involves having a reservoir and storage capacity able to tide over such a dry period. In San Francisco for the past two years there has been a shortage of over 50 per cent of rainfall, and this has resulted in leaving our reservoirs in a very depleted condition, so that the public is very much alarmed as to what the outcome is going to be. Personally, as the city official most directly responsible for improving conditions, it is a subject of very grave alarm, and for the past three or four months I have been making explorations all over the city in our narrow peninsula trying to develop what strata there is that will be capable, in this emergency, of relieving our situation. There is no other city in the United States at the present time of the size of San Francisco confronted with such a situation.

Mr. O'Shaughnessy says further that the Spring Valley Water

Mr. O'Shaughnessy says further that the Spring Valley Water Co. is supplying about 41,500,000 gallons per day. In addition there are drawn from private wells about 8,000,000 gallons per day, so that the daily consumption is about 50,000,000 gallons. He adds that if the present demands were supplied, the consumption would be 75,000,000 gallons per day.

When it is considered that San Francisco is growing very rapidly, and that whole districts can not be improved, homes built, and sanitary requirements fulfilled because of lack of water, it is apparent that San Francisco must have more water than is available from any near-by source.

ALL WATER NEEDED FOR USE.

Supplementing Mr. O'Shaughnessy's judgment is the following from the report of the Board of Army Engineers:

from the report of the Board of Army Engineers:

In one important respect the situation in California requires special consideration. In California all water has great value; due to the large extent of arid and semiarid land that can be made fertile by the use of water, irrigation is assuming great importance; due to lack of coal and the opportunity for economical water-power development, the use for the latter purpose will surely be greatly extended. In a relatively few years practically all available water will doubtless be appropriated for one or the other purposes, and it will then be possible to obtain it for municipal use only at great cost and damage to existing communities and industries. It is therefore necessary to-day for the cities of California to look further ahead than in most other parts of the country and to take such steps that in the future when they may need the water they shall have the right to take it. For this reason, it is believed that in making provision for the future supply of San Francisco and other bay cities, a source should be selected, if possible, that is capable of supplying the needs of the communities for the balance of this century. Such a course would seem both wise and reasonable, provided it involves no sacrifice of economy.

With a full knowledge of this entire subject, Gifford Pinchot,

With a full knowledge of this entire subject, Gifford Pinchot leading conservationist of the country, declares to the Land Committee that San Francisco's proposition is the highest form of conservation he has seen, and he urges the passage of the bill.

CITY READY TO HELP STATE.

Encouraged by the friendly aid of neighboring cities, San Francisco stands ready-money in hand-to make a great investment which will bring incalculable benefit to the State of California. This willingness to pack the burden is not wholly self-interest. The people of the city realize that economic devel opment of the great San Joaquin Valley will help to produce cheaper foodstuffs, attract home builders, and enhance the progress of the State. Imbued with this sentiment and characteristic generosity, the city is willing that an additional million dollars shall be spent for storage of water to be used solely by

And, further, proud of the glories of the State, the beauties of the Yosemite, the delights of the Sierra, the city proposes to expend another million dollars in making the sublime scenery of the Hetch Hetchy and Yosemite accessible to people of small means and limited leisure. The historical associations and the

league for the preservation of California landmarks are more jealous of the preservation of California's natural beauties than can be the residents of remote cities-men who never have seen California and probably would never go to the Hetch Hetchy if they had time and opportunity.

A people who undauntedly met the greatest disaster in all the world's history and who rebuilt a devastated city ought to be given sufficient consideration to enable them to select their own water supply and to ease the tax burden which falls most heavily upon those who work for a living. The Hetch Hetchy question is not "a raid upon the Yosemite"; it is a question solely of providing pure water in ample supply to human beings.

ARMY BOARD FINDINGS.

[Extracts from conclusions of Board of U. S. Army Engineers. (H. Doc. No. 54, 63d Cong., 1st sess.)]

The project proposed by the city of San Francisco, known as the Hetch Hetchy project, is about \$20,000,000 cheaper than any other feasible project for furnishing an adequate supply.

The Hetch Hetchy project has the additional advantage of permitting the development of a greater amount of water power than any other.

The board is of the opinion that the use of the Hetch Hetchy Valley as a reservoir site is necessary if the full flow of the upper Tuolumne is to be conserved.

The board further believes that there will be sufficient water, if adequately stored and economically used, to supply both the reasonable demand of the bay communities and the reasonable needs of the Turlock-Modesto irrigation districts for the remainder of this century.

The board believes that on account of the fertillity of the lands under irrigation and their aridness without water the necessity of preserving all available water in the valley of California will sooner or later make the demand for the use of Hetch Hetchy as a reservoir practically irresistible. The board does not think that a delay of a few years in transforming the Hetch Hetchy Valley into a reservoir is of importance, and therefore does not think it necessary to require delaying construction of this reservoir until the Lake Eleanor and Cherry sources have been fully developed.

The board believes that the regulations proposed by the city will be The board believes that the regulations proposed by the city will be found sufficient to protect the waters from pollution, and that these regulations will tend toward the protection of campers and others using the park and will not be onerous upon them. It recommends, however, that the permit to the city require the city to take other means, such as filtration, to purify its water supply if these regulations are ever deemed insufficient.

The construction of reservoirs, especially the Hetch Hetchy, will destroy a few camping grounds in the park. The construction of the proposed trails will, however, render accessible other parts of the park not now readily reached, and the number of camping places within the park is large.

Construction of Tuolumne system as proposed by city of San Francisco, to be extended over about 50 years, \$77,000,000.

Against the above expenditures there will be developed 115,000 horsepower, having an estimated capitalized net value of \$45,000,000.

THE SECRETARY OF THE INTERIOR, Washington, May 29, 1913.

My Dear Mr. Underwood: I have been in receipt for some time of communications from San Francisco respecting their water situation. The newspapers and others are keeping it as quiet as possible, but the situation is one of emergency and of actual distress. As you doubtless know there has been pending here for some 10 years or more an application before this department for rights of way which will permit the use of the Hetch Hetchy Valley as a reservoir for San Francisco's water supply.

of the Hetch Hetchy Valley as a reservoir for San Francisco's water supply.

When I was city attorney of San Francisco I made an argument before Secretary Hitchcock in this matter and have been interested in it ever since. Secretary Fisher just before he went out of office said that the matter was one that should be dealt with by Congress. I was appealed to to revoke this decision, but said that owing to the fact that I had been a constant advocate of such a permit and was one of the attorneys of record in the matter. I felt it would be improper for me to act further than to express to Congress my opinion that this was a matter almost vital to San Francisco's growth as well as her present needs.

needs.

I am advised to-day that the matter of securing the necessary legislation under which the Tuolumne waters may be used for a municipal water supply can be taken up by Congress as an emergency matter if you will say the word. San Francisco's need is so great that I think such action would be entirely justifiable. There is absolutely no politics in the matter. The president of the Spring Valley Water Co., which now supplies the city, in describing the water supply in that city recently said, "It is doing the city more harm than the earthquake ever did."

I quite realize the pressure that is brought to bear upon you with respect to legislation that Members desire to push at this session. This fact, however, is not to be lost sight of, that a delay as to the Hetch Hetchy water supply now means the postponement for at least a year of securing the relief for San Francisco. There is sufficient data already had for the Land Committee to act upon, and there is no question of policy involved affecting anything other than this one proposition.

I hope from these considerations that you will find it practicable to make the exception and permit this proposition to be considered during this session of Congress.

Respectfully, yours,

Franklin K. Lane.

Hon. OSCAR W. UNDERWOOD, House of Representatives.

LANE TESTIFIES AT HEARING.

San Francisco needs a new and adequate water supply. The water supply that she has now has been developed from time to time during the last 50 years, and the city has outgrown it. The situation in San Francisco now is that there are many homes where sufficient water can

not be had for a bath; where it is necessary in the new and growing portions of the city to leave a spigot turned on at night in order to get sufficient water for the morning breakfast. More than that, you know the situation that developed immediately after the earthquake. San Francisco attempted to supplement her fresh-water supply with a saltwater supply drawn from the ocean—an emergency supply in case of

water supply drawn from the fire.

There is every kind of reason why San Francisco should have a larger supply of water than she has. At the present time they are advertising in the papers that people must stop washing down their steps, washing off the sidewalks, and watering their lawns, because the materials not to be had.

advertising in the papers that people must stop washing down their steps, washing off the sidewalks, and watering their lawns, because the water is not to be had.

The Hetch Hetchy Valley is distant from the Yosemite Valley and in no way touches that beautiful scenic valley. The Hetch Hetchy Valley I have never seen, but it is a valley in a canyon which is partly submerged during a part of the year, which, as I learned 10 years or more ago, was for the greater part even of the summer season an impossibility for camping purposes because of the mosquitoes there, there being so much swamp. Great cliffs arise around it.

* I think that I have as much appreciation of natural beauty as anyone, and as much of a desire to conserve the natural beauties of my own home State as anyone, and my conclusion, after thinking of this thing a long while, has been that to turn that valley into a lake would add to the beauty of the whole thing rather than to detract from it in any way.

* * * Both the private engineers and the War engineers have reached the conclusion that this dam site must eventually be used. California needs water for other than municipal purposes, for irrigation purposes, and she needs this water that comes down from these high mountains for power, because she has no coal, so that it is probably a matter of but a few years, even if this application were denied, and if this bill should fail to pass it would be only a very few years before you would find yourselves pressed by the State of California or by private parties with large public influence behind them to set aside this identical site as a dam site for the holding back of the flood waters which run to waste, so that those waters might be used for irrigation purposes, and for power purposes, if not for municipal purposes; and it has seemed to me, in looking over the whole situation, that San Francisco's demand or request made to the Secretary of the Interior has been to see that the interests of the Government were protected. I have looked over this bill,

In building this dam San Francisco will necessarily build roads which will make the high sierra accessible—will make that whole portion of the park accessible to hundreds of thousands of people who never will have any chance to go in there if it remains as at present. Therefore it seems to me that as a park proposition alone this thing is worth while.

I think, as one having charge of the park, that it will be beneficial, and that anyone who really knows the country and appreciates the advantages that will come by the opening up of it and making it accessible and putting it to use must indorse this proposition as against some rather doubtful esthetic consideration.

San Francisco has absolutely needed an additional water supply for

I am advised by the irrigation people themselves that they are satisfied that this (bill) protects their rights, and I think it becomes quite evident when you consider that the city puts up a great dam which will hold back flood waters that run idly by their land, that it must work out for their benefit if they have any right whatever to the use of the waters.
